CRISPING PINS. The A. V. translation of צִבְרִית (Is. iii. 22), though it and R. V. render the word "bags" in 2 K. v. 23. The rendering of the R. V. (Is. l. c.) "satchels" (QPB. "purse") represents more nearly the reticules of the Hebrew ladies supposed to be alluded to by the Prophet (see Delitzsch⁴ and Dillmann⁵ in loco). [F.]

CRISPUS (Κρίσπος; *Crispus*), a Jew of Corinth bearing a Latin name. Lightfoot (*Hor. Hebr.* in loc.) mentions a parallel. Both Crispus (Acts xviii. 8) and another Corinthian, Sosthenes (Acts xviii. 17), have the title of ruler of the synagogue (ἀρχισυνάγωγος). By comparison of Mark v. 22 and Acts xiii. 15 it seems to have been sometimes given to more than one of the lending elders, and not strictly confined to their president. His conversion appears to have been a turning-point in the history of St. Paul's

work at Corinth. The Apostle's preaching met with nothing but resistance from the Jews. He then turned to the Gentiles and settled in the house of Justus. At this point comes the conversion of Crispus and his household, and thenceforward the work is abundantly successful. The critical moment of Crispus' conversion, and his position, probably account for St. Paul having baptized him with his own hands (1 Cor. i. 14). Gaius and the household of Stephanus shared the distinction with Crispus, and in both these cases there is afterwards evidence of special zeal and special services rendered (Rom. xvi. 23; 1 Cor. xvi. 15). [E. R. B.]

CROSS (σταυρός, σκόλοψ). Except the Latin *crux* there was no word definitively and invariably applied to this instrument of punishment. The Greek word *σταυρός* is derived from *ἵστημι*, and properly, like *σκόλοψ*, means merely a stake (Hom. *Od.* xiv. 11; *Il.* xxiv. 433). Hence Eustathius defines *σταυροί* to be *ὁρὰ καὶ ἀπωξυμένα ξύλα*, and Hesych. *οἱ κατασκηπτοὶ σκόλοποι, χάρακες*. The Greeks use the word to translate both *palis* and *crux*; e.g. *σταυρὶ προσδεῖν* in Dio Cass. (xlix. 22) is exactly equivalent to the Latin *ad palum deligare*. In Livy even *crux* means a mere stake (in *tris sustolli cruces*, xxviii. 29), just as *vice versa* the Fathers use *σκόλοψ*, and even *stipes* (*de stipite pendens*) of a cross proper. In consequence of this vagueness of meaning, impaling (Herod. ix. 67) is sometimes spoken of, loosely, as a kind of crucifixion, and *ἀνασκολοπίζειν* is nearly equivalent to *ἀνασταυροῦν*; *αὐτὸν περ ὀβσκεινὰ στίπτεσιν ἐγερναι, αὐτὴν brachia patibulo explicuerunt*, Sen. *Consol. ad Marc.* xx.; and *Ep.* xiv. Other words occasionally applied to the cross are *patibulum* and *furca*, pieces of wood in the shape of Π (or Y) and A respectively (*Dig.* 48, tit. 13; *Plaut. Mil. Gl.* ii. 47; and in *Sall. fr. op.* Non. iv. 355, *patibulo eninens affligebatur* seems clearly to imply crucifixion). After the abolition of this mode of death by Constantine, Trebonianus substituted *furcā figendos* for *crucifigendos*, wherever the word occurred. More generally the cross is called *arbor infelix* (Liv. i. 26; Sen. *Ep.* 101), or *lignum infelix* (Cic. *per Rab.* 3); and in Greek *ξύλον* (Deut. xxi. 22). The Fathers in controversy used to quote the words *ὁ Κύριος ἐβασίλευσεν ἀπὸ τοῦ ξύλου* (Ital. *Dominus regnavit a ligno*), from Ps. xvi. 10, as a prophecy of the Cross (see Just. Mart. *Dial.* § 73; Tert. c. *Marc.* iii. 19; Aug. *Enarratt. in Psalm.* ad loc.); but these words are *adulterina et Christiana devotioe addita*: though Genebrardus thought them a prophetic addition of the LXX., and Agellinus conjectures that they read *יָד* for *הָא* (Schleusner's *Thes.*). The Hebrews had no word for a cross more definite than *יָד*, "wood" (Gen. xi. 19, &c.), and so they called the transverse beams *יָד וְיָד*, "warp and woof" (Pearson, *On the Creed*, art. iv.), like *ξύλον διδυμόν*, LXX. *Crux* is connected with *crucio*, and is often used proverbially for what is most painful (as *summum jus, summa crux*, Colum. i. 7; *quaerere in malo crucem*, Ter. *Phorm.* iii. 3, 11), and as a nickname for villains (*Quid ais, crux?* *Plaut. Pen.* ii. 5, 17). Rarer terms are *ἑλπίς* (Euseb. viii. 8), *σάβιρ* (?), and *gabalus* (Varro ap. Non. ii. 373; Macrianus ap. Capitol. *Macr.* 11). This last word is derived

from לָּבַב , *terminavit*, because a cross or stake was used for a boundary-mark.

As the emblem of a slave's disgrace and a murderer's punishment, the cross was naturally looked upon with the profoundest horror, and closely connected "with the ideas of pain, of guilt, and of ignominy" (Gibbon, ii. 153; *Nomen ipsum crucis absit non modo a corpore civium Romanorum, sed etiam a cogitatione, oculis, auribus*. Cic. *pro Rab.* 5). But after the celebrated vision of Constantine (Euseb. *V. Const.* i. 27-30), he ordered his friends to make a Cross of gold and gems, such as he had seen, and "the towering eagles resigned the flags unto the Cross" (Pearson). Thus "the tree of cursing and shame" "sat upon the sceptres and was engraved and signed on the foreheads of kings" (Jer. Taylor, *Life of Christ*, iii. xv. 1). The new standards—

"In quibus effigies crucis aut gemmata refulget,
Aut longis solido ex auro praeferitur ab hastis,"
(Prudent. in *Symon*. li. 464 sq.)

were called by the name *Labarum*, and may be seen engraved in Baronius (*Ann. Eccl.* A.D. 312, No. 36), or represented on the coins of Constantine the Great and his nearer successors. The *Labarum* is described in Euseb. (*V. Constant.* i. 25; cp. Sozom. *H. E.* i. 4), and, besides the pendent cross, supported the celebrated embroidered monogram of Christ (Gibbon, ii. 154; *Transversa X littera, summo capite circumflexo*, Caecil.), which was also inscribed on the shields and helmets of the legions:—

"Christus purpureum gemmant tectus in auro
Signabat labarum; clypeorum insignia Christus
Scripserat, ardebat summis
crux addita cristis."
(Prudent. *l. c.*)

Nay, the $\sigma\upsilon\mu\beta\omicron\lambda\omicron\nu$ $\sigma\alpha\tau\eta\rho\iota\omicron\nu$ was even more prominently honoured; for Jerome says, *Regum purpuras et ardentes diadematum gemmas patibuli Salvatoris pictura condecorat* (*Ep. ad Laetam*). See further in Du Cange, s. v. *Labarum*.

We may tabulate thus the various descriptions of cross (Lips. *de Cruce*, i.; Godwin's *Moses and Aaron*):—

Crux.

1. Simplex.

Compacta.

2. Decussata, St. Andrew's, or Burgundian.

3. Commissa and ansata.

4. Immissa, or capitata (Lettn).

X

†

+

1. The *cruz simplex*, or bare stake "of one single piece without transom," was probably the

original of the rest. Sometimes it was merely driven through the man's chest, but at other times it was driven longitudinally, $\delta\iota\alpha\ \rho\acute{\alpha}\chi\epsilon\omega\varsigma\ \kappa\alpha\iota\ \nu\acute{\alpha}\tau\omicron\upsilon$ (Hezech. s. v. $\sigma\kappa\acute{o}\lambda\omicron\sigma\phi$), coming out at the mouth (Sen. *Ep.* xiv.; *Consol. ad Marc.* 20), a method of punishment called $\acute{\alpha}\nu\alpha\sigma\kappa\iota\nu\delta\epsilon\lambda\epsilon\upsilon\sigma\iota\varsigma$, or *infixio*. The *affixio* consisted merely of tying the criminal to the stake (*ad palum deligare*, Liv. xvi. 13), from which he hung by his arms: the process is described in the little poem of Ausonius, *Cupido crucifixus*. Trees were naturally convenient for this purpose, and we read of their being applied to such use in the Martyrologies. Tertullian also tells us (*Apol.* viii. 16) that to punish the priests of Saturn, Tiberius in *eisdem arboribus, dumbratricibus scelerum, votivis crucibus explicuit* (cp. Tac. *Germ.* xii., *Proditores et transfugas arboribus suspendunt*). How far the expression "accursed tree" is applicable under this head is examined under the word CRUCIFIXION.

2. The *cruz decussata*, X, is called St. Andrew's Cross, although on no good grounds, since, according to some, he was killed with the sword; and Hippolytus says that he was crucified upright, *ad arborem olivæ*. It is in the shape of the Greek letter X (Jerome, in *Jer.* xxxi.; *X littera et in figurâ crucem, et in numero decem demonstrat*, Isidor. *Orig.* i. 3). Hence Justin Martyr (*Dial. c. Tryph.* p. 200) quotes Plato's expression, $\acute{\epsilon}\chi\lambda\alpha\varsigma\epsilon\nu\ \alpha\upsilon\tau\omicron\nu\ \epsilon\nu\ \tau\omicron\phi\ \pi\acute{\alpha}\nu\tau\iota$, with reference to the Cross. The Fathers, with their usual luxuriant imagination, discover types of this kind of Cross in Jacob's blessing of Joseph's sons, $\chi\acute{\epsilon}\rho\sigma\iota\nu\ \acute{\epsilon}\nu\eta\lambda\lambda\alpha\gamma\mu\acute{\epsilon}\nu\alpha\iota\varsigma$ (cp. Tert. *de Baptismo*, viii.); in the anointing of priests "decussatively" (Sir T. Browne, *Garden of Cyrus*); for the Rabbis say that kings were anointed in *formâ coronæ, sacerdotes autem* כִּי יִמָּשֵׁךְ , *ad modum Chi*, i.e. *ad formam X Graecorum* (Schoettgen's *Hor. Hebr. et Talm.* ii. 486); and in the crossing of the hands over the head of the goat on the day of Atonement (Targ. *Jonath. ad Lev.* xvi. 21, &c.).

3. The *cruz commissa*, or St. Anthony's Cross, T (so called from being embroidered on that saint's cope, Mrs. Jameson's *Sacred Art*, i. xxxv.), was in the shape of a T. Hence Lucian, in his amusing $\Delta\iota\kappa\eta\ \phi\omega\nu\eta\rho\acute{\epsilon}\tau\omega\nu$, jocosely derives $\sigma\tau\alpha\upsilon\rho\acute{o}\varsigma$ from $\tau\alpha\upsilon$ ($\acute{\alpha}\nu\theta\ \tau\omicron\upsilon\tau\omicron\upsilon$) . . . $\kappa\alpha\iota\ \tau\omicron\phi\ \tau\epsilon\chi\eta\eta\mu\alpha\tau\iota\ \tau\omicron\phi\ \pi\omega\tau\eta\rho\acute{\epsilon}\ \tau\eta\nu\ \pi\omega\tau\eta\rho\acute{\alpha}\nu\ \acute{\epsilon}\kappa\alpha\nu\omicron\upsilon\mu\iota\alpha\nu\ \sigma\upsilon\nu\epsilon\lambda\theta\epsilon\iota\nu$, and makes mankind accuse it bitterly for suggesting to tyrants the instrument of torture (*Jud. Vocal.* 12). This shape is often alluded to as "the mystical Tau" (*Garden of Cyrus*; *nostra autem T species crucis*, Tert. *adv. Marc.* iii. 22; Jer. in *Ezech.* ix., &c.). It is known as the patibulary or Egyptian cross, but seems to be of Phœnician origin (see Ezek. ix. 4; Didron, *Ann. Archéol.* xxvi. xxvii.; and cp. Tert. *adv. Marc.* iii. 22). As that letter happens to stand for 300, opportunity was given for more elaborate trifling; thus the 300 cubits of the ark are considered typical (Clem. Alex. *Strom.* vi.; S. Paullin. *Ep.* ii.); and even Abraham's 318 servants. Since 318 is represented by $\tau\eta\theta$, the Fathers deduced $\tau\omicron\nu\ \mu\acute{\epsilon}\nu\ \text{Ἰησοῦν ἐν τοῖς δίστοι γραμμασιν καὶ ἐν ἐνὶ τὸν σταυρὸν}$ (Barnab. *Ep.* ix.; Clem. Alex. *Strom.* vi. § 11; Ambros. *Prol. in l. i. de Fide*; Pearson [art. iv.] on the *Creed*, in whose notes these passages are quoted).

A variety of this cross (the *cruz ansata*, "crossea with circles on their heads") is found "in the sculptures from Khorsabad and the ivories from Nimrod. M.

Lajard (*Observations sur la Croix ansée*) refers it to the Assyrian symbol of divinity, the winged figure in a circle; but Egyptian antiquaries quite reject the theory" (Lajard's *Nineveh*, ii. 213, note). In the Egyptian sculptures, a similar object, called a *cruz ansat*, is constantly borne by divinities, and is variously called "the key of the Nile" (Dr. Young in *Encycl. Britan.*; Crenzer, *Symbolik*, pp. 168, 169), "the character of Venus;" and more correctly (as by Lacroze) "the emblem of life." Indeed this was the old explanation (*ἐμπνευσταὶ σημαῖν ταύτην γραφὴν ζωῆς ἐπέρχομένη*, Soxomen, *Hist. Eccl.* vii. 15; so too Rufinus, ii. 29, who says it was one of the "heparical *tel sacerdotales litterae*"). "The Egyptians thereby expressed the powers and motion of the spirit of the world, and the diffusion thereof upon the celestial and elemental nature" (Sir T. Browne, *Gard. of Cyrus*). This too was the signification given to it by the Christian converts in the army of Theodosius, when they remarked it on the temple of Serapis, according to the story mentioned in Suidas. The same symbol has been also found among the Copts, and (perhaps accidentally) among the Indians and Persians.

4. The *cruz immissa* (or Latin cross, †) differed from the former by the projection of the δόρυ ὑψηλόν (or *stipes*) above the κέρας ἐγκάρσιον, or *patibulum* (Euseb. *de V. Constant.* i. 31). That this was the kind of Cross on which our Lord died is obvious (among other reasons) from the mention of the "title" as placed above our Lord's head, and from the almost unanimous tradition; it is repeatedly found on the coins and columns of Constantine. Hence ancient and modern imagination has been chiefly tasked to find symbols for this sort of Cross, and has been eminently successful. They find it typified, for instance, in the attitude of Moses during the battle of Rephidim (Ex. xvii. 12), saying that he was bidden by the Spirit, *ἵνα ποιῇσθαι τέκνον σταυροῦ καὶ τοῦ μέλλοντος πάσχειν* (Barnab. *Ep.* 12; Just. Mart. *Dial.* c. *Tryph.* 89; *habitus crucis*, Tert. *adv. Marc.* iii. 18). Firmic. Maternus (*de Errore*, xxi.) says that Moses made a Cross of his rod, *ut facilius impetraret quod magnopere postulareret, crucem sibi fecit ex virgâ*. He also fantastically applies to the Cross expressions in Hab. iii. 3-5; Is. ix. 6, &c. Other supposed types are Jacob's ladder (Jer. *Com. in Ps.* xci.; *Dominus innixus scalae Christus crucifixus ostenditur*, August. *Serm. de Temp.* lxxix.); the paschal lamb, pierced by transverse spits (*σχηματίζμενον ὁμοίως τῷ σχήματι τοῦ σταυροῦ ὁπάραι*, Just. M. *Dial.* c. *Tryph.* xl.); and "the Hebrew Tenupha, or ceremony of their oblations waved by the priest into the four quarters of the world after the form of a cross" (Vitringa, *Obs. Sacr.* ii. 9; Schoettgen, *l. c.*). A truer type (John iii. 14) is the elevation (ἡλῆν), Chald. of the fiery serpent (Num. xxi. 8, 9). For some strange applications of texts to this figure see Cyp. *Testim.* ii. xx. sq. In Matt. v. 18, *ἵνα ἐν ἡ μία κεφαλή* is also made to represent a Cross (1 *ἐστὶ τὸ ὄρθον ἔξωλον καὶ κεφαλή τὸ πλάγιον*, Theophyl. in loc.,

&c.). To the four ἄκρα of the Cross they also applied the ὕψος καὶ βάθος καὶ πλάτος καὶ μήκος of Ephes. iii. 18 (as Greg. Nyss. and Aug. *Ep.* 120); and another of their fancies was that there was a mystical significance in this δόρυ τετραπλευρον (Nonn. in *Joh.* xix. 18), because it pointed to the four corners of the world (*Quatuor inde plagas quadrati colligit orbis*, Sedul. iii.). In all nature the sacred sign was found to be indispensable (*κατανοήσαντες πάντα ἐν τῷ κόσμῳ εἰ ἄνευ τοῦ σχήματος τούτου διακρίναι*, Just. M. *Apol.* i. 72), especially in such things as involve dignity, energy, or deliverance; as the actions of digging, ploughing, &c., the human face, the *antennae* of a ship in full sail, &c. *Aves quando volant ad aethera signum crucis assumunt. Homo natans, vel orans, formâ crucis utitur* (Jer. in *Marc.* xi.). *Signa ipsa et cantabra et vexilla quid aliud quam innuntiant cruces sunt?* (Min. Fel. Oct. xxix.). Similar analogies are repeated in Firm. Maten. *de Errore*, xxi.; Tert. *adv. Nat.* i. 12; *Apol.* 16; *de Coron.* Mil. 3; and, in answer to the sneers of those to whom the Cross was "foolishness," these analogies were considered sufficient proof that *signo crucis aut ratio naturalis nititur aut vestra religio formatur* (Min. Fel., &c.: see Tilli-mont, vii. 8-16; Baronius, *Ann. Eccl.* A.D. 326). The types adduced from Scripture were valuable to silence the difficulties of the Jews, to whom, in consequence of Dent. xxi. 22 (*ἐκκρεμάσθαι δὲ σταυρούμενον*), the Cross was an especial "stumbling-block" (Tert. *adv. Jud.* ix.). Many such fancies (e.g. the harmlessness of cruciform flowers, the southern cross, &c.) are collected in *Communications with the Unseen World*.

Besides the four ἄκρα (*apices*, Tert.) of the cross, was a fifth (πῆγμα), projecting out of the central stem, on which the body of the sufferer rested (*ἐπ' ᾧ ἐποχούνται οἱ σταυρούμενοι*, Justin Mart. *Dial.* 91, who [*more suo*] compares it to the horn of a rhinoceros; *sedilis excessus*, Tert. *adv. Nat.* i. 12; *ubi requiescit qui clavis affigitur*, Iren. *adv. Haeres.* i. 12). This was to prevent the weight of the body from tearing away the hands, since it was impossible that it "should rest upon nothing but four great wounds" (Jer. Taylor, *Life of Christ*, iii. xv. 2, who erroneously quotes the δόρυ τετραπλευρον of Nonnus). This projection is probably alluded to in the famous lines of Maecenas (*ap. Sen. Ep.* 101):—

"Vita dum superest bene est;
Hanc mihi vel acutis
Si sedeam cruce, sustine."

Ruhkopf (ad loc.) so explains it, and it is not so probable that it refers to ἀνασκινδύλων as Lipsius thinks (*de Cruce*, i. 6). Whether there was also a ὀροπόδιον or support to the feet (as we see in pictures), is doubtful. Gregory of Tonnra mentions it; but he is the earliest authority, and has no weight (G. J. Voss, *Harm. Passion.* ii. 7, 28).

An inscription, *titulus* or *elogium* (*ἐπιγραφή*, Luke xxiii. 38; *acta*, Matt. xxvii. 37; ἡ ἐπιγραφή τῆς αἰτίας, Mark xv. 26; τίτλος, John xix. 19; *Qui causam poenae indicavit*, Suet. Cal. 32; *πινὰς*, Euseb.; *γράμματα τῶν αἰτίων τῆς θανάσεως δηλοῦντα*, Dio Cass. liv. 3; *πτυχίον ἐπιγράμμα ἔχον*, Hesych. *Πη*), was generally placed above the person's head, and

briefly expressed his guilt, as *οὐτός ἐστιν Ἀτταῖος ὁ χριστιανός* (Euseb. *H. E.* v. 1), *Impie locutus parmularius* (Suet. *Dom.* x.), and generally was carried before the criminal (*præcedente titulo*, Suet.). It was covered with white gypsum, and the letters were black; hence Sozomen calls it *λευκωμα* (*H. E.* ii. 1), and Nicephorus a *λευκή σάβυς* (*H. E.* viii. 29). But Nicquetus (*Tit. Sanct. Crucis*, i. 6) says it was white with red letters.

A common tradition assigns the perpetual shiver of the aspen to the fact of the Cross having been formed of its wood. Lipsius, however (*de Cruce*, iii. 13), thinks it was of oak, which was strong enough, and common in Judea. Few will attach any importance to his other reason, that the relics appear to be of oak. The legend to which he alludes,

"Pes crucis est cecur ut, corpus tenet alta cupressus,
Palma manus retinet, titulo lætatur oliva,"

hardly needs refutation. It must not be overlooked that crosses must have been of the meanest and readiest materials, because they were used in such marvellous numbers. Thus we are told that Alexander Jannæus crucified 800 Jews (Joseph. *Ant.* xiii. 14, § 2); Varus 2000 (*id.* xvii. 10, § 10); Hadrian 500 a day; and Titus so many that *χωρὴ τε ἐνελέγετο τοῖς σταυροῖς καὶ σταυροὶ τοῖς σώμασιν* (Joseph. *Bell. Jud.* vi. 28), where Reland rightly notices the strange retribution, "so that they who had nothing but 'crucify' in their mouth, were therewith paid home in their own bodies" (Sir T. Browne, *Vulgy. Err.* v. 21). In Sicily, Augustus crucified 600 (Oros. vi. 18).

It is a question whether tying or binding to the cross was the more common method. In favour of the first are the expressions *ligare* and *deligare*; the description in Ausonius (*Cupido Crucif.*); the Egyptian custom (Xen. *Ephes.* iv. 2); the mention by Pliny (xviii. 11) of *spartum e cruce* among magical implements; and the allusion to Crucifixion noted by the Fathers in John xix. 24 (Theophyl. *ad loc.* and Tert. *Tunc Petrus ab altero cingitur cum cruce astringitur*). On the other side we have the expression *προσηλῶσθαι*, and numberless authorities (Sen. *de Vit. Beatâ*, xix.; Artemidor. *Oneirocr.* in several passages; Apul. *Met.* iii. 60; Plaut. *Mostel.* ii. 1, 13, *et passim*). That our Lord was nailed, according to prophecy, is certain (John xx. 25, 27, &c.; Zech. xii. 10; Ps. xxii. 16; *Poderunt manus meas et pedes, quæ propria atrocitas crucis*, Tert. *ado. Marc.* iii. 19, &c.; *ῥουφάρ*, LXX.; Aquil. *ῥσχωνάρ*; although the Jews vainly endeavour to maintain that here "כָּסָה", "like a lion," is the true reading. Sixt. Senensis, *Bibl. Sanct.* viii. 5, p. 640). It is, however, extremely probable that both methods were used at once: thus in Lucan (vi. 547 sq.) we have mention both of *nodos nocentes* and of *insertum manibus chalybem*; and Hilary (*de Trin.* x.) mentions together *colligantium funium vincula et adactorum clavorum vulnera*. We may add that in the crucifixion (as it is sometimes called, Tert. *adv. Marc.* i. 1, cp. Manil. *de Androm.* v.) of Prometheus, Aeschylus, besides the nails, speaks of a *μαρχαλιωτήρ* (*Prom.* 79). When either method was used alone, the tying was considered more painful (as we find in the Martyrologies), since it was a *diutinus cruciatus*.

BIBLE DICTIONARY.—VOL. I.

It is doubtful whether three or four nails were employed. The passage in Plaut. *Most.* ii. 1, 13, is, as Lipsius (*de Cruce*, ii. 9) shows, indecisive. Nouns speak of the two feet (*δυσσλοκέες*) being fastened with one nail (*ἄνυγρόμωφ*), and Gregory Nazianzen (*de Christ. pat.*) calls the Cross a *ξύλον τρισηλῶν*: hence on gold and silver Crosses the nails were represented by one ruby or carbuncle at each extremity (Mrs. Jameson, *l. c.*). In the "invention" of the Cross, Socrates (*H. E.* i. 17) only mentions the hand-nails; and that only two were found is argued by Winer (*s. v. Kreuzigung*) from the *τὰ μὲν, τὰ δὲ* (instead of *τοὺς μὲν*) in Theodor. *H. E.* i. 17. Romish writers, however, generally follow Gregory of Tours (*de Glor. Mart.* vi.) in maintaining that four nails were used, which may also be implied by the *plural* in Cypr. *de Passione* (*clavis . . . pedes terebrantibus*), who also mentions three more, used to nail on the title. Cyprian is a very good authority, because he had often been a witness of executions. There is a monograph on the subject by Corn. Curtius (*de clavis dominicis*, Antw. 1670). What has been said sufficiently disproves the calumny against the Albigenses in the following very curious passage of Lucas Tudensis (ii. *contra Albig.*): *Albigenses primi pinxerunt imaginem crucifixi uno clavo simul utrumque pedem configente, et virginem Mariam Monoculam; utrumque in derisionem: sed postea prior figura retenta est, et irrepsit in vulgarem famam* (quoted by Jer. Taylor, *l. c.*). On the supposed fate of the nails, see Theodor. *H. E.* i. 17. Constantine fastened one as a *φυλακτήριον* on his horse's bridle, and one (Zonaras says *some*) on the head of the statue which he intended to be the palladium of Constantinople, and which the people used to surround with lighted torches (Mosheim, *Ecc. Hist.* ii. 1, 3, and notes). The *clavis pedis dextri* is shown at Trèves (Lips. ii. 9, note).

The story of the so-called "invention of the Cross," A.D. 326, is too famous to be altogether passed over. Besides Socrates and Theodoret, it is mentioned by Rufinus, Sozomen, Paulinus, Sulp. Severus, and Chrysostom, so that Tillemont (*Mém. Ecc.* vii.) says that *nothing can be more certain*; but, even if the story were not so intrinsically absurd (for among other reasons it was a law among the Jews that the cross was to be burnt, Otho, *Lex. Rab.* s. v. *Supplicia*), it would require far more probable evidence to outweigh the decisive silence of Eusebius (*Vit. Const.* iii. 26 sq.) in his account of the visit of Helena to Jerusalem. It clearly was to the interest of the Church of Rome to maintain the belief, and encourage the story of the miraculous multiplication of "the wood of the true Cross," because the sale of fragments was extremely profitable. The story itself is too familiar to need repeating. To this day the supposed title, or rather fragments of it, are shown to the people once a year in the church of Sta. Croce in Gerusalemme at Rome. On the capture of the true Cross by Choroëz II., and its rescue by Heraclius, with even the seals of the case unbroken, and the subsequent sale of a large fragment to Louis IX., see Gibbon, iv. 326, vi. 66. Those sufficiently interested in the subject may see further accounts in Baronius (*Ann. Ecc.* A.D. 326, No. 42-50), Jortin, and

2 X

Schmidt (*Problem. de Crucis Dominicae Inventione*, Helmst. 1724); and "On the fate of the true Cross," a paper read by Lord Mahon before the Society of Antiquaries, Feb. 1831 (cited by Dean Milman). Even Cyril of Jerusalem (*Catech.* iv. 10) says that fragments of the true Cross had found their way all over the world.

It is an interesting and remarkable fact that Clement of Alexandria does not mention the Cross among Christian symbols worn on signet rings, &c., when he mentions the ship, the dove, the fish, the anchor, the harp (*Paed.* iii. 11, § 59); and except in the disguised forms of the monogram of Christ and the *Gammadias*, they do not occur in the earliest frescoes of the Catacombs. The Latin Cross is first found on the tomb of Galla Placidia, A.D. 451. Even when the adoption of the Cross by Constantine began to make it a public and recognised symbol, it was set with gems and wreathed with flowers, and regarded as an emblem of exultation and triumph, not of defeat and agony. The early Christians did not regard the Atonement exclusively from the point of view of the propitiatory Blood, but as including every act of the Divine drama, from the Incarnation to the Session at the right hand of the Father.

It was not till the 6th century that the emblem of the Cross became the *image* of the Crucifix. As a symbol the use of the Cross was frequent in the early Church (*Orig. c. Cels.* ii. 47; *frontem crucis signaculo terimus*, Tert. *de Cor. Mil.* iii.: cp. *Apol.* 16; *Ad Nat.* i. 12). It was not till the 2nd century that any particular efficacy was attached to it (*Cypr. Testim.* ii. 21, 22; *Lact. Inst.* iv. 27; cp. *Ambr. de obit. Theodos.* 46; *Sozom. H. E.* ii. 3, &c.; *Mosheim*, ii. 4, 5). On its subsequent worship by the Church of Rome, which passed insensibly from *προσκύνησις* to *λατρεία*, see Jer. Taylor's *Diss. from Popery*, i. ch. ii. 7, 12; and on the use of the sign in our Church, Hooker's *Ecol. Pol.* v. 65. Some anpose an allusion to the custom in Ezek. ix. 4 (*Pole, Synops.* ad loc.; *Gesen.*, a. v. 17; *signum spec. cruciforme*, Sixt. Sen. ii. p. 120).

Besides the noble monograph of Lipsius, *de Cruce* (from which we have largely borrowed, and which quotes so many authorities that it has been a mine of erudition for later writers), there are works by Salmasius (*de Cruce*, Epp. 3); Kippingius (*de Cruce et Crucifixis*, Brem. 1671); Bosius (*de Cruce triumphante et gloriosa*, Antwerp, 1617); Gretser (*de Cruce Christi*); and Bartholinus (*Hypomnemata de Cruce*). Very much may also be gleaned from the learned notes of Bishop Pearson (*On the Creed*, art. iv.). Other authorities are cited or alluded to in the article itself. [CRUCIFIXION.] Further details respecting the use of the Cross, its adoration, and "the invention of the Cross," do not belong to our subject. They will be found fully treated in the *Dictionary of Christian Antiquities*.

On the history of the Cross as a Christian symbol, see Didron, *Iconographie*; Binterim, *Denkwürdigkeiten*; De Rossi, *De titulis Christ. Carthaginiensibus*; St. Laurent and Martigny, in Didron's *Annales Archéologiques*, xxvi., &c. The Fathers recognised that it entered into heathen as well as Christian symbolism. See Minuc. Fel. *Octar.* 29; Tert. *Apol.* 16; *Ad Nat.* i. 12.

[F. W. F.]

CROWN (קִרְיָן). This ornament, which is both ancient and universal, probably originated from the fillets used to prevent the hair from being dishevelled by the wind. Such fillets are still common, and they may be seen on the sculptures of Persepolis, Nineveh, and Egypt; they gradually developed into turbans, which by the addition of ornamental or precious materials assumed the dignity of mitres or crowns (*Jos. Ant.* iii. 7, § 7). The use of them as ornaments was probably suggested by the natural custom of encircling the head with flowers in token of joy and triumph. ("Let us crown ourselves with rosebuds," *Wisd.* ii. 8; 3 *Macc.* vii. 16; *Judith* xv. 13, and the classical writers, *passim*; *Winer*, s. v. *Κράνος*). The Jews only borrowed the use of garlands at banquets from the Greeks in post-biblical times. The first crown was said to have been worn for Pandora by the Graces (cp. *στέφανος χαίρων*, *Prov.* iv. 9 = *στέφανος τῶν πνευματικῶν χαρμύτων*, *Lex. Cyr.*). According to Pherecydes, Saturn was the first to wear a crown; Diodorus says that Jupiter was first crowned by the gods after the conquest of the Titans. Pliny, *Harporacian*, &c., ascribe the earliest use of crowns to Bacchus, who gave to Ariadne a crown of gold and Indian gems, and assumed the laurel garland after his conquest of India. Leo Aegyptius attributes the invention to Isis, whose wreath was cereal. These and other legends are collected by Tertullian (*de Coronâ militis*, § 7) from the elaborate treatise on crowns by Claud. Saturnius (*præstantissimus in hac materia commentator*). Pliny also has much to say about them (*H. N.* xvi. 3 sq., xxi. 3 sq.). Another tradition says that Nimrod was the first to wear a crown, the shape of which was suggested to him by a cloud (Eutychius Alexandr. *Asa.* i. p. 63). Tertullian (*ubi supra*, § 7) argues against all kinds of garlands as unnatural and idolatrous. He is, however, singularly unsuccessful in trying to disprove the countenance given to them in Scripture, where they are constantly mentioned. He says, *Quis . . . episcopum invenitur coronatus?* (chap. 9). But both the ordinary priests and the high-priest wore "crowns." The common mitre (קִרְיָן, *קריאן*, *Ex.* xxviii. 37, xxix. 6, &c.; *tauila*, *Jos.*; *στέφανος ὁ ἐπεὶ φορεῖται*, Hezych.) was a *πίλος ἄκατος*, forming a sort of linen *taenia* or crown (*στέφανος*), *Jos. Ant.* iii. 7. The קִרְיָן (στέφανος *τίδρα*) of the high-priest (used also of a regal crown, *Ezek.* xxi. 26) was much more splendid (*Ex.* xxviii. 36. See Knobel-Dillmann in loco). It was "an ornament of honour, a costly work, the desires of the eyes, goodly and beautiful" (*Ecclus.* xlv. 12). In *Lev.* viii. 9 it is called "the holy crown," which however Ewald renders "the (sign of) consecration," from the Tetragrammaton inscribed on it (*Soprane, de re Vest. Jud.*, p. 441). It had a second fillet of blue lace (ἡ δακτύλου περικλμένος, the colour being chosen as a type of heaven), and over it a golden diadem (קִרְיָן, *Ex.* xxix. 6), "on which blossomed a golden calyx like the flower of the *דשאמור*" (*Jos. Ant.* iii. 7, § 6). The gold band (קִרְיָן, LXX. *πέταλον*, *Orig. λαοστήριον*) was tied behind with blue lace (embroidered with flowers), and being two fingers broad, bore the inscription (not in bas-relief, as

Abarbanel says) "Holiness to the Lord" (cp. Rev. xvii. 5; Braunius, *de Vest. Sacerd.* ii. 22; Maimon. *de Apparatu Templi*, ix. 1; Reland, *Antiq.* ii. 10; Carpzov. *Appar. Crit.* p. 85; Jos. B. J. v. 5, § 7; Philo, *de Vit. Mosii*, iii. 519). Some suppose that Josephus is describing a later crown said to have been given by Alexander the Great to Jaddua (Jennings' *Jew. Ant.* p. 158); but more probably he is simply adopting the assertions of the Rabbis, for in the Bible the only distinction between the high-priest's "crown" and the simple turban of the other priests consisted in the addition of the gold plate. The use of the crown by priests and in religious services was universal, and perhaps the badge belonged at first "rather to the pontificalia than the regalia." Thus Q. Fabius Pictor says that the first crown was used by Janus *when sacrificing*. "A striped head-dress and queue," or "a short wig, on which a band was fastened, ornamented with an asp, the symbol of royalty," was used by the kings of Egypt in religious ceremonies (Wilkinson's *Anc. Egypt.* ii. 324, smaller ed. [1878]). The crown worn by the kings of Assyria was "a high mitre . . . frequently adorned with flowers, &c., and arranged in bands of linen or silk. Originally there was only one band, but afterwards there were two, and the ornaments were richer" (Layard, ii. 320, and the illustrations in Jahn, *Arch.*, Germ. edit., part i. vol. ii. tab. ix. 4 and 8).

Crowns worn by Assyrian kings. (From Minard and Kouyundjik.)

There are several words in Scripture for a crown besides those mentioned; as כִּסֵּא (A. V. "tire," "bonnet," "ornament," "beauty"), the head-dress of bridegrooms, Is. lxi. 10 (R. V. "garland"), מִטְרָא, LXX.; Baruch v. 2; Ezek. xxiv. 17 (γρίχουμα), and of women, Is. iii. 20 (ἐμπλόκιον?). מִצְנֶפֶת (A. V. "morning;" R. V. "doom," in marg. *the turn or the crown-ing time*, Ezek. vii. 7, lit. "circle"), a head-dress of great splendour (Is. xxviii. 5, A. V. and R. V. "diadem"); לִיָּה, a wreath of flowers (στέφανος), Prov. i. 9, iv. 9, Is. xxviii. 1; חֲבִיטָה, a common tiara or turban, Job xxix. 14, Is. iii. 23 (but LXX. δῖπλοις, θρίστρον). The words כִּסֵּא, כִּסֵּא, and כִּסֵּא are spoken of under **DIADEM**. The general word is עֲטָרָה, and we must attach to it the notion of a costly *turban* interwoven with pearls and gems of great value, which often form aigrettes for feathers, as in the crowns of modern Asiatic sovereigns. Such was probably the crown, which with its precious stones weighed a talent, taken by David from the king of Ammon at Rabbah and used as the state crown of Judah (2 Sam.

xii. 30). Some groundlessly suppose that, being too heavy to wear, it was *suspended* over his head. The royal crown was sometimes buried with the king (Schickard, *Jus Reg.* vi. 19, p. 421). Idolatrous nations also "made crowns for the head of their gods" (Ep. Jer. 9).

The Jews boast that three crowns were given to them: כִּתְרֵי תוֹרָה, the crown of the Law; כִּתְרֵי כהונה, the crown of priesthood; and כִּתְרֵי מַלְכוּת, the royal crown; better than all which is כִּתְרֵי שֵׁם כְּבוֹד, the crown of a good name (Carpzov. *Apparat. Critic.* p. 60; Otho, *Lex. Talm.* s. v. *Corona*).

Στέφανος is used in the N. T. for every kind of crown; but στέμμα only once (Acta xiv. 13) for the garlands used with victims. In the Byzantine Court the latter word was confined to the imperial crown (Du Fresnoy, *Gloss. Græc.* p. 1442). The use of funeral crowns is not mentioned in the Bible.

In Rev. xii. 3, xix. 12, allusion is made to "many crowns" worn in token of extended dominion. Thus the kings of Egypt used to be crowned with the "pschent" or *united* crowns of Upper and Lower Egypt (Wilkinson, *A. E. i.* 257, 269; li. 323, 325 [1878]; cp. Layard, ii. 320); and Ptolemy Philometor wore *two* diadems, one for Europe and one for Asia. Similarly the three crowns of the Papal tiara mark various accessions of power: the first corona was added to the mitra by Alexander III. in 1159; the second by Boniface VIII. in 1303; and the third by Urban V. in 1362.

The laurel, pine, or parsley crowns given to victors in the great games of Greece are finely alluded to by St. Paul (1 Cor. ix. 25; 2 Tim. ii. 5, &c.). They are said to have originated in the laurel-wreath assumed by Apollo on conquering the Python (Tert. *de Cor.* Mil. 7, 15). "Crown" is often used figuratively in the Bible (Prov. xii. 4, xvii. 6; Is. xxviii. 5; Phil. iv. 1, &c.). The term is also applied to the rims of altars, tables, &c. (Ex. xxv. 25, &c.; Deut. xxii. 8, ποιησεις στεφάνην τῷ δώματι σου. *Projectura coronarum*, Vitruv. ii. 8, Plin. xxxvi. 24; *Angusti muri corona*, Q. Curt. ix. 4, 30). The ancients as well as the moderna had a coin called "a crown" (τὸν στέφανον οὐ δέειλετε, 1 Macc. xiii. 39, x. 29, E. V. "Crown-tax;" v. Suid. s. v. στέφανικὸν τέλεσμα). [**DIADEM.**]

The chief writers on crowns are Paschalius (*de Coronis*, libri x.) and Meursius (*de Coronâ*, Hafniæ, 1671). For others, see Fabricius, *Bibl. Ant.* xiv. 13. Full accounts of ancient Pagan crowns and garlands will be found in the *Dict. of Gk. and Rom. Antiquities*; and of more modern imperial crowns and wreaths, in the *Dict. of Christian Antiquities*. [F. W. F.]

CROWN OF THORNS (στέφανος ἐξ ἀκανθῶν, Matt. xxvii. 29). Our Lord was crowned with thorns in mockery by the Roman soldiers. The object seems to have been insult, and not the infliction of pain as has generally been supposed. The Rhamnus or Spina Christi, although abundant in the neighbourhood of Jerusalem, cannot be the plant intended, because its thorns are so strong and large that it could not have been woven (πλέαντες) into a wreath. The large-leaved acanthus (bear's-foot) is totally unsuited for the purpose. Had the acacia been intended, as some suppose, the phrase would

have been *ξύ ἀκάνθης*. Obviously some small flexible thorny shrub is meant; perhaps *cappares spinosae* (Reland's *Palestin.* ii. 523). Hasselquist (*Travels*, p. 288) says that the thorn used was the Arabian *Nabb* (*Zizyphus Spina-Christi*). "It was very suitable for their purpose, as it has many sharp thorns which inflict painful wounds; and its flexible, pliant, and round branches might easily be plaited in the form of a crown." It also resembles in colour the rich dark green of the triumphal ivy-wreath, which would give additional pungency to its ironical purpose (Rosemüller, *Botany of Script.* p. 202, Eng. ed.). The name of "Christ's-thorn" is also given to the Arabic *Sumûr* (*Paliurus aculeatus*), which is common in the neighbourhood of Jerusalem. On the Empress Helena's supposed discovery of the crown of thorns, and its subsequent fate, see Gibbon, ii. 306, vi. 68, ed. Milman. [F. W. F.]

CRUCIFIXION (σταυροῦν, ἀνασταυροῦν, σκαλοῖν, προσήλουν [and, less properly, ἀνασκαυδύνειν]; *cruci* or *patibulo* *afficere*, *suffigere*, or simply *figere* [Tert. *de Pat.* iii.], *cruciare* [Auson.] *ad palmam alligare*, *crucem alicui statuere*, in *crucem agere*, *tollere*, &c.: the sufferer was called *cruciarus*). The variety of the phrases shows the extreme commonness of the punishment, the invention of which is traditionally ascribed to Semiramis. It was in use among the Egyptians (as in the case of Inarus, Thuc. i. 30; Gen. xl. 19 [as usually understood]), the Phœnicians and Carthaginians (as in the case of Hanno, &c., Val. Max. ii. 7; Sil. Ital. ii. 344), the Persians (Polycrates, &c.; Herod. iii. 125, iv. 43; Esth. vii. 10, *σταυρωθήτω ἐκ' αὐτό*, LXX. v. 9), the Assyrians (Diod. Sic. ii. 1), Scythians (Id. ii. 44), Indians (Id. ii. 18; Winer, a. v. *Kreuzigung*), Germans (possibly, Tac. *Germ.* 12), and it was very frequent from the earliest times (*cræste suspendito*, Liv. i. 26) among the Greeks and Romans. Cicero, however, refers the introduction of this punishment, not (as Livy does) to the early kings, but to Tarquinius Superbus (*pro Rab.* 4). Aurel. Victor calls it *Fetus teterrimumque* (an *teterr.*?) *patibulorum supplicium*. Both *κρεμᾶν* and *suspendere* (Ov. *Ibis*, 299) refer to death by crucifixion; thus, in speaking of Alexander's crucifixion of 2000 Tyrians, *ἀνεκρέμασεν* in Diod. Sic. answers to the *Crucibus affixus*, Q. Curt. iv. 4.

Whether this mode of execution was known to the ancient Jews is a matter of dispute, on which Winer quotes a monograph by Bornitius. It is asserted to have been so by Baronius (*Annot.* i. xxxiv.), Sigonius (*de Rep. Hebr.* vi. 8), &c., who are refuted by Casaubon (c. *Baron. Exerc.* xvi.; Carpzov. *Apparat. Crit.* p. 591). The Hebrew words said to allude to it are *הָלַח* (sometimes with the addition of *עַל הָעֵץ*; hence the Jews in polemics call our Lord *תְּלִי הָעֵץ*, and Christians *עֹבְדֵי תְּלִי*, "worshippers of the crucified") and *מָקַם*, both of which in A. V. and R. V. are generally rendered "to hang" (2 Sam. xviii. 10; Deut. xxi. 22; Num. xxv. 4; Job xxi. 7); for which *σταυρῶ* occurs in the LXX. (Esth. vii. 10), and *crucifixerunt* in the Vulg. (2 Sam. xxi. 6, 9). The Jewish account of the matter

(in Maimonides and the Rabbis) is, that the exposure of the body tied to a stake by its hands (which might loosely be called crucifixion) took place *after* death (Lightfoot, *Hor. Hebr.* in *Matt.* xxvii. 31; Otha, *Lex. Rab.* s. v. *Supplicia*; Reland, *Ant.* ii. 6; Sir T. Browne, *Vulgy. Errors*, v. 21). Even the placing of a head on a single upright pole has been called crucifixion. This custom of crucifixion *after* death (which seems to be implied in Deut. xxi. 22, 23) was by no means rare; men were *first* killed or stunned in mercy (Cic. *l'err.* ii. 45; Suet. *Jul. Cæs.* 74; Herod. iii. 125; Plut. *Cleon.* 38). According to a strange story in Pliny (xxvii. 15, § 24), it was adopted by Tarquin, as a post mortem disgrace, to prevent the prevalence of suicide. It seems on the whole that the Rabbis are correct in asserting that *this* exposure is intended in Scripture, since the Mosaic capital punishments were four (viz. the sword, Ex. xxi. 14, cp. 1 K. ii. 31; strangling, Num. xv. 4; fire, Lev. xx. 14; and stoning, Lev. xx. 27). Philo indeed says (*leg. spec.*) that Moses adopted crucifixion as a murderer's punishment because it was the worst he could discover; but the passage in Deut. (xxi. 23) does not prove his assertion. Probably therefore the Jews borrowed crucifixion (in the proper sense) from the Romans (Jos. *Ant.* ix. 6, § 2; *de Bell. Jud.* ii. 12, § 6; *Fit.* 75, &c.), although there may have been a few isolated instances of it before (Jos. *Ant.* xiii. 14, § 2).

It was unanimously considered the most horrible form of death, worse even than burning, since the "cross" precedes "burning" in the law-books (Lips. *de Cruc.* ii. 1). Hence it is called *crudelissimum teterrimumque supplicium* (Cic. *Verr.* v. 66), *extrema poena* (Apol. *de Aur. Asin.* x.), *summun supplicium* (Paul. *Sent.* v. tit. xxi., &c.); and to a Jew it would acquire factitious horror from the curse in Deut. xxi. 23. Among the Romans also the degradation was a part of the infiction, since it was especially a *seruile supplicium* (Tac. *H. iv.* 11; Juv. vi. 218; Hor. *Sat.* i. 3, 8, &c.; Plaut. *passim*), so that even a freedman was exempt from it (Cic. *pro Rab.* 5); or if it was ever applied to freemen it was only in the case of the vilest criminals, thieves, &c. (Jos. *Ant.* xvii. 10, § 10; *Bell. Jud.* v. 11, § 1; Paul. *Sent.* v. tit. xxi.; Lamprid. *Alex. Sev.* 23). Exemption from this form of punishment was the privilege of every Roman citizen by the *jus civitatis* (Cic. *Verr.* i. 1, 3). Our Lord was condemned to it by the popular cry of the Jews (Matt. xxvii. 23, as often happened to the early Christians) on the charge of sedition against Caesar (Luke xxiii. 2), although the Sanhedrin had previously condemned him on the totally distinct charge of blasphemy. Hundreds of Jews were crucified on this charge, as by Florus (Jos. *Bell. Jud.* ii. 14, § 9) and Varus, who crucified 2000 at once (*Ant.* xvii. 10, § 10).

We now purpose briefly to sketch the steps of the punishment, omitting only such parts of it as have been already detailed under **CROSS**.

The scarlet robe, crown of thorns, and other insults to which our Lord was subjected were illegal, and arose from the spontaneous petulance of the brutal soldiery (cp. Tac. *Ann.* iv. 44. "et pereuntibus addita ludibria"). But the punishment properly commenced with scourging, after the criminal had been stripped; hence in

the common form of sentence we find "summe, lictor, *desposita, verbera*," &c. (Liv. i. 26. For this there are a host of authorities: Liv. xvii. 13, xxiii. 36; Q. Curt. vii. 11; Luc. de *Piscat.* 2; Jer. *Comment. ad Matt.* xvii. 26, &c.). Scourging was inflicted not with the comparatively mild *virga*, but the more terrible *flagellum* (Hor. Sat. i. 3; 2 Cor. xi. 24, 25), which was not used by the Jews (Deut. xxv. 3). Into these scourges the soldiers often stuck nails, pieces of bone, &c. (the *μαστιξ ἀστραγαλῶτη* mentioned by Athenæus, p. 153 a; Luc. *Asin.* 38, &c.; *flagrum pecuinis ossibus catenatum*, Apul. *Met.* 8). This was done to heighten the pain, which was often so intense that the sufferer died under it (Ulp. *de Poenis*, lib. viii.). The scourging generally took place at a column, and the one to which our Lord was supposed to have been bound was seen by Jerome, Prudentius, Gregory of Tours, &c., and is still shown at several churches among the relics. In our Lord's case, however, this infliction seems neither to have been the legal scourging after the sentence (Val. Max. i. 7; Jos. *Bell. Jud.* ii. 14, § 9), nor yet the examination by torture (Acts xxii. 24), but rather a scourging before the sentence, to excite pity and procure immunity from further punishment (Luke xxiii. 22; John xix. 1); and if this view be correct, the *φραγέλλωσας* in Matt. xvii. 26 is retrospective, as so great an anguish could hardly have been endured *twice*. How severe it was is indicated in prophecy (Ps. xxv. 15; Is. i. 6). Vossius considers that it was partly legal, partly tentative (*Harm. Pass.* v. 13). In the spurious *Acts of Pilate* it is said that forty blows were given, but that is a mere confusion of the Roman with the Jewish custom.

The criminal carried his own cross, or at any rate a part of it (Plut. *de suis qui sero*, &c. 9; Artemid. *Oneirocr.* ii. 61; John xix. 17; *Patibulum ferat per urbem, deinde affigatur cruci*, Plaut. *Carthar.*). Hence the term *Furcifer*,—cross-bearer. This was prefigured by Isaac carrying the wood in Gen. xxii. 6, where even the Jews notice the parallel; and to this the Fathers fantastically applied the expression in Is. ix. 6, "the government shall be upon his shoulder" (Septimius, c. *Jud.* 12; Aug. *Serm.* 71; Theodoret, Procopius, &c. ad loc.). Criminals were sometimes scourged and goaded on the way (Plaut. *Mostel.* i. 1, 52). "In some old figures we see our Lord described with a table appendent to the fringe of his garment, set full of nails and pointed iron" (Jer. Taylor, *Life of Christ*, iii. xv. 2. *Haerebas ligno quod tuleras*: Cypr. *de Pas.* p. 50). [SIMON OF CYRENE.]

The place of execution was outside the city ("post urbem," Cic. *Verr.* v. 66; "extra portam," Plaut. *Mil. Gl.* ii. 4, 6; 1 K. xxi. 13; Acts vii. 58; Heb. xiii. 12; and in camps, "extra vallum"), often in some public road (Quinct. *Decl.* 275) or other conspicuous place like the Campus Martius (Cic. *pro Rabirio*), or some spot set apart for the purpose (Tac. *Ann.* xv.). This might sometimes be a hill (Val. Max. vi.); it is, however, merely tradition to call Golgotha a hill; in the Evangelists it is called *τόπος* [CALVARY]. Arrived at the place of execution, the sufferer was stripped naked (Artemid. *Oneirocr.* ii. 58), the dress being the perquisite of the soldiers (Matt. xvii. 35; *Dig.* xlviii. 20, 6); possibly not even a cloth round the loins was

allowed him; at least among the Jews the rule was "that a man should be stoned naked," where what follows shows that "naked" must not be taken in its restricted sense. We may be sure, however, that the *Acts of Pilate* preserve a traditional fact when they say of our Lord *περιέωσαν αὐτὸν λέντιον* (Act. Pilat. 10). The cross was then driven into the ground, so that the feet of the condemned were a foot or two above the earth (in pictures of the Crucifixion the Cross is always much too large and high), and he was lifted upon it (*agere, excurrere, tollere, ascendere in crucem*; Prudent. *perl. στέφ.*; Plaut. *Mostel.* 'Crucialis'; Id. *Bacch.* 2, 3, 128; *ἀνῆγον, ἦγον, ἦγον eis ἄκρον τέλος*, Greg. Naz.), or else stretched upon it on the ground, and then lifted with it, to which there seems to be an allusion in a lost prophecy (?) quoted by Barnabas (*Ep.* 12), *ὅταν ἔλθῃ κλιθῇ καὶ ἀναστῇ* (Pearson on *Creed*, art. iv.). The former method was the commoner, for we often read (as in Esth. vii. 10, &c.) of the cross being erected beforehand, *in terrorem*. Before the nailing or binding took place (for which see *Cross*), a medicated cup (*sopor*, Plin. xx. 18; Sen. *Ep.* 83) was given out of kindness to confuse the senses and deaden the pangs of the sufferer (Prov. xxi. 6), usually of *οἶνον δαμυρμισμένος* or *λελιθανόμενος*, as among the Jews (Lightfoot, *Hor. Hebr. ad Matt.* xvii.), because myrrh was soporific. This merciful alleviation our Lord refused that His senses might be clear (Matt. xvii. 34; Mark xv. 23. Maimon. *Sanhed.* xiii.). St. Matthew calls it *ἔξος* (or *οἶνον*, N, B, D, K, L, &c.) *μέτα χολῆς* (ἡρῆ), an expression used in reference to Ps. lxix. 21, but not strictly accurate. This mercifully intended draught must not be confounded with the spongy of vinegar (or *posca*, the common drink of Roman soldiers, Spart. *Hadri.*; Plaut. *Mil. Gl.* iii. 2, 23), which was put on a hyssop-stalk and offered to our Lord in mocking and contemptuous pity (Matt. xxvii. 48; Luke xxiii. 36); this He barely tasted to allay the agonies of thirst (John xix. 29).

Our Lord was crucified between two "malefactors" or "brigands" (then so common in Palestine, Jos. *Bell. Jud.* ii. 6, &c.), according to prophecy (Is. liii. 12); and was watched according to custom by a party of four soldiers (John xix. 23) with their centurion (*καυστωδία*, Matt. xxvii. 66; *miles qui cruces asservabat*, Petr. *Sat.* iii. 6; Plaut. *l'it. Cleon.* 38), whose express office was to prevent the removal of the body. This was necessary from the lingering character of the death, which sometimes did not supervene even for three days, and was at last the result of gradual benumbing and starvation (Euseb. *H. E.* viii. 8; Sen. *Proc.* 3). But for this guard, the sufferers might have been taken down and recovered (as in the case of Sandokes: Herod. vii. 194), as was actually done in the case of a friend of Josephus, though only one survived out of three to whom the same *θεραπεία* *ἐπιμελεστέρα* was applied (Tit. 75). Among the Convulsionnaires in the reign of Louis XV. women would be repeatedly crucified, and even remain on the cross three hours; we are told of one who underwent this torture twenty-three times (*Encycl. Metr.* s. v. *Cross*). The pain consisted almost entirely in the nailing, and not more than a basoof of blood was lost. Still

we cannot believe from the Martyrologies that Victorinus (crucified head-downwards) lived three days, or Timotheus and Maura nine days. For description of the conduct of men who were being crucified, see Cic. *Verr.* v. 62; Justin, xlii. 7; Sen. *de Vit. beat.*, 19; Jos. B. J. viii. 6, § 4; Keim, *Jesus von Nazara*, iii. ii. 431. Fracture of the legs (Plaut. *Poen.* iv. 2, 84) was especially adopted by the Jews to hasten death (John xix. 31), and it was a mitigation of the punishment, as was observed by Origen (*in Matt.*; cp. Sen. *Ep.* 101). It was sometimes even purchased as a privilege (Cic. *Verr.* ii. 45). But the unusual rapidity of our Lord's death (*ἐξέπνευσεν*, Mark xv. 37, Luke xxiii. 46; ἀφῆκεν τὸ πνεῦμα, Matt. xxvii. 50; παρέδωκεν τὸ πνεῦμα, John xix. 30) was due to the depth of His previous agonies (which appears from His inability to bear His own Cross far) and to His mental anguish (Schoettgen, *Hor. Heb.* vi. 3; *de pass. Messiae*); or it may be sufficiently accounted for by the rupture of the heart which is believed to have been the physical cause of His death (Stroud, *The Physical Cause of the Death of Christ*, 1871; Dr. S. Houghton, quoted in *Speaker's Commentary*, add. note on 1 John v. 6, pp. 349, 350). There is no need to explain the "giving up the ghost" as an actual miracle (Heb. v. 7?), or to say with Cyprian, *Præcento carnificis officio, spiritum sponte dimisit* (*adv. Demetr.*), though beyond all doubt the mode and the moment of Christ's death were in accordance with His own Divine will—*quia voluit, quando voluit, quomodo voluit* (Aug. Cp. Is. liii. 7 [Vulg. *Oblatus est quia ipse voluit*]). Still less can the common cavil of infidelity be thought noteworthy, since had our Lord been in a swoon the piercing of His pericardium (proved by the appearance of lymph and blood) would have ensured death (see Eschenbach, *Opusc. Med. de Servatore non apparenter sed vere mortuo*, and Gruner, *de morte Christi non synoptica*, quoted by Jahn in the *Arch. Bibl.*). Pilate expressly satisfied himself of the actual death by questioning the centurion (Mark xv. 44); and the omission of the breaking of the legs in this case was the fulfilment of a type (Ex. xii. 46). Other modes of hastening death were by lighting fires under the cross (hence such nicknames as *Sarmentitii* and *Semarii*, Tert. *Apolog.* 50), or by letting loose wild beasts on the crucified (Suet. *Ner.* 49).

Generally the body was suffered to rot on the cross (Cic. *Tusc.* Q. i. 43; Sil. Ital. viii. 486), by the action of sun and rain (Herod. iii. 12), or to be devoured by birds and beasts (Gen. xl. 19; Apul. *de Aur. Asin.* 6; Hor. *Ep.* i. 16, 48; Juv. xiv. 77). Sepulture was as a rule forbidden, though it might be granted as a special favour or on grand occasions. But in consequence of Deut. xxi. 22, 23, an express national exception was made in favour of the Jews (Matt. xxvii. 58; cp. Joseph. *Bell. Jud.* iv. 5, § 2).

Having thus traced the whole process of crucifixion, it only remains to speak of the manner of death, and the kinds of physical suffering endured, which we shall very briefly abridge from the treatise of the physician Richter (*in Jahn's Arch. Bibl.*). These were: 1. The unnatural position and violent tension of the body, which caused a painful sensation

from the least motion. 2. The nails being driven through parts of the hands and feet which are full of nerves and tendons (and yet at a distance from the heart), create the most exquisite anguish. 3. The exposure of so many wounds and lacerations brings on inflammation, which tends to become gangrene, and every moment increases the poignancy of torment. 4. In the distended parts of the body more blood flows through the arteries than can be carried back into the veins: hence too much blood finds its way from the aorta into the head and stomach, and the blood-vessels of the head become pressed and swollen. The general obstruction of circulation which causes an internal excitement, exertion, and anxiety, more intolerable than death itself. 5. The inexpressible misery of gradually increasing and lingering anguish. To all which we may add, 6. Burning and raging thirst. And thus we see that the terrible death which the Lord Jesus endured for our salvation involved all that pain and death can have of ghastly and horrible,—dizziness, cramp, hunger, thirst, sleeplessness, traumatic fever, tetanus, mortification of wounds, publicity of shame, long continuance of torment.

This accursed and awful mode of punishment was happily abolished by Constantine (Socr. *H. E.* i. 8; Aurel. Vict. *Const.* 41), probably towards the end of his reign (see Lips. & Cruse, iii. 15), although it is curious that we have no more definite account of the matter. "An edict so honourable to Christianity," says Gibbon, "deserved a place in the Theodosian code, instead of the indirect mention of it which seems to result from the comparison of the 5th and 18th titles of the 9th book" (ii. 154, note).

An explanation of the other circumstances attending the Crucifixion belongs rather to a commentary than a dictionary. On the type and prophecies of it, besides those adduced, see Ep. Barnab. 11, 12; Just. Mart. *Apol.* i. 54; *Dial.* 86-91, 97; Cyp. *Testim.* ii. 20, &c. On the resurrection of the saints, see Lightfoot *ad Mat.* xxvii. 52 (there is a monograph by Gebelarius—*Dissert. de Resur. sanctorum cum Christo*). On other concomitant prodigies, see Schoettgen, *Ev. Hebr. et Talmud.* vi. 3, 8. [DARKNESS: CROSS] The chief authorities are quoted in the article, and the ancient ones are derived in part from Lipsius; of whose most interesting treatise, *de Cruce*, an enlarged and revised edition, with notes, would be very acceptable. On the points in which our Lord's Crucifixion differed from the ordinary Jewish customs, see Otho, *Lex. Rabbiniæum*, s. v. *Supplicia*; Bynæus, *de Morte Jesu Christi*; Vossius, *Harm. Passionis*; Carpov, *Apparat. Crit.* p. 591 sq., &c. [F. W. F.]

CRUSE, a word employed in the A. V., apparently without any special intention, to translate three distinct Hebrew words.

1. *Tzappachath*, צַפְפָּחַת (from צֶפֶס, a root with the idea of width; cp. *ampulla*, from *amplus*). Some clue to the nature of this vessel is perhaps afforded by its mention as being full of water at the head of Saul when on his night-expedition after David (1 Sam. xxvi. 11, 12, 16), and also of Elijah (1 K. xix. 6). In a similar case in the present day (cp. Thomson, *Land and Book*, ii. 21) this would be a globular vessel.

of blue porous clay—the ordinary Gaza pottery—about 9 inches in diameter, with a neck of about 3 inches long, a small handle below the neck, and opposite the handle a straight spout, with an orifice about the size of straw, through which the water is drunk or sucked. The form is common also in Spain, and will be familiar to many from pictures of Spanish life. A similar globular vessel probably contained the oil of the widow of Zarephath (1 K. xvii. 12, 14, 16). For the “box” or “horn” in which the consecrated oil was carried on special occasions, see OIL.

2. The noise which these vessels make when emptied through the neck is suggestive of the second term, *Babbook*, בָּבְבֹּק, probably like the Greek *bombulos*, βόμβυλος, an onomatopoeitic word. This is found but twice—a “cruse of honey” (1 K. xiv. 3, R. V. marg. *bottle*); and an “earthen bottle” (Jer. xix. 1).

3. Apparently very different from both these is the other term, *Tzelachah*, צֶלַחָה (in pl. only, צֶלַחֹת; found also in the forms צֶלַחִית and צֶלַחֹת, from a root צֶלַח, of uncertain meaning, cp. Ges. *Thes.* and MV.¹¹). This was probably a flat metal saucer of the form still common in the East. צֶלַחִית occurs in 2 K. ii. 20, “cruse;” צֶלַחֹת in 2 Ch. xxxv. 13, “pans;” צֶלַחֹת in 2 K. xxi. 13, “dish;” and in Prov. xix. 24, xxvi. 15, where R. V. rightly translates “dish;” in A. V. the figure is obscured by the choice of the word “bosom.” [G.] [W.]

CRYSTAL, the representative in the A. V. of the Hebrew word *zecúith* (זְעֻיִת), in the R. V. “glass,” and of *kerach* (קֶרַח) in the A. V. and R. V.

1. *Zecúith* (ζαλος; *vitrum*) occurs only in Job xxviii. 17, where wisdom is declared to be more valuable than “gold and the crystal.” Notwithstanding the different interpretations of “rock crystal,” “glass,” “adamant,” &c., that have been assigned to this word, there can, we think, be very little doubt that “glass” is intended (so R. V.). The old Versions and paraphrases are in favour of this interpretation. The Targum has *zegougitha*, by which the Talmudists understand “glass.” The Syriac has *zagugitto*; the Arabic *zujaj*, i.e. “glass.” Schultens (*Comment. in Job*, l. c.) conjectures that the words *záháb úzecúith* (זָהָב וְזְעֻיִת) are a hendiadye to denote “a valuable glass or crystal goblet,” or “a glass vessel gilt with gold,” such a one perhaps as that which Nero is reported to have broken to pieces in a fit of anger (Pliny, *N. H.* xxxvii. 2). Cary (Job, l. c.) translates the words “golden glass;” and very aptly compares a passage in Wilkinson (*Anc. Egypt.* ii. 61, [1878]), who, speaking of the skill of the Egyptians in making glass, says that “they had even the secret of introducing gold between two surfaces of glass, and in their bottles a gold band alternates within a set of blue, green, and other colours.” It is very probable that the *zecúith* of Job (l. c.) may denote such a work of art as is referred to in this quotation. [GLASS.]

2. *Kerach* (κρύσταλλος; *crystallum*) occurs in numerous passages in the O. T. to denote “ice,” “frost,” &c.; but once only (Ezek. i. 22; R. V. marg. *ice*), as is generally understood, to signify “crystal.” “And the likeness of the firmament . . . was as the colour of the magnificent crystal.” The ancients supposed rock-crystal to be merely ice congealed by intense cold; whence the Greek word κρύσταλλος, from κρύος, “cold” (see Pliny, *N. H.* xxxvii. 2). The similarity of appearance between ice and crystal caused no doubt the identity of the terms to express these substances. The A. V., following the Vulg., translates the epithet (הַנְּזָרִי) “terrible” in Ezek. (l. c.): the word might perhaps be rendered “splendid.” It has the same meaning as the Latin *spectabilis*. The Greek κρύσταλλος occurs in Rev. iv. 6, xxii. 1. It may mean either “ice” or “crystal.” Indeed there is no absolute necessity to depart from the usual signification of the Hebrew *kerach* in Ezek. (l. c.). The upper vault of heaven may well be compared to “the astonishing brightness of ice” (see Harris, *Dict. Nat. Hist. of Bible*, art. “Crystal”). [W. H.]

CUBIT. [MEASURES.]

CUCKOO (חֶפֶז, *shachaph*; λάρος; *larus*), in the A. V. “cuckoo,” in the R. V. “sea-mew.” It is difficult to conjecture how the rendering “cuckoo” has become adopted in all English versions from that of Coverdale, A.D. 1535, down to the A. V. There is no authority for it elsewhere. Cuckoos are certainly well known in Palestine, where two species are common, *Cuculus canorus*, or common cuckoo, and *Oxylophus glandarius*, the great spotted cuckoo. They are known to the Arabs, and probably were to the Hebrews, as to the Greeks, by the same name as among ourselves, for the most unobservant of peoples have always recognised the note of the cuckoo. The Hebrew word *shachaph* occurs only in Lev. xi. 16 (Knobel-Dillmann, *Méroc*), and in Deut. xiv. 15, as the name of some unclean bird. Bochart (*Hieroz.* iii. 1) has attempted to show that *Shachaph* denotes the *Cephus*. The κέρφος of Aristotle (*Anim. Hist.* viii. 5, § 7; ix. 23, § 4), Nicander (*Alexipharm.* 165), and other Greek writers, has been identified by Schneider with the storm-petrel (*Thalassidroma pelagica*). Had this writer identified it with “Petrel” generally, instead of limiting it to one species, and that the smallest, and very rare in the Mediterranean, he would have been more in harmony with all the ancient Versions, and have been probably correct. The petrel family, including under the term the shearwater and storm-petrels, are abundant on the Syrian coast. The Scholiast on Aristophanes (*Plutus*) describes the *Cephus* as a light kind of gull. Suidas, under the word κέρφος, says, “It is a bird like a gull, light of body, and sails over the waves.” The notion held by the ancients that the *Cephus* lived on the foam of the sea, points also to the shearwater, which will well answer to Suidas’ definition of κέρφος. The two most common species in the Eastern Mediterranean are the *Manx* shearwater (*Puffinus anglorum*) and the Mediterranean shearwater (*Puffinus kuhli*). These birds, especially the former, may be seen all day long passing in countless flocks up and down the Dardanelles,

and are never seen to rest or pause on the water, but ceaselessly glide within a few inches of the surface whether the sea be smooth or rough. They are popularly believed by the Moslems to be the souls of the lost, and are consequently known to the Franks as the "âmes damnées." During the late autumn and winter the shearwaters and petrels appear to live altogether out at sea. In spring they resort to cliffs and banks on the shore, and breed in burrows which they scoop out of the soil about one or two feet deep. The folly ascribed to the bird, whence the Greek verb *καρφόμαι*, "to be easily deceived" (see LXX. in Prov. vii. 22), may have some foundation in the fact that these birds when on the nest will allow themselves to be taken by the hand. It is very possible that not only the petrel but also the gull tribe, equally or rather more abundant on the coast and on the inland lakes, are also included in the Hebrew *shachaph*, and the etymology which (according to some) points to some "slender" bird would also suit this inclusion. The most common species are the magnificent Eagle-Gull (*Larus ichthyactes*), Black-headed Gull (*L. ridibundus*), Common Gull (*L. canus*), Yellow-legged Herring Gull (*L. cachinnans*), and Lesser Black-backed Gull (*L. fuscus*). [H. B. T.]

CUCUMBERS (CUCURBITACEÆ, *kishshuim*; *oi ôikvoi*; *cucumeres*). This word occurs twice, in Num. xi. 5, as one of the good things of Egypt for which the Israelites longed, and *mikishah*, "a garden of cucumbers," Is. i. 8. There is no doubt as to the meaning of the Hebrew word, which is found with a slight variation in the Arabic, Syriac, Aethiopic, &c., to denote the plant now under consideration (see Celsius, *Hierob.* ii. 247). Egypt produces excellent cucumbers, melons, &c. [MELON], the *Cucumis chate* being, according to Hasselquist (*Trav.* p. 258), the best of its tribe yet known. This plant grows in the fertile earth around Cairo after the inundation of the Nile. The fruit, which is somewhat sweet and cool, is eaten, says Hasselquist, by the grantees and Europeans in Egypt as that from which they have least to apprehend. Prosper Alpinus (*Plant. Aegypt.* xxxviii. p. 54) speaks of this cucumber as follows:—"The Egyptians use a certain kind of cucumber which they call *chate*. This plant does not differ from the common kind, except in size, colour, and tenderness; it has smaller, whiter, softer, and rounder leaves, and the fruit is longer and greener than ours, with a smooth soft rind, and more easy of digestion." Forskål (*Flor. Aegypt.* p. 168) states that the *Cucumis chate*, which he says is called by the Arabs *Abdellawi* or *Adjâr*, is the commonest fruit in Egypt, planted over whole fields. The *C. chate* was once cultivated in England and called "the round-leaved Egyptian melon." Besides the *Cucumis chate*, the common cucumber (*C. sativus*), of which the Arabs distinguish a number of varieties, is common in Egypt. This grows with the water-melons; the poor people boil and eat it with vinegar; the richer people fill it with spiced mincemeat, in which form it is a favourite and universal dish throughout the East. Both *Cucumis chate* and *C. sativus* are now grown in great quantities in Palestine: on visiting the Arab school in Jerusalem (1858) I

observed that the dinner which the children brought with them to school consisted, without exception, of a piece of barley-cake and a raw cucumber, which they ate rind and all.

The prophet Isaiah (i. 8) foretells the desolation that was to come upon Judah and Jerusalem in these words:—"The daughter of Zion is left as a cottage (R. V. "booth") in a vineyard, as a lodge in a garden of cucumbers, as a besieged city." The cottage or lodge here

spoken of is a rude temporary shelter, erected in the open grounds where vines, cucumbers, gourds, &c., are grown, in which some lonely man or boy is set to watch, either to guard the plants from robbers, or to scare away the foxes and jackals from the vines. It is a very rude affair. Four poles are stuck in the ground, planks are bound across their tops, and on these are entwined boughs cut from the oleanders by the watercourses; while others, and often bits of matting, are worked in so as to form a slight shelter for the occupant. Dr. Thomson (*The Land and the Book*, p. 361) well illustrates this passage of Scripture, and brings out its full force. The woodcut which he gives of the lodge at Butaia represents such a shelter as is alluded to above: by and by, when the crop is gathered and the lodge forsaken, the "poles will fall down or lean every way, and the green boughs with which it is shaded will be scattered by the winds, leaving only a ragged sprawling wreck—a most affecting type of utter desolation."

Job, speaking of the passing prosperity of the wicked, compares it to one of these lodges: "He buildeth his house as the moth and as a booth that the keeper maketh" (xxvii. 18, R. V.).

It is curious to observe that the custom of keeping off birds, &c., from fruit and corn by means of a scarecrow is as old as the time of Baruch (vi. 70): "As a scarecrow (*σφαροσκάνιον*) in a garden of cucumbers keepeth nothing, so are their gods of wood," &c.

The cucumber (*Cucumis sativa*) is a trailing annual plant, belonging to the family Cucurbitaceæ. Its native country is unknown, as it has been cultivated in all the warm countries of the Old World from time immemorial. In the Jordan valley the cucumber is ripe in March, but in the higher parts of Palestine the cucumbers are set in the ground after the barley has been taken off, should the latter rains have been sufficient to enable the fields to be tilled. On the Plain of Gennesaret, and elsewhere where it is possible, the cucumber fields are artificially

Lodge in Garden of Cucumbers.

irrigated. Near Kedes (Kadesh Naphtali) hundreds of acres are devoted to cucumbers for the Damascus market. [W. H.] [H. B. T.]

CUMMIN (כֻּמְז, *cammôn*; *κνμίνον*; *cuminum*;

Arab. *كعون*, *cammîn*). A well-known plant in Mediterranean countries, belonging to the natural order *Umbelliferae* (*Cuminum sativum*, Linn.), cultivated in Palestine, and probably indigenous, though it has not been noticed there in a wild state. It is twice mentioned in Scripture. "Doth he not . . . scatter the cummin? . . . For the fitches are not threshed with a threshing instrument, neither is a cart wheel turned about upon the cummin, but the fitches are beaten out with a staff, and the cummin with a rod" (Is. xlviii. 25, 27). So small and tender a seed would be destroyed or crushed if threshed like corn, or even if beaten with a staff, like the stouter husks of the fitches (*Nigella sativa*). The same mode of beating out the cummin is still practised, while the corn is trodden out with oxen. What is called the seed of the cummin is really the fruit enclosing the seeds. Our Lord also (Matt. xxiii. 23) mentions cummin along with mint and anise, as one of the insignificant garden herbs, about the tithing of which the scribes and Pharisees were punctilious. Cummin is used in the East very much as caraway seeds among ourselves, as an economical spice, mixed with the dough; and also often boiled in the various dishes and stews. It is mentioned by Apicius in his Art of Cooking, i. 32, &c. It was also used medicinally as a stimulant, "Condimentorum omnium stomachi fastidiis cuminum amicissimum" (Plin. xix. 8). Athenaeus speaks of it as a condiment with salt. *Κυμινωπλοτης* was a proverbial epithet among the Greeks for a mean and stingy fellow (see Aristophanes, *Wasps*, 528). [H. B. T.]

CUNNING, a term applied to Esau as a hunter (Gen. xxv. 27) and to David as a harpist (1 Sam. xvi. 16), and also to work (Ex. xxvi. 1). It means skilful (A. S. *cunnan* = to know). Cp. "cunning in music and the mathematics" (Shakespeare, *Taming of the Shrew*, ii. 1, 56, quoted in Lumby's *Glossary of Bible Words* in Eyre and Spottiswoode's *Variorum Bible*). [F.]

CUP. The chief words rendered "cup" in the A. V. are, 1. כִּיץ; *porhion*; *calix*; 2. כִּיץ, only in plural; *σπονδία*; *crateres*; 3. כִּיץ; *scyphus*; see also further the words *Basin*, *Bowl*. The cups of the Jews, whether of metal or earthenware, were possibly borrowed, in point of shape and design, from Egypt and from the Phoenicians, who were celebrated in that branch of workmanship (II. xxiii. 743; *Od.* iv. 615, 618). Egyptian cups were of various shapes, either having handles or without them. In Solomon's time all his drinking vessels were of gold, none of silver (1 K. x. 21). Babylon is compared to a golden cup (Jer. li. 7).

Assyrian cups from Khorsabad and Nimroud may be seen figured in Layard (*Nin.* ii. 303, 304; *Nin. and Bab.* pp. 186, 190, 192), some perhaps of Phoenician workmanship, from which source

both Solomon and the Assyrian monarch possibly derived both their workmen and the works themselves. The cups and other vessels brought to Babylon by Nebuchadnezzar may thus have been of Phoenician origin (Dan. v. 2).

On the bas-reliefs at Persepolis many figures are represented bearing cups or vases which may fairly be taken as types of the vessels of that sort described in the Book of Esther (Esth. i. 7; Niebuhr, *Voyage*, ii. 106; Chardin, *Voyages*, viii. p. 268, pl. lviii.). The great laver, or "sea," was made with a rim like the rim of a cup (*Côs*), "like the flower of a lily" (1 K. vii. 26), a form which the Persepolitan cups resemble (Jahn, *Arch.* § 144). The common form of modern Oriental cups is represented in the drawing below.

The use of gold and silver cups was introduced into Greece after the time of Alexander (Athen. vi. 229-30; xi. 446, 465; Birch, *Anc. Pott.*, ii. 109). The cups of the N. T., *ποτήρια*, were often no doubt formed on Greek and Roman models. They were sometimes of gold (Rev. xvii. 4. Cp. *Dict. of Gr. and Rom. Antiq.*, art. *PATERA*). [H. W. P.]

Assyrian cup with handle. (Layard, ii. 303.)

Assyrian drinking-cup. (Layard, ii. 304.)

Modern Egyptian drinking-cups, one-fifth of the real size. (Lane.)

CUP-BEARER (כִּיץ; *olvochos*; *pin-cerna*), an officer of high rank with Egyptian, Persian, Assyrian, as well as Jewish monarchs. The chief cup-bearer, or butler, to the king of Egypt was the means of raising Joseph to his high position (Gen. xl. 1-21, xli. 9). The name of Rabshakeh, who was sent by Sennacherib to Hezekiah, used to be taken as equivalent to *כִּיץ* or chief of the cupbearers in the Assyrian court (2 K. xviii. 17; Ges. p. 1225), but it seems more probable that the latter part, *shâkêh*, is the Hebraized form of the Assyrian *shâkê*, and that he was in reality a chief commander of the army (Schrader, *KAT.* in loco). Herod the Great had an establishment of eunuchs, of whom one was a cup-bearer (Joseph. *Ant.* xvi. 8, 1). Nehemiah was cup-bearer to Artaxerxes Longimanus, king of Persia (Neh. i. 11, ii. 1). Cup-bearers are mentioned among the attendants of Solomon (1 K. x. 5; cp. Layard, *Nin.* ii. 324, 326). [H. W. P.]

CURTAINS. The Hebrew terms translated in the A. V. by this word are three:

1. *Yereoth*, יָרֵעוֹת; the ten "curtains" of fine linen, &c., each 28 cubits long and 4 wide, and also the eleven of goats' hair, which covered the Tabernacle of Moses (Ex. xxvi. 1-13; xxxvi. 8-17). The charge of these curtains and of the other textile fabrics of the Tabernacle was laid on the Gershonites (Num. iv. 25). Having this definite meaning, the word came to be used as a synonym for the Tabernacle—its transitoriness and slightness; and is so employed in the sublime speech of David, 2 Sam. vii. 2 (lit. "the curtain" collectively [Driver in loco]) and 1 Ch. xvii. 1. In a few later instances the word bears the more general meaning of the sides of a tent; as perhaps in the beautiful figure of Is. liv. 2 (where "habitations" [A. V. and R. V.] may be "tabernacles," מִשְׁכָּנֹת, poetic word for "tents"); Jer. iv. 20, x. 20 (where "tabernacle" and "tent" are both one word, מִשְׁכָּן = tent [R. V.]); in Ps. civ. 2 (where "stretch," יָנַח, is the word usually employed for extending a tent). Also specially in the case of nomadic people, Jer. xlix. 29; Hab. iii. 7; Cant. i. 5 (of the black hair-cloth of which the tents of the real Bedouen are still composed).

2. *Masac*, מָסַח; the "hanging" for the doorway of the Tabernacle (Ex. xxvi. 36, 37, xxxv. 15, xxxvi. 37, xxxix. 38, xl. 5; Num. iii. 25, iv. 25): and also for the gate of the court round the Tabernacle (Ex. xxvii. 16, xxxv. 17, xxxviii. 18, xxxix. 40, xl. 33; Num. iii. 26, iv. 26). Amongst these the rendering "curtain" occurs but once (Nom. iii. 26); while "hanging" is shared equally between *Masac* and a very different word—*Ḥel*,

חֵל. The idea in the root of *Masac* seems to be of shielding or protecting (מָסַח; Ges. p. 951). If this be so, the *Masac* may have been not a curtain or veil but an awning to shade the entrances—a thing natural and common in the fierce sun of the East (see one figured in Fergusson's *Ninereh and Persepolis*, p. 184). But the nature of this and the other textile fabrics of the Tabernacle will be best examined under TABERNAACLE.

Besides "curtain" and "hanging," *Masac* is rendered "covering" in Ex. xxxv. 12, xxxix. 34, xl. 21; Num. iv. 5; 2 Sam. xvii. 19; Ps. cv. 39; Is. xxiii. 8.

3. *Dōk*, דֹּק. There is nothing to guide us to the meaning of this word. It is found but once (Is. i. 22; R. V. marg. gauze), in a passage founded on the metaphor of a tent. [G.] [F.]

CUSH (כּוּשׁ; BN. *Xourei*; *Chusi*), a Benjamite mentioned only in the title of Ps. vii. It is a personal name of uncertain meaning (in later Hebrew, a *spindle*, Delitzsch * in loco). Cush was a follower of Saul and an enemy to David, like Doeg and others. The Jewish interpreters considered the name symbolic; Cush was an Ethiopian, black in character. [F.]

CUSH (כּוּשׁ; *Xous*; *Chus* [Gen. x. 6-8; 1 Ch. i. 8-10]; *Aithiopia*, *Aithiopia*; *CUSHITE* (כּוּשִׁי, *Aithiops*, *Aethiops*; pl. כּוּשִׁים, *fem.* כּוּשִׁית). Cush occurs in the table of Noah's descendants as first in order of the sons of Ham, afterwards in the Bible as a geographical and ethnographical term. The following is the list of the descendants of Cush in the table:—

In the list of the sons of Shem we find Sheba and Havilah under the sons of Joktan. In the list of Abraham's descendants by Keturah, his son Jokshan is called the father of Sheba and Dedan (Gen. xxv. 3).

Havilah thus occurs twice, Sheba three times, and Dedan twice, in the genealogies. Moreover all three names are used in other places in the Bible in a geographical sense. Though the Noachian list contains names held with reason to be those of individuals, yet it is primarily ethnographical, dividing the descendants of Noah under the three great groups of fair, dark, and tawny, and then giving their geographical distribution [though this is denied by Delitzsch, p. 200 (1887)]. The names are mainly those of countries, or nations and tribes. Consequently the occurrence of the same name in two sections of the list, or in another list, may mean the settlement of the same territory by different tribes. In support of this view it may be mentioned that the names which are tribal in form do not occur more than once, unlike names which are undoubtedly used elsewhere for territories.

It is now possible to consider the great difficulty of this article, whether there was a twofold settlement of the Cushites, or an Eastern and Western Cush or Ethiopia. Of the Western Cush, or Ethiopia above Egypt, there has never been any doubt. The existence of an Eastern Cush has been questioned. The notices in the Bible do not speak of an Eastern Cush by name, but they indicate Cushites in the East, and this evidence is rather to be looked for in the distribution of the descendants of Cush than the more direct mention of Cush and the Cushites. Most remarkable in this reference is the notice as to Nimrod the son of Cush, that "the beginning of his kingdom" was in Chaldaea, and that afterwards he moved into Assyria and there founded Nineveh and other cities; the other rendering, which attributes the Assyrian foundations to Asshur, being not tenable (Gen. x. 10-12). Zerk the Cushite and the Cushites of his army may have been Kassites, as seems to have been the case with the dynasty then ruling Egypt—the 22nd; but that the Kassites were Cushites is merely an etymological hypothesis. The Arabians that were near the Cushites (2 Ch. xxi. 16) probably afford an indication of Eastern Cushites, for we can scarcely suppose these Arabians to have come from the extreme south of the peninsula facing Ethiopia. The Cushan of Habakkuk (iii. 7) is evidently the king of Mesopotamia, Cushan-rishathaim; the first element, which is perhaps not Hebrew, being omitted for the sake of the rhythm. [CUSHAN-RISHATHAIM.]

If a Western Cush has a distinct nominal preponderance in the Biblical notices, so that Schrader (*Cuneiform Inscr. and the O. T.* i. p. 69 sq.) does not believe in any Babylonian settlement, the geographical indications offered by a study of the list in Genesis, compared with later mentions, indicate a wide extension of the

* Mentioned last, distinctively.

race, Southern Arabia bridging over the chasm between Ethiopia and Chaldaea. Cush may be limited to Africa, but not so the Cushites. Seba indeed appears to be African, but the Havilah of the list, Sheba, and Dedan seem to be Arabian, Sheba at least corresponding to Arabia Felix or Yemen. There is a certainty that Sheba, or the Sabaeans, had a northern extension, and this would account for the northern settlements of Dedan and the Northern Havilah. Whether the Havilah mentioned in the description of Paradise is to be taken for the Northern Havilah is a hard problem, dependent for its working on the credit which we give to the Egyptian tradition which would place Paradise in Arabia Felix, a tradition not unsupported by Arab legend.

The Egyptian direct evidence simply points to Cush in the form Kesh as the race and territory of the blacks, usually represented as Negroes, but sometimes with the modified features and lighter colour of the Nubians. The people of Southern Arabia and the opposite Ethiopian coast are portrayed with traits similar to those of the Egyptians.

The evidence of the inscriptions and monuments of Chaldaea and the neighbouring countries is in favour of the theory of an Eastern Cush. No doubt the present attitude of scholars is much more cautious in the attempt to distinguish a distinct Cushite population in Susiana than was formerly the case. The problem has become more difficult with more ample knowledge, yet there is a general consent that there was such a Cushite population. Thus Oppert, carefully distinguishing the mountain tribe of the Cosseans from the Kussu of Susiana, or Cissians who spoke a Turanian language, yet admits that there is in the Kussu, spoken of in the texts of Susa, a possible relation to the African Cushites (*Acad. des Inscriptions: Comptes Rendus*, 1888, pp. 223-225). Maspero more positively accepts the theory adopted or originated by Lepsius in his *Nubische Grammatik*, according to which the Cushites reached Ethiopia by crossing the Red Sea (*Hist. Anc.* p. 105).^a This theory, as stated by Lepsius, seeks to establish the linguistic affinity of the great belt of dark but not black races which stretches from India south of the Vindhya through Southern Persia and Arabia, through Ethiopia and north of the Great Desert as far as the Atlantic.

Ethnography has lent its aid to this theory in the remarkably black complexion attributed to the Susian soldiers in the Achaemenian wall enamels of Susa, a piece of evidence confirmed by a very early representation of a Susian king discovered by M. Dieulafoy. It may also be remarked, that in the Assyrian reliefs the type of the Susianians is similar to that of the Babylonians, but further removed from the Shemite type of the Assyrians.

In this problem, as in many others, the antiquity and accuracy of Genesis x. are evident, but it will probably be long before all the details will be determined. [R. S. P.]

CUSHAN-RISHATHA'IM (כּוּשָׁן רִישַׁתַּיִם); *Xousarsathaim*, a king of Meso-

potamia (Aram-Naharaim) who oppressed Israel for eight years during the time of the Judges (Judg. iii. 8). The seat of his dominion was probably the district of Babylonia just north of Babylon, extending from the Euphrates to the boundary of Elam. As this name has not been, as yet, found in the cuneiform inscriptions, it is very likely that the king who bore it ruled over the wandering Arameans of Northern Babylonia; and, the power of both Assyria and Babylonia being at this time at a very low ebb, made himself greatly feared in all the districts around. A great many Aramean tribes are mentioned by Tiglath-pileser III., king of Assyria, in his annals. [T. G. P.]

CU'SHI (כּוּשִׁי; BA. *Xoušel*; *Chusi*), a name occurring more than once in the O. T. 1. One of the ancestors of Jehudi, a man about the court of king Jehoiakim (Jer. xxxvi. 14). 2. Father of Zephaniah the Prophet (Zeph. i. 1). 3. (With the article, כּוּשִׁי, i.e. "the Cushite" [R. V.], "the Ethiopian;" δ *Xouσί*; *Chusi*.) A man apparently attached to Joab's person, but unknown and unaccustomed to the king, as may be inferred from his not being recognised by the watchman, and also from the abrupt manner in which he breaks his evil tidings to David, unlike Ahimaz, who was well aware of the effect they were sure to produce. That Chusi was a foreigner—as we should infer from his name—is also slightly corroborated by his ignorance of the ground in the Jordan valley—"the way of the 'Ciccar'"—by knowing which Ahimaz was enabled to outrun him. The running of Ahimaz may, however, have been of a style peculiar and well known, and by which he was recognised a long way off by the watchman. [W. L. B.]

CUTHAH or CUTH (כּוּתָּה; [B. *Xouθā*, A. *Xoud* (v. 24); BA. *Xoθ* [v. 30]; Jos. *Xoθos*; *Cutha*), a city a little to the east of Babylon, now Tell-Ibrahim, whence Shalmaneser brought colonists into Samaria (2 K. xvii. 24, 30). These Cuthaeans, mingling with the Sepharvites and others whom the Assyrian king had sent also to Samaria, became the progenitors of the Samaritans; who, according to Josephus, were even called Cuthaeans by the Jews. The Semitic Babylonian form of the name is Kūta, semiticised from the Akkadian

𒌷𒍪𒌷𒍪𒌷𒍪𒌷 *Gudwa*. It was an

important city, and seems, in olden times, to have had two rivers or canals, one called the river of Cuthah (being probably that of which Josephus speaks, and which probably flowed eastwards, towards Persia) and the other called the "old river" or "canal," flowing through or near the city. The patron god and goddess of the city were Nergal and Laz, whose temple was restored by Nebuchadnezzar. Shalmaneser II., king of Assyria, occupied the city, and offered sacrifices in the temples, when he went to help Marduk-ūm-iddin against his rebellious brother. Sen-nacherib claims also to have subjugated the inhabitants. There was also a city called "the city of the river of Cuthah," situated, probably, on the river of Cuthah above mentioned, with which, perhaps, the real Cuthah was sometimes confounded. [T. G. P.]

^a It is true that Maspero characterises the Cushites as white, by which he must mean fair (i. c.), and as Shemite (p. 161).

CUTTING OFF FROM THE PEOPLE. [EXCOMMUNICATION.]

CUTTINGS [IN THE FLESH]. (יִצְחָק.)

s. f. יִצְחָק, s. m., both from יָצַח [Ges. p. 1339], to cut: 2. יִצְחָק, from יָצַח, *inuro*; *εἰσουλόμενος*; *incisuræ* [Jer. xlviii. 37; Ges. p. 264]: 3. יִצְחָק, s., from קָטַע, *engrave* [Gesen. p. 1208]; *γράμματα στυγά*; *stigmata*). The prohibition (Lev. xix. 28) against marks or cuttings in the flesh for the dead must be taken in connexion with the parallel passages (Lev. xxi. 5; Deut. xiv. 1), in which shaving the head with the same view is equally forbidden. But it appears from Jer. xvi. 6, 7, xli. 5, that some outward manifestation of grief in this way was not wholly forbidden, or was at least tolerated. The ground, therefore, of the prohibition must be sought elsewhere, and will be found in the superstitious or inhuman practices prevailing among heathen nations. A notion apparently existed that self-inflicted baldness or mutilation had a propitiatory efficacy in respect of the manes of the dead, perhaps as representing, in a modified degree, the solemnity of human or animal sacrifices. Herodotus (iv. 71) describes the Scythian usage in the case of a deceased king, for whose obsequies not fewer than six human victims, besides offerings of animals and other effects, were considered necessary. An extreme case of funeral bloodshed is represented on the occasion of the burial of Patroclus, when four horses, two dogs, and twelve Trojan captives are offered up (*Il.* xxiii. 171, 176). Together with human or animal sacrifices at funerals, and after these had gone out of use, the minor propitiatory acts of self-laceration and depilation continued (*Il.* xxiii. 141; *Od.* iv. 197; *Virg. Aen.* iii. 67, with *Servius ad loc.* xii. 605; *Eurip. Alc.* 425; *Seneca, Hippol.* v. 1176, 1193). Plutarch says that some barbarians mutilate themselves (*de Consol. ad Apollon.* p. 113, vol. vi. Reiske). He also says that Solon, by the advice of Epimenides, curtailed the Athenian practice in this respect (*Solon*, 12-21, vol. i. pp. 184, 194). Cicero quotes a law of the Twelve Tables to the same effect: "mulieres genas ne radunto" (*de Leg.* ii. 23).

Such being the ancient heathen practice, it is not surprising that the Law should forbid similar practices in every case in which they might be used or misconstrued in a propitiatory sense. "Ye shall not make cuttings for (propter) the dead," יִצְחָק (Lev. xix. 28; Ges. p. 731; Spencer, *de Leg. Hebr.* ii. ch. xix. 404, 405. Cp. Robertson Smith, *Religion of the Semites*, i. 304-6).

But the practice of self-mutilation as an act of worship belonged also to heathen religious ceremonies not funeral. The priests of Baal, a Syrian and also an Assyrian deity, cut themselves with knives to propitiate the god "after their manner" (1 K. xviii. 28). Herodotus says that the Carians, who resided in Europe, cut their foreheads with knives at festivals of Iseis; in this respect exceeding the Egyptians, who beat themselves on these occasions (Herod. ii. 61). This shows that the practice was not then at least an Egyptian one. Lucian, speaking of the Syrian priestly attendants of this mock deity, says, that using violent gestures they cut their

arms and tongues with swords (Lucian, *Asinus*, c. 37, vol. ii. 102, Amst.; *de Dea Syr.* ii. 658, 681; cp. *Ezek.* viii. 14). Similar practices in the worship of Bellona are mentioned by Lucian (*Phars.* i. 560), and are alluded to by Aelius Lampridius (*Comm.* p. 209), by Tertullian (*Apol.* 9), and Lactantius (*Div. Instit.* i. c. 21, 29, Paris). Herodotus, speaking of means used for allaying a storm, uses the words *εἰσουλόμενοι*, which may mean cutting the flesh, but more probably offering human sacrifices (Herod. vii. 191, ii. 119, with Schweighäuser's note: see also *Virg.* *Aen.* ii. 116; *Lucr.* i. 85).

The prohibition, therefore, is directed against practices prevailing not among the Egyptians whom the Israelites were leaving, but among the Syrians, to whom they were about to become neighbours (Selden, *de Diis Syria*, Sya. ii. c. 1).

Practices of self-mutilation, whether propitiatory or simply funereal, i.e. expressive of highly excited feeling, are to be found among the modern Persians on the occasion of the celebration of the death of Hoseyn, at which a man is paraded in the character of the saint, with points of lances thrust into his flesh. At funerals also in general the women tear their hair and faces. The Circassians express grief by tearing the flesh of their foreheads, arms, and breasts. The Mexicans and Peruvians offered human sacrifices both at funerals and festivals. The Gossayens of India, a class of Brahminical friars, endeavour in some cases to extort alms by gnashing their limbs with knives. Among the native negro African tribes also the practice appears to prevail of offering human sacrifices at the death of chiefs (Chardin, *Voyages*, vi. 482, ix. 58, 490; Olearius, *Travels*, p. 237; Lane, *Mod. Eg.* ii. 59; Prescott, *Mexico*, i. 53, 63; *Peru*, i. 86; Elphinstone, *Hist. of India*, i. 116; Strab. xv. 711 et seq.; Niebuhr, *Voyages*, ii. 54; Livingstone, *Travels*, pp. 318, 588; *Col. Ch. Chron.* No. cxxxi. p. 179; Muratori, *Anecd.* iv. 99, 100).

But there is another usage contemplated more remotely by the prohibition, viz. that of printing marks (στίγματα), tattooing, to indicate allegiance to a deity, in the same manner as soldiers and slaves bore tattooed marks to indicate allegiance or adscription. This is evidently alluded to in the Revelation of St. John (xiii. 16, xvii. 5, xix. 20, *χαρᾶγμα ἐπὶ τῆς χειρὸς τῆς δεξιᾶς καὶ ἐπὶ τῶν περσέων*), and, though in a contrary direction, by Ezekiel (ix. 4), by St. Paul (Gnl. vi. 17), in the Revelation (vii. 3), and perhaps by Isaiah (xliv. 5) and Zechariah (xiii. 6). Lucian, speaking of the priests of the Syrian deity, says, *στίγματα ἔχοντες, οἳ μὲν ἐς καρπὸς, οἳ δὲ ἐς ἀγκύρας, καὶ ἀπὸ τοῦδε, ἑσπέρης Ἀσσυρίων στυματοφοροῦσι* (*de Dea Syr.* ii. p. 684). A tradition, mentioned by Jerome, was current among the Jews, that king Jehoiakim bore on his body marks of this kind which were discovered after his death (Spencer, *de Leg. Hebr.* ii. ch. xx. 410). Philo, quoted by Spencer, describes the marks of tattooing impressed on those who submitted to the process in their besotted love for idol-worship, as being made by branding (*στίγματα περὶ τὴν μένιν*, Philo, *de Monarch.* i. 819; Spencer, p. 416). The Arabs, both men and women, are in the habit of tattooing their faces and other parts of the body, and the members of Brahminical sects in India are distinguished

by marks on the forehead, often erroneously supposed by Europeans to be marks of caste (Niebuhr, *Descr. de l'Ar.* 58; *Voyages*, i. 242; Wellsted, *Arabia*, ii. 206, 445; Olearius, *Travels*, 299; Elphinstone, *India*, i. 195). [H. W. P.]

CYAMON (Κυάμων; *Chelmon*), a place named only in Judith vii. 3, as lying in the plain (ἀλάς, E. V. "valley") over against (ἀπέναντι) Esdrelom. If by "Esdrelom" we may understand Jezreel, this description answers to the situation of *Tell Keimán*, JOKNEAN, a conspicuous hillock, beneath the eastern end of Carmel, overlooking the Kishon and the great plain (Rob. iii. 114; Van de Velde, i. 330; *PEF. Mem.* ii. 48, 69). The place was known to Eusebius (*OS.* p. 272, 66, s. n. *Καμωνά*) and Jerome (*OS.* p. 144, 20, s. n. *Camona*), and is mentioned by them as 6 miles from Legio on the road to Ptolemais. They identify it with CAMON, the burial-place of Jair the Gileadite. It has been suggested (Hackett, s. v. in *D. B.* Amer. ed.) that Cyamon may be *Füleh*, on the east side of the plain of Esdraelon. Cyamon (Κυάμων) and *Füleh* both mean *a bean* or place of beans, and

so may represent an earlier name (כַּמּוֹן) of that signification. Rümer (*Palästina*, 154) identifies Cyamon with *Füleh*. [G.] [W.]

CYMBALS (סַלְסִילִים) occurs eleven times in the Book of Chronicles alone (besides occurring in Ezra, in Nehemiah, and in the Apocrypha). It is identical with the somewhat older word

Tzetzeli (סַלְסִילִים) of 2 Sam. vi. 5, to which it is lexicographically, though not grammatically, related. The primitive biblical root to which both words belong is צַל, "to touch gently," or to touch even only imaginarily (cp. צַל, "shadow"). The developed root, however, with or without reduplication, signifies everywhere "to touch roughly," "to clash."

The dual form of *Metzillayim** points at once

Baruch playing on Cymbals. (Konyunjit.)

* Akin to this word is the *Metzillith* (מַצִּילִית) of Zech. xiv. 20, which is not a neck-ornament of a horse, as Ibn Ezra and Qimchi believed, but a pendant from the forehead down between the eyes, as the Talmud already explained it (*Babli Pesachim*, leaf 50a).

to the mode of construction of this musical instrument, which is made of two plates of metal (בְּסַלְסִילִים נְחֹשֶׁת, 1 Ch. xv. 19). Closely related to the cymbal were the *Mena'an'im* (מְנַעֲנִים), which word is, by mistake, given in the A. V. (2 Sam. vi. 5) as "cornets," but rightly translated in the R. V. as "castanets." [CORNET: JONATHAN ELEM RECHOKIM.] [S. M. S.-S.]

CYPRESS (צִרְזִי, *tirzäh*; ἀγριοβάλανος, A., Aq., and Theod.; *ilez*). The Hebrew word is found only in Is. xlv. 14, "He heweth him down cedars and taketh the *tirzäh* and the oak." In the R. V. *tirzäh* is rendered "holm tree." Besides the cypress, the "beech," the "holm-oak" (*Quercus pseudococcifera*), and the "fir" have been proposed; but there is nothing in the etymology of the Hebrew name, or in the passage where it occurs, to guide us to the tree intended. The word is derived from a root which means "to be hard," a quality which obviously suits many kinds of trees. Celsius (*Illeob.* ii. 269) believes the "ilex" or "holm-oak" is meant; the prickly-leaved ilex being one of the most common trees in Palestine. With respect to the claims of the cypress (*Cupressus sempervirens*), which, at present at all events, is found cultivated only in the lower levels of Syria, it must be granted that they are unsupported by any authority. Van de Velde's cypress is the *Juniperus excelsa*, which is also the cypress of Pococke; and which grows higher upon Lebanon than any other tree except the cedar. "The juniper," says Sir J. D. Hooker, "is found at the height of 7,000 feet, on Lebanon, the top of which is 10,500 feet or so." The true cypress is a native of the Taurus. The Hebrew word points to some tree with a hard grain, and this is all that can be positively said of it. But if it be assumed that the carpenter went to the mountains for his timber, the tall juniper would be the most natural tree to name along with the cedar and the oak, they being the three arboreal features of Lebanon and its spurs. Our own conviction is that the *tirzäh* and *berōsh* stand for the juniper and the pine, *Juniperus excelsa* and *Pinus halepensis*, the only question being which of the two each Hebrew word represents. [W. H.] [H. B. T.]

CYPRIANS (Κύπριοι; *Cyprii*). Inhabitants of the island of Cyprus (2 Mac. iv. 29). At the time alluded to (that is, during the reign of Antiochus Epiphanes), they were under the dominion of Egypt, and were governed by a viceroy who was possessed of ample powers, and is called in the inscriptions *στρατηγὸς καὶ ναύαρχος καὶ ἀρχιερεὺς ὁ κατὰ τὴν νῆσον* (cp. Boeckh, *Corp. Insc.* Nos. 2619, 2622, 2624, p. 417; Cesnola's *Cyprus, Jour. of Hell. Studies*, ix. 225, 229, 234, 235, 242). Crates, one of these viceroys, was left by Sosistratus in command of the castle, or acropolis, of Jerusalem while he was summoned before the king. [J. E. S.]

CYPRUS (Κύπρος). This island was in early times in close commercial connexion with Phoenicia; and there is little doubt that it is referred to in such passages of the O. T. as Ezek. xxvii. 6. [CHITTIM.] Josephus makes this identification in the most express terms (Χθύμα . . . Κύπρος αὐτὴ νῦν καλεῖται; *Ant.* i. 6, § 1;

se Epiphan. *Haer.* xxx. 25). Possibly Jews may have settled in Cyprus before the time of Alexander. Soon after his time they were numerous in the island, as is distinctly implied in 1 Macc. xv. 23. The first notice of it in the N. T. is in Acts iv. 36, where it is mentioned as the native place of Barnabas. In Acts xi. 19, 20 it appears prominently in connexion with the earliest spreading of Christianity, first as receiving an impulse among its Jewish population from the persecution which drove the disciples from Jerusalem, at the death of Stephen, and then as furnishing disciples who preached the Gospel to Gentiles at Antioch. Thus, when Paul was sent with Barnabas from Antioch on his first missionary journey, Cyprus was the first scene of their labours (Acts xiii. 4-13). Again, when Paul and Barnabas separated and took different routes, the latter went to his native island, taking with him his relative Mark, who had also been there on the previous occasion (Acts xv. 39). Another Christian of Cyprus, Mnason, called "an old disciple," and therefore probably an early convert, is mentioned in Acts xxi. 16. The other notices of the island are purely geographical. On St. Paul's return from the third missionary journey, they "sighted" Cyprus, and sailed to the south of it on the voyage from Patara to Tyre (ib. 3). At the commencement of the voyage to Rome, they sailed to the northward of it, on leaving Sidon, in order to be under the lee of the land (Acts xxvii. 4), and also in order to obtain the advantage of the current, which sets northerly along the coast of Phoenicia, and westerly with considerable force along Cilicia.

All the notices of Cyprus contained in ancient writers are diligently collected in the great work of Meursius (*Meursii Opera*, vol. iii. Flor. 1744). Situated in the extreme eastern corner of the Mediterranean, with the range of Lebanon on the east, and that of Taurus on the north, distinctly visible, it never became a thoroughly Greek island. Its religious rites were half Oriental [PAPHOS], and its political history has almost always been associated with Asia and Africa. Cyprus was a rich and productive island. Its fruits and flowers were famous. The mountains also produced metals, especially copper. This circumstance gives us an interesting link between this island and Judaea. The copper mines were at one time farmed to Herod the Great (Joseph. *Ant.* xvi. 4, § 5), and there is a Cyprian inscription (Boeckh, No. 2628) which seems to refer to one of the Herods. The history of Cyprus is briefly as follows:—After being subject to the Egyptian king Amasis (Herod. ii. 182) it became a part of the Persian empire (ib. iii. 19, 91), and furnished ships against Greece in the expedition of Xerxes (ib. vii. 90). For a time it was subject to Greek influence, but again became tributary to Persia. After the battle of Issus, it joined Alexander, and after his death fell to the share of Ptolemy. In a desperate sea-fight off SALAMIS at the east end of Cyprus (B.C. 306), the victory was won by Demetrius Poliorcetes; but the island was recovered by his rival, and afterwards it remained in the power of the Ptolemies, and was regarded as one of their most cherished possessions. It became a Roman province (B.C. 58) under circumstances discreditable to Rome. At

first its administration was joined with that of Cilicia, but after the battle of Actium it was separately governed. In the first division it was made an imperial province (Dio Cass. liii. 12). From this passage and from Strabo (xiv. p. 683) it has been supposed by some, as by

Copper Coin of Cyprus, under Emp. Claudius.

Obv. [CL]AVDIVS. CAESA[R]. Head of Emp. to left. Rev. EΠΙ ΚΟΜΙΝΙΟΥ ΚΑΙ ΠΟΚΑΘΟΥ ΑΝΘΥΛΙΑ ΚΥΠΡΟΥ.

Baronius, that St. Luke used the word *προconsul* (*proconsul*), because the island was still connected with Cilicia; by others, as by Grotius and Hammond, that the Evangelist employs the word in a loose and general manner. But, in fact, Dio Cassius himself distinctly tells us (v. and liv. 4) that the emperor afterwards made this island a senatorial province; so that St. Luke's language is in the strictest sense correct. Further confirmation is supplied by coins and inscriptions, which mention other *proconsuls* of Cyprus not very remote from the time of SERGIUS PAULUS (Engel's *Kypros*, i. 459-463; Conybeare and Howson, *Life and Epistles of St. Paul*, ch. v.; Cesnola, *Cyprus*, pp. 420, 423; *Journal of Hellenic Studies*, ix. 243). The governor appears to have resided at Paphos on the west of the island. Under the Roman empire a road connected the two towns of Paphos and Salamis, as appears from the Pentinger Table. One of the most remarkable events in this part of the history of Cyprus was a terrible insurrection of the Jews in the reign of Trajan, which led to a massacre, first of the Greek inhabitants, and then of the insurgents themselves (Milman, *Hist. of Jews*, iii. 111, 112; Mommsen's *Provinces of the Roman Empire*, ii. 221). In the 9th century Cyprus fell into the power of the Saracens. In the 12th it was in the hands of the Crusaders, under the English king Richard I.

Some of the results of archaeological research during the present century may here be noticed. In 1846 an interesting bas-relief presented to the Cyprian princes in B.C. 707 by "Sargon, the king of Assyria" (Is. xx. 1), was found in a garden near Larnaka, and is now in the Berlin Museum. "It is still the most valuable of all Cyprian statues, being in admirable preservation, and bearing upon itself its own history in a long cuneiform inscription" (R. Hamilton Lang, *Cyprus*, p. 329).

In 1869, while digging out an ancient temple at Dali (*Idalion*), Mr. Lang discovered two treasures of silver coins belonging to the six or seven distinct kingdoms which, we know from other sources, once existed in the island, the earliest of these coins being probably about the middle of the 6th century B.C. (*Numismatic Chronicle*, xi. N. S. 1871; Vaux, *Ancient Cities, &c., of Asia Minor*, p. 167). He also dis-

covered a bilingual inscription in Cypriote and Phœnician writing which supplied the key to the ancient Cyprian alphabet. The characters, which closely resemble those of the Lycian alphabet, have little or no resemblance to Greek characters, but the words are much the same as those used by the early Greeks. The Cyprian writing strongly confirms the statement of the Old Testament Scriptures, in which Kittim is named among the sons of Javan (Gen. x. 4), thus implying that the inhabitants of Cyprus were of Javanian (Ionian) and not Semitic origin (Lang, *L. c.* pp. 5-8, 333 sq.). Javan, in the form

Slab of Sargon, in Berlin Museum. (From Cesnola's *Cyprus*, p. 47.)

Javan or *Yunan*, is the term descriptive of Cyprus in the cuneiform inscription of Sargon, about B.C. 709 [JAVAN]. Mr. Lang's discoveries were even surpassed in extent and in varied interest by those of General di Cesnola at Golgos, Salamis, Palaepaphos, Soli, Amathus, and Enrium (*The Antiquities of Cyprus*, 1873; *Cyprus, its Ancient Cities*, 1877; *Salamina*, 1882). In 1888 organised research in Cyprus was undertaken, by means of public inscriptions in England, and grants from the Hellenic Society and the Universities of Oxford and Cambridge, by Messrs. D. G. Hogarth, M. R. James, R. Elsie, and E. A. Gardner (Director of the British School of Archaeology in Athens): an account of their excavations at PAPHOS may be found in the *Journal of Hellenic Studies*, ix. 143-271.

Materials for the description of Cyprus are sup-

plied by Pococke (1745) and Von Hammer, *Topographische Ansichten gesammelt auf einer Reise in die Levant*, Vienna, 1811). But see especially Engel's *Kypros*, Berlin, 1843, and Ross's *Reisen nach Kos, Halikarnassos, Rhodos, u. der Insel Cypern*, Halle, 1852; *Dict. of Gr. and Rom. Geog.*, art. "Cyprus;" Wetzer u. Welte's *Kirchen-Lexikon*,² art. "Cypern"; Unger and Kotschy, *Die Insel Cypern*, Vienna, 1866; Palma di Cesnola's works, noted above; Von Löher, *Cypern*, ed. 3, Leipzig, 1879; R. Hamilton Lang, *Cyprus*, 1878; S. W. Baker, *Cyprus as I saw it* in 1879; G. Colonna-Ceccaldi, *Monuments antiques de Chypre*, &c., Paris, 1882. For a short account of the researches of Lang and Cesnola, see Vaux, *Greek Cities*, &c., pp. 166-171. The Engl. Ordn. Map of Cyprus was published in 1887.

[J. S. H.] [J. E. S.]

CYRAMA, 1 Esd. v. 20. [CIRAMA.]

CYRE/NE (Κυρήνη), the principal city of that part of Northern Africa which was anciently called Cyrenaica, and also (from its five chief cities) Pentapolis. This district was that wide projecting portion of the coast (corresponding to the modern *Tripoli*) which was separated from the territory of Carthage on the one hand, and that of Egypt on the other. Its surface is a table-land descending by terraces to the sea; and it was celebrated for its climate and fertility. It is observable that the expression used in Acts ii. 10, "the parts of Libya about (κατὰ) Cyrene," exactly corresponds with a phrase used by Dio Cassius (Λιβύη ἢ περὶ Κυρήνην, liii. 12), and also with the language of Josephus (ἡ πρὸς Κυρήνην Λιβύη: *Ant.* xvi. 6, § 1). [LIBYA.]

The points to be noticed in reference to Cyrene as connected with the N. T. are these: that, though on the African coast, it was a Greek city; that the Jews were settled there in large numbers, and that under the Romans it was politically connected with Crete, from which it is separated by no great space of sea. The Greek colonisation of this part of Africa under Battus began as early as B.C. 631; and it became celebrated not only for its commerce, but for its physicians, philosophers, and poets. After the death of Alexander the Great, it became a dependency of Egypt. It is in this period that we find the Jews established there with great privilege. Ptolemy, the son of Lagus, introduced them, because he thought they would contribute to the security of the place (Joseph. c. *Apion*. ii. 4): they became a prominent and influential class of the community (*Ant.* xiv. 7, § 2); and they afterwards received much consideration from the Romans (xvi. 6, § 5). See 1 Macc. xv. 23. We learn from Josephus (*Life*, 76) that soon after the Jewish war they rose against the Roman power. Another insurrection in the reign of Trajan led to great disasters, and to the beginning of the decay which was completed under the Mohammedans. It was in the year B.C. 75 that the territory of Cyrene (having previously been left to the Romans as a legacy by Apion, son of Ptolemy Physcon) was reduced to the form of a province. On the conquest of Crete (B.C. 67) the two were united in one province, and together frequently called Creta-Cyrene. Under Constantine they were again separated. [CRETE.]

The notices above given of the numbers and position of the Jews in Cyrene (confirmed by Philo, who speaks of the diffusion of the Jews, ἀπὸ τοῦ πρὸς Λιβύην καταβαθμοῦ μέχρι τῶν ὁρίων Αἰθιοπίας, *adv. Flacc.* p. 523) prepare us for the frequent mention of the place in the N. T. in connexion with Christianity. Simon, who bore our Saviour's cross (Matt. xxvii. 32; Mark xv. 21; Luke xxiii. 26), was a native of Cyrene. Jewish dwellers in Cyrenaica were in

Jerusalem at Pentecost (Acts ii. 10). They even gave their name to one of the synagogues in Jerusalem (*ib.* vi. 9). Christian converts from Cyrene were among those who contributed actively to the formation of the first Gentile church at Antioch (*ib.* xi. 20), and among those who are specially mentioned as labouring at Antioch when Barnabas and Saul were sent on their missionary journey is Lucius of Cyrene (*ib.* xiii. 1), traditionally said to have been the

Cyrene.

first Bishop of his native district. Other traditions connect Mark with the first establishment of Christianity in this part of Africa.

CYRENIAN (Κυρηναῖος; *Cyrenaeus*), a native or inhabitant of CYRENE. Cp. 2 Macc. ii. 23; Matt. xxvii. 32; Mark xv. 21; Luke xxiii. 26; Acts vi. 9, xi. 20, xiii. 1.

CYRENIUS (Κυρήνιος; Κύρενος, B^a; *Cyrenus*). P. Sulpicius Quirinus is mentioned in Luke ii. 2 under the Grecised form Cyrenius. The facts of his life will be given first, and then St. Luke's statement will be examined.

I. His life is thus briefly sketched by Tacitus on the occasion of his public funeral. "Quirinus had no connexion with the old patrician family of the Sulpicii, sprung as he was from the municipality of Lanuvium. By activity in the field and an eager discharge of duty he won the consulship under Augustus, and afterwards gained the honour of a triumph by capturing throughout Cilicia the forts of the Homona-

denuses. Appointed as 'rector' to C. Caesar, who then had the province of Armenia, he had sought the favour of Tiberius during the residence of the latter at Rhodes. This was now stated by Tiberius in the senate. The emperor praised the services of Quirinus to him, accusing Lollius, to whom he sought to attribute the origin of C. Caesar's malice and ill-will. But the emperor alone dwelt with pleasure on the memory of Quirinus; others thought of the peril into which he had brought Lepida, of his old age sullied by avarice and dreaded for its power" (Tac. *Ann.* iii. 48). To this must be added the statement of Josephus, that when Archelaus was deposed and Judaea made dependent on Syria, Quirinus, a man of consular rank, was sent to assess Syria and to sell the property of Archelaus (Jos. *Ant.* xvii. 13, § 5). Everything beyond this is more or less hypothetical, but Zumpt's minute investigations make it probable that the victory of Quirinus over the Homonadenses implies as a necessary condition a previous tenure of the government in Syria, preceding by about ten years that mentioned by Josephus (Zumpt, *Geb.* p. 71).

II. The "taxing." The statement of Luke ii. 2 runs thus in the R. V.: "This was the first enrolment made when Quirinus was governor of Syria." It is pretty clear in the Greek that *πρώτη* (first) is an emphatic word, and that a main object of St. Luke is to distinguish this enrolment as the first from some subsequent enrolment. Such an object would sufficiently account for the parenthesis (v. 2) being inserted. We know that St. Luke was aware of another enrolment by his mention of it (Acts v. 37). He there connects an enrolment with the insurrection of Judas. We know from Josephus (see above) that a census was carried out by Quirinus, and that it was followed by an insurrection. St. Luke seems here (ii. 2) to say, "I do not mean that later one, but an earlier one." At this point the difficulty arises. The later census did undoubtedly take place when Quirinus was legate of Syria. But St. Luke seems to imply that *both* did. Yet our Lord's Birth occurred before the death of Herod the Great, and Quirinus' first government of Syria (supposed by Zumpt) cannot have then begun. We know from Josephus that Varus was legate till after Herod's death, and that Sentius Saturninus preceded Varus. With our present information it is impossible to escape from this difficulty, though Zumpt's explanation, given below, is perhaps just admissible. But even if it should be acknowledged that on present information it appears as if St. Luke is inaccurate in dating the first as well as the second census in the legateship of Quirinus, yet the web of the narrative is not thereby affected. Such a concession is a very different matter from the assertion that no such first census ever took place, and consequently that the reason given for Joseph's journey and the journey itself are unhistorical (Keim, *Jesus of N.* ii. p. 104 sq.). The grounds of this assertion must be considered.

(1) Herod the Great was an ally, not a subject of Rome, and would not have been thus interfered with. But Herod paid tribute to Rome (Wieseler, *Stud. Krit.* 1875, p. 541), and may well have had to comply with a request

for a census. This is the view of Siefert (art. *Schatzung*, Herzog, *RE.*), who in other respects freely criticises the Gospel narrative. Two important passages on the position of Herod are Jos. *Ant.* xv. 10, § 3, and Appian, *B. C.* v. 75. Zumpt will not admit the relevancy of the case of the Clitae (Tac. *Ann.* vi. 41).

(2) It is further objected that (a) there is no mention in early sources of a general census of the Roman world, or even of the provinces at this time, and that the evidence of more than one census of *Roman citizens* by Augustus does not bear in any way on the point in question. Admitting this, Zumpt has proved that there are historical grounds for the probability of a general census by Augustus, dating perhaps in its inception from B.C. 27, when the senatorial and imperial provinces were divided. The words "in those days" (Luke ii. 1) do not pretend to fix the date with exactness (see Zumpt, *Geb.* p. 159). Further we must take into account the statements of Cassiodorus, Isidorus, and Suidas (Zumpt, *Geb.* pp. 149-155), whatever they may be worth; and Riess warmly defends against Schegg the testimony of Orosius (*Hist. Rom.* vi. 22).

(b) There is also silence as to such a census in Judaea. Josephus does not mention it, and is held by Schürer (*Neutest. Zeitgesch.* i. p. 277) to describe the census after the banishment of Archelaus as something unprecedented. Against this may be set the statement of Tertullian * that it did take place.

Maintaining then against Keim and others the fact of a census before Herod's death, we still have left the difficulty that St. Luke dates it in the legateship of Quirinus. It will be proper to mention some of the explanations which have been suggested, though, as already stated, none are convincing. Two of them arise out of the history, and two out of the verbal exegesis of the passage.

1. *Historical.*—(a) The first census was ordered by Sentius Saturninus (as stated by Tertull. *l. c.*), and only completed under Quirinus in his first term of office after Herod's death. This supposes the work to have lingered on under three governors,—Saturninus, Varus, and Quirinus (Zumpt, *Geb.* pp. 220-1).

(b) The first census was ordered by Quirinus, who was in the East before Herod's death as rector to C. Caesar. Saturninus was then properly the legate of Syria, but Quirinus from his position as "rector" had an authority which superseded that of the legate (Riess, *Geburtsjahr*, p. 71, and *Nochmals Geburtsjahr*, pp. 64-5).

2. *Exegetical.*—(a) The first of these links itself to Zumpt's explanation given above, but is by no means essential to it. *ἔτεvero* (lit. "was" or "took place") is held to mean "took effect," "was completed," and to carry on the story to a later date than the going forth of the edict (cp. parallel use of *ἔτεvero*, Acts xi. 28). This interpretation is supposed to be strengthened by taking *πρώτη* closely with *ἔτεvero*, and translating "first took effect" (*tum demum facta est*). Admitting that *πρώτη* may stand for *πρώτος*, this rendering is never-

* "Sed et census constat actos sub Augusto nunc in Judaea per Sentium Saturninum" (Tert. *adv. Marc.* iv. 19). On this see Zumpt, p. 218 sq.

theless untenable. Even *πῶρor ἐγένετο* could not mean "first took effect," in the sense of "did not take effect until." And a further objection, if it were needed, lies in the probable omission of *ἡ* before *ἀπογραφῇ* (see Westcott and Hort, *N. T., Notes on Select Readings*), which obliges *ἀπὸν* to be taken separately as the subject of the verb (see Winer, ed. Moulton, § 18, 4, n. 1). It may be added that it is hard to make any use of such an explanation without drawing an unwarrantable distinction of meaning between the cognate verb and substantive: between Joseph going to enrol himself (*ἀπογράφειν*), supposed to mean a preliminary step, and the enrolment (*ἀπογραφῇ*), supposed to mean the taxation.

(b) The second explanation is equally untenable. Resting on the use of *πῶρor* (first) in a comparative sense in such passages as John i. 15, it translates "this taxing took place before Quirinus was governor of Syria." But *πῶρor* is here followed by the genitive of a participle as well of a noun, which makes all the difference. The great names alleged for this view—Ewald, Wieseler, and others—can give no probability to an interpretation according to which, as Sieffert justly says, the Evangelist would have expressed himself as unintelligibly as possible.

The controversy involves a number of intricate collateral questions of history, chronology, and archaeology, such as the dates of Herod's reign and our Lord's birth, Roman provincial government, and the position of the subject kingdoms, the genuineness of the Orsato inscription, and the interpretation of the Tiburtine, numismatic questions, and the like. Hence the modern literature of the subject is very large. A good list of works is given at the end of Sieffert's art. *Schatzung* in Herzog,² to which the writer is indebted, as well as to Schürer, *Neutest. Zeitgesch.*¹ p. 262 sq.; Keim, *Jesus of Nazara* (tr.), vol. ii. pp. 114-122; and on the other side, Riess, *Geburtsjahr Christi*, and *Nochmals Geburtsjahr Christi*. But the principal authority on the subject is the masterly essay of A. W. Zumpt, *Das Geburtsjahr Christi*, Leipzig, 1869, which, whether its conclusions are justified or not, states all the data with clearness and impartiality. [E. R. B.]

CYRUS (כֹּרֶשׁ or כּוֹרֶשׁ, *Koresh*; Old Persian, *Kurush* [*K'-u-r'-u-sh*]; Semitic Babylonian, *Kuraš*, *Kurraš*, *Kuraku*, and *Kurraku*; Gr. *Kūpos*, originally supposed [so Ctesias apud Plut. *Artax.* c. i] to be from the Persian *khōr* [خور, هور], "the sun"—an etymology now

regarded as impossible, it being evidently from the root *kur*, from which the name of the river Kur is derived), according to the Greeks (Herod. i. 107; Xen. *Cyrop.* i. 2, 1), the son of Cambyzes, a Persian of the royal family of the Achaemenidae, and Mandane, daughter of Astyages. This accords with Cyrus's own statement (cylinder-inscription), in which he says: "I am Kuraš, king of multitudes, the great king, the mighty king, king of Babylon, king of Sumeri and Akkadī (Shinar and Accad), king of the four regions, son of Kambugia (Cambyzes), the great king, the king of the city of Anšān, grandson of Kuraš (Cyrus), the great king, the king of the city of

Anšān, great-grandson of Šišpiš (Teispes), the great king, the king of the city of Anšān." According to the well-known legend, Astyages, in consequence of a dream, which was interpreted to portend that his grandson should be master of all Asia, designed the death of the infant, and immediately after its birth consigned it to Harpagns, his confidential attendant, with strict orders to kill it. Harpagns, wishing not to commit this crime, delivered the child to a herdsman named Mithradates, who was to expose it, and satisfy Harpagns of its death. Whilst the herdsman was in the city, his wife brought forth a still-born child. This they substituted for the royal infant, whom they brought up as their own. He seems at first sight not to have been called Cyrus, but Agradates (Strabo, xv. p. 729). It is said (Herod. i. 114) that his real parentage was discovered by the imperious spirit which he displayed. He was made king by the boys of the village in their sports; and one, the son of a noble Median, who had disobeyed his commands, he caused to be severely scourged. Complaint was made to Astyages, who sent for Cyrus, and recognised him as his daughter's son. Astyages forgave the herdsman, but took a fearful revenge on Harpagns, inviting him to a banquet, and there serving up to him, with circumstances of the most refined cruelty, the flesh of his own son. As for Cyrus, Astyages, by advice of the Magians, concluded that he had nothing to fear from him, the dreams having been fulfilled by the boy's having been king in sport. Cyrus was sent to his parents, and whilst he was there Harpagns ingratiated himself with him by means of presents, and urged him by letter to avenge himself upon Astyages for his attempt to kill him. Cyrus followed this advice, and, exciting still more the discontent under which the Persians were labouring, gathered an army. Astyages sent a force against Cyrus, and was betrayed by Harpagns, who joined the Persians with a large portion of his army. A second engagement afterwards took place, in which Astyages was taken prisoner, near Parsagadae (*Murgh-Aub*, Strabo, xv. 730). 549 B.C. Both Nabonidus (cylinder-inscription) and Cyrus (annals of the reign of Nabonidus) mention this conflict, but they seem to refer to one engagement only. Nabonidus says: "In the beginning of my long reign a dream was shown to me. Marduk, the great lord, and Sin, the illuminator of heaven and earth, stood on each side. Marduk spake with me: 'Nabonidus, king of Babylon, come up with the horses of thy chariot, build the walls of E-gulhol, and have the seat of Sin, the great lord, set within it.' Reverently I spoke to the lord of the gods, Marduk: 'I will build that house of which thou speakest. The Umman-Manda (Medes) besieged it, and strong was their might.' Marduk spoke with me: 'The Umman-Manda, of which thou speakest; they, their country, and the kings going by their side, shall not exist.' When the third year arrived, he caused Cyrus, king of the land of Anšān, his young servant, to march against them with his little army; he caused him to destroy the vast Umman-Manda; Ikuwegn (Astyages), king of the Umman-Manda, he captured, and took his treasures to his (own) country." The statement in the annals (5th year of Nabonidus) is as follows: "[Astyages]

gathered [his army], and went against Cyrus, king of Anšan, to capture (him), and . . . Astyages' army revolted against him and made him prisoner and delivered him to Cyrus. Cyrus [went] to the land of Ecbatana, his royal city, [and] carried off from Ecbatana silver, gold, furniture, goods [and merchandise], and took to Anšan the furniture (and) goods which he had taken." These two accounts, one composed by scribes during the reign of Cyrus in Babylon, and possibly under his direction, and the other written by orders of Nabonidus, probably give as fair an account of Cyrus's first step towards empire as could be expected. It will be noted that these accounts, that of Nabonidus included, both call Cyrus king of *Anšan* or *Anzan*, a name which is explained in the Assyrian lists as being equivalent to Elam.* He had therefore already attained to royal rank. Cyrus is said to have treated Astyages well, and kept him until his death.

During the next two years (548-547 B.C.), Cyrus was probably consolidating the conquests which he had made, by reducing to obedience the few cities of Media which still held out for Astyages. The next year (546 B.C.) Cyrus gathered his army, and crossed the Tigris below Arbela, to attack a petty king in that neighbourhood, whom he seems to have taken prisoner, carrying off also treasure and other valuables. In the year 545 B.C., also, Elamites seem to have gone into Akkad for some purpose (*Annals of Nabonidus*). Judging from the way in which Nabonidus speaks of Cyrus, calling him "the young servant of Merodach," it is not unlikely that Cyrus was acting in concert with him, or at least at his request. It was probably about this time that Cyrus defeated Croesus, and conquered Lydia. He afterwards prepared to attack the Greek cities of Asia Minor. Leaving that region, he returned to Ecbatana, taking Croesus with him, but he had no sooner gone than the states which had formed the Lydian empire revolted, but the whole of Asia Minor was afterwards reduced to submission by Harpagus, after a long and obstinate resistance. In the meanwhile Cyrus was engaged in subduing the nations of Upper Asia, sparing none. He then turned his attention to Babylonia, to which country, with a large army and in great state, he marched in the year 538 B.C. A battle was fought at Opis in the month Tammuz, and Sippara was captured on the 14th of the same month without fighting. Nabonidus, king of Babylon, fled; and two days after, Gobryas, governor of Gutium, entered Babylon, with the army of Cyrus, without fighting.† Nabonidus was captured and taken thither. On the 3rd of Marcheswan Cyrus himself came to Babylon. He promised peace to Babylon, and Gobryas, his governor, appointed governors in that city. The images of the gods, which Nabonidus had taken to Babylon, were returned to their shrines. The son of the king [see BELSHAZZAR] died on the 11th of Marcheswan, and there was mourning for him

throughout the country. This being over, Cambyses, son of Cyrus, celebrated a festival on the 14th of Nisan, in the temple Ê-nig-sig-kalarna. There is no mention, in the official account, of any of the many engineering feats which Cyrus is said to have performed—passing the Gyades, one of the tributaries of the Tigris, by diverting its water into a large number of small channels; besieging Babylon, and taking the city after a long time by diverting the course of the Euphrates, so that his soldiers were able to enter by the bed of the river. It is not at all unlikely, however, that something of this kind was done, in which case Cyrus would naturally have made use of the many water-channels and irrigation works already in existence, extending them, and otherwise making them more suitable for his purpose. The conquest of Babylon must be regarded as one of his greatest military exploits, opening the way for still greater designs. According to Herodotus, Cyrus next conquered the Massagetae, a people dwelling beyond the Araxes. He offered to marry Tomyris, the widowed queen of this people, but she refused him. The war which followed ended with the death of Cyrus in battle (529 B.C.), after a reign of twenty-nine (Herodotus) or thirty years. He had ruled over Media for eleven, and over Babylonia (and Assyria) for nine years. According to the Babylonian contract-tablets, Cambyses, his son, was associated with him on the throne during the last year of his reign.‡

The account of Ctesias differs considerably from that of Herodotus on some points. According to him, Cyrus and Astyages, king of the Medes, were not related. When Cyrus made the conquest of Media, Astyages fled to Ecbatana, and was there concealed by his daughter Amytis, and her husband, Spitamnus, whom, with their children, Cyrus would have put to torture, had Astyages not discovered himself. Astyages was put in fetters, but was afterwards set free by Cyrus, who honoured him as a father, and having put Spitamnus to death for telling a falsehood, married the widow of the latter, Amytis, daughter of Astyages. Ctesias says that Cyrus made war with the Bactrians, and also with the Sacae, in which Cyrus was taken prisoner, but afterwards ransomed. Cyrus met his death, according to Ctesias, from a wound received when in battle with the Derbices.

Xenophon's account also differs from that of Herodotus. He says that Cyrus was brought up at the court of Astyages, and afterwards served in Media under Cyaxares, his uncle, son and successor of Astyages; that he conquered the Armenians, the Chaldeans, and the Assyrians, as general of Cyaxares, who allowed him to assume the power and state of an independent sovereign at Babylon; that he married the daughter of Cyaxares, and at last died quietly in his bed, after dividing his empire between his two sons, and giving a discourse to his children, recommending brotherly affection, piety, virtue,

* Also pronounced *Alšan*, assimilated from *Anšan* or *Anzan*. Cyrus is also called king of Persia in the annals.

† Cyrus himself, in his cylinder-inscription, also says that he entered Babylon "without fighting and battle" (see below).

‡ Cyrus, in his cylinder-inscription, says that all the kings, from the upper sea to the lower sea, and all the kings of Phoenicia, brought their valuable tribute to him at Babylon, and kissed his feet. Further excavations in the East will probably bring to light other records concerning Cyrus's conquests.

&c. Diodorus agrees, for the most part, with Herodotus, but says that Cyrus was taken prisoner by the Scythian queen (apparently meaning Tomyris), who, however, crucified or impaled him.

There is hardly any doubt that all the accounts of the Greek historians are more or less drawn from the legends which were current about Cyrus at the time they wrote. In the time of Herodotus he was already regarded as the national hero of Persia, and his history had received various popular embellishments (Herod. i. 95; cp. iii. 18, 160; Xen. *Cyrop.* i. 2, 1). Xenophon, indeed, has gone so far as to make him the hero of a romance, giving him all the virtues which it was possible for a man at that period to possess. The Babylonian Chronicle or Annals, however, probably give, as far as they

go, the most trustworthy account of his exploits. Taking this as a standpoint, it seems certain that Herodotus is the most trustworthy of all the historians outside of Cyrus's own dominions. It may safely be said, however, that Cyrus was a brave, talented, generous, and liberal-minded ruler.

Cyrus's policy in every case was conciliation, and self-identification with the national feelings, aspirations, and religion of the nations which he conquered. Under his rule contentment was to be found everywhere. The Babylonians did not find fault with him; and the Jews became even enthusiastic over him. Cyrus, in his cylinder-inscription, writes as if he were a Babylonian. He speaks of the anger of the gods in consequence of the dues to the temples not being paid, and the evil which was done. "The gods

Tomb of Cyrus at Merg-Ash, the ancient Parnagadae.

left their seats in anger against him who had sent them down to Šu-anna" (Nabonidus had caused many of the images of the divinities to be taken to Babylon, or "Šu-anna"). "Whose hands (Merodach) holds, Cyrus, king of Anšan, his name he called, and he proclaimed his name to the kingdom of the whole world (*kullata naphar*); the Gut⁴ and the whole of the Uman-Manda (the Medes) submitted to his feet. The people of the black head, whom he (Merodach) had caused his hands to capture, with righteousness and justice he constantly visited them . . . He commanded him to go to his city Babylon; he caused him to take the road to Babylon—like a friend and a companion he went by his side . . . Without fighting and battle he caused him to enter into Šu-anna; he guarded his city, Babylon; with the wretch (?) Nabonidus, the king who did not fear him, he filled his hand (i.e. delivered him as prisoner to Cyrus).⁵ The people of Babylon, all of them, the whole of

Šumer and Akkad, prince and ruler, gathered unto him, and kissed his feet." Cyrus even calls himself the worshipper of Merodach, and invokes the god to approach him, his son Cambyses, and his people, favourably. He sent back the gods of Assur, Agade (the city of Akkad), Abnunnag, Zamban, Mē-Turnu, Dūr-ili, &c. &c., to their places, and founded for them "lasting seats;" and the gods of Šumer and Akkad, which Nabonidus, "to the anger of the lord of the gods," had brought to Šu-anna, he restored to their places with peace, by command of the lord of the gods, Merodach. Of course, it is highly probable that Cyrus did not really feel any reverence for these, to him, foreign deities, but he certainly allowed ceremonies to be performed, and inscriptions to be written, in his name, in praise and worship of the gods of Babylon, especially Merodach. It is difficult to reconcile this with the monotheistic tone of his proclamation ordering the rebuilding of the Temple of Jerusalem (2 Ch. xxxvi. 23; Ezra i. 2, v. 13, ir. 3), but it is not improbable that Merodach, the chief god of the Babylonians, was, with him, the only god—another name for the Supreme Being. It is perhaps in this way that we can make

⁴ Another form of the word Gutium, a tribe of which Gobryas was governor (see above).

⁵ Nabonidus, when in captivity, probably changed his opinion about Cyrus being the servant of Merodach.

his reference to "the LORD, the God of heaven," agree. Cyrus, besides giving orders for the rebuilding of the Temple, returned the vessels of the house of the LORD which Nebuchadnezzar had taken away (Ezra i. 7), and made a grant to bring cedar-trees from Lebanon (Ezra iii. 7); but he did as much for the Babylonians, in restoring their temples, and bringing back the images of their gods to their shrines. Still, there must have been great sympathy between the Jews and their new ruler, as likely as not arising out of similarity of religious belief, and this it probably was that caused Isaiah (xliv. 28) to recognise in him a "shepherd" of the Lord, an "anointed" king (מָשִׁיחַ, Messiah; *τῷ χριστῷ μου*; *Christo meo*, Is. xlv. 1)—a title which seemed to later writers to invest him with the dignity of being, in some sense, a type of Christ himself (Hieron. *Comm. in Is.* xlv. 1). Whatever his religious opinions may have been, it is certain that he was a just and generous ruler, guarding the rights and privileges of his subjects in such a way that his reign may be regarded, in a certain sense, as having been a distinct advance in a barbarous age. [T. G. P.]

D

DAB'AREH (דַּבְּרֵה, *pasture*; B. Δεβρά, A. Δεβράδ; *Dabereth*, R. V. *Daberath*), Josh. xxi. 28. This name, incorrectly spelt in the A. V., should be DABERATH (R. V.). [G.] [W.]

DABBA'SHETH (דַּבְּשֶׁת, B. Βαυδάραβα, A. Δαβδάβα; *Debbaseth*, R. V. *Dabbesheth*), a town on the boundary of Zebulun (Josh. xix. 11 only). The name signifies a *hump* (Gesen., Fürst) as of a camel (cp. Is. xxx. 6), and possibly indicates that the town was on a hill; cp. Josephus' statement (*B. J.* iv. 1, § 1) with regard to the origin of the name Gamala. The place is unknown (Dillmann?). Conder has suggested (*PEF. Qy. Stat.* 1883, pp. 134-138) as a possible identification *Kh. ed-Dabsheh*, a ruin on the left bank of W. el-Kurn (*PEF. Mem.* i. 174). Tristram, however (*Bible Places*, 252), identifies it with *Kh. ed-Duweibeh* on Mt. Carmel; Knobel with *Jebáta* on the north side of the plain of Esdraelon. [G.] [W.]

DAB'ERATH (with the art. in Josh. דַּבְּרֵת; B. Δαβεράθ, A. Δαβράθ; in Chron. by double copying, B. τῇ Δεβρῇ καὶ τῇ Δαβρῇ; *Dabereth*), a town on the boundary of Zebulun (Josh. xix. 12), named as next to Chisloth-Tabor. In the list of Levitical cities, however, in 1 Ch. vi. 72, and in Josh. xxi. 28 (where the name in the original is the same, though in the A. V. "Dabareh"), it is stated as belonging to Issachar. It is no doubt the Dabaritta (Δαβαρίττων κάμην) mentioned by Josephus (*B. J.* ii. 21, § 3; and *Vit.* 81) as being in the great plain, on the border of Galilee. It is the Δαβερά of Eusebius and the *Dabira* of Jerome (*OS.* pp. 149, 19; 257, 53), and is there stated to be on Mt. Tabor, in the district of Diocæsarea. William of Tyre (xxii. 13) has "Buria juxta Naim urbem antiquissimum." Under the name of *Debúrieh* it still lies at the western foot of Tabor (*PEF.*

Mem. i. 363). A tradition mentioned by Van de Velde (ii. 374) makes this the scene of the miracle on the lunatic child performed by our Lord after His descent from the Mount of Transfiguration (Matt. xvii. 14). But this probably took place far away. [G.] [W.]

DA'BRIA, one of the five swift scribes who recorded the visions of Esdras (2 Esd. xiv. 24; cp. *ss.* 37, 42). [F.]

DACO'BI (A. Δακουβί, B. om.; *Accuba*), 1 Esd. v. 28. [AKKUB.] [B. F. W.]

DADDE'US or **SADDE'US** (1 Esd. viii. 45 [LXX. r. 44, B. Λαδαῖος, A. Δολδαῖος], 46 [LXX. v. 45, B. Λοδαῖος, A. Δολ-]), captain "in the place of the treasury" (see *Speaker's Comm.* n. in loco). In Ezra viii. 17 the name is IDDO. [F.]

DAGGER. [ARMS, i. 1.]

DAGON (דָּגֹן; Δάγων) was originally a god of the Accado-Sumerian population of pre-Semitic Chaldaea, in whose language the name signified "the exalted one." In the inscriptions he is associated with Ana, the Sky-god, "Ana and Dagon" being coupled together. The two names were borrowed by the Semitic Babylonians under the forms of Anu and Dagan, and handed on by them to their kinsfolk further west. The Assyrian texts speak of the worship of the two gods at Kharran, the Haran of Genesis (xi. 31); and proper names like Anah (Gen. xxxvi. 2, 24), or Beth-Anoth (Josh. xv. 59) and Beth-Dagon (Josh. xv. 41), show that they were revered in Canaan. Here, however, Dagon superseded his companion Anu. He became one of the chief deities of the Philistines, his most famous temples being at Gaza (Judg. xvi. 21-30) and Ashdod (1 Sam. v. 5, 6; 1 Ch. x. 10). The latter temple was destroyed by Jonathan during the Maccabæan wars (1 Macc. x. 83-4, xi. 4; Joseph. *Ant.* xiii. 4, § 5). Temples or high-places must also have been erected to him in Caphar-Dagon, "the village of Dagon" near Jamnia, and Beth-Dagon in Judah (Josh. xv. 41) and Asher (Josh. xix. 27). The Beth-Dagon of Judah is mentioned by Sennacherib, as being near Joppa and under the rule of the king of Ashkelon.

We learn from 1 Sam. v. 4 that the god was represented in human form with head and hands. The belief that his body terminated in the tail of a fish arose from a mistaken etymology of the name from the Heb. דָּג, "a fish." The fish-god, however, was not Dagon, but the water-god Ea; and a seal in the British Museum, on which is the figure of a deity with human head and hands and the tail of a fish, states that it represents "the god of pure life," a title of Ea. At the same time Babylonian mythology seems to have identified Ea and Dagon in the person of Odakon ('Ωδάκων), one of the fabulous creatures who rose from the waters of the Persian Gulf in the antediluvian period.

In Phœnicia (and therefore presumably Philistia also) the name of the god was connected with the word דָּגָן, "corn," and is accordingly rendered into Greek by Σίτρων in the fragments of Philo Byblius. In consequence of this etymology Dagon became the god of agriculture,

and was compared with the Ζεύς ἄφροπος of the Greeks (Philo Bybl. ap. Euseb. *Præp. Ev.* i. 10; Sanchon. p. 32). This explains the gift of five golden field-mice sent by the Philistines as "a trespass-offering" to the God of Israel, the field-mouse being destructive to corn. It was therefore regarded as the symbol of a deity who had overthrown the image and brought plague upon the worshippers of Dagon, the god of agriculture. A Phoenician cylinder obtained by Mr. Greville Chester, and now in the Ashmolean Museum at Oxford, bears the name of "Baal-Dagon" in Phoenician characters of the 7th century B.C. The name is accompanied by rude representations of a goat or gazelle standing on its hind-legs, an altar and "grove" or symbol of the goddess Asherah, the winged solar disk, stars and a fly (?). But there is no reference to a fish or water. It may be added that, according to Phoenician mythology as reported by Philo Byblius, Dagon was the offspring of the Heaven and Earth and the brother of El Betylos (or Beth-el) and Atlas (cp. J. Menant, *Le Mythe de Dagon* in the *Revue de l'Histoire des Religions*, xi. pp. 295-301; and Sayce, *Hibbert Lectures on the Religion of the Ancient Babylonians*, pp. 188-9). [A. H. S.]

DAISAN (B. Δαϊσαν, A. Δεσαν; *Desanon*), 1 Esd. v. 31; i.e. REZIN (Ezra ii. 48), by the common confusion of R, 7, and D, 7. [F.]

DALAI'AH (דָּלַיָה; Δαλαϊα, A. Δαλαϊδ; *Dulaiā*), the sixth son of Elioenai, a descendant of the royal family of Judah (1 Ch. iii. 24). [F.]

DALMANU'THA (Δαλμανουθᾶ), a place on the shore of the Sea of Galilee (Mark viii. 10).

The name has been derived from בֵּית דַּלְמָנוּתַת, Beth-dalmanutha, the house of widowhood, and also from זַלְמוֹן, Zalmon (Lightfoot, ii. 307-9), but incorrectly. For Dalmon an Aramaean might perhaps have said Talmon, but not Zalmon.

Jesus, leaving the district of Tyre and Sidon, passed "through the midst of the borders (district) of Decapolis," which lay almost entirely east of the Jordan, to the close neighbourhood of the Sea of Galilee; there He fed the four thousand, and then, entering a boat, "came into the parts of Dalmanutha," or, according to Matt. xv. 39, "into the coasts of Magdala" (R. V. the borders of Magadan); after a brief stay, He again entered the boat, and crossed the lake "to the other side" (Mark viii. 13; cp. Matt. xvi. 5), apparently to Bethsaida (Mark viii. 22). The sequence is clear: Jesus starts from the eastern shore of the Sea of Galilee, crosses to the W. shore, and afterwards recrosses to Bethsaida near the mouth of the Jordan. Dalmanutha was probably a village near MAGDALA, now *Mejdol*, at the S. end of the plain of Gennesareth, and it is perhaps represented by one of the small mounds on the shore of the lake. Tristram (*Bible Places*, p. 263) and others have identified Dalmanutha with 'Ain el-Bârideh, about one and a half miles from *Mejdol* on the road to Tiberias, but the distance between the two places seems too great. Thomson (*Land and the Book*, p. 393), adopting the reading Magadan—a place which, according to Eusebius (*OS.* 2 p. 277, 81), was near Gerasa—would identify it with a ruined site called *Dalhamia*,

or *Dalmania*, on the *Yarmuk*, but this would be south of the lake and some distance from its shore. Schwarz (p. 150) states that in the Jer. Tal. *Demai*, ii. 2, "a cave of Teliman"

(טְלִימָן) is named; this he identifies with Talmantha, which he says was another name of Migdol. Neubauer, however, places this cave in the neighbourhood of Caesarea Maritima (*Géog. du Talmud*, p. 268). [W.]

DALMA'TIA (Δαλματία), a mountainous district on the eastern coast of the Adriatic Sea, extending from the river Naro in the S. to the Savus in the N. It formed a portion of the Roman province of Illyricum subsequently to Tiberius' expedition, A.D. 9 (cp. Marquardt, *Röm. Staatsverwalt.* i. 141, &c.). St. Paul sent Titus there (2 Tim. iv. 10): he himself had preached the Gospel in its immediate neighbourhood (Rom. xv. 19), for the boundaries of Illyricum and Dalmatia were not well defined, and the two names were used by St. Paul in a general sense (cp. Conybeare and Howson's *Life and Ep. of St. Paul*,⁴ ii. 127). [W. L. B.] [F.]

DALPHON (דִּלְפֹּן; Δελφών, some MSS. καὶ δελφών; *Delphon*), the second of the ten sons of Haman; killed by the Jews on the 13th of Adar (Esth. ix. 7). [W. A. W.] [F.]

DA'MARIS (Δάμαρις; *Damaris*), an Athenian woman converted by St. Paul (Acts xvii. 34). The Greek text does not support the view of Chrysostom (*Succed.* iv. 7) that she was the wife of Dionysius, who is mentioned with her. The name is probably another form of *Δαμάρις* (heifer), which occurs as a proper name. λ and ρ are interchangeable: cp. θεοκόλος for θεοκόρος and βοικόλος, αἰγικόρος (Lob. *Phryg.* pp. 173, 652). [E. R. B.]

DAMAS'CUS (דַּמְשֶׁק; دمشق الشام; *Damas'cus*;

Δαμασκός; *Damascus*) is one of the most ancient, and has at all times been one of the most important, of the cities of Syria. It is situated in a plain of vast size and of extreme fertility, which lies east of the great chain of Anti-Libanus, on the edge of the desert. This fertile plain, which is nearly circular, and about 30 miles in diameter, is due to the river *Barada*. This stream, starting from two important fountains high up in the centre of Anti-Libanus, forces its way through the chain, running for some time among the mountains, till suddenly it bursts through a narrow cleft upon the open country east of the hills, and diffuses fertility far and wide. "From the edge of the mountain-range," says a modern traveller, "you look down on the plain of Damascus. It is here seen in its widest and fullest perfection, with the visible explanation of the whole secret of its great and enduring charm, that which it must have had when it was the solitary seat of civilization in Syria, and which it will have as long as the world lasts. The river is visible at the bottom, with its green banks, rushing through the cleft; it bursts forth, and as if in a moment scatters over the plain, through a circle of 30 miles, the same verdure which had hitherto been confined to its single channel. . . . Far and wide in front extends the level plain, its horizon bare.

its lines of surrounding hills bare, all bare far away on the road to Palmyra and Bagdad. In the midst of this plain lies at your feet the vast lake or island of deep verdure, walnuts and apricots waving above, corn and grass below; and in the midst of this mass of foliage rises, striking out its white arms of streets hither and thither, and its white minarets above the trees which embosom them, the city of Damascus. On the right towers the snowy height of Hermon, overlooking the whole scene. Close behind are the sterile limestone mountains—so that you stand literally between the living and the dead" (Stanley, *S. and P.*, p. 410). Another writer mentions among the produce of the plain in question "walnuts, pomegranates, figs, plums, apricots, citrons, pears, and apples" (Addison's *Dam. and Palmyra*, ii. 92). Olive-trees are also a principal feature of the scene. Besides the main stream of the *Barada*, which runs directly through the town, supplying its public cisterns, baths, and fountains, a number of branches are given off to the right and to the left, which irrigate the meadows and corn-fields, turning what would otherwise be a desert into a garden. The *Barada*, giving off numerous streams, flows on towards the east for about 15 miles, when it separates, and pours its waters, when not exhausted by evaporation, into two small marshes, which lie upon the verge of the desert. On its way from the mountains to the city, the *Barada* runs through a verdant meadow, the *Ager Damascenus*, now called *El-Merj*. On either side the ground rises, somewhat abruptly, in terraces; and here, by the margin of the meadow, flow two of the seven rivers that are drawn off from the parent stream. The river on the right is the *Nahr Banias*, pronounced *Abanias* by the *fellahin*, the *ABANA* of the Bible; that on the left is the *Nahr Taur*, a name that takes the place of *PHARPAR* in the Arabic Version. Foundations of houses and other remains show that the city once extended far beyond its present limits, in the direction of the gorge from which the *Barada* issues. Here, in the prosperous period of the Syrian kingdom, the villas of the wealthy were probably situated, embosomed in luxuriant foliage amidst which ever sparkled the clear cold waters of the two streams that were "better than all the rivers of Israel." (Dr. W. Wright, *MS. Notes*.)

According to Josephus (*Ant.* i. 6) Damascus was founded by Uz, the son of Aram, and grandson of Shem. It is first mentioned in Scripture in connexion with Abraham, whose steward was a native of the place (*Gen.* xv. 2). This is probably the sense, but the translation is disputed. Cp. *QPB*). We may gather from the name of this person, whom Moslem tradition claims as the founder, as well as from the statement of Josephus, which connects the city with the Aramaeans, that it was a Semitic settlement. According to a tradition preserved in the native writer, Nicolaus, Abraham stayed for some time at Damascus, after leaving Charran and before entering the Promised Land, and during his stay was king of the place (see Delitzsch [1887] and

Dillmann *in loco*). "Abraham's name was," he says, "even in his own day familiar in the mouths of the Damascenes, and a village was shown where he dwelt, which was called after him" (*Fr.* 30). This last circumstance would seem, however, to conflict with the notion of Abraham having been king, since in that case he would have dwelt in the capital. Damascus is not mentioned again in the Bible until the time of David, when "the Syrians of Damascus came to succour Hadadezer, king of Zobah," with whom David was at war (2 Sam. viii. 5; 1 Ch. xviii. 5). On this occasion David "slew of the Syrians twenty-two thousand men;" and in consequence of this victory became completely master of the whole territory, which he garrisoned with Israelites. "David put garrisons in Syria of Damascus; and the Syrians became servants to David, and brought gifts" (2 Sam. viii. 6). Nicolaus of Damascus said that the name of the king who reigned at this time was Hadad; and he ascribes to him a dominion, not only over Damascus, but over "all Syria except Phœnicia" (*Fr.* 31). He noticed his attack upon David; and related that many battles were fought between them, the last, wherein he suffered defeat, being "upon the *Euphrates*." According to this writer, Hadad the first was succeeded by a son, who took the same name, as did his descendants for ten generations. But this is irreconcilable with Scripture. It appears that in the reign of Solomon, a certain Rezon, who had been a subject of Hadadezer, king of Zobah, and had escaped when David conquered Zobah, made himself master of Damascus, and established his own rule there (1 K. xi. 23-5). He was "an adversary to Israel all the days of Solomon . . . and he abhorred Israel, and reigned over Syria." Afterwards the family of Hadad appears to have recovered the throne, and a Benhadad, who is probably the Hadad III. of Nicolaus, a grandson of the antagonist of David, is found in league with Baasha, king of Israel, against Asa (1 K. xv. 19; 2 Ch. xvi. 3), and afterwards in league with Asa against Baasha (1 K. xv. 20). He made a successful invasion of the Israelite territory in the reign of that king; and in the reign of Omri he not only captured a number of Israelite cities which he added to his own dominions, but even seems to have exercised a species of lordship over Samaria itself, in which he acquired the right of "making himself streets" (1 K. xx. 34; cp. Nic. D. *Fr.* 31, *ad fin.*). He was succeeded by his son, Hadad IV. (the BENHADAD II. of Scripture, and Ben-idri of the Assyrian inscriptions), who came at the head of thirty-two subject kings against Ahab, and laid siege to Samaria (1 K. xx. 1). The attack was unsuccessful; and was followed by wars, in which victory declared itself unmistakably on the side of the Israelites; and at last Benhadad was taken prisoner, and forced to submit to a treaty whereby he gave up all that his father had gained, and submitted in his turn to the suzerainty of Ahab (xx. 13-34). The terms of the treaty were perhaps not observed. At any rate three years afterwards war broke out afresh, through the claim of Ahab to the city of Ramoth-Gilead (1 K. xxii. 1-4). The defeat and death of Ahab at that place (*vv.* 15-37) seems to have enabled the Syrians of Damascus to resume the

* In poetry and common conversation the descriptive term *Nahr*, "river," the same word used by Naaman the Syrian, is always applied to each of the seven canals of Damascus (Dr. W. Wright, *MS. Notes*).

offensive. Their bands ravaged the lands of Israel during the reign of Jehoram; and they even undertook at this time a second siege of Samaria, which was frustrated miraculously (2 K. vi. 24, vii. 6-7). After this, we do not hear of any more attempts against the Israelite

capital. The cuneiform inscriptions show that towards the close of his reign Benhadad was exposed to the assaults of a great conqueror, who was bent on extending the dominion of Assyria over Syria and Palestine. Three several attacks appear to have been made by this prince upon

Damascus. (View taken outside the eastern gate.)

Benhadad, who, though he had the support of the Phoenicians, the Hittites, and the Hamathites, was unable to offer any effectual opposition to the Assyrian arms. His troops were worsted in several engagements, and in one of them he lost as many as 20,000 men. It may have been

these circumstances which encouraged Hazael, the servant of Benhadad, to murder him, and seize the throne, which Elisha had declared would certainly one day be his (2 K. viii. 15). He may have thought that the Syrians would willingly acquiesce in the removal of a ruler under whom

they had suffered so many disasters. The change of rulers was not at first productive of any advantage to the Syrians. Shortly after the accession of Hazael (about B.C. 884), he was in his turn attacked by the Assyrians, who defeated him with great loss amid the fastnesses of Anti-Libanus. However, in his other wars he was more fortunate. He repulsed an attack on Ramoth-Gilead, made by Ahaziah king of Judah and Jehoram king of Israel in conjunction (2 K. viii. 28-9); ravaged the whole Israelite territory east of Jordan (x. 32-3); besieged and took Gath (xii. 17; cp. Amos vi. 2); threatened Jerusalem, which only escaped by paying a heavy ransom (2 K. xii. 18); and established a species of suzerainty over Israel, which he

maintained to the day of his death, and handed down to Benhadad, his son (2 K. xiii. 3-7, 22). This prince in the earlier part of his reign had the same good fortune as his father. Like him, he "oppressed Israel," and added various cities of the Israelites to his own dominion (2 K. xiii. 25); but at last a deliverer appeared (v. 5), and Joash, the son of Jehoahaz, "beat Hazael thrice, and recovered the cities of Israel" (v. 25). In the next reign still further advantages were gained by the Israelites. Jeroboam II. (c. B.C. 836) is said to have "recovered Damascus" (xiv. 28); and though this may not mean that he captured the city, it at least implies that he obtained a certain influence over it. The mention of this circumstance is followed by a long pause,

East Gate of Damascus, at the end of the "Street called straight."

The arches now built up are of Roman architecture, as old as the time of St. Paul. (From a photograph.)

during which we hear nothing of the Syrians, and must therefore conclude that their relations with the Israelites continued peaceable. When they reappear nearly a century later (c. B.C. 742), it is as allies of Israel against Judah (2 K. xv. 37). We may suspect that the chief cause of the union now established between two powers which had been so long hostile, was the necessity of combining to resist the Assyrians, who at the time were steadily pursuing a policy of encroachment in this quarter. Scripture mentions the invasions of Pul (2 K. xv. 9; 1 Ch. v. 26) and Tiglath-pileser (2 K. xv. 29; 1 Ch. v. 26); and there is reason to believe that almost every Assyrian monarch of the period made war in this direction. It seems to have been during a pause in the struggle that Rezin king of Damascus, and

Pekah king of Israel, resolved conjointly to attack Jerusalem, intending to depose Ahaz and set up as king a creature of their own (Is. vii. 1-6; 2 K. xvi. 5). Ahaz may have been already suspected of a friendly feeling towards Assyria, or the object may simply have been to consolidate a power capable of effectually opposing the arms of that country. In either case the attempt signally failed, and only brought about more rapidly the evil against which the two kings wished to guard. Jerusalem successfully maintained itself against the combined attack; but Elath, which had been formerly built by Azariah, king of Judah, in territory regarded as Syrian (2 K. xiv. 22), having been taken and retained by Rezin (xvi. 6), Ahaz was induced to throw himself into the arms of Tiglath-pileser,

to ask aid from him, and to accept voluntarily the position of an Assyrian feudatory (xvi. 7-8). The aid sought was given, with the important result, that Rezin was slain, the kingdom of Damascus brought to an end, and the city itself destroyed, the inhabitants being carried captive into Assyria (B.C. 733, v. 9; cp. Is. vii. 8; Amos i. 5).

It was long before Damascus recovered from this serious blow. As Isaiah and Amos had prophesied in the day of her prosperity, that Damascus should be "taken away from being a city and be a ruinous heap" (Is. xvii. 1), that "a fire should be sent into the house of Hazael, which should devour the palaces of Benhadad" (Amos i. 4); so Jeremiah, writing about B.C. 600,

declares "Damascus is wasted feeble, she turneth herself to flee, and trembling hath seized on her; anguish and sorrows have taken her, as hold of a woman in travail. How is the city of praise not forsaken, the city of my joy?" (Jer. xlix. 24-5, R. V.) We do not know at what time Damascus was rebuilt, but Strabo says that it was the most famous place in Syria during the Persian period (xvi. 2, § 19); and we find that before the battle of Issus it was selected by Darius as the city to which he should send for better security the greater part of his treasures and valuables (Arr. *Exp. As.* ii. 11). Shortly after the battle of Issus it was taken by Parmenio (*ibid.*); and from this time it continued to be a place of some importance under the Greeks;

Gate of Damascus, leading towards Arabia, where, according to tradition, St. Paul was let down in a basket.

becoming however decidedly second to Antioch, which was raised up as a rival to it by the Seleucidae. From the monarchs of this house it passed to the Romans, who became masters of it in the war between Pompey and Mithridates (*Mos. Choren.* i. 14; cp. Joseph. *Ant. Jud.* xiv. 2, § 3; and App. *Bell. Mithr.* p. 244). At the time of the Gospel history, and of the Apostle Paul, it formed a part of the kingdom of Aretas (2 Cor. xi. 32), an Arabian prince, who, like the princes of the house of Herod, held his kingdom under the Romans (Joseph. *Ant. Jud.* xvi. 11, § 9). A little later it was reckoned to Decapolis (Plin. *H. N.* v. 16), after which it became a part of the province known as Phœnicia Libanensis (Hierocl. *Synecd.* p. 717). It grew in magnifi-

cence under the Greek emperors, and, when taken by the Mahometan Arabs in A.D. 634, was one of the first cities of the Eastern world. It is not necessary to trace its subsequent glories under the Caliphs, the Saracens, and the Turks. It may, however, be noticed that there has scarcely been an interruption to its prosperity, and that it is still a city of 100,000 to 130,000 inhabitants.

Damascus has always been a great centre for trade. The difficulties and dangers of the mountain passes to the west of Anti-Libanus made the line of traffic between Egypt and Upper Syria follow the circuitous route by Damascus rather than the direct one through Coele-Syria, while the trade of Tyre with Assyria and the East generally passed naturally through Da-

mascus on its way to Palmyra and the Euphrates. Ezekiel, speaking of Tyre, says (xxvii. 18, R. V.), "Damascus was thy merchant for the multitude of thy handyworks, for the multitude of all kinds of riches; with the wine of Helbon, and white wool." It would appear from this that Damascus took manufactured goods from the Phoenicians, and supplied them in exchange with wool and wine. The former would be produced in abundance in Coele-Syria and the valleys of the Anti-Libanus range; while the latter seems to have been grown in the vicinity of Helbon, a village still famous for the produce of its vines, 10 or 12 miles from Damascus to the north-west (*Geogr. Journ.* vol. xvi. p. 44). But the passage trade of Damascus has probably been at all times more important than its direct commerce. Its merchants must have profited largely by the caravans which continually passed through it on their way to distant countries. It is uncertain whether in early times it had any important manufactures of its own. According to some expositors, the passage in Amos iii. 12, which A. V. translates "in Damascus on a couch" (דִּבְרֵי מִשְׁכָּב), means (R. V.) "on the silken cushions of a bed," which would indicate that the Syrian city had become famous for a textile fabric as early as the 8th century B.C. There is no doubt that such a fabric gave rise to our word "damask," which has its counterpart in Arabic as well as in most of the languages of modern Europe; but it is questionable whether either this, or the peculiar method of working in steel, which has impressed itself in a similar way upon the speech of the world, was invented by the Damascenes before the Mahometan era. In ancient times they were probably rather a consuming than a producing people, as the passage in Ezekiel clearly indicates.

Certain localities in Damascus are shown as the site of those Scriptural events which especially interest us in its history. A "long wide thoroughfare"—leading direct from the eastern gate to the western side of the city—is "called by the guides 'Straight'" (Acts ix. 11); but the natives know it among themselves as "The King's highway" (Stanley, p. 412). The house of Judas is shown in the street "Straight." That of Ananias is also pointed out. The scene of the conversion is confidently said to be "an open green spot, surrounded by trees," and used as the Christian burial-ground; but this spot is on the eastern side of the city, whereas St. Paul must have approached from the south or west. Again, it appears to be certain that "four distinct spots have been pointed out at different times" (Stanley, p. 412) as the place where the "great light suddenly shined from heaven" (Acts ix. 3); so that little confidence can be placed in any of them. The point of the walls at which St. Paul was let down by a basket (Acts ix. 25; 2 Cor. xi. 33) is also shown; and, as this locality is free from objection, it may be accepted, if we think that the tradition which has been so faithless or so uncertain in other cases has any value here.

In the vicinity of Damascus certain places are shown, traditionally connected with the prophet Elisha; but these local legends are necessarily even more doubtful than those which have reference to the comparatively recent age of the Apostles.

See Stanley's *Sinai and Palestine*; Maundrell's *Journey to Damascus*; Addison's *Damascus and Palmyra*; Pococke's *Travels*; Porter's *Five Years in Damascus*, and his account of the country round Damascus in the *Geographical Journal*, vol. xxvi.; *Damascus and its People*, by Mrs. Mackintosh; Thomson's *Land and the Book*, new series, vol. iii. [G. R.] [W.]

DAMN, DAMNATION. These N.T. words, now used in a very restricted sense, had in the A. V. of 1611 the far wider and more general sense of to *condemn* and *condemnation*. They were the translation of *κρίνω* and its compounds, and of *κρίσις* or *κρίμα*. As words they have disappeared from the R. V. of the N. T., and are replaced—the verb by *condemn* or *judge*, the noun by *condemnation* or *judgment*. For the verb, cp. the A. V. and R. V. of Mark xvi. 16; Rom. xiv. 23; 2 Thess. ii. 12: for the noun, cp. the A. V. and R. V. of Matt. xxiii. 14 (the verse is absent from the R. V. text, but the A. V. word "damnation" is rendered in the R. V. marg. *condemnation*) and its parallels, Mark xii. 40, Luke xx. 47; Matt. xxiii. 33; John v. 29; Rom. iii. 8, xiii. 2; 1 Cor. xi. 29; 1 Tim. v. 12; 2 Pet. ii. 3.* The context of these passages will show that the judgment or condemnation contemplated is most frequently temporal (cp. e.g. 1 Cor. xi. 29). [F.]

DAMNABLE. The A. V. of *αἰρέσεις ἀπωλείας* (2 Pet. ii. 1), "damnable heresies," is better rendered by R. V. "destructive heresies" (cp. R. V. marg. *sects of perdition*). [F.]

DAN. 1. (דָּן; *Δαν*; Joseph. *Δάν, θεόκριτον ἄν τινες εἶποιεν κατὰ τὴν Ἑλλ. γλῶτταν*; *Dan*). The fifth son of Jacob, and the first of Bilhah, Rachel's maid (Gen. xxx. 6). The origin of the name is given in the exclamation of Rachel (R. V.)—"God hath judged me" (דָּנָנִי, *dananni*)... and hath given me a son, therefore called she his name Dan, i.e. "judge." In the blessing of Jacob (Gen. xlix. 16) this play on the name is repeated—"Dan shall judge" (דָּן יִי, *yadin*) his people." Dan was own brother to Naphtali; and, as the son of Rachel's maid, in a closer relation with Rachel's sons, Joseph and Benjamin, than with the other members of the family. It may be noticed that there is a close affinity between his name and that of DINAH, the only daughter of Jacob whose name is preserved.

The records of Dan are unusually meagre. Of the patriarch himself no personal history is, unfortunately, preserved. Only one son is attributed to him, variously called Hushim in Gen. xli. 23—a plural form, as if the name, not of an individual, but of a family—and Shuham in Num. xxvi. 42; and it is remarkable—whether as indicating that some of the descendants of Dan are omitted in these lists, or from

* Mark iii. 29 is omitted from this list. The reading *ἀμαρτία* is now generally accepted in the place of *κρίσις*.

b Gesenius has pointed out a slight difference between the two derivations; the verb being active in the latter and passive in the former (*Theol.* 336). This is quite in keeping with the uncertainty which attends many of these ancient paronomastic derivations (compare ABEL, BENJAMIN, and others).

other causes—that when the people were numbered in the wilderness of Sinai, this was, with the exception of Judah, the most numerous of all the tribes, containing 62,700 men able to serve. The position of Dan during the march through the desert was on the north side of the Tabernacle (Num. ii. 25). Here, with his brother Naphtali, and Asher, the son of Zilpah, before him, was his station, the hindmost of the long procession (ii. 31, x. 25). The names of the “captain” (נִשִּׁי) of the tribe at this time, and of the “ruler” (the Hebrew word is the same as before), who was one of the spies (xiii. 12), are preserved. So also is the name of one who played a prominent part at that time, “Aholiab the son of Ahisamach, of the tribe of Dan,” associated with Bezaleel in the design and construction of the fittings of the Tabernacle (Exod. xxxi. 6, &c.). The numbers of this tribe were not subject to the violent fluctuations which increased or diminished some of its brethren (cp. the figures given in Num. i. and xxvi.), and it arrived at the threshold of the Promised Land and passed the ordeal of the rites of Baal-peor (Num. xxv.) with an increase of 1700 on the earlier census.* The remaining notices of the tribe before the passage of the Jordan are unimportant. It furnished a “prince” (נָסִי,[†] as before) to the apportionment of the land; and it was appointed to stand on Mount Ebal, still in company with Naphtali (but opposite to the other related tribes), at the ceremony of blessing and cursing (Deut. xxvii. 13). After this nothing is heard of Dan till the specification of the inheritance allotted to him (Josh. xix. 40). He was the last of the tribes to receive his portion, and that portion, according to the record of Joshua—strange as it appears in the face of the numbers just quoted—was the smallest of the twelve.[‡] But notwithstanding its smallness, it had eminent natural advantages. On the north and east it was completely embraced by its two brother-tribes Ephraim and Benjamin, while on the south-east and south it joined Judah, and was thus surrounded by the three most powerful states of the whole confederacy. Of the towns enumerated as forming “the ‘border’ of its inheritance,” the most easterly which can now be identified are Ajalon, Zorah (Zareah), and Ir-Shemesh (or Beth-shemesh; which see). These places are on the slopes of the lower ranges of hills by which the highlands of Benjamin and Judah descend to the broad maritime plain, that plain which on the N. bore the distinctive name of “Sharon.” From Japho—afterwards Joppa, and now *Yafa*—on the north, to Ekron and Gath-rimmon on the south—a length of at least 14 miles—that noble tract, one of the most fertile in the whole of Palestine, was allotted to this tribe. By

Josephus (*Ant.* v. 1, § 22, and 3, § 1) this is extended to Ashdod on the south, and Dor, at the foot of Carmel, on the north, so as to embrace the whole, or nearly the whole, of the great plain. But this rich district, the corn-field and the garden of the whole south of Palestine (Stanley, *S. and P.* p. 258), which was the richest prize of Phœnician conquest many centuries later,[§] and which even in the now degenerate state of the country is enormously productive, was too valuable to be given up without a struggle by its original possessors. The Amorites accordingly “forced the children of Dan into the mountain, for they would not suffer them to come down into the valley” (Judg. i. 34)—forced them up from the corn-fields of the plain, with their deep black soil, to the villages whose ruins still crown the hills that skirt the lowland. True, the help of the great tribe so closely connected with Dan was not wanting at this juncture, and “the hand of the children of Joseph,” i.e. Ephraim, “prevailed against the Amorites” for the time. But the same thing soon occurred again, and in the glimpse with which we are afterwards favoured into the interior of the tribe, in the history of its great hero, the Philistines have taken the place of the Amorites, and with the same result. Although Samson “comes down” to the “vineyards of Timnath” and the valley of Sorek, yet it is from Mahaneh-Dan—the fortified camp of Dan, between Zorah and Eshtaol, behind Kirjath-Jearim—that he descends, and it is to that natural fastness, the residence of his father, that he “goes up” again after his encounters, and that he is at last borne to his family sepulchre, the burying-place of Manoah (Judg. xiv. 1, 5, 19, xiii. 25, xvi. 4; cp. xviii. 12, xvi. 31).

These considerations enable us to understand how it happened that long after the partition of the land the inheritance of the Danites “had not fallen unto them among the tribes of Israel” (Judg. xviii. 1).[¶] They perhaps furnish a reason for the absence of Dan from the great gathering of the tribes against Sisera[‡] (Judg. v. 17). They also explain the warlike and independent character of the tribe betokened in the name of their head-quarters, as just quoted—Mahaneh-Dan, “the camp, or host, of Dan”—in the fact specially insisted on and reiterated (xviii. 11, 16, 17) of the complete equipment of their 600 warriors[§] “appointed with weapons of war,” and in the lawless freebooting style of their behaviour to Micah. There is something very

* See the inscription of king Eahmunesar in Stanley, *S. & P.* p. 278. The sarcophagus dates from c. a.c. 350.

† The reading in A. V., “all their inheritance had not fallen unto them,” is wrong: there is nothing answering to the word *all* in the Hebrew text, and it is omitted by R. V.

‡ Ewald ascribes it to their being engaged in commerce (*Dichter*, i. 130). This may have been the case with Asher, but can hardly, for the reasons advanced above, have been so with Dan. The “ships” of Deborah’s song are probably only a bold figure, in allusion to Joppa.

§ The complete appointment of these warriors is perhaps a more certain sign of the tribe being practised in war, when we recollect that it was the Philistine policy to deprive of their arms those whom they had conquered (cp. 1 Sam. xlii. 19–21, and perhaps also Samson’s rude weapon, the jaw-bone).

* The frequent variations in the LXX. forbid absolute reliance on these numbers. See CENSUS.

† This one word is rendered in the A. V. by “prince,” “ruler,” “captain,” “chief,” and “governor.”

‡ The enumeration of the tribes in this record is in the order of their topographical position, from S. to N. It is remarkable that Dan is named after Naphtali and Asher, as if already associated with the northern position afterwards occupied by the city Dan. This is also the case in Judg. i. 34 and 1 Ch. xii. 35.

characteristic in the whole of that most fresh and interesting story preserved to us in *Judg. xviii.*—a narrative without a parallel for the vivid glance it affords into the manners of that distant time—characteristic of boldness and sagacity, with a vein of grim sardonic humour, but undeformed by any unnecessary bloodshed.

In the "security" and "quiet" (Judg. xviii. 7, 10) of their rich northern possession the Danites enjoyed the leisure and repose which

had been denied them in their original seat. But of the fate of the city to which they gave "the name of their father" (Josh. xix. 47), we know scarcely anything. The strong religious feeling which made the Danites so anxious to ask counsel of God from Micah's Levite at the commencement of their expedition (Judg. xviii. 5), and afterwards take him away with them to be "a priest unto a tribe and a family in Israel," may have pointed out their settlement

Map of the Tribe of Dan.

to the notice of Jeroboam as a fit place for his northern sanctuary. But beyond the exceedingly obscure notice in Judg. xviii. 30, we have no information¹ on this subject. From 2 Ch. ii. 14 it would appear that the Danites had not

¹ For "the captivity of the land," ארץ נאֲבָלָה, Ewald proposes to read "of the ark," אֲרוֹן; that is, till the time of Samuel (1 Sam. iv. 11); *Gesch.* ii. pt. 2, 233.

kept their purity of lineage, but had intermarried with the Phoenicians of the country (see an elaboration of this in Blunt, *Coincidences*, Pt. II. iv.).

In the time of David Dan still kept its place among the tribes (1 Ch. xii. 35). Asher is omitted, but the "prince of the tribe of Dan" is mentioned in the list of 1 Ch. xxvii. 22. But from this time forward the name as applied to the tribe vanishes; it is kept alive only by the

northern city. In the genealogies of 1 Ch. ii. to xii. Dan is omitted entirely, which is remarkable when the great fame of Samson and the warlike character of the tribe are considered, and is best accounted for by supposing that its genealogies had perished. It is perhaps allowable to suppose that little care would be taken to preserve the records of a tribe which had left its original seat near the head-quarters of the nation, and had given its name to a distant city notorious only as the seat of a rival and a forbidden worship. Lastly, Dan is omitted from the list of those who were sealed by the Angel in the vision of St. John (Rev. vii. 5-7).

The mention of this tribe in the "blessings" of Jacob (Gen. xlix. 16-18) and Moses (Deut. xxxiii. 22) must not be overlooked. Herder's interpretation, as given by Dean Stanley, is as follows:—

"It is doubtful whether the delineation of Dan in Jacob's blessing relates to the original settlement on the western outskirts of Judah, or to the northern outpost. Herder's explanation will apply almost equally to both. 'Dan,' the judge, 'shall judge his people;' he the son of the concubine no less than the sons of Leah; he the frontier tribe no less than those in the places of honour shall be 'as one of the tribes of Israel.' 'Dan shall be a serpent by the way, an adder in the path;' that is, of the invading enemy by the north or by the west, 'that biteth the heels of the horse,' the indigenous serpent biting the foreign horse unknown to Israelite warfare, 'so that his rider shall fall backwards.' And his war-cry as from the frontier fortresses shall be 'For Thy salvation, O Lord, I have waited!'" In the blessing of Moses the southern Dan is lost sight of. The northern Dan alone appears, with the same characteristics though under a different image; 'a lion's whelp' in the far north, as Judah in the far south: 'he shall leap from Bashan'—from the slopes of Hermon, where he is couched watching for his prey."

2. [7; *Δαν*; Joseph. *τὸ Ἀδύον*; *Dan*. The well-known city, so familiar as the most northern landmark of Palestine, in the common expression "from Dan even to Beersheba." The name of the place was originally LAISH or LESHEM (Josh. xix. 47). Its inhabitants lived "after the manner of the Zidonians," i.e. engaged in commerce, and without defence. But it is nowhere said that they were Phœnicians, though it may perhaps be inferred from the parentage of Hiram—his mother "of the daughters of Dan," his father "a man of

Tyre" (2 Ch. ii. 14). Living thus "quiet and secure," they fell an easy prey to the active and practised freebooters of the Danites. They conferred upon their new acquisition the name of their own tribe, "after the name of their father who was born unto Israel" (Judg. xiii. 29; Josh. xix. 47), and Laish became Dan.

The locality of the town is specified with some minuteness. It was "far from Zidon,"

and "in the valley (*דִּנְיָ, Emek*) that is by (?) Beth-rehob;" but as this latter place has not been identified with certainty, the position of Dan must be ascertained by other means.

The graven image which the wandering Danites had stolen from Micah they set up in their new home, and a line of priests was established, which, though belonging to the tribe of Levi and even descended from Moses, was not of the family of Aaron, and therefore probably did not belong to the regular priesthood. To the form of this image and the nature of the idolatry we have no clue, nor to the relation, if any, which existed between it and the calf-worship afterwards instituted there by Jeroboam (1 K. xii. 29, 30). The latter is alluded to by Amos (viii. 14) in a passage which possibly preserves a formula of invocation or adjuration in use among the worshippers; but the passage is very obscure.

After the establishment of the Danites at Dan it became the acknowledged extremity of the country, and the formula "from Dan even to Beersheba" is frequent throughout the Historical Books (Judg. xx. 1; 1 Sam. iii. 20; 2 Sam. iii. 10, xvii. 11, xxiv. 2, 15; 1 K. iv. 25). In the later records the form is reversed, and becomes "from Beersheba even to Dan" (1 Ch. xxi. 2; 2 Ch. xxx. 5).

Dan was, with other northern cities, laid waste by Benhadad (1 K. xv. 20; 2 Ch. xiv. 4), and this is the last mention of the place. The calf is said by the Jewish traditions (*Sed. Olam. rab. ch. 22*) to have been carried away by Tiglath-pileser when he invaded the north of Palestine (2 K. xv. 29).

Various considerations would lead to the conclusion that Dan was a holy place of note from a far earlier date than its conquest by the Danites. These are:—(1.) The extreme reluctance of the Orientals—apparent in numerous cases in the Bible—to initiate a sanctuary, or to adopt for worship any place which had not enjoyed a reputation for holiness from pre-historic times. (2.) The correspondence of Dan with Beersheba in connexion with the life of Abraham—the origin of Beersheba also being, as has been noticed, enveloped in some diversity of statement. (3.) More particularly its incidental mention in the very clear and circumstantial narrative of Gen. xiv. 14, as if well known even at that very early period. Its mention in Deut. xxxiv. 1 is also before the events related in Judg. xviii., though still many centuries later than the time of Abraham. But the subject is very difficult, and we can hardly hope to arrive at more than conjecture upon it.

* According to Jewish tradition, Jacob's blessing on Dan is a prophetic allusion to Samson, the great "Judge" of the tribe; and the ejaculation with which it closes was that actually uttered by Samson when brought into the temple at Gaza (see the Targum Ps.-Jonathan on Gen. xlix. 16, 17; and the quotations in Kalisch's *Genesis ad loc.*). Modern critics likewise see an allusion to Samson in the terms of the blessing, which they consider on that account to have been written after the days of the Judges (Ewald, *Gen. i. 92*. Cp. on this subject generally the opposite views expressed by Dillmann² and Delitzsch [1887] on Gen. xlix.). Jerome's observations (*Qu. in Gen.*) on this passage are very interesting.

¹ By Ptolemy (Reland, p. 458), Caesarea Panias is counted as one of the towns of Phœnicia.

² Moses (R. V. text) is doubtless the genuine reading of the name, which, by the insertion of an N, was changed by the Jews into MANASSEH, as it stands in the A. V. of Judg. xviii. 30. [MANASSEH, s.]

With regard to Gen. xiv. 14 three explanations suggest themselves. 1. That another place of the same name is intended (see Kalisch in loco for an ingenious suggestion of Dan-jaan; another is disposed of by Dean Stanley, *S. & P.* p. 400). Against this may be put the belief of Josephus (cp. *Ant.* i. 10, § 1, with v. 3, § 1) and of Jerome (*OS.* p. 168, 11, s. n. Laisa, cp. with *Quaest. Hebr. in Genes.* xiv. 14), who both unhesitatingly identify the Dan of the Danites, near Paneas, with the Dan of Abraham. 2. That it is a prophetic anticipation by the sacred historian of a name which was not to exist till centuries later, just as Samson has been held to be alluded to in the blessing of Dan by Jacob. 3. That the passage originally contained an older name, as Laish; and that when that was superseded by Dan, the new name was inserted in the MSS. This last is the opinion of Ewald (*Gesch.* i. 73), Delitzsch [1887], Knobel, Dillmann, &c., and of the three is the most probable, especially when we consider the characteristic, genuine air of the story in Judges, which fixes the origin of the name so circumstantially. Josephus (*Ant.* v. 3, § 1) speaks positively of the situation of Laish as "not far from Mount Libanus and the springs of the lesser Jordan, near (*κατά*) the great plain of the city of Sidon" (cp. also *Ant.* viii. 8, § 4); and this, as just said, he identifies with the Dan in Gen. xiv. 14 (*Ant.* i. 10, § 1). In consonance with this are the notices of St. Jerome, who derives the word "Jordan" from the names of its two sources. Dan, the westernmost and the smaller of the two, he places at four miles from Paneas on the road to Tyre.^a In perfect agreement with this is the position of *Tell el-Kady*, a mound from the foot of which gushes out "one of the largest fountains in the world," the main source of the Jordan (Rob. iii. 390-93; Stanley, pp. 394-95). The Tell itself, rising from the plain by somewhat steep terraces, has its long level top strewn with ruins, and is very probably the site of the town and citadel of Dan. The spring is called *el Leddân*, possibly a corruption of Dan (Rob. iii. 392), and the stream from the spring *Nahr ed-Dân* (Wilson, ii. 173), while the name, *Tell el-Kady*, "the Judge's mound," agrees in signification with the ancient name. Both Dr. Robinson and Dean Stanley give the exact agreement of the spot with the requirements of the story in Judg. xviii.—"a good land and a large, where there is no want of anything that is on the earth" (Rob. p. 396; Stanley, as above). [G.] [W.]

DAN (דָּן; om. in LXX.; *Dan*). This is given in the A.V. ("Dan also," יְדָן) as the name of a city. It is associated with Jason, as one of the places in Southern Arabia from which the Phœnicians obtained wrought iron, cassia, and calamus (Ezek. xxvii. 19). The R. V. and

many moderns do not accept the γ as = "and" or "also," but render "Wedan." MV.¹¹ takes this to be an Arabian city, perhaps otherwise unknown. Cornill seeks to explain the whole context by Assyrian words. Ewald conjectures that it is the same as the Keturahite Dedan in Gen. xrv. 3, but his conjecture is without support, and Dedan is mentioned in v. 20. Others refer it to the tribe of Dan, for the Danites were skilful workmen, and both Aholiab (Ex. xxxv. 34) and Hiram (2 Ch. ii. 13) belonged to this tribe. But for this there appears to be little foundation, if we consider the connexion in which the name occurs. [W. A. W.] [F.]

DANCE. As emotions of joy and sorrow universally express themselves in movements and gestures of the body, efforts have been made among all nations, but especially among those of the south and east, in proportion as they seem to be more demonstrative, to reduce to measure and to strengthen by unison the more pleasurable—those of joy. The dance is spoken of in Holy Scripture universally as symbolical of some rejoicing, and is often coupled for the sake of contrast with mourning, as in Eccles. iii. 4, "a time to mourn and a time to dance" (cp. Ps. xxx. 11; Matt. xi. 17). In the earlier period it is found combined with some song or *refrain* (Ex. xv. 20, xxxii. 18, 19; 1 Sam. xxi. 11); and with the $\pi\lambda\eta$, or tambourine (A. V. "timbrel"), more especially in those impulsive outbursts of popular feeling which cannot find sufficient vent in voice or in gesture singly.^a Nor is there any more strongly popular element traceable in the religion of the ancient Jews than the opportunity as given to a prophet or prophesess to kindle enthusiasm for Jehovah on momentous crises of national joy, and thus root the theocracy in their deepest feelings, more especially in those of the women, themselves most easily stirred, and most capable of exciting others. The dance was regarded even by the Romans as the worship of the body, and thus had a place amongst sacred things: "Sane ut in religionibus saltaretur," says Servius *ad Virg. Bucol.* v. 73, "haec ratio est, quod nullam majores nostri partem corporis esse voluerunt, quae non sentiret religionem."^b A similar sentiment is conveyed in Ps. xxxv. 10,—"All my bones shall say, Lord, who is like unto Thee?" So the "tongue" is the best member among many, the "glory" (Ps. lviii. 8) of the whole frame of flesh, every part of which is to have a share in the praises of God. Similarly among the Greeks is ascribed by Athenaeus to Socrates the following fragment—

οἱ δὲ χοροὶ κάλλιστα θεοῖς τιμῶσιν ἀριστοὶ ἐν πολέμῳ

who also praises among styles of dancing τὸ εὐγεγεῖν καὶ ὑπόρωδες (Athen. xiv. 627; cp. Arr. *Alex.* iv. 11).

Dancing formed a part of the religious cere-

^a Jerome, elsewhere, identifies Laish with Paneas, "urbem Lezem . . . quae hodie appellatur Paneas" (*Comm. in Esach.* xlviii.); and again, "Duo quae hodie Paneas" (*Ep. ad Ec.* 8); and "ubi nunc Paneas est" (*Comm. in Amos* viii.). Leishem is also identified with Paneas in Tal. Bab. *Maguilla*, 6 a.; the Jerusalem Targum, however, renders the word Dan by Dan of Klerion (Caesarea Philippi, Neubauer, *Géog. du Taïmad*, p. 236).

^a The proper word for this combination is $\pi\lambda\eta$ (*Judg.* xvi. 25; 1 Sam. xviii. 6; 2 Sam. vi. 5, 21; 1 Ch. xiii. 8, xv. 29; Jer. xxx. 19), though it also includes other senses.

^b Among Romans of a late period the sentiment had expired. "Nemo fere saltat sobrius, nisi forte insanit" (*Cic. pro Mur.* 14). Perhaps, however, the standard of morals would lead us rather to expect that drunkenness was common than that dancing was rare.

monies of the Egyptians, and was also common in private entertainments. Many representations of dances both of men and women are found in the Egyptian paintings. The "feast unto the Lord," which Moses proposed to Pharaoh to hold, was really a dance (פנ; see below).

Plato certainly (*Leg.* vii. 6) reckons dancing (*δρχησις*) as part of gymnastics (*γυμναστική*). So far was the feeling of the purest period of antiquity from attaching the notion of effeminacy to dancing, that the ideas of this and of warlike exercise are mutually interwoven, and their terms almost correspond as synonyms (*Hom. Il.* xvi. 617; cp. *Creuzer, Symb.* ii. 367, iv. 474; and see especially *Lucian, de Salt.*, passim). Women, however, among the Hebrews made the

Egyptian dances. (Wilkinson.)

dance their especial means of expressing their feelings; and when their husbands or friends returned from a battle on behalf of life and home, felt that they too ought to have some share in the event, and found that share in the dance of triumph welcoming them back. The "eating and drinking and dancing" of the Amalekites is recorded, as is the people's "rising up to play" (פנ, including a revelling dance), with a tacit censure; the one seems to mark the lower civilisation of the Amalekites, the other the looseness of conduct into which idolatry led the Israelites (*Ex.* xxxii. 6; *1 Sam.* xxx. 16; *1 Cor.* x. 7). So among the Bedouins, native

dances of men are mentioned (*Lynch, Dead Sea*, p. 295; *Stanley*, pp. 56, 466), and are probably an ancient custom. The Hebrews did not always leave the dancing to the women; in *Jer.* xiii. 13 the young men are mentioned as dancing with the old. But more especially on such occasions of triumph, any woman whose nearness of kin to the champion of the moment gave her a public character among her own sex, seems to have felt that it was her part to lead such a demonstration of triumph, or of welcome: so Miriam (*Ex.* xv. 20) and so Jephthah's daughter (*Judg.* xi. 34), and similarly there no doubt was, though none is mentioned, a chorus and dance of women led by Deborah, as the song of the men by Barak (*cp. Judg.* v. 1 with *Ex.* xv. 1, 20). Similarly, too, Judith (*xv.* 12, 13) leads her own song and dance of triumph over Holofernes. There was no such leader of the choir mentioned in the case of David and Saul. Hence whereas Miriam "answered" the entire chorus in *Ex.* xv. 21, the women in the latter case "answered one another as they played" (*1 Sam.* xviii. 7); that "answer" embodying the sentiment of the occasion, and forming the burden of the song. The "coming out" of the women to do this (*Judg.* xi. 34; *1 Sam.* xviii. 6; cp. "went out," *Ex.* xv. 20) is also a feature worthy of note, and implies the object of meeting, attending upon, and conducting home. So Jephthah's daughter met her father, the "women of all the cities" came to meet and celebrate Saul and David and their host, but Miriam in the same way "goes out" before "Jehovah" the "man of war," Whose Presence seems implied. This marks the peculiarity of David's conduct, when, on the return of the Ark of God from its long sojourn among strangers and borderers, he (*2 Sam.* vi. 5-22) was himself *choregus*; and here too the women, with their timbrels* (see especially *v.* 5, 19, 20, 22), took an important share. This fact brings out more markedly the feelings of Saul's daughter Michal, keeping aloof from the occasion, and "looking through a window" at the scene. She should, in accordance with the examples of Miriam, &c., have herself led the female choir, and so come out to meet the Ark and her lord. She stays with the "household" (*o.* 20), and "comes out to meet" him with reproaches, perhaps feeling that his real was a rebuke to her apathy. It was before "the handmaids," i.e. in leading that choir which she should have led, that he had "uncovered" himself; an unkingly exposure as she thought it, which the dance rendered necessary—the wearing merely the ephod or linen tunic. The occasion was meant to be popularly viewed in connexion with David's subjugation of various enemies and accession to the throne of Israel

* The תוף was clearly the women's instrument. See the allotment of the other different instruments to men in *1 Ch.* xv. 16-21, and *xvi.* 6, 42; cp. also the עֲלִמֹת תוף of *Ps.* lxxviii. 25.

* Some commentators have been at pains to point out that it was not the act of dancing, but the dress divested of upper robes which was the subject of remark. But clearly the "dancing with all his might" could hardly be done in the dignified costume of royalty: every Hebrew would see that the one implied the other. Cp. *Ex.* xxxiii. 6, 25.

(see 1 Ch. xii. 23—xiii. 6); he accordingly thinks only of the honour of God, Who had so advanced him, and in that forgets self (cp. Müller, *de Davide ant. Arc. Ugolini*, xxxii.).

From the mention of "damsels," "timbrels," and "dances" (Pa. lxviii. 25, cxlix. 3, cl. 4), as elements of religious worship, it may perhaps be inferred that David's feeling led him to incorporate in its rites that popular mode of festive celebration. This does not seem to have survived him, for as Saalschütz remarks (*Archæol. der Hebr.* vol. i. p. 299), in the mention of religious revivals under Hezekiah and Josiah, no notice of them occurs; and this, although the "words," the "writing," and the "commandment of David" on such subjects, are distinctly alluded to (3 Ch. xxix. 30; xxv. 4, 15). It is possible that the banishing of this popular element, which found its vent no doubt in the idolatrous rites of Baal and Astarte (as it certainly did in those of the golden calf, Ex. xxxii. 19), made those efforts take a less firm hold on the people than they might have done; and that David's more comprehensive scheme might have retained some ties of feeling which were thus lost. On the other hand was doubtless the peril of the loose morality which commonly attended festive dances at heathen shrines. Certainly in later Judaism the dance was included among some religious festivities, e.g. the feast of Tabernacles (*Mishna, Succah*, v. 3, 4), where, however, the performers were men. This was, probably, a mere following the example of David in the letter. Also in the earlier period of the Judges the dances of the virgins in Shiloh (Judg. xxi. 19–23) were certainly part of a religious festivity. It seems also from this last instance clear, and from the others probable, that such dances were performed by maidens apart from men, which gives an additional point to the reproach of Michal. What the fashion or figure of the dance was is a doubtful question; nor is it likely to have lacked such variety as would adapt it to the various occasions of its use. The word *חַנּוּךְ* means to move in a ring or round; whence in Ps. xlii. 4 we find *חַנּוּךְ הַמִּשְׁכָּן* meaning a festive crowd, apparently as dancing in a ring. So *חַנּוּךְ* (whence *מְחֻלָּה*) means "to turn." In modern Oriental dances a woman leads off the dance; the others then follow her with exact imitation of her artistic and graceful attitudes. A parallelism of movement is also incident to it (Saalschütz, *ib.* p. 301). Possibly Miriam so led her countrywomen. The same writer thinks that in Cant. vi. 13 the words

מְחֻלָּה הַמִּשְׁכָּן (A. V. "company of two armies;" R. V. "dance of Mahanaim," i.e. dance of a double choir) imply two rows of dancing girls, and that the address in the singular number, "return, return," and again in vii. 1, applies to the movements of the individual performer in a kind of *contre-danse*.

Dancing also had its place among merely festive amusements apart from any religious character (Jer. xxxi. 4, 13; Lam. v. 15; Mark vi. 22; Luke xv. 25). The accomplishments exhibited by Herodias's daughter seem, however, to show that Archbishop Trench's remark on the last-named passage, that the dancers were of course not the guests but hired performers, is

hardly to be received with strictness; although the tendency of luxury in the East has no doubt been to reduce the estimation in which the pastime, as shared in, is there held. Children, of course, always did and always will dance (Job xxi. 11; Matt. xi. 17; Luke vii. 32). In their "dancing dervishes" the Turks seem to have adopted into their system the enthusiastic raptures, at once martial and sacred, which (e.g. in the Roman *Sali*) seem indigenous in many Southern and Eastern races from the earliest times. For further remarks Spencer, *de Saltat. vet. Hebr.*, may be consulted (Ugolini, xxx.); and, for the Greek and Roman dances, see *Dict. of Gk. and Rom. Ant.*, "Saltatio." [H. H.]

DANCE is given by the A. V. as the equivalent of the Hebrew *Machol* (מַחֹל). This word, however, evidently includes also the musical instrument to the accompaniment of which the dance was usually performed. This may be seen by comparing with one another the various passages of Holy Writ in which the word occurs. Some scholars connect *Machol*

with *Chailil* (חַיִּיל; FLUTE), which is certainly no bad derivation, as the *Chailil* is one of the oldest, if not the oldest of, musical instruments. Be this, however, as it may, the *Machol* was, in any case, as simple an instrument as the dance itself was a simple performance. If *Toph* (תּוֹפִי) was, in one sense, a bracelet with tinkling bells attached to it, *Machol* was no doubt sometimes, in like manner, an anklet with tinkling bells; the sounds of which not merely gave rise to the dancing, but were also, in turn, produced by it (cp. Is. iii. 16). [S. M. S.-S.]

DANIEL (דָּנִיֵּאל, Dan. i. 6, 7, 8, &c.; Ezra viii. 2; Neh. x. 6; 1 Ch. iii. 1; and דָּנְיָאֵל [Kethib; דָּנִיֵּאל, Keri, ed. Baer], Ezek. xiv. 14, 20; xxviii. 3), the name of three (or four) persons in the Old Testament.

1. The second son of David (B. Δανιήλ, A. Δανούλα), "born unto him in Hebron," "of Abigail the Carmelitess" (1 Ch. iii. 1). In the parallel passage, 2 Sam. iii. 3, he is called CHILEAB (BA. Δανούλα).

2. The fourth of "the greater Prophets" (cp. Matt. xxiv. 15, *προφῆταις*). Nothing is known of the parentage or family of Daniel. He appears, however, to have been of royal or noble descent (Dan. i. 3; cp. Joseph. *Ant.* x. 10, § 1), and to have possessed considerable personal endowments (Dan. i. 4). He was taken to Babylon in "the third year of Jehoiakim,"* and trained in a college like to "the house

* This date has given rise to many objections, because the fourth year of Jehoiakim is identified with the first of Nebuchadnezzar (Jer. xxv. 1). The text of Daniel itself suggests the true explanation. The second year of Nebuchadnezzar's reign (ii. 1) falls after the completion of the three years' training of Daniel, which commenced with his captivity (i. 1, 6); and this is a clear indication that the expedition mentioned in i. 1 was undertaken in the last year of the reign of Nabopolassar, while as yet Nebuchadnezzar was not properly king (see *Speaker's Comm.* add. note to i. 1). Others explain it (cp. 2 K. xxiv. 1) of the third year (a.c. 598–7; al. 606) of Jehoiakim's subjection to Nebuchadnezzar (Delitzsch in *RE* 3; Tiele, *Bab.-Assyr. Gesch.* p. 441).

of the malea" (*Records of the Past*, N. S. iv. 110) for the king's service with his three companions, afterwards called Shadrach, Meshach, and Abednego (see some conjectures on these names in *Speaker's Comm.*² on Daniel, p. 242 sq.; *ZA.* iv. 46 sq.; Fabre d'Églé, *Le Livre du Prophète Daniel*, i. 147). Like Joseph in earlier times, he gained the favour of his guardian, and was divinely supported in his resolve to abstain from the "king's meat" for fear of defilement (*Dan.* i. 8-16). At the close of his three years' discipline (*Dan.* i. 5, 18), Daniel had an opportunity of exercising his peculiar gift (*Dan.* i. 17) of interpreting dreams, on the occasion of Nebuchadnezzar's decree against the Magi (*Dan.* ii. 14 sq.). In consequence of his success he was made "ruler of the whole province of Babylon," and "chief of the governors over all the wise men of Babylon" (ii. 48). He afterwards interpreted the second dream of Nebuchadnezzar (iv. 8-27) and the handwriting on the wall which disturbed the feast of Belshazzar (v. 10-28), though he no longer held his official position among the Magi (*Dan.* v. 7, 8, 12), and probably lived at Susa (*Dan.* viii. 2; cp. *Joseph. Ant.* x. 11, § 7; Bochart, *Geogr. Sacra* iii. 14). At the accession of Darius [DARIUS] he was made "one of the three presidents" (*R. V.*) of the empire (cp. 1 *Esd.* iii. 9), and was delivered from the lions' den, into which he had been cast for his faithfulness to the rites of his faith (vi. 10-23; cp. *Bel & Dr.* v. 29-42). At the accession of Cyrus he still retained his prosperity (vi. 28; cp. i. 21; *Bel & Dr.* v. 2); though he does not appear to have remained at Babylon (cp. *Dan.* i. 21), and in "the third year of Cyrus" (B.C. 535) he saw his last recorded vision on the banks of the Tigris (x. 1, 4). According to the Mahomedan tradition Daniel returned to Judaea, held the government of Syria, and finally died at Susa (Rosenmüller, *Schol.* p. 5, n.), where his tomb is still shown (Dieulafoy, *Journal des fouilles à Susse*, pp. 81, 169-70), and is visited by crowds of pilgrims. In the prophecies of Ezekiel mention is made of Daniel as a pattern of righteousness (xiv. 14, 20, c. B.C. 592) and wisdom (xxviii. 3, c. B.C. 587); and since Daniel was still young at that time, some have thought that another Prophet of the name must have lived at some earlier time (Bleek), perhaps during the captivity of Nineveh (Ewald, *Die Propheten*, ii. 560), whose fame was transferred to his later namesake. Hitzig imagines (*Vorbericht* § 3) that the Daniel of Ezekiel was purely a mythical personage, whose prototype is to be sought in Melchizedek, and that the character was borrowed by the author of the Book of Daniel as suited to his design. These suppositions are favoured by no internal probability, and are unsupported by any direct evidence. The order of the names "Noah, Daniel, and Job" (*Ezek.* xiv. 14) seems to suggest the idea that they represent the first and last historic types of righteousness before the Law and under it, combined with the ideal type (cp. Delitzsch in Herzog, *RE.*¹ p. 271). On the other hand, the narrative in *Dan.* i. 11 implies that Daniel was conspicuously distinguished for purity and knowledge at a very early age (cp. *Hist. Susa.* c. 45), and he may have been thirty to forty years old at the time of Ezekiel's prophecy.

Allusion has been made already to the com-

parison which may be instituted between Daniel and Joseph, who stand at the beginning and the close of the divine history of the Jews, as representatives of the true God in heathen courts (Auberlen, *Daniel*, pp. 32-3). In this respect the position of Daniel must have exercised a powerful influence upon the form of the revelations conveyed through him. And in turn the authority which he enjoyed renders the course of the Exile and the Return clearly intelligible. By station, by education, and by character, he was peculiarly fitted to fulfil the work assigned to him. He was not only a resident in a foreign land, like Jeremiah or Ezekiel, but the minister of a foreign empire, and of successive dynasties (*Dan.* ii. 48; vi. 28). His political experience would naturally qualify him to give distinct expression to the characteristics of nations in themselves, and not only in their relation to God's people. His intellectual advantages were as remarkable as his civil dignity. Like the great Lawgiver who was "trained in all the wisdom of the Egyptians," the great seer was trained in the secrets of Chaldaean wisdom, and placed at the head of the school of the Magi (*Dan.* ii. 48). He was thus enabled to preserve whatever was true in the traditional teaching of the East, and to cast his revelations into a form suited to their special character. But though engaged in the service of a heathen prince and familiar with Oriental learning, Daniel was from the first distinguished by his strict observance of the Mosaic Law (i. 8-15; cp. vi. 10, 11). In this way the third outward condition for his work was satisfied, and at the close of the Exile he offered a pattern of holiness for the instruction of the Dispersion of after-times (cp. Auberlen, *Daniel*, p. 24, &c.).

In addition to his Hebrew name, God is my Judge, another, a Chaldaean name, Belteshazzar (ܒܠܬܫܫܐܝܐ, i. 7, ii. 26, v. 12; Theodotion, LXX., *Baltassar*; Vulg. *Baltassar*), was given to him at Babylon (*Dan.* i. 7). The meaning of the name is disputed. It may be (cp. Fried. Delitzsch, *Proph.* to Baer's ed. of *Dan.*, Ezra, and Neh., p. ix.) = *balātsu-usur* = *protect his life*, and be a compendious form of *Bēl-balātsu-usur* = *Bel protect his life*; or if the name *Beltis* (*Bilat*) be the first element of the name (Rawlinson, Sayce; see *Speaker's Comm.*² p. 244) = *Beltis defend the King*. Hoffmann (*ZA.* ii. 56) also finds the name of a god in

בלט (cp. Sanballat), but prefers to consider it the name of Saturn. Such name-changes have been common at all times (for the simple assumption of a foreign name, cp. *Gen.* xli. 45; *Ezek.* i. 11, v. 14, Sheshbazzar); and Babylonian contract tablets show that Jews settled at Babylon had no objection to taking Babylonian names (*Records of the Past*, N. S. iv. pp. 101, 107).

Various apocryphal fragments attributed to Daniel are collected by Fabricius (*Cod. Pared. V. T.* i. 1124).^b It is surprising that his

^b Apocryphal histories such as the Persian *Qisas-e Daniel* (cp. Zotenberg in *Merx, Archiv*, i. 385 sq. [1870]; Darmesteter, *L'Apocalypse Persane de Daniel* in the *Mélanges Renier*, p. 405 [1887]) serve but to emphasize the vast differences between such works and the Biblical narrative.—[F.]

fame in later times seems to have been obscured (Hottinger, *Hist. Orient.* 92). Cp. Epiph. *Vit. Dan.* ii. p. 243, ed. Petav.; *Vit. Dan.* ap. Fabric.; Joseph. *Ant.* x. 11.

Cp. H. Deane, *Daniel, his Life and Times*; P. H. Hunter, *The Story of Daniel, &c.*

3. A descendant of Ithamar, who returned with Ezra to Judaea in the time of "Artaxerxes." [ARTAXERXES.] (Ezra viii. 2.)

4. A priest, probably the same as 3, who sealed the covenant drawn up by Nehemiah B.C. 445 (Neh. x. 6). He is confounded with the Prophet in the apocryphal addenda: Dan. xiv. 1 (LXX., not Theodotion). [B. F. W.] [F.]

DANIEL, THE BOOK OF, is the earliest example of apocalyptic literature, and in a great degree the model, according to which all later apocalypses were constructed. In this aspect it stands at the head of a series of writings in which the deepest thoughts of the Jewish people found expression after the close of the prophetic era (cp. Smend, *ZATW.*, 1885, p. 222 sq. He adopts the Maccabean date). The Book of Enoch [ENOC], the Jewish Sibyllines, and the fourth Book of Ezra [2 ESDRAS], carry on, with varied success and in different directions, the great outlines of universal history which it contains; and the "Revelation" of Daniel received at last its just completion in the Revelation of St. John. Without an inspired type it is difficult to conceive how the later writings could have been framed; and whatever judgment be formed as to the composition of the Book, there can be no doubt that it exercised a greater influence upon the early Christian Church than any other writing of the Old Testament, while in the Gospels it is specially distinguished by the emphatic quotation of our Lord (Matt. xxiv. 15, τὸ ῥηθὲν διὰ Δανιὴλ τοῦ προφήτου . . . ὁ ἀναγινώσκων νοεῖτω . . .).

1. *Character.*—In studying the Book of Daniel it is of the utmost importance to recognise its apocalyptic character. It is at once an end and a beginning, the last form of prophecy and the first "philosophy of history." The nation is widened into the world: the restored kingdom of Judah into a universal kingdom of God. To the old Prophets Daniel stands, in some sense, as a commentator (Dan. ix. 2-19): to succeeding generations, as the herald of immediate deliverance. The form, the style, and the point of sight of prophecy, are relinquished upon the verge of a new period in the existence of God's people, and fresh instruction is given to them suited to their new fortunes. The change is not abrupt and absolute, but yet it is distinctly felt. The eye and not the ear is the organ of the Seer: visions and not words are revealed to him. His utterance is clothed in a complete and artificial shape, illustrated by symbolic imagery and pointed by a specific purpose. The Divine counsels are made known to him by the ministry of Angels (vii. 16, viii. 16, ix. 21), and not by "the Word of the Lord." The seer takes his stand in the future rather than in the present, while the Prophet seized on the elements of good and evil which he saw working around him and traced them to their final issue. The one looked forward from the present to the great "age to come;" the other looked backward from "the last days" to the trials in

which he was still placed. In prophecy the form and the essence, the human and Divine, were inseparably interwoven; in Revelation the two elements can be contemplated apart, each in its greatest vigour,—the most consummate art, and the most striking predictions. The Babylonian exile supplied the outward training and the inward necessity for this last form of Divine teaching; and the prophetic visions of Ezekiel form the connecting link between the characteristic types of revelation and prophecy (cp. Lücke, *Versuch.* i. 17 sq.; Hitzig, *Daniel, Vorbem.* § 9; Hilgenfeld, *Die Jud. Apok.*, 1 sq.; Pusey, *Daniel the Prophet*, Lect. V.). [DANIEL.]

2. *Philology.*—The language of the Book presents some interesting philological problems (cp. Pusey, Lecture I. and Notes A-D at the end of his volume). No less than its general form, it belongs to an era of transition. Like the Book of Ezra, Daniel is composed partly in the vernacular Aramaic (Chaldee) and partly in the sacred Hebrew. The introduction (i.-ii. 4 a) is written in Hebrew. On the occasion of the "Syriac" (סורית, *syriace*, i.e. Aramaic) answer of the Chaldeans, the language changes to Aramaic, and this is retained till the close of the seventh chapter (ii. 4 b-vii.). The personal introduction of Daniel as the writer of the text (viii. 1) is marked by the resumption of the Hebrew, which continues to the close of the Book (viii.-xii.). Arguments from style are always precarious; but if "the Captivity be the grave of the old Hebrew and the old Israel, and the womb of the new Hebrew and the new Israel" (Margoliouth, *Essay on Ecclesiasticism*, p. 21), then the language of Daniel may be expected to show, as it does show, affinity—as regards its Hebrew—to that of Jeremiah, Ezekiel, and Habakkuk, or in other words to those Prophets who lived nearest to the assumed age of Daniel (to others certain peculiarities of style present a general similarity to the Hebrew of the CHRONICLES [Delitzsch, *RE.* s. n. 'Daniel,' p. 470]); and also, as was to be expected, Babylonianisms indicating the hand of one long resident in Babylon. The Aramaic of Daniel, which has been shown to be on a par with that of Ezra (see reff. in *Speaker's Comm.* p. 228, b. 5; Delitzsch, p. 471), is also of an earlier form (cp. Maurer, *Comm. in Dan.* p. 87) than exists in any other Chaldaic document; but as the Targums—the next most ancient specimens of the language—were not committed to writing till about the Christian era, this fact cannot be insisted on as a proof of remote antiquity. Furthermore, it is, with Ezra, the earliest example of East Aramaic as distinguished from the closely akin West Aramaic of Palestine (Kautzsch, *Gramm. d. Biblisch-Aramäischen*, 'Einleitung,' § 1), not vice-versâ, and represents, with the Babylonian dialect, the principal language of the Babylonian kingdom (Luzzatto, Delitzsch, Nöldeke. Assyro-Babylonian was known and studied in Palestine before the age of the Exodus: see ZA. iv. 387). A philological comparison between Assyrian and Hebrew is still in its infancy (cp. Fried. Delitzsch, *Proleg. eines neuen Hebr.-Aram. Wörterbuchs* s. A. T. § 12), but as regards the Book of Daniel quite enough has been collected to show the philological approximation of chs. i.-vii. to the language of the Babylonian inscriptions (cp. Meinhold, *Die*

Composition d. B. Daniel, pp. 3-18), if—from the nature of the case—this is much less marked in chs. viii.-xii. In addition to these two great elements—Aramaic and Hebrew—the Book of Daniel contains traces of other languages which indicate the peculiar position of the writer. Greek technical terms (cp. § 10) illustrate the intercourse and commerce between Assyria, Asia Minor, and Greece; and the occurrence of Persian words, explicable enough when Persians traded with, and probably lived in, Babylon, as they did by the time of Nebuchadnezzar (Pinches. See *Records of the Past*, N.S., iii. 124, for their presence there in the time of Belshazzar), is quite inexplicable on the supposition that the whole Book is a Palestinian forgery of the Maccabean age (cp. Strack u. Zöckler, *Handb. d. theolog. Wissenschaften*,¹ i. p. 172).

3. *Contents*.—The Book is generally divided into two nearly equal parts. The first of these (i.-vi.) contains chiefly historical incidents, while the second (vii.-xii.) is entirely apocalyptic. This division is further supported by the fact that the details of the two sections are arranged in order of time, and that the commencement of the second section falls earlier than the close of the first, as if the writer himself wished to mark the division of subject. But, on the other hand, this division takes no account of the difference of language, nor of the change of person at the beginning of ch. viii. And though the first section is mainly historical, yet the vision of ch. vii. finds its true foundation and counterpart in ch. ii. From these circumstances it seems better to divide the Book (cp. Auberlen, pp. 36 sq.) into three parts. The first chapter forms an introduction. The next six chapters (ii.-vii.) give a general view of the progressive history of the powers of the world, and of the principles of the Divine government as seen in the events of the life of Daniel. The remainder of the Book (viii.-xii.) traces in minutest detail the fortunes of the people of God, as typical of the fortunes of the Church in all ages. The second section is distinguished by a remarkable symmetry. It opens with a view of the great kingdoms of the earth revealed to a heathen sovereign, to whom they appeared in their outward unity and splendour, and yet devoid of any true life (a metal Colossus); it closes with a view of the same powers as seen by a Prophet of God, to whom they were displayed in their distinct characters, as instinct with life, though of a lower nature, and displaying it with a terrible energy of action (*ἑνπλῆ*, four beasts). The image under which the manifestation of God's kingdom is foreshown corresponds exactly with this twofold exhibition of the worldly powers. "A stone cut without hands, . . . becoming a great mountain and filling the whole earth" (Dan. ii. 34, 35)—a rock and not a metal—is contrasted with the finite proportions of a statue moulded by man's art, as "a son of man," the representative of humanity, is the true Lord of that lower creation (Gen. i. 30) which symbolises the spirit of mere earthly dominions (Dan. vii. 13, 14). The intermediate chapters (iii.-vi.) exhibit a similar correspondence, while setting forth the action of God among men. The deliverance of the friends of Daniel from the punishment to which they were condemned for refusing to perform an idolatrous

act at the command of Nebuchadnezzar (ch. iii.), answers to the deliverance of Daniel from that to which he was exposed by continuing to serve his God in spite of the edict of Darius (ch. vi.); and in the same way the degradation, the repentance, and the restoration of Nebuchadnezzar (ch. iv.) form a striking contrast to the sacrilegious pride and death of Belshazzar (ch. v. 22-31). The arrangement of the last section (viii.-xii.) is not equally distinct, though it offers traces of a similar disposition. The description of the progress of the Grecian power in ch. viii. is further developed in the last vision (x.-xii.), while the last chapter appears to carry on the revelation to the first coming of Messiah in answer to the prayer of Daniel.

4. *Canonical Authority*.—The position which the Book of Daniel occupies in the Hebrew Canon seems at first sight remarkable. It is placed among the Holy writings (*Ketubim*, *ἁγία γραφα*) between Esther and Ezra, or immediately before Esther (cp. Hody, *De Bib. Text*, pp. 644-5), and not among the Prophets. This collocation, however, is a natural consequence of the right apprehension of the different functions of the Prophet and seer (Pusey, Lecture V.). If it be very uncertain at what time the triple division of the Scriptures which is preserved in the Hebrew Bibles was first made, yet the characteristics of the classes show that it was not based exclusively on outward authority, but on the inward composition of the Books [CANON]. Daniel, as the truth has been well stated, had the spirit but not the work of a Prophet; and as his work was a new one, so was it carried out in a style of which the Old Testament offers no other example. His Apocalypse is as distinct from the prophetic writings as the Apocalypse of St. John from the apostolic Epistles. The heathen court is to the one seer what the isle of Patmos is to the other, a place of exile and isolation, where he stands alone with his God, and is not, like the Prophet, active in the midst of a struggling nation (Auberlen, p. 34).^a This estimate of the position of the Book in this division of the Canon is not incompatible with the view that that position also indicated a somewhat late admission (Strack).

5. *Unity*.—The unity of the Book in its present form, notwithstanding the difference of language, is generally acknowledged (De Wette-Schrader, *Eintl.* § 319; Hitzig, § 4; Bleek-Wellhausen, *Eintl.*⁴ § 233; do.⁵ § 201).^b Still

^a The Jewish doctors of later times were divided as to the degree of the inspiration of Daniel. Abartanai maintained against Maimonides that he was endowed with the highest prophetic power (Fabric. *Cod. Pseudep.* V. T. i. 897, n.).

^b There have been, and are, those who dispute this unity. Eichhorn attributed chs. ii.-vi., vii.-xii., to different authors; and Bertholdt supposed that each section was the work of a distinct writer, though he admitted that each of his nine successive writers was acquainted with the composition of his predecessor, recognising in this way the unity of the Book (*Aintl.*) [A view, similar in character, is adopted by Strack (*Zöckler's Handb. d. theolog. Wissenschaften*,² I. 14. *Eintl. ins A. T.' § 6). Meinholt (*Beiträge z. Erklärung d. Buches Daniel*, p. 22) assigns i.-ii. 4 a to the author of vii.-xii., ii. 4 b-vi. to a second, and ch. vii. to a third. Other views are mentioned by Delitzsch (Herzog, *RE.*² p. 471).—F.]

there is a remarkable difference in its internal character. In the first seven chapters Daniel is spoken of *historically* (i. 8-21; ii. 14-49; iv. 8-27; v. 13-29; vi. 2-28; vii. 1, 2): in the last five he appears *personally* as the writer (vii. 15-28; viii. 1-ix. 22; x. 1-19; xii. 5). This peculiarity, however, is not without some precedents in the writings of the earlier Prophets (e.g. Is. vii. 3; xx. 2), and the seventh chapter prepares the way for the change; for while Daniel is there spoken of in the third person (vii. 1, 2), the substance of the chapter is given in his words, in the first person (vii. 2, 15, 28). The cause of the difference of person is commonly supposed to lie in the nature of the case. The Prophet narrates symbolic and representative events historically, for the event is its own witness; but revelations and visions need the personal attestation of those to whom they are communicated. It is, however, more probable that the peculiarity arose from the manner in which the Book assumed its final shape (§ 11).

6. *Reception*.—Allusion has been made already to the influence which the Book exercised upon the Christian Church. Apart from the general type of apocalyptic composition which the apostolic writers derived from Daniel (2 Thess. ii.; Rev. *passim*; cp. Matt. xxvi. 64, xxi. 44?), the New Testament incidentally acknowledges each of the characteristic elements of the Book, its miracles (Heb. xi. 33, 34), its predictions (Matt. xxiv. 15), and its doctrine of Angels (Luke i. 19, 26). At a still earlier time the same influence may be traced in the Apocrypha. The Book of Baruch [BARUCH] exhibits so many coincidences with Daniel, that by some the two Books have been assigned to the same author (cp. Fritzsche, *Handb. zu d. Apok.* i. 173; *Speaker's Comm.* 'Intro. to Baruch,' § iv.); and the First Book of Maccabees represents Mattheias quoting the marvellous deliverances recorded in Daniel, together with those of earlier times (1 Macc. ii. 59, 60), and elsewhere exhibits an acquaintance with the Greek Version of the Book (1 Macc. i. 54=Dan. ix. 27). The allusion to the guardian Angels of nations, which is introduced into the Alexandrine translation of the Pentateuch (Deut. xxxii. 8; LXX., some MSS.), and recurs in the Wisdom of Sirach (Ecclus. xvii. 17), may have been derived from Dan. x. 21, xii. 1, though this is uncertain, as the doctrine probably formed part of the common belief. According to Josephus (*Ant.* xi. 8, § 4) the prophecies of Daniel gained for the Jews the favour of Alexander [ALEXANDER THE GREAT]; and whatever credit may be given to the details of his narrative, it at least shows the unquestioning belief in the prophetic worth of the Book which existed among the Jews in the time of Josephus.

7. *Early Opinion*.—The testimony of the Synagogue and of the Church gave a clear expression to the judgment implied by the early and authoritative use of the Book, and pronounced it to contain authentic prophecies of Daniel, without contradiction, with one exception, till modern times. Porphyry alone († c. 305 A.D.) assailed the Book, and devoted the 12th of his fifteen Discourses against Christians (*Ἀδύτοι κατὰ Χριστιανῶν*) to a refutation of its claims to be considered a prophecy. "The history," he said, "is true up to the date of Antiochus

Epiphanes, and false afterwards"; therefore the Book was written in his time" (*Hieron. Pref. in Dan.*). The argument of Porphyry is an exact anticipation of the position of many modern critics, and involves a twofold assumption, that the whole Book ought to contain predictions of the same character, and that definite predictions are impossible. Externally the Book is as well attested as any Book of Scripture, and there is nothing to show that Porphyry urged any historical objections against it; but it brings the belief in miracle and prediction, in the Divine power and foreknowledge as active among men, to a startling test, and according to the character of this belief in the individual must be his judgment upon the Book.

8. *Modern Opinion*.—The history of the assaults upon the prophetic worth of Daniel in modern times is full of interest. In the first instance doubts were raised as to the authorship of the opening chapters, i.-vii. (Spinoza, Newton), which were perfectly compatible with the fullest recognition of their canonicity. Then the variations in the LXX. suggested the belief that chs. iii.-vi. were a later interpolation (J. D. Michaelis). As a next step the last six chapters only were retained as a genuine Book of Scripture (Eichhorn, 1st and 2nd edd.); and at last the whole Book was rejected as the work of an impostor, "without intention to deceive," who lived in Palestine in the time of Antiochus Epiphanes (Corrodi, 1783. Hitzig fixes the date more exactly from 170 B.C. to the spring of 164 B.C.). This opinion has found wide acceptance, and has been pronounced "a certain result of historical criticism"; the "certainty" of which has again been transformed into uncertainty by the view which assigns the Hebrew sections to the Maccabean period, and the Aramaic to c. B.C. 300 (cp. Meinhold, *Beiträge*, p. 22; *Das Buch Daniel* in Strack u. Zöckler's *Kurzgef. Komm. z. A. T.*, pp. 261-2).

9. *Grounds of Rejection* (cp. § 12).—The real grounds on which most modern critics rely in rejecting the Book, are the "fabulousness of its narratives" and "the minuteness of its prophetic history." "The contents of the Book," it is said, "are irrational and impossible" (Hitzig, § 5). It is obvious that it is impossible to answer such a statement without entering into general views of the Providential government of the world. It is admitted that the contents of the Book are exceptional and surprising; but revelation is itself a miracle, however it be given, and essentially as inconceivable as any miracle. There are times, perhaps, when it is required that extraordinary signs should arrest the attention of men and fix their minds upon that Divine Presence which is ever working around them. Prodiges may become a guide to nature. Special circumstances may determine, and, according to the Bible, do determine, the peculiar form which the miraculous working of God will assume at a particular time; so that the question is, whether there is any discernible relation between the onward wonders and the moral condition of an epoch. Nor is it impossible to apply this remark to the case of Daniel (cp. Pusey, *Lecture VII.* § 12). The position which he occupied [DANIEL] was as exceptional as the Book which bears his name. He survived the Exile and the dis-

appointment which attended the first hopes of the Jews. The glories which had been connected with the Return in the foreshortened vision of earlier Prophets were now felt to be far off, and a more special Revelation may have been necessary as a preparation for a period of silence and conflict.* The very character of the Babylonian exile seems to have called for some signal exhibition of Divine power. As the first Exodus was distinguished by great marvels, it might appear natural that the second should be also (cp. Micah vii. 15; Caspari and Delitzsch). National miracles, so to speak, formed the beginning of the theocracy: personal miracles, the beginning of the Church. To speak of an "aimless and lavish display of wonders" is to disregard the representative significance of the different acts, and the relation which they bore to the future fortunes of the people. A new era was inaugurated by fresh signs. The Jews, left among the nations of the world, looked for some sure token that God was able to deliver them and work out His own purposes. The persecution of Antiochus completed the teaching of Daniel; and the people no longer sought without that which at length they had found within. They had withstood the assault of one typical enemy, and now they were prepared to meet all. The close of special predictions coincided with the consolidation of the national faith. [ANTIOCHUS EPIPHANES.]

10. *Other Objections.*—The general objections against the "legendary" miracles and specific predictions of Daniel are strengthened by other objections in detail, which cannot, however, be regarded in themselves as of any considerable weight (cp. Pusey, Lecture VII.). Some of these have been already answered incidentally. Some still require a short notice, though it is evident that they are often after-thoughts; the results, and not the causes, of the rejection of the Book. Not only, it is said, is (a) the Book placed among the Hagiographa, but (b) Daniel is omitted in the list of prophets given in the Wisdom of Sirach; (c) the language is corrupted by an intermixture of Greek words; (d) the details are essentially unhistorical; (e) the doctrinal and moral teaching betrays a late date.

In reply to these remarks, it may be urged, that (a-b) if the Book of Daniel was already placed among the Hagiographa (see § 4) at the time when the Wisdom of Sirach was written, the omission of the name of Daniel (Ecclus. xlix.) is quite natural, and that under any circumstances the omission is not more remarkable than that of Ezra (xlix. 11) or of the individual mention of the twelve lesser Prophets (xlix. 10). (c) Up to the present time the decipherment of the Assyrian inscriptions has not thrown light upon the technical names of the musical instruments in use, but the objection founded upon the mention of Greek musical instruments* (iii. 5, 7, 10, כִּי־תִרְם, κιθαρα; נְיָה, σύμφωνον; ψαλτήριον; cp. the 'Excursus on the Musical Instruments,' in *Speaker's Comm.* p. 281), once supposed insuperable, cannot be pressed. It is admitted that such mention is not surprising at a time when the intercourse between Greece and Assyria can be traced to the time of Sargon at least (B.C. 722; Meinhold, *Beiträge*, p. 32), and when the Hellenization of the Jewish race between B.C. 607-587, before and after deportation into Babylonia, was an indisputable fact (cp. Flinders-Petrie, *Tunis*, ii. pp. 49, 50. Cp. also Brandis in Delitzsch, *RE.* i. p. 274; Alc. *Frag.* 33, Bergk.). (d) The details are in some cases as yet untested, or otherwise stated than in contemporary documents, but unhistorical they are not. The whole colouring, scene, and characters of the Book are Oriental, and especially Babylonian, impossible to an age so unfamiliar with them as the Maccabaean. The colossal image (ἰ. 1, probably that of the god Marduk [Merodach]), the fiery furnace, the martyr-like boldness of the three confessors (iii. 16), the decree of Darius (vi. 7), the lions' den (vi. 7, 19, 21), the dreams of Nebuchadnezzar and his demand of the Chaldeans (see p. 555, col. 1), his obeisance before Daniel (v. 46), his greatness as a builder (iv. 30) and his sudden fall (v. 33; cp. *Enseph. Praep. Ev.* ix. 41; Joseph. c. Ap. i. 20), the events connected with Belshazzar, Cyrus, Darius the Mede, and the fall of Babylon (see s. nn.), are not only consistent with the facts of Eastern life, but in many instances directly confirmed by the evidence of the Inscriptions (see on these points not only the notes of Pusey and *Speaker's Comm.**, but also Meinhold, *Die Composition u. s. v.* p. 194; Andrea, *Beveis d. Glaubens* for 1887, 1889; Vigouroux, *La Bible et les découvertes modernes*,* iv. 377 sq., and *Les Livres Saints et la critique rationaliste*, 1890. The inscriptions relative to the time from Nebuchadnezzar to Belshazzar are conveniently collected and translated in Schrader, *Keilinschriftliche Bibliothek*, iii., 2te Hälfte, p. 10 sq. Cp. also Ball's translations in *PSBA.* x. xi.; *Records of the Past*, N.S., iii. iv.; *Babylonian Record*, i. ii.). (e) In doctrine the Book is closely connected with the writings of the Exile, and forms a last step in the development of the ideas of the Messiah (vii. 13, &c.), of the resurrection (xii. 2, 3), of the ministry of Angels (viii. 16, xii. 1, &c.), of personal devotion (vi. 10, 11, i. 8), which formed the basis of later speculations, but received no essential addition in the interval before the coming of our Lord (cp. on these points Pusey and the *Speaker's Comm.**)

Generally it may be said that while the Book presents in many respects a startling and exceptional character, yet it is inaccurate on historical, philological, and archaeological grounds to assign its composition to the Maccabaean period (cp. Delitzsch, p. 479; Bp. Thirlwall's *Letters, Literary and Theological*, pp. 245-9. Meinhold, *Beiträge u. s. v.*,* Abweis der Abfassung von Dan. ii.-vi. in der Zeit d. makkabäischen

244, translated in *Hebraica*, iv. 7 sq. [1887]), starts with the assumption of the Maccabaean date and finds Greek words everywhere; Fabre d'Égléon (*Le Livre du Prophète Daniel*, i. 101 [1888]) will not admit that there are any Greek words at all. On the words in Dan. iii. 2, 3, see Lagarde, *Agathangelus*, p. 157 sq.—[F.]

* The special prophecies of Balaam (Num. xxiv. 24) and Isaiah (xlv. xlv.) centre in Daniel (cp. Dan. xi. 30); and the prediction of Balaam offers a remarkable parallel to those of Daniel, both from their particularity and from the position which the Prophet occupied (cp. Pusey, Lecture II.).

† H. Derenbourg, "Les mots Grecs dans le Livre biblique de Daniel" (*Mélanges Graux*, 1884, pp. 235-

244, translated in *Hebraica*, iv. 7 sq. [1887]), starts with the assumption of the Maccabaean date and finds Greek words everywhere; Fabre d'Égléon (*Le Livre du Prophète Daniel*, i. 101 [1888]) will not admit that there are any Greek words at all. On the words in Dan. iii. 2, 3, see Lagarde, *Agathangelus*, p. 157 sq.—[F.]

Kämpfe," p. 46 sq., admits this as regards that special section). It appears as a key to the later history and struggles of the Jews, and not as a result from them. The reception into the Canon, the phenomena of the Alexandrine Version, all point in the same direction. If the prophetic section be to some the difficulty, a sounder system of interpretation, combined with a more worthy view of the Divine government of men and nations, will probably do much to remove those undefined doubts as to the inspired character of the Revelation which naturally arise at first in the minds of thoughtful students.

11. *Conclusion.*—But while all historical evidence supports the canonicity of the Book of Daniel, it does not follow that the recognition of the unity and authority of the Book is necessarily connected with the belief that the whole, as it stands at present, is as it issued from the hands of Daniel. According to the Jewish tradition (*Baba Bathra*, f. 146), "the Books of Ezekiel, the twelve minor Prophets, Daniel and Esther, were written (i.e. drawn up in their present form) by the men of the great synagogue," and in the case of Daniel the tradition is supported by strong internal evidence. The manner in which Daniel is spoken of (i. 17, 19, 20, v. 11, 12; the title in ix. 23, xii. is different) suggests the notion of another writer; and if Daniel wrote the passages in question, they cannot be satisfactorily explained by 1 Cor. xv. 10; 2 Cor. xi. 5, 6, xii. 2 (Keil, § 136), or by the consciousness of the typical position which he occupied (Anberlen, p. 37). The substantial authorship of a Book of Scripture does not involve the subordinate work of arrangement and revision; and it is scarcely conceivable that a writer would purposely write one book in two languages, though there may have been an obvious reason why he should treat in separate records of events of general history in the vernacular dialect, and of the special fortunes of God's people in Hebrew. At the Return we may suppose that these records of Daniel were brought into one whole, with the addition of an introduction and a fuller narrative,* when the other sacred writings received their final revision (cp. *Speaker's Comm.* p. 230). The visions themselves would be necessarily preserved in their original form, and thus the later chapters (vii.—xii.) exhibit no traces of any subsequent recension, with the exception, perhaps, of two introductory verses, vii. 1, x. 1.

12. *Interpretation.*—The interpretation of Daniel has hitherto proved an inexhaustible field for the ingenuity of commentators, and the certain results are comparatively few. To touch on two points only: A. *The four kingdoms.* According to the traditional view (cp. Pusey, Lect. II.), which appears as early as the Fourth Book of Ezra [2 ESDRAS] and the Epistle of Baruch (ch. iv.), the four empires described in chs. ii. vii. are the Babylonian, the Medo-Persian, the Greek, and the Roman. With nearly equal consent it has been supposed that there is a change of subject in the eleventh chapter

(xi. 31 sq.), by which the seer passes from the persecutions of Antiochus to the times of Antichrist. A careful comparison of the language of the prophecy with the history of the Syrian kings must, however, convince every candid student of the text that the latter hypothesis is wholly unfounded and arbitrary. The whole of the eleventh chapter forms a history of the struggles of the Jewish Church with the Greek powers up to the death of its great adversary (xi. 45). This conflict, indeed, has a typical import, and foreshows in its characteristic outlines the abiding and final conflict of the people of God and the powers of evil, so that the true work of the interpreter must be to determine historically the nature of each event signalized in the prophetic picture, that he may draw from the past the lesson of the future. The traditional interpretation of "the four empires" seems to spring from the same error as the other, though it still finds numerous advocates (Hofmann, Auberlen, Keil, Hävernicks, Hengstenberg, Zündel, Kliefoth, and most English commentators). It originated at a time when the triumphant advent of Messiah was the object of immediate expectation, and the Roman empire appeared to be the last in the series of earthly kingdoms. The long interval of conflict which has followed the first Advent formed no place in the anticipations of the first Christians, and in succeeding ages the Roman period has been unnaturally prolonged to meet the requirements of a theory which took its rise in a state of thought which experience has proved false. It is a still more fatal objection to this interpretation that it destroys the great idea of a cyclic development of history which lies at the basis of all prophecy. Great periods (*glôses*) appear to be marked out in the fortunes of mankind which answer to another, so that that Divine utterance which receives its first fulfilment in one period receives a further and more complete fulfilment in the corresponding part of some later period. Thus the first coming of Christ formed the close of the last age, as His second coming will form the close of the present one. The one event is the type and, as it were, the spring of the other. This is acknowledged with regard to the other Prophecies, and yet the same truth is not applied to the revelations of Daniel, which appear then first to gain their full significance when they are seen to contain an outline of all history in the history of the nations which ruled the world before Christ's coming. The first Advent is as much a fulfilment of the visions of Daniel as of those of the other Prophets. The four empires precede the coming of Messiah and pass away before him. At the same time their spirit survives (cp. vii. 12), and the forms of national existence which were developed on the plains of Mesopotamia again reproduce themselves in later history. According to this view, the empires of Daniel can be no other than those of the Babylonians, Medes, Persians, and Greeks, who all placed the centre of their power at Babylon, and appear to have exhibited on one stage the great types of national life. The Roman power was at its height when Christ came, but the Egyptian kingdom, the last relic of the empire of Alexander, had just been destroyed, and thus the "stone cut without hands struck the feet of the image," and Christianity destroyed for ever

* The letter of Nebuchadnezzar (ch. iv.) appears to present clear traces of the interweaving of a commentary with the original text. Further the variant spelling of some proper names in the present original text of the Book, as well as the mis-spelling of others, point to textual mistakes, intentional or otherwise, in the copyist.

the real supremacy of heathen dominion. But this first fulfilment of the vision was only inchoative; and the correlatives of the four empires must be sought in post-Christian history. The corresponding symbolism of Babylon and Rome is striking at first sight, and other parallels may be drawn. The Byzantine empire, for instance, "inferior" to the Roman (Dan. ii. 39), may be compared with that of the Medes. The Teutonic races with their divided empire recall the image of Persia (vii. 6). Nor is it difficult to see in the growing might of the Northern powers, a future kingdom which may rival in terrible energy the conquests of Alexander. Without insisting on such details as these, which still require careful examination, it appears that the true interpretation of Daniel is to be sought in the recognition of the principle which they involve. In this way the Book remains a "prophecy," while it is also a "revelation;" and its most special predictions acquire an abiding significance.¹

[B. *The seventy weeks* (ix. 24-27. See the excursus in *Speaker's Comm.*² p. 360 sq.).—Fraidel (*Die Exegese der Siebzig Wochen Daniels*, p. 154, 1883) sums up the interpretation of the Church up to the time of the Middle Ages as marked by unanimity of opinion upon the main thoughts of the passage, coupled with great diversity as regards individual expressions and the mode of reckoning. Zöckler ('Der Prophet Daniel,' pp. 170-198 [in Lange's *Theol.-homil. Bibelwerk*, 1870]) has collected with exhaustive fullness all that more modern criticism has to say upon the subject. To those starting from a Maccabæan date, it is of course a *vaticinium ex eventu*, and a solution, satisfactory at least to its advocates, is attained, even if they be unable to agree as to the *terminus a quo* or the *terminus ad quem* (cp. Cornill, *Die Siebzig Jahrwochen Daniels*, 1889, ever among the most courageous of interpreters). The defenders of the Danielic authorship (cp. Wolf, *Die Siebzig Wochen Daniels*, 1889) are less confident in their belief that they have solved the problems. Such an attitude is to be preferred. To reckon these weeks backward and forward from the starting-point of a Jew of B.C. 164 is easy, but that starting-point has yet to be proved to be the true one: to reckon them from the date of such an one as Daniel professes to be is not easy, but is yet, from its difficulty, the truer one, which a better acquaintance with the still unexplained nature of the author's computation and chronology, and possibly light upon the mysteries of the numbers from a Babylonian point of view, may be elucidated hereafter.—F.]

13. *Versions*.—There is no Chaldee translation of Daniel, and the deficiency is generally accounted for, as in the parallel case of Ezra, by the danger which would have existed in such a case of

confusing the original text with the paraphrase; but on the other hand the whole Book has been published in Hebrew. The Greek Version has undergone singular changes. At an early time the LXX. Version was supplanted in the Greek Bibles by that of Theodotion,³ and in the time of Jerome the Version of Theodotion was generally "read by the Churches" (c. *Ruffin.* ii. 33; *Praef. in Comm.*: "Illud quoque lectorem admooneo Danieleum non juxta LXX. interpretes sed juxta . . . Theodotionem ecclesias legere . . ."). This change, for which Jerome was unable to account ("hoc cur acciderit nescio," *Praef. in Vers. Dan.*), may have been made in consequence of the objections which were urged against the corrupt LXX. text in controversy with Jews and heathen. The LXX. Version was certainly very unfaithful (Hieron. l. c.); and the influence of Origen, who preferred the translation of Theodotion (Hieron. in *Dan.* iv. 6), was probably effectual in bringing about the substitution (cp. Credner, *Beitr.* ii. 256 sq.). In the course of time, however, the Version of Theodotion was interpolated from the LXX., so that it is now impossible to recover the original text. [DANIEL, APOCRYPHAL ADDITIONS TO, § 4.] Meanwhile the original LXX. translation passed entirely out of use, and it was supposed to have been lost till the last century, when it was published at Rome from a *Codex Chisianus* (*Daniel secundum LXX.* . . . Romae, 1772, ed. P. de Magistris), together with that of Theodotion, and several illustrative essays. It has since been published several times (ed. Michaelis, Gotting. 1774; ed. Segaar, 1775; Hahn, 1845, and Tischendorf⁴ l. i. Cp. Bludau, *De Alexandrinae interpretationis libri Danielis indole critica et hermeneutica*, Münster, 1890). Another recension of the text is contained in the Syro-Hexaplaric Version at Milan (ed. Bugatus, 1788), but a critical comparison of the several recensions is still required.

14. *Commentaries*.—The commentaries on Daniel are very numerous. The Hebrew commentaries of R. Saadiah Haggæon († 942), Rashi († c. 1105), and Ibn Ezra († c. 1167), are printed in the great Rabbinic Bibles of Bamberg and Basle. That of Abarbanel († c. 1507) has been printed separately several times (Amstelod. 1647, 4to); Ibn Ali the Karaite's *Comm.* (ed. by Margolionth) forms part iii. of vol. i. of the *Semitic Series of Anecdota Oxoniensia*; and others are quoted by Rosenmüller, *Scholia*, pp. 39, 40. Among the patristic commentaries the most important are those of Jerome (vol. v. ed. Migne, Paris, 1857), who noticed especially the objections of Porphyry, Theodoret (ii. 1053 sq. ed. Schultze), and Ephrem Syrus (*Op. Syr.* ii.; Romae, 1740). Considerable fragments remain of the commentaries of Hippolytus (collected in Migne's edition, Paris, 1857; Bratke, Bonn, 1891) and Polychronius (Mai, *Script. Vett. Noc. Coll.* vol. i.); and Mai has published (l. c.) a catena on Daniel, containing fragments of Apollinaris, Athanasius, Basil, Eusebius, and many others. The chief Reformers—Luther (*Auslegung d. Proph. Dan.* 1530-1546; *Op. Germ.* vi. ed. Walch), Oecolampadius (*In Dan. libri duo*, Basil. 1530), Melanch-

¹ An example of the recurrent and advancing completion of the predictions of Daniel occurs in Matt. xxiv. 15, compared with 1 Macc. i. 54. The same truth is also implied in the interpretation of "the seventy sevens," as springing out of the "seventy" (years) of Jeremiah. On this there are some good remarks in Browne's *Ordo Saeculorum*, though his interpretation of the four empires as signifying the Babylonian, Grecian, Roman, and some future empire (cp. 675 sq.), seems very unnatural. The whole force of his argument (after Ibn Ezra and Maitland) lies in the proof that the Roman was not the fourth empire.

² The Version bears in the tetraplar text the singular title, το Εἰς ἀγγέλους Δανιήλ. ὧς is the term which Daniel applies to the Angels, "watchers" (*Dan.* iv. 13, 17, 23). Cp. *Daniel sec. LXX.* p. 125 sq.

thon (*Comm. in Dan. proph.* Vitemb. 1543), and Calvin (*Praelect. in Dan.* Geneva, 1563, &c.; in French, 1565; in English, 1852-3)—wrote on Daniel; and Rosenmüller enumerates nearly fifty other special commentators, and his list requires considerable additions. The combination of the Revelations of Daniel and St. John (Sir I. Newton, *Observations upon the Prophecies*, &c., Lond. 1733; M. F. Roos, *Ausl. d. Weissag. Dan.* u.s.w., Leipz. 1771) opened the way to a truer understanding of Daniel; but the edition of Bertholdt (*Daniel, aus dem Hebr.-Aram. neu übersetzt und erklärt*, u.s.w., Erlangen, 1806-8), in spite of all its grave faults, marks the beginning of a new era in the study of the Book. Bertholdt was decidedly unfavourable to its authenticity; and he has been followed on the same side by Von Lengerke (*D. B. Dan. verd. u. ausgcl.* Königsb. 1835), Maurer (*Comm. Gramm. Crit.* ii. Lips. 1838), Hitzig (*Kurzgef. Exeg. Handb.* Leipz. 1850), Bleek (*Einkl. var. edd.*), Lübsch (*Versuch einer vollständ. Einkl. u.s.w.*, 2te Aufl., Bonn 1852), De Wette (*Einkl. var. edd.*), Meinhold (works cited). On the other hand, the authenticity is affirmed more or less absolutely by Hävernick (*Comm. üb. d. B. Dan.* Hamb. 1832), Auerlen (*Der Proph. Dan. u. d. Offenbarung Joh. u.s.w.*, 2te Aufl., Basel 1857, translated into English from the 1st ed. by A. Saphir, 1856), Hengstenberg (*Die Authentie d. Dan. . . . erwiesen*, 1831, translated by E. B. Pratten, Edinb.), Hävernick (*Neue krit. Untersuchung.* Hamb. 1838), Delitzsch (*Herzog's RE.*; in *RE.* his views approximate to the other school), Keil (*Lehrb. d. Einkl. in d. A. T.*, Frankf. 1853), Pusey (*Daniel the Prophet*, var. edd.), *Speaker's Comm.*, the commentaries of Zündel, Kranichfeld, and Kliefoth, mentioned in Zöckler's work, Kaulen (*Einkl. in d. heilige Schrift A. u. N. T.* p. 328 sq.), Cornely (*Historia et critica Introductio in utriusque Testamenti Libros sacros*, ii. 2, p. 466 sq., who gives a list of R. C. writers); Knabenhauer (*Comm. in Daniele*, Paris 1891), and Fabre d'Enviu (*Le Livre du Prophète Daniel*, 1890). Essays on special points are supplied by T. R. Birks—*The four prophetic Empires*, &c., 1844, and *The two later Visions of Daniel*, &c., 1846; E. B. Elliott, *Horae Apocalypticæ*, 1844; S. P. Tregelles, *Remarks on the prophetic Visions of Daniel*, 1852; Desprez, *Daniel or the Apoc. of the O. T.*, 1865; Payne Smith, *Dan. i.-vi.*, 1889; Lagarde (v. Havet), *GGA.* xiv. 1891. [B. F. W.] [F.]

DANIEL, APOCRYPHAL ADDITIONS TO. The Greek translations of Daniel, like that of Esther, contain several pieces which are not found in the original text, but are accepted as canonical by the Roman Catholic Church (Cornely and Kaulen). The most important of these additions are contained in the Apocrypha of the English Bible under the titles *The Song of the Three Holy Children*, *The History of Susanna*, and *The History of . . . Bel and the Dragon*.

1. a. The first of these pieces is incorporated into the narrative of Daniel. After the three confessors were thrown into the furnace (Dan. iii. 23), Azarias is represented praying to God for deliverance (*Song of Three Children*, vv. 3-22); and in answer the Angel of the Lord shields them from the fire which consumes their enemies (vv. 23-27), whereupon "the three, as out of one mouth," raise a triumphant song (vv. 29-68),

drawn largely from the Psalter, of which a chief part (vv. 35-66) has been used as a hymn (the *Benedicite*) in the Christian Church since the 4th century (Rufin. *Apol.* ii. 35; cp. *Concil. Tolet.* iv. Can. 14). Like several similar fragments, the chief parts of this composition are given at the end of the Psalter in the Alexandrine MS. as separate psalms, under the titles "The Prayer of Azarias" and "The Hymn of our Fathers;" and a similar arrangement occurs in other Greek and Latin Psalters. Ball gives numerous illustrations from Talmudic and Midrashic literature, showing that the conception of a deliverance from a fiery furnace was traditional among the Jews from very early times (*Speaker's Comm.*, Apocrypha, 'Introduction to the Song of the Three Children,' ii. 305-7).

b. The two other pieces appear more distinctly as appendices, and offer no semblance of forming part of the original text. *The History of Susanna* is generally found at the beginning of the Book (Gk. MSS.; Vet. Lat.); though it also occurs after the 12th chapter (Vulg. ed. Compl.). Another name given to this piece, "The judgment of Daniel," expresses clearly the point of the story. Ball considers it a traditional history or Jewish Haggadah (Bertholdt), and (after Brüll, *Das apokryph. Susanna-Buch*, in the 'Jahrb. f. Jüdische Geschichte u. Litteratur,' 1879) an Anti-Sadducean Tendency-schrift of B.C. 94-89, partly based upon Jer. xix. 20-23 (*Speaker's Comm.*, Apocrypha, 'Introduct. to the Hist. of Susanna,' pp. 325, &c.); but Zöckler (Strack n. Zöckler's *Kgf. Komm.* 'Die Apokryphen d. A. T.' p. 215, 1891) shows that this cannot be pressed.

The History of Bel and the Dragon is placed at the end of the Book; and in the LXX. Version it bears a special heading as "part of the prophecy of Habakkuk" (ἐκ προφητείας Ἀββακούμ νιού Ἰησοῦ ἐκ τῆς φυλῆς Λευί), which would seem to indicate that it was an extract from a pseud-epigraphic writing attributed to that Prophet (Fritzsche). Ball finds the nucleus of this story in Jer. li. 34, 44, afterwards developed by the Haggadah in its own fashion, but also illustrating that Prophet's own moral of the utter futility of idols, and the sole sovereignty of the God of Israel (*Speaker's Comm.*, Apocrypha, 'Introduction to Bel and the Dragon,' pp. 345-6). It is not uninteresting to compare this Apocryphal work with the legend of the contest between Bel and the Dragon preserved in the cuneiform tablets. Jewish authors in Babylon would hardly be ignorant of the popular Babylonian legends, even if it be thought improbable that the coincidences between these accounts were "hardly accidental" (Bail, pp. 347-8).

2. The additions are found in both the Greek texts—the LXX. and Theodotion, in the Old Latin and Vulgate, and in the existing Syriac and Arabic Versions. On the other hand, there is no evidence that they ever formed part of the Hebrew text, and they were originally wanting in the Syriac (Polychronius, *ap. Mai, Script. Vett. Nov. Coll.* i. p. 113, says of the hymn expressly οὐ κεῖται ἐν τοῖς ἑβραϊκαῖς ἢ ἐν τοῖς συριακοῖς βιβλίοις). From the LXX. and Vulgate the fragments passed into common use, and they are commonly quoted by Greek and Latin Fathers as parts of Daniel (Clem. Alex. *Ecl. proph.* i.; Orig. *Ep. ad Afric.*; Tertull. *de Pudic.* 17, &c.),

but rejected by those who adhered to the Hebrew canon. Jerome in particular called attention to their absence from the Hebrew Bible (*Praef. in Dan.*), and instead of any commentary of his own adds shortly Origen's remarks "on the fables of Bel and Susanna" (*Comm. in Dan.* xiii. 1). In a similar manner he notices shortly the Song of the Three Children, "lest he should seem to have overlooked it" (*Comm. in Dan.* iii. 23).

3. Various conjectures have been made as to the origin of the additions. It has been supposed that they were derived from Hebrew or Aramaic originals. Kaulen (*Einkl. in d. heil. Schrift A. u. N. T. ii.* § 395 [see his reff.]) and Cornely (*Historica et critica Introductio in utriusque Testamenti Libros sacros*, ii. 2, p. 499 sq.) give the substance of the arguments, and Ball affirms them afresh, but the evidence is intricate, and insufficient to establish the point (Bisell, *The Apocrypha of the O. T.* p. 442 sq.; Zückler, p. 215). The character of the additions themselves indicates rather the hand of an Alexandrine writer; and it is not unlikely that the translator of Daniel wrought up traditions which were already current, and appended them to his work (cp. Fritzsche, *Exeg. Handb. zu den Apok.* i. 121). The abruptness of the narrative in Daniel furnished an occasion for the introduction of the prayer and hymn; and the story of the Dragon seems like a strange exaggeration of the record of the deliverance of Daniel (*Dan.* vi.), which may naturally have formed the basis of different legends. Nor is it difficult to see in the History of Susanna a pointed allusion to the name of the Prophet, though the narrative may not be wholly fictitious.

4. The LXX. appears to be the original source from which all the existing recensions of the fragments were derived (cp. Hody, *de Bibl. Text.* p. 583). Theodotion seems to have done little more than transcribe the LXX. text with improvements in style and language, which are considerably greater in the appended narratives than in the Song incorporated into the canonical text. Thus while the History of Susanna and Bel and the Dragon contain large additions which complete and embellish the story (e.g. *Hist. Sua.* vv. 15-18; 20, 21; 24-27; 46, 47, 49, 50; *Bel. & Dr.* vv. 1, 9-13; *Eichh.* pp. 431 sq.), the text of the Song is little more than a repetition of that of the LXX. (cp. *De Magistria, Daniel, &c.*, pp. 234 sq.; *Eichh. Einkl. in d. Apok. Schrift.* 422 sq.). The Polyglott-Syriac, Arabic, and Latin Versions are derived from Theodotion; and the Hexaplar-Syriac from the LXX. (*Eichh.* p. 430, &c.).

5. The stories of Bel and Susanna received various embellishments in later times, which throw some light upon the manner in which they were originally composed (cp. *Orig. Ep. ad Afric.* §§ 7, 8; Bochart, *Hieroz.* iii. 3; *Eichh.* p. 446, &c.); just as the change which Theodotion introduced into the narrative of Bel, to give some consistency to the facts, illustrates the rationalising process through which the legends passed (cp. Delitzsch, *De Iiabacuci vitâ et ætate*, 1844). It is thus useless to institute any inquiry into the historic foundation which lies below the popular traditions; for though the stories cannot be regarded as mere fables, it is evident that a moral purpose determined the shape which they assumed. A later age found

in them traces of a deeper wisdom, and to Christian commentators Susanna appeared as a type of the true Church tempted to infidelity by Jew and Pagan, and lifting up her voice to God in the midst of persecution (*Hippol. In Susanna.* pp. 689 sq., ed. Migne). [B. F. W.] [F.]

DANITES, THE (דָּנִיטִים: B. δ Δανῆς, A. δ Δάν [Judg. xiii. 2]; BA. δ Δάν [Judg. xviii. 1, 11]; B. of Δανειρά, NA. -r- [1 Ch. xii. 35]; Dan). The descendants of Dan, and members of his tribe. [W. A. W.] [F.]

DAN-JA'AN (דָּן יָאָן: B. Δάν Εἰδών καὶ Οὐδών; A. Δάν 'Iapán καὶ 'Ioubán; Lucian, Δάν: Dan silvestria), a place named only in 3 Sam. xxiv. 6 as one of the points visited by Joab in taking the census of the people. It occurs between Gilead and Zidon—and therefore may have been somewhere in the direction of Dan (Laiish), at the sources of the Jordan. The reading of the LXX. (Alex.) and of the Vulg. was evidently דָּן יָאָן, Dan-jaar, the nearest translation of which is "Dan in the wood." This reading is approved by Gesenius, and agrees with the character of the country about Tell el-Kady. Driver (*Notes on the Heb. Text of the B.B. of Samuel*, in loco) corrects the reading of the passage as follows: יבאו דן ויבאו סבבך אל יצירן. There seems no reason for doubting that the well-known Dan is intended. We have no record of any other Dan in the north; and even if this were not the case, Dan, as the accepted northern limit of the nation, was too important a place to escape mention in such a list as that in the text. Dr. Schultz, formerly Prussian Consul at Jerusalem, discovered an ancient site called Δῶ. Δάνιαν, in the mountains about two miles E. of Rās en Nákurah, south of Tyre, which he proposes to identify with Dan-jaan (Van de Velde, *Memoir*, 306); Major Conder (*Hbk. to Bible*, p. 408) holds the same view. [G.] [W.]

DAN'NAH (דָּן נָח, depression, low ground, Ges.; B. 'Pervá; Danna). A city in the mountains of Judah (*Josh.* xv. 49), and according to Dillmann² not yet identified. It is mentioned with Debir and Socoh, and may perhaps be identified with Idhna (إدنا), the Jedna men-

tioned by Eusebius (*OS.* p. 268, 30) as being six miles from Eleutheropolis on the road to Hebron. It lies S. of Wady el-Afranj (*PEP. Mem.* iii. 305). [G.] [W.]

DAPH'NE (Δάφνη; Daphne), a celebrated grove and sanctuary of Apollo, near Antioch in Syria [ANTIOCH]. Its establishment, like that of the city, was due to Seleucus Nicator. The distance between the two places was about five miles, and in history they are associated most intimately together. Just as Antioch was frequently called 'A. ἑπὶ Δάφνῃ, and ἡ πόλις Δάφνην, so conversely we find Daphne entitled Δ. ἡ πρὸς Ἀντιόχειαν (*Joseph. B. J.* i. 12, § 5). The situation was of extreme natural beauty, with perennial fountains and abundant wood. Seleucus localised here, and appropriated to himself and his family the fables of Apollo and the river Penens and the nymph Daphne. Here he erected a magnificent temple and colossal

statue of the god. The succeeding Seleucid monarchs, especially Antiochus Epiphanes, embellished the place still further. Among other honours, it possessed the privileges of an asylum. It is in this character that the place is mentioned in 2 Macc. iv. 33. In the reign of Antiochus Epiphanes (B.C. 171) the aged and patriotic high-priest Onias, having rebuked Menelaus for his sacrilege at Jerusalem, took refuge at Daphne; * whence he was treacherously brought out, at the instance of Menelaus, and murdered by Andronicus, who was governor of Antioch during the king's absence on a campaign. Josephus does not give this account of the death of Onias (*Ant.* xii. 5, § 1). When Syria became Roman, Daphne continued to be famous as a place of pilgrimage and vice (see Farrar's *Life of St. Paul* [pop. ed.], p. 163 sq.). "Daphnic mores" was a proverb (see Gibbon's *Roman Empire*, ch. xxiii.). The beginning of the decay of Daphne must be dated from the time of Julian, when Christianity in the Empire began to triumph over Heathenism. The site has been well identified by Pococke and other travellers at *Beit el-Mâ*, "the House of the Water," on the left bank of the Orontes, to the S.W. of Antioch, and on higher ground; where the fountains and the wild fragrant vegetation are in harmony with all that we read of the natural characteristics of Apollo's sanctuary (*Dict. of Gr. and Rom. Geog.*, art. Daphne; Müller, *De Ant. Antiochenis*.) The Greek inscription of the date B.C. 189 relating to the worship of Apollo and Artemis at Daphne, and referred to in the Amer. ed. of the *D. B.*, has been translated and published in the *Journ. of the American Oriental Society*, vi. 550-5; vii. p. xlv.

DARA (דָּרָא; BA. Δαρά; Dara), 1 Ch. ii. 6. [DARDA.]

DARDA (דָּרְדָּא; B. Δαρδά; A. τὸν Δάρδα; Joseph. Δάρδαρος; Dorda), a son of Mahol, one of four men of great fame for their wisdom, but who were excelled by Solomon (1 K. iv. 31, LXX. v. 27; Heb. v. 11). Ethan, the first of the four, is called "the Ezrahite;" but it is uncertain whether the designation extends to the others. [ETHAN.] In 1 Ch. ii. 6, however, the same four names occur again as "sons of Zerah," of the great family of Pharez in the tribe of Judah, with the slight difference that Darda appears as Dara. The identity of these persons with those in 1 K. iv. is still debated (see the arguments on both sides in the *Speaker's Comm.* and in Strack u. Zöckler's *Kurzgef. Komm.*). In favour of their identity:—

(1.) A great number of Hebr. MSS. read Darda in Ch. (Davidson, *Hebr. Text*, p. 210), in which they are followed by the Targum and the Syriac and Arabic Versions. [DARA.]

(2.) The son of Zerah would be without difficulty called in Hebrew the Ezrahite, the change depending merely on the position of a vowel-point. [EZRAHITE.] And further, the change is actually made by the Targum Jonathan, which in Kings has "son of Zerah."

* According to Jewish tradition, some of the Jews led into captivity were settled at Daphne (*Jer. Talm. Shab. vi. 4*).

(3.) The word "son" is used in Hebrew so often to denote a descendant beyond the first generation, that no stress can be laid on the "son of Mahol," as compared with "son of Zerah." For instance, of the five "sons of Judah" in 1 Ch. iv. 1, the first was really Judah's son, the second his grandson, the third his great-grandson, and the fourth and fifth still later descendants. Further, some conjecture that "*Bene Mahol*" means "sons of the choir;" in which case the men in question were the famous musicians, two of whom are named in the titles to Psa. lxxxviii. and lxxxix. [MAHOL.]

It must, however, be added, that these arguments do not command universal acceptance, and it is best, with Riehm (*HWB. s. n. Heman*) to consider the identity uncertain. [G.] [F.]

DARIC (דָּרִיק; only in pl. דָּרִיקִים; Talm. דָּרִיקִים; χρυσοὺς; *solidus, drachma*: Ezra ii. 69, viii. 27; Neh. viii. 70, 71, 72; 1 Ch. xxix. 7), a gold coin current in Palestine after the return from Babylon. That the Hebrew word is, at the time mentioned, the name of a coin, although it may have been originally that of a weight, is evident from its identity with the Greek name of the only Persian gold coin of the time, the *Δαρεικός*, or *στατήρ Δαρεικός*. The origin of the word is obscure. It has been derived in the Greek form from the name of Darius Hystaspis, the first Persian monarch known to have struck gold or money of any metal. The name Darius however, in Achaemenian Persian, *Dāryava(h)ush*, when confronted with the Hebrew forms, forbids this derivation (but cf. G. Hoffmann, *Zeitsch. f. Assyriologie*, ii. 49 sq.). M. Oppert and M. V. Revillout identify it with the Assyro-Babylonian דָּרַג *darag mana*, "degree (i.e. $\frac{1}{2}$) of the mina" (*Ann. de Num.* 1884, p. 119; Head, *Historia Nummorum*, p. 698). Possibly the word is Aramaic. This was the usual language of the coins of the satraps, and seems to have been that of commerce under the Achaemenian kings, and even under the Assyrian Sargonids. The Syriac form, ܕܪܝܩܐ, was used in the vulgar language in the time of Barhebraeus, 13th century A.D., to designate the current gold coin, the dinár of the Arabs (Castell. *Lex. Syr.*, ed. Michaelis, s. v.).

The Daric weighs 130 grs. or the 60th of the light Babylonian or Assyrian gold mina. It appears that the Hebrew shekel of gold, which seems to have been only a weight, was identical with the Daric. Thus the use of the term in 1 Ch. xxix. 7 prophetically would be accurate. The usual type represents the King of Persia as an archer (see illustration). The double Daric is supposed to have been issued by Alexander after the conquest of Asia. (On the whole subject, see Head, *op. cit.* pp. 698 sqq.) [R. S. P.]

Gold Daric. (British Museum. Actual size.)

DARIUS (דָּרִיּוּשׁ; Old Persian, *Dāryavaush*; Median, *Tāriyamauš* [= *Dariyavaush*];

Babylonian, *Dariamuš* [= *Dariamush*], *Dāruyā-mišu* [= *Dāruyānushu*], *Dāruēšu*, *Darius*, &c.; LXX. *Δαρείος*; Xen. *Hell.* ii. 1, 9, *Δαρείου* [Nothus]; Strabo, xvi. 785, *ὁ Δαρείου*: Persian, *داراب*, *داریاب*, the name of several kings of Persia and Media. Herodotus (vi. 98) says that the name is equivalent to *ἐρξίτης*, i.e. "doer" or "driver." It has also been compared with the Persian *dār*, "possessor," from *dashtan*, "to possess," and *dara* or *darab*, "king." Three kings bearing this name are mentioned in the O. T.

1. DARIUS THE MEDE (*דָּרְיֹוֹשׁ הַמֶּדִּי*, Dan. xi. 1, Chald. *ܕܪܝܐܫܐ ܕܡܕܝܐ* [*Kethib*], *ܕܪܝܐܫܐ ܕܟܪܝܐ* [*Keri*], vi. 1 = v. 31), "the son of Ahasuerus (= Xerxes) of the seed of the Medes," who succeeded to the Babylonian kingdom after Belshazzar's violent death [BELSHAZZAR], being then sixty-two years old (Dan. v. 31 = vi. 1; ix. 1). The first year only of his reign is mentioned (Dan. ix. 1; xi. 1), but it seems to have been a very important one for Daniel and the Jews, the prophet being advanced by Darius the Mede to a very high dignity (Dan. vi. 1 sq.); namely, that of "one" (R. V.) of the three presidents which were placed over the hundred and twenty satraps; and Darius, after Daniel's miraculous deliverance, issued a decree enjoining "reverence for the God of Daniel" throughout his dominions.

Various attempts have been made to identify Darius the Mede. He has been regarded as the same as Darius Hystaspis; or as Cyaxares II., "the son and successor of Astyages" (Josephus, *Ant.* x. 11, § 4; Bertholdt; Von Lengerke; Auberlen, *Daniel und d. Offenbarung*, &c.); or as Astyages himself, the last king of the Medes (Winer, *RWB.* s. v.; Niebuhr, *Gesch. Ass. u. Bab.* pp. 45, 92). All these identifications, however, may be passed over, as they do not agree with the history of the last days of the native kings of Babylonia, as related in the native chronicles.

In determining who Darius the Mede was, it is needful to note certain of the more prominent points as related or indicated in the Book of Daniel. This ruler is there said to have "re-

ceived" (*קָבַץ*) the kingdom (cp. Dan. vii. 18, where the saints of the Most High are said to do the same thing), an expression which would imply acting for another. It is also said that Darius the Mede appointed satraps throughout the whole kingdom. His first year only is mentioned, and at the end of the sixth chapter of Daniel these words occur: "So this Daniel prospered in the reign of Darius, and in the reign of Cyrus the Persian." All these statements, it is to be noted, agree fairly well with what the Babylonian Chronicle relates of Cyrus's general Gobryas. We there find that Gobryas was governor of Gutium; that he descended, with the army of Cyrus, to Babylon, on the 16th of Tammuz; that Cyrus arrived later (on the 3rd of Marcheswan); and that Gobryas, Cyrus's governor, appointed governors in Babylon. Gobryas seems to have been concerned also in the attack which resulted in Belshazzar's death [BELSHAZZAR]. It is evident from the Babylonian Chronicle, that Gobryas was endowed by Cyrus with great power—that he

was practically his viceroy. The Jewish writers of late times therefore looked upon him as being in the same position as Belshazzar, whom they (though with better reason) also regarded as king. As Gobryas preceded Cyrus, so he may be regarded as having "received" the kingdom on his behalf; and as, after Cyrus's arrival, the latter immediately assumed the reins of government, Gobryas could only have been regarded as "reigning" during a portion of one year,* and the mention of Cyrus at the end of the sixth chapter of Daniel is therefore quite natural. The substitution of "Darius the Mede" for Gobryas of Gutium,^b probably rests upon a confusion of names in the mind of the Hebrew scribe, or it may arise from Gobryas having borne the name of Darius as well. Confusion on account of the likeness between the two names is hardly possible, the Babylonian form of the name Darius being *Dariacus* (Heb. *Daryavesesh*), and that of the name Gobryas being *Ugbaru* and *Gubaru*: confusion would, in fact, only be likely in the case that the scribe was better acquainted with the Greek than with the Babylonian forms of these two names. Whether the name Darius, applied to the conqueror of Babylon in Daniel, is due to the fact that Darius Hystaspis conquered Babylon, is doubtful. Darius Hystaspis was not a Mede, but a Persian; he was not the son of Xerxes, but of Hystaspes; and he was not sixty-two years old when he began to rule over Babylon, but about thirty-three. Whatever confusion, therefore, the Hebrew scribe may have made with regard to the name, there is hardly any doubt that he intended to describe Cyrus's general, Gobryas, under the name of Darius the Mede. [T. G. P.]

2. DARIUS, the son of HYSTASPES (*Ψάτσης*). This ruler, the fifth in descent from Achaemenes (*Hakhāmanish*), was the founder of the Persian dynasty, of which he calls himself the ninth king, apparently regarding his genealogy, "in a double line" (Behistun Inscription) as follows:—

ACHAEMENES

1. Teispes

2 and 3 Cyrus I.	Ariaramnes
4 and 5 Cambyses I.	Aršames
6 and 7 Cyrus II.	Hystaspes
8 and 9 Cambyses II.	Darius.

Darius's father, grandfather, and great-grandfather, however, were not really kings, but only satraps—Hystaspes, Darius's father, holding that rank in Persia, and being, therefore, really subject to his son, for whom he fought in Parthia.

According to the popular legend (Herod. i.

* It is possible, however, that this only implies Gobryas's early death or retirement. If we accept the explanation here proposed, "Darius the Mede" was already advanced in years when he took Babylon (Dan. v. 31).

^b It seems probable that Gutium is another name for Media, or the name of the tract in which Media lay. Prof. Sayce, *Herodotus*, p. 357, makes Media to be the eastern boundary of this province.

209, 210), Darius was already, when young, marked out for empire, Cyrus having had a dream concerning him indicating this. Darius afterwards attended Cyrus's son and successor, Cambyses, in Egypt as one of his body-guard. Upon the detection of the imposture of the Magian Gomates (Bardes or Smerdis), who seized the throne after Cambyses' death, Darius went to Susa just as the conspiracy against the usurper was being formed, and by his advice the death of Gomates was resolved upon without delay and accomplished.* A monarchy being decided upon by the Persian chiefs who had taken part in the conspiracy, it was agreed that he whose horse first greeted the rising sun by neighing should be king. Darius's horse having been the first to do this, his lucky possessor was proclaimed king B.C. 521.

The death of the Magian, however, did not by any means leave a clear field for the new ruler of the vast Persian empire. First Babylonia, under Nidintu-Bel and afterwards under Arakhu, then Persia, Susia, Media, Assyria, Egypt, Parthia, Margiana, Sattagydia, and Scythia, in turn fell away from him. With the help of his faithful generals, however, all the pretenders—nine in number—were at last disposed of, not without much bloodshed and some cruelty on the part of the conqueror. Nineteen battles had to be fought ere Darius could say that "the land was his."⁴

Having thus firmly seated himself on the throne, and made the possession of it more sure by marrying Cyrus's two daughters, Atossa and Artystene, Parmys, the daughter of Cyrus's son Smerdis, and Phaedime, daughter of Otanes, one of the seven who had conspired with him to murder the usurper Gomates, he began to set the affairs of the empire in order. He first divided the land owning his away into twenty satrapies, assigning to each a certain amount.

The successes of Cambyses in Africa were to be followed, during the reign of Darius, by Persian conquests in Europe. The way for this had already been paved by the death of Polycrates at the hands of Oroctes; for Polycrates, at the head of the great naval power which he had created, could easily have contested with Persia the possession of the Aegean. Meandrius, his ancessor, who had taken possession of the throne, was ousted in consequence of treachery by Otanes; and Syloson, tyrant of Samos, who had been banished by Polycrates, was restored. Through this, Byzantium and Thracian Chersonesus were subjugated. Darius now determined to extend his conquests as far as the Danube; his object being, according to Herodotus, to avenge the incursions made by the Scythians in the time of Cyazares. It is more probable, however, that this expedition was undertaken simply from lust of conquest.

Mandrocles was commanded, therefore, to build a bridge across the Bosphorus; and this was done to the satisfaction of Darius,* who

crossed with his army (B.C. 513), whilst the fleet of the Greeks, acting in concert, sailed to the Danube. Meanwhile, the land army marched away from the coast, meeting with no resistance until they passed the heights of the Balkans. After the whole army had crossed the Danube, Darius wished to destroy the bridge; but as he was advised by Coes not to do so, it was allowed to remain. Darius's army being unable to bring the Scolati, the chief tribe concerned, to an engagement, and deciding to retreat, got away unobserved by the enemy by the ruse of leaving the camp, with the sick and the beasts of burthen, by night. Returning to the bridge, Darius found that a part only had been taken away by the Greeks. This having been restored, the army safely reached the eastern shore. Darius is said to have lost 80,000 men on this expedition (Otesias). Some of the Greek cities, including Byzantium, having rebelled, Darius allowed part of his army, under Megalysus, to remain on the European shore for the purpose of reducing them again to subjection. Otanes besieged those on the Asiatic shore, and captured Chalcedon and Byzantium, whose exiles afterwards founded Meseimbria.

Bactria, Arachosia, Asia Minor, and Egypt remained loyal at a time when Semites and Aryans, including even his own people, the Persians, fell away from him; and for Darius to have kept Egypt faithful says much for the policy of the Persian rulers, who, taking care to respect the religion of subject nations, won not only their confidence, but also their sympathy. Such was Darius's policy, and for this reason he was so highly honoured by the Egyptians that they affected to consider him, even in his lifetime, as a god. From the valley of the Nile, therefore, in the autumn of the year in which he had marched to the Danube, a second Persian expedition set out, army and fleet, to extend the Persian rule on the north coast of Africa. This expedition was directed against the Libyans and other tribes in the neighbourhood who had agreed to pay tribute to Cambyaes. A pretext to attack these was found in the person of Pheretina of Barca, whose son, "in return for fidelity to Persia," had been slain by some of his own subjects, who alleged that he had treated them cruelly. The army which set out from Memphis was commanded by a Persian named Amasis, who invested Barca, but met with a vigorous resistance. The city was at last only taken by a ruse, and a number of prisoners fell into the hands of the Persians, by whom they were carried to Bactria, where they founded a city, to which they gave the name of Barca, and which still existed in Herodotus's time.

Monuments and inscriptions prove that much more than this solitary city was subdued by the army of Darius; indeed, the region subjected must have included the tract as far as the oases on the northern edge of the desert. The inscription of the tomb of Darius, Naksh-i-Rustem, quotes among the nations who were his subjects the Butiya (Put = Libyans), the Machiya (Muxyes?), and Kushiya (Cushites or Ethiopians).

Whilst the Persian army was marching west-

crossing it, Darius on his throne, and a dedicatory inscription.

* At Sikayanvallah, in the province of Nisāya (in Media).

⁴ A favourite expression of Darius in the Behistun Inscription is, "After that the land was mine."

* Mandrocles, to commemorate his work, caused a picture to be dedicated to Hera of Samos. This consisted of a representation of the bridge, the army

wards along the southern coast of the Mediterranean, Megabyzus was moving in the same direction along the northern shores (B.C. 512). Perinthus and the cities on the northern shore of the Propontis were reduced and punished, and Herodotus says that Darius gave orders for the reduction of Thrace, which was done. The Paeonians were also made to submit, and many other cities of the Greeks on this coast became subjects of Darius.

Marching on, Megabyzus tried to get the Macedonians to submit, and they agreed to do so. The Persian envoys, however, having tried, in their cups, to outrage the women of the royal house, were at once cut down. Megabyzus, finding that they did not return, sent his son Bubaras with a force, but an arrangement was come to by which the daughter of Amyntas, king of Macedonia, was given in marriage to Bubares, and a large sum paid as a kind of com-

pensation. Otanes completed the subjection of the rebellious Greeks on the south of the straits.

After the expedition across the Danube, Darius intended to carry his conquests to the west of Europe, Hellas being the conquest for which Megabyzus and Otanes were preparing the way. To this end, being unable to trust the Greeks, he sent fifteen Persians to examine the coasts of Greece, accompanied by Democedes, his Greek physician. Having made a kind of map of the coast, they went from Hellas to lower Italy; and at Tarentum Democedes succeeded in escaping, and reached Crotana, his native place, whose inhabitants refused to give him up. The Persians were afterwards driven to Iapygia, where they were captured and enslaved, but were ransomed by Gillus. The main object, however, was attained, Persians having been made acquainted with the coast of Greece. In the expedition which followed, the forces of

Tomb of Darius.

Darius had at first some success, but the army which he sent was apparently not numerous enough for such an undertaking as the conquest of Greece, and the final result was the complete defeat of the Persians at the battle of Marathon. Being, however, of opinion that he could subdue the country, he called out the whole force of his empire. For three years preparations were made, at the end of which time a rebellion occurred in Egypt. Darius only redoubled his ardour, resolving to reduce both Greece and Egypt to subjection at the same time. A fresh complication, however, arose, in a dispute between his two sons, Ariabignes and Xerxes, as to which should be his successor. After having designated the latter as the future king of Persia, he hastened to set his troops in motion, but died before anything in the way of conquest was done either in Egypt or Greece, after a reign of thirty-six years, according to Herodotus—a

length of time which the contract-tablets of Babylonia indicate as being correct—against the thirty-one years mentioned by Ctesias (B.C. 484).

The perseverance of Darius had succeeded in re-establishing and extending the kingdom of Cyrus. On the W. he had reached Mount Olympus and the great Syrtia; on the E. he had reached the Indus; on the N., the Caucasus and Jaxartes; on the S., Arabia and the negroes above Nubia. To this vast empire, which exceeded in extent that of the Assyrians, he set himself to give a regular administration. Tribute came to Persia from every side, and the Persians were proud of their state and king, the more especially so that they were not only free from taxes, but were entitled, at certain periods, to largess from the king, and were thus rewarded for their help in governing. In accordance with the policy of the Persian kings, subject nations were not interfered with more

than was necessary, and this explains the general contentment, not only of Egypt, but also, after the suppression of the rebellions in the provinces, of all the other dependants of the empire. The creation of really good roads, the formation of posts to and from all parts of the empire by means of relays of horses and riders, and the creation of a uniform currency, are among the acts of Darius's wise reign. The splendid palace at Persepolis, and the inscription at Behistun, with its three versions of his suppression of the revolts in the provinces and its elaborate sculptures, are probably among the most noteworthy mementoes of his reign.

During the reign of Darius the Jews prospered as they had done under Cyrus, whom they had welcomed as their deliverer, and who had given them permission to rebuild the Temple at Jerusalem (Ezra i. 1 sq.). This permission, withdrawn by Artaxerxes (Ezra iv. 17 sq.), was renewed by Darius in his second year, B.C. 519, when it came to the king's knowledge that the work had been resumed by the encouragement of Haggai and Zechariah (Hag. i. 1, ii. 1, 10; Ezra v. 1 sq.). The Temple was finished in four years (Ezra vi. 15), though it was apparently used before that time (Zech. vii. 1). Cp. the English translation of Duncker, *History of Antiquity*, vol. vi., and the translations of the Behistun Inscription in the *Records of the Past* (1st edit.), vols. i. and vii., and in Weisbach's *Achämenideninschriften*, *Zweiter Art* (Leipzig, 1890). [T. G. P.]

Behistun Inscription.

3. DARIUS THE PERSIAN (Neb. xii. 22, דָּרְיֹוֹס הַפָּרְסִי) may be identified with Darius II. Nothus (Ochus), king of Persia B.C. 424—405-4, if the whole passage in question was written by Nehemiah. If, however, the register of the Levites as the "recorded chiefs of the fathers," was continued to a later time, as is at present the general opinion, the occurrence of the name Jaddua (vv. 11, 22), who was high-priest at the time of the invasion of Alexander [ALEXANDER], points to Darius III. Codomannus, the antagonist of Alexander, son of Philip. This ruler, the last king of Persia, was raised to the throne after the murder of Arsēs, B.C. 336, and was overthrown by Alexander, B.C. 330. In 1 Macc. i. 1, he is called "king of the Persians and the Medes." He was a mild ruler and of excellent character. Cp. Jahn, *Archäol.* ii. 1, 272 sq.; Keil, *Bibl. Comm.*, 'Chronik . . . Nehemia,' &c., p. 495, who defends at length the identification with Nothus. [NEHEMIAH.] [B. F. W.] [T. G. P.]

4. DARIUS (NA. Δαριος, T. -ει-; Arius), a misreading for Arens, of the Lacedaemonians (1 Macc. xii. 7. *Speaker's Comm.* in loc.). [F.]

DARKNESS (חָשֶׁךְ, fem. form חֹשֶׁךְ, and with much variation in the vowel-points; σκοτος) is spoken of as encompassing the actual Presence of God, as that out of which He speaks; the envelope, as it were, of Divine glory (Ex. xx. 21; 1 K. viii. 12). The cloud symbol of His guidance offered an aspect of darkness to the enemy as of light to the people of Israel. In the description of His coming to judgment, darkness overreaching nature and blotting the sun, &c., is constantly included (Is. xiii. 9, 10; Joel ii. 31, iii. 15; Matt. xxiv. 29; Mark xiii. 24; Luke xxi. 25; Rev. vi. 12).

The plague of darkness in Egypt has been ascribed by various neologicistic commentators to non-miraculous agency, but no sufficient account of its intense degree, long duration, and limited area, as proceeding from any physical cause, has been given. The darkness ἐπὶ πᾶσαν τὴν γῆν of Matt. xxvii. 45 attending the Crucifixion has been similarly attributed to an eclipse. Phlegon of Tralles indeed mentions an eclipse of intense darkness, and which began at noon, combined, he says, in Bithynia, with an earthquake, which in the uncertain state of our chronology (see Clinton's *Fasti Romani*, Olymp. 202) more or less nearly synchronises with the event. Nor was the account one without reception in the early Church. See the testimonia to that effect collected by Whiston (*Testimony of Phlegon vindicated*, Lond. 1732). Origen, however, *ad loc.* (Latin commentary on St. Matt.), denies the possibility of such a cause, arguing that by the fixed Paschal reckoning the moon must have been about full, and denying that Luke xiii. 45 by the words ἐκκορίστη ὁ ἥλιος* means to allege that fact as the cause. The genuineness of this commentary has been impeached, nor is its tenor consistent with Origen *adv. Cels.* p. 80; but the argument, unless on such an assumption as that mentioned below, seems decisive, and has ever since been adhered to. He limits πᾶσαν τὴν γῆν to Judaea. Dean Alford (*in loco*), though without stating his reason, prefers the wider interpretation of all the earth's surface on which it would naturally have been day. That Phlegon's darkness, perceived so intense in Tralles and Bithynia, was felt in Judaea, is highly probable; and the Evangelist's testimony to similar phenomena of a coincident darkness and earthquake, taken in connexion with the near agreement of time, gives a probability to the supposition that the former speaks of the same circumstances as the latter. Wieseler (*Chron. Synop.* p. 388) however, and De Wette (*Comm.* on Matt.), consider the year of Phlegon's eclipse an impossible one for the Crucifixion, and reject that explanation of the darkness (see Edersheim, *The Life and Times of Jesus the Messiah*, ii. 603). The argument from the duration (3 hours) is also of great force; for an eclipse seldom lasts in great intensity more than 6 minutes. On the other hand, Seyffarth (*Chronolog. Savr.* p. 58, 9) maintains that the Jewish calendar, owing to their

* The reading now generally adopted is τοῦ ἡλίου ἐκλείποντος, R. V. "the sun's light failing." [F.]

following the sun, had become so far out that the moon might possibly have been at new; and thus, admitting the year as a possible epoch, revives the argument for the eclipse as the cause. He however views this rather as a natural basis than as a full account of the darkness, which in its degree at Jerusalem was still preternatural (*ib.* p. 138). The pamphlet of Whiston above quoted, and two by Dr. Sykes, *Dissertation on the Eclipse mentioned by Phlegon*, and *Defence of same*, Lond. 1733 and 1734, may be consulted as regards the statement of Phlegon.

Darkness is also, as in the expression "land of darkness," used for the state of the dead (Job x. 21, 22); and frequently figuratively, for ignorance and unbelief, as the privation of spiritual light (John i. 5; iii. 19). [H. H.]

DAR'KON (דַּרְקוֹן; *Δαρκων, Δορκων; Dercon*). Children of Darkon were among the "servants of Solomon," who returned from Babylon with Zerubbabel (Ezra ii. 56; Neh. vii. 58). [LOZON.] [W. A. W.]

DART. [ARMS.]

DATES. A. V. margin of 2 Ch. xxxi. 5 only. [PALM TREE.] In text, A. V. and R. V. "honey."

DATHAN (דָּתָן, of uncertain etymology, cp. Ges. *Thes.* on the one hand, and Olshausen, *Lehrb. d. Heb. Sprache*, §§ 215, 220, on the other; *Δαθάν; Dathan*), a Reubenite chieftain, son of Eliab, who joined the conspiracy of Korah the Levite (Num. xvi. 1, xxvi. 9; Deut. xi. 6; Ps. cvi. 17). [R. W. B.] [F.]

DA'THEMA (T. *Δαθέμα; A. and Josephus, Δαθέμα; N. Δαθαμά; Dathemi*), a fortress (*τὸ ὄχυρόμα; Jos. φρούριον*) in which the Jews of Gilead took refuge from the heathen (1 Macc. v. 9). Here they were relieved by Judas and Jonathan (v. 24), who, after the capture of Bosera, *Busrah*, made a night march (v. 29; cp. Josephus, *Ant.* xii. 8, § 3) and reached Dathema as Timotheus, the heathen general, was advancing to the assault (vv. 30-34). The reading of the Peshitto, *Rantha*, points to one of the Ramoths of Gilead, and a suitable site would be *Ranthesh*, on the *Haj* road, about 25 miles W. of *Busrah*. Ewald however (iv. 359, note) would correct this to *Dantha*, which he compares with *Dhami* or *Daneh* in the *Lejah*, but this place is much too far from *Busrah*, and the same remark applies to Ramoth-Gilead, with which it has been identified. [G.] [W.]

DAUGHTER (*Bath, בַּת*, contr. from בַּתֵּן, fem. of בָּן; *θυγάτηρ; filiā*). 1. The word is used in Scripture not only for daughter, but for grand-daughter or other female descendant, much in the same way and with like extent as בֶּן, son (Gen. xxiv. 48, xxxi. 43). [See CHILDREN; EDUCATION; WOMEN.]

2. In a kindred sense the female inhabitants of a place, a country, or the females of a particular race, are called "daughters" (Gen. vi. 2, xxvii. 46, xxviii. 6, xxxvi. 2; Num. xxv. 1; Deut. xxiii. 17; Is. iii. 16; Jer. xli. 11, xlix. 2, 3, 4; Luke xxiii. 28).

3. Women in general (Prov. xxxi. 29).

4. Those addicted to particular forms of idolatrous worship (1 Sam. i. 16; Mal. ii. 11).

5. The same notion of descent explains the phrase "daughters of music," *i.e.* singing birds (Eccles. xii. 4), and the use of the word for branches of a tree (Gen. xlix. 22), the pupil of the eye, *κόρη* (Lam. ii. 18; Ps. xvii. 8), and the expression "daughter of ninety years," to denote the age of Sarah (Gen. xvii. 17).

6. It is also used of cities in general, agreeably to their very common personification as belonging to the female sex (Is. x. 32, xlii. 12, xxxvii. 22, xlvii. 1, lii. 2; Jer. vi. 2, 26, ix. 1, xxxi. 4, xlvii. 11, 24, xlviii. 18, li. 33; Nah. iii. 4, 7; Zech. ix. 9; Ezek. xvi. 3, 44, 48, xlii. 4).

7. But more specifically of dependent towns or hamlets, while to the principal city the correlative "mother" is applied (Num. xxi. 25; Josh. xvii. 11, 16; Judg. i. 27; 1 Ch. vii. 28; 2 Sam. xx. 19).

Hazerim is the word most commonly employed for the "villages" lying round, and dependent on, a "city" (*יר*; *יָר*). But in one place *Bath* is used as if for something intermediate, in the case of the Philistine cities Ekron, Ashdod, and Gaza (Josh. xv. 45-7)—"her towns [R. V. marg., Heb. *daughters*] and her villages." Without this distinction from *Hazerim*, the word is also employed for Philistine towns in 1 Ch. xviii. 1—Gath; 2 Ch. xxviii. 18—Shocho, Timnath, and Gimzo. In Neh. ii. 25-31, the two terms are employed alternately, and to all appearance quite indiscriminately. [VILLAGE.] [H. W. P.]

DA'VID (דָּוִד, *דָּוִד* = *beloved*; * LXX. *Δαβ*; N. T. *Δαβίδ, Δαβελ*), the son of Jesse, is the best known to us of any of the characters in the O. T. In his case, as in that of St. Paul in the N. T., we have the advantage of comparing a detailed narrative of his life with undoubted works of his own composition, and the combined result is a knowledge of his personal character, such as we probably possess of no historical personage before the Christian era, with the exception of Cicero, and perhaps of Caesar.

The authorities for the life of David may be divided into six classes:—

I. The original Hebrew authorities:—

1. The Davidic portion of the Psalms,* including such fragments as are preserved to us from other sources, viz. 2 Sam.

* The shorter form is used everywhere in the earlier Books; indeed, everywhere except in 1 K. iii. 14, and in Ch., Ezra, Neh., Cant., Hosea, Amos, Ezek. xxiv. 22 [cp. Baer in loco, Heb. v. 24], and Zech., in which the longer form is found. Renan ("Des Noms Théophores Apocopes," in *REL.* No. 10 [1882], pp. 168-9) gives its signification as "le Favori de Lui." The Arabic form of the name, in common use, is *Daoud*. [Cp. the name Duda, a Canaanitish name found on the tablets of Tel-el-Amarna (*Records of the Past*, N.S. II. 60, 66).—F.]

^b In quoting the Psalms in connexion with the history, Dean Stanley was guided partly by the titles (as expressing the Jewish traditions), partly by the internal evidence, as verified by the judgment of the Hebrew scholars of his day (see his *Hist. of the Jewish Church*, pref. to Lect. xxi.). Opinions, sometimes agreeing, sometimes disagreeing with those of the Dean, will be found in the commentaries of Dellmisch and Perowne, but not in Cheyne, *Origin, &c., of the Psalter*.—F.

i. 19-27, iii. 33, 34, xii. 1-51, xxiii. 1-7.

[PSALMS.]

2. The "Chronicles" or "State-papers" of David (1 Ch. xxvii. 24), and the original biographies of David by Samuel, Gad, and Nathan (1 Ch. xxix. 29). These are lost, but portions of them no doubt are preserved in

3. The narrative of 1 Sam. xvi. to 1 K. ii. 10; with the supplementary notices contained in 1 Ch. xi. 1 to xxix. 30.

II. The two slight notices in the heathen historians, Nicolaus of Damascus in his *Universal History* (Jos. Ant. vii. 5, § 2), and Eusebius in his *History of the Kings of Judah* (Eus. *Præp. Ev.* ix. 30).

III. David's apocryphal writings, contained in Fabricius, *Codex Apocryphus V. Test.* pp. 906-1006. (1) Ps. cii., on his victory over Goliath. (2) Colloquies with God, on madness, on his temptation, and on the building of the Temple. (3) A charm against fire. Of these the first alone deserves any attention.

IV. The Jewish traditions, which may be divided into three classes:—

1. The additions to the Biblical narrative contained in Josephus, *Ant.* vi. 8—vii. 15.

2. The Hebrew traditions preserved in Jerome's *Quæstiones Hebraicæ in Libros Regum et Paralipomenon* (vol. lii., Venice ed.).

3. The Rabbinical traditions reported in Basnage, *Hist. des Juifs*, lib. v. c. 2; Calmet's *Dictionary* (David); Hamberger, *RE*, "David."

V. The Mussulman traditions, chiefly remark-

able for their extravagance, are contained in the Koran, ii. 250-252, xxxviii. 20-24, xli. 79-82, xlii. 15, and explained in Lane's *Selections from the Koran*, pp. 228-242; or amplified in Weil's *Legends*, Eng. Tr. pp. 152-170.

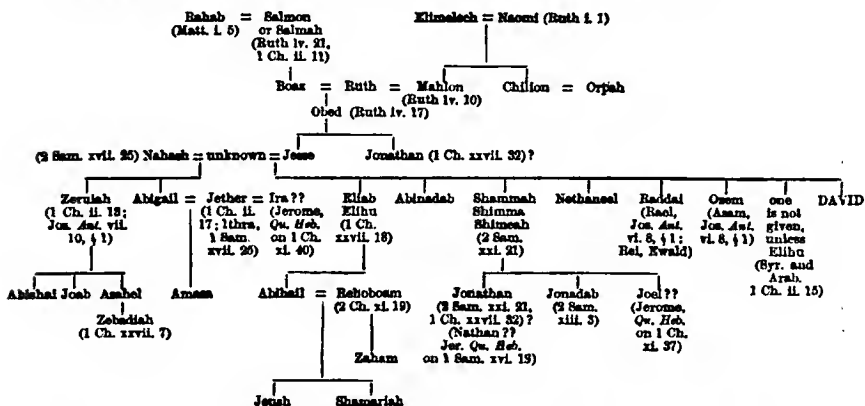

VI. In modern times his life has been often treated, both in separate treatises and in histories of Israel. Winer's article on David refers to monographs on almost every point in his life. In English, a well-known work is Dr. Chandler's *Life*, written in the last century; in French, De Choisi's, and that in Bayle's *Dictionary*. A recent and excellent treatment is that in Ewald's *Geschichte des Volkes Israel*, lii. 71-257. To these may be added the pages in Grätz, *Gesch. d. Juden*, i.; the Lectures (xxii.-iv.) in Stanley's *Hist. of the Jewish Church*; the articles and ref. in Herzog's, Riehm's, and Weltzer u. Welte's *Dictionaries*; C. Kingsley, *David*; W. J. Deane's *David, his Life and Times* ("Men of the Bible" series); and Edersheim, *Bible History*, vol. ii.

His life may be divided into three portions, more or less corresponding to the three old lost biographies by Samuel, Gad, and Nathan:—

I. His youth before his introduction to the court of Saul. II. His relations with Saul. III. His reign.

I. *The early life of David* contains in many important respects the antecedents of his future career.

1. Unlike most of the characters of the Scriptures, his family are well known to us by name, and are not without bearing on his subsequent career. They may best be seen in the form of a genealogy.

It thus appears that David was the youngest son, probably the youngest child, of a family of ten. His mother's name is unknown. His father, Jesse, was of a great age when David was still young (1 Sam. xvii. 12). His parents both lived till after his final rupture with Saul (1 Sam. xxii. 3). Through them David inherited several points which he never lost. (a) His connexion with Moab through his great-grandmother Ruth. This he kept up when he escaped to Moab and entrusted his aged parents to the care of the king (1 Sam. xxii. 3), and it may not have been without its use in keeping open a wider view in his mind and history than if he had been of purely Jewish descent. Such is

probably the design of the express mention of Ruth in the genealogy in Matt. i. 5.

(b) His birthplace, BETHLEHEM. His recollection of the well of Bethlehem is one of the most touching incidents of his later life (1 Ch. xi. 17). From the territory of Bethlehem, as from his own patrimony, he gave a property as a reward to Chimham, son of Barzillai (2 Sam. xix. 37, 38; Jer. xli. 17); and it is this connexion of David with Bethlehem that brought the place again in later times into universal fame, when Joseph went up to Bethlehem, "because he was of the house and lineage of David" (Luke ii. 4).

(c) His general connexion with the tribe of Judah. In none of the tribes does the tribal

feeling appear to have been stronger; and it must be borne in mind throughout the story both of his security amongst the hills of Judah during his flight from Saul, and of the early period of his reign at Hebron; as well as of the jealousy of the tribe at having lost their exclusive possession of him, which broke out in the revolt of Absalom.

(d) His relations to Zerniah and Abigail. Though called in 1 Ch. ii. 16, sisters of David, they are not expressly called the daughters of Jesse; and Abigail, in 2 Sam. xvii. 25, is called the daughter of Nahash. Is it too much to suppose that David's mother had been the wife or concubine* of Nahash, and then married by Jesse? This would agree with the difference of age between David and his sisters, and also (if Nahash was the same as the king of Ammon) with the kindnesses which David received first from Nahash (2 Sam. x. 2), and then from Shobi, son of Nahash (xvii. 27).

2. As the youngest of the family he may possibly have received from his parents the name, which first appears in him, of *David*, the *beloved*, the *darling*. But, perhaps for this same reason, he was never intimate with his brethren. The eldest brother, who alone is mentioned in connexion with him, and who was afterwards made by him head of the tribe of Judah (1 Ch. xxvii. 18), treated him scornfully and imperiously (1 Sam. xvii. 28), as the eldest brothers of large families are apt to do; his command was regarded in the family as law (xx. 29); and the father looked upon the youngest son as hardly one of the family at all (xvi. 11), and as a mere attendant on the rest (xvii. 17). The familiarity which he lost with his brothers, he gained with his nephews. The three sons of his sister Zeruiah, and the one son of his sister Abigail, seemingly from the fact that their mothers were the eldest of the whole family, were probably of the same age as David himself, and they accordingly were to him—especially the three sons of Zeruiah—throughout life in the relation usually occupied by brothers and cousins. In them we see the rougher qualities of the family, which David shared with them, whilst he was distinguished from them by qualities of his own, peculiar to himself. The two sons of his brother Shimeah are both connected with his after-history, and both celebrated for the gift of sagacity in which David himself excelled. One was Jonadab, the friend and adviser of his eldest son Amnon (2 Sam. xiii. 3). The other was Jonathan (2 Sam. xxi. 21), who afterwards became the counsellor of David himself (1 Ch. xxvii. 32). It is a conjecture or tradition of the Jews preserved by Jerome (*Qu. Heb.* on 1 Sam. xvii. 12) that this was no other than *Nathan* the prophet, who, being adopted into Jesse's family, makes up the eighth son, not named in 1 Ch. ii. 13–15. But this is hardly probable.

* The later Rabbis represent him as born in adultery. This is probably a coarse inference from Ps. li. 5; but it may possibly have reference to a tradition of the above. On the other hand, in the earlier Rabbis we have an attempt at "immaculate conception." They make Nahash—"the serpent"—to be another name of Jesse, because he had no sile except that which he contracted from the original serpent; and thus David inherited none (Jerome, *Qu. Heb.* in 2 Sam. xvii. 26).

The first time that David appears in history at once admits us to the whole family circle. There was a practice once a year at Bethlehem, probably at the first new moon of the year, of holding a sacrificial feast, at which Jesse, as the chief proprietor of the place, would preside (1 Sam. xx. 6), with the elders of the town. At this or such like feast (xvi. 1) suddenly appeared the great prophet Samuel, driving a heifer before him, and having in his hand a horn of the consecrated oil⁴ of the Tabernacle. The elders of the little town were terrified at this apparition, but were reassured by the august visitor, and invited by him to the ceremony of sacrificing the heifer. The heifer was killed. The party were waiting to begin the feast. Samuel stood with his horn to pour forth the oil, as if for an invitation to begin (cp. ix. 22). He was restrained by Divine intimation as soon after son passed by. Eliab, the eldest, by "his height" and "his countenance," seemed the natural counterpart of Saul, whose rival, unknown to them, the prophet came to select. But the day was gone when kings were chosen because they were head and shoulders taller than the rest. "Samuel said unto Jesse, Are these all thy children? And he said, There remaineth yet the youngest, and behold he keepeth the sheep."

This is our first and most characteristic introduction to the future king. The boy was brought in. We are enabled to fix his appearance at once in our minds. He was of short stature, thus contrasting with his tall brother Eliab, with his rival Saul, and with his gigantic enemy of Gath. He had red⁵ or auburn hair, such as is not so frequently seen in his countrymen of the East at the present day. In later life he wore a beard.⁶ His bright eyes⁷ are especially mentioned (xvi. 12), and generally he was remarkable for the grace of his figure and countenance ("fair of eyes," "comely," "goodly," xvi. 12, 18, xvi. 42), well made, and of immense strength and agility. His swiftness and activity made him (like his nephew Asahel) like a wild gazelle, his feet like harts' feet, and his arms strong enough to break a bow of steel (Ps. xviii. 33, 34). He was pursuing the occupation—that of the shepherd—allotted in Eastern countries usually to the slaves, the females, or the despised of the family (cp. the case of Moses, of Jacob, of Zipporah, and Rachel, and, in later times, of Mahomet; Sprenger, p. 8). The pastures of Bethlehem are famous throughout the sacred history. The Tower of Shepherds (Gen. xxxv. 21. Cp. Edersheim, *The Life and Times of Jesus the Messiah*, i. 186), the shepherds abiding with their flocks by night (Luke ii.), were both there. He usually carried a switch or wand⁸ in his hand (1 Sam. xvii. 43), such as would be used for his dogs (xvii. 40), and a scrip or wallet round his

⁴ "The oil;" so Joseph. *Ant.* vi. 8, § 1.

⁵ 1 Sam. xvi. 12, xvii. 42. Reddy = red-haired; *ruppādyx*, LXX.; *ru/yus*, Vulg.: the same word as for Eaan, Gen. xxv. 25. The Rabbis (probably from this) say that he was like Eaan. Josephus (*Ant.* vi. 8, 1) makes it his tawny complexion (*ξανθὸν τὸν χροῖον*).

⁶ 1 Sam. xxi. 13.

⁷ "Fierce, quick;" *γαστρεὶς τὰς ὀφθαλμοῖς* (Joseph. *Ant.* vi. 8, § 1).

⁸ The same word as is used in Gen. xxx. 37, Jer. l. 11, Hos. iv. 12.

neck, to carry anything that was needed for his shepherd's life (xvii. 40). Such was the outer life of David when (as the later Psalmists described his call) he was "taken from the sheepfolds, from following the ewes great with young, to feed Israel according to the integrity of his heart, and to guide them by the skilfulness of his hands" (Pa. lxxviii. 70-72). The recollection¹ of the sudden and great elevation from this humble station is deeply impressed on his after-life. "The man who was raised up on high" (2 Sam. xxiii. 1)—"I have exalted one chosen out of the people" (Pa. lxxxix. 19)—"I took thee from the sheepcote" (2 Sam. vii. 8).

3. But there was another preparation still more needed for his office, which possibly had made him already known to Samuel, and which at any rate is his next introduction to the history. When the body-guard of Saul were discussing with their master where the best minstrel could be found to chase away his madness by music, one of the young men in the guard suggested David. Saul, with the absolute control inherent in the idea of an Oriental king, instantly sent for him, and in the successful effort of David's harp we have the first glimpse into that genius for music and poetry which was afterwards consecrated in the Psalms. It is impossible not to connect the early display of this gift with the schools of the prophets, who exercised their vocation with tahret, psaltery, pipe, and harp (1 Sam. x. 5), in the pastures (*Maioth*; cp. Ps. xxiii. 2), to which he afterwards returned as to his natural home (1 Sam. xix. 18).²

Whether any of the existing Psalms can be referred to this epoch of David's life is uncertain. The 23rd, from its subject of the shepherd, and from its extreme simplicity (though placed by Ewald somewhat later), may well have been suggested by this time. The 8th, 19th, and 29th,³ which are universally recognised as David's, describe the phenomena of nature, and as such may more naturally be referred to this tranquil period of his life than to any other. The imagery of danger from wild beasts, lions, wild bulls, &c. (Pa. vii. 2; xxii. 20, 21), must be reminiscences of this time. And now, at any rate, he must have first acquired the art which gave him one of his chief claims to mention in after-times—"the sweet singer of Israel" (2 Sam. xxiii. 1), "the inventor of instruments of music" (Amos vi. 5); "with his whole heart he sung songs and loved him that made him" (Ecclus. xlvii. 8).⁴

4. One incident alone of his solitary shepherd life has come down to us—his conflict with the lion and the bear in defence of his father's flocks (1 Sam. xvii. 34, 35). But it did not stand

alone. He was already known to Saul's guards for his martial exploits, probably against the Philistines (xvi. 18); and when he suddenly appeared in the camp, his elder brother immediately guessed that he had left the sheep in his ardour to see the battle (xvii. 28). To this new aspect of his character we are next introduced.

There is no perfectly satisfactory means of reconciling the apparently contradictory accounts in 1 Sam. xvi. 14-23 and xvii. 12-31, 55-58. The first states that David was made known to Saul and became his armour-bearer in consequence of the charm of his music in assuaging the king's melancholy. The second implies that David was still a shepherd with his father's flocks, and unknown to Saul. The Vatican MS. of the LXX., followed by Kennicott (who argues the question at length, *Dissertation on Hebrew Text*, pp. 418-432, 554-558), rejects the narrative in 1 Sam. xvii. 12-31, 55-58, as spurious. But the internal evidence from its graphic touches is much in its favour, and it must at least be accepted as an ancient tradition of David's life. Horsley, but with no external authority, transposes 1 Sam. xvi. 14-23. Another explanation supposes that Saul had forgotten him. But this only solves half the difficulty, and is evidently not the intention of the narrative. It may therefore be accepted as an independent statement of David's first appearance, modified by the counter-statement already noticed.⁵

The scene of the battle is at EPHES-DAMMIN, in the frontier-hills of Judah, called probably from this or similar encounters "the bound of blood." Saul's army is encamped on one side of the ravine, the Philistines on the other; the watercourse of Elah or "the Terebinth" runs between them.⁶ A Philistine of gigantic stature, and clothed in complete armour, insults the comparatively defenceless Israelites, amongst whom the king alone appears to be well armed

* The solution of the question cannot be said to have been much advanced since this paragraph was written. The contradictions are to some very real (cp. Wellhausen, *Proleg.* to the *Hist. of Israel*, p. 262 sq.; Stade, *Gesch. d. V. Israel*, i. p. 224, &c.); to others they are but apparently real or quite capable of adjustment (cp. Grätz, *Gesch. d. Juden*, i. 416 sq.; the *Speaker's Comm.* on 1 Sam. xvi. 21, and the suppl. passage to the art. "David" in the Amer. ed. of this work).—F.

* Variations in the common account are suggested by two other passages. 1. In 2 Sam. xxi. 19, it is stated that "Goliath of Gath, the staff of whose spear was like a weaver's beam," was killed (not by David, but) by Elhanan of Bethlehem. This, combined with the fact that the Philistine whom David slew is usually nameless, has suggested to Ewald (li. 23, 611) the conjecture that the name of Goliath (which is only given twice to David's enemy, 1 Sam. xvii. 4, xxi. 9) was borrowed from the conflict of the real Goliath with Elhanan, whose Bethlehemite origin has led to the confusion. To Wellhausen, Stade, and others, the whole account is legendary. Jerome (*Qu. Heb. ad loc.*) makes Elhanan the same as David. 2. In 1 Ch. xi. 12, Eleazar (or more probably Shammah, 2 Sam. xxiii. 11) is said to have fought with David at Ephes-dammim against the Philistines. It is of course possible that the same scene may have witnessed two encounters between Israel and the Philistines; but it may also indicate that David's first acquaintance with Eleazar, afterwards one of his chief captains, was made on this memorable occasion.

3 A 2

¹ It is useless to speculate on the extent to which his mission was known to himself or to others. Josephus (*Ant. vi. 8, § 1*) says that Samuel whispered it into his ear.

² The Mussulman traditions represent him as skilled in making haircloth and sackcloth—the usual occupations of the prophets.

³ The Mussulman traditions describe him as understanding the language of birds (*Koran*, xxi. 9, xxii. 16).

⁴ In Mussulman traditions, as Abraham is called "the Friend," and Mohammed "the Apostle," so David is "the Prophet of God." In Well's *Legende*, p. 167, is a striking Oriental description of his powers as a psalmist: "He could imitate the thunders of heaven, the roar of the lion, the notes of the nightingale."

(xvii. 38; cp. xiii. 20). No one can be found to take up the challenge. At this juncture David appears in the camp, sent by his father with ten loaves and ten slices of milk-cheese to his three eldest brothers, fresh from the sheepfolds. Just as he comes to the circle of waggons which formed, as in Arab settlements, a rude fortification round the Israelite camp (xvii. 20), he hears the well-known shout of the Israelite war-cry (cp. Num. xxiii. 21). The martial spirit of the boy is stirred at the sound; he leaves his provisions with the baggage-master, and darts to join his brothers (like one of the royal messengers*) into the midst of the lines.† Then he hears the challenge, now made for the fortieth time—sees the dismay of his countrymen—hears the reward proposed by the king—goes with the impetuosity of youth from soldier to soldier talking of the event, in spite of his brother's rebuke—is introduced to Saul—and undertakes the combat. His victory over the gigantic Philistine is rendered more conspicuous by his own diminutive stature, and by the simple weapons with which it was accomplished—not the armour of Saul, which he naturally found too large, but the shepherd's sling, which he always carried with him, and the five polished pebbles which he picked up as he went from the watercourse of the valley, and put in his shepherd's wallet.‡ Two trophies long remained of the battle—one, the huge sword of the Philistine, which was hung up behind the ephod in the Tabernacle at Nob (1 Sam. xxi. 9); the other, the head, which he bore away himself, and which was either laid up at Nob, or subsequently at Jerusalem. [Nob.] Ps. cxliv., though by its contents of a much later date, is by the title in the LXX. "against Goliath." But there is also a psalm, preserved in the LXX. at the end of the Psalter, and which, though probably a mere adaptation from the history, well sums up this early period of his life: "This is the psalm of David's own writing (?) (*ᾠδὴ δαυὶδ*) *αὐτοῦ*, and outside the number, when he fought the single combat with Goliath." "I was small amongst my brethren, and the youngest in my father's house. I was feeding my father's sheep. My hands made a harp, and my fingers fitted a psalter. And who shall tell it to my Lord? He is the Lord, He heareth. He sent His messenger (angel?) and took me from my father's flock, and anointed me with the oil of His anointing. My brethren were beautiful and tall, but the Lord was not well pleased with them. I went out to meet the Philistine, and he cursed me by his idols. But I drew his own sword and beheaded him, and took away the reproach from the children of Israel."§

II. *Relations with Saul.*—We now enter on a new aspect of David's life. The victory over Goliath had been a turning-point of his career. Saul inquired his parentage, and took him finally to his court. Jonathan was inspired by the

romantic friendship which bound the two youth together to the end of their lives. The triumphant songs* of the Israelitish women announced that they felt that in David Israel had now found a deliverer mightier even than Saul. And in those songs, and in the fame which David thus acquired, was laid the foundation of that unhappy jealousy of Saul towards him which, mingling with the king's constitutional malady, poisoned his whole future relations to David.

Three new qualities now began to develop themselves in David's character. The first was his prudence. It had been already glanced at on the first mention of him to Saul (1 Sam. xvi. 18), "prudent in matters." But it was the marked feature of the beginning of his public career. Thrice over it is emphatically said, "he behaved himself wisely," and evidently with the impression that it was the wisdom called forth by the necessities of his delicate and difficult situation. It was that peculiar Jewish caution which has been compared to the sagacity of a hunted animal, such as is remarked in Jacob, and afterwards in the persecuted Israelites of the Middle Ages. One instance of it appears immediately, in his answer to the trap laid for him by Saul's servants, "Seemeth it to you a light thing to be the king's son-in-law, seeing that I am a poor man and lightly esteemed?" (xviii. 23.) Secondly, we now see his magnanimous forbearance called forth, in the first instance, towards Saul, but displaying itself (with a few painful exceptions) in the rest of his life. He is the first example of the virtue of chivalry. Thirdly, his hairbreadth escapes continued through so many years, impressed upon him a sense of dependence on the Divine help, clearly derived from this epoch. His usual oath or asseveration in later times was, "As the Lord liveth, Who hath redeemed my soul out of adversity" (2 Sam. iv. 9; 1 K. i. 29); and the Psalms are filled with imagery taken even literally from shelter against persecutors, slipping down precipices (Ps. xviii. 36), hiding-places in rocks and caves, leafy covers (xxxi. 20), strong fastnesses (xviii. 2).

This course of life subdivides itself into four portions:—

1. His life at the court of Saul till his final escape (1 Sam. xviii. 2–xix. 18). His office is not exactly defined. But it would seem that, having been first armour-bearer (xvi. 21, xviii. 2), then made captain over a thousand—the subdivision of a tribe (xviii. 13)—he finally, on his marriage with Michal, the king's second daughter, was raised to the high office of captain of the king's body-guard, second only, if not equal, to Abner, the captain of the host, and Jonathan, the heir apparent. These three formed the usual companions of the king at his meals (xx. 25). David was now chiefly known for his successful exploits against the Philistines, by one of which he won his wife, and drove back the Philistine power with a blow from which it only rallied at the disastrous close of Saul's reign.‡ He also still performed from time

* The same word is used as in 1 Sam. xxii. 17.

† As in 1 Sam. iv. 16, 2 Sam. xviii. 22.

‡ For the Mussulman legend, see Well's *Legends*, p. 153.

* Of these and of like songs, Brunsen (*Bibelwerk*, Pref. p. cl.) interprets the expression in 2 Sam. xxiii. 1, not "the sweet singer of Israel," but "the darling of the songs of Israel." [He is not followed by modern critics.]

* See Fabricius, *Cod. Apoc. v. T. p.* 306.

† 1 Sam. xx. 25, xxiii. 14, as explained by Ewald, iii. 98.

‡ The story of his wooing Merab, and of her marriage with Adriel (1 Sam. xviii. 17–19), is omitted in LXX.

to time the office of minstrel. But the successive snares laid by Saul to entrap him, and the open violence into which the king's madness twice broke out,⁷ at last convinced him that his life was no longer safe. He had two faithful allies, however, in the court—the son of Saul, his friend Jonathan; the daughter of Saul, his wife Michal. Warned by the one, and assisted by the other, he escaped by night,⁸ and was from thenceforward a fugitive. Jonathan he never saw again except by stealth. Michal was given in marriage to another (Phaltiel), and he saw her no more till long after her father's death [MICHAL]. To this escape the traditional title assigns Pa. lix. Internal evidence (according to Ewald) gives Pas. vi.⁹ and vii. to this period. In the former he is first beginning to contemplate the necessity of flight; in the latter he is moved by the plots of a person not named in the history (perhaps those alluded to in 1 Ch. xii. 17)—according to the title of the Psalm, Cush, a Benjamite, and therefore of Saul's tribe.

2. His escape (1 Sam. xix. 18–xxi. 15). He first fled to Naioth (or the pastures) of Ramah, to Samuel. This is the first recorded occasion of his meeting with Samuel since the original interview during his boyhood at Bethlehem. It might almost seem as if he had intended to devote himself with his musical and poetical gifts to the prophetic office, and give up the cares and dangers of public life. But he had a higher destiny still. Up to this time both the king and he himself had thought that a reunion was possible (see xx. 5, 26). But the madness of Saul now became more settled and ferocious in character; and David's danger proportionably greater. The secret interview with Jonathan, of which the recollection was probably handed down through Jonathan's descendants when they came to David's court, confirmed the alarm already excited by Saul's endeavour to seize him at Ramah, and he now determined to leave his country, and take refuge, like Coriolanus, or Themistocles in like circumstances, in the court of his enemy. Before this last resolve, he visited Nob, the seat of the Tabernacle, partly to obtain a final interview with the high-priest (1 Sam. xxii. 9, 15), partly to obtain food and weapons. On the pretext of a secret mission¹⁰ from Saul, he gained an answer from the oracle, some of the consecrated loaves, and the dedicated sword of Goliath. "There is none like that: give it me." The incident was of double importance in David's career.

and Josephus (*Ant.* vi. 10, § 1). The obliteration of her name in the existing text of 2 Sam. xxi. 8 is considered a *lapsus calami* (Driver, *in loco*).

⁷ The first of these (1 Sam. xxviii. 9–11) is omitted in the Vatican MS. of the LXX. and Josephus (*Ant.* vi. 10, § 1).

⁸ For the Mussulman legend, see Well's *Legends*, p. 184.

⁹ The allusions to his danger from the Benjamite archers (Pa. xl. 2), to his flight like a bird to the mountains (xi. 1, cp. 1 Sam. xxvi. 20), and probably to the neighbourhood of the Dead Sea (xi. 6), rather point to the time when he was at Engedi.

¹⁰ The statement of his pretended mission is differently given in the Hebrew and in the LXX. It must be observed that the young men spoken of as his companions were imaginary. He was quite alone.

First it established a connexion between him and the only survivor from the massacre in which David's visit involved the house of Ahimelech. Secondly, from Ahimelech's surrender of the consecrated bread to David's hunger our Lord drew the inference of the superiority of the moral to the ceremonial law, which is the only allusion made to David's life in the N. T.* (*Matt.* xii. 3; *Mark* ii. 25; *Luke* vi. 3, 4). It is also commemorated by the traditional title of Pa. lii.

His stay at the court of ACHISH was short. Discovered possibly by "the sword of Goliath," his presence revived the national enmity of the Philistines against their former conqueror; and he only escaped by feigning madness,⁴ violent gestures, playing on the gates of the city, or on a drum or cymbal, letting his beard grow, and foaming at the mouth (1 Sam. xxi. 13, LXX.). The 56th and 34th Psalms are both referred by their titles to this event, and the titles state (what does not appear in the narrative) that he had been seized as a prisoner by the Philistines, and that he was, in consequence of this stratagem, set free by Achish, or (as he is twice called) Ahimelech.

3. His life as an independent outlaw (xxii. 1–xxvi. 25). (a) His first retreat was the cave of ADULLAM. There he was joined by his whole family, now feeling themselves insecure from Saul's fury (xxii. 1). This was probably the foundation of his intimate connexion with his nephews, the sons of Zeruiah.

Of these, Abishai, with two other companions, was amongst the earliest (1 Ch. xi. 15, 20; 1 Sam. xxvi. 6; 2 Sam. xxiii. 13, 18). Besides these, were outlaws and debtors from every part, including doubtless some of the original Canaanites—of whom the name of one at least has been preserved, Ahimelech the Hittite (1 Sam. xxvi. 6).⁵

(b) His next move was to a stronghold, either the mountain, afterwards called Herodium, close to Adullam, or the fastness called by Josephus (*B. J.* vii. 8, § 3) *Masada*, the Grecised form of the Hebrew word *Matzev* (R.V. "hold," 1 Sam. xxii. 4, 5; 1 Ch. xii. 16), in the neighbourhood of En-gedi. Whilst there, he had deposited his aged parents for the sake of greater security, beyond the Jordan, with their ancestral kinsman of Moab (ib. 3). The neighbouring king, Nahash of Ammon, also treated him kindly (2 Sam. x. 2). Here another companion appears for the first time, a schoolfellow, if we may use the word, from the schools of Samuel, the prophet Gad, his subsequent biographer (1 Sam. xxii. 5); and whilst he was there, occurred the chivalrous exploit of the three heroes mentioned above (a) to procure water from the well of Bethlehem, and David's chivalrous answer (1 Ch. xi. 16–19; 2 Sam. xxiii. 14–17), like that of Alexander in the desert of Gedrosia. He was joined here by two separate bands. One a

* It is a characteristic Jewish comment (as distinguished from the lesson drawn by Christ) that the bread was useless to him (*Jerome, Qu. Heb. in loc.*).

⁴ This is the subject of one of David's apocryphal colloquies (*Fabritius, Cod. Apoc. V. Test. p. 1002*).

⁵ Sibbechai, who kills the giant at Gath (2 Sam. xxi. 18), is said by Josephus to have been a Hittite.

little body of eleven fierce Gadite^f mountaineers, who swam the Jordan in flood-time to reach him (1 Ch. xii. 8). Another was a detachment of men from Judah and Benjamin under his nephew Amasai, who henceforth attached himself to David's fortunes (1 Ch. xii. 16-18).

(c) At the warning of Gad, he fled next to the forest of HARETH, and then again fell in with the Philistines, and again, apparently advised by Gad (xxiii. 4), made a descent on their foraging parties, and relieved KEILAH, in which he took up his abode. Whilst there, now for the first time, in a fortified town of his own (xxiii. 7), he was joined by a new and most important ally—Abiathar, the last survivor of the house of Ithamar, who came with the high-priest's ephod, and henceforth gave the oracles, which David had hitherto received from Gad (xxiii. 6, 9; xxii. 23). By this time, the 400 who had joined him at Adullam (xxii. 2) had swelled to 600 (xxiii. 13).

(d) The situation of David was now changed by the appearance of Saul himself on the scene. Apparently the danger was too great for the little army to keep together. They escaped from Keilah, and dispersed, "whithersoever they could go," amongst the fastnesses of Judah. Henceforth it becomes difficult to follow his movements with exactness, partly from ignorance of the localities, partly because the same event seems to be twice narrated (1 Sam. xxiii. 19-24, xxvi. 1-4, and perhaps 1 Sam. xxiv. 1-22, xxvi. 5-25). But thus much we discern. He is in the wilderness of Ziph. Once (or twice) the Ziphites betray his movements to Saul. From thence Saul literally hunts him like a partridge, the treacherous Ziphites beating the bushes before him, and 3000 men being stationed to catch even the print of his footsteps on the hills (1 Sam. xxiii. 14, 22 [Heb.], 24 [LXX.]; xxiv. 11; xxvi. 2, 20). David finds himself driven to the extreme south of Judah, in the wilderness of Maon. On two, if not three occasions, the pursuer and pursued catch sight of each other. Of the first of these escapes, the memory was long preserved in the name of the "Cliff of Divisions" [or, *escape*, R. V. marg.], given to the cliff down one side of which David climbed, whilst Saul was surrounding the hill on the other side (xxiii. 25-29), and was suddenly called away by a panic of a Philistine invasion. On another occasion, David took refuge in a cave "by the spring of the wild goats" (Engedi), immediately above the Dead Sea (1 Sam. xxiv. 1, 2). The rocks were covered with the pursuers. Saul entered, as is the custom in Oriental countries, for a natural necessity. The followers of David, seated in the dark recesses of the cave, seeing, yet not seen, suggest to him the chance thus thrown in their way. David, with a characteristic mixture of humour and generosity, descends and silently cuts off the skirt of the long robe, spread, as is usual in the East on such occasions, before and behind the person so occupied—and then ensued the pathetic scene of remonstrance and for-

givenness (xxiv. 8-22).^e The third (if it can be distinguished from the one just given) was in the wilderness further south. There was a regular camp, formed with its usual fortification of waggon and baggage. Into this enclosure David penetrated by night, and carried off the cruse of water, and the well-known royal spear of Saul, which had twice so nearly transfixed him to the wall in former days (xxvi. 7, 11, 22). [ARMS, p. 238, *Chanith*.] The same scene is repeated as at Engedi—and this is the last interview between Saul and David (xxvi. 25). He had already parted with Jonathan in the forest of Ziph (xxiii. 18).

To this period are annexed by their traditional titles Psalm liv. ("When the Ziphim came and said, Doth not David hide himself with us?"); lvii. ("When he fled from Saul in the cave," though this may refer also to Adullam); lxiii. ("When he was in the wilderness of Judah" [or Idumaea, LXX.]); cxlii. ("A prayer when he was in the cave"). It is probably these Psalms which made the Psalter so dear to Alfred and to Wallace during their like wanderings.

Whilst he was in the wilderness of Maon occurred David's adventure with NABAL, instructive as showing his mode of carrying on his fugitive life, and his marriage with Abigail. His marriage with Abinoam from Jezreel,^h also in the same neighbourhood (Josh. xv. 56), seems to have taken place a short time before (1 Sam. xxv. 43, xxvii. 3; 2 Sam. iii. 2).

4. His service under Achishⁱ (1 Sam. xxvii. 1; 2 Sam. i. 27). Wearied with his wandering life, he at last crosses the Philistine frontier, not as before, in the capacity of a fugitive, but the chief of a powerful band—his 600 men now grown into an organised force, with their wives and families around them (xxvii. 3, 4). After the manner of Eastern potentates, Achish gave him, for his support, a city—Ziklag on the frontier of Philistia—and it was long remembered that to this curious arrangement the kings of Judah owed this appanage of their dynasty (xxvii. 6). There we meet with the first note of time in David's life. He was settled there for a year (R. V. "full year")^k and four months (xxvii. 7), and his increasing importance is indicated by the fact that a body of Benjamite archers and slingers, twenty-two of whom are specially named, joined him from the very tribe of his rival (1 Ch. xii. 1-7). Possibly during this stay he may have acquired the knowledge of military organization in which the Philistines surpassed the Israelites, and in which he surpassed all the preceding rulers of Israel.

He deceived Achish into confidence by attacking the old Nomadic inhabitants of the desert frontier, and representing the plunder to be of portions of the southern tribes or the Nomadic allied tribes of Israel. But this confidence was

^e For the Mussulman legend, see Weil, p. 156.

^h Joseph. *Ant.* vi. 13, § 8, calls it *Abessar*.

ⁱ According to the Jewish tradition (Jerome, *Qu. Heb.* on 2 Sam. viii. 10), he was the son of the former Achish; his mother's name Maacah.

^k In the Vatican MS. of the LXX. this is reduced to "4 months," and by Josephus (*Ant.* vi. 13) to "4 months and 20 days." The Alexandrine MS. of the LXX. is a literal rendering of the Hebrew and is more correct (see notes on this passage in Keil, *Speaker's Comm.*, and Driver).—F.

^f Gad, as Jerome's Jewish commentators observe (*Qu. Heb.* in loc.), appears suddenly, without introduction, like Elijah. Is it possible that he, like Elijah, may have been from beyond the Jordan, and had come, as his name implies, with the eleven Gadites?

not shared by the Philistine nobles; and accordingly David was sent back by Achish from the last victorious campaign against Saul. In this manner David escaped the difficulty of being present at the battle of Gilboa, but found that during his absence the Bedonin Amalekites, whom he had plundered during the previous year, had made a descent upon Ziklag, burnt it to the ground, and carried off the wives and children of the new settlement. A wild scene of frantic grief and recrimination ensued between David and his followers. It was calmed by an oracle of assurance from Abiathar. It happened that an important accession had just been made to his force. On his march with the Philistines northward to Gilboa, he had been joined by some chiefs of the Manassites, through whose territory he was passing. Urgent as must have been the need for them at home, yet David's fascination carried them off, and they now assisted him against the plunderers (1 Ch. xii. 19-21). They overtook the invaders in the desert, and recovered the spoil. These were the gifts with which David was now able for the first time to requite the friendly inhabitants of the scene of his wanderings (1 Sam. xxx. 26-31). A more lasting memorial was the law which traced its origin to the arrangement made by him, formerly in the attack on Nabal, but now again, more completely, for the equal division of the plunder amongst the two-thirds who followed to the field, and one-third who remained to guard the baggage (1 Sam. xxx. 25, xxv. 13). Two days after this victory a Bedonin arrived from the North with the fatal news of the defeat of Gilboa. The reception of the tidings of the death of his rival and of his friend, the solemn mourning, the vent of his indignation against the bearer of the message, the pathetic lamentation that followed, well close the second period of David's life (2 Sam. i. 1-27).

III. David's reign.

(I.) As king of Judah at Hebron, 7½ years (2 Sam. ii. 11; 2 Sam. ii. 1-v. 5).

Hebron was selected, doubtless, as the ancient sacred city of the tribe of Judah, the burial-place of the patriarchs and the inheritance of Caleb. Here David was first formally anointed king—by whom is not stated—but the expression seems to limit the inauguration to the tribe of Judah, and therefore to exclude any intervention of Abiathar (2 Sam. ii. 4). To Judah his dominion was nominally confined. But probably for the first five years of the time the dominion of the house of Saul, whose seat was now at Mahanaim, did not extend to the west of the Jordan; and consequently David would be the only Israelite potentate amongst the western tribes. Gradually his power increased; and during the two years which followed the elevation of Ishbosheth, a series of skirmishes took place between the two kingdoms. First came a successful inroad into the territory of Ishbosheth (2 Sam. ii. 28). Next occurred the defection of Abner (2 Sam. iii. 12), and the surrender of Michal, who was now separated from her second husband to return to her first (2 Sam. iii. 15). Then rapidly followed, though without David's consent, the successive murders of ABNER and of ISHBOSHETH (2 Sam. iii. 30,

iv. 5). The throne, so long waiting for him, was now vacant, and the united voice of the whole people at once called him to occupy it. A solemn league was made between him and his people (2 Sam. v. 3). For the third time David was anointed king, and a festival of three days celebrated the joyful event (1 Ch. xii. 39). His little band had now swelled into "a great host, like the host of God" (1 Ch. xii. 22). The command of it, which had formerly rested on David alone, he now devolved on his nephew Joab (2 Sam. ii. 28). It was formed by contingents from every tribe of Israel. Two are specially mentioned as bringing a weight of authority above the others. The sons of Issachar had "understanding of the times to know what Israel ought to do," and with the adjacent tribes contributed to the common feast the peculiar products of their rich territory (1 Ch. xii. 32, 40). The Levitical tribe, formerly represented in David's following only by the solitary fugitive Abiathar, now came in strength, represented by the head of the rival branch of Eleazar, the high-priest, the aged Jehoiada and his youthful and warlike kinsman Zadok (1 Ch. xii. 27, 28; xxvii. 5).

The only Psalm directly referred to this epoch is the 27th (by its title in the LXX. *Πρὸ τοῦ χρισθῆναι*—"before the anointing," i.e. at Hebron).

Underneath this show of outward prosperity, two cankers, incident to the royal state which David now assumed, had first made themselves apparent at Hebron, which darkened all the rest of his career. The first was the formation of a harem, according to the usage of Oriental kings. To the two wives of his wandering life he had now added four, and, including Michal, five (2 Sam. ii. 2; iii. 2-5, 15). The second was the increasing power of his kinsmen and chief officers, which the king strove to restrain within the limits of right; and thus of all the incidents of this part of his career the most plaintive and characteristic is his lamentation over his powerlessness to prevent the murder of Abner (2 Sam. iii. 31-36).

(II.) Reign over all Israel 33 years (2 Sam. v. 5 to 1 K. ii. 11).

1. The foundation of Jerusalem. It must have been with no ordinary interest that the surrounding nations watched for the prey on which the Lion of Judah, now about to issue from his native lair, and establish himself in a new home, would make his first spring. One fastness alone in the centre of the land had hitherto defied the arms of Israel. On this, with a singular prescience, David fixed as his future capital. By one sudden assault Jebus was taken, and became henceforth known by its ancient name of Jerusalem (called in the tablets of Tel-el-Amarna [15th cent. B.C.] "Urusalim"; see *Records of the Past*, N.S., iv. p. vi.) and by the name of Zion. Of all the cities of Palestine great in former ages, Jerusalem alone has vindicated by its long permanence the choice of its founder. The importance of the capture was marked at the time. The reward bestowed on the successful scaler of the precipice, was the highest place in the army. Joab henceforward became captain of the host (1 Ch. xi. 6). The royal residence was instantly fixed there—fortifications were added by the king and by Joab—and it was

known by the special name of the "city of David" (1 Ch. xi. 7; 2 Sam. v. 9).

The neighbouring nations were partly enraged and partly awestruck. The Philistines¹ made two ineffectual attacks on the new king (2 Sam. v. 17-20),² and a retribution on their former victories took place by the capture and conflagration of their own idols (1 Ch. xiv. 12). Tyre, now for the first time appearing in the sacred history, allied herself with Israel; and Hiram³ sent cedar-wood for the buildings of the new capital (2 Sam. v. 11), especially for the palace of David himself (2 Sam. vii. 2). Unhallowed and profane as the city had been before, it was at once elevated to a sanctity which it has never lost, above any of the ancient sanctuaries of the land. The ark was now removed from its obscurity at Kirjath-jearim with marked solemnity. A temporary halt (owing to the death of Uzzah) detained it at Obed-edom's house, after which it again moved forward with great state to Jerusalem. An assembly of the nation was convened, and (according to 1 Ch. xiii. 2; xv. 2-27) especially of the Levites. The musical arts in which David himself excelled were now developed on a great scale (1 Ch. xv. 16-22; 2 Sam. vi. 5). Zadok and Abiathar, the representatives of the two Aaronic families, were both present (1 Ch. xv. 11). Chenaniah presided over the music (1 Ch. xv. 22, 27). Obed-edom followed his sacred charge (1 Ch. xiii. 18, 21, 24). The prophet Nathan appears for the first time as the controlling adviser of the future (2 Sam. vii. 3). A sacrifice was offered as soon as a successful start was made (1 Ch. xv. 26; 2 Sam. vi. 13). David himself was dressed in the white linen dress of the priestly order, without his royal robes, and played on stringed instruments (1 Ch. xv. 27; 2 Sam. vi. 14, 20). As in the prophetic schools where he had himself been brought up (1 Sam. x. 5), and as still in the impressive ceremonial of some Eastern Dervishes, and of Seville cathedral (probably derived from the East), a wild dance was part of the religious solemnity. Into this David threw himself with unreserved enthusiasm, and after this manner conveyed the symbol of the Presence of Jehovah into the ancient heathen fortress. In the same spirit of uniting the sacerdotal with the royal functions, he offered sacrifices on a large scale, and himself gave the benediction to the people (2 Sam. vi. 17, 18; 1 Ch. xvi. 2).⁴ The scene of this inauguration was on the hill which from David's habitation was specially known as the "City of David." As if to mark the new era, he had not brought the ancient Tabernacle from Gibeon, but had erected a new tent or Tabernacle (1 Ch. xv. 1) for the reception of the ark. It was the

first beginning of the great design, of which we shall speak presently, afterwards carried out by his son, of erecting a permanent Temple or palace for the Ark, corresponding to the state in which he himself was to dwell. It was the greatest day of David's life. One incident only tarnished its splendour—the reproach of Michal, his wife, as he was finally entering his own palace, to carry to his own household the benediction which he had already pronounced on his people. [MICHAL.] His act of severity towards her was an additional mark of the stress which he himself laid on the solemnity (2 Sam. vi. 20-23; 1 Ch. xv. 29).

No less than eleven Psalms, either in their traditional titles, or in the irresistible evidence of their contents, bear traces of this great festival. The 29th Psalm (by its title in the LXX.) is said to be on the "Going forth of the Tabernacle."⁵ The 30th by its title, the 15th and 101st by their contents, express the feelings of David on his occupation of his new home. The 68th, at least in part, and the 24th⁶ seem to have been actually composed for the entrance of the ark into the ancient gates of the heathen fortress—and the last words of the second of these two Psalms⁷ may be regarded as the insurrection of the new Name by which God henceforth is called, The Lord of hosts. "Who is this king of glory?" "The Lord of hosts, He is the king of glory" (Ps. xxiv. 10; cp. 2 Sam. vi. 2). Fragments of poetry worked up into Psalms (xcvi. 2-13,⁸ cv. 1, 47, 48), occur in 1 Ch. xvi. 8-36, as having been delivered by David "into the hands of Asaph and his brother" after the close of the festival, and the two mysterious terms in the titles of Ps. vi. and xli. (Sheminith and Alamoth) appear in the lists of those mentioned on this occasion in 1 Ch. xv. 20, 21. The 132nd is, by its contents, if not by its authorship, thrown back to this time. The whole progress of the removal of the Ark is traced in David's vein.

2. Foundation of the Court and Empire of Israel (2 Sam. viii. to xii.). The erection of the new capital at Jerusalem introduces us to a new era in David's life and in the history of the monarchy. Up to this time he had been a king, such as Saul had been before him, or as the kings of the neighbouring tribes, each ruling over his territory, unconcerned with any foreign relations except so far as was necessary to defend his own nation. But David, and through him the Israelitish monarchy, now took a wider range. He became a king on the scale of the great Oriental sovereigns of Egypt and Persia, with a regular administration and organization of court and camp; and he also founded an

¹ The importance of the victory is indicated by the (probable) allusion to it in Is. xxviii. 21.

² 1 Ch. xiv. 8 reads, "David... went out against (R.V. marg. *before*) them," instead of "David... went down into the hold" (2 Sam. v. 17).

³ Eupolemus (*Ench. Præp. Ev. ix.* 30) mentions an expedition against Hiram, king of Tyre and Sidon, and a letter to Vafres, king of Egypt, to make an alliance.

⁴ 1 Ch. xvi. 1 says, "they offered;" 2 Sam. vi. 17, "he offered." Both say, "he blessed." The LXX., by a slight variation of the text, reads in 2 Sam. vi. 14, "instruments of praise," for "all his might;" cp. 2 Ch. xxx. 21, LXX. and *QPB*.⁵

⁵ As "the tabernacle" was never moved from Gibeon in David's time, "the ark" is probably meant. It is the Psalm which describes a thunderstorm. Is it possible to connect this with the event described in 2 Sam. vi. 6? A similar allusion may be found in Ps. lxxviii. 7, 33 (see Chandler, *ll.* 211).

⁶ In the LXX. title said to be "on the Sabbath-day."
⁷ Ewald, *ll.* 164. For an elaborate adaptation of the 68th Psalm to this event, see Chandler, *ll.* 54.

⁸ In the title of the LXX. said to be David's "when the house was built after the captivity." It is possible that by "the captivity" may be meant the captivity of the Ark in Philistia, as in Judg. xviii. 30; but most critics interpret the term of the Captivity in the exile.

imperial dominion which for the first time realized the prophetic description of the bounds of the chosen people (Gen. xv. 18-21). The internal organization now established lasted till the final overthrow of the monarchy. The empire was of much shorter duration, continuing only through the reigns of David and his successor Solomon. But, for the period of its existence, it lent a peculiar character to the sacred history. For once, the kings of Israel were on a level with the great potentates of the world. David was an imperial conqueror, if not of the same magnitude, yet of the same kind, as Rameses or Cyrus,—"I have made thee a great name, like unto the name of the great men that are in the earth" (2 Sam. vii. 9). "Thou hast shed blood abundantly, and hast made great wars" (1 Ch. xxii. 8). And as, on the one hand, the external relations of life and the great incidents of war and conquest receive an elevation by their contact with the religious history, so the religious history swells into larger and broader dimensions from its contact with the course of the outer world. The enlargement of territory, the amplification of power and state, leads to a corresponding en-

largement and amplification of ideas, of imagery, of sympathies; and thus (humanly speaking) the magnificent forebodings of a wider dispensation in the prophetic writings first became possible through the court and empire of David.

(a) In the internal organization of the kingdom the first new element that has to be considered is the royal family, the dynasty of which David was the founder, a position which entitled him to the name of "Patriarch" (Acts ii. 29) and (ultimately) of the ancestor of the Messiah.

Of these, Absalom and Adonijah both inherited their father's beauty (2 Sam. xiv. 25; 1 K. i. 6); but Solomon alone possessed any of his higher qualities. It was from a union of the children of Solomon and Absalom that the royal line was carried on (1 K. xv. 2). The princes were under the charge of Jehiel (1 Ch. xxvii. 32), perhaps the Levite (1 Ch. xv. 21; 2 Ch. xx. 14), with the exception of Solomon, who (as some have thought, see p. 731, n. 4) was under the charge of Nathan (2 Sam. xii. 25). David's strong parental affection for all of them is very remarkable (2 Sam. xiii. 31, 33, 36, xiv. 33, xviii. 5, 33, xix. 4; 1 K. i. 6).

DAVID'S WIVES AND CHILDREN.

(I.) AT THE COURT OF SAUL.

Michal
(1 Sam. xix. 11, xxv. 44; 2 Sam. iii. 14),
said to be Eglah.¹

(II.) WIVES OF THE WANDERINGS.

Abinoam of Jezreel = Abigail of Carmel
(1 Sam. xxv. 43)
Amnon
Chileab or Daniel
(1 Ch. iii. 1).
(Jehiel, Jer. v. 4, H. on 1 Ch.
xxvii. 32.)

N.B.—There were, besides, 10 concubines (2 Sam. v. 13, xv. 16), whose children (1 Ch. iii. 5) are not named.

(III.) WIVES AT HEERON.

(2 Sam. iii. 2-6; 1 Ch. iii. 1-4.)

Maachab² of Geshur = Haggith = Abital = Eglah
Absalom Tamar Adonijah Shephathiah Ithream
3 sons who died (2 Sam. xiv. 27; xviii. 16)
Tamar = Uriel of Gibeon
Maachab = Rehoboam
or Michalab (2 Sam. xiv. 27; 2 Ch. xiii. 2)
Abijah

(IV.) WIVES AT JERUSALEM.

(2 Sam. v. 13-16; 1 Ch. iii. 5-8, xiv. 4-7.)

Ithar
Elishua
Elishama
(1 Ch. iii. 6)
Eliphelet
Nogah
Nepheg
Japhia
Elishama
Mikada
Beeldad
(1 Ch. xiv. 7)
Eliphalat

Also daughters (1 Ch. xiv. 2; 2 Sam. v. 45).

Ten (?) concubines (2 Sam. v. 13; xv. 16).

Jerimoth
(2 Ch. xi. 18)
Jerome, Q. H.
Mahalath = Rehoboam = Abthal
Jame
Elab

(5.) Bathsheba (1 Ch. iii. 5)

one died
as a child
(2 Sam. xii. 16)
Shammua
Shimea
(1 Ch. iii. 5)
Shoba
Nathan
Jedidiah
or SOLOMON
(2 Sam. xii. 26)
REHOBAM = Maachab
ABIJAH

¹ Eglah alone is called "David's wife" in the enumeration 2 Sam. iii. 5. The tradition in Jerome (*Qu. Heb.* ad loc.) says that she was Michal; and (*ib.* ad 2 Sam. vi. 23) that she died in giving birth to Ithream.

² Taken in war (Jerome, *Qu. Heb.* ad 2 Sam. xiii. 37).

³ The LXX. in 2 Sam. v. 16, after having given substantially the same list as the present Hebrew text, repeats the list, with strange variations, as follows: *Samae,*

Jessibath, Nathan, Galamaan, Idoar, Thœma, Elphalat, Naged, Naphek, Ianathan, Leasamya, Baalmath, Eliphaath.

⁴ Josephus (*Ant.* vii. 3, § 3) gives the following list, of which only four names are identical. He states that the last two were sons of the concubines:—Amnus, Emnus, Eban, *Nathan, Solomon, Idoar, Elthē, Phalna, Eunnaphen, Ienac, Eliphale;* and also his daughter, Thamar.

(b) The military organization, which was in fact inherited from Saul, but greatly developed by David, was as follows:—

(1.) "The host," i.e. the whole available military force of Israel, consisting of all males capable of bearing arms, and summoned only for war. This had always existed from the time of the first settlement in Canaan, and had been commanded by the chief or the judge, who presided over Israel for the time. Under Saul, we first find the recognised post of a captain or commander-in-chief—in the person of Abner; and under David, this post was given as a reward for the assault on Jerusalem, to his nephew JOAB (1 Ch. xi. 6; xxvii. 34), who conducted the army to battle in the absence of the king (2 Sam. xii. 26). There were twelve divisions of 24,000 each, who were held to be in duty month by month; and over each of them presided an officer, selected for this purpose, from the other military bodies formed by David (1 Ch. xxvii. 1-15). The army was still distinguished from those of surrounding nations by its primitive aspect of a force of infantry without cavalry. The only innovations as yet allowed were, the introduction of a very limited number of chariots (2 Sam. viii. 4) and of mules for the princes and officers instead of the asses (2 Sam. xiii. 29; xviii. 9). According to a Musliman tradition (*Koran*, xxi. 80), David invented chain armour.* The usual weapons were still spears and shields, as appears from the Psalms. For the general question of the numbers and equipment of the army, see *ARMS* and *ARMY*.

(2.) The Body-guard. This also had existed in the court of Saul, and David himself had probably been its commanding officer (1 Sam. xxii. 14; Ewald). But it now assumed a peculiar organization. They were at least in name foreigners, as having been drawn from the Philistines, probably during David's residence at the court of Gath. They are usually called from this circumstance "Cherethites (see *sub nom.*) and Pelethites," but had also a body especially from Gath* amongst them, of whom the name of one, Ittai, is preserved, as a faithful servant of David (2 Sam. xv. 19). The captain of the force was, however, not only not a foreigner, but an Israelite of the highest distinction and purest descent, who first appears in this capacity, but who outlived David, and became the chief support of the throne of his son, namely Benaiah, son of the chief priest Jehoiada, representative of the eldest branch of Aaron's house (2 Sam. viii. 18, xv. 18, xx. 23; 1 K. i. 38, 44).

(3.) The most peculiar military institution in David's army was that which arose out of the peculiar circumstances of his early life. As the nucleus of the Russian army is the Preobajensky regiment formed by Peter the Great out of the companions who gathered round him in the

suburb of that name in Moscow, so the nucleus of what afterwards became the only standing army in David's forces was the band of 600 men who had gathered round him in his wanderings. The number of 600 was still preserved, with the name of *Gibborim*, "heroes" or "mighty men." It became yet further subdivided into three large bands of 200 each, and small bands of twenty each. The small bands were commanded by thirty officers, one for each band, who together formed "the thirty," and the three large bands by three officers, who together formed "the three," and the whole by one chief, "the captain of the mighty men" (2 Sam. xiii. 8-39; 1 Ch. xi. 9-47). This commander of the whole force was Abishai, David's nephew (1 Ch. xi. 20; and cp. 2 Sam. xvi. 9). "The three" were Jashobeam (1 Ch. xi. 11) or Adino (2 Sam. xxiii. 8), Eleazar (1 Ch. xi. 12; 2 Sam. xxiii. 9), and Shammah (2 Sam. xxiii. 11).⁴ Of "the thirty," some few only are known to fame elsewhere: Asahel, David's nephew (1 Ch. xi. 26; 2 Sam. ii. 18); Elhanan, the victor of at least one Goliath (1 Ch. xi. 26; 2 Sam. xxi. 19); Joel, the brother or son (LXX.) of Nathan (1 Ch. xi. 38); Naharai, the armour-bearer of Joab (1 Ch. xi. 39; 2 Sam. xxiii. 37); Eliam, the son of Ahitophel (2 Sam. xxiii. 34); Ira, one of David's priests (1 Ch. xi. 40; 2 Sam. xxiii. 38, xi. 26); and Uriah the Hittite (1 Ch. xi. 41; 2 Sam. xxiii. 39, xi. 3).

(c) Side by side with this military organization were established social and moral institutions. Some were entirely for pastoral, agricultural, and financial purposes (1 Ch. xxv. 25-31), others for judicial (1 Ch. xxvi. 29-32). Some few are named as constituting what would now be called the court, or council of the king: the councillors, Ahitophel of Gilo and Jonathan the king's nephew (1 Ch. xxvii. 32, 33); the companion or "friend" Hushai (1 Ch. xxvii. 33; 2 Sam. xv. 37, xvi. 19); the scribe, Sheva or Seraiah, and at one time Jonathan (2 Sam. xi. 25; 1 Ch. xxvii. 32); Jehoshaphat the recorder or historian⁵ (2 Sam. xx. 24), and Adoram the tax collector, both of whom survived him (2 Sam. xx. 24; 1 K. xii. 18, iv. 3, 6). Each tribe had its own head (1 Ch. xxvii. 16-22). Of these the most remarkable were Elihu, David's brother (probably Eliab), Prince of Judah (v. 18), and Jaasiel, the son of Abner, of Benjamin (v. 21).

But the more peculiar of David's institutions were those directly bearing on religion. Two prophets appear as the king's constant advisers. Of these, Gad, who seems to have been the elder, had been David's companion in exile; and from his being called "the seer," belongs probably to the earliest form of the prophetic schools. Nathan, who appears for the first time after the establishment of the kingdom at Jerusalem

* See Ewald, iii. 178.

⁴ The LXX. (cp. 2 Sam. xxiii. 8) make them: 1. Isoboth the Canaanite; 2. Adino the Asenite; 3. Eleazar, son of Dodo (cp. Swete's Greek text, and Driver's *Notes on the Heb. Text of the BB. of Sam.* in loco).

⁵ Perhaps the father of Bathsheba, whose marriage with Uriah would thus be accounted for (see *Eilat. Coincidences*, ii. ch. x.).

⁶ As in the court of Persia (Herod. vi. 106, vii. 90, viii. 100).

* Cp. the legends in Well's *Legends*, p. 155, and Lane's *Selections from the Koran*, p. 229. Thus a good coat of mail is often called by the Arabs "*Dacodee*," i.e. Davidian.

* A tradition in Jerome (*Qu. Heb.* on 1 Ch. xviii. 17) speaks of their being in the place of the seventy judges appointed by Moses.

² But here the reading is doubtful (see p. 733, note *, and *QPB*,² on 2 Sam. xv. 18).

(2 Sam. vii. 2), is distinguished both by his title of "prophet," and by the nature of the prophecies which he utters (2 Sam. vii. 5-17, xii. 1-14), as of the purest type of prophetic dispensation, and as the hope of the new generation,* which he supports in the person of Solomon (1 K. i.). Two high-priests also appear—representatives of the two rival houses of Aaron (1 Ch. xxiv. 3); here again, as in the case of the two prophets, one, Abiathar,^b who attended him at Jerusalem, companion of his exile, and connected with the old time of the Judges (1 Ch. xxvii. 34), joining him after the death of Saul, and becoming afterwards the support of his son; the other Zadok, who ministered at Gibeon (1 Ch. xvi. 39), and who was made the head of the Aaronic family (xxvii. 17). Besides these four great religious functionaries, there were two classes of subordinates: (α) prophets, specially instructed in singing and music, under Asaph, Heman, the grandson of Samuel, and Jeduthun (1 Ch. xxv. 1-31); (β) Levites, or attendants on the sanctuary, who again were subdivided into the guardians of the gates and guardians of the treasures (1 Ch. xxvi. 1-28) which had been accumulated, since the re-establishment of the nation, by Samuel, Saul, Abner, Joab, and David himself (1 Ch. xxvi. 26-28).

The collection of those various ministers and representatives of worship round the capital must have given a new aspect to the history in David's time, such as it had not borne under the disconnected period of the Judges. But the main peculiarity of the whole must have been, that it so well harmonized with the character of him who was its centre. As his early martial life still placed him at the head of the military organization which had sprung up around him, so his early education and his natural disposition placed him at the head of his own religious institutions. Himself a prophet, a psalmist, he was one in heart with those whose advice he sought and whose arts he fostered. And, more remarkably still, though not himself a priest, he yet assumed almost all the functions usually ascribed to the priestly office. He wore, as we have seen, the priestly dress, offered the sacrifices, gave the priestly benediction (2 Sam. vi. 14, 17, 18); and, as if to include his whole court within the same sacerdotal sanctity, Benaiah, the captain of his guard, was a priest¹ by descent (1 Ch. xxvii. 5), and joined in the sacred music (1 Ch. xvi. 6); David himself and "the captains of the host" arranged the prophetic duties (1 Ch. xxv. 1); and his sons are actually called "priests" (2 Sam. viii. 18. Cp. Driver in loco; 1 Ch. xxvii. 17, translated "chief," and ἀρχαῖ, "chief rulers"), as well as Ira, of Manasseh (2 Sam. xx. 26, translated "chief ruler," but LXX. ἱερεὺς). Such a union was never seen before or since in the Jewish history. Even Solomon fell below it in some important points. But from this time the idea took possession of the Jewish mind and was never lost. What

the heathen historian Justin antedates, by referring it back to Aaron, is a just description of the effect of the reign of David:—"Sacerdos mos rex creatur; samperque exinde hic mos apud Judaeos fuit ut eosdem reges et sacerdotes haberent; quorum iustitia religione permixta, incredibila quantum coaluere" (Justin, xxxvi. 2).

(d) From the internal state of David's kingdom, we pass to its external relations. These will be found at length under the various countries to which they relate. It will be here only necessary to briefly indicate the enlargement of his dominions. Within ten years from the capture of Jerusalem, he had reduced to a state of permanent subjection the PHILISTINES² on the west (2 Sam. viii. 1); the MOABITES³ on the east (2 Sam. viii. 2), by the exploits of Benaiah (2 Sam. xxiii. 20); the SYRIANS on the north-east as far as the Euphrates⁴ (2 Sam. viii. 3); the EDMONITES⁵ (2 Sam. viii. 14) on the south; and finally the AMMONITES,⁶ who had broken their ancient alliance, and made one grand resistance to the advance of his empire (2 Sam. x. 1-19; xii. 26-31). These last three wars were entangled⁷ with each other. The last and crowning point was the siege of Rabbah. The Ark went with the host (2 Sam. xi. 11). David himself was present at the capture of the city (2 Sam. xii. 29). The savage treatment of the inhabitants—the only instance as far as appears of cruel severity against his enemies—is perhaps to be explained by the formidable nature of their resistance—as the like stain on the generosity of the Black Prince in the massacre of Limoges. The royal crown, or "crown of Milcom," was placed on David's head (2 Sam. xii. 30), and according to Josephus (*Ant.* vii. 5) was always worn by him afterwards. The Hebrew tradition (Jerome, *Qu. Heb.* ad 1 Ch. xx. 2) represents it as having been the diadem of the Ammonite god Milcom, or Moloch; and that Ittai the Gittite (doing what no Israelite could have done, for fear of pollution) tore it from the idol's head, and brought it to David. The general peace which followed was commemorated in the name of "the Peaceful" (Solomon), given to the son born to him at this crisis.⁸

To these wars in general may be ascribed Ps. cx., as illustrating both the sacerdotal character of David, and also his mode of going

* By the reduction of Gath (1 Ch. xviii. 1).

¹ The punishment inflicted on the Moabites is too obscurely worded to be explained at length. A Jewish tradition (which shows that there was a sense of its being excessive) maintained that it was in consequence of the Moabites having murdered David's parents, when confided to them (1 Sam. xxii. 3; Chandler, ii. 163).

² Described briefly in a fragment of Nicolaus of Damascus (in Joseph. *Ant.* vii. 5, § 2) and Eupolemus (in Euseb. *Præp. Ev.* ix. 30).

³ To these Eupolemus adds the Nabateans and Nebæans.

⁴ For the details of the punishment, see RABBAH. Chandler (ii. 237, 238) interprets it of hard servitude; Ewald (iii. 204), of actual torture and slaughter.

⁵ The story appears to be told twice over (2 Sam. viii. 3-14, x. 1-xi. 1, xii. 26-31).

⁶ The golden shields taken in the Syrian wars remained long afterwards as trophies in the Temple at Jerusalem (2 Sam. viii. 7; Cant. iv. 4). [ARMS, *Shield*, p. 242.] The brass was used for the brazen basins and pillars (2 Sam. viii. 8; LXX.).

⁷ 2 Sam. xii. 25 is by some interpreters rendered, "He put him (Solomon) under the hand of Nathan:" thus making Nathan Solomon's preceptor (see Chandler, ii. 272).

⁸ Cp. Blunt, *Coincidences*, ii. ch. xv.

⁹ ὁ ἱερεὺς τῆς γένεως (Joseph. *Ant.* vii. 12, § 4).

forth to battle. To the Edomite war, both by its title and contents, must be ascribed Ps. lx. 6-12 (cp. cviii. 7-13), describing the assault on Petra. Ps. lxxviii. may probably have received additional touches, as it was sung on the return of the Ark from the siege of Rabbah.* Ps. xviii.* (repeated in 2 Sam. xxii.) is ascribed by its title, and appears from some expressions, to belong to the day "When the Lord had delivered him out of the hand of all his enemies," as well as "out of the hand of Saul" (2 Sam. xxii. 1; Ps. xviii. 1). That "day" may be either at this time or at the end of his life. Ps. xx. (Syr. Vers.) and xxi. relate to the general union of religious and of military excellences displayed at this time of his career (Ps. xxi. 3, "Thou settest a crown of pure gold upon his head," not improbably referring to the golden crown of Ammon, 2 Sam. xii. 30).

3. In describing the incidents of the life of David after his accession to the throne of Israel, most of the details will be best found under the names to which they refer. Here it will be needful only to give a brief thread, enlarging on those points in which David's individual character is brought out.

Three great calamities may be selected as marking the beginning, middle, and close of David's otherwise prosperous reign; which appears to be intimated in the question of Gad (2 Sam. xxiv. 13), "a three years' famine, a three months' flight, or a three days' pestilence."

(a) Of these, the first (the three years' famine) introduces us to the last notices of David's relations* with the house of Saul. There has often arisen a painful suspicion in later times, as there seems to have been at the time (xvi. 7), that the oracle which gave as the cause of the famine Saul's massacre of the Gibeonites, may have been connected with the desire to extinguish the last remains of the fallen dynasty. But such an explanation is not needed. The massacre was probably the most recent national crime that had left any deep impression; and the whole tenor of David's conduct towards Saul's family is of an opposite kind. It was then that he took the opportunity of removing the bodies of Saul and Jonathan to their own ancestral sepulchre at Zelah (2 Sam. xxi. 14); and it was then, or shortly before, that he gave a permanent home and restored all the property of the family to Mephibosheth, the only surviving son of Jonathan (2 Sam. ix. 1-13; xxi. 7). The seven who perished were, two sons of Saul by Rizpah, and five grandsons—sons of Merab† and Adriel (2 Sam. xxi. 8).

(b) The second group of incidents contains

the tragedy of David's life, which grew in all its parts out of the polygamy, with its evil consequences, into which he had plunged on becoming king. Underneath the splendour of his last glorious campaign against the Ammonites, was a dark story, known probably at that time only to a very few; and even in later times* kept as much as possible out of the view of the people, but now recognised as one of the most instructive portions of his career—the double crime of adultery with Bathsheba, and of the virtual murder of Uriah. The crimes* are undoubtedly those of a common Oriental despot. But the rebuke of Nathan; the sudden revival of the king's conscience; his grief for the sickness of the child; the gathering of his uncles and elder brothers around him; his return of hope and peace,—are characteristic of David, and of David only. And if we add to these the two Psalms, the 32nd and the 51st,—of which the first by its acknowledged internal evidence, the second by its title,^b also claim to belong to this crisis of David's life,—we shall feel that the instruction drawn from the sin has more than compensated to us at least for the scandal occasioned by it.

But, though the "free spirit" and "clean heart" of David returned, and though the birth of Solomon was as auspicious as if nothing had occurred to trouble the victorious festival which succeeded it, the clouds from this time gathered over David's fortunes, and henceforward "the sword never departed from his house" (2 Sam. xii. 10). The outrage on his daughter Tamar, the murder of his eldest son Amnon, and then the revolt of his best beloved Absalom, brought on the crisis, which once more sent him forth a wanderer, as in the days when he fled from Saul; and this, the heaviest trial of his life, was aggravated by the impetuosity of Joab, now perhaps from his complicity in David's crime more unmanageable* than ever. The rebellion was fostered apparently by the growing jealousy of the tribe of Judah at seeing their king absorbed into the whole nation; and if, as appears from 2 Sam. xi. 3, xxiii. 34, Abiathar was the grandfather of Bathsheba, its main supporter was one whom David had provoked by his own crimes. For its general course, the reader is referred to the names just mentioned. But two or three of its scenes relate so touchingly and peculiarly to David, that this is the place for dwelling upon them.

The first is the most detailed description of any single day that we find in the Jewish history.

It was apparently early on the morning of

* See Hengstenberg on Ps. lxxviii.

† The imagery of the thunderstorm (Ps. xviii. 7-14) may possibly allude to the events either of 2 Sam. v. 20-24 (Chandler, ii. 211), or of 2 Sam. vi. 8.

‡ So LXX. and 1 Ch. xxi. 12, instead of seven (see *QPB*,³ on 2 Sam. xxi. 13).

³ Ewald, iii. 207.

* That this incident took place early in the reign appears (1) from the freshness of the allusion to Saul's act (2 Sam. xxi. 1-8); (2) from the allusions to the massacre of Saul's sons in xix. 28; (3) from the apparent connexion of the story with ch. ix.

† The mention of Adriel necessitates the reading of Merab for Michal (see Driver, in loco).

* It is omitted in the Chronicles.

* This is the subject of one of the apocryphal collogues of David (Fabric. *Cod. Apoc. V. Test.* p. 1060). The story is also told in the Koran (xxxviii. 20-34), and wild legends are formed out of it (Well's *Legends*, pp. 158-180, 170).

^b Ewald places it after the Captivity. From the last two verses (li. 18, 19) this would be the almost certain conclusion. But is it not allowable to suppose these verses to be an adaptation of the Psalm to that later time?

* See Blunt's *Coincidences*, ii. ch. xi., for a theory perhaps too much elaborated, yet not without some foundation.

³ Blunt ii. ch. x.; Jerome, *Qu. Heb.* on 2 Sam. xi. 3.

the day after he had received the news of the rebellion at Hebron that the king left the city of Jerusalem on foot. He was accompanied by a vast concourse; in the midst of which he and his body-guard were conspicuous. They started from a house on the outskirts of the city (2 Sam. xv. 17, LXX.), and every stage of the mournful procession was marked by some incident which called forth a proof of the deep and lasting affection which the king's peculiar character had the power of inspiring in all who knew him. The first distinct halt was by a solitary olive-tree (2 Sam. xv. 18, LXX.) that marked the road to the wilderness of the Jordan. Amongst his guard of Philistines and his faithful company of 600* he observed Ittai of Gath, and with the true nobleness of his character entreated the Philistine chief not to peril his own or his countrymen's lives in the service of a fallen and a stranger sovereign. But Ittai declared his resolution (with a fervour which almost inevitably recalls a like profession [cp. Matt. xiv. 31 sq.] made almost on the same spot to the great descendant of David centuries afterwards) to follow him in life and in death. They all passed over the ravine of the Kedron; and here, when it became apparent that the king was really bent on departure, "the whole land wept with a loud voice"—the mountain and the valley resounded with the wail of the people. At this point they were overtaken by the two priests, Zadok and Abiathar, bringing the Ark from its place on the sacred hill to accompany David on his flight—Abiathar, the elder, going forward up the mountain, as the multitude defiled past him. Again, with a spirit worthy of the king, who was prophet as well as priest, David turned them back. He had no superstitious belief in the Ark as a charm; he had too much reverence for it to risk it in his personal peril. And now the whole crowd turned up the mountain pathway; all wailing, all with their heads muffled as they went; the king only distinguished from the rest by his unsandalled feet. At the top of the mountain, consecrated by an altar of worship, they were met by Hushai the Archite, "the friend," as he was officially called, of the king. The priestly garment, which he wore[†] after the fashion as it would seem of David's chief officers, was torn, and his head was smeared with dust, in the bitterness of his grief. In him David saw his first gleam of hope. A moment before, the tidings had come of the treason of Abithophel; and to frustrate his designs Hushai was sent back, just in time to meet Absalom arriving from Hebron. It was noon when David passed over the mountain top, and now, as Jerusalem was left behind, and the new scene opened before him, two new characters appeared, both in connexion with the hostile tribe of Benjamin, whose territory they were entering. One was Ziba, servant of Mephibosheth, taking advantage of the civil war to make his own fortunes. At Bahurim, also evidently on the downward pass, came forth one of its inhabitants, Shimei, in whose furious curses broke out the long-

suppressed hatred of the fallen family of Saul, as well perhaps as the popular feeling against the murderer[‡] of Uriah. With characteristic replies to both, the king descended to the Jordan valley (2 Sam. xvi. 14, and cp. xvii. 22; Jos. Ant. vii. 9, § 4), and there rested after the long and eventful day at the ford or bridge[§] (Abara) of the river. At midnight they were aroused by the arrival of the two sons of the high-priests, and by break of dawn they had reached the opposite side in safety.

To the dawn of that morning is to be ascribed Ps. iii., and (according to Ewald, though this seems less certain) to the previous evening, Ps. iv. Ps. cxliii. by its title in the LXX.—"When his son was pursuing him"—belongs to this time. Also by long popular belief the trans-Jordanic exile of Ps. xlii. has been supposed to be David, and the complaints of Ps. lv., lxix., and cix., to be levelled against Abithophel.

The history of the remaining period[¶] of the rebellion is compressed into a brief summary. Mahanaim was the capital of David's exile, as it had been of the exiled house of Saul (2 Sam. xvii. 24; cp. ii. 8, 12). Three great chiefs of that pastoral district are specially mentioned as supporting him: one, of great age, not before named, Barzillai the Gileadite; the two others, bound to him by former ties, Shobi, the son of David's ancient friend Nahash, probably put by David in his brother's place (xii. 30, x. 2); and Machir, the son of Ammiel, the former protector of the child of David's friend Jonathan (2 Sam. xvii. 27, ix. 4). His forces were arranged under the three great military officers who remained faithful to his fortunes—Joab, captain of the host; Abishai, captain of "the mighty men;" and Ittai, who seems to have taken the place of Benaiah (had he wavered in his allegiance, or was he appointed afterwards?), as captain of the guard (2 Sam. xviii. 2). On Absalom's side was David's nephew, Amasa (ib. xvii. 25). The warlike spirit of the old king and of his faithful followers at this extremity of their fortunes is well depicted by Hushai, "chafed in their minds, as a bear robbed of her whelps in the 'field' (or a fierce wild boar in the Jordan valley, LXX.):" the king himself, as of old, "lodging not with the people," but "hid in some pit or some other place" (2 Sam. xvii. 8, 9). The final battle was fought in the "forest of Ephraim," which terminated in the accident leading to the death[‡] of Absalom. At this point the narrative resumes its minute detail. As if to mark the greatness of the calamity, every particular of its first reception is recorded. David was waiting the event of the battle in the gateway of Mahanaim. Two messengers, each endeavouring to outstrip the other, were seen running breathless from the field. The first who arrived was Ahimaaz, the

† Cp. 2 Sam. xv. 28, xix. 18 (both Kethib, a reading preferred by most moderns over that of the Keri, *Araboth*, i.e. the "plains" or "deserts." Cp. Driver, in loco).

‡ If Ewald's interpretation of 2 Sam. xxiv. 13 be correct, and if the LXX. here and the Heb. of 1 Ch. xxi. 12 be followed, it was three months. The Jewish tradition (in Jerome, *Qu. Heb.* on 2 Sam. iv. 4) makes it six.

§ For the Mussulman legend, see Well, p. 161.

† 2 Sam. xv. 32. *Cutaneth*; *רֹב חִטָּה*; A. V. and R. V. "coat."

son of Zadok, already employed as a messenger on the first day of the king's flight. He had been entreated by Joab not to make himself the bearer of tidings so mournful; and it would seem that when he came to the point his heart failed, and he spoke only of the great confusion in which he had left the army. At this moment the other messenger burst in—a stranger, perhaps an Ethiopian¹—and abruptly revealed the fatal news (2 Sam. xviii. 19–32). [CUSHI.] The passionate burst of grief which followed is one of the best proofs of the deep affection of David's character. He wrapt himself up in his sorrow; and even at the very moment of his triumph, he could not forget the hand that had slain his son. He made a solemn vow to supersede Joab by Amasa, and in this was laid the lasting breach between himself and his powerful nephew, which neither the one nor the other ever forgave (2 Sam. xix. 13).

The return was marked at every stage by rejoicing and amnesty,—Shimei forgiven, Mephibosheth² partially reinstated, Barzillai rewarded by the gifts long remembered to his son CHIMHAM (2 Sam. xix. 16–40; 1 K. ii. 7). Judah was first reconciled. The embers of the insurrection still smouldering (2 Sam. xix. 41–43) in David's hereditary enemies of the tribe of Benjamin were trampled out by the mixture of boldness and sagacity in Joab, now, after the murder of Amasa, once more in his old position. And David again reigned in undisturbed peace at Jerusalem (2 Sam. xx. 1–22).³

(c) The closing period of David's life, with the exception of one great calamity, may be considered as a gradual preparation for the reign of his successor. This calamity was the three days' pestilence which visited Jerusalem at the warning of the prophet Gad. The occasion which led to this warning was the census of the people taken by Joab at the king's orders (2 Sam. xxiv. 1–9; 1 Ch. xxi. 1–7, xxvii. 23, 24); an attempt not unnaturally suggested by the increase of his power, but implying a confidence and pride alien to the spirit inculcated on the kings of the chosen people [see NUMBERS]. Joab's repugnance to the measure was such that he refused altogether to number Levi and Benjamin (1 Ch. xxi. 6). The king also scrupled to number those who were under twenty years of age (1 Ch. xxvii. 23), and the final result was never recorded in the "Chronicles of King David" (1 Ch. xxvii. 24). The plague, however, and its cessation were commemorated down to the latest times of the Jewish nation. Possibly Psa. xxx. and xci. had reference (whether David's or not) to this time. But a more certain memorial was preserved on the exact spot which witnessed the close of the pestilence,

¹ "Cushi"—or Hebrew *Aa-Cushi*, with the article. It is doubtful whether it is a proper name.

² The injustice done to Mephibosheth by this division of his property was believed to later traditions to be the sin which drew down the division of David's kingdom (Jerome, *Qu. Heb.* on 2 Sam. xix.). The question is argued at length by Selden, *De Successione*, c. 25, pp. 67, 68. See Chandler, li. 376.

³ To many English readers the events and names of this period have acquired a double interest from the power and skill with which Dryden has made the story of 'Absalom and Ahiathophel' the basis of his political poem on the Court of King Charles II.

or, as it was called, like the Black Death of 1348, "The Death." Outside the walls of Jerusalem, Araunah or Ornan, a wealthy Jebusite—perhaps even the ancient king of Jebus (2 Sam. xxiv. 23)⁴—possessed a threshing-floor: there he and his sons were engaged in threshing the corn gathered in from the harvest (1 Ch. xxi. 20). At this spot an awful vision appeared, such as is described in the later days of Jerusalem, of the Angel of the Lord stretching out a drawn sword between earth and sky over the devoted city.⁵ The scene of such an apparition at such a moment was at once marked out for a sanctuary. David demanded, and Araunah willingly granted, the site; the altar was erected on the rock of the threshing-floor; the place was called by the name of "Moriah" (2 Ch. iii. 1; the "Marru" of the Tel-el-Amarna tablets); and for the first time a holy place, sanctified by a vision of the Divine Presence, was recognised in Jerusalem. It was this spot which afterwards became the altar of the Temple, and therefore the centre of the national worship, with but slight interruption, for more than 1000 years, and it is even contended that the same spot is the rock, still regarded with almost idolatrous veneration, in the centre of the Mussulman "Dome of the Rock" (see Professor Willis in Williams' *Holy City*, ii.).

The selection of the site of this altar probably revived the schemes of the king for the building of a permanent edifice to receive the Ark, which still remained inside his own palace in its temporary tent. Such schemes, we are told, he had entertained after the capture of Jerusalem, or at the end of his wars. Two reasons were given for their delay. One, that the ancient nomadic form⁶ of worship was not yet to be abandoned (2 Sam. vii. 6); the other, that David's wars⁷ unfitted him to be the founder of a seat of peaceful worship (1 Ch. xxii. 8). But a solemn assurance was given that his dynasty should be established "for ever" to continue the work (2 Sam. vii. 13; 1 Ch. xxii. 9, 10). Such a founder, and the ancestor of such a dynasty, was Solomon to be, and to him therefore the stores⁸ and the plans of the future Temple (according to 1 Ch. xxii. 2–19, xxviii. 1–xxix. 19) were committed.

A formidable conspiracy to interrupt the succession broke out in the last days of David's reign [see ADONIJAH], which detached from his

⁴ In the original the expression is thought by some to be much stronger than in the A. V.: they read with R. V. marg., "Araunah, the king." The R. V. text reads "O king," referring the words to David. (See ARAUNAH.)

⁵ This apparition is also described in a fragment of the heathen historian Eupolemus (*Eus. Præp. Ev. ix. 30*), but is confused with the warning of Nathan against building the Temple. "An angel pointed out the place where the altar was to be, but forbade him to build the Temple, as being stained with blood, and having fought many wars. His name was *Dioathen*."

⁶ In 1 Ch. xxi. 26, a fire from heaven descends to sanctify the altar. This is not mentioned in 2 Sam. xxiv.

⁷ This is the subject of one of the apocryphal colloques (Fab. Apoc. v. l. p. 1004).

⁸ In this respect David still belonged to the older generation of heroes (see Jerome, *Qu. Heb. ad loc.*).

⁹ Eupolemus (*Eus. Præp. Ev. ix. 30*) makes David send fleets for these stores to Elath and to Ophir.

person two of his court, who from personal offence or adherence to the ancient family had been alienated from him—Joab and Abiathar. But Zadok, Nathan, Benaiah, Shimei, and Rei^a remaining firm, the plot was stifled, and Solomon's inauguration took place under his father's auspices^a (1 K. i. 1-53).

The Psalms which relate to this period are, by title, Ps. xcii.; by internal evidence, Ps. ii.

By this time David's infirmities had grown upon him. The warmth of his exhausted frame was attempted to be restored by the introduction of a young Shunammite, of the name of Abishag, mentioned apparently for the sake of an incident which grew up in connexion with her out of the later events (1 K. i. 1, ii. 17). His last song is preserved—a striking union of the ideal of a just ruler which he had placed before himself, and of the difficulties which he had felt in realizing it (2 Sam. xxiii. 1-7). His last words, as recorded, to his successor, are general exhortations to his duty, combined with warnings against Joab and Shimei, and charges to remember the children of Barzillai (1 K. ii. 1-9).

He died, according to Josephus (*Ant.* viii. 15, 2), at the age of 70, and "was buried in the city of David."^b After the return from the Captivity, "the sepulchres of David" were still pointed out between Siloah and "the house of the mighty men," or the guardhouse (Neh. iii. 16). His tomb, which became the general sepulchre of the kings of Judah, was pointed out in the latest times of the Jewish people. "His sepulchre is with us unto this day," says St. Peter at Pentecost (Acts ii. 29); and Josephus (*Ant.* vii. 15, 3; xiii. 8, 4; xvi. 7, 1) states that, Solomon having buried a large treasure in the tomb, one of its chambers was broken open by Hyrcanus, and another by Herod the Great. It is said to have fallen into ruins in the time of Hadrian (Dio Cassius, lix. 14). In Jerome's time a tomb, so called, was the object of pilgrimage (*Ep. ad Marcell.* 17, 46), but apparently in the neighbourhood of Bethlehem. The edifice shown as such from the Crusades to the present day is on the southern hill of modern Jerusalem, commonly called Mount Zion, under the so-called "Coenaculum" (for the description of it see Barclay's *City of the Great King*, p. 209. For the traditions concerning it, see Williams' *Holy City*, ii. 509-513). The so-called "Tombs of the Kings" have of late been claimed as the royal sepulchre by De Saulcy (ii. 162-215), who brought to the Louvre (where it may be seen) what he believed to be the lid of David's sarcophagus. But these tombs are outside the walls, and therefore cannot be identified with the tomb of David, which was emphatically *within* the walls (see Robinson, iii. p. 252, note).

The character of David has been so thoroughly brought out in the incidents of his life that it

need not be here described in detail. In the complexity of its elements,^c passion, tenderness, generosity, fierceness—the soldier, the shepherd, the poet, the statesman, the priest, the prophet, the king—the romantic friend, the chivalrous leader, the devoted father—there is no character of the O. T. at all to be compared to it. Jacob comes nearest in the variety of elements included within it. But David's character stands at a higher point of the sacred history, and represents the Jewish people just at the moment of their transition from the lofty virtues of the older system to the fuller civilisation and cultivation of the later. In this manner he becomes naturally, if one may so say, the likeness or portrait of the last and grandest development of the nation and of the monarchy in the person and the period of the Messiah. In a sense more than figurative, he is the type and prophecy of Jesus Christ. Christ is not called the son of Abraham, or of Jacob, or of Moses, but He was truly "the son of David."

To David's own people his was the name most dearly cherished after their first ancestor Abraham. "The city of David," "the house of David," "the throne of David," "the seed of David," "the oath sworn unto David" (the pledge of the continuance of his dynasty), are expressions which pervade the whole of the Old Testament and all the figurative language of the New, and they serve to mark the lasting significance of his appearance in history.^d

His Psalms (whether those actually written by himself be many or few) have been the source of consultation and instruction beyond any other part of the Hebrew Scriptures. In them appear qualities of mind and religious perceptions not before expressed in the sacred writings, but eminently characteristic of David,—the love of nature, the sense of sin, and the tender, ardent trust in, and communion with, God. No other part of the Old Testament comes so near to the spirit of the New. The Psalms are the only expressions of devotion which have been equally used through the whole Christian Church—Abyssinian, Greek, Latin, Puritan, Anglican.

The difficulties which attend on his character are valuable as proofs of the impartiality of Scripture in recording them, and as indications of the union of natural power and weakness which his character included. Some Rabbis in former times, and critics (like Bayle^e and Renan) in later times, have seized on its dark features and exaggerated them to the utmost. And it has been often asked, both by the scoffers and the serious, how the man after God's^f own heart could have

^a This variety of elements is strikingly expressed in "The Song of David," a poem written by the unfortunate Christopher Smart in charcoal on the walls of his cell, in his intervals of reason.

^b It may be remarked that the name never appears as given to any one else in the Jewish history, as if, like "Peter" in the Papacy, it was too sacred to be appropriated.

^c For some just remarks in answer to Bayle on the necessity of taking into account the circumstances of David's age and country, see Dean Milman's *Hist. of the Jews*, i. 247. The Rabbinical estimate, both favourable and unfavourable, of his character is summarised in Hamburger's *RE.* s. n.

^d This expression has been perhaps made too much of. It occurs only once in the Scriptures (1 Sam.

^a Jerome (*Qu. Heb.* ad loc.) renders Rei = Ira, not improbably. Klostermann would alter רַי into רַיָּא = his friends. Ewald conjectures (iii. 266, note) that he is identical with Raddai.

^b Eupolemnus (*Eus. Præp. Ev.* ix. 30) adds, "in the presence of the high-priest Eli."

^c A striking legend of his death is preserved in Well's *Legends*, pp. 169, 170; a very absurd one in Basnage, *Hist. des Juifs*, bk. v. ch. 2.

murdered Uriah, and seduced Bathsheba, and tortured the Ammonites to death? An extract from one who is not a too-indulgent critic of sacred characters expresses at once the common sense and the religious lesson of the whole matter. "Who is called 'the men after God's own heart'? David, the Hebrew king, had fallen into sins enough—blackest crimes—there was no want of sin. And therefore the unbelievers sneer, and ask, 'Is this your man according to God's heart?' The sneer, I must say, seems to me but a shallow one. What are faults, what are the outward details of a life, if the inner secret of it, the remorse, temptations, the often-baffled, never-ended struggle of it be forgotten? . . . David's life and history as written for us in those Psalms of his, I consider to be the truest emblem ever given us of a man's moral progress and warfare here below. All earnest souls will ever discern in it the faithful struggle of an earnest human soul towards what is good and best. Struggle often baffled—sore baffled—driven as into entire wreck: yet a struggle never ended, ever with tears, repentance, true unconquerable purpose begun anew" (Carlyle's *Heroes and Hero-Worship*, p. 72).

[A. P. S.]

DAVID, CITY OF. [JERUSALEM.]

DAY (*Yom*, יוֹם, Ges. from an unused root which may have had the meaning of *heat*, and also of *light*, Delitzsch. Cp. *lalaw*). The variable length of the natural day ("ab exortu ad occasum solis," Censor. *de Die Nat.* 23) at different seasons led in the very earliest times to the adoption of the civil day (or one revolution of the sun) as a standard of time. The commencement of the civil day varies in different nations: the Babylonians (like the people of Nuremberg) reckoned it from sunrise to sunrise (Isidor. *Orig.* v. 30); the Umbrians from noon to noon; the Romans from midnight to midnight (Plin. ii. 79); the Athenians and others from sunset to sunset (Macrob. *Saturn.* i. 3; Gell. iii. 2).

The Hebrews, if we may judge by some passages of the Mosaic Law and cosmogony (cp. Lev. xxiii. 32, R. V. "from even unto even shall ye keep your sabbath;" Gen. i. 5, R. V. "and there was evening and there was morning, one day," a passage which the Jews are said to have quoted to Alexander the Great, cp. *Tamid.* 33, 2; Reland, *Ant. Hebr.* iv. 15; Hershon, *Talm. Misc.* p. 146), count the night as the first portion of the civil day; though it must be admitted that Delitzsch [1887] and Dillmann⁸ agree in considering Gen. i. 5 as reckoning after the Babylonian practice from morning to morning. Others (cp. Godwin's *Moses and Aaron*) argue from Matt. xxviii. 1, Luke xliii. 54, that they began their civil day in the morning; but the expression *ἐπιφωσκούση*⁹ shows that the *natural* day is there

intended. Hence the expressions "evening-morning" = day (יָמָא בְּרִינָא, Dan. viii. 14; LXX. *νυχθήμερον*; also 2 Cor. xi. 25), the Hindoo *ahoratra* (Von Bohlen on Gen. i. 4), and *νυχθήμερον* (2 Cor. xi. 25). There was a similar custom among the Athenians, Arabians, and ancient Teutons (Tac. *Germ.* xi, "nec diurnum numerum ut apud nos, sed noctium computant . . . nox ducere diem videtur") and Celtic nations (Caes. *de B. G.* vi. 18, "ut noctem dies subsequatur"). This mode of reckoning was widely spread; it is found in the Roman law (Gaius, i. 112), in the *Niebelungenlied*, in the Salic law (*inter decem noctes*), in our own terms "fort-night," "seven-nights" (see Orelli, &c. Tac. in loco), and even among the Siamese ("they reckon by nights," Bowring, i. 137) and New Zealanders (Taylor's *To-lu-Mau*, p. 20). No doubt this arose from the general notion "that the first day in Eden was 36 hours long" (Lightfoot's Works, ii. 334, ed. Pitman; Hes. *Theogon.* 123; Aristoph. *Av.* 693); Kalisch plausibly refers it to the use of *lunar* years (*Gen.* p. 67; cp. Pa. civ. 19).

But it has, says Deutsch (Kittó's *Cyclop.* s. n.), always been a moot point whether the Hebrews, at all times and in all respects, began their calendar or civil day with the night. Sometimes they reckoned from sunrise (*ἡμερομηνία*: cp. Pa. i. 2; Lev. vii. 15). Deutsch quotes Mishnah *Chulin*, v. 6, to show that "ritually as general rule had ever been laid down as to the commencement of the civil day;" and says that even now a Hebrew letter written on Saturday night would be dated either יוֹם, "end of Sabbath," or אֶרְבֵּי עָרַב, "eve of the first day."

The Jews are supposed, like the modern Arabs, to have adopted from an early period minute specifications of the parts of the natural day. Roughly indeed they were content to divide it into "morning, evening, and noonday" (Pa. lv. 17); but when they wished for greater accuracy they divided the day into six unequal parts, each of which was again subdivided. The alleged distinctions are however so slight as to be barely perceptible, and the expressions vary in meaning. They are:—

I. הַבֵּיָא (from הָבָה, "to blow") and תָּאֵר or "the dawn." *Nesheph* is however also used for "evening" (Job xxiv. 15) and "night" (Is. xxi. 4). After their acquaintance with Persia they divided this into, (a) the time when the eastern, and (b) when the western horizon was illuminated, like the Greek *Leucothea* (Matuta) and *Aurora*; or "the gray dawn" (Milton) and the *rosy dawn*. Hence we find the dual *Shaharaim* as a proper name (1 Ch. viii. 8). The writers of the Talmud (see *Shabbath*, f. 34, 2) divide the dawn into four parts, of which the first was *Ajeleth hasshachar*, "the gazelle of the morning" (M.V.¹¹), the *Aurora* [AJELETH SHAHAR], a name by which the Arabians call the sun (cp.

xiii. 14, quoted again in Acts xiii. 22), where it merely indicates a man whom God will approve, in distinction from Saul who was rejected. A much stronger and more peculiar commendation of David is that contained in 1 K. xv. 3-5, and implied in Pa. lxxxix. 20-28.

⁸ For the phrase cp. Herod. iii. 88, αὐτὸν ἡμέρη διὰ διαφωσκούσης. McClellan (*The New Testament*, ad loc.) renders τῇ ἐπιφωσκούσῃ εἰς μίαν σαββάτην "on the

eve of the first day of the week." and gives various arguments and references to support the view that ἐπιφωσκούρα is used of "the whole interval between sunset and next sunrise, as preparatory to the expected light of the morrow." See further Camerton, *Exerc. Antibar.* p. 416, and Schleusner, *Lex. N. T.* s. v.

"eyelids of the dawn," Job iii. 9; ἀμέρας βλέφαρον, Soph. Antig. 109). This was the time when Christ arose (Mark xvi. 2; John xx. 1; Rev. xii. 16; ἡ ἐπιφωσκουσα, Matt. xxviii. 1).

The other three divisions of the dawn were, (2) "when one can distinguish blue from white" (πρωτὶ σκοτίας ἐστὶ οὐρα, John xx. 1; "obscurum adhuc coepta lucis," Tac. Hist. iv. 2). At this time they began to recite the phylacteries. (3) Cum lucescit oriens (δρόρος βαθύς, Luke). (4) Oriente sole (λαὸν πρωτὶ ἀνατείλαντος τοῦ ἡλίου, Mark xvi. 2; Lightfoot, Hor. Hebr. ad Marc. xvi. 2. In the Mishnah the phrase for twilight is בֵּין הַשֶּׁמֶשׁ לַבֹּרַי).

II. בֹּרַי, "sunrise." Some suppose that the Jews, like other Oriental nations, commenced their civil day at this time until the Exodus (Jennings' *Jewish Ant.*).

III. הַיּוֹם הַזֶּה, "heat of the day" (ἔως διεθερμάνθη ἡ ἡμέρα, LXX.), about 9 o'clock.

IV. הַיּוֹם הַשֵּׁנִי, "the two noons" (Gen. xliii. 16; Deut. xxviii. 29).

V. הַיּוֹם הַרַּחֲקִי, "the cool (lit. wind) of the day," before sunset (Gen. iii. 8); so called by the Persians to this day (Chardin, *Voy.* iv. 8; Jahn, *Arch. Bibl.* § 29).

VI. עֶרֶב, "evening." The phrase "between the two evenings" (Ex. xvi. 12, xxx. 8), being the time marked for slaying the Paschal lamb and offering the evening sacrifice (Ex. xii. 6, xxix. 39), led to a dispute between the Karaites and Samaritans on the one hand, and the Pharisees on the other. The former took it to mean between sunset and full darkness (Deut. xvi. 6); the Rabbinites explained it as the time between the beginning (δελήν πρωτα, "little evening") and end of sunset (δ. ὄψια, or real sunset: *Shabbath*, f. 34, 2; Joa. B. J. vi. 9, § 3; Gesen. s. v.; Jahn, *Arch. Bibl.* § 101; Bochart, *Hieroz.* i. p. 558).

Since the Sabbaths were reckoned from sunset to sunset (Lev. xxiii. 32), the Sabbatarian Pharisees, in that spirit of scrupulous superstition which so often called forth the rebukes of our Lord, were led to settle the minutest rules for distinguishing the actual instant when the Sabbath began (ὄψια, Matt. viii. 16 = ὅτε ἔδω δ ἥλιος, Mnrk). They therefore divided the time between the actual sunset and the appearance of three stars (Maimon. in *Shabb.*, cap. 5; cp. Neh. iv. 21, 22), and the Talmudists decided that "if on the evening of the Sabbath a man did any work after one star had appeared, he was forgiven; if after the appearance of two, he must offer a sacrifice for a doubtful transgression; if after three stars were visible, he must offer a sin-offering;" the order being reversed for works done on the evening after the actual Sabbath (Lightfoot, *Hor. Hebr.* ad Matt. viii. 16; Otho, *Lex. Rab. s. v. Sabbatum*). The necessity for such minute directions, in the absence of diels, &c., is illustrated by the story that once, on a cloudy afternoon, the Jews went to the Sabbath evening prayers by mistake some hours before sunset. Rabbi Jndah decided that the prayer was not to be repeated (*Berachoth*, f. 27, 6; Schwab, p. 332).

Before the Captivity the Jews divided the night into three watches (Ps. lxxii. 6; xc. 4): viz. the first watch, lasting till midnight (Lam.

ii. 19, A. V. and R. V. "the beginning of the watches") = ἀρχὴ νυκτός; the "middle watch" (which proves the statement), lasting till cock-crow (Judg. vii. 19) = μέσση νυκτός; and the morning watch, lasting till sunrise (Ex. xiv. 24) = ἀμφιλόγη νύξ (Hom. *Il.* vii. 433). These divisions were probably connected with the Levitical duties in the Temple service. The Jews, however, say (in spite of their own definition, "a watch is the third part of the night") that they always had four night-watches (cp. Neh. ix. 3), but that the fourth was counted as a part of the morning (Buxtorf's *Lex. Talm.* s. v.; Carpzov. *Appar. Crit.* p. 347; Reland, iv. 18).

In the N. T. we have allusions to four watches, a division borrowed from the Greeks (Herod. ix. 51) and Romans (φυλαχή, τὸ τέταρτον μέρος τῆς νυκτός, Suid.). These were: 1. ὀψέ, ὄψια, or ὄψια ὥρα, from twilight till 9 o'clock (Mark xi. 11; John xx. 19); 2. μεσο-νύκτιον, midnight, from 9 till 12 o'clock (Mark xiii. 35); 3. ἀλεκτοροφωνία, till 3 in the morning (Mark xiii. 35, *Ex. leg.*; 3 Macc. v. 23); 4. πρωτὶ, till daybreak, the same as πρωτα (ὥρα) (John xviii. 28; Jos. *Ant.* v. 6, § 5, xviii. 9, § 6).

The word held to mean "hour" is first found in Dan. iii. 6, 15; v. 5 (*Sha'ah*, חֲשָׁכָה, also "a while," iv. 19, R. V.). Perhaps the Jews, like the Greeks, learnt from the Babylonians the division of the day into twelve parts (Herod. ii. 109). In our Lord's time the division was common (John xi. 9). In the Talmud the day is divided into four parts of three hours each (*Aboda Zara*, f. 3). It is probable that Ahaz introduced the first sundial from Babylon (ἑρπιδιον, Πτολμ., Is. xxxviii. 8; 2 K. xx. 11), as Anaximenes did the first σκαδόγραφον into Greece (Jahn, *Arch.* § 101). Possibly the Jews at a later period adopted the clepsydra. The third, sixth, and ninth hours were devoted to prayer (Dan. vi. 10; Acts ii. 15, iii. 1, &c.).

On the Jewish way of counting their weekdays from the Sabbath, see Lightfoot's *Works*, ii. 334, ed. Pitman. [WEEK.]

By the Jewish rule of inclusive counting, "one day of a year is counted as a whole year" (*Rosh Hashana*, f. 2, 2). Hence if a king were crowned on Adar 29, on the next day (Nisan 1) he would be said to begin the second year of his reign. So, too, "part of a day is equivalent to a whole day" (*Moed Katon*, f. 17, 2). This must be borne in mind when we read such passages as Matt. xii. 40. The Jews had no names for the days of the week, but numbered them from the Sabbath.

The word "day" is used of a festal day (Hos. vii. 5); a birthday (Job iii. 1); a day of ruin (Hos. i. 11; Job xviii. 20; cp. *tempus, tempora reipublicae*, Cic., and *dies Cannensis*); the judgment-day (Joel i. 15; 1 Thess. v. 2); the kingdom of Christ (John viii. 56; Rom. xiii. 12); and in other senses which are mostly self-explaining. In 1 Cor. iv. 3, ὁπὸ ἀνθρωπίνης ἡμέρας is rendered "of man's judgment." Jerome, *ad Algas. Quaest.* x., considers this a Cilicium (Bochart, *Hieroz.* ii. 471). Grotius compares it with the phrases *diem dicere*, &c., and regards it as a Latinism [DAYSMAN]. Others, referring to Jer. xvii. 16, think that it

may be a Hebraism. On the prophetic or year-day system (Lev. xxv. 3, 4; Num. xiv. 34; Ezek. iv. 2-6, &c.), see a treatise in Elliot's *Hor. Apoc.* iii. 154 sq. The expression ἐπιούσιον, rendered "daily" in Matt. vi. 11, is an ἄπ. λεγ., and has been much disputed. It is unknown to classical Greek (ἐοικε πεπλάσθαι ὑπὸ τῶν Εὐαγγελιστῶν, Orig. *Orat.* 16). The Vulg. has *supersubstantialis*, a rendering recommended by Abelard to the nuns of the Paraclete. Theophyl. explains it as δ ἐπὶ τῇ οὐσίᾳ καὶ συστάσει ἡμῶν αὐταρκής, and he is followed by most commentators (cp. Chrysost. *Hom. in Or. Domin.*; Suid. and *Etym. M.* s. v.). Salmasius, Grotius, &c., arguing from the rendering ἡμέρη in the Nazarene Gospel, translate it as though it were = τῇ ἐπιούσῃ ἡμέρᾳ, or εἰς αἰῶνα (Sext. Senensis *Bibl. Sanct.* p. 444 a). It is not possible here to enter into the questions as to the etymology of the phrase, whether from ἐπὶ and οὐσία, meaning "for sustenance," whether physical or spiritual (which would rather require τροφίσιος); or from ἡ ἐπιούσα (ἡμέρα), meaning "for the coming day;" or from δ ἐπὶ αἰῶν, meaning "bread for the future life." If the second view be correct, the prayer is a prayer for our continual sustenance by the merciful providence of God; if the third, it is a prayer for spiritual food. But see the question examined at full length (after Tholuck) in Alford's *Greek Test.* ad loc.; Schleusner, *Lex.* s. v.; Wetstein, *N. T.* i. p. 461, &c. The meaning of τὸν ἄρτον ἡμῶν τὸν ἐπιούσιον has recently been elaborately examined by McClellan (*New Testament*, pp. 632-647), who arrives at the conclusion that it means "bread proper for the future world," i.e. "our bread of life eternal," and regards the rendering "daily" as "the one which is most manifestly and utterly condemned:" and by Bishop Lightfoot (*On a fresh Revision*, pp. 195-234), who decides that "the familiar rendering 'daily' is a fairly adequate representation of the original, nor does the English language furnish any one word which would answer the purpose so well." See Mansel and Cook's note in *Speaker's Comm.* in loco. [CHRONOLOGY.] [F. W. F.]

DAYS JOURNEY. An expression signifying not so much a recognised distance traversed as the time occupied in the journey (Gen. xxi. 23; Ex. iii. 18; Num. xi. 31; Deut. i. 2; 1 K. xix. 4; 2 K. iii. 9; Jonah iii. 3, 4; Luke ii. 44; Acts i. 12). No uniformity is to be expected in such a matter. A "day's journey" to a solitary traveller on a level plain would be a different thing from that of a caravan with women and children, with mules and camels, over mountains and valleys. It can only be generally affirmed that a man travelling at 3 miles an hour for six to eight hours would make a day's journey of 18 to 24 miles, and a camel at 2½ miles one of 15 to 20 miles. [F.]

DAYS MAN, an old English term, meaning *umpire* or *arbitrator* (Job ix. 33; see marg.). It is derived from *day*, in the specific sense of a day fixed for a trial (cp. 1 Cor. iv. 3, where ἀποκριθῆναι ἡμέρα—lit. *man's day*, and so given in Wycliffe's translation—is rendered "man's judgment" in the A. V. and R. V.). Similar expressions occur in German (*eine sache tagen*—

to bring a matter before a court of justice) and other Teutonic languages. The word "days-man" is found in Spenser's *Faerie Queene*, ii. c. 8, in the Bible of 1551 (1 Sam. ii. 25), and in other works of the same age. [W. L. B.]

DEACON (διάκονος; *diaconus*). The office described by this title appears in the N. T. as the correlative of ἐπίσκοπος [BISHOP]. As a *nomen officii* it is confined to Philip. i. 1; 1 Tim. iii. 8, 12; and Rom. xvi. 1 [see DEACONS], though the word is used frequently in other passages in reference to Christian ministers, but in no such strict official sense (see Eph. iii. 7, vi. 21; Col. i. 7, 23, iv. 7, &c.). In the LXX. it is curiously enough confined to the Book of Esther, in which it attains three times as the rendering of ΠΡΩΤΩ (Esth. i. 10; ii. 2; vi. 3). [It is true that Is. lx. 17 is quoted by Clement of Rome (*ad Cor.* xlii.) as follows:—καταστήσω τοὺς ἐπισκόπους αὐτῶν ἐν δικαιοσύνῃ καὶ τοὺς διακόνους αὐτῶν ἐν πίστει, and is thus applied to the Christian ministry; but the introduction of the διάκονοι is simply due to mistranslation, the LXX. being δώσω τοὺς ἀρχοντας σου ἐν εἰρήνῃ καὶ τοὺς ἐπισκόπους σου ἐν δικαιοσύνῃ. The text is similarly applied by Irenaeus (*adv. Haer.* iv. 26. 5), but quoted from the LXX. correctly.]

The narrative of Acts vi. is commonly referred to as giving the account of the institution of this office. The Apostles, in order to meet the complaints of the Hellenistic Jews that their widows were neglected in the daily ministration (διακονία), called on the body of believers to choose seven men "full of the spirit and of wisdom" whom they (i.e. the Apostles) might "appoint over this business." The seven were accordingly selected by the "whole multitude," and set before the Apostles, from whom they received their commission, with prayer and the laying on of hands (v. 6). The duties of the seven as gathered from this passage were to serve tables (διακονεῖν τραπέζαις), to attend to the distribution of the alms of the Church in money or in kind, while the ministry of the word (ἡ διακονία τοῦ λόγου) was reserved for the Apostles.

It is, however, noticeable that nowhere in the narrative are the "seven" called "deacons," and where Philip is mentioned again in xxi. 8 he is not spoken of as Philip the Deacon, but as "Philip the evangelist, which was one of the seven." It has also been thought that the gifts implied in the words "tull of the spirit and of wisdom" are higher than those required for the office of a Deacon in 1 Tim. iii.; and accordingly it has been inferred that we meet in this narrative with the record of a special institution to meet a special emergency, and that the seven were not Deacons in the later sense of the term, but (1) commissioners who were to superintend those that did the work of Deacons, prototypes of the later *Archdeacons* (Stanley, *Apost. Age*, p. 62, and E. H. P. in the 1st ed. of this *Dictionary*), or (2) the first elders, the office originally instituted for a single and quite special need being "afterwards gradually enlarged into the office of elder" (Ulhorn, *Christian Charity in the Ancient Church*, p. 76).

On this view the origin of the diaconate must be sought for at a still earlier period, and the germs of the office might plausibly be traced in the mention of the νεώτεροι καὶ νεώτεροι of

Acts v. 6, 10, who were perhaps not merely the younger men, but persons occupying a distinct position and exercising distinct functions. In spite, however, of this, it is believed that the following reasons are sufficient to establish the identity of the office whose creation St. Luke records in Acts vi. with the later diaconate:—

(1) Although the title *διάκονος* does not occur, yet the corresponding verb and substantive, *διακονεῖν* and *διακονία*, are both used (rr. 1, 2). (2) "The functions are substantially those which devolved on the Deacons of the earliest ages, and which still in theory, although not altogether in practice, form the primary duties of the office" (Lightfoot on *Phil.* p. 186). (3) From the position of the narrative in the Acts, and the emphasis with which it is recorded, it has been inferred that St. Luke regarded the establishment of the office, "not as an isolated incident, but as the initiation of a new order of things in the Church." (4) Tradition is unanimous as to the identity of the two offices, and that from the earliest times. Irenæus (the first author who alludes to them) speaks of both Nicolas and Stephen as ordained "to the diaconate" (*ad diaconium*; *adv. Hæc.* I. xxiii.; IV. xxvi.), and elsewhere speaks of Stephen as "primus diaconus" (III. xii. 13). So also Hippolytus and Cyprian in the following century, and later writers; and for some centuries the Roman Church restricted the number of Deacons to seven, thus preserving the memory of the first institution of the office (see the letter of Cornelius in Euseb. *H. E.* vi. ch. xliii.; and cp. Sozomen, *H. E.* vii. ch. xix.), while the 15th Canon of Neo-Cæsarea says distinctly: "Even in the largest towns there must be, according to the rule, no more than seven Deacons. This may be proved from the Acts of the Apostles." [The limitation did not always remain in force. Cp. Euseb. *H. E.* II. ch. i., n. 2 a; VI. ch. xliii., n. 18, edd. Wace and Schnaff.]

Taking, then, the account in Acts vi. as describing the creation of the office, we have to inquire:

I. Whether it can be traced to any previous organization.

II. How it spread from Jerusalem to other Churches.

III. What were the qualifications and functions of those appointed to it.

I. It has been thought that the office of Deacon may find its prototype in the organization of the Jewish synagogue, just as does the office of the Christian Presbyter. As the constitution of the Jewish synagogue had its elders (*ἄνγκυροι*) or pastors (*ἱερεῖς*), so also it had its subordinate officer (*ὑπέρτης*), the *ὑπέρτης* of Luke iv. 20, whose work it was to give the reader the roll containing the lessons for the days, to clean the synagogue, and to open and close it at the right time [see *SYNAGOGUE*]. It has sometimes been thought that this office may have suggested the institution of the Christian diaconate. It should, however, be noticed that (a) as a rule there was but one chazzan to each synagogue; (b) the Greek word used for this official by St. Luke in his Gospel is not *διάκονος* but *ὑπέρτης* (Luke iv. 20); (c) the duties of the chazzan are analogous to those of the modern parish clerk rather than to those of the primitive Deacon; and, further, (d) the length at

which St. Luke dwells upon the institution, when contrasted with the silence with which he passes over the origin of the presbyterate, may not unfairly be taken as an indication that he regards it as "not merely new within the Christian Church, but novel absolutely" (Lightf. on *Phil.* p. 187). We conclude, therefore, that the office of which Acts vi. gives us the origin was one which was entirely new. It is, however, not impossible that the number seven may have been suggested by the analogy of the *septem viri epulones* at Rome. These were a body of seven men appointed to relieve the *pontifices* and preside over the heathen religious banquets, which were to some extent analogous to the Christian *agapæ*. This institution would of course be familiar to the *Libertini* of the Imperial city (cp. Acts vi. 9), and may perhaps account for the long-continued limitation of the Deacons of the Roman Church to the original number (cp. Plumptre's *Biblical Studies*, p. 356).

II. For tracing the spread of the diaconate from the mother Church at Jerusalem to the various Churches of the Gentile world our materials are but scanty, and we are forced to be content with incidental allusions which appear to bear witness to the gradual extension of the office as the Church enlarged her borders. In 1 Cor. xii. 28, St. Paul, when enumerating the various offices and gifts in the Church, mentions among others "helps" (*ἀντιλήψεις*), in which expression some have found a definite allusion to the diaconate. Less doubtful is the reference to "ministration" (*διακονία*) in Rom. xii. 7, while a woman-deacon belonging to the Church of Cenchreæ is mentioned by name in xvi. 1 [see *DEACONESSES*]. Again, a very probable allusion to the office is found in 1 Pet. iv. 11, "If any man ministereth (*ἐὰν τις διακονεῖ*), ministering as of the strength which God supplieth;" while in Philip. i. 1 the Deacons are recognised together with the *ἐπίσκοποι* as constituting the two resident orders of ministers at Philippi. By the date of the Pastoral Epistles we find the office still more securely fixed. In 1 Tim. iii. 8 sq. St. Paul gives full directions with regard to the qualifications of those appointed to it, and from the language used it is evident that "in the Christian communities of proconsular Asia, at all events, the institution was so common that ministerial organization would be considered incomplete without it" (Lightf. on *Phil.* p. 189). But at the same time it must be noticed that in the Epistle to Titus there is no mention of the order; a fact which serves to mark the gradual extension of the office. The Church at Ephesus, which had been planted for some years and had taken firm root, possessed it, while in the newly organized Church of Crete it was apparently not considered indispensable.

These are all the notices of the diaconate in the New Testament. It does not fall within the province of this article to trace out its later history. It will be sufficient to point out that it is recognised as one of the orders of the Church by Clement of Rome (I. ch. xlii.), who, as we have seen, connects it with Ia. ix. 17; in the *Διάταξις τῶν δώδεκα ἀποστόλων* (ch. xv.); in Ignatius (*ad Polyc.* vi., &c.), Polycarp (*ad Phil.* v.), and all later writers who deal with the subject of the Christian ministry (see *Dictionary of Christian Antiquities*, art. "Deacon").

III. The moral qualifications described in 1 Tim. iii. as necessary for the office of a Deacon are, to a great extent, the same as those of the Bishop. The same purity and sobriety of life is required of each (μίας γυναῖκος ἄνδρα . . . μὴ οἶνῳ πολλῷ προσέχοντα, cp. μὴ πάροισιν, v. 3) the same power of influence at home (τέκνων καλῶς ποιστάμενος, v. 12, cp. v. 4); the same absence of the love of money (μὴ ἀλαχροκερδεῖς. So of the Bishop in Titus i. 7: in 1 Tim. iii. 3 the word is an interpolation, but cp. ἀφιλόγυρος). We notice, however, that the Deacons were not required to be "given to hospitality," nor to be "apt to teach." It was enough for them to "hold the mystery of the faith in a pure conscience." In their behaviour they were to be σεμνοί, and in their dealings with others μὴ διλογόι. On offering themselves for their work they were to be subject to a strict scrutiny (1 Tim. iii. 10), and if this ended satisfactorily were to enter upon their duties.

Their office was primarily that of the relief of the poor, the "serving of tablea" in the "daily ministration." As the Church spread and this "daily ministration" became an impossibility, they naturally dropped into the position of almoners of the community (see *Dict. of Christ. Antiq.* i. 528). Hence the qualifications on which St. Paul lays stress in their case are those which would be most important, not, as in the case of elders, in those who have to teach, but in those who were to move about from house to house, entrusted with the distribution of alms. It does not appear to have belonged to the office of a Deacon to teach publicly in the Church. The possession of any special χάρισμα would lead naturally to a higher work and office, but the idea that the diaconate was but a probation, through which a man had to pass before he could be an elder or Bishop, was foreign to the constitution of the Church of the 1st century. Whatever countenance it may receive from the common patristic interpretation of 1 Tim. iii. 13 (cp. Estina and Hammond in loco), there can be little doubt (as all the higher order of expositors have felt: cp. Wiesinger and Ellicott in loco) that when St. Paul speaks of the καλὸς θαυμάς, which is gained by those who "do the office of a Deacon well," he refers to the honour which belongs essentially to the lower work, not to that which they were to find in promotion to a higher. Traces of the primitive constitution and of the permanence of the diaconate are found even in the more developed system of which we find the commencement in the Ignatian Epistles. Originally the Deacons had been the helpers of the Bishop-elder of a Church of a given district. When the two names of the latter title were divided and the Bishop presided, the Deacons appear to have been dependant directly on him, and not on the Presbyters; and, as being his ministers, the "eyes and ears of the Bishop" (*Const. Apost.* ii. 44), were tempted to set themselves up against the elders. Hence the necessity of laws like those of *Conc. Nic.* c. 18; *Conc. Carth.* iv. c. 37, enjoining greater humility, and hence probably the strong language of Ignatius as to the reverence due to Deacons (*Ep. ad Trall.* c. 3; *ad Smyrn.* c. 8). [E. H. P.] [E. C. S. G.]

DEACONESS (διάκονος. The word διακονισσά is post-Biblical. It occurs in *Const. Apost.* iii.

ch. xv. [as a doubtful reading], and again in vi. ch. xvii., viii. ch. xxx. In *Conc. Nic.* c. 19 the reading is doubtful. Διάκονος is still used in *Conc. Chalcedon.* c. 15; *Sosomena, H. E.* iv. ch. xiv., &c.; and Theodoret, *it. ch.* xiv.). The word διάκονος is found in Rom. xvi. 1 associated with a female name ("Phoebe . . . quae est in ministerio ecclesiae," Vulg.); and this has led to the conclusion that there existed in the apostolic age, as there undoubtedly did a little later (Pliny, *Ep. ad Traj.* x. 97, "ancillae . . . quae ministræ dicebantur"), an order of women bearing that title, and exercising in relation to their own sex functions which were analogous to those of the Deacons. On this hypothesis it has been inferred that the women mentioned in Rom. xvi. 6, 12, belonged to such an order (Herzog, *RE*² "Diakonissa"). The rules given as to the conduct of women in 1 Tim. iii. 11, Tit. ii. 3, have in like manner been referred to them, and they have even been identified with the "widows" of 1 Tim. v. 3-10.

In some of these instances, however, it seems scarcely doubtful that writers have transferred to the earliest age of the Church the organization of a later. It was of course natural that the example recorded in Luke viii. 2, 3, should be followed by others, even when the Lord was no longer with His disciples. The new life which pervaded the whole Christian society (Acts ii. 44, 45; iv. 32) would lead women as well as men to devote themselves to labours of love. The strong feeling that the true *ἀγάπη* of Christians consisted in "visiting the fatherless and the widow" (Jas. i. 27) would make this the special duty of those who were best fitted to undertake it. The social relations of the sexes in the cities of the empire (cp. Grotius on Rom. xvi. 1) would make it fitting that the agency of women should be employed largely in the direct personal application of Christian truth (Tit. ii. 3, 4), possibly in the preparation of female catechumens. Even the later organization may be thought to imply the previous existence of the germs out of which it was developed. It may be questioned, however, whether all the passages referred to above allude to a recognised body bearing a distinct name. Much perplexity surrounds the question of the "widows," of whom two classes are distinctly recognised in 1 Tim. v. [see WIDOWS]; but there are very strong objections against the view of Schleiermacher, Mack, Schaff, and others, which identifies the enrolled widows of v. 2 with the deaconesses: for (a) there is not a particle of evidence that deaconesses and *χῆραι* are synonymous terms, and (b) the age fixed for admission, sixty, is wholly incompatible with the active duties which must have belonged to the office of the deaconess (see below, and cp. Ellicott in loco). In Tit. ii. 3-5 the directions are evidently not to officials, but to the elder and younger women generally, as in vv. 1 and 2 to aged men and in vv. 6-9 to younger men. In 1 Tim. iii. 11, however, it is probable that the reference is more definite, and that the order of deaconesses is alluded to (Chrys. and most moderns, including Lightfoot and Ellicott). The only alternative is to understand the charge of the Apostle as referring to the wives of the Deacons; and against this the following reasons appear conclusive: (a) the omission of *αἰώνων*;

(b) the expression *ῥαταῖς* (cp. v. 8), which seems to mark a new ecclesiastical class; (c) the injunction concerning Deacons in v. 12, which hardly looks as if their wives had been mentioned before; (d) the absence of any notice of the wives of the *ἐπισκοποι* in vv. 1-7; and (e) the omission of any special notice of domestic duties (see further Ellicott in loco). There remain the notices in Rom. xvi. 1, 6, 12. Of these the last two are perfectly general, and may or may not refer to deaconesses. The first, while clearly implying the existence of the office, tells us nothing of the functions of those who filled it.

These are all the passages in which it is possible to discover any trace of the office; and it will be seen from them how slight and fragmentary our knowledge of it is. The qualifications of deaconesses are laid down in 1 Tim. iii. 11. They were to be, like the Deacons, "grave" (*σεμνὰ*), "not slanderers" (*μὴ διδασκαλοῦντες*), answering to the *μη διδασκαλοῦντες* of the Deacons, "as the vice to which the female sex is more addicted," Alf.), "temperate" (*νηφάλιοι*, answering to *μη οὖν πολλὰ πρᾶξαι*), and "faithful in all things" (*πιστὰ ἐν παντί*, answering to *μη αἰσχροκερδεῖς*). With regard to their duties nothing definite is anywhere said in the N. T., and it is not safe to argue back from those undertaken by the deaconesses of the later Church, since the institution in its primitive form appears to have been almost confined to the apostolic age. There is, it is true, the certain allusion to them at the very beginning of the 2nd century in the letter of Pliny to Trajan, but apart from this there is no mention of the female diaconate outside the N. T. till the very end of the 3rd century, though the order of widows is frequently alluded to. The apostolic Fathers are all silent as to the office: so are Tertullian and Cyprian. Origen has nothing to say of it in his exposition of Rom. xvi. 1, nor does he mention it in his enumeration of Church dignitaries (in *Luc. Hom. 17*: cp. Uhlhorn's *Christian Charity in the Ancient Church*, p. 166). At the close of the 3rd century the institution was apparently revived in the East; but where the interval is so great, it would be highly precarious to transfer to the office in the apostolic age the functions assigned to it under the later ecclesiastical system. We are left then to conjecture what the duties of the office may have been from the qualifications required of those who undertook it. From these it may fairly be inferred (a) that their service included the visitation of the members of the Church in their homes, on which account the Apostle requires them not to be slanderers, carrying gossip from house to house; and (b) that they had some share in the distribution of alms, whence he specially enjoins them to be "faithful in all things" (cp. Uhlhorn, p. 79). Beyond this there is nothing whatever to be gathered from the N. T. [For the later history of the order, see *Dict. of Christ. Antiq.*, art. "Deaconess."]

[E. H. P.] [E. C. S. G.]

DEAD SEA. This name nowhere occurs in the Bible, and appears not to have existed until the 2nd century after Christ. It originated in an erroneous opinion, and there can be little doubt that to the name is due in a great measure the mistakes and misrepresentations which were

for so long prevalent regarding this lake, and which have not indeed yet wholly ceased to exist.

In the O. T. the lake is called "the Salt Sea," and "the Sea of the Plain" (*Arabah*); and under the former of these names it will be found described [SALT SEA]. [G.] [W.]

DEARTH. [FAMINE.]

DEBIR, the name of three places in Palestine. 1. (דְּבִיר), but in Judg. and Ch. דְּבִיר, *hinder part*, as of a temple, and hence the *sanctuary*, Ges.; BA. *Daßelp*; *Dabir*, a town in the mountains of Judah (Josh. xv. 49), one of a group of eleven cities to the west of Hebron. In the narrative it is mentioned as being the next place which Joshua took after Hebron (x. 38). It was the seat of a king (x. 39, xii. 13), and was one of the towns of the Anakim, from which they were utterly destroyed by Joshua (xi. 21). The earlier name of Debir was Kirjath-sopher, "city of book" (Josh. xv. 15; Judg. i. 11), and Kirjath-sannah, "city of palm" (Josh. xv. 49). The records of its conquest vary, though not very materially. In Josh. xv. 17 and Judg. i. 13 a detailed account is given of its capture by Othniel son of Kenaz, for love of Achsah the daughter of Caleb, while in the general history of the conquest it is ascribed to the great commander himself (Josh. x. 38, 39). In the last two passages the name is given in the Hebrew text as Debirah (דְּבִירָה). It was one of the cities given with their "suburbs" (מְנַחֲשֵׁי) to the priests (Josh. xxi. 15; 1 Ch. vi. 58). Debir does not appear to have been known to Jerome, and it has only been identified in modern times. Ewald (*Gesch.* ii. 373, note) appears to derive the name from דְּבִיר, "an oracle or adytum." He takes it to indicate a position "on the back, i.e. the S. or S.W. slopes of the mountains," and identifies the place with *edh-Dhähəriyeh*, a large village, with ancient cave dwellings, wells and cisterns, which stands high on a flat ridge, on the right bank of W. el-Khulil. In the list of cities in Josh. xv. 49, 50, Debir follows Socoh (*Shuweikeh*) and Danah (*Idhnah*), and precedes Anab (*Anab*) and Eshtemoa (*es-Sem'ia*); *edh-Dhähəriyeh* is situated between these places, and its identification with Debir is accepted by Conder (*PEF. Mem.* iii. 402, 407) and Tristram (*Bible Places*, p. 61). The "upper and the nether springs" may be found in the W. ed-Dibeh, a valley to the north of *edh-Dhähəriyeh*. In striking contrast to the general aridity of the south country, fourteen springs, divided into three groups, feed a stream that runs for three or four miles through a succession of small gardens (*PEF. Mem.* iii. 302). In this valley Van de Velde (*Mem.* p. 307) places Debir. About three miles to the W. of Hebron is a deep and secluded valley called the *Wādī Nunkūr*, enclosed on the north by hills of which one bears a name certainly suggestive of Debir, — *Debir-ban* (see the narrative of Rosen in the *Zeitsch. D. M. G.* 1857, pp. 50-64). Felix Fabri (*Evag.* ed. Hassler, ii. 338) heard of a place near this valley called Debir; and Schwarz (p. 86) speaks of a *Wādī Dibir* in this direction. This position, however, seems too far N. to meet the requirements of the narrative.

It has been assumed from the name Kirjath-sepher that the Canaanites were acquainted with writing and books; and Quatremère (*J. des Sav.* 1842, p. 513) considers that their archives were kept in the place: he instances as parallels the preservation of the Persian records (Ezra vi. 1, 2), and of the Phœnician records at Tyre; and to these are to be added the libraries of Babylon.

2. (דְּבִיר; *ḏēl rō tēraprōn tēs phāraggōs* 'Achor; *Debera*), a place on the north boundary of Judah, near the "valley of Achor" (Josh. xv. 7), and therefore somewhere in the complications of hill and ravine behind Jericho. A trace of the name may be retained in *Thoghret ed-Debr*, "the pass of the rear," not far from *Khān Hattirārāh*, on the Jerusalem-Jericho road; or perhaps in *W. ed-Dubbār*, near *Nebī Mūsa*. Cp. Dillmann² in loco.

3. The "border" (גְּבֻל) of Debir is named as forming part of the boundary of Gad (Josh. xiii. 26), and apparently as an eastern limit in contradistinction to Mahanaim, which was situated on the western edge of the highland above the Jordan valley; cp. "Heshbon unto Ramath-Mizpeh," which describes roughly the N. and S. limits of the tribe. Reland (p. 734) conjectures that the name may possibly be the

same as Lodebar (לִדְבָר), but no identification has yet taken place (BA. *Δαβείρ*; *Dabir*; R. V. marg. *Lidēbir*). Lying in the grazing country on the high downs east of Jordan, the name may be derived from דְּבָר, *Dubar*, the same word which is the root of *Midbar*, the wilderness or pasture (see Gen. p. 318). [DESERT.] Oliphant, *Land of Gilead*, p. 212, places Debir on the N.W. frontier of Gad, near the Sea of Tiberias. [G.] [W.]

DEBIR (דְּבִיר; B. *Δαβείρ*, A. *Δαβείρ*; *Dabir*), king of Eglon, a town in the low country of Judah; one of the five kings hanged by Joshua (Josh. x. 3, 23). [G.]

DEBORAH (דְּבֹרָה; *Δεββώρα*), a woman of Naphtali, mother of Tobiel, the father of Tobit (Tob. i. 8). The same name as

DEBORAH (דְּבֹרָה; *Δεββώρα*, *Δεββώρα*; *Debbora*). 1. The nurse of Rebekah (Gen. xxv. 8). Nurses held a high and honourable place in ancient times, and especially in the East (2 K. xi. 2; Hom. *Od.* i. 429; Virg. *Aen.* vii. 2, "Aeneia nutrix"; Ov. *Met.* xiv. 441), where they were often the principal members of the family (2 Ch. xxii. 11; Jahn, *Arch. Bbl.* § 166). Deborah accompanied Rebekah from the house of Bethuel (Gen. xxiv. 59), and is only mentioned by name on the occasion of her burial, under the oak-tree of Bethel, which was called in her honour Allon-Bachuth (*Βάλανος πένθος*, LXX.). Such spots were usually chosen for the purpose (Gen. xxiii. 17, 18; 1 Sam. xxxi. 13; 2 K. xxi. 18, &c.). If the numbers be correct, she must have attained the great age of at least 150 years, for she was grown up at Rebekah's birth, and Jacob was 97 when he returned from Paran, and was not born till twenty years after Rebekah's marriage (Gen. xxv. 19, 26). Many have been puzzled at finding Deborah in Jacob's family; it is unlikely that she was sent to summon Jacob from Haran (as Rashi suggests), or that she

had returned during the lifetime of Rebekah, and was now coming to visit her (as Abharbanel and others say); but she may very well have returned at Rebekah's death, and that Rebekah was dead is probable from the omission of her name in Gen. xxxv. 27; and if, according to the Jewish legend, Jacob first heard of his mother's death at this spot, it will be an additional reason for the name of the tree, and may possibly be implied in the expression בְּרִיחִי, comforted, A. V. and R. V. "blessed" (Gen. xxxv. 9; see too Ewald, *Gesch.* i. 390).

2. A prophetess who judged Israel (Judg. iv. v.). Her name, דְּבִירָה, means "a bee" (or σφή, "a wasp"), just as *Μελίσσα* and *Melittis* were proper names. This name may imply nothing whatever, being a mere appellative, derived like Rachel (a lamb), Tamar (a palm), &c., from natural objects; although she was (as Cora. a Lapid quaintly puts it) *suis melles, hostibus aculeata*. Some, however, see in the name an official title, implying her prophetic authority. A bee was an Egyptian symbol of regal power (cp. Callim. *Jor.* 66, and *Et. Maj.* s. v. *έσσην*); and among the Greeks and Romans the term was applied not only to poets (*more apīs Matinæ*, Hor.) and to those peculiarly chaste (as by the Neoplatonists), but especially to the priestesses of Delphi (*χορηγόρι μελισσας Δελφίδος*, Pind. P. iv. 106). Cybele, and Artemis (Creuzer, *Symbolik*, iii. 354, &c.), just as *έσσην* was to the priests. In both these senses the name suits her, since she was essentially a *rates* or seer, combining the functions of poetry and prophecy.

She lived in the one secure spot in Palestine, under the palm-tree of Deborah, between Ramah and Bethel in Mount Ephraim (Judg. iv. 5). "Such tents the patriarchs loved" (Coleridge). So Abraham lived under the oak of Mamre, and Saul under the pomegranate of Migron (Gen. xiv. 13; 1 Sam. xiv. 2). The words "she dwelt" may mean that she sat under the palm to deliver her judgments, just as St. Louis used to sit under the oak at Vincennes. Since palm-trees were rare in Palestine, this tree "is mentioned as a well-known and solitary landmark, and was probably the same spot as that called (Judg. xx. 33) Baal-Tamar, or the sanctuary of the palm" (Stanley, *S. and P.* p. 146). Von Bohlen (p. 334), followed by most moderns, thinks that this tree is the same as Allon-Bachuth (Gen. xxv. 8; see Dillmann², Delitzsch [1887]), the name and locality being nearly the same (Ewald, *Gesch.* i. 391, 405), although it is ridiculous to say that this "may have suggested a name for the nurse" (Hävernick's *Introduct. to Pent.* p. 201; Kalisch, *Gen.* ad loco). The same critics consider very probable the identification of the palm-tree of Deborah and "the oak of Tabor," in 1 Sam. x. 3, where Thenius would read דְּבִירָה for בְּרִיחִי. It was doubtless one of the well-known trees of Palestine, and such trees often became surrounded with religious associations. The Targum says, "She lived in Ataroth, having independent means, and she had palm-trees in Jericho, gardens in Ramah, olive-yards in the valley, well-watered lands in Bethel, and white clay in the King's mount."

Deborah was probably a woman of Ephraim, although from the expression in Judg. v. 15

some suppose her to have belonged to Issachar (Ewald, *Gesch.* ii. 489). The expression לַפִּיּוֹת (Judg. iv. 4) is much disputed; it is generally thought to mean "wife of Lapidoth," as in A. V. and R. V.; but other Versions render it "uxor principis," or "Foemina Lapidothana" ("that great dame of Lapidoth," Tennyson), or *mulier splendorum*, i.e. one divinely illuminated,

since לַפִּיּוֹת = lightninga. Those who take the latter view refer to Is. lxiii. 1; Job xli. 2; Nah. ii. 4; Ecclus. xlviii. 1, which, however, prove nothing. But the most prosaic notion is that of the Rabbis, who take it to mean that she attended

to the Tabernacle lamps, from לָפִיד, *lappid*, a lamp (*Magilla*, f. 14, Rashi). The fem. termination is often found in men's names, as in Shelomith (1 Ch. xxiii. 9), Naboth, Koheleth, &c. Lapidoth (or more correctly, Lappidoth) then was probably her husband, and not Barak, as is asserted by later Jews (*Midrash Rabba* on Ruth i.).

She was not so much a judge (a title which belongs rather to Barak, Heb. xi. 32) as one gifted with prophetic command in a time of despondency and confusion (Judg. iv. 6, 14, v. 7; *Midrash Koheleth*, § 5), and by virtue of her inspiration "a mother in Israel." Her sex would give her additional weight, as it did to Velleda and Alaurinia among the Germans, from an instinctive belief in the divinity of womanhood (*Tac. Germ.* viii.). Compare the instances of Miriam, Huldah, Noadiah, Anna (2 K. xxii. 14; Neh. vi. 14; Luke ii. 36). Among the Jews, however, prophetesses were the exception. According to the Rabbis, her prophetic functions ceased with the victory over Jabin (*Pesachim*, f. 66), and they explain Job v. 5 by the fact that the lands of Sisera were assigned to her and to Barak (see Hamburger, *R.E.* i. 241). With the exception of the Phœnician murderess Athaliah, she is the only female ruler in Jewish history; but she was less a ruler than a deliverer, like Joan of Arc, "the inspired maid of Domremi."

Jabin's tyranny was peculiarly felt in the northern tribes, who were near his capital and under Deborah's jurisdiction, viz. Zebulun, Naphthali, and Issachar; hence, when she summoned Barak to the deliverance, "it was on them that the brunt of the battle fell; but they were joined by the adjacent central tribes, Ephraim, Manasseh, and Benjamin, though not by those of the extreme west, south, and east" (Stanley, p. 339). Under her direction Barak encamped on the broad summit of Tabor (Jos. B. J. ii. 20, § 6). When asked to accompany him, "she answered indignantly, Thou, O Barak, deliverest up meekly the authority which God hath given thee into the hands of a woman; neither do I reject it" (Jos. *Ant.* v. 5, § 2). The LXX. interpolate the words *οτι ουκ ολθα την ηγεμον εν η ευσδοι ο Κυριος την ηγχερον μετ' εμου* as a sort of excuse for Barak's request (iv. 8, cp. v. 14, v. 23). When the small band of ill-armed (Judg. v. 8) Israelites saw the dense iron chariots of the enemy, "they were so frightened that they wished to march off at once, had not Deborah detained them, and commanded them to fight the enemy that very day" (Jos. i. c.). They

did so, but Deborah's prophecy was fulfilled (Judg. iv. 9), and the enemy's general perished among the "oaks of the wanderers (Zaanaim)," in the tent of the Bedouin Kenite's wife (Judg. iv. 21) in the northern mountains. "And the land had rest forty years" (Judg. v. 31). For the natural phenomena which aided (Judg. v. 20, 21) the victory, and the other details (for which we have ample authority in the twofold narration in prose and poetry), see BARAK, where we have also entered on the difficult question of the chronology (Ewald, *Gesch.* ii. 489-494). A village named *Debarich*, at the foot of Tabor, possibly preserves the traditional memorial of her association with Barak at Mount Tabor (Judg. iv. 10).

Deborah's title of "prophetess" (נְבִיאָה) includes the notion of inspired poetry, as in Ex. xv. 20; and in this sense the glorious triumphal ode (Judg. v.) well vindicates her claim to the office. On this ode much has been written, and there are separate treatises about it by Hollmann, Kalkar, and Kenrick. It is also explained by Ewald (*Die poet. Bücher des Alt. Bundes*, i. 125) and Gumpach (*Alttestament. Studien*, pp. 1-140). [F. W. F.]

DEBTOR. [LOAN.]

DECAPOLIS (Δεκάπολις, "the ten cities").

This name occurs three times in the N. T. (Matt. iv. 25; Mark v. 20, and vii. 31), and on each occasion it is used in a geographical sense to denote the territory belonging to "the ten cities," or perhaps, more generally, the district S.E. of the Sea of Galilee. The term seems, however, to have been a political rather than a geographical one, and to have been applied to a *bund*, or privileged confederation of free cities, formed for self-defence and joint political action, under the jurisdiction of the Governor of Syria.

According to Pliny (v. 16), the cities were Damascus, Philadelphia, Raphana, Scythopolis, Gadars, Hippos, Dion, Pella, Galasa (Garasa), and Canatha; he admits, however, that authorities differed as to the names of the cities, and states that between and around them there were tetrarchies, each like a kingdom, such as Trachonitis, Paneas, Abila, &c. Ptolemy (v. 17) makes Capitolias one of the cities; Reland (p. 525) quotes an old Palmyrene inscription which includes Abila in the Decapolis; whilst Josephus (*B. J.* iii. 9, § 7) calls Scythopolis the largest city of Decapolis, which would exclude Damascus. The discrepancies may perhaps be reconciled by supposing that ten cities at first received certain privileges and immunities, and that the name Decapolis was retained after changes had been made by increasing or decreasing the number of towns in the confederation.

In Matt. iv. 25, Decapolis is distinguished from the country beyond Jordan, though all the cities, with the exception of Scythopolis, were east of that river in the tetrarchy of Herod Agrippa. Eusebius and Jerome (*OS.* p. 251, 89) say that Decapolis was a district beyond Jordan, around Hippos, Pella, and Gsdara; Epiphanius (*adv. Hær.* i. 123) describes Decapolis as being around Pella and in Basanitis; Josephus always speaks of the cities as "Decapolis of Syria," possibly to show that they were under the jurisdiction of the Governor of Syria; and so

also Pliny when he praises (xv. 3) the olives of Decapolis of Syria. Elsewhere Pliny alludes to Philadelphia and Raphana as lying back towards Arabia, and to Pella as "rich in waters."

Each city appears to have been the centre of a small district which was subject to it, and to which it gave its name. Josephus (*B. J.* ii. § 1) speaks of the Jews having laid waste the villages of Decapolis; in *B. J.* iii. 3, § 5, he calls Pella the capital of a tetrarchy; Gadara was the capital of a large district, Gadarithis, which probably included Gergesa on the Sea of Galilee, and it was the seat of a district court (*B. J.* i. 8, § 5); the district of Philadelphia was known as Philadelphene, and that of Hippos as Hippene. These districts were quite independent of the provinces or tetrarchies in which they were situated; and their geographical position, in the provinces, may be compared with that of the detached portions of some English and Scotch counties.

The cities of Decapolis contained a mixed population, which varied according to the position of the city; Philadelphia, for instance, on the edge of the desert, was peopled by Greeks, Syrians, and Arabs (Strabo, xvi. 2, § 34). In each the Greek element preponderated: Josephus goes so far (*Ant.* xvii. 11, § 4) as to call Gadara and Hippos Greek cities; the official language, as shown by the coins and inscriptions, was Greek; Greek customs, forbidden to the Jews, such as the keeping of swine by the Gadarenes (Matt. viii. 28-33), prevailed; the people of Abila called themselves, on their coins, Seleuciaans; and some of the cities may have been Greek military settlements, as for instance Pella and Dion, which appear to have been named after and were possibly founded by colonists from Pella and Dion in Macedonia.

The Jews were, almost constantly, in a state of open warfare with the cities of Decapolis; and, even when this was not the case, the relations between them and the Greek inhabitants were strained. The cities, as heathen cities, paid no tithes; and some of them, as Scythopolis, could only be entered by Jews on certain conditions. This did not, however, prevent the Jews from living in them; at Scythopolis there was a large population of Jews, noted for the strictness with which they kept the Sabbath, and the scrupulous manner in which they performed their religious observances; at Gadara and Hippos there were also many Jews (*B. J.* ii. 18, § 5).

During the Maccabæan wars the cities suffered greatly, and nearly all of them seem to have fallen into the hands of Alexander Jannæus. At a later period they were recaptured by Pompey, who, after rebuilding and beautifying them, placed them under the jurisdiction of the Governor of Syria. At the same time he appears to have granted them self-government (*ἀὐτονομία*), and freedom and immunity from taxation (*ἐλευθερία καὶ ἀρεσκία*). Most of the towns, of which coins are extant, counted from the era of Pompey, 64 B.C., and to this date may perhaps be assigned the foundation of the confederation to which the name of Decapolis was given. At the commencement of the Jewish war, Justus and the people of Tiberias made war with Decapolis of Syria, and burned the villages which belonged to the cities; the people

thereupon sent an embassy of their chief men to Vespasian, who was then at Ptolemais, to complain of Justus and his actions (*Jos. Vit.* 64, 73).

The cities, with the rich fertile districts which belonged to them, were, in the time of the Saviour, populous and prosperous; six of them are now desolate and uninhabited; three—Scythopolis, Gadara, and Canatha—have a few families living in them; and one alone, Damascus, retains something of its former prosperity. [GADARA; GERASA; PHILADELPHIA; SCYTHOPOLIS.] [W.]

DECISION, VALLEY OF. [JEROSHAPHAT.]

DEDAN' (דֶּדָן; *Dedan, Dadan*). 1. The name of a son of Raamah, son of Cush (Gen. x. 7, A. דֶּדָן; 1 Ch. i. 9, A. דֶּדָן, B. יֶדְדָאֵן, "the sons of Raamah, Sheba, and Dedan"). 2. That of a son of Jokshan, son of Keturah (Gen. xxv. 3, A. [bis] דֶּדָן; D. and D. vary in the second occurrence of ד., and "Jokshan begat Sheba and Dedan. And the sons of Dedan were Asshurim, Letushim, and Leummim." Cp. 1 Ch. i. 32, BA. דֶּדָן). The usual opinion respecting these founders of tribes is that the first settled among the sons of Cush, wherever these latter may be placed; the second, on the Syrian borders, about the territory of Edom. But Gesenius and Winer have suggested that the name may apply to one tribe; and this may be adopted as probable on the supposition that the descendants of the Keturahite Dedan intermarried with those of the Cushite Dedan, whom the writer places, presumptively, on the borders of the Persian Gulf. [ARABIA; CUSH; RAAMAH, &c.] The theory of this mixed descent gains weight from the fact that in each case the brother of Dedan is named Sheba. It may be supposed that the Dedanites were among the chief traders traversing the caravan-route from the head of the Persian Gulf to the south of Palestine, bearing merchandise of India, and possibly of Southern Arabia; and hence the mixture of such a tribe with another of different (and Keturahite) descent presents no impossibility. The passages in the Bible in which Dedan is mentioned (besides the genealogies above referred to) are contained in the prophecies of Isaiah, Jeremiah, and Ezekiel, and are in every case obscure. The Edomite settlers seem to be referred to in Jer. xlix. 8, where Dedan is mentioned in the prophecy against Edom; again in xxv. 23, with Tema and Bux; in Ezek. xxv. 13, with Teman, in the prophecy against Edom; and in Is. xxi. 13, R. V. ("The burden upon Arabia. In the forest in Arabia shall ye lodge, O ye travelling companies of Dedanites"), with Tema and Kedar. This last passage is by some understood to refer to caravans of the Cushite Dedan; and although it may only signify the wandering propensities of a nomad tribe, such as the Edomite portion of Dedan may have been, the supposition that it means merchant-caravans is strengthened by the remarkable words of Ezekiel in the lamentation for Tyre. Ezekiel (in ch. xxvii.) twice mentions Dedan; first in r. 15, where, after enumerating among the traffickers with the merchant-city many Asiatic peoples, it is said

(R. V.), "The men of Dedan were thy traffickers, many isles (D'N) were the mart of thine hand: they brought thee in exchange horns of ivory, and ebony." Passing thence to Syria and western and northern peoples, the Prophet again (in v. 20) mentions Dedan in a manner which seems to point to the widespread and possibly the mixed ancestry of this tribe. Verse 15 may be presumed to allude especially to the Cushite Dedan (cp. xxxviii. 13, where we find Dedan with Sheba and the merchants of Tarshish; apparently, from the context, the Dedan of xxvii. 15); but the passage commencing in v. 20 appears to include the settlers on the borders of Edom (i.e. the Keturahite Dedan). The whole of the passage is as follows (R. V.): "Dedan [was] thy trafficker in precious clothes for riding. Arabia, and all the princes of Kedar, they were the merchants of thy hand; in lambs, and rams, and goats, in these [were they] thy merchants. The traffickers of Sheba and Raamah they [were] thy traffickers: they traded for thy wares with chief of all spices, and with all precious stones, and gold. Haran, and Canneh, and Eden, the traffickers of Sheba, Asshur, and Chilmad, [were] thy traffickers" (Ezek. xxvii. 20-23). We have here a Dedan connected with Arabia (probably the north-western part of the peninsula) and Kedar, and also with the father and brother of the Cushite Dedan (Raamah and Sheba), and these latter with Asiatic peoples commonly placed in the regions bordering the head of the Persian Gulf. This Dedan moreover is a merchant, not in pastoral produce, in sheep and goats, but in "precious clothes," in contradistinction to Arabia and Kedar, like the far-off Eastern nations who came with "spices and precious stones and gold," "wrappings of blue and brodered work," and "chests of rich apparel."

The probable inferences from these mentions of Dedan support the argument first stated, namely, 1. That Dedan son of Raamah settled on the shores of the Persian Gulf, and his descendants became caravan-merchants between that coast and Palestine. 2. That Jokshan, or a son of Jokshan, by intermarriage with the Cushite Dedan, formed a tribe of the same name, which appears to have had its chief settlement in the borders of Idumaea, and perhaps to have led a pastoral life.

All traces of the name of Dedan, whether in Idumaea or on the Persian Gulf, are lost in the works of Arab geographers and historians. The Greek and Roman geographers, however, throw some light on the eastern settlement; and a native indication of the name is thought to exist in the island of *Dadan*, on the borders of the gulf. The identification must be taken in connexion with Dr. Poole's recovery of the name of Sheba, the other son of Raamah, on the island of *Awál*, near the Arabian shore of the same gulf. This is discussed in the article *RAAMAH*. Consult Dillmann^s and Delitzsch [1887] on Gen. x. 7. [E. S. P.] [F.]

DEDA'NIM. [DEDAN.]

DEDA'NITES. [DEDAN.]

DEDICATION, FEAST OF THE (τὰ ἐγκαίνια, John x. 22, *Encenia*, Vulg.; δ ἐγκαίνιος τοῦ θυσιαστηρίου, 1 Macc. iv. 56 and 59

[the same term as is used in the LXX. for the dedication of the Altar by Moses, Num. vii. 10]; δ καθάρσιμος τοῦ ναοῦ, 2 Macc. x. 5; Mishna, פֶּקֶדֶן, i.e. "dedication"; Joseph. *φῶτα*, *Ant.* xii. 7, § 7), the festival instituted to commemorate the purging of the Temple and the rebuilding of the Altar after Judas Maccabaeus had driven out the Syrians, B.C. 164. It is named only once in the Canonical Scriptures, John x. 22. Its institution is recorded 1 Macc. iv. 47-59. It commenced on the 25th of Chisleu, the anniversary of the pollution of the Temple by Antiochus Epiphanes, B.C. 167. Like the great Mosaic Feasts, it lasted eight days, but it did not require attendance at Jerusalem. It was an occasion of much festivity. It was celebrated in nearly the same manner as the Feast of Tabernacles, with the carrying of branches of trees, and with much singing (2 Macc. x. 6, 7). Josephus states that the festival was called "Lights;" and there was certainly a setting forth of incense, lights, and shewbread (2 Macc. x. 3; cp. 1 Macc. iv. 50). Further, he supposes that the name was given to it from the joy of the nation at their unexpected liberty—τὴν ἑορτὴν ἀγομεν καλοῦντες αὐτὴν *φῶτα*, ἐκ τοῦ παρ' ἐκπῆδος ὁμαί ταύτην ἡμῖν *φανῆναι* τὴν ἐξουσίαν (*Ant.* xii. 7, § 7). The title chosen by our Lord, "I am the Light of the world" (John ix. 5), may have reference to the custom of lighting the lights of the seven-branched candlestick (see *Speaker's Comm.* on John x. 22). The Mishna informs us that no fast on account of any public calamity could be commenced during this Feast. In the Gemara a story is related that when the Jews entered the Temple, after driving out the Syrians, they found there only one bottle of oil which had not been polluted, and that this was miraculously increased, so as to feed the lamps of the sanctuary for eight days. The special number of lights to be lit was a matter of discussion in the 1st century A.D. in the schools of Hillel and Shammai. The latter enjoined eight lights on the first night, and one light less each night that the festival lasted. The former reversed the process, and, beginning with one light, increased the number daily by one, till on the last night the eight lights were burning. The latter custom was in existence in the time of Maimonides, and is still the custom of the British Jews (Mills, *The British Jews, their religious Ceremonies*, &c., pp. 183-7). Neither the Books of Maccabees, the Mishna, nor Josephus mention this custom, and it would seem to be of later origin, probably suggested by the name which Josephus gives to the festival. In the Temple at Jerusalem, the "Hallel" was sung every day of the feast.

In Ezra (vi. 16) the word פֶּקֶדֶן, applied to the dedication of the second Temple, on the third of Adar, is rendered in the LXX. by ἐγκαίνια, and in the Vulg. by *dedicatio*. But the anniversary of that day was not observed. The dedication of the first Temple took place at the Feast of Tabernacles (1 K. viii. 2; 2 Ch. v. 3). [TABERNALES, FEAST OF.]

See Lightfoot, *Temple Service*, sect. v.; *Horae Hev.* on John x. 22, and his *Sermon* on the same text; Mishnah, vol. ii. 369, ed. Surenhusius; Hamburger's *RE. Abth.* ii. a. n. "Weihfest;" Westcott on John x. 22. [S. C.] [F.]

DEEP, THE (ἀβυσσος; *abyssus*). This is the rendering adopted by the A. V. in Luke viii. 31 and Rom. x. 7, of a word which it translates "bottomless pit" in Rev. ix. 1, 2, 11, xi. 7, xx. 1, 3. The R. V. has adopted the rendering "abyss" in all these passages, and such a rendering is especially needful in Luke viii. 31, as avoiding the interpretation that by "the deep" is meant the sea. Rather, according to many, is meant that part of the under-world in which evil spirits are confined. [F.]

DEGREES, SHADOW OF. [AHAZ; DIAL; HEZEKIAH.]

DEGREES, SONGS OF, or, more accurately, SONGS OF ASCENTS (R. V.). These "Songs" are fifteen in number, and constitute Psalms cxx.-cxxxiv. Fourteen of these Psalms (cxx., cxxii.-cxxxiv.) are each superscribed *Shir Hamma'aloth* (שִׁיר הַמַּעֲלוֹת), whilst one of them (cxxi.) bears the heading of *Shir Lamma'aloth* (שִׁיר לַמַּעֲלוֹת). Rashi, with his fine Hebrew instinct, remarks that, although *Shir Lamma'aloth* stands second, it is in reality the first of the series. This observation is quite true, and can be critically established, both negatively and positively,—negatively, as there can be no reason assigned for the break of the uniformity of this series so early, and the immediate resumption of it to break it no more. Again, one may make practically, i.e. in a mere translation, no difference between *Shir Hamma'aloth* and *Shir Lamma'aloth*. But *Hamma'aloth* and *Lamma'aloth* are in Hebrew not one and the same thing; as, indeed, they cannot be. This was already perceived by the keen critic Ibn Ezra, who gives *Shir Hamma'aloth* as the beginning of one poem, the tune of which was well known, whilst he gives *Shir Lamma'aloth* as the beginning of another poem, &c. (although he is in the interpretation of these names as mistaken as he is in that of several other headings; cp. *AIJELETIT SIAHAR, AL-TASCHITH*, &c.). But that Psalm cxxi. was originally meant to stand first can also be proved positively, as it is evidently introductory (even as Psalm cxxxiv. is terminatory) to the whole series, and expresses the leading idea why for one of the several reasons these Psalms are called Songs of Liftings-up, of Goings-up, of Adoring, and of Trusting in, Him Who dwells on high, and is the Most High.* Thus: I lift up mine eyes (cxi. 1). To God (on high) I called (cxi. 1). I was glad when they said to me, Let us go (up) to the House of God. For there went up the tribes (cxxii. 1, 4). To Thee I lift up mine eyes (cxxiii. 1). The righteous God Who is even higher than the oppressor, Who is higher than Israel (cxxiv.; see below, cxxix.). Mountains (uplands) are round Jerusalem, and God is round His people (cxxv. 2). When God brings back (up) the Captivity of Zion (cxxvi. 1). If God (from on high) does not build a house (cxxvii. 1). The man fearing God who walketh in His Way (looketh up to Him for guidance; cxxviii. 1). The same argument as in cxxiv., though expressed in a

somewhat different way (cxxix.). I called from the depths (to Him on high; cxxx. 1). Mine eyes are not lifted up in pride (but in humility, to God; cxxxi. 1). Let us go up to His tabernacles (cxxxii. 7). Brethren (Israel and Judah) to dwell together (on the hills, i.e. uplands, of Zion; cxxxiii. 1-3). Lift up your hands in holiness (cxxxiv. 2). This explanation does by no means exclude some of the other reasons for calling these poems *Shir Lamma'aloth* and *Shir Hamma'aloth*. No doubt, both before the Captivity and after the return from it, the Hebrews, on going up to Jerusalem, recited one or other of these Psalms on such occasions as the three annual festivals, the bringing-up the first-fruits, the bringing-up the second tithe, &c. Nor does this explanation exclude the ideas that these fifteen Psalms gave rise to the construction of the fifteen steps communicating between the court of the women and the Israelite court, on which the Levites sang and played on the occasion of the "Joy at the Drawing of the Water;" and that these fifteen steps gave rise, in their turn, to the superscriptions of the fifteen Psalms, which were apparently recited upon them. These are ideas which are embodied in traditions which are too well founded to be called in question (cp. *Mishnah Middoth*, ii. 5; *Sukkah*, v. 4; and compare with one another Rab Se'adyah's first interpretation, as quoted by Ibn Ezra, and Rashi'a and Qimchi's interpretations in loco). What this entirely new explanation does exclude, however, is, first, that these songs ever stood in connexion with the legend concerning the Deep and David and Abithophel, &c.; a legend to which the Targum in loco alludes, and which the Talmud contains (*Babli Sukkah*, fol. 53a). Such a Midrash, though consistent, is not to be taken seriously, since there is not the least allusion to it in all these fifteen Psalms. What this explanation next excludes is Rab Se'adyah Gaon's second interpretation (see Ibn Ezra), which was adopted by Luther. It was that these poems were therefore called *Shir Hamma'aloth* and *Shir Lamma'aloth*, because they were sung in a higher, i.e. a more powerful, key. For this interpretation there is not the slightest warrant or even hint to be found anywhere, be it in these sublime compositions themselves, or even in the traditions of the Talmud and Midrash. What this explanation finally excludes is the stereotyped theory advanced by Ibn Ezra, that fourteen of these Psalms were sung to one and the same tune, and one to a different melody. This is impossible, as these fourteen Psalms differ greatly from one another, not merely in authorship and time of composition, but in sentiment and length of diction. The other theories advanced, that these fifteen Psalms were called *Shir Hamma'aloth* and *Shir Lamma'aloth* because of their "repetitive or ladder-like structure," or because they were the "choicest of all Psalms," scarcely need refutation. [S. M. S.-S.]

DEHAVITES (דֵּהָוִיִּים [*Kethib*], דֵּהָוִיִּים [*Keri*], ed. Baer; A. [2 Esd.] Δαυαῖοι, B. of εἰσὶν Ἰλαραῖοι; *Dievi*) are mentioned but once in Scripture (Ezra iv. 9). They were among the colonists planted in Samaria by the Assyrian monarch Esarhaddon, after the completion of the Captivity of Israel. From their name, taken in conjunction with the fact that they are

* Hence one of God's names in the Bible is עֶלְיוֹן, and in the Talmud בְּרַחְמָא.

coupled with the Susanchites (Susianians, or people of Susa) and the Elamites (Elymaeans, cp. B., natives of the same country), it is conjectured that they are the Dai or Dahi, mentioned by Herodotus (i. 125) among the nomadic tribes of Persia. This people appears to have been widely diffused, being found as Dahae (Δάαι=Dahistae), both in the country east of the Caspian (Strab. xi. 8, § 2; Arrian. *Exped. Al.* iii. 11, &c.) and in the vicinity of the Sea of Azof (Strab. xi. 9, § 3); and again as Dii (Δῖαι, Thucyd. ii. 96), Dai (Δάοι, Strab.), or Daci (Δακάι, Strab., Dio Cass., &c.) upon the Danube. They were an Aryan race, and are regarded by some as having their lineal descendants in the modern Danes (see Grimm's *Geschichte d. Deutsch. Sprach.* i. 192-3). This conjecture, as also that of Friedl. Delitzsch (*Præf.* p. x. to Baer's ed. of Daniel, Ezra, and Nehemiah), who finds their city Du'-a-n in an Assyrian contract tablet, is questioned by Schrader (*KAT.* p. 616) and Bertheau-Rysel (*Die BB. Esra, Nehem., u. Ester*, in loco). The Septuagint form of the name—*Dacacus*—may compare with the *Darus* (= Δάρος) of Latin comedy. [G. R.] [F.]

DE'KAR. The son of Deker, i.e. BEN-DEKER (דְּקָר בֶּן דְּקָר; *vids* Δακάρ; *Bendekar*), was Solomon's commissariat officer in the western part of the hill-country of Judah and Benjamin, Shaalvim and Bethshean (1 K. iv. 9). [G.]

DELAIAH (דְּלַיָּה and דְּלַיָּה = *whom Jehovah hath freed*—cp. ἀπελευθερώς Κυρίου, 1 Cor. vii. 22; also the Phœnician name Δελασφότος, quoted from Menander by Josephus, *Cont. Ap.* i. 18, and the modern name Godfrey = Gottesfrey), the name of several persons.

1. DELAIAHU (A. Δαλαία, B. Μαασά; *Dalaia*), a priest in the time of David, leader of the twenty-third course of priests (1 Ch. xxiv. 18).

2. DELAIAH; "children of Delaiah" were among the people of uncertain pedigree who returned from Babylon with Zerubbabel (Ezra ii. 60 [A. Δαλαία, B. Δαχά; *Dalaia*]; Neh. vii. 62 [NA. Δαλαία, B. Δαλαά; *Dalaia*]). In 1 Esd. v. 37 the name is LADAN [A. Δαλάν, B. Ἀσάν].

3. DELAIAH (NA. Δαλαία, B. Δαλαά; *Dalaia*), son of Mehetabeel and father of Shemaiah (Neh. vi. 10).

4. DELAIAHU (Δαλαίας and Γοδολίας), son of Shemaiah, one of the "princes" (דְּלַיָּה) about the court of Jehoiakim (Jer. xxvi. 12, 25).

The name also occurs in the A. V. as DALAIAH. [G.] [F.]

DELI'LAH (דְּלִילָה = *weak* or *feeble*, either in the sense of *delicate* or *pinning with desire*, or as a *traitress*; Δαλιλά; Joseph. Δαλίλη; *Dalila*), a woman who dwelt in the valley of Sorek, beloved by Samson (Judg. xvi. 4-18). Her connexion with Samson forms the third and last of those amatory adventures which in his history are so inextricably blended with the craft and prowess of a judge in Israel. She was bribed by the "lords of the Philistines"

to win from Samson the secret of his strength, and the means of overcoming it. [SAMSON.]

It is not stated, either in Judges or in Josephus, whether she was an Israelite or a Philistine. Nor can this question be determined by reference to the geography of Sorek; since in the time of the Judges the frontier was shifting and indefinite. [SOREK.] The following considerations, however, supply presumptive evidence that she was a Philistine:—

1. Her *occupation*, which seems to have been that of a courtesan of the higher class, a kind of political Hetaera. The hetaeric and political view of her position is more decided in Josephus than in Judges. He calls her γυνή ἐταρῆ(σμένη), and associates her influence over Samson with πότος and συνουσία (*Ant.* v. 8, § 11). He also states more clearly her relation as a political agent to the "lords of the Philistines" (Δῖται, Joseph. οἱ προεστώτες, τοῖς ἄρχουσιν Παλαιστίων; LXX. ἄρχοντες; *Satrapae*; οἱ τοῦ κοινοῦ; "magistrates," "political lords," Milton, *Sams.* Ag. 850, 1195), employing under their directions "liers in wait" (Δῖται, τὸ ἐνεδρον; *insidiis*: cp. Josh. viii. 14; Josephus, στρατιωτῶν). On the other hand, Chrysostom and many of the Fathers have maintained that Delilah was married to Samson (so Milton, l. 227), a natural but uncritical attempt to save the morality of the Jewish champion (see Judg. xvi. 9, 18, as showing an exclusive command of her establishment inconsistent with the idea of matrimonial connexion; Patrick, in loco). There seems to be little doubt that she was a courtesan; and her employment as a political emissary, together with the large sum which was offered for her services (1100 pieces of silver from each lord = 5,500 shekels, about £700; cp. Judg. iii. 3), and the tact which is attributed to her in Judges, but more especially in Josephus, indicates a position not likely to be occupied by any Israelitish woman at that period of national depression.

2. The special tendency of the Scripture narrative: the sexual temptation represented as acting upon the Israelites from *without* (Num. xxv. 1, 6; xxxi. 15, 16).

3. The special case of Samson (Judg. xiv. 1; xvi. 1).

In Milton Delilah appears as a Philistine, and justifies herself to Samson on the ground of patriotism (*Sams.* Ag. ll. 850, 980). [T. E. B.]

DELUGE. [NOAH.]

DELUS (Δῆλος), mentioned in 1 Macç. xv. 23, is the smallest of the islands called Cyclades in the Aegean Sea. It was one of the chief seats of the worship of Apollo, and was celebrated as the birthplace of this god and of his sister Artemis (Diana). We learn from Josephus (*Ant.* xiv. 10, § 8) that Jews resided in this island, which may be accounted for by the fact, that after the fall of Corinth (B.C. 146) it became the centre of an extensive commerce. The sanctity of the spot and its consequent security, its festival, which was a kind of fair, the excellence of its harbour, and its convenient situation on the highway from Italy and Greece to Asia, made it a favourite resort of merchants. So extensive was the commerce carried on in the island, that 10,000 slaves are said to have

changed hands there in one day (Strab. xiv. p. 668). Demas at present uninhabited, except by a few shepherds. See further, *Dict. of Gr. & Rom. Geogr.* s. v. [W. S.]

DEMÁS (Δημάς; *Demas*). The name is probably a shortened form of Demetrius. He was a companion of St. Paul, classed by him (Philem. r. 24) with Mark, Aristarchus, and Luke as a fellow-worker, and joined with these in greetings to Philemon. He was not a Jew, for in Col. iv. 14 he is, with Luke, expressly separated from "those of the circumcision." It is noticeable that in the verse quoted Luke has an epithet of affection, while Demas is barely named. This difference forebodes the final contrast in 2 Tim. iv. 10, 11: "Demas forsook me, having loved this present world, and went to Thessalonica . . . Only Luke is with me." It is scarcely fair to conclude with Epiphanius (*Haeres.* li. 6), and, we may add, with Bunyan, that absolute apostasy is implied. We merely gather that he would not stay with St. Paul at Rome under the trying circumstances of his imprisonment. His journey to Thessalonica has been very probably interpreted by Chrysostom as a return home (ἐλθετο οἴκου τρυφᾶν, "he chose to live in luxury at home"). Lightfoot (Col. iv. 14) inclines to consider him a Thessalonian; and so a fellow-citizen of the more faithful Aristarchus. [E. R. B.]

DEMETRIUS (Δημήτριος; *Demetrius*).

1. A master silversmith of Ephesus, employing many men in the manufacture of silver models of the temple of Artemis, which it was customary to wear on the body, or place in houses, as amulets. Demetrius and his fellow-craftsmen, in fear for their trade, raised a tumult against Paul and his companions. For the commercial interests involved in idolatry, cp. Pliny's satisfaction at the renewed demand for "keep" (*pastus*) for sacrificial victims in consequence of the measures which he had taken against Christianity (Plin. *Ep. ad Traj.* 96). The speech of Demetrius has had a commentary provided for it by one of the inscriptions discovered by Mr. Wood at Ephesus, in which the glory of Artemis is set forth in nearly the same language as that which Demetrius uses (see *Contemp. Review*, May 1878, p. 294).

2. A Christian mentioned by St. John (3 John v. 12) as deserving the confidence of Gaius, to whom the Epistle is addressed. He is described as having the testimony (1) of all, i.e. Christians generally; (2) of the Truth itself, so far as the ideal of Christianity was seen to be realised by him; (3) of St. John and those with him, speaking with the authority of the Church. This commendation of him seems to imply that he was about to visit Gaius, very probably as the bearer of the Epistle. See Westcott, *Epp. of St. John*, in loco. [E. R. B.]

DEMETRIUS I. (Δημήτριος), surnamed "The Saviour" (Σωτήρ, in recognition of his services to the Babylonians), king of Syria, was the son of Seleucus Philopator, and grandson of Antiochus the Great. While still a boy he was sent by his father as a hostage to Rome (B.C. 175) in exchange for his uncle Antiochus Epiphanes. From his position he was unable to offer any opposition to the usurpation of the

Syrian throne by Antiochus IV.; but on the death of that monarch (B.C. 164) he claimed his liberty and the recognition of his claim by the Roman senate in preference to that of his cousin Antiochus V. His petition was refused from selfish policy (Polyb. xxii. 12); and, by the advice and assistance of Polybius, whose friendship he had gained at Rome (Polyb. xxxi. 19; Just. xxiv. 3), he left Italy secretly, and landed with a small force at Tripolis in Phoenicia (2 Macc. xiv. 1; 1 Macc. vii. 1; Jos. Ant. xii. 10, § 1). The Syrians soon declared in his favour (B.C. 162), and Antiochus and his protector Lysias were put to death (1 Macc. vii. 2, 3; 2 Macc. xiv. 2). Having thus gained possession of the kingdom, Demetrius succeeded in securing the favour of the Romans (Polyb. xxxii. 4), and he turned his attention to the internal organisation of his dominions. The Graecizing party were still powerful at Jerusalem, and he supported them by arms. In the first campaign his general Bacchides established Alcimus in the high-priesthood (1 Macc. vii. 5-20); but the success was not permanent. Alcimus was forced to take refuge a second time at the court of Demetrius; and Nicanor, who was commissioned to restore him, was defeated in two successive engagements by Judas Maccabaeus (1 Macc. vii. 31-2, 43-5), and fell on the field. Two other campaigns were undertaken against the Jews by Bacchides (B.C. 161, 158); but in the meantime Judas had completed a treaty with the Romans shortly before his death (B.C. 161), who forbade Demetrius to oppress the Jews (1 Macc. viii. 31). Not long afterwards Demetrius further incurred the displeasure of the Romans by the expulsion of Ariarathes from Cappadocia (Polyb. xxxii. 20; Just. xxxv. 1); and he alienated the affection of his own subjects by his private excesses (Just. l. c.; cp. Polyb. xxxiii. 14). When his power was thus shaken (B.C. 152), Alexander Balas was brought forward, with the consent of the Roman senate, as a claimant to the throne, with the powerful support of Ptolemy Philometor, Attalus, and Ariarathes. Demetrius vainly endeavoured to secure the services of Jonathan, who had succeeded his brother Judas as leader of the Jews, and now, from the recollection of his wrongs, warmly favoured the cause of Alexander (1 Macc. x. 1-6). The rivals met in a decisive engagement (B.C. 150), and Demetrius, after displaying the greatest personal bravery, was defeated and slain (1 Macc. x. 48-50; Jos.

Ant. xiii. 2, § 4; Polyb. iii. 5). In addition to the very interesting fragments of Polybius, consult the following references: Just. xxiv. 3, xxxv. 1; App. *Syr.* 46, 47, 67. [B. F. W.] [R.]

DEMETRIUS II. (*Δημήτριος*), "The Victorious" (*Νικητράς*), was the elder son of Demetrius Soter. He was sent by his father, together with his brother Antiochus, with a large treasure, to Cnidus (Just. xxxv. 2), when Alexander Balas laid claim to the throne of Syria. When he was grown up, the weakness and vices of Alexander furnished him with an opportunity of recovering his father's dominions. Accompanied by a force of Cretan mercenaries (Just. l. c.; cp. 1 Macc. x. 67), he made a descent on Syria (B.C. 148), and was received with general favour (1 Macc. x. 67 sq.). Jonathan, however, still supported the cause of Alexander, and defeated Apollonius, whom Demetrius had appointed governor of Coele-Syria (1 Macc. x. 74-82). In spite of these hostilities, Jonathan succeeded in gaining the favour of Demetrius when he was established in the kingdom (1 Macc. xi. 23-27), and obtained from him an advantageous commutation of the royal dues and other concessions (1 Macc. xi. 32-37). In return for these favours the Jews rendered important services to Demetrius when Tryphon first claimed the kingdom for Antiochus VI., the son of Alexander (1 Macc. xi. 42), but, afterwards being offended by his faithless ingratitude (1 Macc. xi. 53), they espoused the cause of the young pretender. In the campaign which followed, Jonathan defeated the forces of Demetrius (B.C. 144; 1 Macc. xii. 28); but the treachery to which Jonathan fell a victim (B.C. 143) again altered the policy of the Jews. Simon, the successor of Jonathan, obtained very favourable terms from Demetrius (B.C. 142); but shortly afterwards Demetrius was himself taken prisoner (B.C. 138) by Arsaces VI. (Mithridates), whose dominions he had invaded (1 Macc. xiv. 1-3; Just. xxxvi.). Mithridates treated his captive honourably, and gave him his daughter in marriage (App. Syr. 67); and after his death, though Demetrius made several attempts to escape, he still received kind treatment from his successor, Phraates. When Antiochus Sidetes, who had gained possession of the Syrian throne, invaded Parthia, Phraates employed Demetrius to effect a diversion. In this Demetrius succeeded; and when Antiochus fell in battle, he again took possession of the Syrian crown (B.C. 128). Not long afterwards an Egyptian pretender, Alexander Zabinas, supported by Ptolemy VII. Physcon, appeared in

some (App. Syr. 68) by the order of his wife (Just. xxxix. 1; Jos. Ant. xiii. 9, 3). [CLEOPATRA.] [B. F. W.] [R.]

DEMETRIUS III., "The Prosperous" (*εὐκαίρος*), was the fourth son of Antiochus Gryppus, and therefore grandson of Demetrius II. Nicator. The two elder sons of Antiochus Gryppus, Seleucus VI. and Antiochus XI., had been defeated and slain by Antiochus X. (Eusebes). The two younger brothers, Philip and Demetrius Eucerus, were more successful. Philip first ascended the throne, but Demetrius, through the support of Ptolemy Lathurus, was also made king at Damascus; and as Antiochus X. (Eusebes) soon after perished in a war with the Parthians, Philip and Demetrius were for a short time masters of Syria (Jos. Ant. xiii. 13, § 4). It was at this time that the great Jewish rebellion against king Alexander Jannæus was at its height. The leaders of the Pharisee faction implored the assistance of king Demetrius, who came to their aid with 3,000 horse and 40,000 foot (Jos. Ant. xiii. 14, § 5; Bell. Jud. i. § 4). A severe engagement near Shachem ended in the complete victory of Demetrius (circ. 87 B.C.). Many, however, of the disaffected Jews seem to have dreaded a revival of the Syrian supremacy more than the tyranny of Alexander Jannæus; and immediately after Demetrius' victory 6,000 of the insurgents went over to the side of the fugitive Asmonean king. Discouraged by this treacherous conduct or by the heavy losses in the recent encounter, Demetrius returned to his own country. A civil war breaking out between the two brothers, Demetrius besieged Philip in the town of Beraea (Aleppo). Mithridates Siuaces, the Parthian king, came to the aid of Philip. Demetrius was defeated and taken prisoner. He was well treated by Mithridates, but ended his days in captivity in Parthia (Jos. Ant. xiii. 14, §§ 1, 4). The coins which have been discovered bearing the inscription of Demetrius III. Eucerus belong to the seven years from 95 to 88 B.C. (cp. Gardner's *Catalogue of Greek Coins*, p. 101). [R.]

DEMETRIUS PHALAREUS (*Δημήτριος ὁ Φαλαρεὺς*). In the Letter of the Pseudo-Aristens, the Egyptian king, Ptolemy II. Philadelphus (284-247) applies, at the instigation of his librarian Demetrius Phalareus, to Eleazar, the high-priest at Jerusalem, in order to obtain for the great library at Alexandria a copy of the Jewish Law. Demetrius receives the seventy-two Jewish delegates whom the high-priest sends and conducts them with great ceremony to the island of Pharos, where in seventy-two days they completed the Greek version of the Pentateuch (Gallandi, *Biblioth. Patr.* ii. p. 771). According to Eusebius, Aristobulus the Alexandrine Jew (circ. 170 B.C.) also connected the name of Demetrius Phalareus with the LXX. translation (ap Euseb. *Præp. Evang.* xiii. 12, 1-2: ἡ δὲ ὅλη ἐρμηνεία τῶν διὰ τοῦ νόμου πάντων ἐπὶ τοῦ προσαγορευθέντος Φιλαδέλφου βασιλέως, σοῦ δὲ προγόνου, προσευκαμένον μελίσσῃ φιλοτιμίᾳ, Δημήτριου τοῦ Φαλαρέως πραγματευσαμένου τὰ περὶ τούτων), but it is more than probable that he has based this statement upon the Letter of the Pseudo-Aristes, or upon an early version of that legend.

Tetradrachm (Attic talent) of Demetrius II.

Obv. Head of Demetrius to the right. Rev. ΒΑΣΙΛΕΥΣ ΔΗΜΗΤΡΙΟΥ ΘΕΟΥ ΦΙΛΑΔΕΛΦΟΥ ΝΙΚΑΤΟΡΟΣ; in exergue ΕΡΩΤΕΙ (168? of Era Seleuc.). Apollo to the left, seated on cithara, with arrow and bow.

the field against him. Demetrius, after suffering a defeat near Damascus, fled to Ptolemais, and thence took ship to Tyre, where, as he was about to land, he was assassinated, according to

The unhistorical character of the Letter has been often abundantly demonstrated. [See SEPTUAGINT.] It is well illustrated by the use made of the name of Demetrius Phalareus. For it does not appear that Demetrius Phalareus ever resided at Alexandria in the reign of Ptolemy II. Philadelphus. According to our account, which there is no reason to doubt, Demetrius was banished from the court on the death of Ptolemy Lagi, whose favourite he had been (Hermippus Callimachus *ap. Diog. Laert.* v. 78), and died shortly after (c. n.c. 283) in exile in Upper Egypt. On his early life and his political career at Athens, see Smith's *Dict. of Gr. and Rom. Biog.*

The fact that the foundation of the great library at Alexandria was associated in popular tradition with the name of this remarkable man, Attic orator and Alexandrian courtier, a patron of literature, was sufficient to account for his introduction into a Jewish legend, intended to glorify the origin of the Alexandrine Version, regardless of anachronisms. [R.]

DEMETRIUS, a Jewish historian of Alexandria, who lived in the reign of Ptolemy IV. Philopator, n.c. 222-205. Clemens Alexandrinus (*Strom.* i. 21, 141) has preserved an extract of his work *Concerning the Kings in Judaea* (*περὶ τῶν ἐν τῇ Ἰουδαίᾳ βασιλέων*), which deals with the chronology of the Captivity of the Ten Tribes. Other fragments ascribed to him survive in the writings of Eusebius, one relating to the story of Jacob (*ap. Euseb. Praep. Evang.* ix. 21), and others to the life of Moses (*id. ix. 29, 1-3; Chron. Pasch.* i. 117; and *ap. Euseb. Praep. Evang.* ix. 29, 15). It is probable that he was the author of a complete work on Israelite history. The subject of his literary labours and the character of the extant extracts make it practically certain that he was a Jew by birth; and this is the opinion both of Eusebius (*Hist. Eccl.* vi. 13, 17, *ἐστὶ μὴν Ἰσραηλῆς καὶ Ἀριστοβούλου, Ἰωσήφου τε καὶ Δημητρίου καὶ Εὐπολέμου, Ἰουδαίων συγγραφέων*) and of Jerome (*De Viris Illustr.* xxxviii. 879: "neonem et de Judaeis Aristobulum quemdam et Demetrium et Eupolemum scriptores adversus Gentes refert, qui in similitudinem Josephi ἀρχαγογόναν Moysi et Judaicae gentis asseverant"). Josephus himself, however, seems to think otherwise; for, speaking of the failure of Gentile historians to do justice to Jewish history, he makes exception in favour of Demetrius, Philo the elder, and Eupolemus, whose slight deviations from accuracy were excusable on the ground of an incomplete acquaintance with Hebrew literature (*contr. Apion.* i. 23, *sub fin.*: ὁ μέντοι Φαλκρεὺς Δημήτριος καὶ Φίλων δὲ πρεσβύτερος καὶ Εὐδόλεμος οὐ πολλὴ τῆς ἀληθείας δὴμαρτον. Οἱς συγγινώσκουν ἔξιν· οὐ γὰρ ἐνῆν αὐτοῖς μετὰ πάσης ἀκριβείας τοῖς ἡμετέροις γράμμασιν παρακολουθεῖν). Josephus, it will be noticed, seems to have confused Demetrius the historian with Demetrius Phalareus; and so far as Demetrius is concerned, this may account for his error. Some scholars, however, have regarded Josephus' statement as sufficient proof that Demetrius was not a Jew (*e.g.* Hody, *De Textibus*, p. 107). [R.]

DEMON (LXX. δαιμόνιον; N. T. δαίμωνιον, or rarely δαίμων. Derivation uncertain. Plato [*Crat.* i. p. 398] connects it with δαίμων, "in-

telligent," of which indeed the form δαίμων is found in Archil. [n.c. 650]; but it seems more probably derived from δαῖς, to "divide" or "assign," in which case it would be similar to Μοῖρα). In sketching out the Scriptural doctrine as to the nature and existence of the demons, we will consider, 1st, the usage of the word δαίμων in classical Greek; 2ndly, notice any modification of it in Jewish hands; and, 3rdly, refer to the passages in the N. T. in which it is employed (*cp.* Cremer, *Bibl.-theol. Wörterb.*⁴; Thayer, *Gk. Engl. Lex.* to N. T. s.n.).

I. Its usage in classical Greek is various. In Homer, where the gods are but supernatural men, it is used interchangeably with θεός; afterwards in Hesiod (*Op.* 121), when the idea of the gods had become more exalted and less familiar, the δαίμονες are spoken of as intermediate beings, the messengers of the gods to men. This latter usage of the word evidently prevailed afterwards as the correct one, although in poetry, and even in the vague language of philosophy, τὸ δαιμόνιον was sometimes used, as equivalent to τὸ θεῖον, for any superhuman nature. Plato (*Symp.* pp. 202, 203) fixes it distinctly in the more limited sense: πᾶς τὸ δαιμόνιον μεταξὺ ἐστὶ Θεοῦ καὶ θνητοῦ . . . θεὸς ἀνθρώπου οὐ μίγνυται, ἀλλὰ διὰ δαιμόνων πᾶσα ἐστὶν ἡ ὁμιλία καὶ ἡ διδασκαλία τοῖς ἀνθρώποις. Among them were numbered the spirits of good men, "made perfect" after death (Plat. *Crat.* p. 398, quotation from Hesiod). It was also believed that they became tutelary deities of individuals (to the purest form of which belief Socrates evidently referred in the doctrine of his δαιμόνιον): and hence δαίμων was frequently used in the sense of the "fate" or "destiny" of a man (as in the tragedies constantly), thus recurring, it would seem, directly to its original derivation.

The notion of distinctively evil demons appears to have belonged to a later period, and to have been due both to Eastern influence and to the clearer separation of the good and evil in men's thoughts of the supernatural.* They were supposed to include the spirits of evil men after death, and to be authors, not only of physical, but of moral evil.

II. In the LXX. the words δαίμων and δαιμόνιον, although not found very frequently, are yet employed to render different Hebrew words; generally in reference to the deities of heathen worship; as in Pa. xcv. 3, for עֲלִילִים, the "empty," the "vanities," rendered χεῖροκτοῦτοις, &c., in Lev. xix. 4, xxvi. 1: in Deut. xxxii. 17, for אֱלֹהִים, "lords" (*cp.* 1 Cor. viii. 5); in Is. lxi. 11, for גִּד, Gad, the god of Fortune: sometimes in the sense of avenging or evil spirits, as in Ps. xci. 6, for צָרָה, "pestilence," i.e. evidently "the destroyer;" also in Is. xiii. 21, xxiv. 14, for עֲרֵב, he-goat, and עֲרֵבָה, "dwellers in the desert," in the same sense in which the A. V. renders "satyr."

In Josephus we find the word "demons" used always of evil spirits; in *Bell. Jud.* vii. 6, § 3,

* Those who imputed lust and envy of man to their gods were hardly likely to have a distinct view of supernatural powers of good and evil, as eternally opposed to each other.

he defines them as τὰ πνεύματα τῶν ποιηρῶν, and speaks of their exorcism by fumigation (as in Tob. viii. 2, 3). See also *Ant.* vi. c. 8, § 2; viii. c. 2, § 5. Writing as he did with a constant view to the Gentiles, it is not likely that he would apply the word to heathen divinities.

By Philo the word appears to be used in a more general sense, as equivalent to "angels," and referring to spirits both good and evil.

The change, therefore, of sense in the Hellenistic usage is, first, the division of the good and evil demons, and the more general use of the word for the latter; secondly, the application of the name to the heathen deities.

III. We now come to the use of the term in the N. T. In the Gospels generally, in James ii. 19, and in Rev. xvi. 14, the demons are spoken of as spiritual beings, at enmity with God, and having power to afflict man, not only with disease, but, as is marked by the frequent epithet "unclean," with spiritual pollution also. In Acts xix. 12, 13, &c., they are exactly defined as τὰ πνεύματα τῶν ποιηρῶν. They "believe" in the power of God "and tremble" (Jas. ii. 19); they recognise our Lord as the Son of God (Matt. viii. 29; Luke iv. 41), and acknowledge the authority of His name, used in exorcism, in the place of the name of Jehovah, by His appointed messengers (Acts xix. 15); and look forward in terror to the judgment to come (Matt. viii. 29). The description is precisely that of a nature akin to the angelic [see ANGELS] in knowledge and powers, but with the emphatic addition of the idea of positive and active wickedness. Nothing is said either to support or to contradict the common Jewish belief, that in their ranks might be numbered the spirits of the wicked dead. In support of it are quoted the fact that the demoniacs sometimes haunted the tombs of the dead (Matt. viii. 28), and the supposed reference of the epithet ἀκάθαρτα to the ceremonial uncleanness of a dead body.

In 1 Cor. x. 20, 21, 1 Tim. iv. 1, and Rev. ix. 20, the word δαιμόνια is used of the objects of Gentile worship, and in the first passage is opposed to the word Θεῶ (with a reference to Deut. xxxii. 17). So also is it used by the Athenians in Acts xvii. 18. The same identification of the heathen deities with the evil spirits is found in the description of the damsel having πνεῦμα πύθωνα, or πύθωνος, at Philippi, and the exorcism of her as a demoniac by St. Paul (Acts xvi. 16); and it is to be noticed that in 1 Cor. x. 19, 20, the Apostle is arguing with those who declared an idol to be a pure nullity, and while he accepts the truth that it is so, yet declares that all, which is offered to it, is offered to a "demon." There can be no doubt then of its being a doctrine of Scripture, mysterious (though not *a priori* improbable) as it may be, that in idolatry the influence of the demons was at work, and permitted by God to be effective within certain bounds. There are not a few passages of profane history on which this doctrine throws light; nor is it inconsistent with the existence of remnants of truth in idolatry, or with the possibility of its being, in the case of the ignorant, overruled by God to good.

Of the nature and origin of the demons, Scripture is all but silent. On one remarkable occasion, recorded by the first three Evangelists (Matt. xii. 24-30; Mark iii. 22-30; Luke xi.

14-26), our Lord distinctly identifies Satan with Beelzebub, τῷ ἑρχοῦντι τῶν δαιμονίων; and there is a similar though less distinct connexion in Rev. xvi. 14. From these we gather certainly that the demons are agents of Satan in his work of evil, subject to the kingdom of darkness, and doubtless doomed to share in its condemnation; and we conclude probably (though attempts have been made to deny the inference) that they must be the same as "the angels of the devil" (Matt. xxv. 41; Rev. xii. 7, 9), "the principalities and powers" against whom we "wrestle" (Eph. vi. 12, &c.). As to the question of their fall, see SATAN; and on the method of their action on the souls of men, see DEMONIACS.

The language of Scripture, as to their existence and their enmity to man, has suffered the attacks of scepticism, merely on the ground that, in the researches of natural science, there are no traces of superhuman orders of being, and that the fall of spirits, created doubtless in goodness, is to us inconceivable. Both facts are true, but the inference false. The very darkness in which natural science ends, when it approaches the relation of mind to matter, not only does not contradict, but rather gives probability to the existence of supernatural influence. The mystery of the origin of evil in God's creatures is inconceivable; but the difficulty in the case of the angels differs only in degree from that of the existence of sin in man, of which nevertheless as a fact we are only too much assured. The attempts made to explain the words of our Lord and the Apostles as a mere accommodation to the belief of the Jews must be dissipated by any careful study of the actual details. They are clearly incompatible with the simple and direct attribution of personality to the demons, as much as to men or to God, and must destroy or impair our faith in the truth and honesty of Holy Scripture itself. [A. B.]

DEMONIACS (δαιμονιζόμενοι, δαιμόνια ἔχοντες). This phrase is frequently used in the N. T., and applied to persons suffering under the possession of a demon or evil spirit [see DEMON], such possession generally showing itself visibly in bodily disease or mental derangement. The word δαιμόνιον is used in a nearly equivalent sense in classical Greek (as in Aesch. *Choeph.* 566; *Sept. c. Theb.* 1001; Eur. *Phoen.* 888, &c.), except that, as the idea of spirits distinctly evil and rebellious hardly existed, such possession was referred to the will of the gods or to the vague prevalence of an ἄτη. Neither word is employed in this sense by the LXX., but in our Lord's time (as is seen, for example, constantly in Josephus) the belief in the possession of men by demons, who were either the souls of wicked men after death, or evil angels, was thoroughly established among all the Jews with the exception of the Sadducees alone. With regard to the frequent mention of demoniacs in Scripture, three main opinions have been started.

I. That of the purely mythical school, which makes the whole account merely symbolic, without basis of fact. The possession of the devils is, according to this idea, only a lively symbol of the prevalence of evil in the world, the casting out the devils by our Lord a corresponding symbol of His conquest over that evil

power by His doctrine and His life. The notion stands or falls with the mythical theory as a whole: with regard to the special form of it, it is sufficient to remark the plain, simple, and prosaic relation of the facts as facts, which, whatever might be conceived as possible in highly poetic and avowedly figurative passages, would make their assertion here not a symbol or a figure, but a falsehood. It would be as reasonable to expect a myth or symbolic fable from Thucydides or Tacitus in their accounts of contemporary history.

II. The second theory is, that our Lord and the Evangelists, in referring to demoniacal possession, spoke only in accommodation to the general belief of the Jews, without any assertion as to its truth or its falsity. It is concluded that—since the symptoms of the affliction were frequently those of bodily disease (as dumbness, Matt. ix. 32; blindness, Matt. xii. 22; epilepsy, Mark ix. 17-27), or those seen in cases of ordinary insanity (as in Matt. viii. 28; Mark v. 1-5)—since also the phrase “to have a devil” is constantly used in connexion with, and as apparently equivalent to, “to be mad” (see John vii. 20, viii. 48, x. 20, and perhaps Matt. xi. 18; Luke vii. 33)—and since, lastly, cases of demoniacal possession are not known to occur in our own days—therefore we must suppose that our Lord spoke, and the Evangelists wrote, in accordance with the belief of the time, and with a view to be clearly understood, especially by the sufferers themselves, but that the demoniacs were merely persons suffering under unsual diseases of body and mind.

With regard to this theory also, it must be remarked that it does not accord either with the general principles or with the particular language of Scripture. Accommodation is possible when, in things indifferent, language is used which, although scientifically or etymologically inaccurate, yet conveys a true impression, or when, in things not indifferent, a declaration of truth (1 Cor. iii. 1, 2), or a moral law (Matt. xix. 8), is given, true or right so far as it goes, but imperfect, because of the imperfect progress of its recipients. But certainly here the matter was not indifferent. The age was one of little faith and great superstition; its characteristic the acknowledgment of God as a distant Law-giver, not an Inspirer of men's hearts. This superstition in things of far less moment was denounced by our Lord; can it be supposed that He would sanction, and the Evangelists be permitted to record for ever, an idea in itself false, which has constantly been the very stronghold of superstition? Nor was the language used such as can be paralleled with mere conventional expression. There is no harm in our “speaking of certain forms of madness as lunacy, not thereby implying that we believe the moon to have or to have had any influence upon them; . . . but if we began to describe the cure of such as the moon's ceasing to afflict them, or if a physician were solemnly to address the moon, bidding it abstain from injuring his patient, there would be here a passing over to quite a different region, . . . there would be that gulf between our thoughts and words in which the essence of a lie consists. Now Christ does everywhere speak such language as this.” (Trench, *On Miracles*, p. 153, where the whole

question is most ably treated.) Nor is there, in the whole of the New Testament, the least indication that any “economy” of teaching was employed on account of the “hardness” of the Jews' “hearts.” Possession and its cure are recorded plainly and simply; demoniacs are frequently distinguished from those afflicted with bodily sickness (see Mark i. 32, xvi. 17, 18; Luke vi. 17, 18), even, it would seem, from the epileptic (σκληνιαζόμενοι, Matt. iv. 24); the same outward signs are sometimes referred to possession, sometimes merely to disease (cp. Matt. iv. 24 with xvii. 15; Matt. xii. 22 with Mark vii. 32, &c.); the demons are represented as speaking in their own persons with superhuman knowledge,* and acknowledging our Lord to be, not as the Jews generally called Him, Son of David, but Son of God (Matt. viii. 29; Mark i. 24, v. 7; Luke iv. 41, &c.). All these things speak of a personal power of evil, and, if in any case they refer to what we might call mere disease, they at any rate tell us of something is it more than a morbid state of bodily organs or self-caused derangement of mind. Nor does our Lord speak of demons as personal spirits of evil to the multitude alone, but in His secret conversations with His disciples, declaring the means and conditions by which power over them could be exercised (Matt. xvii. 21). Twice also He distinctly connects demoniacal possession with the power of the Evil One; once in Luke x. 18, to the seventy disciples, when He speaks of His power and theirs over demoniacs as a “fall of Satan,” and again in Matt. xii. 25-30, when He was accused of casting out demons through Beelzebub, and, instead of giving any hint that the possessed were not really under any direct and personal power of evil, He uses an argument, as to the division of Satan against himself, which, if possession be unreal, becomes inconclusive and almost insincere. Lastly, the single fact recorded of the entrance of the demons at Gadara (Mark v. 10-14) into the herd of swine,^b and the effect which that entrance caused, is sufficient to overthrow the notion that our Lord and the Evangelists do not assert or imply any objective reality of possession. In the face of this mass of evidence it seems difficult to conceive how the theory can be reconciled with anything like truth of Scripture. We may fairly say that it would never have been maintained, except on the supposition that demoniacal possession was in itself a thing absolutely incredible, and against all actual experience.

But how far is this the case? Is such influence really incredible? Clearly to say of a case that it is one of disease or insanity, gives no real explanation of it at all; it merely refers it to a class of cases which we know to exist, but gives no answer to the further question, how did the disease or insanity arise? Even in disease, whenever the mind acts upon the body, (as e.g. in nervous disorders, epilepsy, &c.), the

* Compare also the case of the damsel with the spirit of divination (πνεῦμα πύθμενος) at Philippi: where also the power of the evil spirit is referred to under the well-known name of the supposed inspiration of Delphi.

^b It is almost needless to refer to the antiquated interpretation by which the force of this fact is created.

mere derangement of the physical organs is not the whole cause of the evil; there is a deeper one lying in the mind. There are (so to speak) two poles of force—the material and the spiritual—from which proceed influences telling on the whole nature of man. Insanity may arise, in some cases, from the physical injury or derangement of those bodily organs through which the mind exercises its powers, but far oftener it appears to be due to ideas or emotions acting upon and disordering the mind itself. How are these produced? Sometimes by action or impression of the mind itself; sometimes by action of some other spirit upon it. Nor is this latter action always the plain and ordinary action of communication of thought through word. In fact, modern observation and speculation are now disclosing to us, in startling and *a priori* incredible forms, the extraordinary secret influence—often a morbid and tyrannical influence—of spirit upon spirit, sometimes assuming such dimensions as apparently to leave no room for freewill. If there be spirits of good or evil, stronger than the spirits of men, what improbability is there in the idea of their gaining possession of them? It is an assumption, therefore, which requires proof, that, amidst the many inexplicable phenomena of mental and physical disease in our own days, there are none in which one gifted with “discernment of spirits” might see signs of what the Scripture calls “possession.”

The truth is, that here, as in many other instances, the Bible, without contradicting ordinary experience, yet advances to a region whither human science cannot follow. As generally it connects the existence of mental and bodily suffering in the world with the introduction of moral corruption by the Fall, and refers the power of moral evil to a spiritual and personal source; so also it asserts the existence of inferior spirits of evil, and it refers certain cases of bodily and mental disease to the influence which they are permitted to exercise directly over the soul and indirectly over the body. Inexplicable to us this influence certainly is, as all action of spirit on spirit is found to be; but no one can pronounce *a priori* whether it be impossible or improbable, and no one has a right to eviscerate the strong expressions of Scripture in order to reduce its declarations to a level with our own ignorance.

III. We are led, therefore, to the ordinary and literal interpretation of these passages, that there are evil spirits [DEMONS], subjects of the Evil One, who, in the days of the Lord Himself and His Apostles especially, were permitted by God to exercise a direct influence over the souls and bodies of certain men. This influence is clearly distinguished from the ordinary power of corruption and temptation wielded by Satan through the permission of God. [SATAN.] Its relation to it, indeed, appears to be not unlike that of a miracle to God's ordinary Providence, or of special prophetic inspiration to the ordinary gifts of the Holy Spirit. Both (that is) are actuated by the same general principles, and tend to the same general object; but the former is a special and direct manifestation of that which is worked out in the latter by a long course of indirect action. The distinguishing feature of possession is the complete or incom-

plete loss of the sufferer's reason or power of will; his actions, his words, and almost his thoughts are mastered by the evil spirit (Mark i. 24, v. 7; Acta xix. 15), till his personality seems to be destroyed; or, if not destroyed, so overborne as to produce the consciousness of a twofold will within him, like that sometimes felt in a dream. In the ordinary temptations and assaults of Satan, the will itself yields consciously, and by yielding gradually assumes, without losing its apparent freedom of action, the characteristics of the Satanic nature. It is solicited, urged, and persuaded against the strivings of grace, but not overborne.

Still, however, possession is only the special and, as it were, miraculous form of the “law of sin in the members,” the power of Satan over the heart itself, recognised by St. Paul as an indwelling and agonizing power (Rom. vii. 21-24). Nor can it be doubted that it was rendered possible in the first instance by the consent of the sufferer to temptation and to sin. That it would be most probable in those who yielded to sensual temptations may easily be conjectured from general observation of the tyranny of a habit of sensual indulgence. The cases of the habitually lustful, the opium-eater, and the drunkard (especially when struggling in the last extremity of delirium tremens) bear, as has been often noticed, many marks very similar to those of the Scriptural possession. There is in them physical disease, but there is often something more. It is also to be noticed that the state of possession, although so awful in its wretched sense of demoniacal tyranny, yet, from the very fact of that consciousness, might be less hopeless and more capable of instant cure than the deliberate hardness of wilful sin. The spirit might still retain marks of its original purity, although, through the flesh and the demoniac power acting by the flesh, it was enslaved. Here also the observation of the suddenness and completeness of conversion, seen in cases of sensualism, compared with the greater difficulty in cases of more refined and spiritual sin, tends to confirm the record of Scripture.

But, while it seems rash to assert that in our own days demoniacal possession does not exist, we can perhaps see reasons why it should have appeared in visible and flagrant intensity at the time of which the Scripture speaks. It was but natural that the power of evil should show itself, in more open and direct hostility than ever, in the age of our Lord and His Apostles, when its time was short. It was natural also that it should take the special form of possession in an age of such unprecedented and brutal sensuality as that which preceded His coming, and continued till the leaven of Christianity was felt. Nor was it less natural that it should have died away gradually before the great direct, and still greater indirect, influence of Christ's kingdom. Accordingly we find early Fathers (as Just. Mart. *Dial. c. Tryph.* p. 311 B; Tertullian, *Apol.* 23, 37, 43) alluding to its

* It is to be noticed that almost all the cases of demoniac possession are recorded as occurring among the rude and half-Gentile population of Galilee. St. John, writing mainly of the ministry in Judaea, does not mention any.

existence as a common thing, mentioning the attempts of Jewish exorcism in the name of Jehovah as occasionally successful (see Matt. xii. 27; Acts xix. 13), but especially dwelling on the power of Christian exorcism to cast it out invariably as a test of the truth of the Gospel, and as one well-known benefit which it already conferred on the empire. By degrees the mention is less and less frequent, till the very idea is lost—to be revived hereafter with strange perversions and superstitions in the belief in witchcraft and sorcery in the Middle Ages. The spiritual condition of modern times is wholly different, less open perhaps to exceptional outbursts, more liable to the subtler and more pervasive influences, of evil.

Such is a brief sketch of the Scriptural notices of possession. That round the Jewish notion of it there grew up, in that age of superstition, many foolish and evil practices, and much superstition as to fumigations, &c. (cp. Tob. viii. 1-3; Joseph. *Ant.* viii. c. 2, § 5), in the "vagabond exorcists" (see Acts xix. 13), is obvious and would be inevitable. It is clear that Scripture does not in the least sanction or even condescend to notice such things; but it is certain that, in the Old Testament (see Lev. xix. 31; 1 Sam. xviii. 7, &c.; 2 K. xxi. 6, xxiii. 24, &c.) as well as in the New, it recognises possession as a real and direct power of evil spirits upon the heart. [A. B.]

DE'MOPHON (*Δημόφων*), a Syrian general in Palestine under Antiochus V. Eupator (2 Macc. xii. 2).

DENARIUS (*δηνάριον*; *denarius*; A. V. "penny," Matt. xviii. 28; xx. 2, 9, 13; xxii. 19;—Mark vi. 37; xii. 13; xiv. 5;—Luke vii. 41; x. 35; xx. 24;—Johu vi. 7; xii. 5;—Rev. vi. 6), the principal Roman silver coin in the period of the N. T.

The denarius (or properly denarius nummus?) was thus called because it was first struck as equivalent to ten asses. It therefore first bore on the obverse the symbol X, and was called by a name indicating its denary character. The denarius was first issued B.C. 268, and was the chief coin of the first silver issue at Rome. The weight was 70 grains. The half, or quinarius, was equal to 5 asses and bore the mark V, and the quarter, or sestertius, was equal to 2½ asses, and bore the mark IIS. The divisions must have been first issued at the same time as the denarius. The weight of the denarius was reduced circ. B.C. 217 to 60 grains, at which it remained until it was further reduced to 52½ grains circ. A.D. 60.

By the time of Augustus the denarius had become the chief coin of the Roman world. The drachm of the Attic talent, which from the time of Alexander was the most important Greek monetary standard, had by gradual reduction fallen from the weight of 67·5 grains to the weight of the denarius of Augustus, and the two coins thus came to be regarded as identical. Under the same emperor the Roman money superseded the Greek except in a few issues. The great currency in the precious metals was of coins struck at Rome, and the common silver coin was the denarius. Thus in Palestine in the period of the N. T. denarii must have mainly

formed the silver currency. A few local currencies of the neighbouring countries of inferior metal could only have been also in use. It is therefore almost certain that we are to understand the denarius by the terms *δραχμή* and with less certainty *ἀργύριον* in the N. T., both rendered in the A. V. "piece of silver." [DRACHMA; SILVER, PIECE OF.] The *δίδραχμον* of the tribute (Matt. xvii. 24) was probably not a current coin, unlike the *στατήρ* mentioned in the same passage (v. 27). [STATÉR.] From the parable of the

Denarius of Tiberius.

labourers in the vineyard it seems that a denarius was then the ordinary pay for a husbandman's day's labour (Matt. xx. 2, 4, 7, 9, 10, 13). [See MONEY.] [R. S. P.]

DENS. [CAVES.]

DEPOSIT (*ὑπόθηξις*; *παράθεσις*, *παράκαθηξις*; *depositum*). The arrangement by which one man kept at another's request the property of the latter, until demanded back, was one common to all the nations of antiquity; and the dishonest dealing with such trusts is marked by profane writers with extreme reprobation (Herod. vi. 86; Juv. xiii. 199, &c.; Joseph. *Ant.* iv. 7, § 38; *D. J.* iv. 8, §§ 5, 7). Even our Saviour seems (Luke xvi. 12) to allude to conduct in such cases as a test of honesty.* In later times, when no banking system was as yet devised, shrines were often used for the custody of treasure (2 Macc. iii. 10, 12, 15; Xenoph. *Anab.* v. 3, § 7; Cic. *Legg.* ii. 16; Plut. *Lys. c.* 18); but, especially among an agricultural people, the exigencies of war and other causes of absence must often have rendered such a deposit, especially as regards animals, an owner's only course. Nor was the custody of such property burdensome; for the use of it was no doubt, so far as that was consistent with its unimpaired restoration, allowed to the depositary, which office also no one was compelled to accept. The articles specified by the Mosaic law are—(1) "money or stuff;" and (2) "an ass, or an ox, or a sheep, or any beast." The first case was viewed as only liable to loss by theft (probably for loss by accidental fire, &c., no compensation could be claimed), and the thief, if found, was to pay double, i.e. probably to compensate the owner's loss, and the unjust suspicion thrown on the depositary. If no theft could be proved, the depositary was to swear before the judges that he had not appropriated the article, and then

* Such is probably the meaning of the words *ἡ δὲ ἀλλοτρίῃ πιστοί*. It may also be remarked that, in the parable of the talents, the "slothful servant" affects to consider himself as a mere depositary, in the words *ὁ δὲ ἔχει τὸ σὸν* (Matt. xxv. 25).

was quit.^b In the second, if the beast were to "die or be hurt, or driven away, no man seeing it,"—accidents to which beasts at pasture were easily liable,—the depositary was to purge himself by a similar oath. (Such oaths are probably alluded to Heb. vi. 16, as "an end of all strife.") In case, however, the animal were stolen, the depositary was liable to restitution, which probably was necessary to prevent collusive theft. If it were torn by a wild beast, some proof was easily producible, and, in that case, no restitution was due (Ex. xxii. 7-13). In case of a false oath so taken, the perjured person, besides making restitution, was to "add the fifth part more thereto," to compensate the one injured, and to "bring a ram for a trespass-offering unto the Lord" (Lev. vi. 5, 6). In the Book of Tobit (v. 3) a written acknowledgment of a deposit is mentioned (i. 14 [17], iv. 20 [21]). This, however, merely facilitated the proof of the fact of the original deposit, leaving the law untouched. The Mishnah (*Baba Metzia*, c. iii.; *Shebuth*, v. 1) shows that the law of the oath of purgation in such cases continued in force among the later Jews. Michaelis on the laws of Moses, ch. 162, may be consulted on this subject. [H. H.]

DEPUTY. The uniform rendering in the A. V. and R. V. of ἀποβύταρος, "proconsul" (Acts xiii. 7, 8, 12; xix. 38). The English word is curious in itself, and to a certain extent appropriate, having been applied formerly to the Lord Lieutenant of Ireland. Thus Shakspeare, *Hen. VIII.* iii. 2:

"Plague of your policy,
You sent me deputy for Ireland."

[W. A. W.]

DER'BE (Δέρβη, Acts xiv. 20, 21, xvi. 1; *Eth. Δερβαίος*, Acts x. 4). The exact position of this town has but lately been ascertained. It was apparently on one of the main roads from Cilicia to Iconium, and on the great upland plain of LYCAONIA, which stretches from ICONIUM eastwards along the north side of the chain of Taurus. It appears that Cicero went through Derbe on his journey from Cilicia to Iconium (Cic. *ad Fam.* xiii. 73). Such was St. Paul's route on his second missionary journey (Acts xv. 41; xvi. 1, 2), and probably also on the third (xviii. 23, xix. 1). In his first journey (xiv. 20, 21) he approached from the other side, viz. from Iconium, in consequence of persecution in that place and at LYSTRA. No incidents of an adverse character are recorded as having happened at Derbe. In harmony with this, it is not mentioned in the enumeration of places in 2 Tim. iii. 11. "In the apostolic history Lystra and Derbe are commonly mentioned together: in the quotation from the epistle, Lystra is mentioned and not Derbe. The distinction is accurate; for St. Paul is here enumerating his persecutions" (Paley, *Horae Paulinae*, in loco). Gaius, who accompanied St. Paul on his journey from Greece "as far as Asia," was a native of Derbe.

Strabo (p. 535), after describing the ten dis-

tricts of Cappadocia, adds that there was an eleventh "formed out of Cilicia, consisting of the country about Castabala and Cybistra (*Eregli*), extending to Derbe." He states elsewhere (p. 569) that Derbe was "on the side of the Isaurian territory close upon Cappadocia." Ptolemy states (v. 6) that Derbe formed, with Laranda (*Karaman*), Olbasa, and Monshanda, the "strategia Antiochiane," which was between Lycaonia and Tyanitis. In the *Synecdemus* of Hierocles (Wesseling, p. 675, where the word is Δέρβαι) it is placed, as in the Acts of the Apostles, in Lycaonia. The boundaries of these districts were not very exactly defined. The whole neighbourhood, to the sea-coast of CILICIA, was notorious for robbery and piracy. Antipater, the friend of Cicero (*ad Fam.* xiii. 73), was the bandit chieftain of Lycaonia. Amyntas, king of Galatia (successor of Deiotarus II.), murdered Antipater and incorporated his dominions with his own. Derbe was in the province of CAPPADOCIA, constituted by Tiberius A.D. 17, when the last king Archelaus died. It was probably given the title Claudio-Derbe when transferred by Claudius to LYCAONIA. Afterwards, when Cappadocia and Galatia were united by Vespasian, Lycaonia, with Derbe, was included in the province. [GALATIA.] Derbe does not seem to be mentioned in the Byzantine writers. Leake (p. 102) says that its Bishop was a suffragan of the Metropolitan of Iconium.

Three sites have been assigned to Derbe. (1.) By Col. Leake (*Asia Minor*, p. 101) it was supposed to be at *Bin Bir A'dissah*, at the foot of the *Karadagh*, a remarkable volcanic mountain, which rises from the Lycaonian plain; but this is almost certainly the site of Barata. (2.) Hamilton (*Researches in Asia Minor*, ii. 313) and Texier (*Asie Mineure*, ii. 129, 130) were disposed to place it at *Dicle*, a little to the S.W. of the last position and nearer to the roots of Taurus. In favour of this view there is the important fact that Steph. Byz. says that the place was sometimes called Δερβη, which in the Lycaonian language (see Acts xiv. 11) meant a "juniper tree." Moreover, he speaks of a *Λιμνη* here, which (as Leake and the French translators of Strabo suggest) ought probably to be *Λιμνη*; and if this is correct, the requisite condition is satisfied by the proximity of the Lake *Ak Göl*. Wieseler (*Chronol. der Apost. Zeitalter*, p. 24) takes the same view, though he makes much of the possibility that St. Paul, on his second journey, travelled by a minor pass to the W. of the Cilician Gates. The people of *Dicle* have a tradition that they originally came from *Ambararussi*, a small village situated in a recess in the hills close to the eastern end of the marshy lake *Ak Göl*: there are here the ruins of an old town, and an extensive cemetery, partly of rock-hewn tombs, and partly of sarcophagi now covered by soil washed down from the hills. One of the sarcophagi, of enormous size, 14 ft. and 8 ft. deep, has its lid and sides ornamented with figures in bold relief, similar in style to the sculptures at Pergamum (Davies, *Life in Asia Minor*, p. 280). Above the village the Roman road, which connected it with *Eregli*, eighteen miles distant, is well marked by a cutting in the rock (Sir C. Wilson, *MS. Notes*). (3.) Professor W. H. Ramsay argues (*Hist. Geog. of Asia Minor*, p. 336) that Derbe must have been

^b The Hebrew expression נָשָׂא אֶת הַיָּדָא, Ex. xxii. 8, rendered in the A. V. and R. V. "to see whether... (not)," is a common formula *jurandi*.

W. of Laranda, and that it must be placed, as suggested by Professor Sterrett, at *Zusta*, on the road which ran from Cilicia Tracheia through Laranda to Iconium. Winer (*Realwörterbuch*, s. v.) states that Derbe was "S. of Iconium and S.E. of Lystra." [J. S. H.] [W.]

DESERT, a word which is sparingly employed in the A. V. to translate four Hebrew terms, of which three are essentially different in signification. A "desert," in the sense which is ordinarily attached to the word, is a vast, burning, sandy plain, alike destitute of trees and of water. This idea is probably derived from the deserts of Africa—that, for example, which is overlooked by the Pyramids, and with which many travellers are familiar. But it should be distinctly understood that no such region as this is ever mentioned in the Bible as having any connexion with the history of the Israelites, either in their wanderings or their settled existence. With regard to the sand, the author of *Sinai and Palestine* has given the fullest correction to this popular error, and has shown that "sand is the exception and not the rule of the Arabian desert" of the Peninsula of Sinai (*S. & P.*, pp. 8, 9, 64). And as to the other features of a desert, certainly the Peninsula of Sinai is no plain, but a region extremely variable in height, and diversified, even at this day, by oases and valleys of verdure and vegetation, and by frequent wells, which were all probably far more abundant in those earlier times than they now are. This, however, will be more appropriately discussed under the head of WILDERNESS OF THE WANDERINGS. Here it is simply necessary to show that the words rendered in the A. V. by "desert," when used in the historical books, denoted definite localities; and that those localities do not answer to the common conception of a "desert."

1. ARĀBAH (עֲרָבָה). The root of this word, according to Gesenius (*Thez.* p. 1066), is *Arab*, עֲרַב, to be dried up as with heat; and it has been already shown that when used, as it invariably is in the historical and topographical records of the Bible, with the definite article, it means that very depressed and enclosed region—the deepest and the hottest chasm in the world—the sunken valley north and south of the Dead Sea, but more particularly the former. [ARĀBAH.] True, in the present depopulated and neglected state of Palestine the Jordan valley is as arid and desolate a region as can be met with, but it was not always so. On the contrary, we have direct testimony to the fact that when the Israelites were flourishing, and later in the Roman times, the case was emphatically the reverse. Jericho, "the city of palm trees," at the lower end of the valley, Bethshean at the upper, and Phasaelis in the centre, were famed both in Jewish and profane history for the luxuriance of their vegetation (*Jos. Ant.* xviii. 2, § 2; xvi. 5, § 2; BETHSHEAN; JERICHO). When the abundant water-resources of the valley were properly husbanded and distributed, the tropical heat caused not barrenness but tropical fertility; and here grew the balsam, the

sugar-cane, and other plants requiring great heat, but also rich soil, for their culture. ARĀBAH in the sense of the Jordan Valley is translated by the A. V. "desert" (*R. V. Arabah*) only in Ezek. xlvii. 8. In a more general sense of waste, deserted country—a meaning easily suggestive by the idea of excessive heat contained in the root—"Desert," as the rendering of *Arabah*, occurs in the Prophets and poetical Books (cp. Is. xxxv. 1, 6, xl. 3, xli. 19, li. 3; Jer. ii. 6, v. 6, xvii. 6, l. 12): but this general sense is never found in the Historical Books. In these, to repeat once more, *Arabah* always denotes the Jordan Valley, the *Ghor* of the modern Arabs. Dean Stanley proposes to use "desert" as the translation of *Arabah* whenever it occurs, and, though not exactly suitable, it is difficult to suggest a better word.

2. But if *Arabah* gives but little support to the ordinary conception of a "desert," still less does the other word which our translators have most frequently rendered by it. MIDBAR (מִדְבָּר) is accurately the "pasture ground," deriving its name from a root *dabar* (דָּבַר), "to drive," significant of the pastoral custom of driving the flocks out to feed in the morning, and home again at night; and therein analogous to the German word *trift*, which is similarly derived from *treiben*, "to drive." Jeremiah (xliii. 10) speaks of the "pleasant places," *R. V.* "pastures" (מִדְבָּר), of the Midbar. With regard to the Wilderness of the Wanderings—for which MIDBAR is almost invariably used—this signification is most appropriate; for we must never forget that the Israelites had flocks and herds with them during the whole of their passage to the Promised Land. They had them when they left Egypt (*Ex.* x. 26, xii. 38); they had them at Hazeroth, the middle point of the wanderings (*Num.* xi. 22), and some of the tribes possessed them in large numbers immediately before the transit of the Jordan (*Num.* xxxii. 1). Midbar is not often rendered by "desert" in the A. V. Its usual and certainly more appropriate translation is "wilderness," a word in which the idea of vegetation is present. In speaking of the Wilderness of the Wanderings the word "desert" occurs as the rendering of *Midbar*, in *Ex.* iii. 1, v. 3, xix. 2; *Num.* xxxiii. 16; and in more than one of these it is evidently employed for the sake of euphony merely. In each case *R. V.* has "wilderness."

Midbar is most frequently used for those tracts of waste land which lie beyond the cultivated ground in the immediate neighbourhood of the towns and villages of Palestine, and which are a very familiar feature to the traveller in that country. In spring these tracts are covered with a rich green verdure of turf, and small shrubs and herbs of various kinds. But at the end of summer the herbage withers, the turf dries up and is powdered thick with the dust of the chalky soil, and the whole has certainly a most dreary aspect. An example of this is furnished by the hills through which the path from Bethany to Jericho pursues its winding descent. In the spring so abundant is the pasturage of these hills, that they are the resort of the flocks from Jerusalem on the one hand and Jericho on the other, and even from the Arabs on the other side of the Jordan. And

* "The sea of sand." See Coleridge's parable on *Mystics and Mysticism* (*Aids to Refl.* Conclusion).

even in the month of September — when the writer made this journey—though the turf was only visible on close inspection, more than one large flock of goats and sheep was browsing, scattered over the slopes, or stretched out in a long even line like a regiment of soldiers.^b A striking example of the same thing, and of the manner in which this waste pasture land gradually melts into the cultivated fields, is seen in making one's way up through the mountains of Benjamin, due west, from Jericho to *Mukhmās* or *Jeb'a*. These *Mudbars* seem to have borne the name of the town to which they were most contiguous: for example, Bethaven (in the region last referred to); Ziph, Maon, and Paran, in the south of Judah; Gibeon, Jeruel, &c.

In the poetical Books "desert" (R.V. "wilderness") is found as the translation of *Mudbar* in Deut. xxxii. 10; Job xxiv. 5; Is. xxi. 1; Jer. xxv. 24.

3. CHORBAH (חֹרְבָה). This word is perhaps related to *Arabah*, with the substitution of one guttural for another; at any rate it appears to have the same force, of dryness, and thence of desolation. It does not occur in any historical passages. It is rendered "desert" in Ps. cii. 6; Is. xlvi. 21; Ezek. xiii. 4. The term commonly employed for it in the A. V. is "waste places" or "desolation."

4. JESHIMON (יְשִׁמוֹן; *desert, waste*). This word in the historical books is used with the definite article, apparently to denote the waste tracts on both sides of the Dead Sea. In all these cases it is treated as a proper name in the A. V.; and in the R. V. is translated "the desert" (*marg.* Jeshimon). [JESHIMON; BETH-JESIMOTH.] Without the article it occurs in a few passages of poetry; in the following of which it is rendered "desert" (Ps. lxxviii. 40, cvi. 14; Is. xliii. 19, 20). [G.] [W.]

DESSAU (Δεσσαύ; A. Δεσσαύ; *Dessau*), a village (not "town"; *κώμη, castellum*) at which Nicanor's army was once encamped during his campaign with Judas (2 Macc. xiv. 16). There is no mention of it in the account of these transactions in 1 Macc. or in Josephus. Ewald conjectures that it may have been Adasa (*Gesch.* iv. 368, note). [G.]

DEUEL (דְּעוּל; BA. 'Pαγούλ; *Dehuel*), father of Eliasaph, the "captain" (אִשָּׁר) of the tribe of Gad at the time of the numbering of the people at Sinai (Num. i. 14; vii. 42, 47; x. 20). The same man is mentioned again in ii. 14, but here the name appears as Renel, owing to an interchange of the two very similar Hebrew letters ד and ר. In this latter passage the Samaritan, Arabic, and Vulg. retain the ד; the LXX., as in the other places, has R. [REUEL.] Which of the two was really his name, we have no means of deciding. [G.]

DEUTERONOMY (Δευτερονόμιον, from the [inexact] LXX. rendering of דְּוָתָרָא דְּמִצְוֵי)

^b This practice is not peculiar to Palestine. Mr. Blakesley observed it in Algeria; and gives the reason for it, namely, a more systematic, and therefore complete, consumption of the scanty herbage (*Four Months in Algeria*, p. 303).

דְּוָתָרָא, * xvii. 18, τὸ δευτερονόμιον ταῦτο [*cp.* Josh. viii. 32]; Vulg. *Deuteronomium*; called by the Jews, from the opening words, אֲנִי וְיְהוָה יְהוָה, or more briefly אֲנִי וְיְהוָה, the fifth Book of the Pentateuch, recording the events of the last month (i. 3; xxxiv. 8) of the forty years' wanderings of the children of Israel. The greater part of the Book is occupied by the final discourse of Moses delivered in the plains of Moab, setting before the Israelites the laws which they are to obey, and the spirit in which they are to obey them, when they are settled in the Promised Land. This is preceded and followed by other matter, the nature of which will appear more distinctly from a preliminary outline of contents.

I. Contents and Scope.

§ 1. i. 1-5. Historical introduction, describing the situation and occasion on which the discourses following were delivered.

i. 6-iv. 40. Moses' first discourse, consisting of a review of the circumstances under which the Israelites had arrived at the close of their wanderings, and concluding with an eloquent practical appeal (ch. iv.) not to forget the great truths impressed upon them at Horeb.

iv. 41-43. Historical account of the appointment by Moses of three cities of refuge east of Jordan.

iv. 44-49. Historical introduction to Moses' second discourse, forming the legislation proper.

v.-xxvi. The legislation, consisting of two parts: (1) v.-xi. Hortatory introduction, developing the first commandment of the Decalogue, and inculcating the *general* theocratic principles by which Israel, as a nation, is to be guided. (2) xii.-xxvi. The code of special laws.

xxvii. Injunctions (narrated in the third person) relative to a symbolical acceptance by the nation of the preceding code, after taking possession of Canaan.

xxviii.-xxix. 1. Conclusion to the code (connected closely with xxvi. 19), consisting of a solemn declaration of the consequences to follow its observance or neglect.

xxix. 2-xxx. 20. Moses' third discourse, embracing (1) the establishment of a fresh covenant between the people and God (ch. xxix.); (2) the promise of restoration, even after the abandonment threatened in ch. xxviii., if the nation should then exhibit due tokens of penitence (xxx. 1-10); (3) the choice set before Israel (xxx. 11-20).

xxxi. 1-13. Moses' farewell to the people, and commission of Joshua. His delivery of the Deuteronomic law to the Levitical priests.

xxxi. 14-xxxiii. 47. The Song of Moses, with accompanying historical notices.

xxxii. 48-xxxiv. 12. Conclusion of the whole Book, containing the Blessing of Moses, and describing the circumstances of his death.

§ 2. The Deuteronomic legislation, properly so called, is thus included in chs. xii.-xxvi., to which chs. v.-xi. form an introduction. The remaining portions of the Book, differing as they do from these chapters in character and scope,

* Which = a repetition (i.e. copy) of this law, not this repetition of the law.

are sometimes spoken of as the "margins" ^b of the legislation proper. In Deut. itself, the code (including its supplement, ch. xxviii.) is referred to continually (i. 5; iv. 8; xvii. 18, 19; xviii. 3, 8, 26; xxviii. 58, 61; xix. 29 [Heb. 28]; xxi. 9, 11, 12, 24, 26) as *this law*, sometimes also as *this book of the law* (xxix. 21, xxx. 10; cf. Josh. i. 8). That these expressions refer to Deut. alone (or the code contained in it), and not to the entire Pentateuch, appears in particular (1) from the wording of i. 5 and iv. 8, 44, which points to a law about to be, or actually being, set forth; (2) from the parallel phrases *this commandment, these statutes, or these judgments*, often spoken of as *inculcated to-day* (vii. 12 [see v. 11]; xv. 5; xix. 9; xxvi. 16; xxx. 11; cf. v. 1; vi. 6; xi. 28, 32), and *this covenant* (xxix. 9, 14), which clearly alludes to the Deuteronomic legislation (cf. 19, 20, "the curse written in *this book*" [ch. xxviii.]), and is distinguished from the covenant made before at Sinai (xxix. 1).^c

§ 3. In order to gain a right estimate of Deut., it is necessary to compare it carefully with the

previous Books of the Pentateuch, upon which, in its historical and legislative portions alike, it is based. Let us consider the latter portions first. In comparing these with the laws in Ex.-Lev., it must be kept in mind that these laws are not homogeneous, but fall into at least three distinct codes, each marked by features of its own; and it is important to observe in what manner Deut. is related to each of these. The codes referred to are (1) that contained in Ex. xx.-xxiii., comprising the Decalogue, and what is commonly known as the "Book of the Covenant" (Ex. xxiv. 7), to which must be added the (partial) repetition of the latter in xxxiv. 10-26, and the kindred section xiii. 3-16; (2) the laws, specially on ritual, occupying Ex. xxv.-xxxi., xxxv.-xl., Lev. i.-xvi., xxvii., and the greater part of Numbers, now often termed the "Priests' Code"; (3) the special code contained in Lev. xvii.-xxvi. The following synopsis will show immediately which of the enactments in Deut. relate to subjects not dealt with in the other codes, and which are parallel to provisions there contained.

§ 4. *Synopsis of Laws contained in Deuteronomy.*

EXODUS.	DEUTERONOMY.	THE PRIESTS' CODE.
xx. 2-17.	v. 6-21 (the Decalogue).	
xxiii. 12.	.. 14 b (object of Sabbath).	
xx. 24.	xiii. 1-28 (place of sacrifice).	Lev. xviii. 1-9.
	.. 16, 23; xv. 23 (blood not to be eaten).	.. xviii. 16-14; xix. 26.
	xiii. 29-xiii. 18 (against seduction to idolatry).	
	xiv. 1 sq. (disfigurement in mourning).	.. xix. 26.
	.. 3-20 (clean and unclean animals).	.. xl. 2-23; xx. 25.
xxii. 31.	.. 21 a (food improperly killed).	.. xviii. 15; xl. 46.
xxiii. 19 b; xxxiv. 26 b.	.. 21 b (kid in mother's milk).	
	.. 22-29 (ilthos).	
xxiii. 10 sq.	xv. 1-11 (Sabbatical year).	Lev. xxv. 1-7.
xxi. 2-11.	.. 12-18 (Hebrew slaves).	.. xxv. 39-46.
xxii. 30; xiii. 11, 12;	.. 19-23 (firstlings of ox and sheep).	Ex. xiii. 1 sq.; Num. xvii. 17 sq.
xxxiv. 19.		Lev. xxiii.; Num. xxviii. sq.
xxiii. 14-17; xxxiv. 18,	xvi. 1-17 (the three annual pilgrimages).	
20 b, 22-25.		
	.. 18 (appointment of judges).	
xxiii. 1-3, 6-8.	.. 19 sq. (just judgment).	Lev. xix. 15.
	.. 21 sq. (neither Asherah nor pillar to be used as a religious symbol).	.. xxvi. 1 a.
	xvii. 1 (offerings to be without blemish: cf. xv. 21).	.. xxii. 17-24.
xxii. 20.	.. 2-7 (idolatry, especially of the "host of heaven").	
	.. 8-13 (court of final appeal).	
	.. 14-20 (law of the king).	
	xxviii. 1-8 (rights of the tribe of Levi).	.. vii. 32-34; Num. xviii. 8-20.
	.. 9-22 (law of the prophet).	
	.. 10 a (Molech-worship).	.. xviii. 21; xx. 2-5.
xxii. 18 (witch alone).	.. 10 b-11 (different kinds of divination).	.. xix. 26 b, 31; xx. 6, 27.
xxi. 12-14.	xix. 1-13 (murder and asylum).	.. xxiv. 17, 21; Num. xxxv.
	.. 14 (the landmark).	
xxiii. 1.	.. 15-21 (law of witnesses).	.. xix. 16 b.
	xx. (laws of war and military service: cp. xxiv. 5).	
	xxi. 1-9 (expiation of uncertain murder).	
	.. 10-14 (treatment of female captives).	
	.. 15-17 (primogeniture).	
xxi. 15, 17.	.. 18-21 (undutiful son).	.. xx. 9.
	.. 22 sq. (body of malefactor).	

^b Kleinert [see full title in § 40], p. 33 sq.

^c A limitation which seems to be demanded by the nature of the injunction in xxvii. 3, 8.

^d So Delitzsch (*Genesis*, 1872, p. 21; 1887, pp. 15, 23), with the majority of modern scholars. Kell (*Einführung*, 1873, § 23, 3) refers *this law* (l. 6) to the legislation

preceding Deut.; but though it is true that the expression might be used to denote, for instance, the Book of Numbers, this (as we shall see) is not anywhere "explained" in Deut. Ex. xx.-xxiii. is "explained" in Deut., but is too remote to be described by the pronoun "this."

EXODUS.	DEUTERONOMY.	THE PRIESTS' CODE.
xxiii. 4 sq.	xxii. 1-4 (animals straying or fallen). .. 5 (sexes not to interchange garments). .. 6 sq. (bird's nest). .. 8 (battlement). .. 9-11 (against non-natural mixtures). .. 12 (law of "fringes"). .. 13-21 (slander against a maiden). .. 22-27 (adultery). .. 28 sq. (seduction). .. 30 (incest with step-mother).	Lev. xix. 18. Num. xv. 37-41.
xxii. 16 sq.	xxiii. 1-8 (conditions of admittance into the theocratic community). .. 9-14 (cleanliness in the camp). .. 15 sq. (humanity to escaped slave). .. 17 sq. (against religious prostitution). .. 19 (usury). .. 21-23 (vows). .. 24 sq. (regard for neighbour's crops).	Lev. xviii. 20; xx. 10. .. xviii. 8; xx. 11.
xxii. 26.	xxiv. 1-4 (divorce). .. 6, 10-13 (pledges). .. 7 (man-stealing). .. 8 sq. (leprosy). .. 14 sq. (justice towards hired servants). .. 15 (the family of a criminal not to suffer with him). .. 17 sq. (justice towards stranger, widow, and orphan). .. 19 sq. (gleanings).	Lev. xxv. 35-37. Num. xxx. 2.
xxii. 28 sq. xxi. 16.	xxv. 1-3 (moderation in the infliction of the bastinado). .. 4 (ox not to be muzzled while threshing). .. 5-10 (law of the levirate). .. 11 sq. (modesty). .. 13-16 (just weights). .. 17-19 (Amalek).	Lev. xiii.-xiv. .. xix. 13.
xxii. 21-24, xxiii. 9.	xxvi. 1-15 (form of thanksgiving at the offering of first-fruits and triennial tithes). .. 17-19 (Amalek).	Lev. xix. 36 sq.
xvii. 14. cp. xxii. 29 a; xxiii. 19 a; xxxiv. 26 a.	xxvii. 1-15 (form of thanksgiving at the offering of first-fruits and triennial tithes).	cp. Num. xviii. 12 sq.
xiii. 9, 16. xxiii. 13; xxxiv. 14. xiii. 14. xxiii. 24, 32 sq.; xxxiv. 12 sq., 15 sq. xxii. 20, xxiii. 9.	vi. 8; xi. 18 (law of frontlets). vi. 14; xi. 16 (against "other gods"). vi. 20 sq. (instruction to children). vii. 2-5, 16; xii. 3 (no compact with Canaanites: their altars and religious emblems to be destroyed). x. 19 (to love the stranger). xvi. 13, 15 (feast of "booths," "seven days"). xvii. 8; xix. 15 ("two or three witnesses"). xix. 21 (<i>lex talionis</i>) (but in a different application in each case).	Num. xxxiii. 52, 65. Lev. xix. 34. .. xxiii. 34, 39, 41-43. Num. xxxv. 30. Lev. xxiv. 19 sq.
xxi. 23-25.		

§ 5. The parallels for xxvii. 15-26 (the imprecations) are as follows:—

EXODUS.	DEUTERONOMY.	LEVITICUS xvii.-xxvi.
xx. 4, 23; xxxiv. 17. xxi. 17.	xxvii. 15 [cp. vii. 25]. .. 18 [cp. xxi. 18-21]. .. 17 [xix. 14]. .. 18. .. 19 [xxiv. 17]. .. 20 [xxii. 30 (xxiii. 1 Heb.)]. .. 21. .. 22. .. 23. .. 24. .. 25 [xvi. 19].	xix. 4; xxvi. 1 a. xx. 9. xix. 14. xix. 33 sq. xviii. 8; xx. 11. xviii. 23; xx. 16. xx. 17; cp. xviii. 9. xviii. 17; xx. 14. xxiv. 17.
xxii. 21-24; xxiii. 9.		
xxii. 19 [Heb. 18].		
xxi. 12. xxiii. 8.		

§ 6. In the matter of arrangement, Deut. is not dependent upon any of the other codes. The only principles that can be traced are—(1.) Laws concerning kindred subjects are sometimes placed together. (2.) In the legislation, viewed as a whole, religious duties occupy the first place (chaps. xii.-xvi. mainly); then follow civil ordinances (chaps. xvii.-xx.); lastly, regulations touching social and domestic life (chaps.

xxi.-xxv.). If, however, the parallels are examined in detail, it will become apparent that the foundation of the legislation is the code in Ex. xx.-xxiii.: this is evident as well from the numerous verbal coincidences * as from the fact

* E.g. Deut. xvi. 1 b and Ex. xxiii. 15 (= xxxiv. 18); 3 m and xiii. 8 (= xxiii. 15 = xxxiv. 18); 4 a and xiii. 7;

which is plain from the left-hand column, viz. that nearly the whole ground covered by Ex. xx.-xxiii. is included in it, the chief exception being the special compensations to be paid for various injuries (Ex. xxi. 18-xxii. 15), which would be less necessary in a manual intended for the people.* In a few cases the entire law is repeated *verbatim*, elsewhere only particular clauses (e.g. vi. 8, 20; xv. 12, 16, 17); more commonly it is explained (xvi. 19b; xxii. 4b) or expanded; fresh definitions being added (xvi. 1-17), or a principle applied so as to cover expressly particular cases (xvii. 2-7; xviii. 10b, 11). Sometimes even the earlier law is modified: discrepancies arising from this cause will be considered subsequently. The additional civil and social enactments make provision chiefly for cases likely to arise in a more complex and developed community than is contemplated in the legislation of Ex. xx.-xxiii.

In the right-hand column most of the parallels are with Lev. xvii.-xxvi. These consist principally of specific moral injunctions; but it cannot be said that the legislation in Deut. is based upon this code, or connected with it organically, as it is with Ex. xx.-xxiii. With the other parts of Lev.-Num. the parallels are less complete, the only remarkable verbal one being afforded by the description of clean and unclean animals in xiv. 4a, 6-19a: in some other cases the differences are such (see § 16) as to cause great embarrassment to the harmonizer. Deut. thus stands in a different relation to each of the three codes referred to: it is an *expansion* of that in Ex. xx.-xxiii.; it is, in several features, *parallel* to that in Lev. xvii.-xxvi.; it contains *allusions* to laws such as those codified in the rest of Lev.-Num.

§ 7. In so far as it is a law-book, Deut. may be described as a manual, which without entering into technical details (almost the only exception is xiv. 3-20, which explains itself) would instruct the Israelite in the ordinary duties of life. It gives general directions as to the way in which the annual feasts are to be kept and the principal offerings paid. It lays down a few fundamental rules concerning sacrifice (xii. 5 sq., 20, 23; xv. 23; xvii. 1); for a case in which technical skill would be required, it refers to the priests (xxiv. 8). It prescribes the general principles by which family and domestic life is to be regulated, specifying a number of the cases most likely to occur. Justice is to be equitably and impartially administered (xvi. 18-20); only the terms of compensation, as has been remarked (§ 6), are not again particularized. It prescribes a due position in the community to the prophet (xiii. 1-5; xviii. 9-22), and shows how even the monarchy may be so established as not to contravene the fundamental principles of the theocracy (xvii. 14 sq.).

§ 8. Deuteronomy is, however, more than a mere code of laws: it is the expression of a profound ethical and religious spirit, which determines its character in every part. At the head of the hortatory introduction (chaps. v.-xi.)

stands the Decalogue; and the First Commandment forms the text of the chapters which follow. Having already (iv. 12 sq.) dwelt on the *spirituality* of the God of Israel, the law-giver emphasizes here, far more distinctly than had been done before, His *unity* and *unique God-head* (vi. 4; x. 17: cp. iii. 24; iv. 35, 39), drawing from this truth the practical consequence that He must be the sole object of the Israelite's reverence (vi. 13; x. 20). He exhorts the people to keep His statutes ever in remembrance (v. 1; vi. 6-9, 17 sq., &c.); warning them with special earnestness lest in days of prosperity and thoughtlessness they should forget Him (vi. 10-12; viii. 11-18, &c.), and yield to the temptations of idolatry; and setting before them the dangers of disobedience (vi. 14 sq.; vii. 4; viii. 19 sq.; xi. 16 sq.: so iv. 25 sq.—a prelude of ch. xxviii.). He reminds them of the noble privileges, undeserved on their part (vii. 7 sq.; ix. 4-6; and the retrospect following, as far as x. 11), which had been bestowed upon them (x. 14 sq., 22; so iv. 37); and re-asserts with fresh emphasis the old idea (Ex. xxiv. 8; xxiv. 10) of the covenant subsisting between the people and God (v. 2, 3; xxvi. 16-19: so iv. 23, 32; xxix. 12-15), assuring them that if they are true on their side God will be true likewise (vii. 9-13; viii. 18; xi. 22-28). Particularly he emphasizes the love of God (vii. 8, 13; x. 15; xxiii. 5b: so iv. 37), tracing even in his people's affliction the chastening hand of a father (viii. 2 sq., 5, 16), and dwelling on the providential purposes which His dealings with Israel exemplified.

Duties, however, are not to be performed from secondary motives, such as fear, or dread of consequences: they are to be the spontaneous outcome of a heart from which every taint of worldliness has been removed (x. 16), and which is penetrated by an all-absorbing sense of personal devotion to God ("with *all* the heart, and with *all* the soul": see § 37). Love to God, as the motive of human action, is the characteristic doctrine of Deuteronomy (vi. 5; x. 12; xi. 1, 13, 22; xiii. 3; xix. 9: xxx. 6, 16, 20): as here dwelt upon and expanded, the old phrase *those that love Me* is filled with a moral significance, which the passing use of it, in passages like Ex. xx. 6, Judg. v. 31, would scarcely suggest. No more profound expression of the true principle of human action can be found than this: it was a true instinct which in later times selected Deut. vi. 4-9 for daily recitation by every Israelite[†]; and it is at once intelligible that our Lord should have pointed to the same text, both as the "first commandment of all" (Matt. xii. 37 sq.; Mark xii. 29 sq.) and as embodying the primary condition for the inheritance of eternal life (Luke x. 27 sq.).

§ 9. The code of special laws (xii.-xxvi.) is dominated by similar principles. Sometimes, indeed, the legislator is satisfied to leave an enactment to explain itself: more commonly he insists upon the object which it is to subserve (e.g. xiv. 23, xxi. 23, &c.), or the motive which should be operative in its observance. As ethical and religious aim should underlie the entire life of the community. Local sanctuaries

4 b and xxiii. 18, xxxiv. 25; 16 a and xxiii. 17 (=xxxiv. 23); 16 b and xxiii. 15 (=xxxiv. 20).

[†] The other exceptions are Ex. xx. 25 sq., xxi. 28, 30 b, xxiii. 18.

* The *Shema*: see (e.g.) C. Taylor, *Sayings of the Jewish Fathers* (Cambridge, 1877), pp. 52, 130.

were apt to be abused, and to degenerate into homes of superstition and idolatry: all offerings and public worship generally are to take place at the central sanctuary, "the place which the Lord thy God shall choose" (ch. xii. and often). Old enactments are repeated (xii. 3; cp. vii. 5), and fresh enactments to meet special cases (xiii.; x. 16-18) are added, for the purpose of neutralizing every inducement to worship "other gods." The holiness of the nation is to be its standard of behaviour, even in matters which might appear indifferent (xiv. 1 sq., 3-20, 21); its perfect devotion to its God is to exclude all customs or observances inconsistent with this (xviii. 9-14). Especially are the duties of humanity, philanthropy, and benevolence insisted on, towards those in difficulty or want (xii. 19; xv. 7-11; xiii. 1-4; xiv. 12 sq., 14 sq.; xxvii. 18), and towards slaves (xv. 13 sq.; xxiii. 15 sq.), in particular upon occasion of the great annual pilgrimages (xii. 12, 18; xiv. 27, 29; xvi. 11, 14; xxvi. 11, 13). Gratitude and a sense of sympathy evoked by the recollection of their own past, are the motives again and again inculcated: two forms of thanksgiving form the termination of the code (ch. xxvi.). Already in the Decalogue the reason assigned for the observance of the fourth commandment, "that thy manservant and thy maidservant may rest as well as thou," and the motive, "And thou shalt remember that thou wast a bondman in the land of Egypt" (v. 14 b, 15), indicate the lines along which the legislator moves, and the principles which it is his desire to impress (add xiii. 5, 10; xv. 15; xvi. 3 b, 12; xxiii. 7; xxiv. 18, 22). Forbearance, equity, and forethought underlie the regulations x. 5-11, 19 sq.; xii. 10-14, 15-17; xiii. 8; xxiii. 24, 25; xxiv. 5, 6, 16, 19-22; xxv. 3: humanity towards animals, those in xii. 7; xxv. 4. Not indeed that similar considerations are absent from the older legislation (see e.g. Ex. xii. 21-24, 27; xiii. 9, 11, 12), and (as the table will have shown) some of the enactments which have been cited are even borrowed from it; but they are developed in Deut. with an emphasis and distinctness which give a character to the entire work. Nowhere else in the O. T. do we breathe such an atmosphere of generous devotion to God, and of large-hearted benevolence towards man; and nowhere else is it shown with the same fulness of detail how these principles may be made to permeate the entire life of the community.

§ 10. The relation of the *historical* sections of Deut. (i.-iii., ix. sq.) to Ex.-Num. must next be examined. The following table of *verbal coincidences* shows that these are even more closely dependent upon the earlier narrative than are the laws. The reader who desires to apprehend properly the nature and extent of these coincidences, should mark in the margin of his copy of Deut. the references, and underline (or, if he uses the Hebrew text, overline) the words in common: he will then be able to see at a glance (1) the passages of Ex.-Num. passed over in Deut.; (2) the variations and additions in Deut. We have only space for the parallels in i. 7-17 and ix. 6 sq.: the reader must work out those in i. 24-46 with parts of Num. xiii. 17-xiv. 25, 40-45, x. 1, and in ii. 1-iii. 11 with Num. xxi. 4-35 (which are not less noticeable) for himself.

The dependence of the retrospects upon the earlier narrative is remarkable. Apart from the verbal coincidences, it will be observed that while there are sometimes omissions, as a rule the substance is reproduced freely with amplificatory additions. The many cases in which a phrase describing originally one incident is applied in Deut. to another are also noticeable. We have here to ask two questions: (1) Do the variations between the two narratives ever assume the character of discrepancies which do not admit of being reconciled? (2) Is the relation between the two narratives such as to be compatible with the traditional view that the author of both is Moses?

II. Authorship and Date of Deuteronomy.

§ 11. The consideration of the question just asked will conveniently introduce this part of our subject. Additions such as those in i. 6-8, 16 sq., 20-22, iii. 23-25, obviously cause no difficulty: they relate to personal details which might well have been passed over in the his-

^b The parenthesis indicates that, though there is a coincidence of language, the passage quoted does not describe the same event, but is borrowed from another part of the narrative.

¹ In passages introduced with "cp." the coincidence is not verbal.

^k Verses 26-29 cannot refer actually to Ex. xxxii. 11-13, because the intercession there recorded was made before Moses' first descent from the mount, whereas in Deut. x. 25 points back to v. 18, which clearly relates what took place after it (viz. Ex. xxxii. 9, 28 a).

torical account. The following variations are, however, of greater importance, and demand closer consideration.

a. i. 9-15. The appointment of officers to assist Moses is considered to be at variance with the account in Ex. xviii. (1) From v. 6 it appears to be placed after the departure from Horeb, i.e. at the date named in Num. x. 11; whereas in Ex. (xviii. 5, cp. iii. 1) it is said to have occurred at a much earlier period of the encampment there (before the date, xix. 1). (2) The institution is described here as the result of a complaint on Moses' part; whereas in Ex. it is referred to the advice of Jethro, and no allusion is made to the difficulty felt by Moses. (3) There appears to be some confusion with the appointment of seventy elders in Num. xi.: the phrases in v. 9, 12 are borrowed thence; and when it is considered that the narrative following passes at once to Num. xiii. sq. (without any notice of Ex. xix., xxiv., &c.), the period of Num. xi. seems more probable than that of Ex. xviii. To (1) it may be replied that in a review of incidents which, *ex hypothesi*, occurred nearly forty years previously, the space of a year more or less may reasonably be covered by the expression *at that time*; and that v. 18 (pointing apparently to Ex. xxiv. 3, 7) seems to limit the preceding narrative still more decidedly to the period before the actual departure from Horeb. (2) Moses, it may be said, relates here the motives by which he was conscious that he was influenced himself: the narrator in Ex. describes the occurrence from the outside. (3) There cannot be any confusion with Num. xi.: the institution there described had an administrative object, and the number of elders was but seventy. Deut. agrees with Ex. in describing the institution of a *judicature*; it agrees also in the far greater number of those selected and in the stress laid upon their moral fitness (see vv. 13, 15 in the table). The phraseology borrowed from the description of another incident is shown by the table (and by the other instances in chaps. i.-iii.) to be characteristic of the whole discourse.

b. i. 22-23. The apparent contradiction as regards the originators of the proposal to send out the spies may be removed by supposing that the people, as Deut. states, having preferred their request, Moses refers it to God, who then gives it His sanction, at which point the narrative in Num. xiii. opens.

c. A greater difficulty is the reconciliation of i. 37 sq., which here interrupts the chronology of the retrospect by the notice of an event occurring (Num. xx. 12) thirty-seven years subsequently, after which (v. 39) the account of Num. xiv. is resumed. It is true that the exception made in the case of Caleb might suggest the similar one of Joshua; but the stress seems to lie rather on v. 37 (cp. iii. 26; iv. 21), and for this there is no point of contact in the present narrative of the spies. It is possible that the notice may allude to some incident not otherwise recorded: in the phraseology nothing points to either Num. xx. 12 or Num. xviii. 12-23. (The expression *on your account* is commonly reconciled with Num. xx. 12, by being understood to imply that the sin of Moses was in fact a consequence of the unbelief of the people.)

d. i. 44. *Amorites* in lieu of *Amalekites* and *Canaanites* in Num. xiv. 43-45 (cf. 25). This discrepancy is not important: it may fairly be replied that the native inhabitants of Palestine are here designated, not by their specific names, but by the same generic term applied to them elsewhere: e.g. Deut. i. 7, 19, 27.

e. ii. 2-8a appears to differ from Num. xx. 14-21, where the Israelites at Kadesh send to ask permission to pass through the territory of Edom (so as to avoid the *détour* by the Red Sea), which is refused by the Edomites with some show of violence (so Judg. xi. 17). In fact, however, in Deut. the incident of the Edomites' refusal is passed over; and the narrative begins at the

point when the Israelites, having abandoned (Num. xx. 21) the idea of a direct passage, have reached the southern extremity of Edom where it abuts on the Red Sea. Only here was their border to be crossed, at a part where, from the nature of the soil, it was more difficult to prevent it than on the rocky western frontier near Kadesh. Journeying afterwards northwards, on the east of Edom, the Israelites, it is added (v. 8a), were careful not to encroach on the Edomite territory. In v. 29, further, allusion is made to the Edomites supplying Israel with food and water, which seems scarcely compatible with the temper attributed to them in Num. xx. 18-20. The eastern frontier is, however, more weakly defended than the western; and seeing the successful advance of the Israelites, the Edomites may have deemed it expedient to adopt towards them a different attitude.

f. ii. 29. In Judg. xi. 17 the Moabites are stated to have refused permission to the Israelites to pass through their territory, and in Deut. xxxiii. 4 are described as not offering them bread and water on the way. The variation may be removed by supposing that, though they sold the Israelites provisions, perhaps under compulsion, they showed no friendliness in so doing, did not "come to meet" (Is. xxi. 14) them with it, but, on the contrary, hired Balaam to curse them.

g. ix. 9. According to Ex. xxxii.-xxxiv., Moses was three times in the mount; but he is only recorded to have fasted on the third occasion (xxxiv. 28): Deut. in the very words of Ex. describes him as doing so on the first occasion. Obviously, Deut. may relate what is passed by in silence in Ex.; but the variation is remarkable.

A. ix. 22-24. These verses interrupt the chronological order, but (unlike i. 37 f.) they are in such close connexion with the general context, the rebelliousness of the people, that their presence is sufficiently explained.

i. ix. 25-29. This, it is plain, must refer either to Ex. xxxii. 30 sq., or more probably (Kell) to xxxiv. 4-28. It is remarkable, now, that the terms of *Moses' own intercession* are borrowed, not from either of these narratives, but from xxxiii. 11-13, at the close of his first stay upon the mountain. The notice in v. 24, however, though an addition to what is distinctly stated in Ex. xxxiii. 31 sq., is not contradictory to it.

j. x. 1-5 = Ex. xxxiv. 1-4, 28 sq., with the difference, that here Moses is directed to make, and does actually make, an ark of wood *before* ascending the mountain the second time for the Ten Commandments. That Moses should describe as made by himself what was in fact made by Bezaleel acting on his behalf is, no doubt, natural enough; but in Ex. the command is both given to Bezaleel and executed by him *after* Moses' return from the mountain (xxxvi. 2-4; xxxvii. 1; also xl. 20 sq.); the discrepancy in two narratives, so *circumstantial* as each of these is, is singular.

k. x. 6, 7: cp. Num. xxxiii. 31-33, relating, however, to a period long subsequent to the episode of the golden calf. In Num. moreover, the stations Bene-Jaakan and Moerah are mentioned in the inverse order: and (v. 38) the death of Aaron is recorded to have taken place at Mount Hor, three stations beyond Jothathah. A formal reconciliation is possible by the supposition that the verses in Deut. are parallel, not to Num. xxxiii. 31-33, but to v. 37, the journey from Kadesh to Mount Hor, which may have brought the Israelites to some of the stations which they had visited previously (though not in the same order), and by the further assumption that Moerah itself was in the neighbourhood of Mount Hor, perhaps the desert at its foot.¹

But why is the notice here at all? The ground of its insertion has been supposed to be (Hengst., Kell) to show that Aaron was not only forgiven through Moses' intercession, but was even honoured by the confirmation of the priesthood to his family. No doubt it is the design of the preceding retrospect to illustrate the grace of God as shown in the renewal, at Moses' earnest inter-

¹ Comp. Koeters [see § 40], p. 51.

² So Hengst., *Die Authentizität des Pent.*, ii. 431-434. But the solution is somewhat artificial.

cession, of the Covenant : but it is difficult to think that, had such been the aim of these verses, it would have been expressed so indirectly ; Aaron's own institution to the priesthood, which would be the important point, is passed over in silence. If vv. 8 sq. form an integral part of the narrative, they can hardly be reasonably explained, except as introductory to vv. 8 sq. : the mention of the ark, vv. 1-3, suggests a notice of the tribe of Levi, whose duty it was to guard it, and vv. 7 sq. specify the occasion—viz. the sojourn at Jotbathah, or at least the period of Aaron's death—when they were set apart for this purpose. But according to Ex.-Num. their consecration took place as early as the second year of the Exodus. Upon the assumption that the discourse was delivered by Moses, the use of the third person of the Israelites, the transition to the fortieth year and back again—in v. 10, if not in v. 8—the date assigned for the consecration of the tribe of Levi, seem inexplicable. On that assumption vv. 8 sq. can hardly be explained except as a gloss : though the motive for their introduction here is far from evident, and (what is stranger in a gloss) they are in apparent disagreement with Num. xxxiii. 31-33. Keil indeed suggests that in order to reproduce the past vividly Moses, by a quotation from the Itinerary, "lets the history speak itself:" but this explanation, even if admitted as probable, only relieves a portion of the difficulty. Upon the supposition, however, that together with vv. 8 sq. they were written in view of a different tradition from that preserved in Num. xxxiii., or at a date when the consciousness of the interval separating the first and fortieth year had become obscured, they are intelligible: they will then be an integral part of the discourse, in which the author, however, speaks (as in li. 12) rather to his own readers than in the person of Moses.*

i. x. 8, 9. If vv. 8 sq. are a gloss, the words at that time will refer, of course, to vv. 1-5: if they are an integral part of the text, it is both straining this expression and also depriving vv. 6 sq. of their *raison d'être*, to refer it to anything except vv. 8 sq. Upon the supposition that vv. 1-5 are referred to, the allusion is commonly considered to be to the institution of a priesthood related in Ex. xxviii. sq., Lev. viii., and to the separation of the Levites, Num. iii. 6 sq.; but the expression at that time gains greatly in force by the conjecture that the verse alludes to some incident connected with Ex. xxxii. 26-29 not recorded in the present text of Exodus.†

Such are the historical discrepancies worthy of notice alleged to exist in Deut. Treated singly, the majority are fairly explicable upon the theory of Mosaic authorship. The retrospect in Deut. and the narrative in Ex.-Num. are designed with different objects, and different periods or aspects of the transactions recorded are made prominent in each. At the same time there are some (especially c, j, k) which are undoubtedly more serious; and it is singular that there should be so many cases, from the fasting and intercession of Moses to the slaughter of the sons of Sihon and Og, in which the reconciliation can only be effected by a duplication of the event recorded in the earlier narrative. The discrepancies viewed as a whole create, it must

be owned, an impression not wholly favourable to the Mosaic authorship of the Book.

§ 12. A further noticeable fact results from a comparison of the historical allusions in Deut. with the earlier narrative of the Pentateuch. In subsequent articles reasons will be given for believing that the Pentateuch is composite in structure, and that the narrative in the main consists of two documents, each by means of phraseological and other criteria readily distinguishable from the other. One of these, comprising the ceremonial law and the narrative attached to it, may be briefly referred to by the letter P (Priests' Code); that which remains when this has been separated, and which includes the "Book of the Covenant" (§ 3), is itself also in its turn composite; but as it is of less importance, and indeed not always possible, to distinguish its component parts, it will be sufficient here to designate it as a whole by the double letters JE. Assuming, now, that the separation of P and JE has been effected in Ex.-Num., we obtain this remarkable result: *the historical allusions in Deut., with hardly an exception, are to events recorded in JE, and not to those recorded in P.* Throughout the parallels referred to in § 10, not the allusions only, but the words cited, will be found, all but uniformly, in JE, not in P. Inasmuch now as the two documents repeatedly cross one another, the only explanation of which (as it seems) this fact is capable is, that at the time when Deut. was composed they were not yet united into a single work; and JE alone formed the basis of Deut.‡ This conclusion, derived primarily from i.-iii. ix. sq., is confirmed by other indications: Deut. speaks regularly of Horeb, not of Sinai, as is done by P: Deut. names Dathan and Abiram (xi. 6), but is silent as to Korah; in the composite narrative, Num. xvi., Dathan and Abiram alone belong to JE. Similarly, in i. 36, the exception of Caleb alone (without Joshua) agrees with JE. The allusions to Gen.-Ex. are likewise consistently to JE: thus, while the promise, i. 8, is found in both JE and P, the oath is peculiar to JE. If the author of Deut. was acquainted with P, he can only have quoted it occasionally, and certainly did not make it the basis of his work. The verdict of the historical sections in Deut. thus confirms that of the legislative sections, § 6 end.

§ 13. The conclusion just reached has a bearing on the question of the authorship of Deut. If it be true that Deut. and P are thus unconnected, the question whether both are by the same hand need not detain us: it can, under the circumstances, be answered only in the negative. May, however, the Mosaic authorship of Deut. be maintained in face of the comparison with JE? That a composite narrative of the Exodus should have arisen in the lifetime of Moses, and that Moses should himself have drawn upon it in Deut., appears scarcely probable. But even though JE were treated as the work of a single hand, the tenacity with which in general Hebrew writers preserve their individuality of style would almost preclude us from attributing JE

* This was shown independently by Koster in 1868, and Kayser in 1874 [see title in § 40], and is generally accepted by critics, e.g. by Deltzsch, Z. K. W. L. 1882, p. 227; Dillmann, p. 609. Cp. Graf (§ 40), pp. 8-18.

* So also Wellh., *Proleg.* p. 394 [= *Hist. of Isr.* p. 371] (cp. J. D. Th. xxii. 467 sq.); Reuss, *La Bible*, &c., ii. 297 (together with vv. 8 sq.). Dillmann attributes vv. 8 sq. to the redactor of Deut. [below, § 26 end].

* So Graf, p. 12; Kayser, p. 131; Kuen. *Th. Tijdschr.*, 1881, p. 201 sq. Deltzsch also (*Studien*, xi. p. 665) agrees that (with vv. 8 sq.) they are unquestionably an integral part of Deut.; but admits (*Genesis*, 1897, p. 21) that they embody a divergent tradition. It is against Mr. Waller's theory (in Bp. Ellcock's *Comm.*) that the meanings assigned by him to the names are highly questionable.

† So Dillmann, *Ex.-Lev.* p. 342, with others.

and Deut. to the same author. The style of Deut. is singularly marked (§§ 34-36): and the discourses are pervaded throughout by a uniform colouring and tone, absent from JE. It is true that continuous portions of the narrative in Ex.-Num. are transcribed in Deut., and that certain of the Deuteronomic phrases occur in isolation in parts of Ex. (§ 34): but these facts do not lessen the general impression of difference which a comparison of the two writings creates. A final consideration of this question must, however, be reserved.

§ 14. Let us next consider more closely the laws in Deut., in their relation to Ex.-Lev. Here we observe in certain cases modifications which can hardly be reasonably accounted for, except on the supposition that they belong to a later stage of society than those in Ex. xx.-xxiii. Even the greater detail and development (§ 6) points in this direction, though not of course so decisively as the cases of modification. a. In Ex. xxi. 2 sq. a Hebrew bondman is to serve for six years, and to go out free in the seventh (v. 2); a woman who comes into service with her husband is to do the same (v. 3). But a daughter sold by her father as a bondwoman is on a different footing: she is not to go free as bondmen do (v. 7). But in Deut. xv. 17 b the bondwoman (without any limitation) is subject to the same law of manumission as bondmen. This law, it is argued, regulates usage for a state of society in which the power of a father over his daughter had ceased to be so absolute as in primitive times, and places the two sexes on entire equality.* b. Ex. xxi. 14, immediately following v. 13, implies naturally that the "place appointed" in v. 13 is identical with the "altar" in v. 14; in Deut. definite cities are set apart for asylum. c. In Ex. xxiii. 10 sq. the provisions of the sabbatical year have a purely agricultural reference: in Deut. xv. the institution is applied so as to form a check on the power of the creditor. It does not appear reasonable to attribute these modifications to the altered circumstances or prospects of the nation which marked the close of the wanderings in the desert: the provisions of Ex., as is plain both from the tenor of xxiii. 20 sq., and from the various laws implying the existence of houses and the possession of separate holdings of land, are equally designed for the use of the people when settled in Canaan: those of Deut. differ just in being suited to the needs of a more advanced social state.*

* The laws have been harmonized by the supposition (1) that the law of Ex. xxi. 2 is meant to be tacitly extended to women; (2) that Deut. xv. 17 b does not abrogate Ex. xxi. 7, but enforces the extension tacitly implied in v. 2. But the notice of the special case v. 3, and the law v. 4, that even a female slave married to a bondman did not go free with her husband, renders it improbable that this tacit extension in Ex. can be designed. Bissell (p. 179) says that Ex. "speaks only of Hebrew men as servants;" but this is contradicted by v. 7.

* The judicial system of Deut., especially the supreme court of appeal (xvii. 8-13), which is not prescribed, but presupposed as existing, suggests the same inference. See Kleinert, pp. 128-130 (the force of whose remarks is not met by Kell, *Eint.* § 26, 1; or Bissell, p. 137 sq.); Dillmann, pp. 319, 611. On Deut. xxii. 28 sq., cp. W. R. Smith, *O. T. J. C.*, p. 367 sq.; *Add. Answer*, p. 56 sq. The hypothesis (Bissell, p. 177) that the law

§ 15. But the difficulties which the Deut. legislation presents culminate in the provisions respecting the Central Sanctuary and the tribe of Levi.

The Central Sanctuary.—In Deut. the law respecting sacrifice is unambiguous and strict: it is not to be offered in Canaan "in every place that thou seest" (xii. 13), but only at the place chosen by God "out of all thy tribes to set His Name there" (xii. 14-18; xiv. 23, and often), i.e. at some central sanctuary. Now, in Ex. it is said, in immediate connexion with the law respecting altars (xx. 24 b), "In every place where I record My Name, I will come unto thee and bless thee:" and with the principle here laid down, the practice of Josh.-1 K. vi., it is argued, conforms: in these Books, sacrifices are frequently described as offered in different parts of the land without any indication (and this is the important fact) on the part of either the actor or the narrator that a law such as that of Deut. is being infringed. After the exclusion of all uncertain or exceptional cases, such as Judg. ii. 5, vi. 24, where the theophany may be held to have justified the erection of an altar, there remain as instances of either altars or local sanctuaries, Josh. xxiv. 1 b, 26 b; 1 Sam. vii. 9 sq., 17; ix. 12-14; x. 3, 5, 8 (xiii. 9 sq.); xi. 15; xiv. 35; xx. 6; 2 Sam. xv. 12, 32 ("where men used to worship God"). The inference authorized apparently by these passages is met by the contention that the period from the abandonment of Shiloh to the erection of the Temple was an exceptional one, the nation was in disgrace and undergoing a course of discipline, its spiritual privileges being withheld till it was ripe to have them restored; and that, in so far as Samuel appears often as the agent, his function was an extraordinary one, limited to himself. It may be doubted whether this answer is satisfactory. There is no trace in the narrative of such disciplinary motives having actuated Samuel; and the narrator betrays no consciousness of anything irregular or abnormal having occurred. This is especially clear in 1 Sam. ix. 12 sq., x. 3-5, where ordinary and regular customs are evidently described. The sanctuary at which the Ark and Tent of Meeting were for the time located had doubtless the pre-eminence; but sacrifice at other places, so far as the evidence before us goes, was freely permitted. The law of Deut. was either not known or not felt to be operative. Yet the time assigned in Deut. xii. 10 had arrived, according to Josh. xii. 44, xxiii. 1, before the death of Joshua. From the time of Joshua therefore the law of Deut. ought to have been in force: and yet, as it appears, practice continued to be regulated by the law of Ex. The difficulty is a great one. The non-observance of a law does not, of course, imply necessarily its non-existence; still, when men who might fairly be presumed to know of it, if it existed, not only make no attempt to put it in force, but disregard it without explanation or excuse, it must be allowed that such an inference is not altogether an unreasonable one. Perhaps on the whole the facts at our disposal would be best explained by the supposition that:

In Deut. xv. is a "result of experience in the practical workings of the law" of Ex. xxiii. 10 *during the forty years' wanderings* is surely not a probable one.

the *kernel* of the statute is Mosaic; that the old law, while not superseding local sanctuaries, if properly sanctioned and approved, still encouraged a *preference* for the sanctuary at which the Ark was stationed (as indeed is implied in Ex. xxiii. 19), but that the *exclusiveness* which characterises the law in Deut. arose from the necessities of a later age, when history had shown how impossible it was to secure the local shrines against abuse, and to free them from idolatry. Prophetic authority, which had more and more distinctly taught that Zion was emphatically Jehovah's seat, it may be supposed, sanctioned the reform; Hezekiah gave it effect, at least temporarily (2 K. xviii. 4, 22; xxi. 3), and it is codified in Deut.

§ 16. *The tribe of Levi.*—Here the issues, stated succinctly, are two: (i.) Does Deut. recognise the sharp distinction between the priests and the common Levites as instituted in Ex.-Num., or does it treat every member of the tribe as qualified to exercise priestly functions? (ii.) Do the provisions made in Deut. for the support of both priests and Levites agree with those prescribed in Lev.-Num.? It is admitted on all hands that a complete code of regulations on these subjects is not to be looked for in Deut.: the question is, whether the *resumé* in xviii. 1-8 and the allusions elsewhere are such as might reasonably be expected from a writer having Ex.-Num. before him, or acquainted with their contents.

As will appear, the answer to ii. is so distinct that for our present purpose we are dispensed from the necessity of finding a definite answer to i. The following remarks may therefore suffice. It is true that no stress is laid in Deut. upon the descent of the priests from Aaron; their regular designation is not "the sons of Aaron" (as in the Priests' Code), but "the priests, the Levites," i.e. the priests of the tribe of Levi, or more precisely "the Levitical priests" (xvii. 9, 18; xviii. 1; xiv. 8; xxvii. 9): cp. "the priests the sons of Levi," xxi. 5, xxxi. 9): nor is there any allusion to the privileges of a fixed minority. More than this, xviii. 1 b, 2 b, appear to assign to the *whole* tribe the altar dues reserved in Num. xviii. 20^v

^v The limitation אֲשֶׁר אוֹכֵל שְׂמִי should be noticed: cp. W. R. Smith, *Add. Answer*, pp. 67 sq. 68-70; Delitzsch, *Studien*, xl. p. 563. בְּכָל מָקוֹם may include with equal propriety places conceived as existing contemporaneously (cp. the same idiomatic use of כָּל, Lev. xl. 24 b), or selected successively. The plural בְּכָל הַמְּקוֹמֹת would point rather to actually existing places: the singular exactly answers to "in whatever place." The appeal therefore to Hebrew idiom will not determine the dispute between Prof. Green (*Moses and the Prophets*, p. 311) and Dr. W. R. Smith (*The Prophets of Israel*, p. 393). The use of לִפְנֵי יְהוָה is not examined by Prof. Green with sufficient thoroughness. With words such as *gathered* or *sat*, there is a presumption from usage that it denotes presence at an altar or sanctuary.

^v Elsewhere (a) Josh. iii. 3, viii. 33; Jer. xxxiii. 18; Ezek. xliii. 19, xlv. 15: (b) 2 Ch. v. 6, xliii. 18, xxx. 27 (all. In Is. lvi. 21, as also in 1 Ch. ix. 2, Ezra x. 5, Neh. x. 38, 34, xl. 20, there is an asyndeton).

^v Where, in spite of Bissell, pp. 20, 114, 124, and even Dillmann (see, however, p. 605), there is a contrast with vv. 21, 24: *Jehovah* is the inheritance of the priests;

to the priest; and xviii. 6-8, relating to the "Levite" coming from the country to reside at the Central Sanctuary, describe his services there in terms which elsewhere, when used in a ritual connexion, denote regularly *priestly* offices. Even, however, should the inference thus suggested be just, there is nothing in Deut. inconsistent with the *pre-eminence* of a particular family, and the hereditary priesthood of Aaron's line appears to be recognised in x. 6^v

(ii.) In Num. xviii. particular provision is made for the support of both priests and Levites; and in Num. xxv. (cp. Josh. xxi.) forty-eight cities are appointed for their residence. In Deut. the provisions appear to be very different; and the Levites, instead of dwelling in their cities, are represented as scattered about the land ("in thy gates," § 34), and are earnestly commended to the Israelites' charity (xii. 12, 18, 19; xiv. 27, 29; xvi. 11, 14; xviii. 6; xxvi. 11, 12 sq.).

Let us examine the passages in order.

a. xviii. 3, which is in direct contradiction with Lev. vii. 32-34. Various attempts have been made to reconcile the discrepancy. (a) The traditional Jewish solution^v is that the allusion in Deut. is not to sacrifices at all, but to animals slain at home for private use. This is obviously a desperate resource: מִזְבֵּי, as Keil rightly observes, is always used in a sacrificial connexion (the poetical passages Is. xxiv. 6, &c., form no exception); and the combination of verb and noun, "sacrifice a sacrifice" (cp. 1 Sam. ii. 13), only brings out the meaning with greater distinctness. (β) F. W. Schultz (p. 59) and Mr. Espin consider that, though the reference is to the same sacrifices as Lev. vii., the dues prescribed are not in lieu of those there assigned (which, it is said, are included here in the fire-sacrifices of v. 1), but in *addition* to them, and perhaps intended as a compensation for the loss sustained by the abrogation of Lev. xvii. 1 sq. in Deut. xii. 15. If this be the meaning, it is obscurely and strangely expressed; an additional due, introduced in terms which imply that it is a normal and regular institution, is prescribed without a word to indicate that it is any novelty! (γ) Keil himself, modifying (a), supposes the reference to be, not to the peace-offerings proper, but to the ferial meals held in connexion with these at the annual sacrifices (so Bissell, p. 126). But such a limitation is not suggested at all by the phraseology; and it seems incredible that in a statement of "the

the titles are the inheritance of the Levites. So in Ezek. xlv. 28, where the same phrase is used, it is applied to the priest.

^v שָׂרַת בִּשְׁמִי, to minister in the name, as xviii. 5

(of the priest: cp. xvii. 12, xxi. 5); עָמַד לִפְנֵי יְהוָה, to stand before Jehovah, as Ezek. xlv. 15, Judg. xx. 28; cp. Deut. xvii. 12, xviii. 5. To stand before is a Hebrew idiom signifying to wait upon: see e.g. 1 Kings x. 8. The Levites "stand before" the congregation: Num. xvi. 9; Ezek. xlv. 11 b. (In 2 Ch. xxix. 11, priests are present: see v. 4.)

^v There are points in the history of the tribe which are still not clear. Space forbids here an examination of 2 K. xxiii. 9, Ezek. xlv. 6-15.

^v Josephus, *Ant.* iv. 4, 4; Philo, *De Praemiis*, § 3 (p. 235 M.): see Keil ad loc.

^v Quoted by Curtius (§ 40), p. 43.

priests' right" from the people, their appointed due (Lev. vii. 32-34) should be passed over in silence, and a *fresh* due alone be mentioned. The verse must refer to the commonest kind of sacrifices named in v. 1, and specify for the people's instruction what parts of these are due to the priest. The only fair interpretation appears to be to treat it as *parallel* to Lev. vii. 32-34, and consequently as belonging to a time when the regulation there laid down was not in force.

b. Verse 4 agrees with Num. xviii. 12 sq. except that "the first of the fleece of thy sheep" is here an addition. But this is a minor discrepancy, which need not detain us.

c. Verse 6. The language of this verse is, it is said, inconsistent with the institution of Levitical cities. The word rendered *sojourneth* is a distinct one: it means *to stay as a guest or stranger*—for a longer or shorter time—in a place; and is not used of residence in a permanent home. To understand it^b of those Levites who have sold their houses and wandered to other cities involves the improbable supposition that the legislator gives no permission to a Levite to go directly from a Levitical city to the sanctuary: he must become a sojourner elsewhere first! Verse 6 and the allusion v. 8 b to property owned by Levites are in no way incompatible with the institution of Levitical cities, supposing it to have been imperfectly put in force: at the same time, worded as they are, these verses come strangely from the lips of one who, if the chronology be correct, had only six months before^c assigned to the Levites permanent dwelling-places. Why did he not write "from one of the cities which I have appointed them"?

d. *Firstlings*.—In Deut. xii. 6, 17 sq., xv. 19 sq., it is laid down that the firstlings of the herd and the flock are to be *eaten by the owner* at the central sanctuary: in Num. xviii. 18 they are assigned to Aaron, with these words, "And the flesh of them shall be thine: as the wave-breast and as the right thigh, it shall be thine." Two explanations are offered. (1) The phrase in Num. does not mean that the *whole* of the firstling was the priest's, but only the parts specified in the comparison: the rest therefore would belong to the offerer, and might be consumed by him, as Dent. prescribes.^d But the text says distinctly "their flesh," without any limitation; and this explanation, though formerly accepted by Keil,^e is now^f given up by him. (2) The firstlings were given wholly to the priest, who, however, may not have consumed the flesh of them himself, but may have been at liberty to invite the offerer to share this with him at a sacrificial meal.^g Whether such an invitation, not prescribed, is likely to have been given, may be doubted; and as before it must be owned

that, if this be the meaning of the repeated injunction in Deut., it is expressed with unusual indirectness and obscurity; the primary rather than the secondary disposition of the firstlings would surely have been emphasized. The law, moreover, for the disposal of the "wave-breast" and right (or "heave") thigh by the priest, explicitly specifies those of the priest's family as sharing in them (Lev. vii. 34; cf. Num. xviii. 11, "to thy sons and to thy daughters with thee, as a due for ever"); it is remarkable, if it was the purpose of the legislation that the offerer should also regularly (and as a duty) partake in the firstlings, that there should be so little to intimate it in the terms of the original institution.^h

e. *Tithes*.—In Num. the tithes—as appears from Lev. xxvii. 30, 32, both vegetable and animal alike—are definitely assigned to the Levites (xviii. 21-24), who in their turn pay a tenth to the priests (vv. 26-28): in Deut. there appears to be no injunction respecting the tithes of animal produce; but the reservation of a tithe of vegetable produce (xii. 17 sq.; xiv. 22 sq.) is enjoined, which is to be consumed by the offerer, like the firstlings, at a sacrificial feast, in which the Levite shares only in company with others, as the recipient of a charitable benevolence. A large proportion therefore of what is assigned in Num. to the Levites—viz. the whole of the animal tithe, and a part of the vegetable tithe—remains implicitly the property of the lay Israelite in Deut. The discrepancy is commonly removed by the supposition that the allusion in Deut. is not to the tithe named in Lev.—Num. at all, but to a *second* or additional tithe, taken on the increase of the field only. It cannot perhaps be shown that a second tithe on a portion of the annual produce would be exacting or oppressive; but the writer must confess that such an interpretation does not appear to him to be fairly consistent with the language of Deut. and the manner in which the tithe is there spoken of. Even supposing the first tithe to be taken for granted, as an established usage, it is incredible that a second tithe should be thus for the *first time* instituted, without a word to indicate that it was an innovation, or in any respect different from what would be ordinarily understood by the word "tithe." And in xxvi. 12 sq., when in the third year the whole "tithes of the produce" has been stored (xiv. 28), and the Hebrew makes a solemn profession that it has been properly spent by him, it is scarcely possible that there should be no allusion to his disposition of the larger and more important tithe, if such were really due from him.ⁱ

^b Dr. Moody Stuart (§ 40) would explain xii. 1st on the analogy of xii. 27 (offer)—"eat," viz. not personally, but through the agency of those authorized in P to do so, i.e. the priests (pp. 161-3). But is this a case to which the principle *Qui facit per alium facit per se* could be applied?

^c The tithes of the *third year*, named xiv. 22 sq., xvi. 12, though sometimes spoken of as the "third tithe," is allowed generally to be merely the tithe elsewhere described in Deut., specially applied in that year. The word *δωρεῶν*, in xvi. 12, LXX., arises from a false rendering of the Hebrew שנת, "year of," and has no critical value. The *second tithe* would be השני, of which שנת התשיע is not a probable corruption.

^a See e.g. Gen. xv. 13, xix. 9, xlvii. 4 (Is. lli. 4); Judg. xix. 16 (opp. to the natives, אנשי הכסוף), &c. Kittel, in his article cited § 40 (1882, p. 288f.), does not take sufficient account of this uniform use of נָתַן.

^b Curtiss, p. 48 sq.

^g Keil; Green, p. 84; Espin; Blissell, p. 127 sq.

Upon the whole, it is difficult not to feel that the references in Dent. to priests and Levites presuppose the existence of customs and institutions not in agreement with those prescribed in Ex.-Num. The allusions are numerous; and if the speaker were familiar with those institutions, his words, it is reasonable to suppose, however general and popular in scope, would form naturally a *resumé*, the original of which could be at once recognised in those Books. Perhaps the most singular circumstance is the absence of any reference to Num. xviii. or xxv., and the frequency with which the Levite is commended to the charity of others. That Moses may have foreseen the neglect of his own institutions is indeed thoroughly conceivable; but if this be the explanation of his exhortations, should we not have expected him to introduce them by terms implying distinctly that it was only a *future need* which he was contemplating? The condition of the Levites appears evidently to be that which the writer saw around him, and reminds us involuntarily of Judg. xvii. 7 sq., xix. 1 sq. (note especially the term "sojourn"). Minor discrepancies offer a fair field to the harmonizer: when they are systematic, and can only be removed by means of a *series* of assumptions, each more or less artificial, the legitimacy of the attempt becomes questionable. The points considered under (ii.) do not directly prove Dent. to be non-Mosaic; but they tend independently to confirm the conclusion expressed at the end of § 12.

§ 17. There are, it is alleged, indications that the author lived at a distance from the period which he describes. Thus, if i. 3, "eleventh month," be compared with Num. xxxiii. 38, "fifth month" (fixing the date of Num. xx. 22-28), it appears that the whole of the events reviewed from ii. 2 to iii. 29 had taken place during the six months preceding the time when the words were spoken. In such a situation, however, the repeated "at that time" (ii. 34; iii. 4, 8, 12, 18, 21, 23), as also "unto this day" in iii. 14, though suitable when a longer period had elapsed, appears inappropriate. Ch. v. 3 and xi. 2-7 point in the same direction. The writer, though aware as a fact (viii. 2, 4) of the forty years' wanderings, does not appear to realize fully the length of the interval, and identifies those whom he addresses with the generation that came out of Egypt in a manner which betrays that he is not speaking as a contemporary. In ii. 12 b there is an evident anachronism: however, some writers have treated the notices ii. 10-12, 20-23 (though otherwise in the style of Dent. and similar to iii. 9, 11, xi. 30) as glosses.¹ Keil, who compares (*Eint.* § 23, 3) "his possession" in iii. 20, forgets that there the pronoun refers to the two and a half Transjordanic tribes, not as here to Israel: where the two and a half tribes are meant, they are regularly specified by name. Whether, however, an anachronism is involved in the mention of Gilgal (xi. 30) may be doubted; the Gilgal named may (Keil) be

the *Jiljila* of Robinson,²—a height 13 miles S. of Shechem and 2441 ft. (Pal. Expl. Map) above the level of the sea. Or (Dillmann) some other "stone-circle" may be intended.

§ 18. The use of the phrase "beyond Jordan" for E. Palestine in Dent. i. 1, 5, iv. 41, 46, 47, 49 (as elsewhere in the Pentateuch: cp. Num. xxii. 1, xxxiv. 15), exactly as in Josh. ii. 10, vii. 7, ix. 10, &c., Judg. v. 17, x. 8, is said to imply that the author was resident in W. Palestine. It is indeed difficult to resist this inference. On the one hand, Dent. iii. 20, 25, xi. 30, and Josh. v. 1, ix. 1, xii. 7, show that the assumption sometimes made, that עבר הירדן had a fixed geographical sense (like *Gallia Transalpina*, &c.), and was used as a standing designation of the Transjordanic territory, irrespectively of the actual position of the speaker or writer, is incorrect: on the other hand, if its meaning was not thus fixed, its employment by a writer, whether in E. or W. Palestine, of the side on which *he himself stood*, is difficult to understand, unless the habit had arisen of viewing the regions on the two sides of Jordan as *contrasted with each other*:¹ and this of itself implies residence in Palestine. The question thus resolves itself into a prior one: was this a habit of the Canaanites, and did the usage suggested by it pass from them to the Israelites, before the latter had set foot in the land, and experienced the conditions likely to naturalize it amongst them? The *possibility* of this cannot, perhaps, be denied; at the same time it may be doubted whether it is probable. The use of the phrase in the Pentateuch generally, exactly as in Josh. ii. 10, &c., creates a presumption that the passages in question were written under similar local conditions.²

§ 19. If Dent. be not Mosaic, to what age may it be ascribed? Critics have agreed generally to assign it to the period of either Manasseh or Josiah. Let us inquire what evidence may be adduced in favour of either of these dates.

The composition of Dent. must have been prior to the eighteenth year of king Josiah (n.c. 621). From the narrative 2 K. xxii. 8 sq. relating the memorable discovery in that year by Hilkiah of the "book of the law" in the Temple, it is clear that this must have embraced Dent.; for although the bare description of its contents, and of the effect produced upon those who heard them (xxii. 11, 13, 19), might suit Lev. xxvi. equally with Dent. xxviii., yet the allusions to the *covenant* contained in it (xxiii. 2, 3, 21) which refer evidently to Dent. (xix. 1, 9, 21, &c.), and the fact that in the reformation

¹ *Bibl. Res.* (1856) li. 265 sq. Still, though this height (as the writer was informed on the spot) is visible on a clear day from the top of Gerizim (it is certainly not visible from the plain at its foot), it is no particularly conspicuous one; and it is not easy to understand why it should have been selected as a landmark.

² Hence its use in Josh. v. 1; ix. 1; xii. 7, written (presumably) in W. Palestine.

³ So (since the present article was in type) Dean (now Bishop) Perowne in the *Contemp. Rev.*, Jan. 1889, p. 143 sq. In Dent. iii. 20, 25, the (assumed) position of the speaker is naturally maintained. In v. 8, on the contrary, in a phrase of *common occurrence* (iv. 47; Josh. ii. 10, ix. 10), as in Josh. i. 14, 15, the point of view is that of the narrator, not of the speaker.

¹ Blasel (p. 267) suggests that the verbs in ii. 12 b may be "prophetic perfects:" but (1) the prophetic perfect hardly occurs in prose; (2) the comparison postulates a reference to something *known*, i.e. to something past, not to something still in the future.

based upon it Josiah carries out step by step both the letter and the spirit of Deut., "leave no doubt upon this matter. This gives a posterior limit for its composition: how much earlier may it be? The suggestion has been made that it was the work of Hilkiah the high-priest himself, who either alone or with the assistance of Jeremiah, wishing to introduce a religious reform, compiled this book for the purpose of inculcating his principles, and placed it where, when wanted, it could conveniently be "found."¹ This view will not bear examination, and has been repudiated repeatedly by the best critics.² To say nothing of the incredible "pious fraud" which it involves, it is to be noticed that (1) a book compiled by the high-priest could hardly fail to emphasize the interests of the priestly body at Jerusalem, which Deut. does not do: (2) the hypothesis that Jeremiah was the author cannot be sustained; it is true there is much that is common to Jer. and Deut., but when the two are minutely compared it appears that many of the *characteristic* expressions and ideas of each are absent in the other:³ (3) the fact that the book was found while the Temple was being cleared out for repairs, strengthens the *prima facie* impression produced by the narrative that the discovery was an accidental one. The book, however, could hardly have been lost for the first time in the early years of Josiah (who appears throughout to have been devoted to the service of Jehovah); but this might easily have happened during the heathen reaction under Manasseh, when the Temple was desecrated, and fell into disrepair (2 K. xxi. 4-7, xxii. 5). We are thus thrown back to the reign of Manasseh as the latest to which the composition of Deut. can reasonably be assigned.⁴

¹ Cp. xxii. 13 with Deut. xlix. 27; xxii. 19 with xxviii. 37; xxiii. 3 b, 24 b, with xxvii. 26; v. 4, 5 b, 11 with xvi. 3; v. 5 a, 13 sq. with xli. 2 sq.; v. 6 with xvi. 21; v. 7 with xxiii. 17 sq.; v. 9 b with xxviii. 8 a; v. 10 with xxviii. 10 a; v. 14 with xvi. 21 sq.; v. 21, 23 ("in Jerusalem") with xli. 13 sq., xvi. 5 sq.; v. 24 with xlviii. 11; v. 25 with vi. 5. Whether the book found by Hilkiah embraced more than Deut. is unimportant for our present purpose: Deut. is sufficient to satisfy the terms of the narrative.

² Ewald, *Hist.* iv. p. 235; Riehm, p. 105; W. R. Smith, *Answer*, p. 34, O. T. J. C. p. 352; Dillmann, p. 614; Kittel (§ 40 end), p. 57 sq.

³ The proof may be found, by the reader who can disentangle it from the irrelevant matter concealing it, in J. L. König's *Alttestamentliche Studien*, II. (1839). The salient points are exhibited with superior discrimination and scholarship by Kleinert, pp. 186-190, 235. See also Schrader, *Eint.* § 206 g; Keil, *Eint.* § 23, 3. Jeremiah's authorship was hinted at by P. von Bohlen (against whom König's book was chiefly directed) in 1835 (*Die Genesis*, § 22): but its only conspicuous advocate has been Cosenso (*Pent.* liii. p. 618; vii. pp. 225-227; and App. pp. 85-110).

⁴ So Ewald, *Hist.* i. 127, iv. 221; Bleek, *Intr.* § 128; Riehm (in 1834); W. R. Smith, *Add. Answer*, p. 78; Valetton, vii. pp. 222 sq.; Kittel, pp. 57-9. Reuss, *La Bible* (1873), i. 158 sq., *Gesch. d. Heil. Schr.* A. T.'s, §§ 286-288, Kuenen (*Hex.* p. 214), and (though less confidently) Dillmann (p. 613 sq.) prefer the reign of Josiah. Riehm more recently (*St. u. Kr.*, 1873, p. 194) and Delitzsch (*Studien*, xl. p. 581) assign it to the age of Hezekiah. The case against Deuteronomy being supposed to be the work of Hilkiah, or of a member of his circle, is forcibly put by Dean (now Bishop) Perowne, *Cont. Rev.*,

§ 20. The following considerations have been appealed to for the purpose of fixing the date more closely.

(1.) The circumstances referred to in §§ 14, 17 point more or less conclusively to a period considerably removed from that at which the Israelites took possession of Canaan, and presupposing a changed social condition of the people.

(2.) The law of the kingdom, xvii. 14 sq., is coloured by reminiscences of the monarchy of Solomon. The argument does not deny that Moses may have made provision for the establishment of a monarchy in Israel, but affirms that the form in which the provision is here cast bears traces of a later age (cp. § 24).

(3.) The forms of idolatry alluded to, specially the worship of "the host of heaven" (iv. 19, xvii. 3), are thought to point to the middle period of the monarchy. It is true that the worship of the sun and moon is ancient, as is attested even by the names of places in Canaan; but in the notices (which are frequent) of idolatrous practices in Judg.-Kings, no mention occurs of "the host of heaven" till the period of the later kings (2 K. xxiii. 13 names Ahaz; cp. Is. xvii. 8 end, belonging to the same reign; 2 K. xxi. 3, 5 [cp. xxiii. 4, 5, 12], Manasseh; Zeph. i. 5; Jer. viii. 2, xix. 13 [cp. vii. 18, xlv. 17; Ezek. viii. 16], belong to a somewhat later period). That the cult is presupposed in Deut. and not merely anticipated prophetically, seems clear from the terms in which it is referred to. While we are not in a position to affirm positively that the danger was not felt earlier, the law, as formulated in Deut., seems designed to meet the form which the cult assumed at a later age.

(4.) Deut. xvii. 8-13, xix. 17, have been thought to presuppose the judicature established by Jehoshaphat (2 Ch. xix. 8-11). Certainly (§ 14, note) the language of Deut. appears to presuppose the existence of a supreme court of appeal; and if allowance be made for the point of view from which the Chronicler writes, he may fairly be supposed to describe the same institution which is alluded to in Deut.¹ Still, there is an element of uncertainty in this argument, which forbids our attaching too much weight to it.

(5.) The description in xxviii. 49 sq. has been supposed to betoken a familiarity with the character and dealings of the Assyrians; and that in xxviii. 53 sq., 64 sq., to show an acquaintance with the siege of Samaria (2 K. vi. 28 sq.) and exile of the ten tribes. Both arguments, especially the latter, are of slight weight. Exile and deportation of inhabitants was a familiar experience in the ancient world; and the possibility of such fate may well have presented itself to a writer before the 7th or even before the 8th cent. B.C. All that can be allowed is

Feb. 1888, pp. 255-257: but his arguments do not affect the position that it was composed a generation or more previously, and had since been genuinely lost.

¹ The notices in 2 K. xvii. 16, xxiii. 11, are indefinite.

² So Kleinert, p. 106.

³ Riehm, pp. 86-88: comp. especially v. 11 with Deut. xvii. 12. Kleinert's objections, p. 141 sq., do not appear to be conclusive. Cp. Dillmann, pp. 329 sq., 411.

that the form of the description (particularly that of the invading foe) somewhat strengthens the presumption, derived primarily from other indications, in favour of a date after (or during) the great Assyrian invasions of Palestine.

(6.) The influence of Deut. upon subsequent writers is clear and indisputable. It is remarkable, now, that the early Prophets Amos, Hosea, and the undisputed portions of Isaiah show no certain traces of this influence (see § 33); Jeremiah exhibits marks of it on nearly every page; Zephaniah and Ezekiel are also evidently influenced by it. If Deut. were composed in the period between Isaiah and Jeremiah, these facts would be exactly accounted for.

(7.) The language and style of Deut. (§§ 31, 37), clear and flowing, free from archaisms, but purer than that of Jeremiah, would suit the same period. It is difficult in this connexion not to feel the force of Dillmann's remark (p. 611), that "the style of Deut. implies a long development of the art of public oratory, and is not of a character to belong to the first age of Israelitish literature."

(8.) It is believed also (though all will not recognise equally the force of such an argument) that the *prophetic teaching* of Deut., the point of view from which the laws are presented, the principles by which conduct is estimated, presuppose a relatively advanced stage of theological reflection, as they also approximate to what is found in Jeremiah and Ezekiel.

(9.) In Deut. xvi. 22, we read, "Thou shalt not set thee up a *mazzēbah* (obelisk or pillar), which the Lord thy God hateth." Had Isaiah known of this law, would he, it is asked, have adopted the *mazzēbah* (xix. 19) as a symbol of the conversion of Egypt to the true faith? The supposition that *heathen* pillars are meant in Deut. is not favoured by the context (v. 21 b); the use of these has, moreover, been proscribed before (vii. 5; xii. 3^a).

(10.) Ewald and Riehm^a (in 1854) sought to fix the date of Deut. more precisely from xxviii. 68. The combination was an ingenious one, but could not be relied upon with any confidence; and Riehm afterwards abandoned it.^b

(11.) Nor can any more certain inference be drawn from xxiii. 3-8 (prohibiting the naturalization of Ammonites and Moabites, but inculcating a spirit of friendliness towards Edom and Egypt). With Ammon and Edom relations of hostility (so far as appears) prevailed uniformly almost from the earliest times: with Moab there was greater fluctuation, and with Egypt there are traces of intercourse at many different periods. But even if it were clear that these injunctions reflect the temper of a particular age, the materials are too scanty to enable us to fix what that age may have been. Perhaps Delitzsch (p. 560 sq.; cp. Dillmann, p. 605) is right in regarding the injunctions in vv. 7 sq. as the oldest, and assigning those in vv. 3-6 to a later origin (prior, however, to the date of Deut. itself).

In answer to these considerations some reliance is placed upon the acquaintance which, it is said, is displayed in Deut. with Egyptian customs.^c It may be doubted whether this argument possesses great cogency, even though it be granted that the customs alluded to in vi. 9^a [not 8^b], xxv. 2^a (the *bastinado*), 4, 4^a xxvii. 2b,^a are necessarily derived from Egypt. The mention of a custom by a particular author is not evidence that he was a *contemporary* of its introduction; and the allusions to Egyptian peculiarities in xi. 10, and vii. 15, xxviii. 27, 35, are not more marked than the one in Amos viii. 8, and not so minute as those in Is. xix.

§ 21. If it be true that Deut. is the composition of another than Moses, in what light are we to regard it? In particular, does this view of its origin detract from its authority and value as a part of the Old Testament Canon? Let us consider the manner in which the author must have worked, and the object which he may have had in view. The objection is commonly made that, if this be the origin of the Book, it is a "forgery:" the author, it is asserted, has sought to shelter himself under a great name, and to secure by a fiction recognition or authority for a number of laws devised by himself. It does not appear, however, that this objection can be sustained: and the theory respecting the author's supposed motives is entirely unsupported by fact. *The book does not claim to be written by Moses*: whenever the author speaks himself, he purports to give a description in the *third person* of what Moses did or said.^d Now, it is the uniform practice of the biblical historians, in both the Old and the New Testaments, to represent their characters as speaking in words and phrases which cannot have been those actually used, but which they themselves select and frame for them: thus in

^a Hengstenberg, *Die Bücher Moses und Aegypten* (1841), pp. 89 sq., 224; whence Schultz, p. 78, &c., and the commentators.

^b See Wilkinson-Birch, *Manners and Customs of the Ancient Egyptians*, ed. 2 (1878), l. 362; Riehm, *Handwörterbuch des Bibl. Altertums* (1884), p. 578.

^c For this is based upon *Rhodius* (xiii. 9, 16); the custom, moreover, of hanging written charms on the necks of children (Wilkinson-Birch, ii. 384-6) is only partially parallel.

^d Wilkinson-Birch, i. 305-8.

^e *Id.* ii. 418-421.

^f *Id.* ii. 288 sq. This is the most plausible. But there appears to be no ground for referring, in explanation of xx. 5, to *Id.* i. 264, 285-87, 300 sq.; or to Rosellini, *I Monumenti dell' Egitto*, ii. iii. p. 218. The "officers" named are not mere registrars: they are represented elsewhere as exercising administrative functions, and here they perform merely such duties as would be assigned in the army of any country to similarly constituted officials. The practice of burying vials with the dead—if Dillmann be right in supposing it to be alluded to in xxvi. 14 (otherwise Kell)—though Egyptian (Wilk.-Birch, iii. p. 433), is far from being confined to Egypt (Tylor, *Primitive Culture*, 1871, ii. pp. 28 sq.).

^g See l. 1-5; i. 41-43, 44-v. 1; xxvii. 1, 9, 11; xxix. 2 (Heb. 1); xxxi. 1-30. Undoubtedly, the third person may have been used by Moses: but it is unreasonable to claim that he *must* have used it, or to contend that passages in which it occurs could *only* have been written by him. The case is stated correctly by Delitzsch, *Studien*, x. p. 503 sq.; more briefly by *Genesis* (1887), p. 22.

^a Repeated from Ex. xxiii. 24, xxxiv. 13. The "Book of the Covenant" enjoins the destruction of *heathen* altars and pillars; but contains no prohibition corresponding to Deut. xvi. 22: in Ex. xxiv. 4 "pillars" are erected beside an altar by Moses.

BIBLE DICTIONARY.—VOL. I.

the Acts of the Apostles many of the speeches exhibit plain marks of the style of St. Luke; the speeches in the Chronicles (except those borrowed from the Books of Kings) are in the style of the author of that Book; many of those in Kings are in the style of the compiler of Kings.^a Thus David in 1-2 Sam. speaks in one style; in the Chronicles he speaks in another.^b In some of these cases the authors no doubt had information as to what was actually said on the occasions in question, which they recast in their own words, only preserving, perhaps, a few characteristic expressions; in other cases, they merely gave articulate expression to the thoughts and feelings which it was presumed that the personages in question would have entertained. This custom of the biblical writers might be abundantly illustrated; and it is important, if we wish to read the Historical Books aright, to bear it in mind. The principle may be applied in the present case. No doubt there was a tradition of a final address delivered by Moses to the people; perhaps, also, a written record of its general purport and scope.¹ Upon this basis the discourses in Deut. are constructed. The historical retrospect is sketched in full; the old laws are explained, and referred to their motives and aim: at the same time the modifications and additions which some had undergone in the course of years, in the effort to adapt to new conditions and otherwise extend the principles of the old legislation, are silently incorporated. To suppose that the ordinances are the author's "inventions" is out of the question,—whether imagined on the one side, or objected on the other; the fact, if true, must have been at once discovered, and have proved fatal to their acceptance by the nation: they are current courses, some as old as the Book of the Covenant, others doubtless more recent, but sanctioned by prophetic or other authority, and obviously such as would be recognised as authoritative by those to whom they were addressed. In thus building upon a foundation supplied by tradition; in adopting laws which were, or were reputed to be, Mosaic; in providing them with hortatory introductions, conceived in the true spirit of the older legislation, there is no dishonesty and no literary fraud.²

§ 22. The same conclusion may be reached from another direction. Deut. xii.-xxvi. is not, strictly speaking, a *code*: the discursive, untechnical style which it often assumes is incompatible with the character of a code; it contains a code, but is not the code itself. It is (as has been said before) the popularization of a code, a manual taking a code as its basis, and extracting and commenting upon such provisions as were most generally necessary to be known. But a work of this sort obviously pretends to no authority of its own; its authority is derived from the code which underlies it. In casting his explanations therefore into a form appropriate to Moses' mouth, the author could not have been

actuated by a desire to gain authority for a "new code": the code existed and was recognised as such; the author's aim is simply to apply and enforce it. His own position is thus, as towards the code, essentially subordinate: he is not an originator, but expounds anew old principles. Not merely then is there nothing in the Book implying an interested or dishonest motive on the part of the (post-Mosaic) author; the imputation is refuted by the nature of the case. And this being so, the moral and spiritual greatness of Deut. remains unimpaired: its inspiration and canonical value are in no degree less than those of any other part of the O. T. Scriptures which happens to be anonymous.

§ 23. In fact, it is apparent upon intrinsic grounds that in the main the laws in Deut. are anything but new enactments. In ch. xi., though the form is Deuteronomic, the substance is certainly earlier: the law of military service implies a simpler state of society than the age of the later kings; and the injunction to give no quarter to the inhabitants of Canaan (vii. 1-5; xx. 16-18) "points us directly back to the days of Moses." The text itself refers to Ex. xxiii. 31-33; and in any subsequent recapitulation of Mosaic principles it must unquestionably have found a place. The repetition, so far from being nugatory (as is sometimes objected) in the 8th-7th cent. B.C., would indirectly have a real value: occurring, as it does, in close connexion with the prohibition of all intercourse with the Canaanites, it would be an emphatic protest against tendencies which, under Ahaz and Manasseh alike, were dangerously strong. And as regards the laws included in xxi. 10-xxv., the same conclusion is supported by the somewhat unusual expressions which are here found to occur (Dillmann, p. 340).

§ 24. The much-debated "law of the kingdom" (xvii. 14-20) is also undoubtedly in its kernel old (so Dillmann, pp. 322, 604). It will be observed that the limitations laid down are all *theocratic*: the law does not define a political constitution, or limit the autocracy of the king in civil matters. It stands thus out of relation with 1 Sam. viii. 11-17, x. 25. Its object is to show how the monarchy, if established, is to conform to the same Mosaic principles which govern other departments of the community. Verse 15 does not allude, as has been supposed, to the possible danger of a foreign usurper in the 8th or 7th cent., but asserts the primary condition which the monarchy must satisfy,—“Thou mayest not set a stranger to be king over thee:” a condition conceived thoroughly in the spirit of Ex. xxiii. 32 sq., and designed to secure Israel's distinctive nationality against the intrusion of a heathen element in this most important dignity. The prohibitions re. 16 sq. guard against the distractions too often produced by riches and luxury at an Oriental Court: danger from this source may well have been foreseen by Moses: still, these verses certainly wear the appearance of being coloured by recollections of the court of Solomon (1 K. x. 25-28; xi. 2-4), or even of the eagerness of a powerful party in the days of Isaiah to induce the king to strengthen himself by means of Egyptian cavalry (Isa. xxx. 16; xxxi. 1; cp.

^a See for illustrations Delitzsch, *Jesajas*⁴ (1889), p. 11 sq. (Eogl. Tr. i. 18 sq.)

^b See e.g. 1 Ch. xxviii., xxix. (both the idioms and the ideas of which are throughout those of the *Chronicles*: cp. the writer's *Introduction*, pp. 498 sq., 502 sq.).

¹ So Kleinert, p. 135; Delitzsch, *Studien*, x. p. 508.

² Cp. Delitzsch, *ib.* p. 508.

¹ Cp. Dillmann, p. 272: “gewiss uralt.”

Jer. ii. 18, 36).³³ The injunctions *et. 18 sq.* secure the king's personal familiarity with the principles of the Deuteronomic law, for the reason specified in *v. 20*. As the re-formulation of an older law, embodying the theocratic ideal of the monarchy, the law of the kingdom contains nothing that is ill-adapted to a date in 8th-7th cent., or that would have sounded "absurd" to the author's contemporaries, supposing that to be the period at which he lived.³⁴

That the legislation of Deut. is based generally upon pre-existing sources is fully recognised by critics.^o In estimating their position it is necessary accordingly to bear this in mind. Arguments^p which are sufficiently forcible against the view that the laws of Deut. are *intentions* of the 7th cent. B.C. have by no means the same cogency when directed against the position that Deut. is the *reproduction* and *re-formulation* of an older system of laws.

§ 25. *Critical questions connected chiefly with the "margins" of Deut.*—As has been stated (§ 2), ch. v.-xxvi., with ch. xxviii. as a conclusion,² belong closely together: they comprise the legislation proper, and are marked throughout by the same spirit and method of treatment.* To this iv. 44-49 form a superscription. Ch. xxvii., as it stands, plainly interrupts the connexion, and is probably misplaced; xxviii. 1 would form a natural sequel to xxvi. 19, though the view is highly probable that the two verses xxvii. 9 sq. were the link which originally connected xxvi. 19 with xxviii. 1.³

§ 26. What relation, now, does ch. i.-iv. 40 bear to the body of Deut.? Is it by the same hand? The main reasons for answering this question in the negative, and for supposing it added after ch. v. aq. was completed, are ' (1) the disagreement between ii. 14 b and v. 2 sq., xi. 2-7, and between ii. 29 and xxiii. 3, 4, 7; " (2) the separate heading iv. 44-49, which appears to be superfluous after i. 1-4. These are, no doubt,

^m To "cause the people to return to Egypt," is not to be understood literally, as Num. xiv. 4: what is meant is that in sending to Egypt in quest of cavalry the king will be acting counter to the intention of the words quoted.

§ 7, 12-17 (following others), and Riebm, *Biol.* pp. 315-317, both of whom express themselves satisfied by them.

* The recipients of the Dent. legislation, who in chaps. v. xi. are identified with the witnesses of the theophany at Horeb, are in ch. ii. expressly distinguished from them. The question which arises is this, Do sufficient grounds exist in the context of the passages quoted to make it probable that one and the same writer would adopt in them two different points of view?

Edom and Moab are placed on the same footing in ll. 29, but on a *different* footing in xxlii. 3, 7 sq. However, the injunction in xxlii. 8 is avowedly based upon the "brotherhood" of Edom—a relationship not subsisting in the case of Moab.

incongruities: but it is doubtful if they are sufficiently grave to outweigh the strong impression produced by the language of ch. i.-iv. that it is by the same hand as ch. v. sq. Not only is the general style and manner of treatment the same—ch. i.-iii. *generally* like ch. ix. x., and ch. iv. *generally* like ch. v.—but there are, besides, remarkable coincidences of phraseology. Not to quote the broader features of the Deuteronomic style,* which are readily susceptible of imitation, the following are worthy of notice:—

1. 17, נור (xviii. 22); 27, שנהא (ix. 26); 28, בצורות (lx. 1); 29, עץ (vii. 21, xx. 3, xxxi. 6), 31 end (§ 36, No. 24); 32, חויד, קי (xviii. 20); 45 b (Idiom), cp. ix. 26, xxix. 16 [Heb. 15];—
li. 8, מדרך כף, פה, מדרך נסה, (xv. 24; 27, חור (36, No. 21); 30, אמש לכב, חג; 7 only 2 Ch. xxxvi. 13 besides); 33, נתן לפני (36, No. 20);—lii.

24, גדל (v. 21, ix. 26, xl. 2);—lv. 9, ארז ראו שניר (36, No. 26); 10 b (cp. xli. 1 b); 19 (cf. xlv. 3), 29 b (36, No. 19); 32, cp. xlii. 7 [Heb. 8], xxviii. 64 (all); 34, סמות, חס (vii. 19, xxvi. 8); 40 (§ 34, No. 8; 6 36, No. 13; 6 34, Nos. 3, 4).

The combination of minuter and broader features constitutes a strong argument in favour of the unity of authorship. Still, there is justice in the remark that the separate heading iv. 44-9, especially when its *circumstantiality* is considered, wears the appearance of being due to a writer who was not acquainted with the introduction to v.-xxvi. contained in i.-iv. 40. Klei­nert, with older scholars (pp. 33, 168 sq.), supposes that iv. 44-xxvi. was the part of Deut. that was first completed, and that i.-iv. 40, 41-43 were prefixed subsequently by the author himself as an introduction. Dillmann, who does not doubt that the *substance* of ch. i.-iv. is by the author of ch. v. sq., but holds that it has been modified in form by the redactor who incorporated Deut. in the Hexateuch, attributes to the latter both ii. 14 b-16 and iv. 44-49.

§ 27. Ch. xxvii. Verses 9 sq. have been spoken of already (§ 25). In the rest of the chapter four distinct ceremonies are enjoined: (1) The inscription of the Deuteronomic law on stones upon Mount Ebal, vv. 1-4, 8; (2) the erection of an altar and offering of sacrifices on the same spot, vv. 5-7; (3) the ratification of the new covenant by the people standing on *both* mountains, vv. 11-13; (4) the twelve curses uttered by the Levites and responded to by the whole people, vv. 14-26. It is true that vv. 11-13 are disconnected with 1-8, the situation and circumstances being alike different*: at the same time some *actual* symbolical ceremony must have been intended in the words xi. 29 sq., and these verses specify what that is. In the opinion of critics, the basis of vv. 1-8 is an older narrative, which has been recast by the writer of Deut. in his own phraseology. The connexion of vv. 14-26 with vv. 11-13 is very imperfect. Verses 12 sq. represent six of the tribes (including Levi, which is reckoned here as a lay-tribe, Ephraim

* The reader who cannot discover them for himself will find them noted in Dillmann, p. 229. The differences which Knaben (p. 129) notes are real but slight.

= Kuenen, *Tk. Tijdschr.* 1878, p. 304 sq. (cp. *Hew.* § 7, 22); Dillmann, p. 367 sq.

and Manasse being treated as *one*) on Gerizim and six on Ebal—in tolerable accordance with Josh. viii. 33; and we expect (cp. xi. 29) some invocation of blessings and curses on the two mountains respectively. Verses 14 sq., on the contrary, describe only a series of *curses*, uttered by the *Levites*, to which *all* Israel respond. The two representations are evidently divergent, and give an inconsistent picture of the entire scene. Either something which made the transition clear has dropped out between vv. 13 and 14, or vv. 14 sq. have been incorporated from some independent source (see Dillmann, pp. 367-9).

§ 28. It is not possible perhaps to feel so confident respecting xxix. 2 (Heb. 1)—xxx. 20, as respecting ch. i.-iv.: for here, though there is no lack of Deuteronomic phrases, the Deuteronomic ring (except in xxx. 11-20, especially 11-14) is not heard quite so distinctly. Several new expressions also make their appearance (e.g. xxix. 6b, 9b, 11b [both Josh.]; 17, שְׁלוֹמִים

and גְּלוּלִים; 19, שְׁרִירוֹת לָבוֹ; and xxix. 22-xxx. 10 is connected imperfectly with the context. Kleinert (p. 202) remarks that the promise of restoration in xxx. 1-10 is alien to the intention of a legislator, whose object throughout the rest of ch. xxviii.-xxx. is exclusively to inculcate motives for the observance of his statutes, and kindred rather to the spirit of a prophet. It may be replied that the author is more than a mere legislator: the section, moreover (with xxix. 22-29), is but the expansion of iv. 27-31. But it is true that xxx. 11 (which clearly gives the reason for a *present* duty, and is in no relation with the future contemplated in vv. 9, 10) is connected imperfectly with v. 10, and can hardly have been originally preceded by xxx. 1-10. Dillmann considers that elements belonging to Deut. have been here united and amplified by the redactor, and agrees, in particular, that xxx. 11-20 is "beyond question original."

§ 29. Ch. xxxi. 1—xxxii. 47, including the Song of Moses (ch. xxxi.).

Argument of the Song.—After an exordium (vv. 1-3) the poet states his theme (4 a) הַצֹּדֵק תָּמִים פְּעָלָיו, viz. the uprightness and faithfulness of Jehovah, as illustrated in His dealings with a corrupt and ungrateful nation (vv. 4-6). He dwells on the providential care with which the people had been guided to the home reserved for them (vv. 7-11): how it had triumphantly taken possession of the soil of Canaan (vv. 13, 14); how prosperity had tempted it to be untrue to its ideal ("Jeshurun") character, to forsake and dishonour its God (vv. 16-18), until the punishment decreed for this (vv. 19-26) had all but issued in national extinction, and the final step had only been arrested by the thought of the foe's malicious triumph (vv. 26-8). Had the nation possessed true wisdom, it would perceive whither its course was tending, and would understand the true ground of its disasters (vv. 29-33). But the enemy will not triumph for ever: in His people's extremity Jehovah will Himself interpose (vv. 34-36); and when the gods whom they have chosen are powerless to aid them, He Who is God alone, and Lord of life and death, will avenge His servant's cause (vv. 37-43). The thought underlying the whole (as thus the rescue of the people by an act of grace, at the moment when annihilation seemed imminent. The poem begins reproachfully; but throughout tenderness prevails above severity, and towards its close the strain becomes wholly one of consolation and hope.

7 Kell, *Bibl.*, § 24, 3 end.

The Song shows great originality in form, being a presentation of prophetic thoughts in a poetical dress, which is unique in the O. T. The standpoint—whether assumed or real—from which the poet speaks is, of course, subsequent to the Mosaic age, to which, vv. 7-13, he looks back as to a distant past. The style of treatment, as a historical retrospect, is in the manner of Hos. ii., Jer. ii., Ezek. xx., Ps. cvi. The theme is developed with great literary and artistic skill; the images are varied and expressive; the parallelism, though not perfectly regular, is often very forcible.

It would be going too far to affirm that the Song cannot be by the same hand as the body of Deut. At the same time most of the characteristic expressions are different, and it presents many fresh thoughts: hence Delitzsch, wishing to vindicate its Mosaic authorship, seeks to show that it is independent of and prior to the discourses, and that in such points of contact as are traceable between them the originality is rather on the side of the Song.^a In this he appears to be right: at any rate internal evidence, while not indeed precluding the identity of authorship,^b is far from being strong enough to make it a certainty. If xxxi. 14 sq. be examined carefully, it will be seen that there are really two introductions to the Song, viz. vv. 14-22 and vv. 23-30. These appear to be by different hands; the first exhibiting several phrases not found elsewhere in Deut., the second being in the general style of the body of the Book. Verses 14-22 are considered by critics to form part of JE; and the view taken by them of the Song is that, being already at the time when JE was composed attributed to Moses, it was incorporated in this historical work accordingly.^c The section containing it was excerpted by the author (or redactor) of Deut. who, adding xxxi. 23-30 and xxxii. 45-47, gave it the place which it now holds. This view presupposes naturally that the Song is older than JE, and *a fortiori* older than Deut. Dillmann, in agreement with Knobel and Schrader (*Eintl.* § 205 h), assigns it to the period of the Syrian wars, in particular to the interval between 2 K. xiii. 4, 7, and xiii. 23, 25, xiv. 25 sq. (circ. 800 B.C.). Certainly a period such as this is the standpoint from which the Song purports to be spoken.

Ch. xxxii. 48-52. This is part of the narrative of P: it has all the marks of P's style, and none of the style of Deut. (e.g. *וְיָא*, vv. 49, 52, like Num. xiii. 2, xv. 2, &c., but contrary

^a *Studien*, x. p. 507.

^b Kell, aiming to prove more, catches at straws: in what respect are *וְיָא* and *וְיָא* better evidence of antiquity than *וְיָא* and *וְיָא*, which are used by Isaiah? Mr. Esplin (p. 917), in referring to a "long list" of coincidences given by Colenso, *Prod.* iii. § 799, has neglected to notice that a large number of these are with *Jeremiah*, and consequently have no cogency except for those who believe that Deut. is the work of that Prophet.

^c So Schrader, *Eintl.* (1869), § 191; Klostermann, in the *Stud. u. Krit.* 1871, p. 262 sq. (whose arguments satisfy Weilh. *J. D. Th.* xxi. 585); Dillmann; *Bibl.* *Eintl.* p. 312. Cp. Ewald, *Hist.* i. p. 123 sq. See also Kuenen, §§ 8, 16; and Stade in the *Z. A. T. W.* 1886, pp. 297-300.

to the usage of Deut. [see § 37]. It is partly identical with Num. xxvii. 12-14.

§ 30. Ch. xxxiii. *The Blessing of Moses*.—This offers even fewer points of contact with the discourses of Deut. than ch. xxxii., and is accordingly considered by Delitzsch not to have been among the materials made use of by the author of Deut., but to have been handed down separately; till it was inserted here by the redactor who incorporated Deut. as a whole in the present Pentateuch. A peculiarity of form will be noticed: each blessing is introduced by the narrator separately, speaking in his own person. The exegesis is in many parts difficult, and the text sometimes corrupt (e.g. 2 b, 3, probably 21). The blessing on Joseph is evidently moulded on Gen. xlix. 25 sq.: the other blessings are original. Compared, as a whole, with the blessing of Jacob, it may be said to be pitched in a higher key: the tone is more buoyant: while the former in the main has in view the actual characteristics of the different tribes, the blessing of Moses contemplates them in their ideal glories, and views them both separately and collectively (vv. 26-29), as exercising theocratic functions, and enjoying theocratic privileges. The most salient features are the (apparent) isolation and depression of Judah, the honour and respect with which Levi is viewed, the strength and splendour of the double tribe of Joseph, and the burst of grateful enthusiasm with which (vv. 26-29) the poet celebrates the fortune of his nation, settled and secure, with the aid of its God, on the fertile soil of Palestine. Verse 4, if not also vv. 27 b, 28 (*drave out, said, dwell*), implies a date later than Moses; as regards the rest of the Blessing, opinions differ, and, in fact, conclusiva criteria fail us. The external evidence, supplied by the

title (v. 1), is slight: internal evidence, from the obscure nature of some of the allusions, is indecisive, and affords scope for diverging conclusions. Kleinert (pp. 169-175), urging v. 7 (Judah's isolation, in agreement with its non-mention in Deborah's song), assigns it to the period of the Judges. Graf,* understanding v. 7 differently, and remarking the allusion to the Temple in v. 12 and the terms in which the power of Joseph is described in v. 17, thinks of the prosperous age of Jeroboam II. (2 K. xiv. 25), which is accepted by Kuenen,⁴ Reuss,⁵ and others. Dillmann (p. 415 sq.), while interpreting vv. 7 and 12 similarly, considers that the terms in which Levi and Judah are spoken of are better satisfied by a date very shortly after the division of the kingdom (so Schrader, *Eint.* § 204); and adduces reasons for supposing it to be the work of a poet of the northern kingdom, which afterwards came to be attributed to Moses. Volck,⁷ partly on the questionable ground that such concrete traits as the Blessing exhibits are those of the Mosaic age, partly on the ground of its predominant ideal character, defends its Mosaic authorship; and Delitzsch⁸ agrees with him (both, however, excepting v. 4). The style of ch. xxxiii. is more archaic than that of ch. xxxii.

In ch. xxxiv., verses 1-7 (in the main) consist of J's account of Moses' death, slightly expanded by a later hand, and concluded by v. 10 (cp. Ex. xxxiii. 11); vv. 8, 9 (cp. Num. xxvii. 22 sq.) belong to P: vv. 11 sq. are a compilation of Deut. phrases, but probably not by D, on account of the indifferent style (לל); they are attached to v. 10 loosely as a supplement.

The structure of Deut. may be exhibited in a tabular form, as follows:—

{	P	JE	xxvii. 5-7a.	7 b-8, 9-10, 11-13 (14-26*).	xxviii., xxix. 1-xxxi. 13.	xxxii. 14-22.	23-30.
{	P	JE	xxxii. (1-43*), 44.	xxxiii. 48-52.	xxxiv. 1-7.	xxxiv. 8-9.	10.
{	D	JE	xxxii. 45-47.	(xxxiii.)*	xxxiv. 11-12.		

* Incorporated from independent sources.

§ 31. *Evidence of language on the date of Deut.*—i. Alleged archaisms. "Very incorrectly," writes Delitzsch,⁹ abandoning his previous position,¹ "have certain linguistic criteria been appealed to as evidence for the equal and high antiquity of the component parts of the Pentateuch." This verdict is indeed the only one authorized by the facts of philology. The only archaism in the Pentateuch which Delitzsch now admits is the use of לל as a feminine (Gen. xxiv. 14, 16, 28, 55, 57; xxxiv. 3, 12; and in the laws Deut. xxii. 15-29, thirteen times); the feminine לל occurring but once (xxii. 29). The following is a list of the other principal words or forms which have been cited by Keil,

by Delitzsch himself formerly, and others, as archaisms, with an indication of the grounds which compel their rejection.

(1.) The use of לל for both genders, which occurs 198 times in the Pentateuch (by the side of 11 times לל), of which 36 are in Deut. The fact that all Semitic languages have a feminine with god authorizes the inference that this must have formed part of the original Semitic stock, before the several sister dialects, Hebrew amongst them, acquired independent existence.² Whatever, then, be the explanation of the epicene לל, Hebrew in its earliest stage must have had a feminine לל. In all probability the peculiarity is not original. It is clear, from a comparison of the LXX., that in the older Heb. MSS. the plena scriptio was far from being in general use (see the writer's *Notes*

¹ *Der Segen Moos'* (1857), pp. 79-82.

² *Religion of Israel*, i. 378 sq.; *Hex.* p. 234.

³ *La Bible*, ii. p. 360 sq.

⁴ *Der Segen Moos'* (1873), p. 187 sq.

⁵ P. 508. But internal evidence connecting ch. xxxiii. with ch. xxxii. is slight; "Jeshurun," the figure xxxii. 13a, xxxiii. 29 b (both occurring elsewhere), and לל (only xxxii. 2a, xxxiii. 28 b), being the sole noteworthy

resemblances: the others, cited by Volck, p. 167, from Lagarde, are not characteristic. Keil, and those who agree with him, do not perceive the difficulty of v. 7.

⁶ *Genesis*, 1887, p. 27.

⁷ *Genesis*, 1872, p. 22 sq.; cp. this Dict., ii. 783.

⁸ So Nöldeke, the highest living authority on the Semitic languages, *Z. D. M. G.*, 1866, p. 458 sq.; 1876, p. 594; endorsed by Delitzsch, *Studien*, viii. p. 394.

is common to Deut. with Amos, Isaiah, Jeremiah; but who will presume to say, without assuming the question in dispute, in which writer each of these phrases is original? Other passages in both Amos and Hosea which have been cited as showing acquaintance with Deut. are too general in their terms to be conclusive. There may well have been a law against *Kedeshôth* in Israel prior to the 7th cent. B.C.: but Hos. iv. 14 is no proof of it, unless it be supposed that the moral enlightenment possessed independently by the Prophet was insufficient to teach him to condemn them. The only law to which Hosea may be held perhaps to allude in v. 10 is that on the landmark (xix. 14); but this does not show his acquaintance with the Book as we have it, for, as has been contended above, Deut. does not prescribe *new* laws, but reproduces *old* ones. Indeed, might there not well exist a popular feeling on the subject, adequate to explain Hosea's language, without the hypothesis of any law whatever? Nor does Is. i. betray acquaintance with the body of Deut.; the parallels advanced by Caspari² can surely satisfy no one. The part of Deut. which may be reasonably held to be alluded to by Isaiah, and perhaps by Hosea, is the *Song*: cp. Is. i. 2a with xxxii. 1; i. 2b, 4a ("sons") with xxxii. 5a, 19b, 20b; the thought of i. 2b with xxxii. 6, 15b; Hos. v. 14b, vi. 1, with xxxii. 39; viii. 14a (cp. xiii. 6) with v. 18; ix. 10 with v. 10; xi. 3 a (thought) with v. 11. But, as we have seen (§ 29), there are independent grounds for regarding the Song as prior to the body of Deut.³ In the prophets there are no allusions sufficient to establish an acquaintance with Deut. as a whole prior to Jeremiah.

In estimating the allusions in the historical books, we must first put aside those which may refer to the earlier laws embodied in Deut. (as 1 Sam. xxviii. 3, 1 K. xxi. 10),⁴ and those in which the reference to Deut. is not evident, as 1 K. xxii. 11, 2 K. vi. 30⁵ (surely the recollection of Deut. xxviii. 53 is not needed to explain the king's horror!). There remain the large number of cases (cp. § 38) in which the phraseology is modelled on that of Deut. These passages, however, do not appear generally to be part of the original sources incorporated in those Books, but to belong to the framework or additional matter due to the post-Deuteronomic redactor. It would, however, be out of place here to state the grounds which justify this opinion: and in so far as they have to be assumed,

the present discussion on Deut. must be admitted to be incomplete.

III. Style of Deuteronomy.

§ 34. The literary style of Deut. is very marked and individual. In vocabulary, indeed, it presents comparatively few exceptional words; but particular phrases and forms of expression, consisting sometimes of entire clauses, recur with extraordinary frequency, giving a *distinctive colouring* to every part of the work. While, however, the phraseology, in its predominant features, is strongly original, it appears in certain particulars to be based upon that of the narrative which we have termed JE, notably of the sections Ex. xiii. 3-16, xix. 3-8, parts of xx.-xxiii., xxiv. 10-26.⁶

1. **אֶהְיֶה לָּךְ**, to love, with God as object: vi. 5; vii. 9; x. 12; xli. 1, 13, 22; xlii. 3 [Heb. 4]; xix. 9; xxx. 6, 16, 20. [Josh. xxii. 5, xxiii. 11.] So Ex. xx. 6 (=Deut. v. 10).

Of God's love to His people: iv. 37; vii. 6, 13; x. 15; xxiii. 5 [Heb. 6]. Not so before. Otherwise first in Hosea iii. 1; ix. 15; xl. 1, cf. 4; xiv. 4 [Heb. 5].

2. **אֱלֹהִים אֲחֵרִים**, other gods: vi. 14; vii. 4; viii. 19; xi. 16, 28; xlii. 2, 6, 13 [Heb. 3, 7, 14]; xvii. 3; xviii. 20; xxviii. 14, 38, 64; xxx. 26 [Heb. 26]; xxx. 17; xxxi. 16, 20. [Josh. xxiii. 16; xxiv. 2, 16.] So Ex. xx.

3 (=Deut. v. 7); xlii. 13; cp. xxxiv. 14 [Heb. אֱלֹהִים אֲחֵרִים]. Always in Deut. (except v. 7; xviii. 20; xxxi. 16, 20) with to serve or go after. Often in Kings and Jeremiah, but (as Kleinert remarks) usually with other verbs.

3. **That your (thy) days may be long [or to prolong days]:** iv. 26, 40; v. 33 [Heb. 30]; vi. 2b; xi. 9; xvii. 20; xxi. 7; xxv. 15; xxx. 16; xxxii. 47. So Ex. xx. 12 (=Deut. v. 16). Elsewhere, only Is. lili. 10, Prov. xxviii. 16, Eccles. viii. 13; and, rather differently, Josh. xxi. 31=Judg. ii. 7†.

4. **The land (הָאָרֶץ) less frequently the ground, (הָאֲדָמָה) which Jehovah thy God is giving thee** (also we, you, them, I, 20, &c.): iv. 40, xv. 7, and constantly. So Ex. xx. 12 (=Deut. v. 16). **הָאֲדָמָה**.

5. **בֵּית עֲבָדִים**, house of bondage (lit. of slaves): vi. 12; vii. 8; vii. 14; xlii. 5, 10 [Heb. 6, 11]. [Josh. xxiv. 17.] So Judg. vi. 8; Mic. vi. 4; Jer. xxxiv. 13 From Ex. xlii. 3, 14, xx. 2 (=Deut. v. 6)†.

6. **In thy gates** (of the cities of Israel): xii. 12, 15, 17, 18, 21; xiv. 21, 27-29; xv. 7, 22; xvi. 5, 11, 14, 18; xvii. 2, 8; xviii. 5; xlii. 16 [Heb. 17]; xxiv. 14; xxvi. 12; xxviii. 52, 55, 57; xxxi. 12. So Ex. xx. 10 (=Deut. v. 14). Nowhere else in this application: but cf. 1 K. viii. 37 = 2 Ch. vi. 28.

7a. **עַם סֵנֶלָה**, a people of special possession: vii. 6; xiv. 2; xxvi. 18†. Cf. Ex. xix. 5 **סֵנֶלָה לִי** והֵייתִים.

7b. **עַם קֹדֶשׁ**, a holy people: vii. 6; x. 2, 21; xxvi. 19; xxviii. 9† Varied from Ex. xix. 5 **נֵי קֹדֶשׁ**, a holy nation.

8. **Which I command thee this day:** iv. 40; vi. 6; vii. 11, and repeatedly. So Ex. xxxiv. 11.

9. **Take heed to thyself (yourself) lest, &c.:** iv. 9, 23; vi. 12; viii. 11; xli. 16; xli. 13, 18, 30; xv. 9 (cp. xxiv. 8): cp. ii. 4; tv. 15. [Josh. xxiii. 11.] So Ex. xxxiv. 12; cp. xix. 12. (Also Ex. x. 26, Gen. xxiv. 6, xxxi. 24, cp. 29; but with no special force.)

10. **A mighty hand and a stretched out arm:** iv. 34;

† In the preparation of §§ 34-36, much help has been derived from the scholarly work of Kleinert, p. 217 sq.—To avoid repetition, and for the sake of the more complete synopsis, the occurrences in the Deuteronomic sections of Joshua have been noted here in brackets. The sign † denotes that all examples of the word or phrase quoted, occurring in the O. T., have been cited.

² *Beiträge zur Einl. in das Buch Jesaja* (1846), p. 204. Isaiah works out the figure of the sick person (l. 5 sq.) on lines entirely his own. The specific images in Deut. are all different: in xxviii. 35 b the phrase used is one in current use (2 Sam. xiv. 25; Job ii. 7), unlike that in Is. i. 6.

³ So the introduction in JE to the Song (§ 29) may be alluded to in Hos. iii. 1b; Mic. iii. 4, 11: cp. xxxi. 18b, 20b; 17a, 18a; 17b.

⁴ But Judg. ii. 2 sq., xiv. 3, 1 Sam. viii. 3, are sufficiently accounted for by Ex. xxxiv. 12, 13, 15 sq., xxiii. 8, and do not point necessarily (as has been supposed) to Deut. vii. 2, 3, xli. 3, xvi. 19. Indeed, the expostulation in Judg. xiv. 3 seems to be prompted by national feeling, rather than to depend upon an express prohibition.

⁵ *Pulpit Comm.* p. x. sq. (from Hengst. ii. pp. 131, 138).

v. 15; vii. 19; xi. 2; xxvi. 8. Hence Jer. xxxii. 21 (אֲדָרָה), cf. xxi. 5; 1 K. viii. 42; Esak. xx. 33, 34; Ps. cxxxvi. 12. The combination occurs first in Deut. *Mighty hand alone*: Deut. iii. 24; vi. 21; vii. 8; ix. 26; xxxiv. 12 (cp. Josh. iv. 24). So Ex. iii. 19; vi. 1; xiii. 9; xxxii. 11 (Num. xv. 20). Hence Dan. ix. 15; Neh. i. 10. *Stretched out arm alone*: Deut. ix. 29 (varied from Ex. xxxii. 11). So Ex. vi. 6 P. Hence Jer. xxvii. 8, xxxii. 17; 2 K. xvii. 38.†

Other coincidences with the same sections of Ex. appear to be instances of quotation or allusion (see § 6, note).*

§ 35. There are two or three points of contact between Deut. and Lev. xvii.-xxvi.:-

תוֹעֵבָה, *abomination* (to Jehovah), especially as the final ground of a prohibition: vii. 25 sq.; xii. 31; xiii. 14 (Heb. 15); xiv. 3; xvii. 1, 4; xviii. 12; xxi. 6; xxiii. 18 (Heb. 19); xxiv. 4; xxv. 16; xxvii. 15. Cp. Lev. xviii. 22 b, also 26, 27, 29, 30; xx. 13 (but only of sins of unchastity). Not so in Ex.

Thy brother, as used in xv. 3, 7, 9, 11, 12; xvii. 15 b; xxi. 1-4; xxiii. 19 sq. (Heb. 20 sq.); xxv. 3. Cp. Lev. xix. 17; xxv. 14, 25, 35 sq., 39, 47.

To rejoice before Jehovah (at a sacrificial meal): xii. 12, 18; xvi. 11; xxvii. 7 (cp. xli. 7; xiv. 26 b; xvi. 14; xxvi. 11). So only Lev. xxiii. 40 (of the Feast of Tabernacles); cp. Is. ix. 2.

With the rest of P, Deut. exhibits no phraseological connexion. In the few laws which are in part common, identical expressions occur (as ch. xiv. מִן, xxiv. 8, נִנְתָּ הַצֵּרֶעֶת); but these are of the nature of quotations, and do not constitute any real phraseological similarity between the two writings: they do not recur in Deut.

§ 36. Characteristic expressions either not occurring at all in Gen.-Num., or occurring only in the instances cited:-

1. **בָּכַל אוֹת נַפְשְׁתָּךְ**, *with all the desire of his (thy) soul*: xii. 15, 20, 21; xviii. 6.† Cp. 1 Sam. xxiii. 20 (ל).

2. **בָּחַר**, *to choose*: of Israel, iv. 37; vii. 6, 7; x. 15; xiv. 2;—the priests, xviii. 6; xxi. 5;—of the future king, xvii. 15;—and especially in the phrase "the place which Jehovah shall choose to place (or set) His Name there," xii. 5, 11, 14, 18, 21, 26; xiv. 23-26; xv. 20; xvi. 2, 6, 7, 11, 15, 16; xvii. 8, 10; xxvi. 2; or "the place which Jehovah shall choose," xviii. 6, xxxi. 11. [Josh. ix. 27.] Very characteristic of Deut.: not applied before to God's choice of Israel: often in Kings of Jerusalem (1 K. viii. 44; xi. 32, &c.); in Jeremiah once, xxxiii. 24, of Israel. Also charact. of II. Isaiah (xli. 8, 9; xliii. 10; xli. 1, 2: cp. chosen, xliii. 20, xiv. 4. Of the future, xiv. 1; xv. 8, 15, 22; and applied to Jehovah's ideal Servant, xlii. 1; xli. 7).

3. **מִיִּשְׂרָאֵל**, *and thou shalt extinguish the evil from thy midst (or from Israel)*: xiii. 6 (Heb. 6); xvii. 7, 12; xix. 18; xxi. 21; xxii. 21, 22, 24; xxiv. 7.† This phrase is peculiar to Deut.: but Judg. xx. 13 is similar. The verb **קָטַף** occurs also in xix. 13, xxi. 9, xxvi. 13, 14; 2 Sam. iv. 11; and in Kings.

4. *That the Lord thy God may (or Because He will) bless thee*: xiv. 24, 29; xv. 4, 10; xvi. 10, 15; xxiii. 20 (Heb. 21); xxiv. 19: cp. xli. 7; x. 6, 14.

5. *The stranger, the fatherless, and the widow*: x. 18; xxiv. 17, 18, 20, 21; xxvii. 18. Cp. Ex. xxi. 21 sq.

* They do not therefore, as Colenso thought (*Pent. vi. App.*, §§ 111, 118), show identity of authorship. The relation of Deut. to Ex. xxiii. 22-33 is the same as to Ex. xxiii. 1-21. Note also that יִרְאֵה בְּחֻקָּי, Ex. xiii. 3, 14, 16, and בְּעֵינֶיךָ, xiii. 8, are not Deuteronomical.

Hence Jer. vii. 6, xxii. 3; Esak. xxii. 7. Together with the *Levite*: xiv. 29; xvi. 11, 14; xxvi. 12, 13.

6. **דָּבַק**, *to cleave*, of devotion to God: x. 20; xi. 22; xiii. 4 (Heb. 5); xxx. 20: the corresponding adjective, iv. 4. [Josh. xxii. 5; xxiii. 8.] So 2 K. xvii. 6: with a different object, iii. 3; 1 K. xi. 2.†

7. *And remember that thou wast a bondman in the land of Egypt*: v. 15; xv. 15; xvi. 12; xxiv. 18, 22.†

8. **לֹא תַחֲזֵם עֵינֶךָ** (עֵלִי), *thine eye shall not spare (Aim)*: vii. 10; xiii. 6 (Heb. 9); xix. 13, 21; xxv. 12. Also Gen. xiv. 20; Is. xiii. 18; and frequently in Esak.

9. **חֹזֶק וְאִמָּץ**, *be strong and of a good courage*: xxxi. 5, 7, 23. [Josh. i. 6, 7, 9, 18; x. 25.] Cp. ch. iii. 28. The reader may think this phrase an ordinary one; but it occurs besides only in 1 Ch. xxii. 13, xxvii. 20; 2 Ch. xxxiii. 7.

10. **כִּי חָטָא**, *and it be sin in thee*: v. 8; xiii. 21 (Heb. 22); xxiv. 15; cp. xxi. 22;—with not, xxi. 22 (Heb. 23).

11. **הָאָרֶץ הַטּוֹבָה**, *the good land of Canaan*: i. 35; iii. 25; iv. 21, 22; vi. 18; viii. 10 (cp. 7); ix. 6; xi. 17. [Josh. xxiii. 16.] So 1 Ch. xxviii. 8.† Ch. i. 26 (Num. xiv. 7) and Ex. iii. 8 are rather different.

12. *Which (thou (ye)) knowest (or knowest) not*: vii. 3, 16; xi. 29; xiii. 2, 6, 13 (Heb. 3, 7, 14); xxvii. 33, 36, 64; xxxix. 28 (Heb. 25). Chiefly with reference to strange gods, or a foreign people. Cp. xxxii. 17.

13. *That it may be well with thee* (אֵשֶׁר לְמַעַן), **לְךָ וְלָאִשְׁתְּךָ**: iv. 40; v. 16, 29 (Heb. 28); vi. 3, 18; xii. 25, 28; xiii. 7. Similarly **וְעִמָּךְ לְךָ** (לְכַם): v. 33 (Heb. 30). xix. 13; and **לְמִוְכָר**, vi. 24, x. 13.

14. **הֵיטִיב**, *inf. abs. used adverbially = thoroughly*: ix. 21; xiii. 2, 6, 13 (Heb. 3, 7, 14); xxvii. 33, 36, 64; xxxix. 28 (Heb. 25). Chiefly with reference to strange gods, or a foreign people. Cp. xxxii. 17.

15. *To fear God* (יִירָאָה): often with *that they may learn reverence*: iv. 10; v. 29 (Heb. 28); vi. 24; vii. 8; x. 12; xiv. 23; xvii. 19; xxviii. 58; xxxi. 13, cp. 12.

16. **לֹא תוֹכַל** (יִוָּכַל), *in the sense of not to be allowed*: vii. 22; xii. 17; xvi. 8; xvii. 15; xxi. 16; xxii. 3, 19, 29; xxiv. 4. A very uncommon use; cp. Gen. xliiii. 32.

17. *To do that which is right* (הֵיטִיב) *in the eyes of Jehovah*: xii. 25; xiii. 18 (Heb. 19); xxi. 3: with הַיָּשָׁר, *that which is good, added*, vi. 18; xii. 28. So Ex. xv. 25; then Jer. xxxiv. 15; and several times in Kings and Chronicles.

18. *To do that which is evil* (הָרָעָה) *in the eyes of Jehovah*: iv. 25; ix. 18; xvii. 2; xxxi. 29. So Num. xxxiii. 13; often in the framework of Judges and Kings, Jeremiah, and occasionally elsewhere. Both 17 and 18 gained currency through Deut.; and are rare except in passages written under its influence.

19. *With all thy (your) heart and with all thy (your) soul*: iv. 29; vi. 5; x. 12; xi. 13; xiii. 3 (Heb. 4); xxvi. 16; xxx. 2, 6, 10. [Josh. xxii. 5; xxiii. 14.] A genuine expression of the spirit of the Book (§ 8). Only besides (in the third person), 1 K. ii. 4, viii. 48; 2 K. xxi. 3, 26; 2 Ch. xv. 12.

20. **נָתַן לְפָנַי**, *in the sense of delivering up to*: i. 8, 21; ii. 31, 33, 36; vii. 2, 23; xxi. 14 (Heb. 15); xxvii. 7 and 28 (with נָתַן); xxxi. 6. [Josh. x. 12; xi. 6.]

† In Gen. xxxii. 13 [Kell, § 28] the use is different, and normal. **נָתַן** (cited ib.) is used peculiarly in Deut. (iii. 24; v. 24 (Heb. 21); ix. 26; x. 2; x. 2; *Thy, His greatness*; cp. Ps. cl. 2), and differently from Num. xiv. 19. It is not cited in the text, being of minor importance.

* With *to see him* (לִרְאֵהוּ) added, as also often in Kings and Jeremiah.

Also Judg. xi. 9; 1 K. viii. 46; Is. xli. 2†^c The usual phrase in this sense is כִּי־נָתַן.

21. To turn (סָר) neither to the right hand nor to the left: il. 27 *lit.* (Num. has סָרָה): so 1 Sam. vi. 12. *Metaph.*: v. 32 [Heb. 29]; xviii. 11, 20; xxviii. 14. [Josh. i. 7; xxiii. 6.] So 2 Kings xxii. 2†.

22. כַּעֲשֵׂתָ יָדֶיךָ, the work of the hands (= enterprise): il. 7; xiv. 29; xvi. 18; xxiv. 19; xxviii. 12; xxx. 9: in a bad sense, xxxi. 29. In a neutral sense, not very common elsewhere, Hag. ii. 14, 17; Pa. xc. 17; Job i. 10: in a bad sense, Pa. xxviii. 4; 1 K. xvi. 7; 2 K. xxii. 17 *al.*

23. פְּדוּת, of the redemption from Egypt: vii. 8 (Mic. vi. 4); ix. 26; xlii. 6 [Heb. 6]; xv. 15; xxi. 8; xxiv. 18. Not so before: Ex. xv. 13 uses נָחַל (to reclaim).

24. Even to or unto this place: i. 31; ix. 7; xi. 6; xxvi. 9; xxix. 7 [Heb. 6].

25. בְּקֶרֶב, in different connexions, especially בְּקֶרֶב מִסְכָּרָב. A favourite word in Deut., though naturally occurring in JE, as also elsewhere. In P חֲוֹךְ is preferred.

26. Which thine eyes have seen: iv. 9; vii. 19; x. 21; xxix. 3 [Heb. 2]: cp. xxi. 7† (Prov. xxv. 7 differently.)

27. Thy (your) eyes are those that have seen: iii. 21; iv. 3; xi. 7†.

28. To eat and be satisfied: vi. 11; viii. 10, 12; xi. 15; xiv. 28; xxvi. 12; xxxi. 20.

29. The caution not to forget: iv. 9, 23; vi. 12; viii. 11, 14, 19; ix. 7; xxv. 19b; xxvi. 13b. Cp. xxxii. 18.

30. To make His name dwell there (לְשֹׁכֵן, לְשֹׁכֵן): xii. 11; xiv. 23; xvi. 2, 8, 11; xxvi. 2. Only besides Jer. vii. 12; Ezra vi. 12; Neh. i. 9†. With לְשֹׁכֵן (to set): xii. 8, 21; xiv. 24. This occurs also in Kings (together with לְהִיזֵן, לְהִיזֵן, which are not in Deut.): 1 K. ix. 3; xl. 36; xlv. 21; 2 K. xxi. 4, 7.

31. מִשְׁלָחַי יָד, that which thou puttest thy hand to: xii. 7, 18; xv. 10; xlii. 20 [Heb. 21]; xxviii. 8, 20†.

32. שִׁמַע יִשְׂרָאֵל, Hear, O Israel: v. 1; vi. 4; ix. 1; xx. 3; cp. xxvii. 9.

33. And . . . shall hear and fear (of the deterrent effect of punishment): xlii. 11 [Heb. 12]; xviii. 13; xix. 20; xxi. 21†.

34. To observe to do (לְעֲשׂוֹת) : v. 1, 32 [Heb. 29], vi. 3, &c. (sixteen times: also four times with an object intervening). [Josh. i. 7, 8; xxii. 6.] Also a few times in Kings and Chronicles.

35. To observe and do: iv. 6; vii. 12; xvi. 12; xlii. 23 [Heb. 24]; xlii. 8; xlv. 16; xxviii. 13; cp. xxix. 9 [Heb. 8]. [Josh. xxii. 8.]

36. The land whither ye go over (or enter in) to possess it: iv. 8, 14, and repeatedly. Hence Ezra ix. 11. לְרִשְׁתָּהּ, to possess it, also after which Jehovah is giving thee (§ 34): xli. 1; xix. 2, 14; xxi. 1. [Josh. i. 11b.] Cp. Gen. xv. 7. In P, with similar clauses, we have לְרִשְׁתָּהּ: Lev. xiv. 34, xxv. 45; Num. xxxii. 29; Deut. xxxii. 49.

These are the most striking expressions characteristic of Deut. It will be observed that, as a rule, they occur seldom or never elsewhere, or only in passages modelled upon the style of Deut. In addition to these, the attentive reader will notice other, recurring features, which combine, with those that have been cited, to give a unity of style to the whole work. The strong and impressive individuality of the author colours whatever he writes: and even a sentence, or part of a sentence, borrowed from

elsewhere, assumes, by the setting in which it is placed, a new character, and impresses the reader in a different light.^a It is plain that the original features in his style preponderate decidedly above those that are derived. It is true there is an element common to Deut. with the parenetic sections of JE, and hence the style of Deut. may be termed, in a certain sense, an extension or development of that of JE^b; but the development, it must be remembered, is a very considerable one. The question will be before us again, when the structure of JE, as a whole, is examined under the article PENTATEUCH.

The text of Deut., except in a few parts of ch. xxii. xxxiii., is remarkably pure.

§ 37. Some other more general features in the style of Deut. may here be noted. The author is fond of the reflexive dative (פָּנָה, פָּנָה, of asyndeta^c; of the emphatic termination הֵן in 3 pl. impf. (§ 31); of constructions with מִשָּׁה, מִשָּׁה, חֲרוּמָה, חֲרוּמָה, יָדָה. He prefers לָבָב (nearly fifty times) to לֵב (only iv. 11 *metaph.*; xxviii. 65; xxix. 4, 19 [Heb. 3, 18]. He uses always the longer and more emphatic form of the pronoun of the first pers. אֲנִי (of the two exceptions in the body of the work, xii. 30 after the verb is in accordance with usual custom,^d xxix. 6 [Heb. 5] is a stereotyped formula).^e His syntax is idiomatic, and remarkably free from irregularities and anomalies; his diction classical and pure. His power as an orator is shown in the long and stately periods with which his work abounds: at the same time the parenetic treatment which his subject often demands always maintains its freshness, and is never either monotonous or prolix. In his use of figures (i. 31, 44; viii. 5; xxviii. 29, 49, cp. 13, 44; xxix. 18b, 19b) he agrees with other writers of the more elevated prose style.^f His noble and impressive eloquence has stirred the heart of every reader.

§ 38. The influence of Deut. upon subsequent Books of the O. T. is very great. As it fixed for long the standard by which men and things were to be judged, so it provided the formulæ in which these judgments were expressed. Or, to speak more generally, it provided a religious terminology which readily lent itself to adoption, except on the part of writers possessing unusual independence (as Ezek. and II. Isaiah), upon whom it exerted only a partial influence. In

^a E.g. xvi. 3 (by the addition of *all the days of thy life*: cp. iv. 9, vi. 2, xvii. 18, 16; and especially in the retrospects, chs. i.-iii., ix.-x).

^b Delitzsch, *Studien*, x. p. 504; cp. *Genesis* (1887), p. 21.

^c Those with *all* may be given, on account of their bearing on the interpretation of xviii. 1a.—ii. 37b; iii. 4b; iv. 19; xv. 21; xvi. 21; xvii. 1; xx. 14; xlii. 19 [Heb. 20]; xlii. 20 [Heb. 19]. They regularly, it will be seen, denote the entire group, of which one or more representative items have been specified in the preceding words.

^d *Journal of Philology*, 1882, pp. 223, 226. The other cases are in the Song, xxxii. 21, 29; and xxxii. 49, 52 (P').

^e Ex. vii. 17, viii. 18, x. 2; 1 K. xx. 13, 26.

^f Cp. Ex. xxxiii. 11; Num. xii. 12, xlii. 4, xxvii. 17; Judg. vi. 6, vii. 12, xiv. 6, xv. 14, xvi. 9; 2 Sam. xiv. 17, 20, xvii. 8, 10, 11, 13, &c.

^c Ex. xxx. 36 and 1 K. xi. 6 (Kell) are not parallel.

the Historical Books entire sections of Joshua (e.g. i.; xxii. 1-6; xxiii.) are largely composed of Deuteronomic phrases: from the subsequent Books, these specimens—mostly comments, or other additions, made by the compiler—may be quoted: Judg. ii. 11-23, iii. 4-6; 1 K. ii. 3, 4, viii. 15-61, ix. 1-9, xi. 1-6, 31-39 (in parts), xiv. 8, 9; 2 K. xvii. 7-23, xviii. 6, xix. 15-19, &c. Differences, however, should be noted as well as resemblances: many of these passages, for instance, contain *new* phrases not met with in Deut.;* and it is interesting to trace what is on the whole an increasing accumulation of variations from the original Deuteronomic type, till in (e.g.) 2 K. xvii. it is mingled with phrases derived from the Book of Kings itself, Judges, Jeremiah, and Ezekiel. Among the Prophets, Jeremiah, as is well known, shows most prominently the influence of Deut.: it may be traced more subtly in II. Isaiab.

§ 39. However reluctant we may be to abandon the current view of the authorship of Deut., in face of the facts stated above (which do not appear to admit of a satisfactory explanation upon the basis of the current view) it is difficult to maintain it. The positive arguments upon which its defenders largely rely certainly appear to be insufficient. *Negatively*, their attack on the critical position derives its strength (1) from the moral argument that Deut., if it be not the work of Moses, is a "forgery;" (2) from the material argument that it contains provisions which, regarded as originating in the 8th cent. B.C., are nugatory and unintelligible. No doubt critics have not always been at sufficient pains to guard themselves against such objections. But the "author" of Deut., it must be recollected, is not the *speaker*, but the *writer* of i. 1-5, who uses, there and elsewhere, the third person (§ 21); and it cannot be shown that this writer is necessarily, or even presumably, Moses. And against the position, which, as we saw (§§ 23, 24), is consonant with the facts, that Deut. is the *prophetic reproduction of an earlier legislation*,* the second objection would seem to lose its *prima facie* cogency. In conclusion, attention is called to the fact that the real difficulties which Deut. presents are not theological, but critical and historical. Were they theological, the entire question might be relegated to a corner of the article MIRACLES: the discussion in the present article has been concerned throughout with arguments of a different character altogether. It is, however, to these arguments that we must look for an approximate solution (which is often all that we can hope to obtain) of the problems which the literary records of the Old Dispensation present to the inquirer.

* E.g., 1 K. ii. 4 to take heed to their way, and to walk before me in faithfulness; xl. 2 to incline the heart; xl. 4 a perfect heart; Judg. x. 7 sold (so only in the Song, xxxii. 30).

* This is also the opinion reached in 1880 by Prof. Delitzsch. In that year, as the result of a renewed study of the subject, he expressed the conviction that the immediate Mosaic authorship of Deut. (as upheld in his *Genesis*, ed. 4, 1872, pp. 19-28) is not tenable. He insists upon the literal truth of Deut. xxxi. 9, 24; but considers the statement to refer not to Deut., as we have it, but to its substance, the legal code on which it is based (cp. § 2, note). (*Studien*, x. p. 506; *Genesis*, ed. 5, 1887, pp. 23-25.)

§ 40. *Literature.*—(a.) Commentaries: Joh. Gerhard (Jena, 1657); F. W. Schultz, 1859 (the Mosaic authorship which the author here maintains he afterwards abandoned, no longer considering it to be demanded by xxxi. 9 [cf. § 38, note*]; see the Pref. to *Schöpfungsgesch. nach Naturwiss. u. Bibel*, 1865, pp. viii.-x.); Aug. Knobel, 1861 (in the *Kurzgef. Exeg. Handbuch*), ed. 2 (re-written) by Aug. Dillmann, 1886 (remarkably thorough and complete); F. W. J. Schroeder, 1866 (in Lange's *Bibelwerk*); C. F. Keil (2nd ed. 1870); T. E. Espin, 1871 (in the *Speker's Comm.*); W. L. Alexander, 1882 (in the *Pulpit Commentary*). DEVIL (Διδόλος; *Diabolus*; properly "one who sets at variance," διαβάλλει; cp. Plat. *Symp.* p. 222 C, D; and generally a "slanderer" or "false accuser").

The use of the name "devil" to render the Greek δαιμόνιον is an error in our A. V. which the R. V. has everywhere corrected.

The word is found in the plural number and adjectival sense of "slanderous" in 1 Tim. iii. 11, 2 Tim. iii. 3, and Tit. ii. 3. In all other cases it is used with the article as a descriptive name of Satan [SATAN], excepting that in John vi. 70 it is applied to Judas (as "Satan" to St. Peter in Matt. xvi. 23), because they—the one permanently, and the other for the moment—were doing Satan's work.

On the personality of the Evil One and the methods of his attacks on men generally, see SATAN. It is sufficient to note the significance of the name "devil" applied to him.

The name describes him as slandering God to man, and man to God.

The former work is, of course, a part of his great work of temptation to evil; and is not only exemplified but illustrated as to its general nature and tendency by the narrative of Gen. iii. We find there that its essential characteristic is the representation of God as an arbitrary and selfish Ruler, seeking His own good and not that of His creatures. The effect is to stir up the spirit of freedom in man to seek a fancied independence; and it is but a slight step further to impute falsehood or cruelty to Him. The success of the devil's slander is seen, not only in the Scriptural narrative of the Fall, but in the corruptions of most mythologies, and especially in the horrible notion of the divine φθόρος, which ran through so many (see e.g. Herod. i. 32, vii. 46). Possibly it may be traced in some

corruptions of the true idea of God in Christianity itself, and in the rebellion against Him, to which such corruptions have given cause. The same slander is implied rather than expressed in the temptation of our Lord, and overcome by the faith which trusts in God's love, even where its signs may be hidden from the eye (cp. the unmasking of a similar slander by St. Peter in Acts v. 4).

The other work, the slandering or accusing man before God, is, as it must necessarily be, unintelligible to us in its literal sense. The All-Seeing Judge can need no accuser, can regard no false accuser; and the All-Pure could, it might seem, have no intercourse with the Evil One. Like the vision of Micaiah (1 K. xxii. 19-22), it may be an accommodation to human ideas and experiences of a mysterious reality, which transcends both. But in truth the question touches on two mysteries, the reality of energy under the Infinite of the finite spirit, and the permission of the existence of evil under the government of Him Who is "the Good." As a part of these it must be viewed,—to the latter especially it belongs; and this latter, while it is the great mystery of all, is also one in which the fact is proved to us by incontrovertible evidence.

The fact of the devil's accusation of man to God is stated generally in Rev. xii. 10, where he is called "the accuser (κατήγορ) of our brethren, who accused them before our God day and night," and exemplified plainly in the case of Job. Its essence as before is the imputation of selfish motives (Job i. 9, 10), and its refutation is placed in the self-sacrifice of those "who loved not their own lives unto death." [A. B.]

DEW (טָּל; δρόσος; ros). This in the summer is so copious in Palestine that it supplies to some extent the absence of rain (Ecclus. xviii. 16, xliii. 22), and becomes important to the agriculturist; as a proof of this copiousness the well-known sign of Gideon (Judg. vi. 37, 39, 40) may be adduced. Thus it is coupled in the Divine blessing with rain, or mentioned as a prime source of fertility (Gen. xxvii. 28; Dent. xxxiii. 13; Zech. viii. 12), and its withdrawal is attributed to a curse (2 Sam. i. 21; 1 K. xvii. 1; Hag. i. 10). It becomes a leading object in prophetic imagery by reason of its penetrating moisture without the apparent effort of rain (Dent. xxxii. 2; Job xxix. 12; Ps. cxxxiii. 3; Prov. xix. 12; Is. xxi. 19; Hos. xiv. 5; Mic. v. 7); while its speedy evanescence typifies the transient goodness of the hypocrite (Hos. vi. 4, xiii. 3). It is mentioned as a token of exposure in the night (Cant. v. 2; Dan. iv. 15, 23, 25-33, v. 21). [H. H.]

DEW OF HERMON. [HERMON.]

DIADEM (דִּיאֶדֶם, or כִּסְיָהוּ; also צִפְיָרָה) is the word employed in the A. V. as the translation of the above Hebrew terms. They occur in poetical passages, in which neither the Hebrew nor the English words appear to be need with any special force. כִּסְיָהוּ is strictly used for the "mitre" of the high-priest. [MITRE.]

What the "diadem" of the Jews was we do not know. That of other nations of antiquity was a fillet of silk, two inches broad, bound round the

¹ The references are to the original pagination, repeated on the margin of the English translation.

² [The preceding article exhibits the views of modern critics respecting the date and authorship of Deuteronomy. The article ΠΕΝΤΑΤΕΥΧ (Dict. of the Bible, 1st ed.) states the arguments in favour of the Mosaic origin of the Book. Differing, to some extent, from the Writers of both articles, we think it is clear from xxxd. 24-26 that Moses must have written the substance of the Book in the first instance; but we do not see any objection to admitting, if the evidence seems to point that way, that a posthumous edition, embodying later Temple usages, may have been put forth subsequently by authority. Just as geographical glosses appear to have been added. Even if the post-Mosaic authorship be admitted, the inspiration and canonical value of the Book remain unimpaired, as the Writer of the preceding article has been careful to point out (see §§ 21, 22, 39).—EDITORS.]

head and tied behind, the invention of which is attributed to Liber (Dionysus; Plin. *H. N.* vii. 56, 57). Its colour was generally white (Tac. *Ann.* vi. 37; Sil. Ital. xvi. 241); sometimes, however, it was of blue, like that of Darius, *cerulea fascia albo distincta* (Q. Curt. iii. 3, vi. 20; Xen. *Cyr.* viii. 3, § 13); and it was inwoven with pearls or other gems (Gibbon, i. 392; Zech. ix. 16), and enriched with gold

DiaDEM on head of Dionysus.
(Coin of Naxos in Sicily.
British Museum.)

(Rev. ix. 7). It was peculiarly the mark of Oriental sovereigns (1 Macc. xiii. 32, τὸ δαδῆμα τῆς Ἀσίας), and hence the deep offence caused by the attempt of Caesar to substitute it for the laurel crown appropriated to Roman emperors (*sedebat . . . coronatus; . . . diadema ostendit*, Cic. *Phil.* ii. 34): when some one crowned his statue with a laurel-wreath, *candidate fasciæ praeligatam*, the tribunes instantly ordered the fillet or diadem to be removed, and the man to be thrown into prison (Suet. *Cues.* 79). Caligula's attempt to introduce it was considered an act of insanity (Suet. *Cal.* 22). Heliogabalus only wore it in private. Antony assumed it in Egypt (Flor. iv. 11), but Diocletian (or, according to Aurel. Victor, Aurelian) first assumed it as a badge of the empire. Representations of it may be seen on the coins of any of the later emperors (Tillemont, *Hist. Imp.* iii. 531). Isidore (*Orig.* xix. 31) defines *diadema* thus: "Ornamentum capitis matronarum, ex auro et gemmis contextum, quod in se circumactis extremitatibus retro astringitur."

A crown was used by the kings of Israel, even in battle (2 Sam. i. 10; similarly it is represented on coins of Theodosius and other emperors as encircling the helmet); but in all probability this was not the state crown (2 Sam. xii. 30), although the same word is used in describing the coronation of Joash (2 K. xi. 12). Kitto supposes that the state crown may have been in the possession of Athaliah; but perhaps we ought not to lay any great stress on the word חֲטָט in this place, especially as it is very likely that the state crown was kept in the Temple.

In Esth. i. 11, ii. 17, we have חֲטָט (κίταρις, κίταρις) for the turban (στολή θυσιανή, vi. 8) worn by the Persian king, queen, or other eminent persons to whom it was conceded as a special favour (viii. 15, δαδῆμα θυσιανὴν πορφύρεον). The diadem of the king differed from that of others in having an erect triangular peak (κυρβάσια, Aristoph. *Av.* 487; ἦν οἱ βασιλεῖς μόνον ὀρθὴν ἐφόρουσαν παρὰ Πέρσαι, οἱ δὲ στρατηγὸν κεκλιμένην, Suid. s. v. τιάρα, and Hesych.). The חֲטָט of Dan. iii. 21 used to be considered a turban (as in LXX., where, however, Drusus and others invert the words καὶ τιάρας καὶ περικημίδας), A. V. "hat," but the rendering "tunic" (R. V.) is now generally preferred. Some render it by *tibiale* or *calceamentum*. Schleusner suggests that κράβυλλος may be derived from it. The tiara generally had pendent flaps falling on the shoulders (see

Paschalius, *de Corona*, p. 573; Brissonius, *de Regn. Pers.*, &c.; Layard, ii. 320; Scacchius, *Myrothec.* iii. 38; Fabricius, *Bibl. Ant.* xiv. 13).

The words כְּרוֹנִים in Ezek. xxiii. 15, "exceeding in dyed attire" (R. V. marg. Or, with dyed turbans), mean long and flowing turbans of gorgeous colours (LXX. τὰράβαττα, where a better reading is τάραι βαττα), though

Obverse of Tetradrachm of
Tigranes, king of Syria.

Fried. Delitzsch prefers for כְּרוֹנִים the sense of a many-folded rather than vari-coloured fillet. [CROWN.] [F. W. F.]

DIAL (מַעְלוֹת; ἀναβαθμοί; horologium). The word is the same as that rendered "steps" is A. V. (Ex. xx. 26; 1 K. x. 19), and "degrees" in A. V. (2 K. xx. 9, 10, 11; Is. xxxviii. 8), where, to give a consistent rendering, we should read with the margin the "degrees" rather than the "dial" of Ahaz. In the absence of any materials for determining the shape and structure of the solar instrument, which certainly appears intended, the best course is to follow the most strictly natural meaning of the words, and to consider with Cyril of Alexandria and Jerome (*Comm. on Is.* xxxviii. 8: see Delitzsch⁴ in loco),

that the מַעְלוֹת were really stairs, and that the shadow (perhaps of some column or obelisk on the top; cp. the picture in *TSBA.* iii. 36) fell on a greater or smaller number of them according as the sun was low or high. The terrace of a palace might easily be thus ornamented. Ahaz's tastes seem to have led him in pursuit of foreign curiosities (2 K. xvi. 10), and his intimacy with Tiglath-pileser gave him probably an opportunity of procuring from Assyria the pattern of some such structure; and this might readily lead the "princes of Babylon" (2 Ch. xxxii. 31) to "inquire of the wonder," viz. the alteration of the shadow, in the reign of Hezekiah. Herodotus (ii. 109) mentions that the Egyptians received from the Babylonians the πόλος and the γνώμων, and the division of the day into twelve hours. Of such division, however, the O. T. contains no undoubted trace; nor does any word, proved to be equivalent to the "hour," occur in the course of it, although it is possible that Ps. cii. 11 and cix. 23 may contain allusion to the progress of a shadow as measuring diurnal time. In John xi. 9 the day is spoken of as consisting of twelve hours. As regards the physical character of the sign of the retrogression of the shadow in Is. xxxviii. 8, it seems useless to attempt to analyse it; no doubt an alteration in the inclination of the gnomon, or column, &c., might easily effect such an apparent retrogression; but the whole idea, which is that of Divine interference with the course of nature in behalf of the king, resists such an attempt to bring it within the compass of mechanism.

It has been suggested that the חֲטָט of Is. xlvii. 8, xxvii. 9; Ezek. vi. 4, 6, rendered in the

margin of the A. V. "sun-images," were gnomons to measure time, but there seems no adequate ground for this theory. [H. H.]

DIAMOND (דָּמָד; *iaspis*; *jaspis*), a precious stone, the third in the second row on the breast-plate of the high-priest (Ex. xxviii. 18 [R. V. marg. Or, *sardonyx*], xxxix. 11), and mentioned by Ezekiel (xxviii. 13) among the precious stones of the king of Tyre. Gesenius has noticed the difficulty of identifying the terms used in the Versions for each of the Hebrew names of precious stones in the above passages, the translators or transcribers having apparently altered the order in which they stand. *iaspis* seems to be the word in the LXX. corresponding to דָּמָד, but most ancient commentators

give *δρυς*, *δρύχιον*, *cnychinus*. Our translation, "diamond," is derived from Ibn Ezra, and is defended by Braun (*de Vest. Sacerd.* ii. 13). Kalisch (on Ex. p. 536) says, "perhaps emerald."

The etymology (from דָּמָד, to strike or crush) leads us to suppose a hard stone. The emerald, which is of a green colour, of various depths, is nearly as hard as the topaz, and stands next to the ruby in value. The same authority doubts whether the art of engraving on the diamond was known to the ancients, since they did not even understand how to cut the ruby. Modern commentators prefer onyx (see Knobel-Dillmann on Ex. xxviii. 18).

Respecting דָּמָד, which is translated "diamond" in Jer. xvii. 1, see ADAMANT. [W. D.]

DIANA. This Latin word, properly denoting a Roman divinity, is the representative of the Greek *Artemis* (*Ἄρτεμις*), the tutelary goddess of the Ephesians, who plays so important a part in the narrative of Acts xix. The Ephesian *Artemis* was, however, invested with very different attributes, and made the object of a different worship, from the ordinary *Artemis* of the Greeks, and is rather perhaps to be regarded as a personification of Nature and to be generally identified with the divinity who, under various names, such as *Cybele* or *Ma* or *Anaitis*, was worshipped in Phrygia, Lydia, Cappadocia, and even as far as Armenia and Bactria (E. Curtius, *Alterthum und Gegenwart*, ii. 100). K. O. Müller says (*Hist. of the Dorians*, i. 403, Eng. trans.), "Everything that is related of this deity is singular and foreign to the Greeks."

Guhl, indeed (*Ephesiaca*, pp. 78-86), takes the contrary view, and endeavours in almost all points to identify her with the true Greek goddess. And in some respects there was doubtless a fusion of the two. On the other hand, the statement that the temple of Diana at Ephesus was formerly washed by the sea (Plin. ii. 87, § 201), points to her worship having probably been introduced by Phœnician mariners (E. Curtius, ii. 101). Coreanus, the hill S.W. of the city, is connected by Stephans Byzantinus with κόρη. It was also fancied that, when the temple was burnt on the night of Alexander's birth, the calamity occurred because the goddess was absent in the character of *Lucina* (Plut. *Alex.* 3). Again, on coins of Ephesus we sometimes find her exhibited as a huntress and with a stag. But the true Ephesian *Artemis* is represented in a form entirely alien from Greek art. St. Jerome's

words are (*Praefat. ad Ephes.*), "Scribebat Paulus ad Ephesios Dianam colentes, non hanc venatricem, quae arcum tenet et euuincta est, sed istam *multimammiam*, quam Graeci *πολύμastos* vocant, ut scilicet ad ipsa effigie mentirentur omnium eam bestiarum et viventium esse nutricem." Guhl indeed supposes this mode of representation to have reference simply to the fountains over which the goddess presided, conceiving the multiplication of breasts to be similar to the multiplication of eyes in Argus or of heads in Typhoons. But the correct view is undoubtedly that which treats this peculiar form as a symbol of the productive and nutritive powers of nature. This is the form under which the Ephesian *Artemis*, so called for distinction, was always represented, wherever worshipped; and the worship extended to many places, such as Samos, Mitylene, Perga, Hiersopolis, and Gortyna, to mention those only which occur in the N. T. or in the Apocrypha. The coin below will

Greek imperial copper coin commemorating a reconciliation (*Ὀμόνοια*) between Ephesus and Smyrna; Domitia (A.D. 73-83), with name of procurator, *Coreanus* *Pastus*.

Obv.: ΔΟΜΙΤΙΑ ΓΕΒΑΘΘΗ. Bust to right. Rev.: ΑΝΘΥ ΚΑΙΣΕΝ ΠΑΙΤΟΥ ΟΜΟΝΟΙΑ ΕΦΕ ΖΜΥΡ. Ephesian Diana. There is a similar coin of Antoninus Pius, *Mionnet*, *Jonck*, Nos. 289, 1291.

give some notion of the image, which was grotesque and archaic in character. The head wore a mural crown, each hand rested on a prop (sometimes supposed to be a falling ribbon), and the lower part ended in a rude block covered with figures of animals and mystic inscriptions. This idol was regarded as an object of peculiar sanctity, and was believed to have fallen down from heaven (τοῦ Διοσκουρίου, Acts xix. 35). The image worshipped in the temple was made either of the wood of the vine or of ebony, gold and ivory; and it is said to have survived all the seven restorations of the temple (Plin. xvi. 79, § 213). A representation of it was stamped on amulets of terracotta inscribed with γράμματα ἑφεία and used as charms. Such an amulet, probably of the 2nd century B.C., may be seen in the museum at Syracuse, copied in Stephani's *Mélanges gréco-romains*, 1, taf. 1; Daremberg and Saglio's *Dict. des Ant.* s. v. *amulettes*; and in Schreiber's *Bilderatlas*, I. xii. 2.

The Oriental character of the goddess is shown by the nature of her hierarchy, which consisted of a number of vestals (*Μέλισσαι*), under a eunuch-priest (*Μεγάβυλος*). There was also a college of priests called Ἑσσηνές. These terms have probably some connexion with the fact that the bee was sacred to *Artemis* (Aristoph. *Ran.* 1273). In the period between B.C. 295 and 288 "the bee which had for so many ages maintained its place on the obverse of the coinage of Ephesus as the signet of the high-priest (or King Bee, ἑσσην) gives way," for the first time, "to a purely Hellenic type, the head of the Greek huntress-goddess whose bow and quiver occupies

the whole field of the reverse; the bee being relegated to the copper coins, and as the silver to an inferior position, as a mere symbol or mint-mark" (Head's *Coins of Ephesus*, 1880, p. 41; *ib.* p. 8; and cp. Weniger, *Zur Symbolik der Biene in der antiken Mythologie*, quoted by E. Curtius, *op. cit.* ii. 102). But even before B.C. 480 the fore part of a stag, suggestive of the goddess of the hunt, appears on the coins (*ib.* p. 15). It was the duty of the priestesses to deck the idol with robes and ribbons, *κόσμημα τῆς Ἀρτέμιδος* (*Corp. Insc. Gr.* 3001-3; *Inscr. British Museum*, iii. No. 481, l. 369, p. 134, ed. Hicks; the epitaph of a *κοσμητρίνη*, *ib.* No. 655. Cp. esp. *ib.* pp. 83-87).

For the temple considered as a work of art we must refer to the article EPHEBUS. No arms were allowed to be worn in its precincts. No bloody sacrifices were offered. Here also, as in the temple of Apollo at Daphne, were the privileges of asylum. This is indicated on some of the coins of Ephesus (Akerman, in *Trans. of the Numismatic Soc.* 1841); and we find an interesting proof of the continuance of these privileges in imperial times in Tac. *Ann.* iii. 61 (Strab. xiv. 641; Paus. vii. 2, §§ 7, 8; Cic. *Verr.* ii. i. 33, § 85; *Inscr. Brit. Mus.* iii. p. 177 ff.). The temple had a large revenue from endowments of various kinds. It was also the public treasury of the city, and was regarded as the safest bank for private individuals.

The cry of the mob (Acts xix. 28), "Great is Diana of the Ephesians!" and the strong expression in v. 27, "whom all Asia and the world worshippeth," may be abundantly illustrated from a variety of sources. The term *μεγάλη* was evidently a title of honour recognised as belonging to the Ephesian goddess. We find it in inscriptions (as in Boeckh, *Corp. Insc. Gr.* 2963 c, *ib.* 6797, Ἐφέσου ἡμετέρα, and *Inscr. Brit. Mus.* iii. No. 481, l. 220, p. 131, ἡ μεγάλη θεὰ Ἀρτέμις), and in Xenophon's *Ephesiaca*, i. 11. (For the Ephesian Xenophon, see *Dict. of Bioj. and Mythol.*) As to the enthusiasm with which "all ASIA" regarded this worship, independently of the fact that Ephesus was the capital of the province, we may refer to such passages as the following: "communitur a civitatibus Asiae factum," Liv. i. 45; "tota Asia extruente," Plin. xvi. 79, § 213; "factum a tota Asia," *ib.* xxxvi. 21, § 95. As to the notoriety of the worship of the Ephesian Diana throughout "the world," the evidence of inscriptions and coins shows that it existed at Mitylene, Cyzicus, Claros, Clazomenae, in Samos, Chios, Crete, and elsewhere (Guhl, l. c. 104). Her chief festival in spring was called the *Artemisia* (see Roscher's *Lex. der Mythologie*, i. 591, and Hicks in *Inscr. Brit. Mus.* iii. p. 79).

Lastly, Pausanias tells us (iv. 31, § 8) that the Ephesian Artemis was more honoured privately than any other deity, which accounts for the large manufacture and wide-spread sale of the "silver shrines" mentioned by St. Luke (Acts xix. 24), and not by him only. In this connexion Dionysius Hal. *Ant. Rom.* ii. 22, τὰ τῆς Ἐφεσίας Ἀρτέμιδος ἀφιδρώματα, is quoted in Conybeare and Howson's *St. Paul*, ch. xvi., ii. 89, ed. 1865; but Mr. E. L. Hicks, in an article on "Demetrius the Silversmith," in the *Expositor*, June 1890, No. 6, treating of the light thrown on the narrative in the Acts by the inscriptions from Ephesus in the British Museum, holds that there is no evidence

for supposing that these "silver shrines" were sold to pilgrims. They may, nevertheless, be regarded as silver counterparts of the extant terracotta and marble shrines which were used as votive offerings to Artemis (E. Curtius, in *Athenische Mittheilungen*, ii. 49, and Prof. W. M. Ramsay in the *Expositor* for July 1890, p. 9). This specific worship was publicly adopted also, as we have seen, in various and distant places: nor ought we to omit the games celebrated at Ephesus in connexion with it, or the treaties made with other cities on this half-religious, half-political basis.

[J. S. H.] [J. E. S.]

DIBLA'IM (דִּבְלַיִם, of uncertain etymology; A. Δεβλαϊμ; *Deblaim*), probably the father (Manger, Gesen., Hengst., Maurer) of Hosea's wife Gomer (Hos. i. 3). [W.]

DIB'LATH (accurately Diblath [R. V.],

דִּבְלָה, the word in the text being דִּבְלָתָה = "toward Diblath;" Δεβλαθ; *Deblatha*), a place named only in Ezek. vi. 14, as if situated at one of the extremities of the land of Israel: "I will . . . make the land desolate . . . from the wilderness (*Midbar*) toward Diblath." The word *Midbar* being frequently used for the nomad country on the south and south-east of Palestine, it is natural to infer that Diblath was in the north. To this position Beth-diblathaim or Almon-diblathaim in Moab, on the east of the Dead Sea, are obviously unsuitable; and indeed a place which like Diblathaim was on the extreme east border of Moab, and never included even in the allotments of Reuben or Gad, could hardly be chosen as a landmark of the boundary of Israel. The only name in the north at all like it is RIBLAH, and the letters D (ד) and R (ר) are so much alike and so frequently interchanged, owing to the carelessness of copyists, that there is a strong probability that Riblah is the right reading. The conjecture is due to Jerome (*Comm.* in loc.), but it has been endorsed by Michaelis, Gesenius, and most modern scholars (*Ges. Thea.* p. 312; see Davidson, *Heb. Text*, Ezek. vi. 14). Riblah, though an old town, is not heard of till shortly before the date of Ezekiel's prophecy, when it started into a terrible prominence from its being the scene of the cruelties inflicted on the last king of Judah, and of the massacres of the priests and chief men of Jerusalem perpetrated there by order of the king of Babylon. [G.] [W.]

DIBLATHAIM. [ALMON-DIBLATHAIM; BETH-DIBLATHAIM.]

DIB'ON (דִּבְיֹן; *Dibon*), a town on the east side of Jordan, in the rich pastoral country, which was taken possession of and rebuilt by the children of Gad (Num. xxxii. 3, 34 [B. Δαβών, F. in v. 34 Δεβών]). From this circumstance it possibly received the name of DIBON-GAD. Its first mention is in the ancient fragment of poetry Num. xxi. 30 [B. Δε-

* See DRUKI, DIMNAH, &c. It is in the LXX. Version that the corruption of D into R is frequently to be observed. A case in point is Riblah itself, which in the LXX. is more often Δεβλαθ than Ρεβλαθ.

בִּבְנֵי, and from this it appears to have belonged originally to the Moabites. The tribes of Reuben and Gad being both engaged in pastoral pursuits, are not likely to have observed the division of towns originally made with the same strictness as the more settled people on the west, and accordingly we find Dibon counted to Reuben in the lists of Joshua (xiii. 9 [B. *Δαϊβάν*, B. *Ma-*, A (B sup ras A. *Μαϊδαβάν*], 17 [BA. *Δαϊβάν*]). In the time of Isaiah and Jeremiah, however, it was again in possession of Moab (Is. xv. 2 [T. *Δηβάν*, AN. *Δαϊβηδάν*]; Jer. xlviii. 18, 22 [T. *N.* (bis) *Δαϊβάν*, N. (bis) *Δεβάν*], cp. v. 24). In the same denunciations of Isaiah (v. 9) it appears, probably, under the name of DIMON, M and B being convertible in Hebrew, and the change admitting of a play characteristic of Hebrew poetry. The two names were both in existence in the time of Jerome (*Comm. on Is. xv.*, quoted by Reland, p. 735). The last passages appear to indicate that Dibon was on an elevated situation; not only is it expressly said to be a "high place" (Is. xv. 2), but its inhabitants are bid to "come down" from their glory or their stronghold. It was the chief sanctuary of Chemosh (Jerome, *Comm. on Is. xv.*). Under the name of Debon it is mentioned by Eusebius and Jerome in the *Onomasticon* (OS. pp. 148, 8; 257, 42). It was then a very large village (*κώμη πρυμνογένης*) beyond the Arnon. In modern times the name *Dhibān* has been discovered by Seetzen, Irby and Mangles (p. 142), and Burckhardt (*Syr.* p. 372), as attached to extensive ruins on the Roman road, about three miles north of the Arnon (*Wady Mojib*). See also Dillmann² on Num. xxi. 30). All agree in describing these ruins as lying low; but, looked at from the east, they are on high ground, and being situated on two hills, the first that rise from the east, the cry "come down" would be exceedingly applicable. The ruins cover the tops and sides of two adjacent knolls, and are surrounded by a wall (Tristram, *Land of Moab*, pp. 132-7). It was at *Dhibān* that Mr. Klein discovered, in 1868, the celebrated Moabite stone, with an inscription of Mesa, king of Moab, who was apparently himself a Dibonite (see *Records of the Past*, N.S. ii. 194, &c.).

2. One of the towns which were re-inhabited by the men of Judah after the return from Captivity (Neh. xi. 25, N. *Δεβάν*, B. omits; *Dibon*). From its mention with Jekabzeel, Moladah, and other towns of the south, there can be no doubt that it is identical with DIMONAH. [G.] [W.]

DIBON-GAD (דִּבְנֵי גָד; *Δαϊβάν Γάδ*; *Dibon-gad*), one of the halting-places of the Israelites. It was in Moab between IJE-ABARIM and ALMON-DIBLATHAIM (Num. xxxiii. 45, 46). It was no doubt the same place which is generally called DIBON (cp. Dillmann² in loco); but whether it received the name of Gad from the tribe, or originally possessed it, cannot be ascertained. [G.] [W.]

DIBRI (דִּבְרִי; B. *Δαβρι*, AF. -*pl*; *Dibri*), a Danite, father of Shelomith, a woman who had married an Egyptian and whose son was stoned for having "blasphemed the Name" [i.e. of Jehovah] (Lev. xxiv. 11). [G.]

DIDRACHMON (διδραχμον; *didrachma*). [MONEY; SHEKEL.]

DID'YMUS (Δίδυμος), that is, *the Twin*, a surname of the Apostle Thomas (John xi. 16, xx. 24, xxi. 2). [THOMAS.] [G.]

DIK'LAH (דִּקְלָה). The form דִּקְלָה occurs on the Teimā Inscriptions [MV.¹¹]; *Δεκλά*; *Decla*; Gen. x. 27; 1 Ch. i. 21 [A. *Δεκλάμ*, B. om.], a son of Joktan, whose settlements, in common with those of the other sons of Joktan, must be looked for in Arabia. The name in Aramaic signifies "a palm-tree," and the cognate word

in Arabic (دَقْلَة), "an inferior kind of date-palm:" hence it is thought that Diklah is a part of Arabia containing many palm-trees. The city *Φοινίκων*, in the north-west of Arabia Felix, has been suggested as preserving the Joktanite name (Boch. *Phaleg*, ii. 22); but Bochart, and after him Gesenius, refer the descendants of Diklah to the Minaei, a people of Arabia Felix inhabiting a palmiferous country. Whether we follow Bochart and most others in placing the Minaei on the east borders of the *Hijaz*, southwards towards the *Yemen*, or follow Fresnel in his identification of the *Wady Dodān* with the territory of this people, the connexion of the latter with Diklah is uncertain and unsatisfactory. No trace of Diklah is known to exist in Arabic works, except the mention of a place

called *Dakalah* دَقْلَة = דִּקְלָה in *El-Yemāneh* (*Kāmoos*, s. v.), with many palm-trees (*Marasid*,

s. v.). "Nakhleh" نَخْلَة also signifies a palm-tree, and is the name of many places, especially *Nakhleh el-Yemāneeyeh*, and *Nakhleh esh-Shāmeeyeh* (here meaning the Southern and Northern Nakhleh), two well-known towns situated near each other. According to some, the former was a seat of the worship of El-Lāt, and a settlement of the tribe of Thakeef; and in a tradition of Mohammad, this tribe was not of unmixed Ishmaelite blood, but one of four which he thus excepts:—"All the Arabs are [descended] from Ishmael, except four tribes: Sulaf [Shaleph], Hadramāwt [Hazarmaveth], El-Arwāh [?], and Thakeef" (*Mir-āt ez-Zemān*, bis).

Therefore, 1. Diklah may probably be recovered in the place called *Dakalah* above mentioned; or, possibly, 2. in one of the places named Nakhleh.

A discussion of the vexed and intricate question of the Minaei is beyond the limits of this article; but as they are regarded by some authorities of high repute as representing Diklah, it is important to record an identification of their true position. They who have written on the subject have argued on the vague and contradictory statements of the Greek geographers, from the fact that no native mention of so important a people as the Minaei had been discovered (cp. Bochart, *Phaleg*; Fresnel's *Lettres*, *Journal Asiatique*; Jomard, *Essai*, in Mengin's *Hist. de l'Égypte*, vol. iii.; Cassini, *Essai*, &c.). There is, however, a city and people in the Yemen which

appear to correspond in every respect to the position and name of the Minaei. The latter is written *Μειναίοι*, *Μινάιοι*, and *Μινναίοι*, which may be fairly rendered "people of *Meiv*, of *Miv*, and of *Minn*;" while the first exhibits the sound of a diphthong, or an attempt at a diphthong. The Greek account places them, generally, between the Sabaeans (identified with Seba, or Ma-rib: see ARABIA) and the Erythraean Sea. It is therefore remarkable that where it should be sought we find a city with a fortress, called

Ma'een or *Ma'in*, *معين* (*Kámoos*, *Marásid*,

s. v.), well known, and therefore not carefully described in the Arabic geographical dictionaries, but apparently near *San'a*; and further that in the same province are situated the town

of *Mo'eyn* (*معين*, abbr. dim. of the former), whence the *Benec-Mo'eyn*; and the town of *Ma'eenah* (fem. of *Ma'een*). The gent. n. would be *Ma'eenec*, &c. The township in which are the latter two places is named *Sinhán* (cp. Niebuhr, *Descr.* p. 201), which was one of the confederation formed by the ancient tribe of

Jenh, *جنب* (*Marásid*, s. v.), grandson of Kahlán, who was brother of Himyer the Joktanite. This identification is reconcilable with all that is known of the Minaei. See further in art. *UZAL*. [E. S. P.]

DIL'EAN (*דילעאן*; B. *Δαλδλ*, A. *Δαλαδ*; *Delean*; R. V. *Dilan*), one of the cities of Judah, in the *Shefelah* or low country (Josh. xv. 38). If Gesenius's interpretation, "gourd" or "cucumber," be correct, the name is very suitable for a place situated in that rich district. It is not elsewhere mentioned, nor has it yet been identified. [G.] [W.]

DILL, Matt. xxiii. 23; A.V. and R.V. marg. [ANISE.]

DIM'NAH (*דימנא*; B. omits, or has another name, *Σαλλά*, A. *Δαμνδ*; *Damna*), a city in the tribe of Zebulun, given to the Merarite Levites (Josh. xxi. 35). The name does not occur in the list of cities belonging to the tribe (Josh. xix. 10-16); but the name *RIMMON* is given (v. 13). This name also occurs in the list of Levitical cities in 1 Ch. vi. 77 [Heb. v. 62], more accurately *Rimmono* or *-nah* (*רמון* or *רנ*), which may possibly be a variation of *Dimnah*, *ר* being often changed into *ל*. In this case *Rimmon* is probably the real name (Bertheau, *Chronik*, pp. 72-3; Movers, *Chronik*, p. 72. Cp. Dillmann on Josh. xxi. 35). This may perhaps be *Rumnáneh*, N. of Nazareth. [G.] [W.]

DIMON, THE WATERS OF (*דִּימוֹן*); *τὸ ὕδωρ τὸ Δεμόν, Δαμών*, T. *Ν. Δεμόων*, AR²² *Πεμόων*; *Dibon*), some streams on the east of the Dead Sea, in the land of Moab, against which Isaiah is here uttering denunciations (Is. xv. 9). From *Dibon* being named in v. 2, as well as in the lists of Moabite towns in Jer. xlviii., and no place named *Dimon* being elsewhere mentioned as belonging to Moab, Gesenius (*Comment. über Isa.* p. 534), followed by most modern commentators, conjectures that the two

names are the same, the form "*Dimon*" being used for the sake of the play between it and the word *Dam* (*דָּם*), "blood." [DIBON, I.] It may, however, be *Dimnah*, S. of the Arnon (Tristram, *Bible Places*, p. 355). [G.] [W.]

DIMO'NAH (*דימונא*; B. *Πεμνδ*, A. *Δαμνδ*; *Dimona*), a city in the south of Judah, the part bordering on the desert of Idumaea (Josh. xv. 22). *Dimonah* is mentioned in the *Onomasticon* (OS² pp. 149, 32; 258, 63), but was evidently not known to Eusebius and Jerome, nor has it been identified in later times. It probably occurs under the altered name of *DIBON* in Neh. xi. 25. Knobel-Dillmann² in loco thinks *Dimonah* = *Dibon* may be *ed-Diab*, a heap of ruins at the head of a *wady* of the same name, 5 miles N. of Tell 'Arâd. Keil (*Book of Joshua*, p. 159) regards this conjecture as possibly correct. See also Tristram, *Bible Places*, p. 16. [G.] [W.]

DIN'NAH (*דיננא*), *judged* or *avenged*, from the same root as *DAN*; *Δελνα*; *Dina*), the daughter of Jacob by Leah (Gen. xxx. 21). She accompanied her father from Mesopotamia to Canaan, and, having ventured among the inhabitants to take part in a feast (Josephus), was violated by Shechem the son of Hamor, the chieftain of the territory in which her father had settled (Gen. xxxiv.). Her age at this time, judging by the subsequent notice of Joseph's age (Gen. xxxvii. 2), may have been from 13 to 15, the ordinary period of marriage in Eastern countries (Lane's *Mod. Egypt.* i. 208). Shechem proposed to make the usual reparation by paying a sum to the father and marrying her (Gen. xxxiv. 12); such reparation would have been deemed sufficient under the Mosaic law (Deut. xxi. 23, 29) among the members of the Hebrew nation. But in this case the suitor was an alien, and the crown of the offence consisted in its having been committed by an alien against the favoured people of God; he had "wrought folly in Israel" (xxxiv. 7). The proposals of Hamor, who acted as his deputy, were framed on the recognition of the hitherto complete separation of the two peoples; he proposed the fusion of the two by the establishment of the rights of intermarriage and commerce; just as among the Romans the *jus connubii* and the *jus commercii* constituted the essence of *civitas*. The sons of Jacob, bent upon revenge, availed themselves of the eagerness, which Shechem showed to effect their purpose; they demanded, as a condition of the proposed union, the circumcision of the Shechemites: the practice could not have been unknown to the Hivites, for the Phœnicians (Her. ii. 104) and probably most of the Canaanite tribes were circumcised. They therefore assented; and on the third day, when the pain and fever resulting from the operation were at the highest [CIRCUMCISION], Simeon and Levi, own brothers to Dinah, as Josephus observes (*Ant.* i. 21, § 1; *δημοκρίτοι δέλεον*), attacked them unexpectedly, slew all the males and plundered their city. Jacob's remark (v. 30) does not imply any guiltiness on the part of his sons in this transaction; for the brothers were regarded as the proper guardians of their sister's honour, as is still the case among the Bedouins; but he dreaded the

revenge of the neighbouring peoples, and even of the family of Hamor, some of whom appear to have survived the massacre (Judg. ix. 28). His escape, which was wonderful, considering the extreme rigour with which the laws of blood-revenge have in all ages prevailed in the East [BLOOD-REVENGE], is ascribed to the special interference of Jehovah (xxxv. 5). Josephus omits all reference to the treachery of the sons of Jacob, and explains the easy capture of the city as occurring during the celebration of a feast (*Ant.* i. 21, § 2). The object for which this narrative is introduced into the Book of Genesis probably is, partly to explain the allusion in Gen. xlix. 5-7, and partly to exhibit the consequences of any association on the part of the Hebrews with the heathens about them. Ewald (*Geschichte*, i. 488) assumes that the historical foundation of the narrative was furnished by an actual fusion of the nomad Israelites with the aborigines of Shechem, on the ground that the daughters of the patriarchs are generally noticed with an ethnological view; the form in which the narrative appears being merely the colouring of a late author: such a view appears to us perfectly inconsistent with the letter and the spirit of the text. Wellhausen (*Die Composition des Hexateuchs*, u.s.w. p. 47, &c.) discovers the hands of two narrators in the section, and counts the chapter questionable. [W. L. B.] [F.]

DINAITES (דִּנַּיִתִּים; Διναῖτες; *Dinaei*, Ezra iv. 9), the name of some of the Cuthnean colonists who were placed in the cities of Samaria by the Assyrian governor, after the conquest and captivity of the ten tribes under Shalmaneser. They remained under the dominion of Persia, and united with their fellow-colonists in opposition to the Jews; but nothing more is known of them. Junius (*Comm.* in loc.), without any authority, identifies them with the people known to geographers by the name *Dennani*. The name has been compared with the name of a land and race, Dai-a-i-ni, mentioned in the inscriptions of Tiglath-pileser I. (Schrader, *Keil. Bibliothek*, i. 30), but this would be a part of Western Armenia, and not likely to be alluded to in this passage of Ezra. Fried. Delitzsch (Pref. p. x. to Baer's ed. of *Daniel, Ezra, and Nehemiah*) compares the name with *Din-Sarru*, i.e. (the city of) King Din, near Susa. [W. A. W.] [F.]

DINHA'BAH (דִּנְהָבָה; Διναβά; *Denuba*; Gen. xxvi. 32; 1 Ch. i. 43), the capital city, and probably the birthplace, of Bela, son of Beor, king of Edom. The place is not identified. Eusebius (*OS.* s. n. Διναβά, p. 247, 35) mentions a village Danna (Dannaba, Jerome, *OS.* p. 148, 31), 8 miles from Areopolis, or Ar of Moab (on the road to Arnon: Jerome), and another on Mount Peor, 7 miles from Eabus (Heshbon); but neither of these has claim to be the Dinhabah of Scripture. R. Joseph, in his Targum (on 1 Ch. i. 43, ed. Wilkins), finds a significance in the name. After identifying Balaam the son of Beor with Laban the Syrian, he adds, "And the name of his capital city was Dinhabah, for it was given (אֵין־הַבַּחֲמַיִם) him as a present." With as little probability Gesenius conjectured that it might signify *dominus*, i.e.

locus direptionis, i.e. *praedonum latibulum*. The name is not uncommon among Semitic races. Ptolemy (v. 15, § 24) mentions Διναβὰ in Palmyrene Syria, afterwards a Bishop's see; and according to Zosimus (iii. 27) there was a Διναβὴ in Babylonia (Knobel in Dillmann, *Genesis*, in loco). The Peshitto Syriac has

ܕܝܢܐܒܐ, *Daihab*, probably a mistake for ܕܝܢܐܘܒܐ. [W. A. W.] [F.]

DINNER. [MEALS.]

DIONYSIA (Διονύσια; *Bacchanalia*), "the feast of Bacchus," which was celebrated, especially in later times, with wild extravagance and licentious enthusiasm. Women, as well as men, joined in the processions (*θίασοι*), acting the part of Maenads, crowned with ivy and bearing the thyrsus (cp. Ovid, *Fast.* iii. 767 sq.; Broudkh. *ad Tō.* iii. 6, 2, who gives a coin of *Maronia*, bearing a head of Dionysus crowned with ivy); and the phallus was a principal object in the train (Herod. ii. 48, 49. See *Dict. of Gk. and Rom. Antig.* s. v.). Shortly before the persecution of Antiochus Epiphanes, 168 B.C., in which the Jews "were compelled to go in procession to Bacchus carrying ivy" (2 Macc. vi. 7), the secret celebration of the Bacchanalia in Italy had been revealed to the Roman senate (B.C. 186). The whole state was alarmed by the description of the excesses with which the festival was attended (Liv. xxxix. 8 sq.), and a decree was passed forbidding its observance in Rome or Italy. This fact offers the best commentary on the conduct of Antiochus; for it is evident that rites which were felt to be incompatible with the comparative simplicity of early Roman worship must have been peculiarly revolting to Jews of the Hasmonæan age (cp. Herod. iv. 79, *Σκῦβαι τοῦ Βακχεύου περὶ Ἑλλήσιν ὀνειδίζουσι*). As the greatest of the Dionysiac festivals (Διονύσια ἐν δαστεί or μεγάλα) was celebrated in the spring in the month of Elaphebolion (March-April), it nearly synchronised with the Jewish Passover. Antiochus therefore probably hoped, by the introduction of the great Hellenic festival at Jerusalem, to supplant the most sacred of the national Feasts in the affections of the people, and to substitute in lieu thereof the most licentious, seductive, and extravagant rites that received the sanction of Hellenic religion. [B. F. W.] [R.]

DIONYSIUS (Διονύσιος; *Dionysius*), an Athenian converted by St. Paul (Acts xvii. 34). He was a person of some distinction, being a member of the Council of Areopagus [AREOPAGUS]. He is said to have been the first Bishop of Athens, and the evidence is stronger than is usually the case regarding early episcopates. Eusebius (*H. E.* iv. 23) says that another Dionysius, Bishop of Corinth, stated in his epistle to the Athenians that Dionysius the Areopagite was the first to be entrusted with the episcopate at Athens (πρῶτος τῆς ἐν Ἀθήναις παροικίας τὴν ἐπισκοπὴν ἐγκεικλήσαστο). Rufinus, the translator of Eusebius, gratuitously adds that he was appointed by St. Paul himself. The strength of the evidence lies in its early date, Dionysius of Corinth writing apparently about A.D. 170. Lightfoot (*Philippians*,² p. 214), however, doubts

its cogency. The martyrdom of Dionysius is described in early martyrologies on the authority of the apology of Aristides the Athenian, but it contains no mention of Dionysius. See Aristides in *Texts and Studies*, vol. i. p. 18. Writings are extant bearing the name of Dionysius the Areopagite. They are first mentioned and appealed to in the Monophysite controversies of the 6th century. They were held in honour in the Church till the Reformation period, since which time their authenticity has been gradually but completely discredited. The date of their authorship is still a matter of dispute. See *Dict. of Christ. Antiq.*; and Bp. Westcott, *Religious Thought in the West*, pp. 147-155. [E. R. B.]

DIONYSUS (Διόνυσος, Διώνυσος, of uncertain derivation), also called ΒΑΚΧΟΣ (Βάκχος, "laexos, the noisy god: after the time of Herodotus), was properly the god of wine. In Homer he appears simply as the "frenzied" god (*Il.* vi. 132), and yet "a joy to mortals" (*Il.* xiv. 325); but in later times the most varied attributes were centred in him as the source of the luxuriant fertility of nature, and the god of civilization, gladness, and inspiration. The eastern wanderings of Dionysus are well known (Strab. xv. 7, p. 687; *Dict. Biogr.* a. v.), but they do not seem to have left any special trace in Palestine (yet cp. *Luc. de Syria Dea*, p. 886, ed. Bened.). His worship, however, was greatly modified by the incorporation of Eastern elements, and assumed the twofold form of wild orgies [DIONYSIA] and mystic rites. To the Jew Dionysus would necessarily appear as the embodiment of Paganism in its most material shape, sanctioning the most tumultuous passions and the worst excesses. Thus Tacitus (*Hist.* v. 5) rejects the tradition that the Jews worshipped Bacchus (*Liberum patrem*; cp. Plut. *Quaest. Conv.* iv. 6), on the ground of the "entire diversity of their principles" (*nequam congruentibus institutis*), though he interprets this difference to their discredit. The consciousness of the fundamental opposition of the God of Israel and Dionysus possibly explains the punishment which Ptolemaeus Philopator inflicted on the Jews (3 Macc. ii. 29), "branding them with the ivy-leaf of Dionysus." But the more probable explanation of this occurrence is that of Grimm (see note in loc.), who points out that Dionysus was the family god of the Ptolemies as Apollo was of the Seleucids; and traces of the cult of Dionysus as the form of Hellenic worship most attractive to Orientals are found in many parts of Syria and Palestine. The representation of Dionysus upon the coins of Caesarea, Damascus, Scythopolis, and cities of the Hamran, testify to the wide popularity of his worship during the Roman period (cp. Schürer, *Gesch. d. Jüd. Volkes*,² ii. 15-20). Nicanor's threat which he is said to have made, to erect a temple of Dionysus at Jerusalem (2 Macc. xiv. 33), has on this account a special significance. For while the Dionysiac worship would be most abhorrent to the pious Jew, to the Hellenizing Jew and to the resident Greeks it apparently presented especial fascinations. At a later time, when Jerusalem became a Roman colony with the name of Aelia Capitolina, dedicated to Jupiter, it appears from extant coins that Dionysus was among the other

deities to whose charge the city was committed (cp. Schürer, i. 586). [B. F. W.] [R.]

DIOSCORINTHIUS. [MONTHS.]

DIOTREPES (Διοτρέφης; *Diotrepes*). An ambitious member of an unnamed Church, whose conduct is condemned by St. John in his letter to Gaius (3 John, vv. 9, 10). He had even been able to withstand the authority of a letter from St. John himself, and had "prated against him with wicked words." While Gaius had been ready to receive with hospitality brethren from distant Churches, Diotrepes had repelled them, and had prevented others from receiving them by the threat or act of excommunication. These "brethren and strangers" (v. 5) were probably travelling evangelists. [E. R. B.]

DISCIPLE. [EDUCATION; SCHOOLS.]

DISCOVER (*dis* a negative prefix), a word frequently used in the A. V. in the sense of "uncover," by which word the R. V. replaces it in Deut. xxii. 30, but not in Micah i. 6. In 2 Sam. xxii. 6 the R. V. has "laid bare," in Ps. xxix. 9 "strippeth bare." [F.]

DISCUS (δίσκος), one of the exercises in the Grecian gymnasias, which Jason the high-priest introduced among the Jews in the time of Antiochus Epiphanes, and which he induced even the priests to practise (2 Macc. iv. 14). The discus was a circular plate of stone or metal, made for throwing to a distance as an exercise of strength and dexterity. It was in-

Discobolus. (Osterley, *Denk. der alt. Kunst*, vol. I. Pl. III.)

deed one of the principal gymnastic exercises of the Greeks, and was practised in the heroic age. For details and authorities, see *Dict. of Gr. and Rom. Antiq.* s. v. [W. S.]

DISEASES. [MEDICINE.]

- DISH.** 1. כֶּסֶל, Gesen. p. 965: see **BASK**.
2. צֶלֶחַ, in plur. only צֶלֶחֹת, צֶלֶחֹת, צֶלֶחֹת; δέρεα, δ ἀλάστρος, λίβες; see **lebes**. 3. קָטָר; see **CHARGER**.

In N. T. *τροβαλον*, Matt. xxvi. 23, Mark xiv. 20. In ancient Egypt, and also in Judaea, guests at the table handled their food with the fingers, but spoons were used for soup or other liquid food, when required (Wilkinson, *Anc. Eg.* i. 183-4 [smaller ed., 1878]). The same is the case in modern Egypt. Each person breaks off a small piece of bread, dips it in the dish, and then conveys it to his mouth, together with a small portion of the meat or other contents of the dish. To pick out a delicate morsel and hand it to a friend is esteemed a compliment, and to refuse such an offering is contrary to good manners. Judas dipping his hand in the same dish with our Lord was showing especial friendliness and intimacy. *τροβαλον* is used in LXX. for *πῦρ*, sometimes in A. V. "charger" (Ex. xxv. 29 [R. V. "spoons"]; Num. iv. 7 [R. V. "spoons"], vii. 13, 19). This is also rendered *κότυλα* or half sextarius, i.e. probably a cup or flask rather than a dish. *τροβαλον* is in Vulg., Matt. xxvi. 23, *paropsis*; in Mark xiv. 20, *calinus*. Cp. Schlensner, *Lex. in N. T.* *τροβαλον* (Lane, *Mod. Eg.* i. 193; Chardin, *Foy. iv.* 53, 54; Niebuhr, *Descr. de l'Arab.* p. 46). [BASIN.] [H. W. P.]

DISHAN (דִּישָׁן; *Disan*), the youngest son of Seir the Horite (Gen. xxxvi. 21 [A. 'Πεισών, DE. 'Πισών], 28, 30 [bis] [A. 'Πεισών, E. 'Ρησών]; 1 Ch. i. 38 [A. 'Πισών, B. om.], 42 [BA. Δαισών]). [W. L. B.] [F.]

DISHON (דִּישֹׁן [the name may mean a *gazelle* (cp. Dent. xiv. 5), from a root signifying to *spring*. There are cognate words in Aramaic, Syriac, and Assyrian (see MV.¹¹); *Dison*). 1. The fifth son of Seir (Gen. xxxvi. 21, 26, 30 [A. Δησών]; 1 Ch. i. 38 [BA. Δησών]). 2. The son of Anah and grandson of Seir (Gen. xxxvi. 25; 1 Ch. i. 41 [BA. Δαισών]). Dishon and Dishan are among the names in the list of the descendants of Seir the Horite which are derived from animals (cp. a similar nomenclature among the Red Indians). This is only natural amongst those whose forefathers were Troglydites (cp. Delitzsch [1887] on Gen. xxxvi. 20-28; Dillmann, *do. v.* 29 sq.), but does not warrant the assumption that their worship was animal worship (cp. Jacobs, *Archaeological Review*, iii. 150 sq.). The geographical position of the tribes descended from these patriarchs is uncertain. Knobel (cp. Dillmann⁴ in loco) places them to E. and S.E. of the *Gulf of Akaba*, on the ground that the names of the sons of Dishon, *Eshban*, and *Hemdan* may be identified with *Ushbany* and *Humeidy*, branches of the tribe of *Omran*. Such identifications must be received with caution (Delitzsch), as similar names are found in other parts of Arabia—*Hamde*, for instance, near *Tayf*, and again *Hamdan*, which bears a still closer resemblance to the original name, near *Sana* (Burckhardt's *Arabia*, i. 156, i. 376). [W. L. B.] [F.]

DISPERSION, THE JEWS OF THE, or simply THE DISPERSION, was the general title applied to those Jews who remained settled in foreign countries after the return from the Babylonian exile, and during the period of the second Temple. The original word applied to these foreign settlers (תְּפִלָּה; cp. Jer. xxiv. 5,

xxviii. 4, &c., from תִּפְּלָה, to strip naked; so יִפְּלָה נְהִיבָה, Extra vi. 16) conveys the notion of spoliation and bereavement, as of men removed from the Temple and home of their fathers; but in the LXX. the ideas of a "sojourning" (*μετοικεσία*) and of a "colony" (*ἀποικία*) were combined with that of a "captivity" (*αἰχμαλωσία*), while the term "dispersion" (*διασπορά*, first in Deut. xxviii. 25, תִּפְּלָה; cp. Jer. xxiv. 17), which finally prevailed, seemed to imply that the people thus scattered "to the utmost parts of heaven" (Deut. xxx. 4), "in bondage among the Gentiles" (2 Macc. i. 27), and shut out from the full privileges of the chosen race (John vii. 35), should yet be as the seed sown for a future harvest (cp. Is. xlix. 6, Hebr.) in the strange lands where they found a temporary resting-place (1 Pet. i. 1, *παρεπιδημοὺς διασποράς*). The schism which had divided the first kingdom was forgotten in the results of the general calamity. The dispersion was not limited to the exiles of Judah, but included "the twelve tribes" (Jas. i. 1, *ταῖς δώδεκα φυλαῖς ταῖς ἐν τῇ διασπορᾷ*), which expressed the completeness of the whole Jewish nation (Acts xxvi. 7, *τὸ δωδεκάφυλον*).

The Dispersion, as a distinct element influencing the entire character of the Jews, dates from the Babylonian exile. Uncertain legends point to earlier settlements in Arabia, Ethiopia, and Abyssinia; but even if these settlements were made, they were isolated and casual, while the Dispersion, of which Babylon was the acknowledged centre, was the outward proof that a faith had succeeded to a *kingdom*. Apart from the necessary influence which Jewish communities bound by common laws, ennobled by the possession of the same truths, and animated by kindred hopes, must have exercised on the nations among whom they were scattered, the difficulties which set aside the literal observance of the Mosaic ritual led to a wider view of the scope of the Law, and a stronger sense of its spiritual significance. Outwardly and inwardly, by its effects both on the Gentiles and on the people of Israel, the Dispersion appears to have been the clearest providential preparation for the spread of Christianity.

But while the fact of a recognised Dispersion must have weakened the local and ceremonial influences which were essential to the first training of the people of God, the Dispersion was still bound together in itself and to its mother country by religious ties. The Temple was the acknowledged centre of Judaism, and the faithful Jew everywhere contributed the half-shekel towards its maintenance (*τὸ δίδραχμον*, Matt. xvii. 24; cp. Mishna, *Shekalim*, 7, 4; Jos. *Ant.* xvi. 6); and, in part at least, the ecclesiastical calendar was fixed at Jerusalem, whence beacon-fires spread abroad the true date of the new moons (Mishna, *Rosh-Hashana*, 2, 4). The tribute was indeed the simplest and most striking outward proof of the religious unity of the nation. Treasuries were established to receive the payments of different districts (Jos. *Ant.* xviii. 9, § 1; cp. *Ant.* xvi. 6, §§ 5, 6), and the collected sums were forwarded to Jerusalem, as in later times the Mahometan offerings were sent to Mecca (Jost, *Gesch. d. Judenth.* i. 337 n.; Cic. *pro Flacco*, xxviii.).

At the beginning of the Christian era the Dispersion was divided into three great sections, the Babylonian, the Syrian, and the Egyptian. Precedence was yielded to the first. The jealousy which had originally existed between the poor who returned to Palestine and their wealthier countrymen at Babylon had passed away, and Gamaliel wrote "to the sons of the Dispersion in Babylonia, and to our brethren in Media . . . and to all the Dispersion of Israel" (Frankel, *Monatsschrift*, 1853, p. 413). From Babylon the Jews spread throughout Persia, Media, and Parthia; but the settlements in China belong to a modern date (Frankel, *l. c.* p. 463). The few details of their history which have been preserved bear witness to their prosperity and influence (Jos. *Ant.* xi. 5, § 2, xv. 2, § 2 sq., xviii. 9; *Bell. Jud.* vi. 8, § 2). No schools of learning are noticed, but Hillel the Elder and Nahum the Mede are mentioned as coming from Babylon to Jerusalem (Frankel).

The Greek conquests in Asia extended the limits of the Dispersion. Seleucus Nicator transplanted large bodies of Jewish colonists from Babylonia to the capitals of his western provinces. His policy was followed by his successor Antiochus the Great; and the persecutions of Antiochus Epiphanes only served to push forward the Jewish emigration to the remoter districts of his empire. In Armenia the Jews arrived at the greatest dignities, and Nisibis became a new centre of colonization (Frankel, pp. 454-6). The Jews of Cappadocia (1 Pet. i. 1) are casually mentioned in the Mishna; and a prince and princess of Adiabene adopted the Jewish faith only thirty years before the destruction of the Temple (Jos. *Ant.* xx. 2). Large settlements of Jews were established in Cyprus, in the islands of the Aegean (Cos, Delos: Jos. *Ant.* xiv. 10), and on the western coast of Asia Minor (Ephesus, Miletus, Pergamus, Halicarnassus, Sardis: Jos. *Ant.* l. c.). The Romans confirmed to them the privileges which they had obtained from the Syrian kings; and though they were exposed to sudden outbursts of popular violence (Jos. *Ant.* xviii. 9; *Bell. Jud.* vii. 3), the Jews of the Syrian provinces gradually formed a closer connexion with their new homes, and together with the Greek language adopted in many respects Greek ideas. [HELLENISTS.]

This Hellenizing tendency, however, found its most free development at Alexandria [ALEXANDRIA]. The Jewish settlements established there by Alexander and Ptolemy I. became the source of the African Dispersion, which spread over the north coast of Africa, and perhaps inland to Abyssinia (the *Falasha*). At Cyrene (Jos. *Ant.* xiv. 7, 2; JASON) and Berenice (Tripoli) the Jewish inhabitants formed a considerable portion of the population, and an inscription lately discovered at the latter place (Frankel, p. 442) speaks of the justice and clemency which they received from a Roman governor (cp. Jos. *Ant.* xvi. 6, 5). The African Dispersion, like all other Jews, preserved their veneration for the "holy city" (Philo, *Leg. ad Caium*, § 36; c. *Flacc.* c. 7), and recognised the universal claims of the Temple by the annual tribute (Jos. *l. c.*). But the distinction in language led to wider differences, which were averted in Babylon by the currency of an Aramaic dialect. The Scriptures were no longer read on

the Sabbath (Frankel, p. 420; *Vorstudien*, p. 52, sq.), and no fire-signals conveyed the dates of the new moons to Egypt (cp. Frankel, p. 419 n.). Still the national spirit of the African Jews was not destroyed. After the destruction of the Temple the Zealots found a reception in Cyrene (Joseph. *B. J.* vii. 11); and towards the close of the reign of Trajan, A.D. 115, the Jewish population in Africa rose with terrible ferocity (Dio Cass. lxxviii. 32). The insurrection was put down by a war of extermination (Euseb. *H. E.* iv. 2); and the remnant who escaped established themselves on the opposite coast of Europe, as the beginning of a new Dispersion.

The Jewish settlements in Rome were consequent upon the occupation of Jerusalem by Pompey, B.C. 63. The captives and emigrants whom he brought with him were located in the trans-Tiberine quarter, and by degrees rose in station and importance (Philo, *Leg. ad Caium*, § 23 sq.). They were favoured by Augustus and Tiberius after the fall of Sejanus (Philo, *l. c.*); and a Jewish school was founded at Rome (Frankel, p. 459). In the reign of Claudius [CLAUDIUS] the Jews became objects of suspicion from their immense numbers (Dio Cass. lx. 6); and the internal disputes consequent, perhaps, upon the preaching of Christianity, led to their banishment from the city (Suet. *Claud.* 25: "Judeos impulsore Chresto assidue tumultuantes Roma expulit." Cp. Acts xviii. 2). This expulsion, if general, can only have been temporary, for a few years the Jews at Rome were numerous (Acts xxviii. 17 sq.), and continued to be sufficiently conspicuous to attract the attention of the satirists (Mart. *Ep.* xi. 94; Juv. *Sat.* iii. 14). [See Hindekoper, *Judaism at Rome*, N. Y. 1876; Schürer, *Die Gemeindeverfassung der Juden in Rom in der Kaiserzeit*, 1879; Hudson, *History of the Jews in Rome*, 1884; Morrison, *The Jews under Roman Rule*, 1890.]

The influence of the Dispersion on the rapid promulgation of Christianity can scarcely be overrated. The course of the apostolic preaching followed in a regular progress the line of Jewish settlements. The mixed assembly from which the first converts were gathered on the day of Pentecost represented each division of the Dispersion (Acts ii. 9-11; (a) Parthians . . . Mesopotamia; (b) Judaea (i.e. Syria) . . . Pamphylia; (c) Egypt . . . Greece; (d) Romans . . .) and these converts naturally prepared the way for the Apostles in the interval which preceded the beginning of the separate apostolic missions. The names of the seven Deacons are all Greek and one is specially described as a proselyte (Acts vi. 5). The Church at Antioch, by which St. Paul was entrusted with his great work among the heathen (Acts xiii. 1), included Barnabas of Cyprus (Acts iv. 36), Lucius of Cyrene, and Simeon, surnamed *Niger*; and among his "fellow-labourers" at a later time are found Aquila of Pontus (Acts xviii. 2), Apollos of Alexandria (Acts xviii. 24; cp. 1 Cor. iii. 6), Urbanus (Rom. xvi. 9), and Clement (Phil. iv. 3), whose names at least are Roman. Antioch itself became a centre of the Christian Church (Acts xiii. 1, xiv. 26, xv. 22, xviii. 22), as it had been of the Jewish Dispersion; and throughout the apostolic journeys the Jews were the class to whom "it was necessary (*ἀναγκαῖον*) that the word of God should be first spoken."

(Acts xiii. 46), and they in turn were united with the mass of the population by the intermediate body of "the devout" (οἱ σεβόμενοι), which had recognised in various degrees "the faith of the God of Israel."

The most important original authorities on the Dispersion are Joseph. *Ant.* xiv. 10, xiv. 7; c. *Apion.* ii. 5;—Philo, *Leg. ad Caium*; id. c. *Flaccum*. Frankel has collected the various points together in an exhaustive essay in his *Monatschrift.* Nov. Dec. 1853, pp. 409–11, 449–51. A valuable contribution to our knowledge of this subject is presented in § 31, *Das Judenthum in der Zerstreuung* in Schürer's *Geschichte d. Jüd. Volkes*,¹ Bd. ii., where exhaustive use is made of the available literary materials. Cp. Jost, *Gesch. d. Judenth.* 336, 344; Ewald, *Hist. of Isr.* (Eog. Tr.) vol. v. sec. ii. A; Herzfeld, *Gesch. d. Volkes Isr.* iii. 425–479; Grätz, *Gesch. d. Jüden*, iii. 26–54; Hausrath, *Ntliche Zeitsch.*² iii. 383–392; Edersheim, *Life and Times of Jesus the Messiah*, i. chs. i. ii. DISTAFF (Prov. xxxi. 19). [SPINNING.]

DIVES. [LAZARUS.]

DIVINATION (ΔΙΩΡΙΣΜΟΣ; μαντεία, Ezek. xiii. 7; μαντεία, Wisd. xvii. 7; ΔΙΩΡΙΣΜΟΣ, φαρμακία, veneficium, divinatio, Is. xlvii. 9; שִׁחֲזָה, ψευδισμός, &c.). This art "of taking an aim of Divine matters by human, which cannot but breed mixture of imaginations" (Bacon, *Ess.* xvii.), has been universal in all ages, and in all nations alike civilised and savage. It arises from an impression that in the absence of direct, visible, guiding Providence, the Deity suffers His Will to be known to men, partly by inspiring those who from purity of character or elevation of spirit are susceptible of the divina afflatus (θεομαρτυρία, ἐνθουσιασμός, ἐκστασις), and partly by giving perpetual indications of the future, which must be learnt from experience and observation (Cic. *Div.* i. 18; Plin. xxx. 5).

The first kind of divination is called Natural (ἄτεχνος, ἀδίδακτος), in which the person inspired with prophetic gifts is transported from his own individuality, and becomes the passive instrument of supernatural utterances (*Aen.* vi. 47; *Or. Met.* ii. 640, &c.). As this process involved violent convulsions, the word μαντική is derived from μαινεσθαι, and alludes to the foaming mouth and streaming hair of the possessed seer (Plat. *Tim.* 72 B, where the μάντις is carefully distinguished from the προφήτης). But even when the recorded prophecies of Scripture are of the most passionate character, their utterance was not accompanied by these unnatural distortions (Num. xxiii. 5; Ps. xxxix. 3; Jer. xx. 9), although, as we shall see, they were well-known phenomena (1 Sam. xviii. 10, xix. 24), and were characteristic of pretenders to the gift.

The other kind of divination was artificial (τεχνητή), and probably originated in an honest conviction that external nature sympathised with and frequently indicated the condition and prospects of mankind; a conviction not in itself ridiculous, and fostered by the accidental synchronism of natural phenomena with human catastrophes (Thuc. iii. 89; Jos. *B. J.* vi. 5, § 3; Foxe's *Martyrs*, iii. 406, &c.). When once this feeling was established, the supposed manifesta-

tions were infinitely multiplied, and hence the numberless forms of impostura or ignorance called kapnomancy, pyromancy, arithmomaney, libanomancy, botanomancy, kephalomancy, &c., of which there are abundant accounts in Cic. *de Div.*; Cardan, *de Sipientiā*; Anton. v. Dale, *de Orig. Idol.*; Fabricius, *Bibl. Ant.* pp. 409–426; Carpzov. *App. Crit.* pp. 540–549; Potter's *Antiq.* i. ch. viii. sq. Indeed there was scarcely any possible event or appearance which was not pressed into the service of augury, and it may be said of the ancient Greeks and Romans, as of the modern New Zealanders, that "after uttering their karakias (or charms), the whistling of the wind, the moving of trees, the flash of lightning, the peal of thunder, the flying of a bird, even the buzz of an insect would be regarded as an answer" (Taylor's *New Zealand*, p. 74; Bowring's *Siam*, i. 153 sq.). A system commenced in fanaticism ended in deceit. Hence Cato's famous saying that it was strange how two augurs could meet without laughing in each other's face. But the supposed knowledge became in all nations an engine of political power, and hence interest was enlisted in its support (Cic. *de Legg.* ii. 12; Liv. vi. 27; Soph. *Ant.* 1055; Mic. iii. 11). It fell into the hands of a priestly caste (Gen. xli. 8; Is. xlvii. 13; Jer. v. 31; Dan. ii. 2), who in all nations made it subservient to their own purposes. Thus Chardin says that, in Persia, the astrologers would make even the Shah rise at midnight and travel in the worst weather in obedience to their suggestions.

The invention of divination is ascribed to Prometheus (Aesch. *Pr. Vinct.* 492), to the Phrygians and Etrurians, especially sages (Cic. *de Div.* i; and Clem. Alex. *Strom.* i. 326, where there is a great deal more on the subject), or (as by the Fathers generally) to the devil (Firmic. Maternus, *de Error.* Proem.; Lactant. ii. 16; Minuc. Felix. *Oct.* 27). In the same way Zoroaster ascribes all magic to Ahriman (Nork, *Bram. und Rab.* p. 97). Similar opinions have prevailed in more modern times (Sir Thomas Browne, *Vulg. Err.* chs. i. xi.).

Many forms of divination are mentioned in Scripture, and the subject is so frequently alluded to that it deserves careful examination. We shall proceed to give a brief analysis of its main aspects as presented in the sacred writers, following as far as possible the order of the Books in which the professors of the art are spoken of.

They are first mentioned as a prominent body in the Egyptian court, Gen. xli. 8. 1. חֲזַנֵּי חֶלֶם (ἐξηγηταί; Hesyeh. ὁ περὶ ἱερῶν καὶ διοσμῶν ἐξηγητὴς; Aqu. κρυψιστῆς). They were a class of Egyptian priests, eminent for learning (ιερογραμματεῖς). The name may be derived from חֶלֶם, a style; or, according to Jablonaki, from an Egyptian word Chertom=thaumaturgus (Gesen. s. v. Cp. Harkavy, *Journ. Asiat.* [1870] p. 168 sq. See MV.¹¹ ref.). For other conjectures see Kalisch, *Gen.* p. 647; Heidegger, *Hist. Patr.* xx. 23). If their divination was connected with drawn figures, it is paralleled by the Persian *Rummal* (Calmet); the modern Egyptian *Zairgeh*, a table of letters ascribed to Idrees or Enoch (Lane, i. 354); the diagrams of the Chinese *Yü-king*, revealed to Fuh-hi on the back of a tortoise, which explain everything,

and on which 1450 learned commentaries have been written (Huc's *China*, i. 123 sq.); and the *Jamassu* or marks on paper, of Japan (Kempfer's *Hist.* ch. xv.).

2. מְחַזְּקִים (*σοφισταί*, Ex. vii. 11; Suid. οὗτος ἔλεγον πάντας τοὺς πεπαιδευμένους; *conjectores*). Possibly these, as well as their predecessors, were merely a learned class, invested by vulgar superstition with hidden power. Daniel was made head of the college by Nebuchadnezzar (Dan. v. 11). Cp. the "college of males" at Babylon (*Records of the Past*, N. S. iv. 110).

3. מְחַזְּקִים (*ἐκαστοί*, Ex. vii. 11, מְחַזְּקִים *φάρμακοί*; *incantatores*: the variety of words used in the Versions to render these names shows how vague was the meaning attached to them). The original meaning of מְחַזְּקִים is to *mutter*; and in Ex. vii. 11, the word seems to denote mere jugglers, of the class to which belonged Jannes and Jambres (2 Tim. iii. 8). How they produced the wonders which hardened the heart of Pharaoh, whether by mechanical or chemical means, or by mere legerdemain, or by demoniacal assistance (as supposed by the Fathers and Joseph. *Ant.* ii. 5), it is idle to conjecture. Michaelis (adopting an Arabic derivation of מְחַזְּקִים) explains them to be "astrologers," such as in ancient times were supposed (from their power to foretell eclipses, &c.) to be able to control the sun and moon by spells (Virg. *Aen.* iv. 489; Ov. *Met.* xii. 263. "While the labouring moon eclipses at their charms," Milton. "A witch, and one so strong she could control the moon," Shakspeare. *The Tempest*). Women were supposed to be peculiarly addicted to these magical arts (Ex. xxii. 18), which were forbidden to the Jews on theocratic grounds, independently of their liability to abuse.

4. מְחַזְּקִים, Lev. xix. 31, xx. 6 (*γνώσται*, *scitales*; *wizards*, from מָדַע, to *know*: cp. *weiser Mann*, *kluge Frau*, as *δαίμων*, from δαίμη): they who could by whatever means reveal the future. The Rabbis derive this word from a certain beast מְחַזְּקִים, in shape like a man (*καταβλεπόμενος*), the bones of which the diviner held in his teeth (*Sanhedrin*, f. 65; Maimon. *de Idol.* vi. 3; Bulenger, *de Div.* iii. 33; Delrio, *Disquis. Mag.* iv. 2; Godwin's *Mos. and Aar.* iv. 10; Carpzov. *App. Crit.* p. 545). The Greek diviner ate τὰ κυρίωτατα μέρη ζώων μαντικῶν (Porphyr. *de Abstinent.* ii.). For other bone divinations see Rubraquis' *China*, p. 65, and Pennant's *Scotland*, p. 88 (in Pinkerton). For allusions to a conjurer with human bones, see *Berachoth*, f. 59, 1. For other Talmudic allusions to various forms of witchcraft and necromancy, see *Sanhedrin*, f. 65, 2, f. 66, 1; *Eiruvim*, f. 64, 2; *Baba Bathra*, f. 58, 1. King Alexander Jannæus on one occasion hung eighty witches at once (*Sanhedrin*, f. 45, 1; and Rashi ad loco). Many of the Talmudic passages are translated in Hereshon's *Talmudic Miscellany*, pp. 229-236.

5. מְחַזְּקִים, Lev. xx. 6; Is. viii. 19, xix. 3; ἑγγαστρίμυθοι νεκρομάντις; *qui Pythones consulit*, *ventriloqui* (מְחַזְּקִים, Is. xix. 3). The word properly means "spirits of the dead," and then by an easy metonymy those who consulted them (אֲנִי מְחַזְּקִים, Deut. xviii. 10; מְחַזְּקִים אֶל דְּרִשְׁנֵי אֱלֹהִים, *ἐκ ἐκπεσόντων τοὺς νεκροὺς, quærentes a mortuis*

veritatem. But Shuckford, who denies that the Jews in early ages believed in spirits, makes it mean "consulters of dead idols," *Connex.* ii. 395 sq.). They are also called Pythones; ἑγγαστρίμυθοι *πύθωνες καλούμενοι* (Plat. *de Def. Or.* 414; Cic. *de Div.* i. 19). Hence the *πύθωνες*, Acts xvi. 16. These ventriloquists "peeped and muttered" (cp. τῆλε, *Il.* xiii. 101; "squeak and gibber," Shakspeare. *Jul. Cæs.*) from the earth to imitate the voice of the revealing "familiar" (Is. xxix. 4, &c.; 1 Sam. xxviii. 8; Lev. xx. 27: cp. στερνόμαντις, Soph. *Frag.*). מְחַזְּקִים properly means a bottle (Job xiii. 19), and was applied to the magician, because he was supposed to be inflated by the spirit (δαίμονοληπτός), like the ancient Εὐρυκλῆς (ὡς ἄλλοτρίως γαστέρας ἐνέθρι, Ar. *Vesp.* 1017; *spiritum per recenda naturæ excipiat*, Schol. in Ar. *Plut.*). The Talmud says, "A Python is a familiar spirit who speaks from the arm-pits" (*Sanhedrin*, f. 65). Of this class was the witch of Endor (Jos. *Ant.* vi. 14, § 2), in whose case intended imposture may have been overruled into genuine necromancy (Ecclus. xli. 20). On this wide subject see Chrysost. *ad 1 Cor.* xiii. Tert. *adv. Marc.* iv. 25, *de Anima*, 57; Aug. *de doctr. Christ.* § 33; Cic. *Tusc. Disp.* i. 16, and the commentators on *Aen.* vi.; *Critic. Sacra*, ii. 331; Winer, s. v. *Todtenbeschwörer*; Le Moine. *Var. Sacra*, p. 993 sq.; Selden, *de Dîis Syr.* i. 2, and above all Büttcher, *de Inferis*, pp. 101-121, where the research displayed is marvellous. Those who sought inspiration, either from the demons or the spirits of the dead, haunted tombs and caverns (Is. lxxv. 4), and invited the unclean communications by voluntary fasts (Maimon. *de Idol.* ix. 15; Lightfoot, *Hor. Heb.* ad Matt. x. 1). That the supposed *ψυχομαντία* was often effected by ventriloquism and illusion is certain; for a specimen of this even in modern times, see the Life of Benvenuto Cellini.

6. מְחַזְּקִים מְחַזְּקִים (*μαντεύμενος μαντείας*; *ἑγγαστρίμυθοι νεκρομάντις*; Deut. xviii. 10. As the most complete list of diviners is given in this passage, we shall follow the order of the kinds there enumerated). This word involves the notion of "cutting," and therefore may imply the same thing as the Chald. מְחַזְּקִים (from חָצַק, to cut). Dan. ii. 27, iv. 4, &c., and be taken to mean astrologers, magi, genethliaci, &c. (*Dict. of Gr. and Rom. Ant.* art. *Astrologia*; Jur. vi. 582 sq.; Diod. Sic. ii. 30; Winer, s. vv. *Magici*, *Sorceri*). Others refer it to the κληρομαντείας (Schol. ad Eur. *Hipp.* 1057), since the use of lots was very familiar to the Jews (Gataker, *On Lots*, ad init.); but it required no art to explain their use: for they were regarded as directly under God's control (Num. xxi. 55; Esth. iii. 7; Prov. xvi. 33, xviii. 18). Both lots and *digitorum micatio* (old and even) were used in distributing the duties of the Temple (Otho, *Lex. Rab.* s. v. *Digitis micando*).

7. מְחַזְּקִים, Mic. v. 12, 2 K. xxi. 6; *ὁρατοῦς somnia*; A. V. "an observer of times;" *ἐκδοιζόμενος* (always in LXX., except in Lev. ii. 26, where probably they followed a different reading, from חָזַק, a bird, *ὀρνιθοσκοπεῖν*) = *ἐκ τῶν λαλομένων στοιχαζόμενος*, *Lex. Cyr.*; *ἐκ ἀκοῆς*, Hesych. It is derived from חָזַק, to cover, and may mean generally "using hidden art"

(Is. ii. 6; Jer. xxvii. 9). If the LXX. understand it correctly, it refers to that *λόγων παραρηγορίαι* (Suid.), which was common among the Jews, and which they called Bath Kol; or which remarkable instances are found in Gen. xiv. 14; 1 Sam. xiv. 9, 10; 1 K. xx. 33. For Talmudic allusions to the Bath Kol, see *Berachoth*, f. 61, 2; *Baba Bathra*, f. 18, 1; *Moed Katon*, f. 9, 1, and many other passages; but a distinction must be drawn between the use of the term to imply an actual "voice from heaven," and its application to chance omens (see Hamburger, *R.E.* ii. 92). After the extinction of the spirit of prophecy the Bath Kol was considered by the Jews as a sort of substitute for the loss. For a curious dissertation on it, see Lightfoot *ad Matt.* iii. 13. A belief in the significance of chance words was very prevalent among the Egyptians (Clem. Alex. *Strom.* i. 304; Plut. *de Is.* 14), and the accidental sigh of the engineer was sufficient to prevent even Amasis from removing the monolithic shrine to Sais (Wilkinson, *Anc. Egypt.* ii. 310). The universality of the belief among the ancients is known to every scholar (Cic. *de Div.* i.; Herod. ii. 90; Virg. *Aen.* vii. 116, &c.). From the general theory of the possibility of such omens sprang the use of the Sortes Biblicæ, &c. (Niceph. Greg. viii.; Aug. Ep. 119; Prideaux, *Connect.* ii. 376, &c.; Cardan, *de Varietate*, p. 1040).

If *מְבַיֵּשׁ* be derived from *מַעַן*, it will mean "one who fascinates with the eyes," as in the Syr. Vers. (cp. Vitrings, *Comment. ad Is.* ii. 6). A belief in the *ὀφθαλμοὶ βάσκανος* (*מַעַן מְבַיֵּשׁ*) was universal, and is often alluded to in Scripture (Dent. xxiii. 6; Matt. xx. 15; Tob. iv. 7, *μὴ φθορήσῃ σου ὁ ὀφθαλμός*: 1 Sam. xviii. 9, "Saul eyed David"). The well-known passages of Pliny and the ancients on the subject are collected in Potter's *Ant.* i. 383 sq.

Others again make the *מְבַיֵּשׁ* (Is. ii. 6, &c.) to be "soothsayers" who predicted "times" as in A. V. and R. V., from the observation of the clouds (Aben Ezra on Lev. xix. 26) and other *διοσημαίαι*, as lightnings, comets, meteors, &c. (Jer. x. 2), like the Etruscan Fulguratores (Cic. *de Div.* i. 18; Plin. ii. 43, 53; Plut. *de Superst.*; Hom. *Od.* v. 102; Virg. *Ecl.* i. 16; Humboldt's *Cosmos*, ii. 135, ed. Sabine). Possibly the position of the diviner in making these observations originated the Jewish names for East and West, viz. front and back (Godwin, iv. 10, but Carpov disputes the assertion, *App. Crit.* p. 541). The practice naturally led to the tabulation of certain days as lucky or unlucky (Joh iii. 5, "monthly prognosticators;" Is. xlvii. 13, *ἡμερὰς παραρηγορίσθαι*, Gal. iv. 10), just as the Greeks and Romans regarded some days as *candidi*, others as *atri* (Hes. *Opp. et D.* 770; Suet. *Aug.* 92, &c.). If we had space, every one of the superstitions alluded to might be paralleled in modern times.

In Judg. ix. 37, the expression "terebinth of Meonenim (enchantments)" refers not so much to the general sacredness of great trees (Hom. *Od.* xiv. 328; *habitat Gravis oracula quercus*, Virg. *Georg.*), as to the fact that (probably) here Jacob had buried the idolatrous amulets which his wives had brought from Syria (Gen. xxxv. 4; Stanley, *Sin. and Pal.* p. 142).

8. *מְבַיֵּשׁ* (*ὁλυνόμενοι*; *observantes au-*

guria; Ps. lviii. 5; 2 K. xvii. 17, xxi. 6, &c.): A. V. enchanter; *ophiomants* (Bochart, *Hieroz.* ii. p. 383), from *ψῆξις*, to hiss; people who, like the ancient Psylli (Plin. *H. N.* vii. 2; xviii. 4) and Marmaridae (Sil. Ital. iii. 301),

"Ad quorum cantus serpens obilita venent,
Ad quorum tactum mites jacuere cerastæ."

were supposed to render serpents innocuous and obedient (Ex. vii. 9; Jer. viii. 17; Eccles. x. 11), chiefly by the power of music (Nicand. *Meriac.* 162; Luc. ix. 891; Sil. Ital. 8, 495; *Aen.* vii. 753; Niebuhr's *Travels*, i. 189); but also no doubt by the possession of some genuine and often hereditary secret (Lane, *Mod. Egypt.* ii. 106 sq.; Arnob. *adv. Gent.* ii. 32). They had a similar power over scorpions (Francken's *Tour to Persia*). The whole subject is exhausted by Bochart (*Hieroz.*, torn. ii. iii. 6, *de Aspidæ Surdæ*).

שִׁבְיָה has, however, a general meaning of "learning by experience," like "to augur," in English, Gen. xxx. 27, 1 K. xx. 33; either because ophiomancy (Ter. *Phorm.* iv. 4, 26) was common, or because the word meant (as the Rabbis say) an observation of *ἐνδοῖα σύμβολα*, &c. (Jer. x. 2; Plin. xviii. 5, 7). Some understand it of *divinatio ex petribus* (Plin. *H. N.* xxx. 2; Poli *Syn. ad Deut.* xviii. 10).

9. *מְבַיֵּשׁ* (*φαρμακοί*; *malefici*, A. V. wizards), from the Arabic, "to reveal," meaning not only astrologers proper (Chaldaeans), but generally all who practised occult means of discovering the unknown. It might no doubt involve the use of divining-rods for the purpose of Aquaelicium, &c., dependent on physical laws only partially understood (Mayo's *Pop. Superstitions*).

10. *מְבַיֵּשׁ* (*ἐκαστοὶ ἐκαστοῖν*; *incantatores*), from *בָּרַךְ*, to bind (cp. *bannen* = binden, Gesen. s. r.). Those who acquired power by uttering spells, &c. (*καταδῆναι*; and *ὑμνος δέσμιος*, Aesch. *Eum.* 296:

"So the spell now works around thee,
And the clankless chain hath bound thee."

Manfred, l. 1.)

In Onkelos it is rendered *מְבַיֵּשׁ*, a *muttiter*; and this would connect these "enchanters" with the *Nekromanteia* (No. 5. Is. xxix. 4).

11. Belomants. Alluded to in Ezek. xxi. 21 (Heb. v. 26), where Nebuchadnezzar, at the parting of two ways, uses divination to decide whether he shall proceed against Jerusalem

or Rabbah, *קִלְקַל בְּחִיצִים* (*τοῦ ἀναβράσαι ῥάβδον*, LXX.; but it should be rather *ρίψαι βέλη*, or as Vulg. *commiscens sagittas*; R. V. "he shook the arrows to and fro." The other explanations are untenable). The practice of lots-by-arrows was Babylonian (Lenormant, *La Divination chez les Chaldéens*, p. 21). Jerome (ad loc.) explains it of mingling in a quiver arrows on which were inscribed the names of various cities, that city being attacked the name of which was drawn out (Prid. *Connect.* i. 85). Estius says, "He threw up a bundle of arrows to see which way they would light, and since they fell on the right hand he marched towards Jerusalem." (For the Arabic practice, see Dozy, *Hist. de l'Islamisme*, p. 10.) The A. V.

"made his arrows bright," seems to allude to a sort of *σιδηρομαντεία*,—incorrectly. The arrows used were parti-coloured, and seven such were kept at Mecca. Pietro della Valle saw a divination derived from the changes of eight arrows at Aleppo, and attributed it to diabolical agency. We read of a somewhat similar custom in use among the ancient Teutons (Tac. *Germ.* x.), and among the Alani (Am. Marcell. xxi.): also among the modern Egyptians (Lane, ii. 111). "But of another kind was that practised by Elisha, 2 K. xiii. 15" (Sir Thos. Browne, *Vulg. Errors*, v. 23, 7).

12. Closely connected with this was *ξύλο-ορ* *ραβδο-μαντεία* (Hos. iv. 12), *ῥαβδος* *ῥαβδου*. *Δύο ἰσάμυες ῥάβδους . . . πιπτοῦσας ἐπὶ τέρηθρον ἑποῦ φέροντο*, Cyr. Alex. (ad loc.), and so too Theophylact. Another explanation is that the positive or negative answer to the required question was decided by the equal or unequal number of spans in the staff (Godwin, *l. c.*). Parallels are found among the Scythians (Herod. iv. 67, and Schol. Nicandri *Ἰκθόαι μυρικήν μαντεύονται ξύλῳ*), Persians (Strab. xv. p. 847), Assyrians (Athen. *Deipn.* xii. 7), Chinese (Stavorinus' *Juca*; Pinkerton, xi. 132), and New Zealanders (called *Niu*, Taylor's *New Zeal.* 91). These kinds of divination are expressly forbidden in the Koran, and are called *al Meisar* (ch. v. Sale's *Prelim. Dissert.* p. 89).

13. *Κυλικομαντεία*, Gen. xlv. 5 (*כִּלְכִּי*; τὸ κόνδυ τὸ ἀργυροῦν . . . αὐτὸς δὲ οἰωνισμοῦς οἰωνί(σται ἐν αὐτῷ; Heaych. *κόνδυ, ποτήριον βασιλικόν*. In quo augurari solet). Parkhurst and others, denying that divination is intended, make it a mere cup of office (Bruce's *Travels*, ii. 657), "for which he would search carefully" (a meaning which *כִּלְכִּי* may bear). But in all probability the A. V. and R. V. are right. The Nila was called the cup of Egypt, and the silver vessel which symbolised it had prophetic and mysterious properties (Hävernick, *Introductio ad the Pentateuch*, ad loc. Cp. also the notes of Delitzsch [1887] and of Knobel in Dillmann² on this passage). The divination was by means of radiations from the water, or from magically inscribed gems, &c. thrown into it; a sort of *ὕδρομαντεία*, *κατοπτρομαντεία*, or *κρυσταλλομαντεία* (Cardan, *de rerum Variet.* cap. 93), like the famous *mirror of ink* (Lane, ii. 362), and the crystal divining globes, the properties of which depend on a natural law brought into notice in the exhibitions of Mesmerism. The jewelled cup of Jemsheed was a divining cup, and such a one was made by Merlin (*Faerie Queen*, iii. 2, 19). Jul. Serenus (*de Fato*, ix. 18) says that after certain incantations, a demon *vocem instar sibili edebat in aquis*. It is curious to find *κυλικομαντεία* even in the South Sea Islands (*Daily Bib. Illustr.* i. 424). For illustrations of Egyptian cups, see Wilkinson, *Anc. Egypt.* i. 180, and index s. n. "Vases" [1878]. This kind of divination must not be confused with *Cyathomanteia* (Suid. s. v. *κοτταβί(σκειν)*).

14. Consultation of Teraphim (Zech. x. 2; Ezek. xxi. 21; *ἐπερωτήσαι ἐν τοῖς γλυκτοῖς*; 1 Sam. xv. 23, *ἡρῶν* = an inquirer). These were wooden images (1 Sam. xix. 13) consulted as "idols," from which the excited worshippers fancied that they received oracular responses.

The notion that they were the embalmed heads of infants on a gold plate inscribed with the name of an unclean spirit, is Rabbi Eliezer's invention. Other Rabbis think that they may mean "astrolabes, &c." [TERAPHIM.]

15. *Ἡπατοσκοπία*, or *extispicium* (Ezek. xii. 21, *κατασκοπεύσθαι* al. *ἡπατ* x., LXX., *הִפָּתִי*). The liver was the most important part of the sacrifice (Artemid. *Onciocr.* ii. 75; Suet. *Aug.* 95; Cic. *de Dir.* ii. 13; Sen. *Oedip.* 360). Thus the deaths of both Alexander and Hephæstion were foretold *ἐν ἡπατὶ τοῦ ἑλεφάντος* (Arrian, *Alex.* vii. 18).

16. *Ὀνειρομαντεία* (Deut. xiii. 2, 3; Judg. vii. 13; Jer. xxiii. 32; Jos. *Ant.* xvii. 8, § 4). God frequently revealed Himself by dreams when the soul was thought to be least deluded by contact with the body (*ἐνδονεῖν γὰρ ὅτι ὕμνασιν λαμπρόνεται*, Aesch. *Eum.* 104). Many warnings occur in Scripture against the impostures attendant on the interpretation of dreams (Zech. x. 2, &c.). We find however no direct trace of seeking for dreams such as occurs in Virg. *Aen.* vii. 81; Plaut. *Curcul.* i. 1, 2, 61. [DREAMS.]

17. The consultation of oracles may be considered as another form of divination (Is. xli. 21–24, xlii. 7). The term oracle is applied to the Holy of Holies (1 K. vi. 16; Ps. xxviii. 2, *ῥῆμα*, *δαβὴρ τὰ ἅγια τῶν ἁγίων ἀνομιῆς*, *Lex. Ms.*; Hottinger, *Thes. Phil.* p. 366). That there were several oracles of heathen gods known to the Jews we may infer both from the mention of that of Baal-zebub at Ekron (2 K. i. 2–6), and from the towns named Debir. "Debir quod nos *oraculum* sive *responsum* possumus appellare, et ut contentiosius verbum exprimamus e verbo *λαλητήριον*, vel locutorium dicere" (Hieron. *ad Eph.* i.). The word "oracles" is applied in the N. T. to the Scriptures (Acts vii. 38; Rom. iii. 2, &c.). On the general subject of oracles, see Anton. v. Dale, *de Oraculis*; *Dict. of Ant. art.* *Oraculum*; Potter's *Antiq.* i. 286–326; Sir T. Browne, *Tract* vi., and *Vulg. Err.* vi. 12, &c.; W. Robertson Smith, *The Religion of the Semites*, i., index s. n.

18. It only remains to allude to the fact that superstitious importance was peculiarly attached to the words of dying men. And although the observed fact that "men sometimes at the hour of their departure do speak and reason about themselves" (*Relig. Medici*, ch. xi.) does not of course take away from the death-bed prophecies of Scripture their supernatural character (Gen. xlix. 2; 2 K. xiii. 24, &c.), yet it is interesting to find that there are analogies which resemble them (II. xlii. 355, and the story of Calanus; Cic. *de Div.* i. 30; Shakspeare *Rich. II.*, ii. 1; Daniel, *Civil Wars*, iii. 62, &c.).

Moses forbade every species of divination (cp. Koran, ch. v.; Cato, *de Re Rust.* 5, *rem superstitioe rudius animos infestant*; Columell. ii. 1), because a prying into the future clouds the mind with superstition, and because it would have been (as it actually proved to be, Is. ii. 6; 2 K. xxi. 6) an incentive to idolatry; indeed the frequent denunciations of the sin in the Prophets tend to prove that these forbidden arts presented peculiar temptations to apostate Israel (Hottinger, *Jur. Hebr. Lex.* pp. 253, 254). But God had supplied His people with substitutes for

divination, which would have rendered it superfluous, and would have left them in no doubt as to His Will in circumstances of danger, had they continued faithful. It was only when they were unfaithful that the revelation was withdrawn (1 Sam. xxviii. 6; 2 Sam. ii. 1, v. 23, &c.). According to the Rabbis, the Urim and Thummim lasted until the Temple; the spirit of prophecy until Malachi; and the Bath Kol, as the sole means of guidance from that time downwards (Lightfoot, *l. c.*; Maimonides, *de Fundam. Leg.* cap. 7; Abarbanel, *Protegg. in Daniel.*).

How far Moses and the Prophets believed in the reality of necromancy, &c., as distinguished from various forms of imposture, is a question which at present does not concern us. But even if, in those times, they did hold such a belief, no one will now urge that we are bound to do so at the present day. And yet such was the opinion of Bacon, Bp. Hall, Baxter, Sir Thos. Browne, Lavater, Glanville, Henry More, and numberless other eminent men. Such also was the opinion which led Sir M. Hale to burn Amy Duny and Rose Cullenden at Bury in 1684; and caused even Wesley to say, that "to give up a belief in witchcraft was to give up the Bible." We recommend this statement, in contrast with the all but universal disbelief in such superstitions now, to thoughtful consideration. For a curious statute against witchcraft (5 Eliz. cap. 15), see Collier's *Eccl. Hist.* vi. 366.

Superstition not unfrequently goes hand in hand with scepticism, and hence, amid the general infidelity prevalent through the Roman empire at our Lord's coming, imposture was rampant; as a glance at the pages of Tacitus will suffice to prove. Hence the lucrative trades of such men as Simon Magus (Acts viii. 9), Bar-jesus (Acts xiii. 6, 8), the slave with the spirit of Python (Acts xvi. 16), the vagabond Jews, exorcists (Luke xi. 19; Acts xix. 13), and other *γῶγρες* (2 Tim. iii. 13; Rev. xix. 20, &c.), as well as the notorious dealers in magical *βιβλίοι* (*Ἐπίστυρα γράμματα*) and *τελέμματα* at Ephesus (Acts xix. 19). Among the Jews these flagrant impostors (*ἀπαρτῶνες*, Jos.) had become dangerously numerous, especially during the Jewish war; and we find them constantly alluded to in writers of that age (Jos. *Bell. Jud.* vi. 5, §§ 1, 2; cp. Matt. xxiv. 23, 24; Tac. *Hist.* v. 12; Jos. *Ant.* xx. 5, § 1, &c.). As was natural, they, like most Orientals, especially connected the name of Solomon with their spells and incantations (Jos. *Ant.* viii. 2). The names of the main writers on this wide and interesting subject are mentioned in the course of the article, and others are referred to in Fabricius, *Bibl. Antiq.* cap. xii., and Böttcher, *de Inferis*, pp. 101 sq. [F. W. F.]

DIVORCE. The law regulating this subject is found in Deut. xxi. 1-4, and the cases in which the right of a husband to divorce his wife was lost are stated in *ib.* xii. 19, 29. The ground of divorce was what the text calls a *דָּבָר עָרֹת*, on the meaning of which the Jewish doctors of the period of the N. T. widely differed; the school of Shammai seeming to limit it to a moral delinquency in the woman, whilst that of Hillel extended it to trifling causes, *e.g.* if the wife burnt the food she was cooking for her

husband.* The Pharisees wished perhaps to embroil our Saviour with these rival schools by their question (Matt. xix. 3); He, however, by His answer as well as by His previous maxim (*v.* 31), declares that but for their hardened state of heart, such questions would have no place. Yet from the distinction made, "but I say unto you" (*cp.* 31, 32), it seems to follow, that He regarded all the lesser causes than "fornication" as standing on too weak ground, and declined the question of how to interpret the words of Moses. It would be unreasonable, therefore, to suppose that by *דָּבָר עָרֹת*, to which he limited the remedy of divorce, Moses meant what our Lord calls *λόγος πορνείας*, for that interpretation would at once make void the distinction referred to above between His teaching and that of Moses. Still less can Moses by that expression have intended adultery, for that would have been to stultify the law "that such should be stoned" (John viii. 5; Lev. xx. 10). The practical difficulty, however, which attends on the doubt which is now found in interpreting Moses' words will be lessened if we consider that the mere giving "a bill (or rather "book," *סֵפֶר*) of divorcement" (*cp.* *ls.* i. 1; Jer. iii. 8) would in ancient times require the intervention of a Levite, not only to secure the formal correctness of the instrument, but because the art of writing was then generally unknown. This would bring the matter under the cognizance of legal authority, and tend to check the rash exercise of the right by the husband. Traditional opinion and prescriptive practice would probably fix the standard of the *סֵפֶר*, and, doubtless with the lax general morality which marks the decline of the Jewish polity, that standard would be lowered (*Mal.* ii. 14-16). Thus the Gemar. *Babyl. Gittin*, 9 (*ap.* Selden, *de Uz. Heb.* iii. 17) allows divorce for a wife's spinning in public, or going out with head uncovered or clothes so torn as not properly to conceal her person from sight. But the absence of any case in point in the period which lay nearest to the lawgiver himself, or in any, save a much more recent one, makes the whole question one of great uncertainty. The case of Phalti and Michal is not in point, being merely an example of one arbitrary act redressed by another (1 Sam. xxv. 44; cp. 2 Sam. iii. 14-16). Selden (*de Uz. Heb.* iii. 19) quoting Zohar, *Praef.* p. 8 b, &c., speaks of an alleged custom of the husband, when going to war, giving the wife the *libellus divortii*; but the authority is of slight value, and the fact improbable. It is contrary to all known Oriental usage to suppose that the right of quitting their husband and choosing another was allowed to women (Joseph. *Ant.* xv. 7, § 10). Salome is noted (*ibid.*) as the first example of it;—one, no doubt, derived from the growing prevalence of heathen laity. Hence also, probably, the caution given in 1 Cor. vii. 10. Winer is surely mistaken (*s. v.* *Ehescheidung*) in supposing that a man might take back as wife her whom he had divorced, except in the cases when her

* Mishna *Gittin*, ix. 10. R. Akibah allowed divorce if the husband merely saw a woman whose appearance pleased him better. Cp. Niehm, *HWB.* "Ehe," § 8; Hamburger, *RE.* "Scheldung."

second husband had died or had divorced her. Such resumption is contemplated by the law-giver as only possible in those two cases, and therefore is in them only expressly forbidden (Jer. iii. 1; cp. Deut. xxiv. 3, 4). For the question of divorce in the N. T., see ADULTERY; where it is suggested that the *ἀδὺς πορνείας* of Matt. v. 32 means fornication before marriage, presumed to be fraudulently concealed. For another view of the matter, see Origen in *Catena*, p. 128; Photius, p. 136; Chrysostom on 1 Cor. vii. 12; Hammond on *Divorce*, i. p. 606; Bp. Colenso on *Divorce*, Works, iv. p. 496; Gerhard, *Loci Theol.* vii. pp. 692-743. The only case in the N. T. in which separation of man and wife is clearly permitted is that of a Christian and unbeliever (1 Cor. vii. 12), where, however, continued union is recommended.

For the view taken among later Jews on this subject, see Joseph. *Ant.* i. 8, § 23; xvi. 7, § 3; *Vit.* 76: a writer whose practice seems to have been in accordance with the views of Hillel. On the general subject, Buxtorf, *de Sponsal. et Divort.* pp. 82-85; Selden, *Uxor. Hebr.* iii. 17 sq.; and Michaelis, *Lives of Moses*, ii. 336, may be consulted. See also the additional remarks in *D. B.*, Amer. edit. [H. H.]

DI-ZA'HAB (דִּי־זָהָב; *καταχρύσεια*; *ubi auri est plurimum*), a place in the Arabian desert, mentioned Deut. i. 1, as limiting the position of the spot in which Moses is there represented as addressing the Israelites. It has been identified by Robinson (i. 147, ii. 187, note) with *Dahab*, a cape on the W. shore of the *Gulf of Akabah*, about two-thirds down its length; but this identification is given up as being too far south (cp. Dillmann² in loco). The LXX. and Vulg. may perpetuate a tradition that it was a place where gold had been found. [F.]

DOCTOR (διδάσκαλος), Luke ii. 46; and "doctor of the Law" (νομοδιδάσκαλος), Luke v. 17, Acts v. 34. [LAWYER; RABBI; SCRIBES.]

DO'CUS (Δῶκος; Ald. Δῶκος; Jos. Δαγών; *Doch*; Syr. ܕܘܟܝܬܐ, *Doak*), a "little hold" (τὸ ὀχυρωμένιον; *munitiunculum*) near Jericho (1 Macc. xvi. 15, cp. v. 14) built by Ptolemaeus the son of Abubus, and in which he entertained and murdered his father-in-law Simon Macabaeus, with his two sons. By Josephus (*Ant.* xiii. 8, § 1; *B. J.* i. 2, § 3) it is called Dagon, and is said to have been one of the fortresses (*ἑρμῶν*) above Jericho. The name still remains in the neighbourhood, attached to the copious and excellent springs of 'Ain Dūk, which burst forth in the *Wādī Nūcāmeh*, at the foot of the mountain of Quarantania (*Quruntul*), about 4 miles N.W. of Jericho. Above the springs are traces of ancient foundations, which may be those of Ptolemy's castle, but more probably of that of the Templars, one of whose stations this was: it stood as late as the latter end of the 13th century, when it was visited by Brocardus (see Rob. i. 571, 572, note; also *PEF. Mem.* iii. 173, 191, 205). [G.] [W.]

DO'DAI (דִּוְדָי; B. Δωδεΐδ; A. -δία; *Dudia*), an Ahobite who was chief of the course of the second month (1 Ch. xxvii. 4). Probably the same as Dodo, whose name in the *Kethib* and in

the LXX. is Dodai; the words "Eleazar son of" having been omitted from the above passage in Chronicles. [DODO, 2.] [G.]

DODAN'IM (דֹּדָנִים; *Ῥόδοι*; *Dodania*), Gen. x. 4; 1 Ch. i. 7 (in R. V. and in marg. of A. V. 1 Ch. i. 7, *RODANIM*, דֹּרְדָנִים), a family or race descended from Javan, the son of Japhet (Gen. x. 4; 1 Ch. i. 7). Authorities vary as to the form of the name: the Hebrew text has both. *Dodanim* appears in the Syriac, Chaldee, Vulgate, Persian, and Arabic Versions, and in the Targum of Onkelos; *Rodanim* is supported by the LXX., in the Samaritan Version, and some early writers, as Eusebius and Cosmas. The weight of authority is in favour of the former; the substitution of *Ῥόδοι* in the LXX. may have arisen from familiarity with that name (cp. Ezek. xxvii. 15, where it is again substituted for *Dedan*). *Dodanim* is regarded as identical with *Dardani* (Ges. *Thesaur.* p. 1266; Delitzsch [1887] on Gen. x. 4), the latter, which is the original form, having been modified by the change of the liquid *r* into *o*, as in *Barmilcar* and *Bomilcar*, *Hamilcar* and *Hamilco*. The Targum of Jonathan, that on Chronicles, and the Jerusalem Talmud give *Dardania* for *Dodanim*. The *Dardani* were found in historical times in Illyricum and Troy: the former district was regarded as their original seat. They were probably a semi-Pelagic race, and are grouped with the Chittim in the genealogical table, as more closely related to them than to the other branches of the Pelagic race (Knobel, *Völkertafel*, pp. 104 sq.). The similarity of the name *Dodona* in Epirus has led to the identification of *Dodanim* with that place; but a mere local designation appears too restricted for the general tenor of Gen. x. Kalisch (*Comm.* on Gen.) identifies *Dodanim* with the Daunians, who occupied the coast of Apulia: he regards the name as referring to Italy generally. The wide and unexplained difference of the names, and the comparative unimportance of the Daunians, form objections to this view. Dillmann⁴ prefers the reading *Rodanim*, and understands the inhabitants of the Rhodian islands, or the islands of the Aegean Sea. [W. L. B.] [F.]

DODA'VAH (acc. DODAVAHU, דֹּדָוָה; B. 'Dōdā, A. 'Dōdā; *Dodanu*), a man of Maresha in Judah, father of Eliezer who denounced Jehoshaphat's alliance with Ahaziah (2 Ch. ix. 37). In the Jewish traditions *Dodarah* is the son of Jehoshaphat, who was also his uncle (Jerome, *Qu. Heb.* in loco).

DO'DO. The name appears under the form *Dōdu* in the cuneiform tablets of the 15th century B.C., discovered at Tel-el-Amarna in Upper Egypt (*Records of the Past*, N. S. iii. 57). 1. (דִּוְדָי; *patruus ejus*), a man of Bethlehem, father of Elhanan, who was one of David's "thirty" captains (2 Sam. xxiii. 24 [B. Δωδῆ, A. Δωδῆ]; 1 Ch. xi. 26 [B. Δωδῆ, A. -ωδῆ]). He is a different person from

2. **DODO THE AHOHITE**, father of Eleazar, the second of the three "mighty men" who were over the "thirty" (2 Sam. xxiii. 9 [see Driver, *Notes on the Heb. Text of the P.B. of Sam.*; B. Σωρελ; B⁹⁷¹ Δωδῆ, A. Σωρελ]; 1 Ch. xi. 12 [B. Δωδῆ, N. -δῆ]). He, or his son—in which

case we must suppose the words "Eleazar son of" to have escaped from the text—probably had the command of the second monthly course (1 Ch. xxvii. 4). In the latter passage the name is DODAI (דֹּדַי; B. Δωδεῖδ, A. Δωδία); but this form occurs in the Hebrew text (*Kethib*) of 2 Sam. xiii. 9 (*Keri* דֹּדַי), in the LXX. of all, and in Josephus (*Ant.* vii. 12, § 4; Δωδεῖλος); and is believed by Kennicott (*Dissertation*, &c. p. 134), who has examined these lists with great minuteness, to be the correct one. The Jewish tradition (Jerome, *Qu. Hebr.* on 1 Ch. xi. 12) was, that Dodo was the brother of Jesse.

3. A man of Issachar, forefather of Tola the Judge (Judg. x. 1). The LXX. and Vulg. renderings are translations: παραδέλου αὐτοῦ; *patrui Abimelech*. [G.] [W.]

DO'EG (דֹּעַג = *fearful*; Δωῆκ; *Doeg*), an Idumean (LXX. and Joseph. *Ant.* vi. 12, § 1, δ Ξύπος), chief of Saul's herdmen ("having charge of the mules"). He was at Nob when Ahimelech gave David the sword of Goliath; and not only gave information to Saul, but, when others declined the office, executed the king's order to destroy the priests of Nob, with their

families, to the number of 85 persons, together with all their property (1 Sam. xxi. 7, xxii. 9, 17, 22; Ps. lii.). A question has arisen on the nature of the business by which he was "detained

before the Lord" (דֹּעַג לִפְנֵי יְהוָה, συνεχόμενος Νεεσσαράν ἐνώπιον κυρίου; *intus in tabernaculo Domini*). The difficulty which lies in the idea that Doeg was a foreigner, and so incapable of a Nazarite vow (*Mishna de Votis*, ix. 1, Surenh.), is explained by the probable supposition that he was a proselyte, attending under some vow or some act of purification at the Tabernacle (Patrick; Calmet on 1 Sam. xxi. 7; Ges. p. 1059; Winer, s. v. *Doeg*; Thenius, *ad loc.* in *Kurzg. exeg. Hdb.*). [H. W. P.]

DOG (כֹּלֵב, *keleb*; κυών, *kyon*; canis; Arab.

كلب, *kelb*). The dog is mentioned forty times in Scripture. The derivation of the name is from an unused root, כָּלַב, "to make a noise" by clapping, whence the German *kläffen*, "to bark or yelp." Gesenius observes, "transfertur

Egyptian dogs, from the sculptures. (Wilkinson.)

ad latratum canum." Bochart would derive it from the tenacity of a dog's grip, adducing the Arabic كَلْبَة, "pincers;" but this is more

probably itself derived from كَلْب. Though the dog was domesticated among the Jews, yet its position in the household was very different

from that which it holds among modern nations, and it never was a domestic and cherished pet. Nor were the various breeds of dogs carefully cultivated as among the Egyptians, nor their instinct utilized for the purposes of the chase, as by the latter people; the Jews never having been from the time of Jacob a hunting nation. In the greater part of their thickly-populated territory there was no scope for the sports of the field, had they been so inclined. The principal use of the dog among the Jews was for

Babylonian Dog. (From a black stone found at Babylon.)

guarding the flocks. "Whose fathers I disdained to set with the dogs of my flock" (Job xxx. 1, R. V.). But the shepherd's dog in the East, though of apparently the same race as our sheep-dog or collie, is never trained to tend or drive the flock as among ourselves. The sheep always follow the shepherd, who is himself accompanied by his dogs, and only avails himself of the natural canine instinct of watchfulness in the night, and aversion to all wild animals, in order to protect the flocks from the nocturnal attacks of prowling wolves or jackals. In the same way dogs were used for guarding the house, as is still the universal custom in the East. "His watchmen are blind: . . . they are all dumb dogs, they cannot bark; dreaming, lying down, loving to slumber" (Is. lvi. 10, R. V.).

But, besides the domestic dogs, there have ever been in all the cities and villages of the East, troops of hungry and half-savage dogs, which own allegiance to no one, but tenaciously maintain their rights to a particular and generally very limited district, within which they will never permit the dogs of the adjoining street or village to enter; and who wander about at night, the only scavengers, clearing away carcases and offal of every kind, which but for them might create a pestilence. Even human graves, unless well secured, are not safe from their search. This habit is most exactly described by the Psalmist: "At evening let them return; let them make a noise like a dog, and go round about the city. They shall wander up and down for meat, and tarry all night if they be not satisfied" (Ps. lix. 14, 15, R. V.). "In the place where dogs licked the blood of Naboth, shall dogs lick thy blood." "The dogs shall eat Jezebel by the rampart of Jezreel." "Him that dieth of Ahab in the city the dogs

shall eat" (1 K. xxi. 19, 23, 24, R. V.). On the very spot on the mounds of Jezreel, outside the modern hovels, as Dean Stanley remarks, and as the writer has often seen, the descendants doubtless of those very dogs may be seen searching for refuse. With the passage in Prov. xvi. 11 may be compared, "Vixisset canis immundus, vel amica luto sus" (Hor. Ep. i. 2, 26).

It is from this habit of these uncared-for outcasts, as well as from its being ceremonially unclean, that the dog is almost always in Scripture spoken of with more or less aversion or contempt. In every language of the East the term *dog* is applied as a name of scorn or reproach. "Am I a dog, that thou comest to me with staves?" (1 Sam. xvii. 43.) "Why should this dead dog curse my lord?" (2 Sam. xvi. 9.) As the Jews contemptuously applied the term "dog" to the Gentiles, so to the present day a Mohammedan will rarely speak of a Christian without the epithet "dog." "Dog of a Jew," "dog of a Christian," are expressions rarely out of his mouth.

The word was also frequently used as a term of the most abject humility, applied by the speaker to himself, in the presence of a superior. "After whom dost thou pursue? after a dead dog?" (1 Sam. xxiv. 14.) "That thou shouldst look upon such a dead dog as I am" (2 Sam. ix. 8). The name was also applied to a woman of ill-fame (Deut. xxi. 13). So "a shameless woman shall be counted as a dog" (Ecclus. xvi. 25).

Though we have spoken of the ownerless dogs as half savage, yet even these exhibit all the wonderful sagacity and confidence in man which is characteristic of the domestic breeds. If a traveller camp near a town or village, one or two of these pariah dogs will come and endeavour to attract attention. If the least notice be taken of them, or a morsel of food be given

Assyrian Dog. (Terra-cotta from Kouyunjik.)

them, they will establish themselves as sentries outside the tent, and faithfully guard the camp night and day, chasing away all other dogs, until they see the baggage packed and the tents struck, when they will at once rejoin their less fortunate comrades, declining to leave their hereditary settlement. On one occasion, close to Jerusalem, one of these dogs visited our camp, and being kindly received, immediately ran off, but soon returned with a blind pup in her

month, which she deposited in a corner outside one of the tents; and as soon as, in separate journeys, she had brought her whole litter of four, whence we could not ascertain, she took her station, and for a fortnight, till our departure, faithfully protected as, never taking any food save what was given her, nor allowing any foragers in our neighbourhood. If, however, the pariah dog be taken young enough, it shows no such local attachment, but devotes itself to persons exclusively. The writer had one, which he had found when a few weeks old, and which was faithful for months, exhibiting the sagacity of a sheep-dog, watching the horses and mules of the party, driving away all others from their pasturage, and selecting camping-places towards nightfall, showing great disgust if the journey were persisted in further than he approved. The many instances of sagacity shown by these Oriental dogs lead us to the belief that their ancestors have at one time been very much more reclaimed and associated with man than at present; for the wild original, the jackal, even when tamed, shows no such instinct or intelligence.

In the conversation of our Lord with the Syrophenician woman, *κυνάριον* instead of *κύων*, "little dogs" or "young dogs," is used. From this we may infer that the dog was not at this time held in such abhorrence as in earlier days; and that the young dogs at least were reared and cherished within the house. Perhaps it was owing to the introduction of Roman fashions, that the dog had begun to take a higher position. Our Lord, in using the familiar diminutive, refers to the dependence of the dog on the family of his master, rather than to its uncleanness, and the woman's response confirms the inference, "Yea, Lord, for even the dogs too eat," as the Vulgate has rightly, "Etiam, Domine! nam et catelli edunt."

There is no difference in type between the shepherd's and the pariah or ownerless dog of Palestine. Though larger than the jackal, probably the wild original, it has the same sharp-pointed ears and snout, and generally a similar tawny coat, differing from the "collie" only in having a less bushy tail. Other breeds have been introduced by Europeans, and the Bedawee possess also the Persian greyhound, larger and stronger than our greyhound, with long silky hair on the ears, and a fringe of the same fine hair on the tail. It is used for the chase of the gazelle.

Neglected as are the dogs of the East, canine madness is a disease unknown. [H. B. T.]

DOORS. [GATES.]

DOPH'KAH (דֹּפְכָא); B. Παφακά, A. -ar, the LXX. apparently reading *ῥ* for *ῑ*; *Daphca*), a place mentioned in Num. xxxiii. 12, as a station in the Desert where the Israelites encamped. It is not yet certainly identified: conjectures may be seen in Knobel-Dillmann on Ex. xvii. 1. [H. H.]

DOR (דֹּר and דָּר, *a habitation*; in Josh. xvii. 11, Judg. i. 27, and 1 Ch. vii. 29, Δῶρ; in Josh. xi. 2, xii. 23, and 1 K. iv. 11, Φενεαδδῶρ, Φενεαδδῶρ, Ναφεδδῶρ, Νεφθαδῶραι; in 1 Macc. xv. 11, 13, 25, Δωρᾱ; *Dor*, in 1 K. *Nephthdor*), a royal city of the Canaanites whose king, as an

ally of Jabin king of Hazor, took part in the battle by the waters of Merom (Josh. xi. 1, 2; xii. 23). It belonged to Manasseh, but appears to have been situated in the territory either of Issachar, or Asher (Josh. xvii. 11; 1 Ch. vii. 29); it is not said which of the two, though there is no doubt from other indications that it was the latter. According to Josephus (*Ant.* v. 1, § 22) it marked the western limit of Manasseh and the northern limit of Dan. The Canaanites who dwelt in the city were not driven out, but they were put to tribute (R. V. taskwork) when Israel was strong (Judg. i. 27, 28). During the reign of Solomon it was the station of Ben-Abinadab, who was one of the twelve officers appointed to provide victuals for the king and his household, and who was also married to the king's daughter (1 K. iv. 11); his district is said (*Jos. Ant.* viii. 2, § 3) to have included the region of Dor and the sea-coast. In the 3rd and 2nd centuries B.C. Dor was an important fortress, strongly fortified and well garrisoned; it was fruitlessly besieged by Antiochus III. during his war with Ptolemy Philopator (Polyb. v. 6); the usurper Tryphon fled thither when driven from the throne by Antiochus VII. (Sidetes), and there he was besieged, circ. 139 B.C., by Antiochus, who made several ineffectual attempts to take the place by assault (1 Macc. xv. 11-25; *Jos. Ant.* xiii. 7, § 2; *B. J.* i. 2, § 2). During the civil war between Antiochus Philometor and Antiochus Cyzicenus it was held, with Strato's Tower, by the tyrant Zoilus, who was able to maintain his position against Alexander Jannæus, but was afterwards subdued by Ptolemy Lathyrus (*Jos. Ant.* xiii. 12, §§ 2, 4). At a later period it must have fallen into the hands of the Jews, for it was taken from them by Pompey, who made it a free city, and placed it under the jurisdiction of the Governor of Syria (*Jos. Ant.* xiv. 4, § 4; *B. J.* i. 7, § 7). A few years afterwards it was rebuilt by Gabinius* (*Jos. Ant.* xiv. 5, § 3); and during the reign of Herod Agrippa I. it was the scene of a riot during which a statue of Caesar was set up in a synagogue of the Jews (*Jos. Ant.* xix. 6, § 3). The coins of Dor show that, like other autonomous towns in Palestine, it adopted the era of Ptolemy; and the legend which some of them bear, ΔΩΡ . ΙΕΡ . ΑCΥΑ . ΑΥΤ . ΝΑΥΑΡ., attest its importance under the Empire. In the 4th century A.D. it was deserted, but Jerome speaks of it as having once been a very powerful city (*Ep. S. Paulæ*, v.); it was an episcopal city of Palaestina Prima, and one of its Bishops took part in the Council of Constantinople. In the time of the Crusades it was sometimes called *Pirgn*!, perhaps from Πύργος.

Dor is included in Phœnicia by Josephus (*Vit.* 8; *B. J.* i. 21, § 5), who states that it was a maritime city near Mount Carmel, and that it had no harbour to protect ships from the S. wind (*Ant.* xv. 9, § 6; *cont. Ap.* ii. 10). According to Clandius Julius, quoted by Stephen of Byzantium (Reland, p. 739), it was a small town inhabited by Phœnicians, who, attracted by the abundance of the shell-fish from which the purple dye was obtained, had settled there,

* In *B. J.* i. 8, § 4, the name of the town rebuilt by Gabinius is Ἀδωρῆς, as if it were Adoraim, now *Dūra*.

made a harbour, and called that place, in their own tongue, Dora. Some, however, maintained that the town was founded by Dorus, a son of Neptune. Scylax (42) calls it a city of the Sidonians, and in the inscription on the sarcophagus of Eshmunazar it is stated to have been added to the dominions of Sidon by that monarch.^b Under the form Du-u-ru it is mentioned with Megiddo in an Assyrian geographical list (Schrader, p. 168). In the *Onomasticon* it is said to be 9 miles from Caesarea Palaestina on the road to Tyre; in the Peutinger Table it is written Thora, and the distance is given as 8 miles.

Dor is now *Kh. Tuntûrah*, a little N. of the village of the same name. The most conspicuous ruins are a mound and mediaeval tower, picturesquely situated on a low promontory, and separated from each other by a rock-hewn ditch. North of the promontory are the remains of the ancient harbour, and of a paved road which ran up the coast; there are also traces of a colonnade, and several rock-hewn tombs and cisterns (*PEF. Mem.* ii. 3, 7-10; Guérin, *Samarie*, ii. 305-15).

There is much difference amongst commentators and translators as to the meaning of the word דור, used in connexion with Dor in Josh. xi. 2, xii. 23, and 1 K. iv. 11. In A. V. it is rendered "border," "coast," and "region," but in R. V. "height" of Dor; the LXX. take it to be a proper name, Φενασίδωρ or Νεφθεδωρ; the Vulgate has, in Josh. xi. 2, *et regionibus Dor juxta mare*, in Josh. xii. 23, *Dor et provinciae Dor*, and in 1 K. iv. 11, *Nephthador*. In the *Onomasticon* (OS.² 250, 56; 283, 3) Eusebius has Δὺρ τοῦ Ναφᾶθ and Νεφεδῶρ, which he identifies with maritime Dor; and Jerome (OS.² 115, 22; 142, 13) Dor Naphet and Nefeddor, to which he adds, *quod Symmachus interpretatur muritima*. In Josh. xvii. 11, where the word occurs again, the renderings are still more remarkable: A. V. "even three countries;" R. V. "even the three heights"; LXX. τὰ ὅλκον τῆς Μαφᾶ (A. Ναφεῶν); and the Vulgate, *tertia pars urbis Nopheth*. [W.]

DORA (Δωρᾶ; *Dora*), 1 Macc. xv. 11, 13, 25. [DOR.]

DOR/CAS. [TABITHA.]

DORYMENES (Δορυμένης), father of Ptolemy-Macron (1 Macc. iii. 38; 2 Macc. iv. 45). As this Ptolemy was in the service of Ptolemy Philometor, king of Egypt, before he deserted to Antiochus Epiphanes, it is probable that his father Dorymenes is the same as he who fought against Antiochus the Great (Polyb. v. 61). [W. A. W.]

DOSITHEUS (Δωσίθεος; *Dositheus*, *Dositheus*). 1. One of the captains of Judas Macabæus in the battle against Timotheus (2 Macc. xii. 19, 24).

2. A horse-soldier of Bacenor's company, a man of prodigious strength, who, in attempting

to capture Gorgias, was cut down by a Thracian (2 Macc. xii. 35).

3. The son of Drimylus, a Jew, who had renounced the law of his fathers, and was in the camp of Ptolemy Philopator at Raphia (3 Macc. i. 3). He appears to have frustrated the attempt of Theodotus to assassinate the king. According to the Syriac Version, he put in the king's tent a man of low rank (ἀσθενὴς τινα), who was slain instead of his master. Polybius (v. 81) tells us that it was the king's physician who thus perished. Dositheus was perhaps a chamberlain. [W. A. W.]

4. "A priest and Levite," who carried the translation of Esther to Egypt (*Esth.* xi. 4, 2). It is scarcely likely that he is identical with the Dositheus mentioned (*Joseph. c. Ap.* ii. 5) as one of the "commanders of the forces" of Ptolemy VI. Philometor, though he probably lived in the reign of that monarch. [B. F. W.]

DOTHAIM. [DOTHAN.]

DOTHAN (once דֹּתַיִם, DOTHAIN, and in contracted form דֹּתַי; = possibly *two wells*—*Ges.* pp. 332, 568; *Dothain*; in 2 K. *Dothan*, but ed. 1590 *Dothain*), a place first mentioned (*Gen.* xxxvii. 17; ADE. Δωθαιμ) in connexion with the history of Joseph, and apparently as in the neighbourhood of Shechem. It next appears as the residence of Elisha (2 K. vi. 13; BA. Δωθαιμ), and the scene of a remarkable vision of horses and chariots of fire surrounding "the mountain" (הַר), on which the city stood. It is not again mentioned in the O. T.; but later still we encounter it—then evidently well known—as a landmark in the account of Holofernes' campaign against Bethulia (*Judith* iv. 6; vii. 3, 18; viii. 3). The change in the name DOTHAIM is due to the Greek text, from which this book is translated. In the Vat. and Alex. and Vulg. texts, it is also mentioned in *Judith* iii. 9, where the E. V. has "Judes" ('*l'ouðaias* for *Δωραίας*). Cp. *Speaker's Comm.* in loco), and all these passages testify to its situation in the centre of the country near the southern edge of the great plain of Esdraelon.

Dothain was known to Eusebius (OS.² 249, 38), who places it 12 miles to the N. of Sebaste (Samaría); and here it has been at length discovered in our own times by Mr. Van de Velde (i. 364, &c.) and Dr. Robinson (*ibid.* 122), still bearing its ancient name unimpaired, and situated at the south end of a plain of the richest pasturage, 4 or 5 miles S.W. of Jenin, and separated only by a swell or two of hills from the plain of Esdraelon. The *Tell*, or mound on which the ruins stand, is described as very large ("huge," Van de Velde, i. 364); at its southern foot is still a fine spring. Close to it is an ancient road, running N. and S., the remains of the massive (Jewish?) pavement of which are still distinguishable (V. de Velde, pp. 369-70). The great road from *Beisán* to Egypt also passes near *Dothán* (Rob. iii. 122). The traditional site was at the *Khan Jubb Fúus* near *Tell Hám*, at the N. of the Sea of Galilee (see the quotations in Rob. ii. 419). It need hardly be said that this position is not in accordance with the requirements of the narrative. See also *PEF. Mem.* ii. 169, 215; Guérin, *Samarie*, ii. 219-222. [G.] [W.]

^b The orthography דֹּתַיִם which occurs in the Eshmunazar inscription is confirmed by the cuneiform inscriptions (see MV.¹¹), and is equivalent to the Arabic دُور.

DO TO WIT. The words occur in the A.V. of 2 Cor. viii. 1, "We do you to wit of the grace of God." The phrase, now obsolete, is replaced in the R. V. by the words "We make known to you," &c. "Do" was formerly used in the sense of "make" or "cause," and "to wit" in the sense of "to know." See *D. B.*, Amer. edit. [F.]

DOVE, PIGEON (דּוֹבָה, *yónah*; περιστέρη; *columba*), **TURTLE, TURTLE-DOVE** (תּוֹר, *tór*; *πυργόν*; *turtur*). As these birds are closely allied, and as they generally are mentioned in connexion with each other, it will be convenient to treat of them together. *Yónah* is used of the pigeon tribe in general, comprising both pigeons and turtle-doves; but more frequently for birds of the genus *Columba*, as distinguished from *tór*, the genus *Turtur*; while *tór* is used only of the latter. But of both genera there are several very distinct species in the Holy Land.

דּוֹבָה is derived by Stade from an unused root דּוּבָה, which may be an older pronunciation of דּוּבָה, "to sigh," "to mourn." The derivations suggested by Gesenius for תּוֹר seem less satisfactory, for the name is phonetic, evidently derived from the plaintive cooing of the dove, like the Latin *turtur*. גּוֹזָל, *gózál*, translated in Gen. xv. 9 "a young pigeon," is, as may be seen from Deut. xxxii. 11, simply the young of any bird, as we should say "a cheeper," from its cry (Lat. *pipiens*). The dove is mentioned more than sixty times in the sacred writings, and from the connexion in which the names occur we see that the Hebrews, while they distinguished the pigeon (*yónah*), indifferently termed "dove" in both our Versions, from the turtle-dove (*tór*), were perfectly aware of their natural affinity. The first mention of the dove is in Gen. viii. 8-12, where Noah three times sent out a dove from the ark, as the waters began to abate. Possibly already the dove had been domesticated even before the Deluge; and certainly so far as we have any historical record, it was the earliest domesticated bird, retained by man in the same semi-domestic state in Egypt and the East as at this day in our own country. We have no evidence of any other bird being domesticated by the Jews before the time of Solomon, who introduced peacocks, and most probably at the same time barn-door fowls and other gallinaceous birds from India. Ducks and geese, reclaimed from a very early date in colder climates, are rarely kept in Palestine, the heat and drought being, unless in a very few localities, obstacles to their successful cultivation. But tame pigeons, all of them from the same original wild stock, the Rock-dove or Blue-rock (*Columba livia*), have always been universally reared in the East. To this day, in Syria, the pigeon is the invariable companion of man wherever he has a settled habitation. The richer people and the village sheikhs have large isolated dovecoats built of clay or sun-dried brick, filled with wide-mouthed earthen pots laid on their side, each of which is the home of a pair of birds. The poorer people have similar jars, or square pigeon-holes, in long rows inside

their houses, just under the roof, opposite to the door which is the only mode of exit and entry for the winged as for the human inhabitants. It is interesting to note, as also illustrating the extreme antiquity of their domestication, that all the principal "fancy" races, as fantails, trumpeters, jacobins, and especially black carriers, are much valued throughout the East, where they seem to have originated, and whence they were introduced into Western Europe.

The pigeon and turtle-dove were the only birds recognised for sacrifice under the Mosaic law, and indeed their use for this purpose dates much further back, as may be seen from Gen. xv. 9, where Abram is enjoined to offer a turtle-dove and a young pigeon. The two are almost always mentioned together. A pair of the one or the other is constantly enjoined as a substitute for those who were too poor to provide a lamb or a kid, and these birds were admissible as trespass, sin, or burnt offering. So, for the purification of the leper, "two turtledoves, or two young pigeons, such as he is able to get; the one shall be a sin offering, and the other a burnt offering" (Lev. xiv. 22). The like is commanded for ordinary purification (Lev. xv. 14, 29). For the purification of the Nazirite who had been accidentally defiled, two turtles or two young pigeons were exclusively enjoined. For the purification of women after childbirth, "if she be not able to bring a lamb, then she shall bring two turtledoves or two young pigeons" (Lev. xii. 8, R. V.), as was done by the mother of our Lord (Luke ii. 22-24).

From the great abundance of pigeons, the offering must have been one within the reach of the poorest, and the offerer was accepted according to that he had, and not according to that he had not. There is a significance also in the expression *young pigeons*, and also in the alternative, *turtle-doves*, which was a still further concession to extreme poverty: for unlike the dovecot pigeon, the turtle-dove, from its migratory habit and its timid disposition, has never yet been kept in a state of free domestication like its congener. But being extremely numerous from spring to autumn, and never shunning the neighbourhood of man, while it resorts to gardens and olive-yards for nidification, its young might easily be found and captured by those who were so poor as not even to possess pigeons. Again the turtle-dove is easily captured by snares or nets on the ground, and many are thus taken at the present day in Syria; but the wild pigeon is much more wary and suspicious. But while the turtle-dove is a migrant, and can only be taken from spring to autumn, the wild rock-doves, which abound in "clouds" in Palestine, are permanent residents, roosting in the cliffs and deep glens which seam the hill-country, and in old wells in the plains. Not only so, but they rear several broods in the year; their food being always abundant in a country where the characteristic herbage is of the *Leguminosae* order, on the leaves as well as the fruit of which the pigeon tribe principally subsist. There is also force in the adjective "young;" for while the adult turtle-dove can be trapped, it was hopeless, before the introduction of firearms, to secure the old *pigeon*, while the nest-

lings could easily be procured among the cliffs, and therefore are specially permitted for use in sacrifice.

Various characteristics of the dove, both tame and wild, are alluded to in Scripture. Either may be intended by the Prophet when he asks, "Who are these that fly as a cloud, and as the doves to their windows?" (Is. lx. 8), where the windows may refer either to the latticed openings in the dovecots, to permit the passage of the birds, or to the clefts and fissures of the rocks to which the wild pigeons resort. The distinctive and characteristic habit of the rock-dove, the wild original of our dovecot pigeon, is that, contrary to the habit of all the other species, it invariably selects cliffs, deep ravines, or in their absence wells or ancient cisterns for nesting and roosting, and always avoids trees or the neighbourhood of man. This is referred to in Canticles: "O my dove, that art in the clefts of the rock, in the secret places of the stairs" ["in the covert of the steep place," R. V.] (ii. 14). "O ye that dwell in Moab, leave the cities, and dwell in the rock, and be like the dove that maketh her nest in the sides of the hole's mouth" (Jer. xlviii. 28), which may refer to its resorting to deserted wells and cisterns. Again, "They shall be on the mountains like doves of the valleys, all of them mourning" (Ezek. vii. 16), "valleys" (נִקְיָא) here being נִקְיָא, "a ravine where there is no water" (Ges.). The myriads of rock-doves in the wilder parts of Palestine are beyond computation, far exceeding the numbers of the domestic birds. The country, especially the parts abutting on the Jordan valley, is admirably adapted for them, abounding in deep gorges or "wādys" with precipitous cliffs of soft limestone, honey-combed in all directions by fissures and caves natural and artificial. Several of these gorges are named "Wādy Hamam," i.e. Pigeon ravine. One of the most remarkable of these is the Wādy Hamam leading up to Hattin from the Plain of Gennesaret, where the famous "robbers' caves" are inhabited by thousands of rock-doves, whose swift flight and roosting-places far in the fissures render them secure from the attacks of the birds of prey which share the caverns with them. Above all, they remain in the cliffs of the ravines of the Arnon and Callirrhoe of Moab, in "clouds" as numerous as in the days of Jeremiah. It is to the rock-dove that the Psalmist makes reference when he speaks of "the wings of a dove covered with silver, and her feathers with yellow gold" (Ps. lxxviii. 13); alluding to the metallic lustre, especially on the neck, which glistens like silver, and the wings with the gleam of gold in the sunshine. The swift flight of the pigeon is alluded to in several passages. "Oh that I had wings like a dove, for then would I fly away and be at rest" (Ps. lv. 6, and so Hos. xi. 11). Some of the scriptural allusions apply equally to the pigeon and the turtle, as for instance those referring to the plaintive mournful note: "I did mourn as a dove" (Is. xxxviii. 14). See also ch. lix. 11, and Nah. ii. 7). The "coo" of each species of the *Columbidae* is perfectly distinct, and can be discriminated by the naturalist, but all consist of two notes of similar character. The amative-ness of the dove is also referred to in Cant. ii. 14, vi. 9. On this account it was sacred to

Venus both among the Phœnicians and the Greeks. Stanley (S. & P., p. 237), speaking of Askalon as the haunt of the Syrian Venus, says, "Her temple is destroyed, but the sacred doves—sacred by immemorial legends on the spot, and celebrated there even as late as Eusebius—still fill with their cooings the luxuriant gardens which grow in the sandy hollow within the ruined walls." It is supposed that the dove was placed upon the standards of the Assyrians and Babylonians in honour of Semiramis. Tibullus (i. 7) says:—

" Quid referam ut volitet crebras intacta per urbes
Alba Pæstio sancta columba Syro."

Its gentle eye has supplied several comparisons, as in Cant. i. 16, iv. 1. The bright red skin round the dark eye of the turtle explains the verse, "His eyes are like doves beside the water brooks; washed with milk, and fitly set" (v. 12, R. V.).

But, above all, our blessed Lord has laid hold of the innocence and gentleness of the dove, to exemplify the Christian character. "harmless as doves." The same character rendered it the fitting emblem under which the appearance of the Holy Spirit is described, when He appeared in a visible form at the Baptism of the Saviour, "descending like a dove, and lighting upon Him" (Matt. iii. 16).

Three or four species of dove, and three of turtle, inhabit Palestine. Of the former, the most abundant, *Columba livia* (L.), or Rock-dove, has already been treated of. It is the only pigeon of the coast. It is found in all suitable localities in Europe, from Norway to Portugal and the Black Sea; in all North Africa as far as Sierra Leone and Abyssinia; and in the whole of Asia. The bird of the Jordan Valley, Moab and Egypt, as well as of a great part of Southern Asia, has been distinguished as *Columba schimperi* (Bp.), from its rump being ashy instead of white. But I have found the two interbreeding, and having every intermediate grade of coloration, which leads me to doubt the specific value of the distinction. The Stock dove, *Columba oenas* (L.), is also found, but not in large numbers, and only in the wooded parts of the country. In winter the highlands, north and south, Mount Carmel, and especially the forests of Gilead, are visited by myriads of the common wood-pigeon or ring-dove, *Columba palumbus* (L.), which all quit the country for the north early in March.

Of the genus *Turtur*, or Turtle-dove, three species are found. Of these the Collared Turtle, *Turtur risorius* (L.), the largest species of the group, resides throughout the year in considerable numbers in the Jordan valley, wherever there are trees. In summer it is sparsely spread through Gilead, and in the woods of Tabor and Carmel. It is a strictly Asiatic species; and though it straggles as far as the Bosphorus, Palestine may be looked on as its ordinary western limit, and India as its central home. It is the original of the blanché and somewhat degenerated turtle-dove of our English aviaries. The second species, the Palm Turtle (*Turtur seagolensis*, L.), has a rather wider range in Palestine than the former, but is nowhere very numerous, except near the Dead Sea, where it resides throughout the year, and is extremely common.

It is also a permanent resident in Jerusalem, many pairs living in the enclosure of the Mosque of Omar, and in the gardens of the city. It is very familiar and confiding in man, and is never molested. Its natural home is among the palm-trees, and in Arabia and in all the oases of the Sahara it swarms wherever the palm grows. It is not impossible that it in some measure may have supplied the sacrifices in the wilderness. In Arabia every palm-tree is the home of two or three pairs. In the crown of a single date-tree I have found five or six nests placed together. In such camps as that of Elim a considerable supply of these doves may have been obtained.

But the turtle-dove which is most abundant, and that to which undoubtedly the scriptural allusions refer, is our own turtle-dove, *Turtur communis* (Selby), well known during the summer months in the southern counties of England. Its return in spring is one of the best marked epochs in the ornithological calendar. This regularity of migration is alluded to by Jeremiah (viii. 7), "The turtle and the crane and the swallow observe the time of their coming." And in Cant. ii. 11, 12 we have this exquisite picture of spring: "Lo, the winter is past; the rain is over and gone: the flowers appear on the earth; the time of the singing of birds is come, and the voice of the turtle is heard in our land." So Pliny, "Hyeme mutia, a vere vocalibus;" and Aristotle (*Hist. An.* ix. 8), "Turtle-doves spend the summer in cold countries, the winter in warm ones." But elsewhere (viii. 5) he makes it hibernate (φολεῖ). There is no more sure evidence of the return of spring in Mediterranean countries than the arrival of the turtle-dove. Especially is this the case in Palestine. Search the glades and valleys even by sultry Jordan at the end of March, and not a turtle-dove is to be seen. Return in the second week of April, and clouds of turtle-doves are feeding on the trefoils of the plain. They stock every thicket and tree; at every step they flutter up from the herbage in front of you—they perch on every tree and bush—they overspread the whole face of the land. So universal, so simultaneous, so conspicuous is their migration, that the Prophet might well place the turtle-dove at the head of those birds which "observe the time of their coming." While other songsters are heard chiefly in the morning, or only at intervals; the turtle, immediately on its arrival, pours forth from every garden, grove, and wooded hill, its melancholy yet soothing ditty, unceasingly from early dawn till sunset. If any surprise be felt at the great multitudes of these birds, and the question be asked how they all find sustenance, we must remember that the rank herbage of the plains is now in its full luxuriance, and consists largely of clovers, lucernes, and astragalus, the leaves of which plants are the favourite food of the dove. There is therefore no limit to the number which the country can maintain in spring and early summer. The common turtle-dove inhabits in summer all the temperate parts of Europe. Western Asia as far as Afghanistan, and Africa north of the Sahara. Its winter-quarters are in Central Africa. In Eastern Asia it is represented by a closely allied species, *Turtur orientalis* (Lath.). [H. B. T.]

DOVE'S DUNG (דְּבִיבֹנִים, *chiryónim*; Keri, דְּבִיבֹנִים, *dibyonim*: *κόπροι περιστερῶν*: *stercus columbarum*). Various explanations have been given of the passage in 2 K. vi. 25, which describes the famine of Samaria to have been so excessive, that "an ass's head was sold for four-acre pieces of silver, and the fourth part of a cab of dove's dung for five pieces of silver." The old Versions and very many ancient commentators are in favour of a literal interpretation of the Hebrew word. Bochart (*Hieroz.* ii. 572) has laboured to show that it denotes a species of *cicer*, "chick-pea," which he says the

Arabs call *usnán* (أسنان), and sometimes improperly "dove's or sparrow's dung." Linnaeus suggested that the *chiryónim* may signify the *Ornithogalum umbellatum*, "Star of Bethlehem." On this subject the late Dr. Edward Smith remarks (*English Botany*, iv. p. 130, ed. 1814): "If Linnaeus is right, we obtain a sort of clue to the derivation of *ornithogalum* (birds' milk), which has puzzled all the etymologists. May not this observation apply to the white fluid which always accompanies the dung of birds, and is their urine? One may almost perceive a similar combination of colours in the green and white of this flower, which accords precisely in this respect with the description which Dioscorides gives of his *ornithogalum*" (see also Linnaeus, *Prelectiones*, ed. P. D. Giseke, p. 287). Sprengel (*Comment.* on Dioscorides, ii. 173) is inclined to adopt the explanation of Linnaeus. Fuller (*Miscell. Sacr.* vi. 2, p. 724) understood by the term the crops of pigeons with their indigested contents. Josephus (*Antiq.* ix. 4) thought that dove's dung might have been used instead of salt. Harmer (*Observat.* iii. 185) was of opinion, that as pigeon's dung was a valuable manure for the cultivation of melons, it might have been needed during the siege of Samaria for that purpose. Most of these interpretations have little to recommend them, and have been refuted by Bochart and others. With regard to Bochart's own opinion, Celsius (*Hierob.* ii. 30) and Rosenmüller (*Not. ad Bochart, Hieroz.* ii. 582) have shown that it is founded on an error, and that he confuses the Arabic حصف, the name of some species of saltwort (*Salsola*), with حصف, *cicer*, a "vetch," or chick-pea. The explanation of Linnaeus appears to us to be far-fetched; and there is no evidence whatever to show that the Arabs ever called this plant by a name equivalent to dove's dung. On the other hand, it is true that the Arabs apply this or a kindred expression to some plants. Thus it was sometimes used to denote a kind of moss or lichen (*Kuz-kendem*, Arabic); also some alkali-yielding plant, perhaps of the genus *Salsola* (*ashnan*, or *usnan*, Arab.). In favor of this explanation, it is usual to compare the German *Teufelsdröck* ("devil's dung") as expressive of the odour of *asafoetida* (see Gesenius, *Thes.* p. 516). A small species of *Holcus sorghum*, perhaps identical with the Hebrew *chiryónim*, is still extensively cultivated in Kurdistan. This millet, from being small and round, may have been called by the Hebrews in olden time *Kharē of Doves*, or, as we should say, "Doves' seed."

The advocates for the literal meaning of the expression, viz. that dove's dung was absolutely used as food during the siege, appeal to the following reference in Josephus (*Bell. Jud.* v. 13, 7): "Some persons were driven to such terrible distress as to search the common sewers and old dunghills of cattle, and to eat the dung which they got there, and what they of old could not endure so much as to look upon they now used for food." See also Eusebius (*H. E.* iii. 6): "Indeed necessity forced them to apply their teeth to everything; and gathering what was no food even for the filthiest of irrational animals, they devoured it." Celsius, who is strongly in favour of the literal meaning, quotes the following passage from Bruson (*Memorabil.* ii. c. 41): "Cretanæ, obsidente Metello, ob penuriam vini aquarumque jumentorum urina sitim sedasse;" and one much to the point from a Spanish writer, who states that in the year 1316 so great a famine distressed the English, that "men ate their own children, dogs, mice, and pigeon's dung." Lady Calcott (*Scrip. Herb.* p. 130) thinks that by the pigeon's dung is meant the *Ornithogalum umbellatum*. We cannot allow this explanation; because, if the edible and agreeable bulb of this plant was denoted, it is impossible that it should have been mentioned by the Spanish chronicler along with dogs, mice, &c. As an additional argument in favour of the literal interpretation of the passage in question may be adduced the language of Rabshakeh to the Jews in the time of Hezekiah (2 K. xviii. 27; Is. xxxvi. 12). Keil's cautious comment is (*Comment.* l. c.): "The above-stated facts prove no doubt the possibility, even the probability, of the literal meaning, but not its necessity; for which reason we refrain, with Gesenius, from deciding." Without venturing on any dogmatic statement, we recall, after comparing these many authorities, the trite remark, that the simplest explanation is often the best.

[W. H.] [H. B. T.]

DOWRY. [MARRIAGE.]

DRACHMA (*δραχμή*; *drachma*; 2 Macc. iv. 19, x. 20, xii. 43; * Luke xv. 8, 9), a Greek silver coin varying in weight on account of the use of different talents. The Jews at the time to which the Second Book of Maccabees relates must have used drachmæ of two talents,—the Attic, of which the drachma then weighed about 64 grs., and the Phoenician, about 59 grs. at Aradus, and elsewhere about 56; they may also have used the Rhodian drachma of 60 grs. The Maccabæan shekels follow the Phoenician talent.

Attic drachma: Iala. (British Museum. Actual size.)

In St. Luke denarii seem to be intended by drachmæ, for in the Evangelist's time the Attic

* In this first and second of these passages the Vulg. has *didrachma*.

drachma, the last survivor of the Greek drachmæ, had fallen to the weight of the Roman denarius and practically lost its identity. In Palestine denarii must have been the common silver coins. [MONET.] [R. S. P.]

DRAGON. In the A. V. two similar but distinct Hebrew words have been so rendered: *ḏāḡ*, *tan*, and *ḏāḡān*, *tanwān*. In this identification the translators followed the Vulgate; and the confusion is the more easily accounted for, since the masculine plural of *ḏāḡ* is written in Lam. iv. 3 *ḏāḡān* instead of *ḏāḡān*, and on the other hand the plural *ḏāḡān* is used for the singular *ḏāḡ* in Ezek. xxix. 3 and xxxii. 2. The LXX. however have recognised the distinctness of the words, and so has the R. V., which invariably translates *ḏāḡ* correctly by "jackal."

I. *Tan* occurs, always in the plural, in the following passages: "I am a brother to dragons, and a companion to ostriches" (Job xxx. 29); "An habitation of dragons and a court for ostriches" (Is. xxiv. 13); "The dragons and the ostriches" (ib. xliii. 20), in all which the LXX. has *σέρπεντες*. In Is. xlii. 22, where the LXX. has *σέρπεντες*, the A. V. reads: "The wild beasts of the islands shall cry in their desolate houses, and dragons in their pleasant palaces;" but the R. V.: "Wolves shall cry in their castles, and jackals in the pleasant palaces." In Jer. ix. 11, xiv. 6, li. 37, and Mic. i. 8, the LXX. has *ὑποδαρτες*. Gesenius derives the word from an unused root, *ḏāḡ*, "to extend," "draw out," cognate with the Sanscrit *tan*, *reina*, *tendo*, *tenuis*, German *dünn*, *dehnen*, and applied to the jackal from its long-drawn howl. One of the Arabic names for a wolf is *تيفان*, *tyfān*.

and for the jackal *ابن اوى*, "son of howling." In all the passages of Scripture where the word occurs, it is in connexion either with ostriches, with wild beasts, with deserts, or with the sound of wailing, or snuffing up the wind. Now all these suit the jackal exactly, and certainly point to no serpent or monster. The jackal (*Canis aureus*, L., from its tawny yellow colour) is and always has been extremely common in all the countries south and east of the Mediterranean to the far east of Asia. It inhabits the whole of Africa, and in Europe it is found in Southern Russia, Turkey, and Greece, as far as the northern point of the Adriatic. The Holy Land, from the number of caves and old tombs which afford it concealment everywhere, is an especial home of the jackal. The traveller, whether in towns or in camp, nightly hears the wailing cry, as the packs scour the country in search of food. But though ever on the alert to seize any stray sheep or kid, they are most inoffensive to man. Nowhere are they more numerous than in the ruins of Baalbek, where indeed "the jackals howl in the pleasant palaces."

II. *Tanwān*, *ḏāḡān* (plur. *ḏāḡān*), is always rendered by *ὑποδαρτες* in the LXX. except in Gen. i. 21—where we find *κίττος*, A. V. "great whales," R. V. "great sea-monsters." It seems to refer to any great monster, whether of the land or the sea, being more usually applied to some kind of reptile or serpent, but not exclu-

sively restricted to that sense. It is identical with the Arabic *تنين*, of which there are many fabulous accounts, suggesting the stories of the sea-serpent. When referring to the sea, it is used as a parallel to *לִיָּאָתָן*, *leviathan*, as in Is. xxvii. 1 (A. V. and R. V. "dragon"). When we examine special passages, we find the word used in Gen. i. 21 of the great sea-monsters, the representatives of the inhabitants of the deep. The same sense is given to it in Pa. lxxiv. 13 (where it is again connected with "leviathan"), Ps. cxlviii. 7, and in Job vii. 12 (Vulg. *cetus*, A. V. "whale," R. V. "sea-monster"). On the other hand, in Ex. vii. 9, 10, 12, it refers to a land serpent, in Deut. xxxii. 33 to a poisonous land serpent, and in Pa. xci. 13 to a powerful land reptile, where A. V. has "dragon" and R. V. "serpent." It is also applied in several passages metaphorically to symbolize the power of Pharaoh and of Egypt, of which the crocodile, the great monster of the Nile, was the emblem. "Art thou not it that hath cut Rahab, and wounded the dragon?" (Is. li. 9). "Pharaoh, king of Egypt, the great dragon that lieth in the midst of his rivers" (Ezek. xxix. 3). "Thou camest forth with thy rivers, and troublest the waters with thy feet" (ch. xxxii. 2). The mention of feet in the latter passage shows that neither a whale nor a serpent is intended. [See *LEVIATHAN*.] The same word is also applied to Nebuchadnezzar in Jer. li. 34. Though no crocodile is found at the present day in the Euphrates or the Tigris, yet there is every reason to believe that they formerly existed there, as they do still on all the other great rivers of Asia; and even in small streams, as under Mount Carmel; but they were extirpated, as in Lower Egypt, by the dense population which once lived on the banks of those rivers. If, as some have supposed, the land of Uz was on the Upper Tigris, Job may have had personal knowledge of the crocodile.

Such is the usage of the word "dragon" in the O. T. In the N. T. it is only found in the Apocalypse (Rev. xii. 3, 4, 7, 9, 16, 17, &c.) as applied metaphorically to "the Old Serpent, called the Devil and Satan," the description of the "dragon" being dictated by the symbolical meaning of the image, rather than by any reference to any actually existing creature. Of similar personification, either of an evil spirit or of the powers of material nature, as distinct from God, we have traces in the extensive prevalence of dragon-worship and existence of dragon-temples of peculiar serpentine form; the use of dragon-standards, both in the East, especially in Egypt (see also the apocryphal history of Bel and the Dragon), in China and Japan to the present day; and in the west, more particularly among the Celtic tribes. The most remarkable of all, perhaps, is found in the Greek legend of Apollo as the slayer of the Python, and the supplanter of serpent-worship by a higher wisdom. The reason at least of the scriptural symbol is to be sought, not only in the union of gigantic power with craft and malignity, of which the serpent is the natural emblem, but in the record of the serpent's agency in the temptation and fall (Gen. iii.). [SERPENT.] [A. B.] [H. B. T.]

DRAGON WELL (דְּרָגוֹן הַבְּיֵרָה, R. V. *Dragon's Well*, but more correctly "Dragon's Fountain.") The LXX., apparently reading *ΔΡΑΚΟΝΤΙΝΗ*, translate *πηγή τῶν οὐκῶν*, "fountain of fig-trees"; the Vulgate, *fons Draconis*, a spring, or perhaps an outflow from an aqueduct, in the immediate vicinity of Jerusalem, which is mentioned in the account of Nehemiah's night inspection of the city walls (Neh. ii. 13). It was probably in the valley to the west of Jerusalem, now called "valley of Hinnom;" and may have been an outflow of the aqueduct from "Solomon's Pools." No true spring is known in the "valley of Hinnom" at the present day. Robinson (l. 514, 1st ed.) supposes it to be another name of *GHON*, and places it in the northern part of the "valley of Hinnom;" Barclay (*City of Great King*, p. 315, 1st ed.), below the "Jaffa Gate;" and so also Riehm (s. v.). Sepp (*Jerusalem u. d. H. L. i.* 330) identifies it with the *Hammâm esh-Shefa* well in the Tyropoeon Valley; and Sayce (*PEFQ. Stat.* 1883, p. 217), placing it in the same valley, connects it with the rock-hewn conduit discovered by Sir C. Warren on the west side of the Temple Hill. [W.]

DRAM. [DARIC.]

DREAMS (חֲלֹמֹת; *ἐνύπνια*; *somnia*; *καθ' ὕπνον* in LXX., and *κατ' ὕπνιν* in St. Matthew, are generally used for "in a dream"). The Scriptural record of God's communication with man by dreams has been so often supposed to involve psychological difficulty, that it seems not out of place to refer briefly to the nature and characteristics of dreams generally, before enumerating and classifying the dreams recorded in Scripture.

I. The main difference between our sleeping and waking thoughts appears to lie in this,—that, in the former case, the perceptive faculties of the mind (the sensational powers,* and the imagination which combines the impressions derived from them) are active, while the reflective powers (the reason or judgment by which we control those impressions, and distinguish between those which are imaginary or subjective and those which correspond to, and are produced by, objective realities) are generally asleep. Milton's account of dreams (in *Par. Lost*, Book v. 100–113) seems as accurate as it is striking:—

"But know, that in the mind
Are many lesser faculties, that serve
Reason as chief: among these Fancy next
Her office holds; of all external things,
Which the five watchful senses represent,
She forms imaginations, airy shapes,
Which Reason, joining or disjoining, frames
All what we affirm, or what deny, and call
Our knowledge or opinion; then retires
Into her private cell, when Nature sleeps."

* May not the aqueduct, with its long winding course from "Solomon's Pools," have been called the "Tannin," "Dragon," or "Monster," as the winding ascent to the fortresses of Masada was called "the Serpent"?

† These powers are to be carefully distinguished (as in Butler's *Analogy*, part i. ch. 1) from the organs through which they are exercised when we are awake.

Thus it is that the impressions of dreams are in themselves vivid, natural, and picturesque, occasionally gifted with an intuition beyond our ordinary powers, but strangely incongruous and often grotesque. The feeling of surprise or incredulity, which arises from a sense of incongruity, or of unlikeness to the ordinary course of events, is in dreams a thing almost unknown; and even the moral judgment, with its delight in good and horror of evil, is at least languid, if not altogether dormant. The mind seems to be surrendered to that power of association, by which, even in its waking hours, if it be inactive and inclined to "musing," it is often carried through a series of thoughts connected together by some vague and accidental association, until the reason, when it starts again into activity, is scarcely able to trace back the slender line of connexion. The difference is, that, in this latter case, we are aware that the connexion is of our own making, while in sleep it appears to be caused by an actual succession of events.

Such is usually the case; yet there is a class of dreams, seldom noticed and indeed less common, but recognised by the experience of many, in which the reason and conscience are not wholly asleep. In these cases the mind seems to look on as it were from without, and so to have a double consciousness: on the one hand we enter into the events of the dream, as though real, on the other we have a sense that it is but a dream, and that ere long we shall awake and its pageant pass away.

In either case the ideas suggested are accepted by the mind in dreams at once and inevitably, instead of being weighed and tested, as in our waking hours. But it is evident that the method of such suggestion is still undetermined, and in fact is no more capable of being accounted for by any single cause than the suggestion of waking thoughts. The material of these latter is supplied either by ourselves, through the senses, the memory, and the imagination, or by other men, generally through the medium of words, or lastly by the direct action of the Spirit of God, or of created spirits of orders superior to our own, on the spirit within us. So also it is in dreams. In the first place, although memory and imagination supply most of the material of dreams, yet physical sensations of cold and heat, of pain or of relief, even actual impressions of sound or of light, will often mould or suggest dreams, and the physical organs of speech will occasionally be made use of to express the emotions of the dreamer. In the second place, instances have been known where a few words whispered into a sleeper's ear have produced a dream corresponding to their subject. On these two points experience gives undoubted testimony; as to the third, it can, from the nature of the case, speak but vaguely and uncertainly. But modern psychological investigation certainly seems to disclose to us the reality of a secret power of one spirit upon another, exercised by means utterly mysterious to us. Nor can we dismiss as merely delusive the many records extant of strange prophetic intuition in dreams, beyond the limits of the mind's own ordinary insight. The Scripture, as usual, goes beyond these doubtful and hesitating results of speculation. Viewing as it does all human life from a Divine standpoint, it declares, not as any strange thing,

but as a thing of course, that the influence of the Spirit of God upon the soul extends to its sleeping as well as its waking thoughts. It declares that God communicates with the spirit of man directly in dreams, and also that He permits created spirits to have a like communication with it. Its declaration is to be weighed, not as an isolated thing, but in connexion with the general doctrine of spiritual influence; because any theory of dreams must be regarded as a part of the general theory of the origination of all thought.

II. It is, of course, with this last class of dreams that we have to do in Scripture. The dreams of memory or imagination are indeed referred to in Eccles. v. 3, Is. xxix. 8; but it is the history of the Revelation of the Spirit of God to the spirit of man, whether sleeping or waking, which is the proper subject of Scripture itself.

It must be observed that, in accordance with the principle enunciated by St. Paul in 1 Cor. xiv. 15, dreams, in which the understanding is asleep, are recognised indeed as a method of Divine Revelation, but placed below the vision of prophecy, in which the understanding plays its part.* It is true that the Book of Job, standing as it does on the basis of "natural religion," dwells on dreams and "visions in deep sleep" as the chosen method of God's revelation of Himself to man (see Job iv. 13, vii. 14, xiii. 15). But in Num. xii. 6; Deut. xiii. 1, 3, 5; Jer. xxvii. 9; Joel ii. 28, &c., dreamers of dreams, whether true or false, are placed below "prophets," and even below "diviners;" and similarly in the climax of 1 Sam. xxviii. 6, we read that "the Lord answered Saul not, neither by dreams, nor by Urim [by symbol], nor by prophets." Under the Christian dispensation, while we read frequently of trances (*ecstasies* and visions (*ὁρασίαι, ὁράματα*), dreams are never referred to as vehicles of Divine revelation. In exact accordance with this principle are the actual records of the dreams sent by God. The greater number of such dreams were granted for prediction or for warning, to those who were aliens to the Jewish covenant. Thus we have the record of the dreams of Abimelech (Gen. xx. 3-7), of Laban (Gen. xxxi. 24), of the chief butler and baker (Gen. xl. 5), of Pharaoh (Gen. xli. 1-8), of the Midianite (Judg. vii. 13), of Nebuchadnezzar (Dan. ii. 1, &c., iv. 10-18), of the Magi (Matt. ii. 12), and of Pilate's wife (Matt. xxvii. 19). Many of these dreams, moreover, were symbolical and obscure, so as to require an interpreter. And, where dreams are recorded as means of God's Revelation to His chosen servants, they are almost always referred to the periods of their earliest and most imperfect knowledge of Him. So it is in the case of Abraham (Gen. xv. 12, and perhaps vv. 1-9), of Jacob (Gen. xxviii. 12-15), of Joseph (Gen. xxxvii. 5-10), of Solomon (1 K. iii. 5), and, in the N. T., of Joseph (Matt. i. 20; ii. 13, 19, 22). It is to be observed, moreover, that they belong especially to the earliest age, and become less frequent as the revelations

* The same order, as being the natural one, is found in the earliest record of European mythology—

'Αλλ' αὖτ' ἐν δὴ τῶν μάλιστα κρείστων, ἢ ἑσπέρῃ
'Η καὶ ἀνέροισιν, καὶ γὰρ τὸν ἄνδρα τὸν Διὸς ἔστυ.
HOM. IL. I. 63.

of prophecy increase. The only exception to this is found in the dreams and "visions of the night" given to Daniel (ii. 19, vii. 1), apparently designed to meet the Chaldean belief in prophetic dreams and in the power of interpretation, putting to shame its errors and superstitions, and yet bringing out the truth latent therein (cp. St. Paul's miracles at Ephesus, Acts xix. 11, 12, and their effect, *vs.* 18-20).

The general conclusion therefore is, first, that the Scripture claims the dream, as it does every other action of the human mind, as a medium through which God may speak to man either directly, and specially, or indirectly in virtue of a general influence upon all his thoughts; and secondly, that it lays far greater stress on that Divine influence by which the understanding also is affected, and leads us to believe that as such influence extends more and more, revelation by dreams, unless in very peculiar circumstances, might be expected to pass away. [A. B.]

DRESS. This subject includes the following particulars:—1. Materials. 2. Colour and decoration. 3. Names, forms, and mode of wearing the various articles. 4. Special usages relating thereto. 1. The materials were various, and multiplied with the advance of civilisation. The earliest and simplest robe was made out of the leaves of a tree (תַּרְנֶמֶץ, A. V. "fig-tree"—and cp. the present Arabic name for the fig, *tin*, or *teen*), portions of which were sewn together, so as to form an apron (Gen. iii. 7). Ascetic Jews occasionally used a similar material in later times. Josephus (*Vita*, § 2) records this of Banua (ἐσθίοντι μὲν ἀπὸ δένδρων χρώμενοι); but whether it was made of the leaves, or the bark, is uncertain. After the Fall, the skins of animals supplied a more durable material (Gen. iii. 21), which was adapted to a rude state of society, and is stated to have been used by various ancient nations (Diod. Sic. i. 43, ii. 38; Arrian, *Ind.* cap. 7, § 3). Skins were not wholly disused at later periods: the *addereth* (תַּרְנֶמֶץ) worn by Elijah appears to have been the skin of a sheep or some other animal with the wool left on: in the LXX. the word is rendered *μηλωτή* (1 K. xix. 13, 19; 2 K. ii. 13), *δορά* (Gen. xiv. 25), and *δέφρις* (Zech. xiii. 4); and it may be connected with *δορά* etymologically (Saalschütz, *Archæol.* i. 19); Gesenius, however, prefers the notion of *amplitude*, תַּרְנֶמֶץ, in which case it = תַּרְנֶמֶץ (Micah ii. 8; *Thesaur.* p. 29). The same material is implied in the description (עֹרֹת שֶׁבַע עֲרֵבִים; *ἀνὴρ δασύς*, LXX.; A. V. "hairy man," 2 K. i. 8), though these words may also be understood of the hair of the Prophet; and in the comparison of Esau's skin to such a robe (Gen. xiv. 25). It was characteristic of a Prophet's office from its mean appearance (Zech. xiii. 4; cp. Matt. vii. 15). Pelisses of sheep-skin still form an ordinary article of dress in the East (Burckhardt's *Notes on Bedouins*, i. 50). The *addereth* worn by the

king of Nineveh (Jonah iii. 6), and the "goodly Babylonish garment" found at Ai (Josh. vii. 21), were of a different character, either robes trimmed with valuable furs, or the skins themselves ornamented with embroidery. The art of weaving hair was known to the Hebrews at an early period (Ex. xxvi. 7; xxxv. 6); the sackcloth used by mourners was of this material [SACKCLOTH], and by many writers the *addereth* of the prophets is supposed to have been such. John the Baptist's robe was of camel's hair (Matt. iii. 4), and a similar material was in common use among the poor of that day (Joseph. *B. J.* i. 24, § 3), probably of goats' hair, which was employed in the Roman *cilicium*. At what period the use of wool, and of still more artificial textures, such as cotton and linen, became known, is uncertain: the first of these, we may presume, was introduced at a very early period, the flocks of the pastoral families being kept partly for their wool (Gen. xxxviii. 12): it was at all times largely employed, particularly for the outer garments (Lev. xviii. 47; Deut. xxii. 11; Job xxxi. 20; Prov. xxvii. 26, xxxi. 13; Ezek. xxxiv. 3). [WOOL.] The occurrence of the term *ctoneth* in the Book of Genesis (iii. 21; xxvii. 3, 23) seems to indicate an acquaintance, even at that early day, with the finer materials: for that term, though significant of a particular robe, originally appears to have referred to the material employed (the root being preserved in our *cotton*; cp. Bohlen's *Introd.* ii. 51; Saalschütz, *Archæol.* i. 8), and was applied by the later Jews to flax or linen, as stated by Josephus (*Ant.* iii. 7, § 2, *ἡθεμένη μὲν καλεῖται. Ἄλγεον τοῦτο σημαίνει, χέτον γὰρ τὸ ἄλινον ἡμεῖς καλοῦμεν*). No conclusion, however, can be drawn from the use of the word: it is evidently applied generally, and without any view to the material, as in Gen. iii. 21. It is probable that the acquaintance of the Hebrews with linen, and perhaps cotton, dates from the period of the captivity in Egypt, when they were instructed in the manufacture (1 Ch. iv. 21). After their return to Palestine we have frequent notices of linen, the finest kind being named *shesh* (שֶׁשׁ), and at a later period *butz* (בִּזְז), the latter a word of Syrian and the former of Egyptian origin, and each indicating the quarter whence the material was procured: the term *chûr* (חִיר) was also applied to it from its brilliant appearance (Is. xix. 9; Esth. i. 6, viii. 15). It is the *βύσσος* of the LXX. and the N. T. (Luke xli. 19; Rev. xviii. 12, 16), and the "fine linen" of the A. V. It was used in the vestments of the high-priests (Ex. xxviii. 5 ff.), as well as by the wealthy (Gen. xli. 42; Prov. xxxi. 22; Luke xiv. 19). [LINEN.] A less costly kind was named *bad* (בַּד; *λίνεος*), which was used for certain portions of the high-priest's dress (Ex. xxviii. 42; Lev. xvi. 4, 23, 32), and for the ephods of Samuel (1 Sam. ii. 18) and David (2 Sam. vi. 14): it is worthy of notice, in reference to its quality and appearance, that it is the material in which Angels are represented (Ezek. ix. 3, 11; x. 2, 6, 7; Dan. x. 5, xii. 6; Rev. xv. 6). A coarser kind of linen, termed *ὑμέλιον* (Ecclus. xl. 4), was used by the very poor [LINEN]. The Hebrew term *sadin* (סִידָן; cp. *σιδάων*, and *satin*) expresses a fine kind of linen, especially

* The sheep-skin coat is frequently represented in the sculptures of Khorsabad: it was made with sleeves, and was worn over the tunic: it fell over the back, and terminated in its natural state. The people wearing it have been identified with the Sagartii (Bonomi's *Nineveh*, p. 193).

adapted for summer wear, as distinct from the *saraballa*, which was thick (Talmud, *Menach.* p. 41, 1). What may have been the distinction between *shesh* and *sadin* (Prov. xxxi. 22, 24) we know not: the probability is that the latter name passed from the material to a particular kind of robe. Silk was not introduced until a very late period (Rev. xviii. 12): the term *meshi* (משי; τριχαπτον; Ezek. xvi. 10) is of doubtful meaning [SILK]. The use of a mixed material (קנעוץ; κβηλον, i.e. *spurious*, LXX.; ἀντιδιακείμενον, Aquil.; ἐριόλιον, Gr. Ven.), such as wool and flax, was forbidden (Lev. xix. 19; Deut. xxii. 11), on the ground, according to Josephus (*Ant.* iv. 8, § 11), that such was reserved for the priests, or as being a practice usual among idolaters (Spencer, *Leg. Heb. Rit.* ii. 32), but more probably with the view of enforcing the general idea of purity and simplicity.

2. Colour and decoration. The prevailing colour of the Hebrew dress was the natural white of the materials employed, which might be brought to a high state of brilliancy by the art of the fuller (Mark ix. 3). Some of the terms applied to these materials (e.g. עֲשֵׂי יָגֵז, חָפ) are connected with words significant of whiteness, while many of the allusions to garments have special reference to this quality (Job xxxviii. 14; Ps. civ. 1, 2; Is. lxiii. 3): white was held to be peculiarly appropriate to festive occasions (Eccles. ix. 8; cp. *Hor. Sat.* ii. 2, 60), as well as symbolical of purity (Rev. iii. 4, 5; iv. 4; vii. 9, 13). It is uncertain when the art of dyeing became known to the Hebrews; the *etoneth passim* worn by Joseph (Gen. xxxvii. 3, 23) is variously taken to be either a "coat of divers colours" (ποικίλος; *polymita*, Vulg.; cp. the Greek πάσσειν, *Il.* iii. 126, xxii. 441), or a tunic furnished with sleeves and reaching down to the ankles, as in the Versions of Aquila, ἁσπραγλέως, καρπώτος, and of Symmachus, χειριδωτός, and in the Vulg. (2 Sam. xiii. 18), *talaris*, and as described by Josephus (*Ant.* vii. 8, § 1). The latter is probably the correct sense, in which case we have no evidence of the use of variegated robes previously to the sojourn of the Hebrews in Egypt, though the notice of scarlet thread (Gen. xxxviii. 28) implies some acquaintance with dyeing, and the light summer robe (עֲשֵׂי יָגֵז; θέριστρον; *veil*, A. V. and R. V.) worn by Rebecca and Tamar (Gen. xxiv. 65; xxxviii. 14, 19) was probably of an ornamental character. The Egyptians had carried the art of weaving and embroidery to a high state of perfection, and from them the Hebrews learned various methods of producing decorated stuffs. The elements of ornamentation were—(1) weaving with threads previously dyed (Ex. xxv. 25; cp. Wilkinson, *Anc. Egypt.* ii. 79–81 [1878]); (2) the introduction of gold thread or wire (Ex. xxviii. 6 sq.); (3) the addition of figures, probably of animals and hunting or battle scenes (cp. Layard, *li.* 297), in the case of garments, in the same manner as the cherubim were represented in the curtains of the Tabernacle (Ex. xxvi. 1, 31; xxvii. 8, 35). These devices may have been either woven into the stuff, or cut out of other stuff and afterwards attached by needlework: in the former case the pattern would appear only on one side, in the

latter the pattern might be varied. Such is the distinction, according to Talmudical writers, between *cunning-work* and *needlework*, or as marked by the use of the singular and dual number, מְחָרָךְ, *needlework*, and מְחָרָרָךְ, *needlework* [R. V. "embroidery"] on both sides (Judg. v. 30, A. V.), though the latter term may after all be accepted in a simpler way as a dual = *two embroidered robes* (Bertheau, *Comm. in loco*). The account of the corset of Amasis (Herod. iii. 47) illustrates the processes of decoration described in Exodus. Robes decorated with gold (מִלְּבָרָךְ, Pa. xiv. 13), and at a later period with silver thread (Joseph. *Ant.* xix. 8, § 2; cp. Acts xii. 21), were worn by royal personages: other kinds of embroidered robes were worn by the wealthy both of Tyre (Ezek. xvi. 13) and Palestine (Judg. v. 30; Pa. xiv. 14). The art does not appear to have been maintained among the Hebrews: the Babylonians and other Eastern nations (Josh. vii. 21; Ezek. xxvii. 24), as well as the Egyptians (Ezek. xxvii. 7), excelled in it. Nor does the art of dyeing appear to have been followed up in Palestine: dyed robes were imported from foreign countries (Zeph. i. 8), particularly from Phoenicia, and were not much used on account of their expensiveness; purple (Prov. xxxi. 22; Luke xvi. 19) and scarlet (2 Sam. i. 24) were occasionally worn by the wealthy. The surrounding nations were more lavish in their use of them: the wealthy Tyrians (Ezek. xxvii. 7), the Midianitish kings (Judg. viii. 26), the Assyrian nobles (Ezek. xxiii. 6), and Persian officers (Esth. viii. 15), are all represented in purple. The general hue of the Persian dress was more brilliant than that of the Jews: hence Ezekiel (xiii. 12) describes the Assyrians as לְבָשׁ מְכֻלָּךְ, lit. *clothed in perfection* (A. V. and R. V. "clothed most gorgeously"); according to the LXX. ἐνδύμενα, wearing robes with *some borders*. With regard to the head-dress in particular, described as סִמְלִית (ῥάπα *barrai*; A. V. and R. V. "dyed attire;" cp. *Or. Met.* xiv. 654, *mitra picta*), some doubt exists whether the word rendered "dyed" does not rather mean *flowing* (Ges. *Thesaur.* p. 542; Layard, *ii.* 308).

3. The names, forms, and mode of wearing the robes. It is difficult to give a satisfactory account of the various articles of dress mentioned in the Bible: the notices are for the most part incidental, and refer to a lengthened period of time, during which the fashions must have frequently changed: while the collateral sources of information, such as sculpture, painting, or contemporary records, are but scanty. The general characteristics of Oriental dress have indeed preserved a remarkable uniformity in all ages: the modern Arab dresses much as the ancient Hebrew did; there are the same flowing robes, the same distinction between the outer and inner garments, the former heavy and warm, the latter light, adapted to the rapid and excessive changes of temperature in those countries; and there is the same distinction between the costume of the rich and the poor, consisting in the multiplication of robes of a finer texture and more ample dimensions. Hence the numerous illustrations of ancient costume, which may be drawn from the usages of modern Orientals,

supplying in great measure the want of contemporaneous representations. With regard to the figures which some have identified as Jews in Egyptian paintings and Assyrian sculptures, we cannot but consider the evidence insufficient. The figures in the painting at Beni Hassan, delineated by Wilkinson (*Anc. Egypt.*¹, ii. 296), and supposed by him to represent the arrival of Joseph's brethren, are dressed in a manner at variance with our ideas of Hebrew costume: the more important personages wear a double tunic, the upper one constructed so as to pass over the left shoulder and under the right arm, leaving the right shoulder exposed: the servants wear nothing more than a skirt or kilt, reaching from the loins to the knee. Wilkinson suggests some collateral reasons for doubting whether they were really Jews: to which we may add a further objection that the presents, which these persons bring with them, are not what we should expect from Gen. xliii. 11. Certain figures inscribed on the face of a rock at *Behistun*, near Kermanshah, were supposed by Sir R. K. Porter to represent Samaritans captured by Shalmaneser: they are given in Vaux's *Nineveh*, p. 372. These sculptures are now recognised as of a later date, and the figures evidently represent people of different nations, for the tunics are alternately short and long. In another instance the figures are simply dressed in a short tunic, with sleeves reaching nearly to the elbow, and confined at the waist by a girdle, a style of dress which was so widely spread throughout the East that it is impossible to pronounce what particular nation they may have belonged to: the style of head-dress seems an objection to the supposition that they are Jews. These figures are given in Bonomi's *Nineveh*, p. 381.

The costume of the men and women was very similar: there was sufficient difference, however, to mark the sex, and it was strictly forbidden to a woman to wear the appendages (לָבָד; *σκεῖν*), such as the staff, signet-ring, and other ornaments, or, according to Josephus (*Ant.* iv. 8, § 43), the weapons of a man; as well as to a man to wear the outer robe (חֵטָה) of a woman (*Deut.* xxii. 5): the reason of the prohibition, according to Maimonides (*Mor. Nebuch.* iii. 37), being that such was the practice of idolaters (cp. Carpzov. *Appar.* p. 514); but more probably it was based upon the general principle of propriety. We shall first describe the robes which were common to the two sexes, and then those which were peculiar to women.

(1.) The *ketoneth* (כֵּתָנֶת, cp. the Greek χιτών) was the most essential article of dress. It was a closely-fitting garment, resembling in form and use our *shirt*, rather than the *coat* of the A. V. and R. V. The material of which it was made was either wool, cotton, or linen. From Josephus's observation (*Ant.* iii. 7, § 4) with regard to the *meil*, that it was *ὅκ ἐκ δυνὸν περιρραμδρῶν*, we may probably infer that the ordinary *ketoneth* or tunic was made in two pieces, which were sewn together at the sides. In this case the χιτὼν ἄρραπος worn by our Lord (*John* xix. 23) was either a singular one, or, as is more probable, was the upper tunic or *meil*. The primitive *ketoneth* was without sleeves and reached only to the knee, like the

Doric χιτὼν; it may also have been, like the latter, partially opened at one side, so that a person in rapid motion was exposed (*2 Sam.* vi. 20). Another kind, which we may compare with the Ionian χιτὼν, reached to the wrists and ankles: such was probably the *ketoneth passim* worn by Joseph (*Gen.* xxxvii. 3, 23) and Tamar (*2 Sam.* xiii. 18), and that which the priests wore (*Joseph. Ant.* iii. 7, § 2). It was in either case kept close to the body by a girdle [GIRDLE], and the fold formed by the overlapping of the robe served as an inner pocket, in which a letter or any other small article might be carried (*Joseph. Ant.* xvii. 5, § 7). A person wearing the *ketoneth* alone was described as *נָגַד*, *naked*, A. V.: we may compare the use of the term *γυμνὰ* as applied to the Spartan virgins (*Plut. Lyc.* 14), of the Latin *nudus* (*Virg. Georg.* i. 299), and of our expression *stripped*. Thus it is used of Saul after having taken off his upper garments (יָצַד, *1 Sam.* xix. 24); of Isaiah (*Is.* xx. 2) when he had put off his sackcloth, which was usually worn over the tunic (cp. *Jon.* iii. 6), and only on special occasions next the skin (*2 K.* vi. 30); of a warrior who has cast off his military cloak (*Amos* ii. 16; cp. *Liv.* iii. 23, *inermes nudique*); and of St. Peter without his fisher's coat (*John* xxi. 7). The same expression is elsewhere applied to the poorly clad (*Job* xxii. 6; *Is.* lviii. 7; *Jas.* ii. 15).

Fig. 1 on the next page represents the simplest style of Oriental dress, a long loose shirt or *ketoneth* without a girdle, reaching nearly to the ankle. The same robe, with the addition of the girdle, is shown in fig. 4.

In fig. 2 we have the ordinary dress of the modern Bedouin; the tunic overlaps the girdle at the waist, leaving an ample fold, which serves as a pocket. Over the tunic he wears the *abba*, or striped plaid, which completes his costume.

(2.) The *sadin* (סָדִין) appears to have been a wrapper of fine linen (σινδών, LXX.), which might be used in various ways, but especially as a night-shirt (*Mark* xiv. 51; cp. Schleusner and Grimm-Thayer,¹ *Lex. in N. T. s. v.*). The Hebrew term is given in the Syriac N. T. as = σινδάριον (*Luke* xix. 20) and λειρίον (*John* xiii. 4). The material or robe is mentioned in *Judg.* xiv. 12, 13 ("sheet," marg. *shirt*, A. V.; "linen garment," R. V.); *Prov.* xxxi. 24, and *Is.* iii. 23 ("fine linen," A. V. and R. V.); but in none of these passages is there anything to decide its specific meaning. The Talmudical writers occasionally describe the *talith* under that name, as being made of fine linen; hence Lightfoot (*Exercitationes* on *Mark* xiv. 51) identifies the σινδών worn by the young man as a *talith*, which he had put on in his haste without his other garments.

(3.) The *meil* (מֵיל) was an upper or second tunic, the difference being that it was longer than the first. It is hence termed in the LXX. ὑποδόρης ποδῆρης, and probably in this sense the term is applied to the *ketoneth passim* (*2 Sam.* xiii. 18), implying that it reached down to the feet. The sacerdotal *meil* is described elsewhere [PRIEST]. As an article of ordinary dress it was worn by kings (*1 Sam.* xxiv. 4), prophets (*1 Sam.* xxviii. 14), nobles (*Job* i. 20), and youths (*1 Sam.* li. 19). It may, however, be

doubted whether the term is used in its specific sense in these passages, and not rather in its broad etymological sense (from *למעל*, to cover), for any robe that chanced to be worn over the *cetoneth*. In the LXX. the renderings vary between *πενδύτης* (1 Sam. xviii. 4; 2 Sam. xiii. 18; 1 Sam. ii. 19, Theodot.), a term properly applied to an upper garment, and specially used in John xxi. 7 for the linen coat worn by the Phœnician and Syrian fishermen (Theophyl. in loco), *δραβος* (1 Sam. ii. 19, xv. 27, xxiv. 4, 11, xxviii. 14; Job xxix. 14), *ιμάτια* (Job i. 20), *σάβλη* (1 Ch. xv. 27; Job ii. 12), and *προδύτης* (Exod. xxxix. 21; Lev. viii. 7), showing that generally speaking it was regarded as an upper garment. This further appears from the passages in which notice of it occurs: in 1 Sam. xviii. 4 it is the "robe" which Jonathan first takes off; in 1 Sam. xxviii. 14 it is the "mantle" in which Samuel is enveloped; in 1 Sam. xv. 27 it is the "mantle," the skirt of which is

rent (cp. 1 K. xi. 30, where the *מכיל* is similarly treated); in 1 Sam. xxiv. 4 it is the "robe," under which Saul slept (generally the *רנן* was so used); and in Job i. 20, ii. 12, it is the "mantle" which he rents (cp. Ezra ix. 3, 5): in these passages it evidently describes an outer robe, whether the *simlah*, or the *meil* itself used as a *simlah*. Where two tunics are mentioned (Luke iii. 11) as being worn at the same time, the second would be a *meil*; travellers generally wore two (Joseph. *Ant.* xvii. 5, § 7), but the practice was forbidden to the disciples (Matt. x. 10; Luke ix. 3).

The dress of the middle and upper classes in modern Egypt (fig. 3) illustrates the custom of the Hebrews. In addition to the shirt, they wear a long vest of striped silk and cotton, called *kafṭān*, descending to the ankles, and with ample sleeves, so that the hands may be concealed at pleasure. The girdle surrounds this vest. The outer robe consists of a long;

Fig. 2. A Bedouin. (Lynch, *Dead Sea*.)

Fig. 3. An Egyptian of the upper classes. (Lane.)

cloth coat, called *gibbeh*, with sleeves reaching nearly to the wrist. In cold weather the *abba* is thrown over the shoulders.

(4.) The ordinary outer garment consisted of a quadrangular piece of woollen cloth, probably resembling in shape a Scotch plaid. The size and texture would vary with the means of the wearer. The Hebrew terms referring to it are — *simlah* (*שִׁמְלָה*), occasionally *שִׁמְלָה*, which appears to have had the broadest sense, and sometimes is put for clothes generally (Gen. xxxv. 2, xxxvii. 34; Ex. iii. 22, xxii. 9; Deut. x. 18; Is. iii. 7, iv. 1), though once used specifically of the warrior's cloak (Is. ix. 5); *beged* (*בִּגְד*), which is more usual in speaking of robes of a handsome and substantial character (Gen. xxvii. 15, xli. 42; Ex. xxviii. 2; 1 K. xxii. 10; 2 Ch. xviii. 9; Is. lxiii. 1); *cesuth* (*צִסְוּת*), appropriate to passages where covering or protection is the prominent idea (Ex. xxii. 26; Job xxvi. 6, xxxi. 19); and lastly *lebūsh* (*לְבוּשׁ*), usual in

poetry, but specially applied to a warrior's cloak (2 Sam. xx. 8), priests' vestments (2 K. x. 22) and royal apparel (Esth. vi. 11; viii. 15). A

cognate term (*malbush*, *מַלְבוּשׁ*) describes specifically a state-dress, whether as used in a royal household (1 K. x. 5; 2 Ch. ix. 4), or for religious festivals (2 K. x. 22): elsewhere it is used generally for robes of a handsome character (Job xxvii. 16; Is. lxiii. 3; Ezek. xvi. 13; Zeph. i. 8). Another term, *mad* (*מַד*), with its derivatives *מִדָּה* (Pa. cxxxiii. 2) and *מִדָּה* (2 Sam. x. 4; 1 Ch. xix. 4), is expressive of the length of the Hebrew garments (1 Sam. iv. 12; xvii. 4), and is specifically applied to a long cloak (Judg. iii. 16; 2 Sam. xx. 8), and to the priest's coat (Lev. vi. 10). The Greek terms *ιμάτιον* and *σάβλη* express the corresponding idea, the latter being specially appropriate to robes of more than ordinary grandeur (1 Macc. x. 21, xiv. 9; Mark xii. 38, xvi. 5; Luke xv. 22, xx. 46; Rev. vi. 11, vii. 9, 13); the *χιτών* and *ιμάτιον* (*tunica*, pal-

lium, Vulg.; *coat, cloak*, A. V.) are brought into juxtaposition in Matt. v. 40 and Acts ix. 39. The *beged* might be worn in various ways, either wrapped round the body, or worn over the shoulders, like a shawl, with the ends or "skirts" (מִטְפָּחָת; *peribolus*; *anguli*) hanging down in front; or it might be thrown over the head, so as to conceal the face (2 Sam. xv. 30; Esth. vi. 12). The ends were skirted with a fringe and bound with a purple riband (Num. xv. 38): it was confined at the waist by a girdle, and the fold (סִינ; *κόλπος*; *sinus*), formed by the overlapping of the robe, served as a pocket in which a considerable quantity of articles might be carried (2 K. iv. 39; Ps. lxxix. 12; Hag. ii. 12; Niebuhr, *Description*, p. 56), or as a purse (Prov. xvii. 23, xxi. 14; Is. lxxv. 6, 7; Jer. xxxii. 18; Luke vi. 38).

The ordinary mode of wearing the outer robe, called *abba* or *abayah*, at the present time, is

exhibited in figs. 2 and 5. The arms, when falling down, are completely covered by it, as in fig. 5: but in holding any weapon, or in active work, the lower part of the arm is exposed, as in fig. 2.

The dress of the women differed from that of the men in regard to the outer garment, the *ectoneth* being worn equally by both sexes (Cant. v. 3). The names of their distinctive robes were as follows:—(1) *mitpachath* (מִטְפָּחָת; *peribolus*; *pallium*, *lintheamen*; *veil*, *wimple*, A. V.), a kind of shawl (Ruth iii. 15; Is. iii. 22); (2) *maatapha* (מַאֲתָפָה; *palliolum*; *mantle*, A. V.), another kind of shawl (Is. iii. 22), but, how differing from the one just mentioned, we know not; the etymological meaning of the first name is *expansion*, of the second *enveloping*: (3) *tsaiph* (צֵיפ; *θήριςτρον*; *veil*, A. V.), a robe worn by Rebecca on approaching Isaac (Gen. xxiv. 65), and by Tamar when she assumed the guise of a

Fig. 7. A woman of the Southern Province of Upper Egypt. (Lane.)

harlot (Gen. xxxviii. 14, 19); it was probably, as the LXX. represents it, a light summer dress of handsome appearance (*περιέβαλε τὸ θέριςτρον καὶ ἐκαλλωπίσατο*, Gen. xxxviii. 14), and of ample dimensions, so that it might be thrown over the head at pleasure: (4) *rudid* (רִדִּיד; A. V. "veil"), a similar robe (Is. iii. 23; Cant. v. 7; R. V. "mantle"), and substituted for the *tsaiph* in the Chaldee Version: we may conceive of these robes as resembling the *peplum* of the Greeks, which might be worn over the head, as represented in *Dict. of Gr. and Rom. Antig.* ii. 321, or again as resembling the *habarah* and *mulāyeh* of the modern Egyptians (Lane, i. 73, 75); (5) *pethigil* (פֶּתִיגִיל; *χίτων μεσοστέφυπος*; *stomacher*, A. V.), a term of doubtful origin, but probably significant of a gay holiday dress (Is. iii. 24); to the various explanations enumerated by Gesenius (*Thesaur.* p. 1137), we may add one proposed by Saalehchütz (*Archaeol.* i. 31), פֶּתִיגִיל, *wide* or *foolish*, and גִּיל, *pleasure*, in which case it = *unbridled pleasure*,

and has no reference to dress at all: (6) *gilyonim*

(גִּילְיוֹנִים, Is. iii. 23), also a doubtful word (see MV.¹¹), explained in the LXX. as a transparent dress, i.e. of gauze (*διαφανή λακωνικὴ*); Schroeder (*de Vest. mul. Heb.* p. 311) supports this view, but more probably the word means, as in the A. V., "glasses," R. V. "hand-mirrors." The garments of females were terminated by an ample border or fringe (שֵׁט, שֵׁטֶל; *σπίρσια*; *skirts*), which concealed the feet (Is. xlvii. 2; Jer. xiii. 22).

Figs. 6 and 7 illustrate some of the peculiarities of female dress: the former is an Egyptian woman (in her walking dress); the latter represents a dress, probably of great antiquity, still worn by the peasants in the south of Egypt: the outer robe, or *hulaleeyeh*, is a large piece of woollen stuff wound round the body, the upper parts being attached at the shoulders: another piece of the same stuff is used for the head-veil, or *tarhah*.

Having now completed our description of

Hebrew dress, we add a few remarks relative to the selection of equivalent terms in our own language. It must at once strike every Biblical student as a great defect in our A. V.—a defect not altogether removed in the R. V.—that the same English word should represent various Hebrew words: e.g. that "veil" should be promiscuously used for *radid* (Is. iii. 23), *tsaiph* (Gen. xiv. 65), *mitpachath* (Ruth iii. 15; R. V. "mantle"), *masveh* (Ex. xxiv. 33); "robe" for *meil* (1 Sam. xviii. 4), *cetoneh* (Is. xxii. 21), *addereth* (Jonah iii. 6), *salmah* (Micah ii. 8); "mantle" for *meil* (1 Sam. xv. 27; R. V. "robe"), *addereth* (1 K. xix. 13), *maatapha* (Is. iii. 22); and "coat" for *meil* (1 Sam. ii. 19; R. V. "robe"), *cetoneh* (Gen. iii. 21): and conversely that different English words should be promiscuously used for the same Hebrew one; *meil* being translated "coat," "robe," "mantle"; *addereth* "robe," "mantle." Uniformity would be desirable, in so far as it could be attained, so that the English reader might understand that the same Hebrew term occurred in the original text, where the same English term was found in the translation. Beyond uniformity, correctness of translation would also be desirable: the difficulty of attaining this in the subject of dress, with regard to which the customs and associations are so widely at variance in our own country and in the East, is very great. Take, for instance, the *cetoneh*: at once an under-garment, and yet not unfrequently worn without anything over it; a *shirt*, as being worn next the skin; and a *coat*, as being the upper garment worn in a house: deprive the Hebrew of his *cetoneh*, and he was positively naked; deprive the Englishman of his *coat*, and he has under-garments still. The *beged* again: in shape probably like a Scotch *plaid*, though the use of such a term would not be intelligible to the minds of English peasants; in use unlike any garment with which we are familiar, for we only wear a *great-coat* or a *cloak* in bad weather, whereas the Hebrew and his *beged* were inseparable. With such difficulties attending the subject, any attempt to render the Hebrew terms must be, more or less, a *compromise* between correctness and modern usage; and the English terms which we are about to propose must be regarded merely in the light of suggestions. *Cetoneh* answers in many respects to "frock;" the sailor's "frock" is constantly worn next the skin, and either with or without a coat over it; the "smock-frock" was once familiar as an upper-garment. In shape and material these correspond with *cetoneh*, and, like it, the term "frock" is applied to both sexes. In the sacerdotal dress a more technical term might be used: "vestment," in its specific sense as = the chasuble, or *casula*, would represent it very aptly. *Meil* may perhaps be best rendered "gown," for this too applies to both sexes, and, when to men, always in an official sense, as the academic gown, the alderman's gown, the barrister's gown, just as *meil* appears to have represented an official, or at all events a special, dress. In sacerdotal dress "alb" exactly meets it, and retains still, in the Greek Church, the very name, *poderis*, by which the *meil* is described in the LXX. The sacerdotal ephod approaches, perhaps, most nearly to the term "pall," the *εμφορίον* of the Greek Church,

which we may compare with the *εμφορίον* of the LXX. *Addereth* answers in several respects to "pelisse," although this term is now applied almost exclusively to female dress. *Sadim* = "linen wrapper." *Simlah* we would render "garment," and in the plural "clothes," as the broadest term of the kind; *beged*, "vestment," as being of superior quality; *lebush*, "robe," as still superior; *mad*, "cloak," as being long; and *malbush*, "dress," in the specific sense in which the term is not unfrequently used as = *fine dress*. In female costume *mitpachath* might be rendered "shawl," *maatapha* "mantle," *tsaiph* "hand-some dress," and *radid* "cloak."

In addition to these terms, which we have thus far extracted from the Bible, we have in the Talmudical writers an entirely new nomenclature. The *talith* (טלית) is frequently noticed; it was made of fine linen, and had a fringe attached to it, like the *beged*; it was of ample dimensions, so that the head might be enveloped in it, as was usual among the Jews in the act

of prayer. The *kolban* (קולבין) was probably another name for the *talith*, derived from the Greek *καλβιον*; Epiphanius (i. 15) represents the *στολα* of the Pharisees as identical with the *Dalmatica* or the *Colobium*; the latter, as known to us, was a close tunic without sleeves.

The *chuluk* (חלוק) was a woollen shirt, worn as an under tunic. The *mactoreu* (מאטורין) was a mantle or outer garment (cp. *Lightfoot, Excitation* on Matt. v. 40; Mark xiv. 51; Luke ix. 3, &c.). Gloves (קפיה or קף) are also noticed (*Chelim*, xvi. 6; xxiv. 15; xxvi. 3), not, however, as worn for luxury, but for the protection of the hands in manual labour.

With regard to other articles of dress, see GIRDLE; HANDKERCHIEF; HEAD-DESS; HEN OF GARMENT; SANDALS; SHOES; VEIL.

The dresses of foreign nations are occasionally referred to in the Bible; that of the Babylonians is described in Dan. iii. 21 in terms which have been variously understood (see *Speaker's Comm.*,¹ Meinhold [in Strack u. Zöckler's *Kpf. Comm.*] in loco, and consult MV.¹¹), but which may be identified with the statements of Herodotus (i. 195; vii. 61) in the following manner:—

(1) The *sarbalin* (סרבלין; A. V. "coats," R. V. "hosen") = either *ἀνδρόπεδες* or *drapers*, or more probably, underclothing; (2) the *paish* (פיש; A. V. "hosen") = *αὐτὸν ὑποπαισιν* *αὐτὸν* or inner tunic (so R. V.; in marg., Or, *turbans*); (3) the *carbala* (כרבלא; A. V. "hat," R. V. "mantle") = *ἑλασ* *εἰσπεσε* *αὐτὸν*, or upper tunic, corresponding to the *meil* of the Hebrews; (4) the *lebush* (לבוש; A. V. "garment"), a general term for the rest of the dress worn by these three Jews, or = *χλαμύς* *λευκὴν* or cloak, which was worn, like the *beged*, over all. In addition to these terms, we have notice of a robe of state of fine linen, *ἐκκλησί* (ἑκκλησία; *διδμηνα*; *sericum pallium*), so called from its ample dimensions (Esth. viii. 15). The same expression is used for *purple garments* in the Chaldee of Ezek. xxvii. 16.

The references to Greek or Roman dress are few: the *χλαμύς* (2 Macc. xii. 35; Matt. xxvii.

28) was either the *paludamentum*, the military scarf of the Roman soldiery, or the Greek *chlamys* itself, which was introduced under the Emperors [*Dict. of Gr. & Rom. Ant.* art. CHLAMYS]; it was especially worn by officers. The travelling cloak (φελώνης) referred to by St. Paul (2 Tim. iv. 13) is generally identified with the Roman *pænula*, of which it may be a corruption; the

Talmudical writers have a similar name (פְּלִיטָה or פְּלִיטָה). It is, however, otherwise explained as a travelling case for carrying clothes or books (Conybeare, *St. Paul*, ii. 499).

4. The customs and associations connected with dress are numerous and important, mostly arising from the peculiar form and mode of wearing the outer garments. The *beged*, for instance, could be applied to many purposes besides its proper use as a vestment; it was sometimes used to carry a burden (Ex. xii. 34; Judg. viii. 25; Prov. xxx. 4), as Ruth used her shawl (Ruth iii. 15); or to wrap up an article (1 Sam. xxi. 9); or again as an *impromptu* saddle (Matt. xxi. 7). Its most important use, however, was a coverlet at night (Ex. xxiii. 27; Ruth iii. 9; Ezek. xvi. 8), whence the word is sometimes taken for bed-clothes (1 Sam. xix. 13; 1 K. i. 1): the Bedouin applies his *abba* to a similar purpose (Niebuhr, *Description*, p. 56). On this account a creditor could not retain it after sunset (Ex. xxii. 26; Deut. xxiv. 12, 13; cp. Job xxii. 6, xxiv. 7; Amos ii. 8). The custom of placing garments in pawn appears to have been very common, so much so that עֲבֹדָה *pledge* = a garment (Deut. xxiv. 12, 13); the accumulation of such pledges is referred to in Hab. ii. 6 (*that loadeth himself with עֲבֹדָה*, i.e. *pledges* [so R.V.]; where the A.V., following the LXX. and Vulg., reads עֲבֹדָה "thick clay"); this custom prevailed in the time of our Lord, who bids His disciples give up the *ιματίων*=*beged*, in which they slept, as well as the *χιτών* (Matt. v. 40). At the present day it is not unusual to seize the *abba* as compensation for an injury: an instance is given in Wortabet's *Syria*, i. 293.

The loose flowing character of the Hebrew robes admitted of a variety of symbolical actions; rending them was expressive of various emotions, as grief (Gen. xxxvii. 29, 34; Job i. 20; 2 Sam. i. 2) [MOURNING], fear (1 K. xxi. 27; 2 K. xxii. 11, 19), indignation (2 K. v. 7, xi. 14; Matt. xxvi. 65), or despair (Judg. xi. 35; Esth. iv. 1): generally the outer garment alone was thus rent (Gen. xxxvii. 34; Job i. 20, ii. 12), occasionally the inner (2 Sam. xv. 32), and occasionally both (Ezra ix. 3; Matt. xxvi. 65, compared with Mark xiv. 63). Shaking the garments, or shaking the dust off them, was a sign of renunciation (Acts xviii. 6); spreading them before a person, of loyalty and joyous reception (2 K. ix. 13; Matt. xxi. 8); wrapping them round the head, of awe (1 K. xix. 13), or of grief (2 Sam. xv. 30; Esth. vi. 12; Jer. xiv. 3, 4); casting them off, of excitement (Acts xxii. 23); laying hold of them, of supplication (1 Sam. xv. 27; Is. iii. 6, iv. 1; Zech. viii. 23).

The length of the dress rendered it inconvenient for active exercise; hence the outer garments were either left in the house by a person working close by (Matt. xxiv. 18) or were

thrown off when the occasion arose (Mark x. 50; John xiii. 4; Acts vii. 58); or, if this was not possible, as in the case of a person travelling, they were girded up (1 K. xviii. 46; 2 K. iv. 29, ix. 1; 1 Pet. i. 13): on entering a house, the upper garment was probably laid aside and resumed on going out (Acts xii. 8). In a sitting posture, the garments concealed the feet; this was held to be an act of reverence (Is. vi. 2; see Lowth's note). The proverbial expression in 1 Sam. xxv. 22; 1 K. xiv. 10, xxi. 21; 2 K. ix. 8, probably owes its origin to the length of the garments, which made another habit more natural (cp. Her. ii. 35; Xen. *Cyrop.* i. 2, § 16; Ammian. Marcell. xliii. 6); the expression is variously understood to mean the *lowest* or the *youngest* of the people (Gesen. *Thesaur.* p. 1397; Jahn, *Archaeol.* i. 8, § 120). To cut the garments short was the grossest insult that a Jew could receive (2 Sam. x. 4; the word there used מִדְּרָג is peculiarly expressive of the length of the garments). To raise the border or skirt of a woman's dress was a similar insult, implying her chasteity (Is. xlvii. 2; Jer. xiii. 22, 26; Nah. iii. 5).

The putting on and off of garments, and the ease with which it was accomplished, are frequently referred to; the Hebrew expressions for the first of these operations, as regards the outer robe, are לָבַשׁ, *to put on*, עָטָה, *כֶּסֶה*, and הֶעָטָה, lit. *to cover*, the last three having special reference to the amplitude of the robes; and for the second עָשָׂה, lit. *to expand*, which was the natural result of taking off a wide, loose garment. The ease of these operations forms the point of comparison in Ps. cii. 26; Jer. xliii. 12. In the case of closely-fitting robes the expression is הִלָּךְ, lit. *to gird*, which is applied to the ephod (1 Sam. ii. 18; 2 Sam. vi. 14), to sackcloth (2 Sam. iii. 31; Is. xxxii. 11; Jer. iv. 8); the use of the term may illustrate Gen. iii. 7, where the garments used by our first parents are called הַנְּלִי (A. V. "aprons"), probably meaning such as could be wound round the body (see marg. rendering). The converse term is הִלָּךְ, *to loosen* or *unbind* (Ps. xxx. 11; Is. xx. 2).

The number of suits possessed by the Hebrews was considerable: a single suit consisted of an under and upper garment, and was termed עֲרֵךְ בְּגָדִים (στολή *ιματίων*, i.e. *apparatus vestium*, LXX.; Judg. xvii. 10). Where more than one

is spoken of, the suits are termed לְבָשִׁים (ἀλλασσόμενα στολά; cp. Hom. *Od.* viii. 249, εἵματα ἐξημοιβά; *changes of raiment*, A. V.). These formed in ancient times one of the most usual presents among Orientals (Harmer, *Observations*, ii. 397 sq.); five (Gen. xiv. 22) and even ten changes (2 K. v. 5) were thus presented, while as many as thirty were proposed as a wager (Judg. xiv. 12, 19). The highest token of affection was to present the robe actually worn by the giver (1 Sam. xvii. 4; cp. Hom. *Il.* vi. 230; Harmer, ii. 388). The presentation of a robe in many instances amounted to installation or investiture (Gen. xli. 42; Esth. viii. 15; Is. xxii. 21; cp. Morier, *Second Journey*, p. 93); on the other hand, taking it away amounted to dismissal from office (2 Macc. iv. 38). The

production of the best robe was a mark of special honour in a household (Luke xv. 22). The number of robes thus received or kept in store for presents was very large, and formed one of the main elements of wealth in the East (Job xxvii. 16; Matt. vi. 19; Jas. v. 2), so that to *have clothing* = to be wealthy and powerful (Is. iii. 6, 7). On grand occasions the entertainer offered becoming robes to his guests (Trench on *Parables*, p. 231). Hence in large households a wardrobe (כִּלְתָּהּ) was required for their preservation (2 K. x. 22; cp. Harmer, ii. 382), superintended by a special officer, named שֹׁמֵר הַכִּלְתָּהּ, *keeper of the wardrobe* (2 Ch. xxxiv. 22). Robes reserved for special occasions are termed כִּלְתָּהּ (A. V. "changeable suits"; R. V. "the festival robes" in Is. iii. 22; A. V. "change of raiment," R. V. "rich apparel" in Zech. iii. 4), because laid aside when the occasion was past.

The colour of the garment was, as we have already observed, generally white; hence a spot or stain readily showed itself (Is. lxiii. 3; Jude 23; Rev. iii. 4); reference is made in Lev. xiii. 47 sq. to a greenish or reddish spot of a leprous character. Jahn (*Archaeol.* i. 8, § 135) conceives this to be not the result of leprosy, but the depredations of a small insect. Schilling (*de Lepra*, p. 192) states that human leprosy taints clothes, and adds *sunt maculae omnino indelebiles*; but Dillmann points out that the passage in Lev. does not necessarily allude to clothes thus infected (Knobel-Dillmann in loco). Frequent washings and the application of the fuller's art were necessary to preserve the purity of the Hebrew dress. [SOAP; FULLER.]

The business of making clothes devolved upon women in a family (Prov. xxi. 22; Acts ix. 39); little art was required in what we may term the tailoring department; the garments came forth for the most part ready made from the loom, so that the weaver supplanted the tailor. The references to sewing are therefore few: the term שֹׂרֵט (Gen. iii. 7; Job xvi. 15; Eccles. iii. 7; Ezek. xiii. 18) was applied by the later Jews to *mending* rather than making clothes.

The Hebrews were open to the charge of extravagance in dress; Isaiah in particular (iii. 16 sq.) dilates on the numerous robes and ornaments worn by the women of his day. The same subject is referred to in Jer. iv. 30; Ezek. xvi. 10; Zeph. i. 8; Eccles. xi. 4; 1 Tim. ii. 9; 1 Pet. iii. 3. [W. L. B.] [F.]

DRINK, STRONG (שָׂכָר; σκερα). The Hebrew term *shekar*, in its etymological sense, applies to any beverage that had *intoxicating* qualities: it is generally found connected with wine, either as an exhaustive expression for all other liquors (e.g. Judg. xiii. 4; Luke i. 15), or as parallel to it, particularly in poetical passages (e.g. Is. v. 11; Mic. ii. 11); in Num. xxviii. 7 and Ps. lxi. 12, however, it stands by itself and must be regarded as including wine. The Bible itself throws little light upon the nature of the mixtures described under this term. We may infer from Cant. viii. 2 that the Hebrews were in the habit of expressing the juice of other fruits besides the grape for the purpose of making wine: the pomegranate, which is there noticed,

was probably one out of many fruits so used. In Is. xxiv. 9 there may be a reference to the *sweetness* of some kind of strong drink. In Num. xxviii. 7 *strong drink* is clearly used as equivalent to wine, which was ordered in Ex. xxix. 40. With regard to the application of the term in later times we have the explicit statement of Jerome (*Ep. ad Nepot.*), as well as other sources of information, from which we may state that the following beverages were known to the Jews:—1. *Beer*, which was largely consumed in Egypt under the name of *zyklus* (Herod. ii. 77; Diod. Sic. i. 34), and was thence introduced into Palestine (Mishna *Pesach* 3, § 1). It was made of barley; certain herbs, such as lupin and skirrett, were used as substitutes for hops (Colum. x. 114). The *boozah* of modern Egypt is made of barley-bread, crumbled in water and left until it has fermented (Lane, i. 131); the Arabians mix it with spices (Burckhardt's *Arabia*, i. 213), as described in Is. v. 22. The Mishna (l. c.) seems to apply the term *shekar* more especially to a Median drink, probably a kind of beer made in the same manner as the modern *boozah*; the Edomite *chomets*, noticed in the same place, was probably another kind of beer, and may have held the same position among the Jews that bitter beer does among ourselves. 2. *Cider*, which is noticed in the Mishna (*Terum.* 11, § 2) as *apple-wine*. 3. *Honey-wine*, of which there were two sorts, one like the *οἶνόςμελις* of the Greeks, which is noticed in the Mishna (*Shabb.* 20, § 2; *Terum.* 11, § 1) under a Hebraized form of that name, consisting of a mixture of wine, honey, and pepper; the other a decoction of the juice of the grape, termed *debash* (honey) by the Hebrews, and *δῖβς* by the modern Syrians, resembling the *σύνμα* of the Greeks and the *defrutum* of the Romans, and similarly used, being mixed with wine, milk, or water. 4. *Palm-wine*, which was also manufactured in Egypt (*οἶνος φοινικῆος*, Herod. ii. 86, iii. 20). It was made by mashing the fruit in water in certain proportions (Plin. xiv. 19, § 3). A similar method is still used in Arabia, except that the fruit is not mashed (Burckhardt's *Arabia*, ii. 264): the palm-wine of modern Egypt is the sap of the tree itself, obtained by making an incision into its heart (Wilkinson, ii. 174 [1878]). 5. Various other fruits and vegetables are enumerated by Pliny (xiv. 19) as supplying materials for *factitious* or home-made wine, such as figs, millet, the carob fruit, &c. It is not improbable that the Hebrews applied *raisins* to this purpose in the simple Arabian manner (Burckhardt, ii. 377), viz., by putting them in jars of water and burying them in the ground until fermentation takes place. [W. L. B.]

DROMEDARY. The representative in the A. V. of the Hebrew words *bécer* or *bicrah*, *roccsi* and *rammdc*. As to the two former terms, see under CAMEL.

1. *Rocesh* (רֹכֶשׁ; ῥωκέειν, ἄρμα; *jumentis, veredaris*) is variously interpreted in the A. V.

* "Sicera Hebraeo sermone omnia potio, quae inebriare potest, sive illa, quae frumento conficitur sive pomorum succo, aut cum favi decoquantur in dulcem et barbaram potionem, aut palmarum fructus exprimuntur in liquorem, coctique frugibus aqua pinguior coloratur."

by "dromedaries" (1 K. iv. 28), "mules" (Esth. viii. 10, 14), "swift beasts" (Mic. i. 13), in all which passages the R. V. has "swift steeds." There seems to be no doubt that *recasā* denotes a "superior kind of horse," such as would be required when dispatch was necessary. It is derived from רָכַץ, "to collect the feet," and so "to gallop;" i.e. "the swift runner," or "galloper," applied especially to stallions.

2. *Rammāk* (רָמָאֵךְ: LXX. and Vulg. omit) occurs only in plur. form in Esth. viii. 10, in connexion with *benē*, "sons;" the expression *benē rammākīm* being an exegesis of the Hebrew word *achashterānīm*, "mules, the sons of mares." The Hebrew רָמָאֵךְ, "a mare," which the A. V. renders incorrectly "dromedary," but the R. V. accurately, "bred of the stud," is

evidently allied to the Arabic ^{رَمَكَة}, *ramakah*, "a brood mare." [W. H.] [H. B. T.]

DRUSILLA (Δρουσίλλα; *Drusilla*). She was the third and youngest daughter of Herod Agrippa I., and was six years old at the time of his death (Jos. Ant. xix. 9, § 1). She had been betrothed by her father to Epiphanes, son of Antiochus, king of Commagene. But on the refusal of Epiphanes to conform to Judaism, Drusilla was given by her brother Herod Agrippa II. to Aziz, king of Emesa, who consented to be circumcised. This marriage did not turn out happily, and the envious illwill of her sister Berenice [BERNICE] added to her troubles. Felix, the procurator of Judaea, happened to see her, was struck with her remarkable beauty, and employed a friend of his, one Simon, a pretended sorcerer, to entice Drusilla to forsake her husband. This man is by some identified with Simon Magus, but his description as "a Cyprian" is against the identification. Simon succeeded, and we find Drusilla the wife of Felix at the time of St. Paul's imprisonment at Caesarea (Acts xxiv. 24). She must then have been about eighteen. Josephus, who gives the story, seems to think her transgression lay only in marrying one who was neither a Jew nor a proselyte (Jos. Ant. xx. 7, §§ 1, 2). She had a son by Felix named Agrippa, who died with his wife in the great eruption of Vesuvius in the reign of Titus. Drusilla's presence when Paul had his audience, and the fact of her being a Jewess, seem to be mentioned (Acts xxiv. 24) partly to account for Felix showing this interest in Christianity, and partly to give point to the Apostle's fearless preaching of self-control (ἐγκράτεια). [E. R. B.]

DUKE, Gen. xxxvi. 15, 40; Ex. xv. 15; Josh. xiii. 21 (R. V. marg. Or, chief), the Latin *dux* = a leader. Lumby points out that the title was extinct in England in 1611 when the A. V. was made, and the word was used literally of any chief (*Glossary of Bible Words* in Eyre and Spottiswoode's *Teachers' Bible*). [F.]

DULCIMER occurs in the A. V. and R. V. in Dan. iii. 5 (in v. 10 is another form of the same word) and v. 15.

Whatever the etymology of this so-called Latino-Greek word may be, the fact that "the

people of the music of the future" call it *Hackbret* ("chopping-board") shows at once that *dulcimer* cannot be a wind-instrument. But if it be no wind-instrument, how can it represent the *Sumponeyah* (סֻמְפוֹנְיָה), or *Supponeya* (סֻפְפוֹנְיָה), both of which, surely, are the equivalent of the Greek *συμφωνία*? The opinion expressed that *Sumponeyah* meant "a tube," "a pipe," is quite correct; but the "Semitic" *Sympon* (סִמְפוֹן) itself rests only on the Danielic passages quoted above. Now, these passages are hundreds of years older than any Talmudic or Midrashic passages which have the word *Sympon*. It is also noteworthy that the Rab Se'adyah, who explains *Sumponeyah* by *Sympon*, is not the exact and famous scholar, the *Gaon* (Head of the Academy of Suro. See Schiller-Sinessy, "Saadia," *Encycl. Britannica*, vol. xxi.). The revisers of the A. V. were,

Assyrian Dulcimer. (Konyunlik.)

therefore, nearer the truth when they gave (in marg. of Dan. iii. 5) for "dulcimer" the alternative rendering, *bagpipe*. [S. M. S.-S.]

DUMAH (דּוּמָא; Δουμά, Ἰδουμά, Ἰδουμαία; *Duma*), an Ishmaelite tribe of Arabia, and thence the name of the principal place, or district, inhabited by that tribe. In Gen. xxv. 14, and 1 Ch. i. 30, the name occurs in the list of the sons of Ishmael; and in Isaiah (xxi. 11), in the "burden of Dumah," it is coupled with Seir, the forest of Arabia, and Kedar. The name of a town in the northern part of the peninsula, about halfway between Petra and the Euphrates, *Dūmat-el-Jendel*, is held by Gesenius, and other European authorities, to have been thus derived; and the opinion is strengthened by Arab traditionists, who have the same belief (*Mir-ât ez-Zemân*). The latter, however, err in writing

"*Dumat-el-Jendel*" (دومة الجندل); while the lexicographers and geographers of their nation expressly state that it is correctly "*Dumat-el-Jendel*," or "*Dāma-el-Jendel*" (دومة الجندل, or دوما الجندل), signifying "Dumah of the stones or blocks of stone," of which it is said to have been built (*Shāh*; Yāqūt, *Mo'jam*, and *Mushtarak*, s. v.), indicating, perhaps, that the place was built of unhewn or Cyclopean masonry, similar to that of very ancient structures. The town itself, which is one of the "*Kureyyāt*" of *Wādī-l-Kurā* (Yāqūt, *Mo'jam*, s. v. *Dūmah*), is now called "*Jōf*" (see *MV.*¹¹); and the fortress which it contains, appears to have had the special appellation of "*Mārid*" (مارد).

There are two *Dūmahs*; that named in this article, and *D. el-'Irāk*. The chief of one, a contemporary of Mohammad, is said to have founded the other, or to have given it the name of *Dūmah*; but most Arab authorities, and probably also, are in favour of the prior antiquity of the former. [E. S. P.]

DUMAH (דומה = *silence*; B. *Peṣud*, A. *Povud*; *Ruma*), a city in the mountainous district of Judah, near Hebron (Josh. xv. 52). In the *Onomasticon* of Eusebius and Jerome (*OS.*² 116, 4; 250, 68) it is named as a very large place (ἀσὺν μεγάλην), 17 miles from Eleutheropolis, in the district of Daroma (i.e. "the south," from the Hebrew דרום). It is now *ed-Dōmah*, a large ruin, with rock-hewn tombs first noticed by Robinson (i. 212). It is about 6 miles S.W. of Hebron, and 14 English miles from *Beit Jibrin*, Eleutheropolis (*PEF. Mem.* iii. 313, 328; Guérin, *Judée*, iii. 359-60). [G.] [W.]

DUNG (צואה, גלל, the latter always, and the two former generally, applied to men; צפית, פקש, דמן, to brute animals, the second exclusively to animals offered in sacrifice, and the third to the dung of cows or camels). The uses of dung were twofold, as manure and as fuel. The manure consisted either of straw steeped in liquid manure (במי מרמנה, lit. in dung water, Is. xxv. 10), or the sweepings (סחפה, Is. v. 25) of the streets and roads, which were carefully removed from about the houses and collected in heaps (אשפות) outside the walls of the towns at fixed spots (hence the dung-gate at Jerusalem, Neh. ii. 13), and thence removed in due course to the fields (*Mishna Sheb.* 3, §§ 1-3). To sit on a dung-heap was a sign of the deepest dejection (1 Sam. ii. 8; Ps. cxlii. 7; Lam. iv. 5; cp. Job ii. 8, LXX. and Vulg.). The mode of applying manure to trees was by digging holes about their roots and inserting it (Luke xlii. 8), as still practised in Southern Italy (*Trench. Parables*, p. 356). In the case of sacrifices the dung was burnt outside the camp (Ex. xxix. 14; Lev. iv. 11, viii. 17; Num. xix. 5): hence the extreme opprobrium of the threat in Mal. ii. 3. Particular directions were laid down in the Law to enforce cleanliness with regard to human ordure (*Dent.* xxiii. 12 sq.): it was the grossest

insult to turn a man's house into a receptacle for it (מזרחא, 2 K. x. 27; נזל, Ezra vi. 11; Dan. ii. 5, iii. 29, "dung-hill" A. V.). Public establishments of that nature are still found in the large towns of the East (Russell's *Aleppo*, i. 34). The expression to "cast out as dung" implied not only the offensiveness of the object, but also the ideas of *removal* (1 K. xiv. 10), and still more *exposure* (2 K. ix. 37; Jer. viii. 2). The reverence of the later Hebrews would not permit the pronunciation of some of the terms used in Scripture, and accordingly more delicate words were substituted in the margin (2 K. vi. 25, x. 27, xviii. 27; Is. xxxvi. 12). The occurrence of such names as Gilaiai, Dimnah, Madmenah, and Madmannah, shows that these ideas of delicacy did not extend to ordinary matters. The term σκύβαλα ("Jung," A. V., Phil. iii. 8) applies to refuse of any kind (cp. *Ecclus.* xxvii. 4).

The difficulty of procuring fuel in Syria, Arabia, and Egypt, has made dung in all ages valuable as a substitute: it was probably used for heating ovens and for baking cakes (*Ezek.* iv. 12, 15), the equable heat which it produced adapting it peculiarly for the latter operation. Cow's and camel's dung is still used for a similar purpose by the Bedouins (*Burckhardt's Notes*, i. 57): they even form a species of pan for frying eggs out of it (Russell, i. 39): in Egypt the dung is mixed with straw and formed into flat round cakes, which are dried in the sun (*Lane*, i. 252; ii. 141). [W. L. B.]

DUNGEON. [PRISON.]

DUNG PORT (Neh. ii. 13), one of the gates of Jerusalem. [W.]

DURA (דורא; Δεσπ; *Dura*), the plain where Nebuchadnezzar set up the golden image (*Dan.* iii. 1), has been sometimes identified with a tract a little below *Tekrit* (*Ammianus Marcellinus*) on the left bank of the Tigris (*Layard, Nin. and Bab.* p. 469), where the name of Dur is still found. But (1) this tract probably never belonged to Babylon; (2) at any rate it is too far from that site to be the place where the image was set up, for the plain of Dura was in

the province or district of Babylon (בבל, probably corresponding in meaning with the native *ma pīhat Bābili*, "in the district of Babylon"), and must therefore have been within or near the city. M. J. Oppert places the plain (or, as he calls it, "valley") of Dura to the south-east of Babylon, in the vicinity of the mound Dowair or Dūair, on which site he discovered the pedestal of a colossal statue. He regards the modern name as a corruption of the ancient appellation. That it is the plain of Shinar (as has been thought) is a mere conjecture. German Assyriologists seem inclined to identify Dura with the Babylonian Dūru, a word which simply means "the wall" or "fortification." It is noteworthy that the Greek form is Δεσπ, implying that the LXX. identified it with a name containing long *ē* (or *ē*) as the middle vowel. This would point to some such name as Dēru, which, however, seems to offer an even less satisfactory solution than the other. [G. R.] [T. G. P.]

E

EAGLE (עָקֵב, *neshet*; Arab. نَسْر, *niss'r*;

æetós; *aquila*). The Hebrew word, which occurs frequently in the O. T., is derived from a root signifying "to tear with the beak"; and is rendered "eagle" in A. V. and R. V. in all passages (but cp. Lev. xi. 13, Dent. xiv. 12, R. V. marg., *great vulture*; and in Micah i. 16, R. V. marg., *culture*). The bird denoted by the Hebrew and Arabic name is beyond doubt the griffon vulture, *Gyps fulvus* (Gm.) of naturalists, a majestic bird, most abundant and never out of sight, whether on the mountains or the plains of Palestine. Everywhere it is a feature in the sky, as it circles higher and higher, till lost to all but the keenest sight, and then rapidly swoops down again. The Arabs never apply the term *niss'r* to any other bird than this, unless it be to the comparatively rarer species, the *cineurus* or black, and the eared vulture

universal scavenger of the East, *Neophron percnopterus* (L.), is always distinguished by its special name, and is an object of contempt, while the griffon is one of reverence. The true Eagle family is distinguished in Hebrew by many different names, rendered in the A. V. as *ossifrage*, *kite*, *glede*, *osprey*, &c.; and in Arabic eagles are designated collectively as

عقاب, *uqab*, with a specific adjective for the various species. Our translators seem to have shrunk from the true rendering of *neshet*, through confusing the idea of the griffon with that of the Egyptian scavenger. Although the griffon feeds on carrion, or rather on fresh carcases, this habit is no less characteristic of the true eagles, which will never kill for themselves if they can find dead flesh; and it is very possible that the larger eagles which sometimes consort with the griffon are embraced under the same name; but while the latter may be seen by hundreds, the less conspicuous eagles are only to be counted by a few individuals here and there.

The Assyrian deity Nisroch, in whose temple Sennacherib was murdered, is by Sir H. Layard considered to be typified by the eagle or griffon headed figure of a divinity so familiar in Assyrian monuments. This eagle-headed or vulture-headed human figure is continually introduced into the sculptures of Nineveh, contending with other mythic animals, and in their contests it appears to be always the conqueror. This illustrates the reverence in which the creature, so adopted as a symbol, was held. We may refer also to a fragment of the Zoroastrian oracles preserved by Eusebious: "God is he that has the head of a hawk." Sometimes the griffon head is attached to the body of a lion, and resembles the gryphon of Greek mythology, and is the original of the griffon of West European heraldry. The range of the griffon vulture is from Spain to India, and from the Alps to the Cape of Good Hope.

At least eight distinct kinds of eagles have been observed in Palestine: viz., the golden eagle (*Aquila Chrysaetus*, L.), the spotted eagle (*Aquila clanga*, Pall.), the commonest species in the rocky districts (see *Ibis*, i. 23), the imperial eagle (*Aquila Heliaca*, Sav.), and the very common *Circæus gallicus* (Gm.), which preys on the numerous reptilia of Palestine (for a figure of this, see OSPREY). The other four—*Aquila fasciata* V., *Aquila nipalensis* Hodg., *Aquila rapax* Tem., and *Aquila pennata* Gm.—are comparatively rare.*

* The reader will find the vernacular Arabic names of different species of Volturidae and Falconidae in Loche's

Eagle-headed figure. (N.W. Palace, Nimrud.)

(*Vultur cinereus*, Gm., and *Otogyps auricularis*, Daud.), which they do not discriminate, and which have the same general characteristics and habits. The bird commonly known as the Egyptian vulture (Heb. עָקֵב, Arab. رَحْمَة), the

The Persians used the eagle as their military emblem and standard. In Is. xlv. 11, Cyrus is alluded to under the symbol of this bird: "calling a ravenous bird (עֵשׂ) from the East" (cp. Xen. *Cyrop.* vii. 4); and from Assyria and Persia the Romans probably borrowed the ensign, which has been adopted by so many modern nations, with more appropriateness of character than its bearers would be willing to acknowledge.

Aquila Helica.

Job accurately describes the habits of the griffon: "Doth the eagle (*nesher*) mount up at thy command, and make her nest on high? She dwelleth on the rock, and hath her lodging there, upon the crag of the rock and the strong hold. From thence she spieth out the prey; her eyes behold it afar off. Her young ones also suck up blood; and where the slain are, there is she" (xxxix. 27-30, R. V.).

So the fastnesses of Edom, amid the gorges of Petra, are described by Jeremiah as no security against the vengeance of Jehovah: "O thou that dwellest in the clefts of the rock, that holdest the height of the hill: though thou shouldest make thy nest as high as the eagle (*nesher*), I will bring thee down from thence, saith the Lord" (Job xlix. 16). While the eagles and other birds are content with lower elevations, and sometimes even with trees, the griffon alone, with the lammergeier, selects the stupendous gorges of Arabia Petraea and of the defiles of Palestine, and there in great communities rears its young, where the most intrepid climber can only with ropes and other appliances reach its nest.

The griffon's or eagle's swiftness of flight is the subject of frequent allusion in Scripture (Deut. xxviii. 49; 2 Sam. i. 23; Jer. iv. 13, xlix. 22; Lam. iv. 19, &c.); its mounting high into the air is referred to (in Prov. xxiii. 5, xxx. 19; Is. xl. 31; Jer. xlix. 16); its strength and vigour (in Ps. ciii. 5); its predaceous habits (in Job ix. 26; Prov. xxx. 17); the care in training

its young to fly (in Ex. xix. 4; Deut. xxxiii. 11); its powers of vision (in Job xxxix. 29).

The passage in Micah i. 16, "Enlarge thy baldness as the eagle" (R. V. marg. or, *culture*), has been understood by Bochart (*Hieroz.* ii. 744) and others to refer to the eagle at the time of its moulting in the spring. Oedman (*Vermisch. Samm.* i. 64) erroneously refers the baldness spoken of by the prophet to point to the *Gypsetus barbatus*, the bearded vulture or lammergeier, which he supposed was bald. It is extremely improbable that there is any reference in the passage under consideration to eagles moulting. Allusion is here made to the custom of shaving the head as a token of mourning; but there would be little or no appropriateness in the comparison of a shaved head with an eagle at the time of moulting. But in the case of the griffon vulture (*Fultur fulvus*), the simile is peculiarly appropriate; it may be remarked that the Hebrew verb *kārach* (קָרַח) signifies "to make bald on the back part of the head;" the notion here conveyed is very applicable to the whole head and neck of this bird, which is destitute of true feathers, and either naked or thinly covered with a powdery down.

With regard to the texts referred to above, which compare the watchful and sustaining care of His people by the Almighty with that exhibited by the eagle in training its young ones to fly, we may quote a passage from Sir Humphry Davy, who says, "I once saw a very interesting sight above one of the crags of Ben Nevis, as I was going in the pursuit of black game. Two parent eagles were teaching their offspring, two young birds, the manœuvres of flight. They began by rising from the top of the mountain, in the eye of the sun. It was about mid-day, and bright for this climate. They at first made small circles, and the young birds imitated them. They paused on their wings, waiting till they had made their first flight, and then took a second and larger gyration; always rising towards the sun, and enlarging their circle of flight so as to make a gradually ascending spiral. The young ones still and slowly followed, apparently flying better as they mounted; and they continued this sublime exercise, always rising, till they became mere points in the air, and the young ones were lost, and afterwards their parents, to our aching sight." The expression in Exodus and Deuteronomy (H. cc.), "beareth them on her wings," has been understood by Rabbinical writers and others to mean that the eagle does actually carry her young ones on her wings and shoulders. This is putting on the words a construction which they by no means are intended to convey; at the same time, it is not improbable that the parent bird assists the first efforts of her young by flying under them, thus sustaining them for a moment, and encouraging them in their early lessons.

In this connexion we may note that the griffon appears to have been sacred in the Egyptian mythology to Maut, the goddess of maternity.

In Ps. ciii. 5 it is said, "Thy youth is renewed like the eagle" (R. V.; see also Is. xl. 31). Some Jewish interpreters have illustrated this passage by a reference to the old fables about

Catalogue des Oiseaux observés en Algérie; and in *Ibis*, vols. i. ii., Tristram's papers on the Ornithology of North Africa.

the eagle being able to renew his strength when very old (see Bochart, *Hieroz.* ii. 747). Modern commentators for the most part are inclined to think that these words refer to the eagle after the moulting season, when the bird is more full of activity than before. We much prefer Hengstenberg's explanation on Ps. ciii. 5, "Thy youth is renewed, so that in point of strength thou art like the eagle."

The eagle (*neshar*), as emblematic of the Divine attributes, is one of the four living

creatures in the vision of Ezekiel (i. 10), as also in that of St. John (Rev. iv. 7); to whom, from his keen insight into heavenly truths, and his near approach to the brightness of the Divine glory in the Revelation vouchsafed to him, this bird has been assigned as an emblem.

The *áerol* of Matt. xxiv. 28, Luke xvii. 37, have evidently an inclusive sense; comprehending all the ravenous birds which invariably congregate round a field of battle. These are all the species of vulture, of eagle, and of

Eagles and Hare. (Nimrud.)

buzzard: among all these the griffon will preponderate in the proportion of twenty to one. These birds also accompany armies in their march, on the watch for the dead horses and baggage animals. During the Crimean war, round Sebastopol, where the griffon had previously been very scarce, immense numbers congregated; and came, as the Turks said, from the ends of the earth. The writer noticed during that period an unusual scarcity of these birds in North Africa.

Eagles are frequently represented in Assyrian sculptures attending the soldiers in their battles; portraying the common feature in Eastern battle-field scenery, of birds of prey awaiting to satisfy their hunger on the bodies of the slain. [W. H.] [H. B. T.]

E'ANES (B. *Márys*; *Esses*), 1 Esd. ix. 21, a name which, according to the margin, stands for Harim in Ezra (x. 21), but which is really all that remains of the three names in Ezra—HARIM, MAASEIAH, and ELIJAH. The form Eanes is due to the Aldine misprint 'Hárys for *Márys* (see *Speaker's Comm.* in loco). [F.]

EAR, EARED, EARING (Gen. xlv. 6; Ex. xxxiv. 21; Deut. xxi. 4; 1 Sam. viii. 12; Is. xxx. 24) of the A. V. is now replaced in the R. V. by the modern equivalent "plough" or "plow." It comes from the Lat. *arare*, through the A.-S. *erian* (cp. *earth*, arable, i.e. *carable*, ground), and was one of the words "very reluctantly abandoned, and only because their meaning was unknown to many persons of good intelligence and education" (Revisers' Pref. to O. T.). [F.]

EARNEST. This term occurs only thrice in the A. V. and R. V. (2 Cor. i. 22, v. 5; Ephes. i. 14). The equivalent in the original is *ἀπαθής*, a Graecised form of *אָפּאַתָּה*, which was introduced by the Phoenicians into Greece, and also into Italy, where it reappears under the forms *arrhabo* and *arraha* (see further in MV.¹¹). It

may again be traced in the French *arrhes*, and in the Old English expression *Earl's* or *Arl's* money. The Hebrew word was used generally for *pledge* (Gen. xxxviii. 17), and in its cognate forms for *surety* (Prov. xvii. 18) and *hostage* (2 K. xiv. 14). The Greek derivative, however, acquired a more technical sense as signifying the *deposit* paid by the purchaser on entering into an agreement for the purchase of any thing (Suid. *Lex.* s. v.). A similar legal and technical sense attaches to *earnest*, the payment of which places both the vendor and the purchaser in a position to enforce the carrying out of the contract (Blackstone, ii. 30). There is a marked distinction between *pledge* and *earnest* in this respect, that the latter is a *part-payment*, and therefore implies the *identity* in kind of the deposit with the future full payment; whereas a pledge may be something of a totally different nature, as in Gen. xxxviii., to be resumed by the depositor when he has completed his contract. Thus the expression "*earnest* of the Spirit" implies, beyond the idea of security, the *identity* in kind, though not in degree, and the *continuity* of the Christian's privileges in this world and in the next. The payment of earnest-money under the name of *arrabon* is still a common occurrence of Arab life. [W. L. B.]

EARRINGS. The word *אָזְנִיָּה*, by which these ornaments are usually described, is unfortunately ambiguous, originally referring to the nose-ring and thence transferred to the earring. The full expression for the latter is *אָזְנִיָּה אֶשֶׁר בְּאָזְנִיָּה* (Gen. xxxv. 4. Cp. Ex. xxxii. 2; Prov. xxv. 12), in contradistinction to *אָזְנִיָּה עַל-אֶזְנוֹ* (Gen. xxiv. 47. Cp. Prov. xi. 22; Is. iii. 21; Ezek. xvi. 12). In the majority of cases, however, the kind is not specified, and the only clue to the meaning is the context. The term occurs in this undefined sense in Jndg. viii. 24, Job xlii. 11, Hos. ii. 13; the probability being that the nose-ring is intended. The material

of which the earring was made was generally gold (Ex. xxxii. 2), and its form circular, as we may infer from the name *לִבְיָטָן*, by which it is described (Num. xxxi. 50; Ezek. xvi. 12): such was the shape usual in Egypt (Wilkinson's *Anc. Egypt.* ii. 336, 338, 345). They were worn by the Hebrew women, by the youth of both sexes (Ex. i. c.), and—less commonly (cp. Kamphausen in Riehm's *HWB.* s. n. *Ohringe*)—by men (Judg. viii. 24). In the latter passage the amount of the gold is the peculiarity adverted to, and not the character of the ornament, a peculiarity which is still noticeable among the inhabitants of Southern Arabia (Wellsted's *Travels*, i. 321). The earring appears to have been regarded with superstitious reverence as an amulet: thus it is named in the Chaldee and Samaritan Versions *אֲמוּלֵת קֹדֶשׁ*, a holy thing; and in Is. iii. 20

the word *אֲמוּלֵת*, prop. *amulets* (R. V.), is rendered in the A. V., after the LXX. and Vulg., *earrings*. [AMULET.] On this account they were surrendered along with the idols by Jacob's household (Gen. xxxv. 4). Chardin describes earrings, with talismanic figures and characters on them, as still existing in the East (Brown's *Antiquities*, ii. 305). Jewels were sometimes attached to the rings: they were called *טְּפֵלִים* (from *דָּפַן*, to drop), a word rendered in Judg. viii. 26 *δρῦμακoi*, *monilia*; "collars," marg. or *sweet jewels*, A. V. (R. V. "pendants"), and in Is. iii. 19, *κἀδαμα*; *torques*; "chains," marg. or *sweet balls*, A. V. (R. V. "pendants"). The size

Egyptian Earrings. (From Wilkinson.)

of the earrings still worn in Eastern countries far exceeds what is usual among ourselves (Harmer's *Obs.* iv. 311, 314); hence they form a handsome present (Job xlii. 11), or offering to the service of God (Num. xxxi. 50). [W. L. B.] [F.]

EARTH. This term is used in two widely different senses: (1) for the material of which the earth's surface is composed; (2) as the name of the planet on which man dwells. The Hebrew language discriminates between these two by the use of separate terms, *Adamah* (אֲדָמָה) for the former, *Erts* (אֶרֶץ) for the latter. As the two are essentially distinct, we shall notice them separately.

1. *Adamah* is the *earth* in the sense of soil or ground, particularly as being susceptible of cultivation; hence the expression *ish adamah* for an agriculturist (Gen. ix. 20). The *earth* supplied the elementary substance of which man's body was formed, and the terms *adam* and *adamah* are brought into juxtaposition, implying an etymological connexion (Gen. ii. 7). [ADAM.] The

opinion that man's body was formed of earth prevailed among the Greeks (Hesiod, *Op. et Di.* 61, 70; Plat. *Rep.* p. 269), the Romans (Virg. *Georg.* ii. 341; Ovid, *Met.* i. 82), the Egyptians (Diod. Sic. i. 10), and other ancient nations. It is evidently based on the observation of the material into which the body is resolved after death (Job x. 9; Eccles. xii. 7). The law prescribed earth as the material out of which altars were to be raised (Ex. xx. 24); Bähr (*Symb.* i. 488) sees in this a reference to the name *adam*: others with more reason compare the *ara de cespiti* of the Romans (Ov. *Trist.* v. 5, 9; Hor. *Od.* iii. 8. 4, 5), and view it as a precept of simplicity. Naaman's request for two mules' burthen of earth (2 K. v. 17) was based on the idea that Jehovah, like the heathen deities, was a local god, and could be worshipped acceptably only on his own soil.

2. *Erts*, the etymology of which is still uncertain (cp. Delitzsch [1887] on Gen. i. 10, and, on the other hand, M.V.¹¹ a.n. אֶרֶץ), is applied in a more or less extended sense:—1, to the whole world (Gen. i. 1); 2, to land as opposed to sea (Gen. i. 10); 3, to a country (Gen. xxi. 32); 4, to a plot of ground (Gen. xxiii. 15); and 5, to the ground on which a man stands (Gen. xxiii. 3). The two former senses alone concern us, the first involving an inquiry into the opinions of the Hebrews on Cosmogony, the second on Geography.

1. **COSMOGONY.**—The views of the Hebrews on this subject are confessedly imperfect and obscure. This arises partly from the ulterior objects which led them to the study of natural science, and still more from the poetical colouring with which they expressed their opinions. The Books of Genesis, Job, and Psalms supply the most numerous notices: of these, the two latter are strictly poetical works, and their language must be measured by the laws of poetical expression; in the first alone have we anything approaching to an historical and systematic statement, and even this is but a sketch—an outline—which ought to be regarded at the same distance, from the same point of view, and through the same religious medium as its author regarded it. The act of Creation itself, as recorded in the first chapter of Genesis, is a subject beyond and above the experience of man; human language, derived, as it originally was, from the sensible and material world, fails to find an adequate term to describe the act; for our word "create" and the Hebrew *bara*, though most appropriate to express the idea of an original creation, are yet applicable and must necessarily be applicable to other modes of creation; nor does the addition of such expressions as "out of things that were not" (אֵלֶּם מִלִּפְתֵּי הַבְּרִיאָה, 2 Mac. vii. 28) or "not from things which appear" (אֵלֶּם מִפְּרִימָה, Heb. xi. 3) contribute much to the force of the declaration. The absence of a term which shall describe exclusively an original creation is a necessary infirmity of language: as the event occurred but once, the corresponding term must, in order to be adequate, have been coined for the occasion and reserved for it alone, which would have been impossible. The same observation applies, though in a modified degree, to the description of the various processes subsequent to the existence of original matter (cp. Delitzsch, *Genesis* [1887], p. 40). Moses viewed

matter and all the forms of matter in their relations primarily to God, and secondarily to man—as manifesting the glory of the former, and as designed for the use of the latter. In relation to the former, he describes Creation with the special view of illustrating the Divine attributes of power, goodness, wisdom, and accordingly he throws this narrative into a form which impresses the reader with the sense of these attributes. In relation to the latter he selects his materials with the special view of illustrating the subordination of all the orders of material things to the necessities and comforts of man. With these objects in view, it ought not to be a matter of surprise, if the simple narrative of Creation omits much that scientific research has since supplied, and appears in a guise adapted to those objects. The subject itself is throughout one of a transcendental character; it should consequently be subjected to the same standard of interpretation as other passages of the Bible, descriptive of objects which are entirely beyond the experience of man, such as the day of judgment, the states of heaven and hell, and the representations of the Divine Majesty. The style of criticism applied to Gen. i. by the opponents, and not infrequently by the supporters of Revelation, is such as would be subversive of many of the most noble and valuable portions of the Bible. With these prefatory remarks we proceed to lay down what appear to us to be the leading features of Hebrew Cosmogony.*

1. The earth was regarded not only as the central point of the universe, but as the universe itself, every other body—the heavens, sun, moon, and stars—being subsidiary to and, as it were, the complement of the earth. The Hebrew language has no expression equivalent to our *universe*: “the heavens and the earth” (Gen. i. 1, xiv. 19; Ex. xxii. 17) has been regarded as such; but it is clear that the heavens were looked upon as a necessary adjunct of the earth—the curtain of the tent in which man dwells (Is. xl. 22), the sphere above which fitted the sphere below (cp. Job xxii. 14 and Is. xl. 22)—designed solely for purposes of beneficence in the economy of the earth. This appears from the account of its creation and offices: the existence of the heaven was not prior to or contemporaneous with that of the earth, but subsequent to it; it was created on the second day (Gen. i. 6). The term under which it is described, *rakia* (רָקִיעַ), is significant of its *extension*, that it was *stretched out* as a curtain (Ps. civ. 2) over the surface of the earth. Moreover it depended upon the earth; it had its “foundations” (2 Sam. xxii. 8) on the edges of the earth’s circle, where it was supported by the mountains as by massive pillars (Job xxvi. 11). Its offices were

(1) to support the waters which were above it (Gen. i. 7; Ps. cxlviii. 4), and thus to form a mighty reservoir of rain and snow, which were to pour forth through its windows (Gen. vii. 11; Is. xxiv. 18) and doors (Ps. lxxviii. 23), as through opened sluice-gates, for the fructification of the earth; (2) to serve as the *substratum* (στερέωμα or firmament) in which the celestial bodies were to be fixed. As with the heaven itself, so also with the heavenly bodies; they were regarded solely as the ministers of the earth. Their offices were (1) to give light; (2) to separate between day and night; (3) to be for *signs*, as in the case of eclipses or other extraordinary phenomena; for *seasons*, as regulating seed-time and harvest, summer and winter, as well as religious festivals; and for *days* and *years*, the length of the former being dependent on the sun, the latter being estimated by the motions both of sun and moon (Gen. i. 14–18); so that while it might truly be said that they held “dominion” over the earth (Job xxxviii. 33), that dominion was exercised solely for the convenience of the tenants of earth (Ps. civ. 19–23). So entirely indeed was the existence of heaven and the heavenly bodies designed for the earth, that with the earth they shall simultaneously perish (2 Pet. iii. 10): the curtain of the tent shall be rolled up and the stars shall of necessity drop off (Is. xxiv. 4; Matt. xxiv. 29)—their sympathy with earth’s destruction being the counterpart of their joyous song when its foundations were laid (Job xxviii. 7).

2. The earth was regarded in a twofold aspect: in relation to God, as the manifestation of His infinite attributes; in relation to man, as the scene of his abode. (1.) The Hebrew cosmogony is based upon the leading principle that the universe exists, not independently of God, by any necessity or any inherent power, nor yet contemporaneously with God, as being co-existent with Him, nor yet in opposition to God, as a hostile element, but dependently upon Him, subsequently to Him, and in subjection to Him. The opening words of Genesis express in broad terms this leading principle; however difficult it may be, as we have already observed, to express this truth adequately in human language, yet there can be no doubt that the subordination of matter to God in every respect is implied in that passage, as well as in other passages, too numerous to quote, which comment upon it. The same great principle runs through the whole history of Creation: matter owed all its forms and modifications to the Will of God: in itself dull and inert, it received its first vivifying capacities from the influence of the Spirit of God brooding over the deep (Gen. i. 2); the progressive improvements in its condition were the direct and miraculous effects of God’s Will; no interposition of secondary causes is recognised: “He spake, and it was” (Ps. xxxiii. 9); and the pointed terseness and sharpness with which the [Elohistic] writer sums up the whole transaction in the three expressions “God said,” “It was so,” “God saw that it was good”—the first declaring the Divine volition, the second the immediate result, the third the perfectness of the work—harmonise aptly with the view which he intended to express. Thus the earth became in the eyes of the pious Hebrew the scene on which the Divine perfections were displayed:

3 G 2

* The student may compare the Hebrew with the Phœnician and Babylonian cosmogonies by the aid of Delitzsch, *Genesis* [1887], pp. 40–1; Lenormant, *Origines de l'Histoire*, l. i sq., 38 sq., 536 sq.; G. Smith, *The Chaldean Account of Genesis* [Records of the Past, N. S. l. 122 sq.]; Jensen, *Kosmologie d. Babylonier*. Cp. also on the subject, “Genesis and Science,” Driver, *The Cosmogony of Genesis* (*Expositor*, 1886, p. 23 sq.); Stokes, Pritchard, and Bonney (*Expositor*, 1891, pp. 42, &c.); and for exegetical treatment, Bishop Perowne (*Expositor*, 1890, p. 241 sq.). Consult also the *Com. of Dillmann*²; and see GENESIS.—[F.]

the heavens (Ps. xix. 1), the earth (Ps. xxiv. 1, civ. 24), the sea (Job xxvi. 10; Ps. lxxxix. 9; Jer. v. 22), "mountains and hills, fruitful trees and all cedars, beasts and all cattle, creeping things and flying fowl" (Ps. cxlviii. 9, 10), all displayed one or other of the leading attributes of His character. So also with the ordinary operations of nature—the thunder was His voice (Job xxxvii. 5); the lightnings His arrows (Ps. lxxvii. 17); wind and storm His messengers (Ps. cxlviii. 8); the earthquake, the eclipse, and the comet, the signs of His Presence (Joel ii. 10; Matt. xxiv. 29; Luke xxi. 25).

(2.) The earth was regarded in relation to man, and accordingly each act of creation is a preparation of the earth for his abode—light, as the primary condition of all life; the heavens, for purposes already detailed; the dry land, for his home; "grass for the cattle, and herb for the service of man" (Ps. civ. 14); the alternations of day and night, the one for his work and the other for his rest (Ps. civ. 23); fish, fowl, and flesh for his food; the beasts of burden, to lighten his toil. The work of each day of Creation has its specific application to the requirements and the comforts of man, and is recorded with that special view.

3. Creation was regarded as a progressive work—a gradual development from the inferior to the superior orders of things. Thus it was with the earth's surface, at first a chaotic mass, *vacate and empty*, well described in the paronomastic terms *tohu, bohu*, overspread with waters and enveloped in darkness (Gen. i. 2), and thence gradually brought into a state of order and beauty so conspicuous as to have led the Latins to describe it by the name *Mundus*. Thus also with the different portions of the universe, the earth before the light, the light before the firmament, the firmament before the dry land. Thus also with light itself: at first the elementary principle, separated from the darkness, but without defined boundaries; afterwards the illuminating bodies with their distinct powers and offices—a progression that is well expressed in the Hebrew language by the terms *ôr* and *maôr* (אֹר, מְאֹר). Thus also with the orders of living beings: first, plants; secondly, fish and birds; thirdly, cattle; and lastly, man. From "good" in the several parts to "very good" as a whole (Gen. i. 31), such was its progress in the judgment of the Omnipotent Workman.

4. Order involves time; a succession of events implies a succession of periods; and accordingly Moses assigns the work of creation to six days, each having its specific portion—light to the first, the firmament to the second, the dry land and plants to the third, the heavenly bodies to the fourth, fish and fowl to the fifth, beasts and man to the sixth. The manner in which these acts are described as having been done, precludes all idea of time in relation to their performance: it was miraculous and perhaps instantaneous: "God said" and then "it was." But the progressiveness, and consequently the individuality of the acts, do involve an idea of time as elapsing between the completion of one and the commencement of another; otherwise the work of Creation would have resolved itself into a single continuous act. The period assigned to each individual act is a day—the only period which

represents the entire cessation of a work through the interposition of night. That a natural day is represented under the expression "evening was and morning was," admits, we think, of no doubt; the term "day," when alone, may refer sometimes to an indefinite period contemporaneous with a single event; but when the individual parts of a day, "evening and morning," are specified, and when a series of such days are noticed in their numerical order, no analogy of language admits of our understanding the term in anything else than its literal sense [Driver, p. 26]. The Hebrews had no other means of expressing the civil day of 24 hours than as "evening and morning" (עֶרֶב וּבֹקֶר, Dan. viii. 14; R.V.), similar to the Greek *εὐφροσύνη*; and although the alternation of light and darkness lay at the root of the expression, yet the Hebrews in their use of it no more thought of those elements than do we when we use the term *fortnight* or *se'nnight*: in each case the lapse of a certain time, and not the elements by which that time is calculated, is intended; so that, without the least inconsistency either of language or of reality, the expression may be applied to the days previous to the creation of the sun. The application of the same expression to the events subsequent to the creation of the sun, as well as the use of the word "day" in the fourth commandment without any indications that it is used in a different sense, or in any other than the literal acceptance of Gen. i. 5 sq., confirm the view above stated. The interpretation that "evening and morning" = *beginning and end*, is opposed not only to the order in which the words stand, but to the sense of the words elsewhere.

5. The Hebrews, though regarding Creation as the immediate act of God, did not ignore the evident fact that existing materials and intermediate agencies were employed both then and in the subsequent operations of nature. Thus the simple fact "God created man" (Gen. i. 27) is amplified by the subsequent notice of the material substance of which his body was made (Gen. ii. 7); and so also of the animals (Gen. i. 24, ii. 19). The separation of sea and land, attributed in Gen. i. 6 to the Divine fiat, was seen to involve the process of partial elevations of the earth's surface (Ps. civ. 8, "the mountains ascend, the valleys descend;" cp. Prov. viii. 25-28). The formation of clouds and the supply of moisture to the earth, which in Gen. i. 7 was provided by the creation of the firmament, was afterwards attributed to its true cause in the continual return of the waters from the earth's surface (Eccles. i. 7). The existence of the element of light, as distinct from the sun (Gen. i. 3, 14; Job xxxviii. 19), has likewise been explained as the result of a philosophically correct view as to the nature of light; more probably, however, it was founded upon the incorrect view that the light of the moon was independent of the sun.

6. With regard to the earth's body, the Hebrews conceived its surface to be an immense disc, supported, like the flat roof of an Eastern house, by pillars (Job ix. 6; Ps. lxxv. 3), which rested on solid foundations (Job xxxviii. 4, 6; Ps. civ. 5; Prov. viii. 29); but where these foundations were on which the "sockets" of the pillars rested, none could tell (Job xxxviii. 6). The more philosophical view of the earth being

suspended in free space seems to be implied in Job xxvi. 7; nor is there any absolute contradiction between this and the former view, as the pillars of the earth's surface may be conceived to have been founded on the deep bases of the mountains, which bases themselves were unsupported. Other passages (Is. xxiv. 2, cxxxv. 6) seem to imply the existence of a vast subterranean ocean; the words, however, are essentially poetical, even if susceptible of the sense that the earth was elevated above the level of the seas (cp. Delitzsch and Perowse, *Comm.* in loc.); and that this is the sense in which they are to be accepted, appears from the converse expression "water under the earth" (Ex. xx. 4), which, as contrasted with "heaven above" and "earth beneath," evidently implies the comparative elevation of the three bodies.

Beneath the earth's surface was *sheol* (שְׁאוֹל), the hollow place, "hell" [R.V. "pit"] (Num. xvi. 30; Deut. xxxii. 22; Job xi. 8), the "house appointed for the living" (Job xxx. 23), a "land of darkness" (Job x. 21), to which were ascribed in poetical language gates (Is. xxxviii. 10) and bars (Job xvii. 16), and which had its valleys or deep places (Prov. ix. 18). It extended beneath the sea (Job xvi. 5, 6), and was thus supposed to be continuous with the upper world.

II. GEOGRAPHY.—We shall notice (1) the views of the Hebrews as to the form and size of the earth, its natural divisions, and physical features; (2) the countries into which they divided it and their progressive acquaintance with those countries. The world in the latter sense was sometimes described by the poetical term *tebel* (תֵּבֶל), corresponding to the Greek *οἰκουμένη* (Is. xiv. 21).

1. In the absence of positive statements we have to gather the views of the Hebrews as to the form of the earth from scattered allusions, and these for the most part in the poetical Books, where it is difficult to decide how far the language is to be regarded as literal, and how far as metaphorical. There seem to be traces of the same ideas as prevailed among the Greeks, that the world was a disc (Is. xl. 22; the word כִּנּוּר, *circle*, is applied exclusively to the circle of the horizon whether bounded by earth, sea, or sky), bordered by the ocean (Deut. xxx. 13; Job xxvi. 10; Ps. cxxxix. 9; Prov. viii. 27), with Jerusalem as its centre (Ezek. v. 5), which was thus regarded, like Delphi, as the *navel* (טֶבֶל; Judg. ix. 37; Ezek. xxxviii. 12; LXX.; Vulg.), or, according to another view (Gesen. *Thesaur.* s.v.), the highest point of the world. The passages quoted in support of this view admit of a different interpretation: Jerusalem might be regarded as the centre of the world, not only as the seat of religious light and truth, but to a certain extent in a geographical sense; for Palestine was situated between the important empires of Assyria and Egypt; and not only between them but above them, its elevation above the plains on either side contributing to the appearance of its centrality. A different view has been gathered from the expression "four corners" (אַרְבַּע זְּמֵנוֹת), generally applied to the skirts of a garment: see the Assyrian form in *M.V.*), as though implying the quadrangular shape of a garment stretched out, according to Eratosthenes'

comparison; but the term "corners" may be applied in a metaphorical sense to the extreme ends of the world (Job xxxvii. 3, xxxviii. 13; Is. xi. 12, xxiv. 16; Ezek. vii. 2). Finally, it is suggested by Bähr (*Symbolik*, i. 170) that these two views may have been held together, the former as the actual and the latter as the symbolical representation of the earth's form. As to the size of the earth, the Hebrews had but a very indefinite notion; in many passages the "earth," or "whole earth," is used as co-extensive with the Babylonian (Is. xiii. 5, xiv. 7 sq., xxiv. 17) or Assyrian empire (Is. x. 14, xiv. 26, xxxvii. 18), just as at a later period the Roman empire was styled *orbis terrarum*; the "ends of the earth" (סְוֵנוֹת) in the language of prophecy applied to the nations on the border of these kingdoms, especially the Medes (Is. v. 26, xiii. 5) in the east, and the islands and coasts of the Mediterranean in the west (Is. xli. 5, 9); but occasionally the boundary was contracted in this latter direction to the eastern shores of the Mediterranean (Is. xxiv. 16; Zech. ix. 10; Ps. lxxii. 8). Without unduly pressing the language of prophecy, it may be said that the views of the Hebrews as to the size of the earth extended but little beyond the nations with which they came in contact; its solidity is frequently noticed, its dimensions but seldom (Job xxxviii. 18; Is. xlii. 5). We shall presently trace the progress of their knowledge in succeeding ages.

The earth was divided into four quarters or regions corresponding to the four points of the compass: these were described in various ways, sometimes according to their positions relatively to a person facing the east, before (פָּנֵי), behind (אחור), the right hand (יְמִינִי), and the left hand (שְׂמֹאלִי), representing respectively E., W., S., and N. (Job xxiii. 8, 9); sometimes relatively to the sun's course, the rising (מִזְרִי), the setting (מַבּוֹא), Ps. l. 1), the brilliant quarter (קֶדְרוֹם, Ezek. xl. 24), and the dark quarter (מִצְרַיִם, Ex. xxvi. 20; cp. the Greek *σέρος*, Hom. *Il.* xii. 240); sometimes as the seat of the four winds (Ezek. xxxvii. 9); and sometimes according to the physical characteristics, the sea (יָם) for the W. (Gen. xxviii. 14), the parched (בָּבֵל); see Dillmann on Gen. xii. 9) for the S. (Ex. xxvii. 9), and the mountains (הָרִים) for the N. (Is. xlii. 4). The North appears to have been regarded as the highest part of the earth's surface, in consequence perhaps of the mountain ranges which existed there, and thus the heaviest part of the earth (Job xxvi. 7). The North was also, according to some, the quarter in which the Hebrew *el-Dorado* lay, the land of gold mines (Job xxxvii. 22, margin, but R. V. "golden splendour;" cp. Herod. iii. 116).

These terms are very indistinctly used when applied to special localities; for we find the North assigned as the quarter of Assyria (Jer. iii. 18), Babylonia (Jer. vi. 22), and the Euphrates (Jer. xli. 10), and more frequently Media (Jer. l. 3; cp. li. 11), while the South is especially represented by Egypt (Is. xxx. 6; Dan. xi. 5). The Hebrews were not more exact in the use of terms descriptive of the physical features of the earth's surface; for instance, the same term (יָם) is applied to the sea (Mediterranean), to the lakes

of Palestine, and to great rivers, such as the Nile (Is. xviii. 2), and perhaps the Euphrates (Is. xxvii. 1): mountain (הַר) signifies not only high ranges, such as Sinai or Ararat, but an elevated region (Josh. xi. 16); river (נָחַל) is occasionally applied to the sea (Jon. ii. 3; Ps. xxiv. 2) and to canals fed by rivers (Is. xlv. 27). Their vocabulary, however, was ample for describing the special features of the lands with which they were acquainted, the terms for the different sorts of valleys, mountains, rivers, and springs being very numerous and expressive. We cannot fail to be struck with the adequate ideas of descriptive geography expressed in the directions given to the spies (Num. xiii. 17-20) and in the closing address of Moses (Deut. viii. 7-9); nor less, with the extreme accuracy and the variety of almost technical terms, with which the boundaries of the various tribes are described in the Book of Joshua, warranting the assumption that the Hebrews had acquired the art of surveying from the Egyptians (Jahn, i. 6, § 104).

2. We proceed to give a brief sketch of the geographical knowledge of the Hebrews down to the period when their distinctive names and ideas were superseded by those of classical writers. The chief source of information open to them, beyond the circle of their own experience, was their intercourse with the Phœnician traders. While the first made them acquainted with the nations from the Tigris to the African desert, the second informed them of the coasts of the Mediterranean, the regions of the North, and the southern districts of Arabia. From the Assyrians and Babylonians they gained some slight knowledge of the distant countries of India, and perhaps even China.^b

Of the physical objects noticed we may make the following summary, omitting of course the details of the geography of Palestine:—(1.) *Seas*—the Mediterranean, which was termed the “great sea” (Num. xxxiv. 6), the “sea of the Philistines” (Ex. xxiii. 31), and the “western sea” (Deut. xi. 24); the Red Sea, under the names of the “sea of Suph,” *sedge* (Ex. x. 19; see MV.¹¹ שֶׁפַח), and the “Egyptian sea” (Is. xi. 15); the Dead Sea, under the names “Salt Sea” (Gen. xiv. 3), “Eastern Sea” (Joel ii. 20), and “Sea of the Desert” (Deut. iv. 49); and the Sea of Chinnereth, or Galilee (Num. xxxiv. 11). (2.) *Rivers*—the Euphrates, which was specifically “the river” (Gen. xxxi. 21), or “the great river” (Deut. i. 7); the Nile, which was named either *Yor* (Gen. xli. 1) or *Sihor* (Josh. xiii. 3); the Tigris, under the name of *Hiddekel* (Dan. x. 4); the *Chebar*, *Chaboras*, a tributary of the Euphrates (Ezek. i. 3); the *Habor*, probably the same, but sometimes identified with the *Chaboras* that falls into the Tigris (2 K. xvii. 6); the river of Egypt (Num. xxiv. 5); and the rivers of Damascus, *Abana* (*Barada*) and *Pharpar* (2 K. v. 12). For the Gihon and Pison (Gen. ii. 11, 13), see EDEN. (3.) *Mountains*—*Ararat* or *Armenia* (Gen. viii. 4); *Sinai* (Ex. xix. 2); *Horeb* (Ex. iii. 1); *Hor* (Num. xx. 22) near *Petra*; *Lebanon* (Deut. iii. 25); and *Seaphar* (Gen. x. 30) in Arabia.

The distribution of the nations over the face

^b The geographical questions arising out of the description of the garden of Eden are discussed in a separate article. [EDEN.]

of the earth is systematically described in Gen. x.;* to which account subsequent, though not very important, additions are made in chs. xrv. and xxvii., and in the *Prophetical and Historical Books*. The table in Gen. x. is partly ethnographical, but the historico-geographical element is more strongly developed (Dillmann): the writer had in his mind's eye not only the descent but the *residence* of the various nations. Some of the names indeed seem to be purely geographical designations: *Aram*, for instance, means *high lands* (?); *Canaan*, *low lands* (see MV.¹¹); *Eber*, the land *across*, or *beyond*; *Sidon*, *fishing station*; *Madai*, *central land* (?); *Tarshish*, *conquered* (?); *Mixraim*, still more remarkable from its dual form, the *Upper and Lower Egypt*; *Ophir*, the *rich land* (?). It has indeed been surmised that the names of the three great divisions of the family of Noah are also in their origin geographical terms: *Japhet*, the *widely-extended* regions of the North and West; *Ham*, the country of the *black soil*, Egypt; and *Shem*, the *mountainous* country: all this is, however, more than doubtful.

In endeavouring to sketch out a map of the world, as described in Gen. x., it must be borne in mind that, in cases where the names of the races have not either originated in or passed over to the lands they occupied, the locality must be more or less doubtful; for the migrations of the various tribes in the long lapse of ages led to the transfer of the name from one district to another, so that even in Biblical geography the same name may at different periods indicate a widely different locality. Thus *Magog* in the Mosaic table may have been the Scythian people of the Caucasus, and in Ezekiel's record (xxxix. 6) that invading host which passed south as far as Egypt; *Gomer* at the former period north of the *Pontus Euxinus*, at the latter in *Asia Minor*. Again, the terms may have varied with the extending knowledge of the earth's surface: *Chittim*, originally *Cyprus*, was afterwards applied to the islands and coasts of *Greece* (Jer. ii. 10; Ezek. xxvii. 6), to *Macedonia* in the age of the *Maccabees* (1 Macc. i. 1, viii. 5), if not even to *Italy* in the prophecies of *Daniel* (xi. 30). Possibly a solution may be found for the occurrence of more than one *Dedan*, *Sheba*, and *Havilah*, in the belief that these names represent districts of a certain character, of which several might exist in different parts. From the above remarks it will appear how numerous are the elements of uncertainty introduced into this subject; unanimity of opinion is almost impossible; nor need it cause surprise, if even in the present article the views of different writers are found at variance. The principle on which the following statement has been compiled is this—to assign to the Mosaic table the narrowest limits within which the nations have been, according to the best authorities, located, and then to trace out, so far as our means admit, the changes which those nations experienced in Biblical times.

* Where so much difference of opinion exists, it has been thought better to modify but slightly the statements of the writer in the text. The student may be referred to Delitzsch [1887] and Dillmann* for a critical summary of the points in dispute, and for the special literature which examines them at length.—[F.]

Commencing (x. 2-4) from the West, the "isles of the Gentiles," i.e. the coasts and islands of the Mediterranean Sea, were occupied by the Japhetites in the following order:—Javan, the *Ionians*, perhaps Greeks generally; Elishah, perhaps the *Æolians* of Greece and Asia Minor (al. *Sicily*); Dodanim, the *Dardani*, in Illyricum (al. Rodanum, the *Rhodians* of the Aegean Sea); Tiras, perhaps the *Tyrsenes* of the Aegean (al. the Scythians near the river Tyras); Chittim (see above); Ashkenaz, here, probably, the Phrygians; Gomer (see above), and Tarshish of the Aegean Sea. In the North, Tubal, the *Tibareni*, in Pontus; Meshech, the *Moschi* in Colchis (possibly, however, Tibaranes and Moschi of a less northerly latitude; see Dillmann*); Magog (see above); Togarmah in (Western?) Armenia; and Madai in Media. The Hamites (x. 6-20) represent the southern parts of the known world: Cush, probably an appellative similar to the Greek *Æthiopia*, and possibly applicable to all the dark races of Arabia and Eastern Africa; Mizraim to Egypt (see above); Phut to Libya; Naphtuhim (possibly dwellers in Central Egypt), and Lehabim or Libyans; Caphtorim, the Cretans; Casluhim, possibly the dwellers between the Nile and the border of Palestine; Pathrusim in the Thebaid; Seba on the Arabian Sea (?); Sabtah, on the western coast of the Arabian Sea; Havilah, nearer to the Straits of Bab-el-Mandeb; and Sabtechah, possibly on the Persian Gulf;—Raamah and Dedan, according to some, on the south-western coast of the same gulf; according to others, African tribes. In the central part of the world (x. 21-31) were the Shemites: Elam, *Elymais* and *Susiana*, in Persia; Asshur in *Assyria*; Arphazad, *Arrapachitis*, in Northern *Assyria*; Lud in *Lydia* (though not limiting the name to the western province of Asia Minor); Aram in Syria and Mesopotamia, and the descendants of Joktan in the peninsula of Arabia.

This sketch is filled up, so far as regards Northern Arabia, by a subsequent account, in xxv. 12, &c. (consult the *Comm.* of Delitzsch [1887] and Dillmann*), of the settlement of the descendants of Abraham by Keturah and of Ishmael. The geographical position of many is uncertain; but we are acquainted with that of the Midianites among the sons of Abraham, and of Nebaioth, *Nabataea*; of Kedar, *Kedrei* (Plin. v. 12); of Dumah, *Dumaiitha* (Ptol. v. 19; in the district of El-Gau), among the sons of Ishmael. Some of the names in this passage are thought by some critics to have a geographical origin, as Mibsam, a *spice-bearing* land, Tema, an *arid* or *southern* land; but such etymologies are precarious. Again, in ch. xxxvi. we have some particulars with regard to the country immediately to the south of Palestine, where the aboriginal Horites, the *Troglodytes* of the mountainous districts in the eastern part of Arabia Petraea, were displaced by the descendants of Esau. The narrative shows an intimate acquaintance with this district, as we have the names of various towns—Dihabab, Bozrah, Avith, Masrekah, Rehoboth, and Pau, few of which have any historical importance. The Peninsula of Sinai is particularly described in the Book of Exodus.

The countries, however, to which historical interest attaches are Mesopotamia and Egypt.

The hereditary connexion of the Hebrews with the former of these districts, and the importance of the dynasties which bore away in it, make it by far the most prominent feature in the map of the ancient world; its designation in the Book of Genesis is Padan-aram, or Aram-Naharaim: in the north was Ur of the Chaldees, and the Haran to which Terah migrated; in the south was the plain of Shinar (Babylonia proper), and the seat of Nimrod's capital, Babel; in his realm were the cities of Accad (*Ak-ka-di* of the inscription of Nebuchadnezzar I.), Calneh, Nineveh (Kouyunjik) and its suburb Rehoboth-Ir, Calah (the Kalhu of the inscriptions and the present Nimrod), Resen (between Nineveh and Calah), and Erech (*Warka*, Gen. x. 10-12). From the same district issued the warlike expedition headed by the kings of Shinar (see above), Ellasar (probably *Larsam*), Elam, and Goiim (R. V.), the object of which apparently was to open the commercial route to the Aelanitic Gulf (Gen. xiv.), and which succeeded in the temporary subjection of all the intervening nations—the Rephaim in Ashteroth-Karnaim (Bashan), the Zuzim in Ham (broadly speaking, Ammon), the Emim in Shaveh (R. V. Shaveh-Kiriathaim; broadly, Moab), and the district of the Amalekites (to the south, or, broadly, the Negeb). It is, in short, to the early predominance of the eastern dynasties that we are indebted for the few geographical details which we possess regarding those and the intervening districts. The Egyptian captivity introduces to our notice some of the localities in Lower Egypt, viz. the province of Goshen, and the towns Rameses (Gen. xlvii. 11); On, *Heliopolis* (Gen. xli. 45); Pithom (Ex. i. 11); and Migdol, lately re-discovered (Ex. xiv. 2).

During the period of the Judges, the Hebrews had no opportunity of advancing their knowledge of the outer world; but with the extension of their territory under David and Solomon, and the commercial treaties entered into by the latter with the Phœnicians in the north and the Egyptians in the south, a new era commenced. It is difficult to estimate the amount of information which the Hebrews derived from the Phœnicians, inasmuch as the general policy of those enterprising traders was to keep other nations in the dark as to the localities they visited; but there can be no doubt that it was from them that the Hebrews learned the route to Ophir, by which the trade with India and South Africa was carried on, and that they also became acquainted with the positions and productions of a great number of regions comparatively unknown. From Ezek. xxvii. (consult the *Commentaries*, e.g. of Cornill and Orelli) we may form some idea of the extended ideas of geography which the Hebrews had obtained: we have notice of the mineral wealth of Spain, the dyes of the Aegean Sea, the famed horses of Armenia, the yarns and embroideries of Assyria, the iron of South Arabia, the spices and precious stones of the Yemen, and the caravan trade which was carried on with India through the entrepôts on the Persian Gulf. As the Prophet does not profess to give a systematic enumeration of the places, but selects some from each quarter of the earth, it may fairly be inferred that more information was obtained from that source. Whether it was from thence that the

Hebrews heard of the tribes living on the northern coasts of the Euxine—the Scythians (Magog; see above), the Cimmerians (Gomer), &c. (on עֲנָן in Ezek. xxxviii. 2, see MV.¹¹ and Comm.)—is uncertain: the inroad of the northern hordes, which occurred about Ezekiel's time, may have drawn attention to that quarter.

The progress of information on the side of Africa is clearly marked: the distinction between Upper and Lower Egypt is shown by the application of the name Pathros to the former (Ezek. xxix. 14). Memphis, the capital of Lower Egypt, is first mentioned in Hosea (ix. 6) under the name Moph, and afterwards frequently as Noph (Is. xix. 13; see MV.¹¹); Thebes, the capital of Upper Egypt, at a later period, as No-Ammon (Nah. iii. 8) and No (Jer. xli. 25); and the distant Syene (*Assouan*; Ezek. xxix. 10). Several other towns are noticed in the Delta: Sin, *Pelusium* (Ezek. xxx. 15); Pibeseth, *Bubastis* (Ezek. xxx. 17); Zoan, *Tanis* (Is. xix. 11); Tahapanes, or Tahpanhes, *Daphne* (Jer. ii. 16); *Heliopolis*, under the Hebraised form *Bethshemesh* (Jer. xliii. 13); and, higher up the Nile, Hanes, *Heracleopolis* (Is. xxx. 4). The position of certain nations seems to have been better ascertained. Cush (*Aethiopia*) was fixed immediately to the south of Egypt, where Tirhakah held sway with *Napata* for his capital (2 K. xix. 9); the Lubim (*Libyans*, Ezek. xxx. 5; R. V. Pnt. See Comm. in loco) appear as allies of Egypt; and with them a people not previously noticed, the Sukkiims, the *Troglodytes* of the western coast of the Red Sea (2 Ch. xii. 3); the Ludim and Phut are mentioned in the same connexion (Ezek. xxx. 5).

The wars with the Assyrians and Babylonians, and the captivities which followed, bring us back again to the geography of the East. Incidental notice is taken of several important places in connexion with these events: the capital of Persia, *Shushan*, *Susa* (Dan. viii. 2); that of Media, *Achmetha*, *Ecbatana* (Ezr. vi. 2); Hena, *Ivah*, and *Sepharvaim*, on the Euphrates (2 K. xviii. 34); *Carchemish*, *Circocianum*, on the same river (Is. x. 9); *Gozan* and *Halah*, on the borders of Media (2 K. xvii. 6); *Kir*, a place not yet identified (2 K. xvi. 9). The names of Persia (2 Ch. xxxvi. 20) and India (*Eath*, i. 1) now occur: whether the far-distant *China* is noticed at an earlier period under the name *Sinim* (Is. xlix. 12), admits of doubt.

The names of Greece and Italy are hardly noticed in Hebrew geography: the former, in its widest sense of *Ionia*, occurs in Gen. x., Is. lxvi. 19, &c., under the name of *Javan*. In Dan. viii. 21, the term definitely applies to Greece. If Italy is described at all, it is under the name *Chittim* (Dan. xi. 30).

In the Maccabaean era the classical names came into common use: Crete, Sparta, Delos, Sicyon, Caria, Cilicia, and other familiar names are noticed (1 Macc. x. 67, xi. 14, xv. 23); *Asia*, in a restricted sense, as = the Syrian Empire (1 Macc. viii. 6); *Hispania* and *Rome* (1 Macc. viii. 1-3). Henceforward the geography of the Bible, as far as foreign lands are concerned, is absorbed in the wider field of classical geography. It is hardly necessary to add that the use of classical designations in our Authorized Version is in many instances a departure from the

Hebrew text: for instance, *Mesopotamia* stands for *Aram-Naharaim* (Gen. xxiv. 10); *Ethiopia* for *Cush* (2 K. xix. 9); the *Chaldeans* for *Chasdim* (Job i. 17); *Graecia* for *Javan* (Dan. viii. 21); *Egypt* for *Misraim* (Gen. xlii. 10); *Armenia* for *Ararat* (2 K. xix. 37); *Assyria* for *Asshur* (Gen. ii. 14); *Idumaea* for *Edom* (Is. xxxiv. 5); and *Syria* for *Aram*. Arabia, it may be observed, does occur as an original Hebrew name in the later Books (Is. xxi. 13; cp. Delitzsch⁴ in loco), but probably in a restricted sense as applicable to a single tribe.

[W. L. B.] [F.]

EARTHENWARE. [POTTERY.]

EARTHQUAKE (עָרָר). Earthquakes, more or less violent, are of frequent occurrence in Palestine, as might be expected from the numerous traces of volcanic agency visible in the features of that country. The recorded instances, however, are but few; the most remarkable occurred in the reign of Uzziah (Amos i. 1; Zech. xiv. 5), which Josephus (*Ant.* ix. 10, § 4) connected with the sacrifice and consequent punishment of that monarch (2 Ch. xxvi. 16 sq.). From Zech. xiv. 4 we are led to infer that a great convulsion took place at this time in the Mount of Olives, the mountain being split so as to leave a valley between its summits. Josephus records something of the sort, but his account is by no means clear, for his words (τοῖς ἰσχυροῖς ἀποφάγῃται τὸ ἕμισυ τοῦ κατὰ τὴν θύραν βουνου) can hardly mean the *western half of the mountain*, as Whiston seems to think, but the *half of the western mountain*, i.e. of the Mount of Evil Counsel, though it is not clear why this height particularly should be termed the *western mountain*. We cannot but think that the two accounts have the same foundation, and that the Mount of Olives was really affected by the earthquake. Hitzig (*Comm.* in *Zech.*) suggests that the name מְרִירָה, "*corruption*," may have originated at this time, the rolling down of the side of the hill, as described by Josephus, entitling it to be described as the *destroying mountain*, in the sense in which the term occurs in Jer. li. 25. An earthquake occurred at the time of our Saviour's Crucifixion (*Matt.* xxvii. 51-54), which may be deemed miraculous rather from the conjunction of circumstances than from the nature of the phenomenon itself, for it is described in the usual terms (ἡ γῆ ἐσεισένη). Josephus (*Ant.* xv. 5, § 2) records a very violent earthquake, that occurred B.C. 31, in which 10,000 people perished; and in 1837 an earthquake was very destructive in Galilee (*Robinson, Bibl. Res.* iii. 321 sq.). Earthquakes are not unfrequently accompanied by fissures of the earth's surface; instances of this are recorded in connexion with the destruction of Korah and his company (*Num.* xvi. 32; cp. *Joseph. Ant.* iv. 3, § 3), and at the time of our Lord's death (*Matt.* xxvii. 51); the former may be paralleled by a similar occurrence at Oppido in Calabria A.D. 1783, where the earth opened to the extent of 500 and a depth of more than 200 feet: and again by the sinking of the bed of the Tagus at Lisbon, in which the quay was swallowed up (*Pfaff, Schöpfungsgesch.* p. 115). These depressions are sometimes on a very large scale: the subsidence

of the valley of Siddim at the southern extremity of the Dead Sea may be attributed to an earthquake; similar depressions have occurred in many districts, the most remarkable being the submersion and subsequent re-elevation of the temple of Serapis at Puteoli. The frequency of earthquakes about the Dead Sea is possibly testified in the name *BELA* (Gen. xiv. 2; cp. Jerome *ad Is.* xv.). Darkness is frequently a concomitant of earthquake. [DARKNESS.] The awe which an earthquake never fails to inspire, "conveying the idea of some universal and unlimited danger" (Humboldt's *Kosmos*, i. 212), rendered it a fitting token of the Presence of Jehovah (1 K. xix. 11); hence it is frequently connected with His appearance (Judg. v. 4; 2 Sam. xxii. 8; Pa. lxxvii. 18, xcvii. 4, civ. 32; Amos viii. 8; Hab. iii. 10). [W. L. B.]

EAST (מִזְרָח, מִזְרָח). The Hebrew terms, descriptive of the *east*, differ in idea, and, to a certain extent, in application: (1) *kedem* properly means that which is *before* or *in front of* a person, and was applied to the east from the custom of turning in that direction when describing the points of the compass, *before*, *behind*, the *right* and the *left*, representing respectively E., W., S., and N. (Job xxiii. 8, 9); (2) *mizrach* means the place of the sun's *rising*, and strictly answers to the Greek *anatolē* and the Latin *oriens*; sometimes the full expression מִזְרָח שֶׁל־ is used (Judg. xi. 18; Is. xli. 25), and sometimes *kedem* and *mizrach* are used together (e.g. Ex. xxvii. 13; Josh. xix. 12), which is after all not so tautologous as it appears to be in our translation, "on the east side eastward." Bearing in mind this etymological distinction, it is natural that *kedem* should be used when the four quarters of the world are described (as in Gen. xiii. 14, xxviii. 14; Job xxiii. 8, 9; Ezek. xlvii. 18 sq.), and *mizrach* when the east is only distinguished from the *west* (Josh. xi. 3; Pa. l. i, ciii. 12, cxlii. 3; Zech. viii. 7), or from some other single quarter (Dan. viii. 9, xi. 44; Amos viii. 12); exceptions to this usage occur in Pa. cvii. 3 and Is. xliii. 5, each, however, admitting of explanation. Again, *kedem* is used in a strictly geographical sense to describe a spot or country immediately *before* another in an easterly direction; hence it occurs in such passages as Gen. ii. 8, iii. 24, xi. 2, xiii. 11, xv. 6; and hence the subsequent application of the term, as a proper name (Gen. xxv. 6, *eastward, unto the land of Kedem*), to the lands lying immediately eastward of Palestine, viz. Arabia, Mesopotamia, and Babylonia [BENE-KEDEM]; on the other hand, *mizrach* is used of the *far east* with a less definite signification (Is. xli. 25; xliii. 5; xlv. 11). In describing *aspect* or *direction* the terms are used indifferently (cp. *kedem* in Lev. i. 16, and Josh. vii. 2 with *mizrach* in 2 Ch. v. 12, and 1 Ch. v. 10). The east seems to have been regarded as symbolical of *distance* (Is. xlv. 11), as the land stretched out in these directions without any known limit. In Is. ii. 6 it appears as the seat of witchery and similar arts (cp. Job xv. 2); adopting, with Delitzsch, מִזְרָח rather than מִזְרָח, preferred by Gesenius (*Thesaur.* p. 1193). In the LXX. *anatolai* is used both for *kedem* and *mizrach*. It should be observed that the expression is,

with but few exceptions (Dan. viii. 9; Rev. xxi. 13; cp. vii. 2, xvi. 12, from which it would seem to have been St. John's usage to insert ἡλίου), *anatolai* (Matt. ii. 1, viii. 11, xxiv. 27; Luke xiii. 29), and not *anatolē*. It is hardly possible that St. Matthew would use the two terms indifferently in succeeding verses (ii. 1, 2), particularly as he adds the article to *anatolē*, which is invariably absent in other cases (cp. Rev. xxi. 13). He seems to imply a definiteness in the locality—that it was the country called מִזְרָח, or *anatolē* (cp. the modern *Anatolia*), as distinct from the quarter or point of the compass (*anatolai*) in which it lay. In confirmation of this it may be noticed that in the only passage where the article is prefixed to *kedem* (Gen. x. 30), the term is used for a definite and restricted locality; viz. South Arabia. [W. L. B.]

EAST, or EASTERN SEA, THE. Ezek. xlvii. 18; Joel ii. 20; Zech. xiv. 8, marg. [SEA, THE SALT.] [W.]

EASTER (πάσχα; *pascha*). The occurrence of this word in the A. V. of Acts xii. 4—"intending after Easter to bring Him forth to the people"—is chiefly noticeable as an example of the want of consistency in the translators. In some of the earlier English Versions "Easter" had been the usual translation of *πάσχα*. Indeed Tyndale has it or "Easter-lamb" in every instance of the occurrence of the word but two, viz. Mark xiv. 12, John xviii. 28; and it is scarcely less frequent in the Version of Cramer and in the Genevan Testament of 1557. The Genevan Bible of 1560 substituted "Passover" everywhere; as did the Bishops' Bible, except in Acts xii. 4. In this it has been exactly followed by the A. V., of which it was taken as the basis. The translation of the Acts in the Bishops' Bible was entrusted to Cox, bishop of Ely, and it is probably owing to his desire to avoid "inkhorn terms" (see Westcott's *History of the English Bible*, p. 101) that the retention of "Easter" in this single passage is due, just as elsewhere throughout the Acts he has chosen or retained the most familiar rather than the most correct equivalents for the technical terms occurring in the Book, e.g. "deputy" (Acts xiii. 7, &c.), "serjeants" (xvi. 35), "town-clerk" (xix. 35), and "robbers of churches" (xix. 37). It is possible that the same principle may have influenced the translators of 1611 in retaining the word which would most naturally suggest the season of the year to the reader. The word has, however, happily disappeared from the R. V., in which it is replaced by the ordinary rendering "Passover." For all that regards the nature and celebration of the feast, see PASSOVER. [E. H. P.] [E. C. S. G.]

E'BAL (עִבְלָא = *strong* (?); Γαββα in Gen., A. Γαββα in 1 Ch.; *Ebal*). 1. One of the sons of Shobal the son of Seir (Gen. xxxvi. 23; 1 Ch. i. 40).

2. OBAL, the son of Joktan (1 Ch. i. 22, B. omits, A. Γεμδν; *Hebal*: cp. Gen. x. 28). Eleven of Kennicott's MSS., with the Syriac and

Arabic Versions, read עִבְלָא in 1 Ch. as in Gen. [W. A. W.] [F.]

EBAL,* MOUNT (עִבְלָא, *Mount of stone* (?); ὄρος Γαβδάλ; Joseph. Γαβδάλος; *Mons Hebal*), a mount in the Promised Land, on which, according to the command of Moses, the Israelites were, after their entrance on the Promised Land, to "put" the curse which should fall upon them if they disobeyed the commandments of Jehovah. The blessing consequent on obedience was to be similarly localised on Mount Gerizim (Deut. xi. 26-29). This was to be accomplished by a ceremony in which half the tribes stood on the one mount and half on the other; those on Gerizim responding to and affirming blessings, those on Ebal curses, as pronounced by the Levites, who remained with the Ark in the centre of the intervening space (cp. Deut. xxvii. 11-26 with Josh. viii. 30-35, with Joseph. *Ant.* iv. 8, § 44, and with the comments of the Talmud [*Sota*, vii. § 5], quoted in Herzheimer's *Pentateuch*). The choice of the one as the Mount of Cursing and the other as the Mount of Blessing does not rest upon such reasons as that the one was less fruitful than the other (see below), but probably on the fact that according to due orientation (Deut. xi. 30) Ebal would be on the left of a spectator and Gerizim to his right, and according to the conception of the Israelite the right represents the side of happiness and blessing (Gen. xxv. 18. See Dillmann² on Deut. xi. 29). Notwithstanding the ban thus apparently laid on Ebal, it was further appointed to be the site of the first great Altar to be erected to Jehovah; an Altar of large unhewn stones plastered with lime and inscribed with the words of the Law (Deut. xxvii. 2-8). On this Altar peace-offerings were to be offered, and round it a sacrificial feast was to take place, with other rejoicings (cp. 6, 7). Scholars disagree as to whether there were to be two erections—a cromlech and an altar—or an Altar only, with the Law inscribed on its stones. The latter was the view of Josephus (*Ant.* iv. 8, § 44; v. 1, § 19); the former is unhesitatingly adopted by Keil and Dillmann² (on Josh. viii. 32). The words may perhaps bear either sense.

The terms of Moses' injunction seem to infer that no delay was to take place in carrying out this symbolical transaction. It was to be "on the day" that Jordan was crossed (xxvii. 2), before they "went in unto the land flowing with milk and honey" (v. 3). And accordingly Joshua appears to have seized the earliest practicable moment, after the pressing affairs of the siege of Jericho, the execution of Achan, and the destruction of Ai had been concluded, to carry out the command (Josh. viii. 30-35). After this Ebal appears no more in the sacred story.

The question now arises, where were Ebal and Gerizim situated? The all but unanimous reply to this is, that they are the mounts which form the sides of the fertile valley in which lies *Nāblus*, the ancient SHECHEM—Ebal on the north and Gerizim on the south. [See Map under GERIZIM.]

* If, as Gesenius suggests, Gerizim was so called from the Gerizites, Ebal may have taken its name from the ancient Edomite tribe of Ebal ben Shobal.

² In LXX. B. of 2 K. xxiii. 6, Γαβδάλ is read instead of the Geba of Benjamin. The LXX. A., as usual, is in accordance with the Hebrew, Γαβαδ.

(1) It is plain from the passages already quoted that they were situated near together, with a valley between.

(2) Gerizim was very near Shechem (Judg. ix. 7), and in Josephus's time their names appear to have been attached to the mountains, which were then, as now, Ebal on the north and Gerizim on the south. Since that they have been mentioned by Benjamin of Tudela (*Asher*, i. 66), and among modern travellers by Mandrell (*Mod. Trav.* p. 432).

The main impediment to our entire reception of this view rests in the terms of the first mention of the place by Moses in Deut. xi. 30: A. V. "Are they not on the other side (R. V. "beyond") Jordan, by the way where the sun goeth down (R. V. "behind the way of the going down of the sun")", in the land of the Canaanites, which dwell in the champaign (R. V. "the Arabah") over against Gilgal, beside the plains (R. V. "oaks," marg. *terebintus*) of Moreh?" Here the mention of Gilgal, which was in the valley of the Jordan near Jericho, of the valley itself (*Arabah*, mistranslated by A. V. here only "champaign"), and of the Canaanites who dwelt there, and also the other terms of the injunction of Moses, as already noticed, seem to imply that Ebal and Gerizim were in the immediate neighbourhood of Jericho. And this is strengthened by the narrative of Joshua, who appears to have carried out the prescribed ceremonial on the mounts while his camp was at Gilgal (cp. vii. 2, ix. 6), and before he had (at least before any account of his having) made his way so far into the interior of the country as Shechem.

This is the view taken by Eusebius (*OS*¹ p. 242, 79; p. 243, 89; Γαβδάλ). He does not quote the passage in Deut., but seems to be led to his opinion rather by the difficulty of the mountains at Shechem being too far apart to admit of the blessings and cursings being heard, and also by his desire to contradict the Samaritans; add to this that he speaks from no personal knowledge, but simply from hearsay (*ἀέγεται*), as to the existence of two such hills in the Jordan valley. The notice of Eusebius is merely translated by Jerome (*OS*² p. 126, 4), with a shade more of animosity to the Samaritans (*vehementer errant*), and expression of difficulty as to the distance, but without any additional information. Procopius and Epiphanius also followed Eusebius, but their mistakes have been disposed of by Reland (*Pal.* pp. 503-4; *Miscell.* pp. 129-133).

With regard to the passage in Deut., it will perhaps assume a different aspect on examination. (1) Moses is represented as speaking from the east side of the Jordan, before anything was known of the country on the west beyond the exaggerated reports of the spies, and when everything there was wrapped in mystery, and localities and distances had not assumed their due proportions. (2) A closer rendering of the verse is as follows: "Are they not on the other side the Jordan, beyond—*עַל־פְּנֵי*, the word rendered "the backside" [R. V. "the back"] of the desert," in Ex. iii. 1)—the road to the sunset, in the land of the Canaanite who dwells in the Arabah over against Gilgal, near the terebinths of Moreh." If this rendering is correct, a great part of the difficulty has dis-

appeared (see Dillmann² in loco). Gilgal no longer marks the site of Ebal and Gerizim, but of the dwelling of the Canaanites, who were, it is true, the first to encounter the Israelites on the other side of the river, in their native lowlands, but who, we have it actually on record, were both in the time of Abraham (Gen. xii. 6) and of the conquest (Josh. xvii. 18) located about Shechem. The word rendered "beyond" by R. V. is not represented at all in the A. V., and it certainly throws the locality much further back; and lastly there is the striking landmark of the trees of Moreh, which were standing by Shechem when Abraham first entered the land, and whose name possibly survived in Morthia, or Mamortha (Joa. B. J. iv. 8, § 1, Μαρθία), a name of Shechem found on coins of the Roman period (Reiland, *Miscell.* pp. 137-9).

In accordance with this is the addition in the Samaritan Pentateuch, after the words "the terebinths of Moreh," at the end of Deut. xi. 30, of the words "over against Shechem." This addition is the more credible because there is not, as in the case noticed afterwards, any apparent motive for it. If this interpretation be accepted, the next verse (v. 31) gains a fresh force: "For ye are to pass over Jordan" [not only to meet the Canaanites immediately on the other side, but] "to go in to possess the land" [the whole of the country, even the heart of it, where these mountains are situated (glancing back to v. 29)], "the land which the Lord your God giveth you; and ye shall possess it, and dwell therein" (R. V.). And it may also be asked whether the significance of the whole solemn ceremonial of the blessing and cursing is not missed if we understand it as taking place directly a footing had been obtained on the outskirts of the country, and not as acted in the heart of the conquered land, in its most prominent natural position, and close to its oldest city—Shechem?

This is evidently the view taken by Josephus. His statement (*Ant.* v. 1, § 19) is that it took place after the subjugation of the country and the establishment of the Tabernacle at Shiloh. He has no misgivings as to the situation of the mountains. They were at Shechem (ἐν Σικκίμων), and from thence, after the ceremony, the people returned to Shiloh.

The narrative of Joshua is more puzzling. But even with regard to this something may be said. It will be at once perceived that the Book contains no account of the conquest of the centre of the country, of those portions which were afterwards the mountain of Ephraim, Esdraelon, or Galilee. We lose Joshua at Gilgal, after the conquest of the south, to find him again suddenly at the waters of Merom in the extreme north (x. 43, xi. 7). Of his intermediate proceedings the only record that seems to have escaped is the fragment contained in viii. 30-35 (see Dillmann² in loco). Many modern writers regard the passage as an interpolation where it is, and would place it after xi. 23). Nor should it be overlooked that some doubt is thrown on this fragment by its omission in both the B. and A. MSS. of the LXX.

The distance of Ebal and Gerizim from each other is not such a stumbling-block to us as it was to Eusebius; though it is difficult to understand how he and Jerome should have been

ignorant of the distance to which the voice will travel in the clear elastic atmosphere of the East. Prof. Stanley has given some instances of this (*S. & P.* p. 13); others equally remarkable were observed by the writer; and he has been informed by a gentleman long resident in the neighbourhood that a voice can be heard without difficulty across the valley separating the two spots in question (see also Bonar, p. 371, and Dr. Winslow's testimony, *PEFQy. Stat.* 1891, p. 79).

It is not necessary to suppose that every word was heard by the spectators; the "blessings" and "cursings" were probably as well known to the Israelites as the Commandments are to us, and the responses would be taken up when the voice of the reader ceased. The valley between Ebal and Gerizim rises gently eastward, to the water-parting between the waters of the Mediterranean and the Jordan, and at this point there is a grand natural amphitheatre formed by a recess in either mountain. There is no other place in Palestine so convenient for the assembly of a large body of men within the limits to which the human voice can travel, and where at the same time every individual would be able to see what was going on. Nothing is wanting in the natural beauty of the site to add to the solemnity and impressiveness of a scene such as that described in Josh. viii. 32-35 (Wilson, *PEFQy. Stat.* 1873, pp. 66-71).

It is well known that one of the most serious variations between the Hebrew text of the Pentateuch and the Samaritan text is in reference to Ebal and Gerizim. In Deut. xxvii. 4, the Samaritan has Gerizim, followed by LXX., Vulg., while the Hebrew (as in E. V.) has Ebal, as the mount on which the Altar to Jehovah and the inscription of the Law were to be erected. Upon this basis they ground the sanctity of Gerizim and the authenticity of the temple and holy place, which did exist and still exist there. The arguments upon this difficult and hopeless question will be found in Kennicott (*Dissert.* 2), and in the reply of Verschoor (Leovard. 1775; quoted by Gesenius, *de Pent. Sam.* p. 61). Two points may merely be glanced at here which have apparently escaped notice. 1. Both agree that Ebal was the mount on which the cursings were to rest, Gerizim that for the blessings. It appears inconsistent that Ebal, the mount of cursing, should be the site of the Altar and the record of the Law, while Gerizim, the mount of blessing, should remain unoccupied by sanctuary of any kind. 2. Taking into account the known predilection of Orientals for ancient sites on which to fix their sanctuaries, it is more easy to believe (in the absence of any evidence to the contrary) that in building their temple on Gerizim, the Samaritans were making use of a spot already enjoying a reputation for sanctity, than that they built on a place upon which the curse was laid in the records which they received equally with the Jews. Thus the very fact of the occupation of Gerizim by the Samaritans would seem an argument for its original sanctity.

The summit of Ebal is a comparatively level plateau of some extent. There is no actual peak, but the ground rises towards the west, and attains its greatest elevation (3077 feet) near a small pile of stones. The view from this

point is one of the finest and most extensive in Palestine, embracing *Sufed* and Mount Hermon on the north, *Jaffa* and the maritime plain on the west, the heights above Bethel on the south, and the *Haurán* plateau on the east. The upper portion of the mountain is nummulitic limestone, and the surface of the plateau is so cracked and broken that it has the appearance of being covered by a rude pavement. Towards the east end is the curious *Kh. Kuneisa*, or *Kuleisa*; it is an enclosure 92 feet square with walls 20 feet thick, built of selected, unhewn stones without mortar; in the thickness of the wall are the remains of several chambers, but there is nothing to connect the building with the altar erected by Joshua.

The contrast between the rich vegetation on Gerizim and the barrenness of Ebal has often been commented upon by travellers (see Benjamin of Tudela, &c.). This arises from the structure of the rock, for the strata dip towards the N. across the valley, and prevent the existence of springs on the southern slope of Ebal. The mountain, however, is by no means sterile: for a considerable height it is clothed with luxuriant gardens of cactus, and above these, to the very summit, rises a succession of terraces well supplied with cisterns that speak of a careful system of cultivation and irrigation at a former period. Many of these terraces are well preserved, and planted in spring-time with corn which grows as well as that planted on Gerizim. At the foot of the mountain there is a Moslem cemetery, and many rock-hewn tombs are to be found in the gardens of cactus. The slopes of Ebal towards the valley are rather steeper than those of Gerizim; it is also the higher mountain of the two. The altitudes are:—

<i>Náblus</i> , above sea,	1675 ft.
Gerizim, „	2849 ft. ... above <i>Náblus</i> , 1174 ft.
Ebal, „	3077 ft. ... „ „ 1402 ft.

The modern name of Ebal is *Jebel Sitti Eslemiyeh*, from a Muhammadan female saint, whose tomb stands high up on the southern slope opposite *Náblus*. It is also called *J. 'Amád ed Dín*, from a sheikh whose tomb is further to the west (*PEF. Mem.* ii. 170, 186, 220; *PEFQy. Stat.* 1873, p. 66; Guérin, *Samarie*, ii. 446–453).

On the south-east shoulder is a ruined site bearing the name of *'Askur* (*Rob.* iii. 132). [*G.*] [*W.*]

E'BED. 1. (עֶבֶד) = *slave*; but many MSS., and the Syr. and Arab. Versions, have עֶבֶד, *EBER*: B. 'עֶבֶדָה, A. 'ABĕ, except in v. 35 *zabēr*; *Ebed* and *Obed*, father of GAAL, who with his brethren assisted the men of Shechem in their revolt against Abimelech (*Judg.* ix. 26, 28, 30, 31, 35).

2. (עֶבֶד); B. 'עֶבֶדָה, A. 'ABĕ; *Abed*, son of Jonathan; one of the Bene-Adin who returned from Babylon with Ezra (*Ezra* viii. 6). In 1 Edras the name is given as OBETH.

It would add greatly to the force of many passages in the O. T. if the word "slave" or "bondman" were appropriated to the Hebrew term *Ebed*, while "servant," "attendant," or "minister" were used to translate *Nā'ar*, *Mesḥaret*, &c. In the addresses of subjects to a ruler, the Oriental character of the transaction would come home to us at once if we read

"what saith my lord to his slave"—the very form still in use in the East, and familiar to us all in the *Arabian Nights* and other Oriental works—instead of "his servant." [*G.*] [*W.*]

E'BED-ME'LECH (עֶבֶד מֶלֶךְ; 'ABĕmēlēch; *Abdemelech*), an Aethiopian eunuch in the service of king Zedekiah, through whose interference Jeremiah was released from prison, and who was on that account preserved from harm at the taking of Jerusalem (*Jer.* xxxviii. 7 sq.; xxxix. 15 sq.). His name seems to be an official title = *King's slave*, i.e. *minister*.

EBEN-EZER (עֵבֶן עֶזֶר; 'EBĕnēzer = the stone of help: BA. 'ABĕrē(ep); Joseph. *Αἶθος ἐκσφύρις*: *lapis Adjutorii*), a stone set up by Samuel after a signal defeat of the Philistines, as a memorial of the "help" received on the occasion from Jehovah (*1 Sam.* vii. 12). "He called the name of it Ebenezer, saying, Hitherto hath Jehovah helped us" (*axarānu, יֵצֵא*). Its position is carefully defined as between MIZPEH—"the watch-tower"—and SHEN, "the tooth" or "crag." Neither of these points, however, have been identified with any certainty—the latter, being probably a well-known (cp. LXX. and Syr.) landmark, not at all. According to Josephus's record of the transaction (*Ant.* vi. 2, § 2), the stone was erected to mark the limit of the victory, a spot which he calls Korraia, but in the Hebrew BETHCAR. It is remarkable that of the occurrences of the name Eben-ezer, two, recalling the defeat of Israel by the Philistines (*1 Sam.* iv. 1 [B. 'ABĕrē(ep), A. 'ABĕrē], v. 1 [B. 'ABĕrēp, A. 'ABĕrē(ep)], are found in the order of the narrative before the place received its title. This *prolepsis* would not unnaturally happen in a record written after the event, especially in the case of a spot so noted as Eben-ezer must have been.

In the *Onomasticon* (*OS*² p. 226, 15) Ebenezer ('ABĕrē(ep) is said to have been near Bethshemes, 'Ain Shems, on the road from Aelia to Ascalon, and the site has apparently been recovered in *Deir 'Abān*, a large village 2 miles E. of 'Ain Shems (*PEF. Mem.* iii. 24), and close to the Roman road to Jerusalem. M. Clermont-Ganneau, who connects this place with "the great Abel" of *1 Sam.* vi. 18 [ABEL, 7], has ingeniously suggested that the Ark was brought back to the place where it was captured; and that it was on the same ground that Samuel won his signal victory over the Philistines (*PEFQy. Stat.* 1877, pp. 154–6). Major Conder, who also places Ebenezer at *Deir 'Abān*, identifies Mizpeh with *Kh. Shūfa*, and Bethcar with *Akur* (*PEFQy. Stat.* 1876, p. 149). Dr. Chaplin identifies Ebenezer with *Beit Iksa*, and Shen with *Deir Yesin* (*PEFQy. Stat.* 1888, p. 263). [*G.*] [*W.*]

E'BER (עֶבֶר; 'EBĕp; *Heber*). 1. Son of Salah, and great-grandson of Shem (*Gen.* x. 24. xi. 14–17; *1 Ch.* i. 19). See HEBER; and for the factitious importance attached to this patriarch, and based upon *Gen.* x. 21, *Nom.* xiv. 24, see HEBREW. [*T. E. B.*]

* In *lv.* 1 the definite article prefixed to both words exhibits their opposition to each other. Cp. Driver, *Notes on the Hebrew Text of the BB. of Samuel*, in loco; Kwald, *Ausführ. Lehrb.* § 290 d.

2. עֲבָרָה; 'עבֶרֶת; *Heber*. Son of Elpaal and descendant of Shaharaim of the tribe of Benjamin (1 Ch. viii. 12). He was one of the founders of Ono and Led with their surrounding villages.

3. A priest, who represented the family of Amok, in the days of Joiakim the son of Jeshua (Neh. xii. 20; BN* A. omit, נֶעֱמִיָּה 'אֲמוֹנָה בֶּתֶד). [W. A. W.] [F.]

EBI'ASAPH (עֲבִי'אסָפִי; *Abiasaph*), a Kohathite Levite of the family of Korah, one of the forefathers of the prophet Samuel and of Heman the singer (1 Ch. vi. 23 [B. 'Aβιασάφ, A. 'Aβιασάφ], r. 37 [B. 'Aβιασάφ, B. ^{vid} -φ]). The same man is probably intended in ix. 19. The name appears also to be identical with ABISAPH (which see), and in one passage (1 Ch. xxvi. 1) to be abbreviated to Asaph [so A.; B. 'Aβιδ, Σαφάφ]. [W. A. W.] [F.]

EBONY (עֲבֹנִים, *hobnim*; καὶ τοῖς εἰσργουμένοις; * ἐβένους, Symm.: [*dentēs*] *hebeninos*) occurs only in Ezek. xxvii. 15, as one of the valuable commodities imported into Tyre by the men of Dedan. [DEDAN.] It is mentioned together with "horns of ivory," and it may hence be reasonably conjectured that ivory and ebony came from the same country. The

Diospyrus ebenus.

ancients held the black heart-wood in high esteem. Herodotus (iii. 97) mentions ebony (φάλαγγες ἐβένου) as one of the precious substances presented by the people of Ethiopia to the king of Persia. Dioscorides (i. 130) speaks of two kinds of ebony, an Indian and an Ethiopian; he gives the preference to the latter kind. Virgil (*Georg.* ii. 116) says that "India alone produces the black ebony;" and Theophrastus (*Hist. Plant.* iv. 4, § 6) asserts that "ebony is peculiar to India." This, however, is an error, as trees of this order are found in all the tropical and in some semi-tropical parts of the Old World, all of which yield a hard black heart-wood. The number of known species of the order EBENACEÆ is about 160. Those species of which the wood has the greatest commercial value belong generally to the genus *Diospyrus*, of which the most important are *Diospyrus ebenus* and *Diospyrus melanoxylon* from India

and Ceylon; *Diospyrus ebenastr* from Ceylon, and *Diospyrus hirsuta*, which produces the variegated calamander wood of Ceylon. Any or all of these may have been imported into the Mediterranean countries by the Phoenicians. Africa is equally rich in these ironwood-yielding trees. The Abyssinian ebony referred to by Herodotus is from *Diospyrus mespiliformis*, called "Aja" by the Abyssinians, who in ancient times exported it down the Nile; and which is also found through Central Africa, Mozambique, and Guinea. The latter region supplies many other kinds. *Diospyrus melanoxylon*, found also in Coromandel, is abundant in Senegal, while East and Southern Central Africa possess various species, among them *Euclea pseudobenus*, Mey., the "Zwartebbenhout" of the Boers. Among more northern kinds is the *Diospyrus kaki* of Japan, and the *Diospyrus lotus* of South-eastern Europe, which yielded the famous fruit which, according to the Greek poets, produced oblivion. Most of the ebony trees yield a sweet and edible fruit. The Greek word ἔβενος, the Latin *ebenus*, our "ebony," have all doubtless their origin in the Hebrew *hobnim*, a term which was thought to denote "wood as hard as stone" (cp. the German *Steinholz*, "fossil-wood;" see Gesenius, *Thes.* s. v., and qualify by MV.¹¹). It is probable that the product and material, or the plural form of this noun, is used to express the billets into which the ebony was cut previous to exportation, like our "logwood." See full discussions on the ebony of the ancients in Bochart, *Hieroz.* ii. 714; and Salmasius, *Plin. Exercitat.* p. 725 c: cp. also Royle, in Kitto's *Cycl.*, art. "Hobnim." According to Sir E. Tennent (*Ceylon*, i. 116), the wood of *Diospyrus ebenus*, which is abundant throughout all the flat country to the west of Trincomalee, "excels all others in the evenness and intensity of its colour. The heart of the trunk is the only portion which furnishes the extremely black part which is the ebony of commerce; but the trees are of such magnitude that reduced logs of 2 feet in diameter, and varying from 10 to 15 feet in length, can readily be procured from the forests at Trincomalee." [W. H.] [H. B. T.]

EBRO'NAH. [ABRONAH.]

ECA'NUS, one of the five swift scribes who attended on Esdras (2 Esd. xiv. 24).

ECBATANA (עֲכַבְתָּנָה; 'Aqaḏ, 'Ekḏāṭana; *Ecbatana*; Old Persian, *Haḡmatāna*; Semitic Babylonian, *Aganātana*, *Agamatāni*; Modern Persian, *Hamadān*). It is doubtful whether the name of this place is really contained in the Hebrew Scriptures. Some commentators understand the expression עֲכַבְתָּנָה, in Ezra vi. 2, differently, and translate it in *arca*, "in a coffer" (see Buxtorf and others, and so the A. V. in the margin). The LXX. B. however gives ἐν πόλει, "in a city," and A. ἐν 'Aqaḏ; R. V. "at Achmetha," and in marg. That is, *Ecbatana*, which favours the ordinary interpretation. If a city is meant, there is little doubt of one of the two Ecbatanas being intended, for except these towns there was no place in the province of the Medes "which contained a palace" (בֵּית מַלְכוּת), or where records are likely to have been deposited. The name עֲכַבְתָּנָה (*Achmetha*) too, which at first sight

* For the Heb. word used by the LXX. see Rosenmüller's *Schol.* ad Ezek. xxvii. 16.

seems somewhat remote from *Hagmatāna*, the ancient native name, is not really so, as it only wants the harder aspirate at the beginning, and the syllable *-na* at the end, whilst the *g* is changed into *ch* (= *kh*). In the apocryphal books Ecbatana is frequently mentioned (Tob. iii. 7, xiv. 12, 14; Judith i. 1, 2; 2 Macc. ix. 3, &c.); and uniformly with the later and less correct spelling of **Ekbatāna*, instead of the earlier and more accurate form, used by Herodotus, Aeschylus, and Ctesias, of **Arybatāna*.

Two cities of the name of Ecbatana seem to have existed in ancient times: one the capital of Northern Media, the Media Atropatēne of Strabo; the other the metropolis of the larger and more important province known as Media Magna (see Sir H. Rawlinson's paper on the Atropatenian Ecbatana, in the 10th volume of the *Journal of the Geographical Society*, art. ii.). The site of the former appears to be marked by the very curious ruins at *Takht-i-Sulciman* (lat. 36° 28', long. 47° 9'); while that of the latter is occupied by *Hamadan*, which is one of the most important cities of modern Persia. There is generally some difficulty in determining, when Ecbatana is mentioned, whether the northern or the southern metropolis is intended. Few writers are aware of the existence of the two cities, and they lie sufficiently near to one another for geographical notices in most cases to suit either site. The northern city was the "seven-walled town" described by Herodotus, and declared by him to have been the capital of Cyrus (Herod. i. 98-99, 153; cp. Mos. Choren. ii. 84); and it was thus most probably there that the roll was found which proved to Darius that Cyrus had really made a decree allowing the Jews to rebuild their temple.

Various descriptions of the northern city have come down to us, but none of them is completely to be depended on. That of the *Zendavesta* (*Vendidad*, Fargard II.) is the oldest, and the least exaggerated. "Jemshid," it is said, "erected a *Var*, or fortress, sufficiently large, and formed of squared blocks of stone; he assembled in the place a vast population, and stocked the surrounding country with cattle for their use. He caused the water of the great fortress to flow forth abundantly. And within the *var*, or fortress, he erected a lofty palace, encompassed with walls, and laid it out in many separate divisions, and there was no place, either in front or rear, to command and overawe the fortress." Herodotus, who ascribes the foundation of the city to the king Deioces, says: "The Medes were obedient to Deioces, and built the city now called Agbatana, the walls of which are of great size and strength, rising in circles one within the other. The plan of the place is that each of the walls should out-top the one beyond it by the battlements. The nature of the ground, which is a gentle hill, favours this arrangement in some degree, but it was mainly effected by art. The number of the circles is seven, the royal palace and the treasuries standing within the last. The circuit of the outer wall is nearly the same with that of Athens. Of this outer wall the battlements are white, of the next black, of the third scarlet, of the fourth blue, of the fifth orange: all these are coloured with paint. The last two have their battlements coated respectively with silver and gold.

All these fortifications Deioces caused to be raised for himself and his own palace. The people were required to build their dwellings outside the circuit of the walls" (Herod. i. 98-99). Finally, the book of Judith, probably the work of an Alexandrian Jew, professes to give a number of details, which appear to be drawn chiefly from the imagination of the writer (Judith i. 2-4).

The peculiar feature of the site of *Takht-i-Sulciman*, which Sir H. Rawlinson has proposed to identify with the Northern Ecbatana, is a conical hill rising to the height of about 150 feet above the plain, and covered both on its top and sides with massive ruins of the most antique and primitive character. A perfect enceinte, formed of large blocks of squared stone, may be traced round the entire hill along its brow; within there is an oval enclosure about 800 yards in its greatest and 400 in its least diameter, strewn with ruins, which cluster round a remarkable lake. This is an irregular basin, about 300 paces in circuit, filled with water exquisitely clear and pleasant to the taste, which is supplied in some unknown way from below, and which stands uniformly at the same level, whatever the quantity taken from it for irrigating the lands which lie at the foot of the hill. This hill itself is not perfectly isolated, though it appears so to those who approach it by the ordinary route. On three sides—the south, the west, and the north—the acclivity is steep and the height above the plain uniform, but on the east it abuts upon a hilly tract of ground, and here it is but slightly elevated above the adjacent country. The remarkable platform of hewn stone with which it is crowned, and on which the palace apparently stood, does not rise above the crest of the hill on the eastern side, and it cannot therefore have ever answered exactly to the description of Herodotus, as the eastern side could not anyhow admit of seven walls of circumvallation. It is doubted whether even the other sides were thus defended. Although the flanks on these sides are covered with ruins, "no traces remain of any wall but the upper one" (*As. Journ.* x. p. 52). Still, as the nature of the ground on three sides would allow this style of defence, and as the account in Herodotus is confirmed by the Armenian historian, writing clearly without knowledge of the earlier author, it seems best to suppose, that in the peaceful times of the Persian empire it was thought sufficient to preserve the upper enceinte, while the others were allowed to fall into decay, and ultimately were superseded by domestic buildings. With regard to the colouring of the walls, or rather of the battlements, which has been considered to mark especially the fabulous character of Herodotus' description, recent discoveries show that such a mode of ornamentation was actually in use at the period in question in a neighbouring country. The temple of the Seven Spheres at Borsippa was adorned almost exactly in the manner which Herodotus assigns to the Median capital [BABEL, TOWER OF]; and it does not seem at all improbable that, with the object of placing the city under the protection of the Seven Planets, the seven walls may have been coloured nearly as described. Herodotus has a little deranged the order of the hues, which should have been either black, orange,

scarlet, gold, white, blue, silver—as in the case of the Borsippa temple—or black, white, orange, blue, scarlet, silver, gold—if the order of the days dedicated to the planets were followed. Even the use of silver and gold in external ornamentation—which seems at first sight highly improbable—is found to have prevailed. Silver roofs were met with by the Greeks at the Southern Ecbatana (Polyb. x. 27, §§ 10–12); and there is reason to believe that at Borsippa the gold and silver stages of the temple were actually coated with those metals.

The Northern Ecbatana continued to be an important place down to the 13th century after Christ. By the Greeks and Romans it appears to have been known as Gaza, Gazaca, or Canzaca, “the treasured city,” on account of the wealth laid up in it; while by the Orientals it was termed *Shiz*. Its decay is referable to the Mogul conquests, c. A.D. 1200; and its final ruin is supposed to date from about the 15th or 16th century (*As. Soc. Journ.* vol. x. part i. p. 49).

cessors it was more than once taken and retaken, each time suffering largely at the hands of its conquerors (Polyb. x. 27). It was afterwards recognised as the metropolis of their empire by the Parthians (Oros. vi. 4). During the Arabian period, from the rise of Baghdad on the one hand and of Isfahan on the other, it sank into comparative insignificance; but still it has never descended below the rank of a provincial capital, and even in the present depressed condition of Persia it is a city of about 35,000 inhabitants. The Jews, curiously enough, regard it as the residence of Ahasuerus (Xerxes) — which is in Scripture declared to be Susa (Esth. i. 2, ii. 3, &c.)—and show within its precincts the tombs of Esther and Mordecai (Ker Porter, vol. ii. pp. 105–110)—a plain brick structure, consisting of a small cylindrical tower and dome, with small projections or wings on each side. In the tomb-chamber, a plain room paved with glazed tiles, are two wooden chests shaped like sarcophagi, situated over the spots

where the dead are said to lie. It is not distinguished by any remarkable peculiarities from other Oriental cities of the same size, except that it is an important trading centre, and possesses, as such, excellent and well-supplied bazaars and superior khans. The principal manufacture of the city is leather.

The city contains remains of ruined walls of great thickness, and towers of sun-dried bricks. Shafts and bases of columns (the moulding of one of the latter bearing an inscription of Artaxerxes), belonging to buildings of the Persian period, have also been found there; but

there is no eminence corresponding with that indicated by Polybius and Herodotus as the site of the castle or palace, save an inconsiderable hill to the east, with some Persian remains.

The Ecbatana of the book of Tobit is thought by Sir H. Rawlinson to be the northern city (see *As. Soc. Journ.* x. pt. i. pp. 137–141).

[G. R.] [T. G. P.]

ECCLESIASTES, OR THE PREACHER.

—1. TITLE. The word rendered Ecclesiastes by the LXX. is Qoheleth (קֹהֶלֶת, Aq. κωλέθ). In form it is a feminine of the qal participle active from *qahal*, ἐκκλησιάζειν, to assemble, or to be or act as a member of an assembly, which has led some to think that it denotes Wisdom personified, who harangues the assembled people as in Prov. i. 20 or viii. 1. But since it is used in six places out of seven (Eccles. i. 1, 2, 12; xii. 8, 9, 10) as a masculine name or appellative, it

Plan of Ecbatana.

EXPLANATION.

- | | |
|--|--|
| 1. Remains of a Fire-Temple. | 5. Cemetery. |
| 2. Ruined Mosque. | 6. Ridge of Rock called "the Dragon." |
| 3. Ancient buildings with shafts and capitals. | 7. Hill called "Tawilah," or "the Stable." |
| 4. Ruins of the Palace of Abakal Khan. | 8. Ruins of Kallistiah. |
| | 9. Rocky hill of Zindani-Soleiman. |

In the 2nd book of Maccabees (ix. 3, &c.) the Ecbatana mentioned is undoubtedly the southern city, now represented both in name and site by *Hamadan*. This place, situated on the northern flank of the great mountain called formerly Orontes, and now *Elwend*, was perhaps as ancient as the other, and is far better known in history. If not the Median capital of Cyrus, it was at any rate regarded from the time of Darius Hystaspis as the chief city of the Persian satrapy of Media, and as such it became the summer residence of the Persian kings from Darius downwards.* It was occupied by Alexander soon after the battle of Arbela (Arr. *Exp. Alex.* iii. 19), and at his decease passed under the dominion of the Seleucidae. In the wars between his suc-

* There is a tablet (in private hands) recording a loan, from a Babylonian officer stationed at Agamatani (Ecbatana), to one of his countrymen temporarily visiting the city. It is dated in Ab (July–August) in the 3rd year of Cyrus (535 a.c.). It is to be noted that the cuneiform inscriptions give no indications that there were two cities of this name.

is natural to presume that in the seventh also (vii. 27) it is masculine. If so, we have to consider whether we should not adopt a slight emendation of the text—reading not **מְדַבֵּר** **קְהֵלָת**, but **מְדַבֵּר קְהֵלָת**, as in xii. 8, unless we are content, with Rashbam, to refer for a parallel to the anomalous construction of DAVID as the subject of a feminine verb in 2 Sam. xiii. 39: “And king David longed (*fem.*) to go forth unto Absalom.” Cp. Ezek. xvi. 30: “How weak (*fem.*) is thine heart.” With Qoheleth, regarded as masculine, compare Sophereth (Neh. vii. 57), which is found likewise with the article (Ezra ii. 55), and the class of words of the corresponding form in Arabic, such as **بَاقِرٌ**, a deep investigator.

Qoheleth would thus be not Wisdom herself, but a wise man (xii. 9; cp. vii. 23), whose mouth she opens in the midst of the congregation (Ecclus. xv. 5). The invariable and frequent use of the derivatives of the root **קָהַל** of the assemblage not of things but of persons must govern the meaning of Qoheleth, which should accordingly denote not a compiler, nor an eclectic philosopher, nor one who amasses wisdom and experience, but one who convenes or addresses an assembly. Solomon, we read, was so called “because his words were spoken in the assembly,” with reference to 1 Kings viii. 1, 2 (Midr. *Charitha* on Eccles. i. 1). Jerome accordingly explains the term by *concionator*, whence Luther’s “Prediger” and our “Preacher.” The book is styled in Wiclif’s prologue, “*boe of talker to the puple or togider klepere*,” but he employs the word *Ecclesiastes* in the text. Qoheleth might indeed serve to designate one who speaks as an ordinary member of an academic assembly, but the rendering *debater* which has been proposed from this point of view scarcely suits the character of Solomon or the Book in its entirety. Some who regard Qoheleth as a feminine (vii. 27) have inferred that it denotes an *assembly* or aggregation of debaters personified.

2. AUTHORSHIP.—The question as to the authorship of Ecclesiastes practically reduces itself to this: Did Solomon write it or not? If he did not, what limits of date can be assigned to the Book? The general arguments for a late date tell of course against the Solomonic authorship, but up to a certain point it is possible to treat the two questions independently, as we accordingly propose to do, commencing with some consideration of the tradition which names Solomon as the writer, and of the internal evidence bearing upon this point.

In favour of the Solomonic authorship, it is alleged that the Book ascribes itself to Solomon under the name Qoheleth (i. 1, 12), and that this is confirmed by a consensus of ancient interpreters.

It is indeed clear that Qoheleth is intended to play the part of king Solomon, even if the super-

scription which describes him as “son of David” be not authentic. But the Book comprises, over and above the discourse of Qoheleth speaking in the first person (i. 12), an epilogue which briefly sums up the conclusion from his argument in editorial style, and commends him in terms which he could scarcely have used of himself (xii. 9–14). It has been conjectured that these verses are no part of the original work, but the internal evidence, carefully examined by Delitzsch and others, does not point to this conclusion; so that, while we agree with Rashbam (1083–1155 A.D.) so far as to say that they are not the words of Qoheleth himself, we may yet decline to disintegrate a Book alike unique and uniform in style and diction by assuming that its epilogue is an incongruous addition of a later age.

If the epilogue is a part of the original work, it seems to follow that the claim of the Book to have been written by Qoheleth is only apparent; and that, in whatever sense and to whatever extent Solomonic, it is in its entirety the composition of some sage well versed in his history and writings, who has thought fit to suppress his own name, and to put his profound reflections on the life of man and the moral government of the world into the mouth of the proverbially wise king. That a writer’s motive in such self-suppression need not be interpreted unfavourably is shown by the example of the school of Pythagoras, who kept their knowledge secret, and attributed it to the school or its master. Hippasus, who offended against this rule, was lost at sea for his impiety (Amblichus, *Vit. Pythag.* cap. 18). He had divulged and taken credit for a certain discovery in geometry, whereas everything belonged to “Him” (*ἐλπί δὲ πάντα ἐκείνου τοῦ ἀνδρός*), for so they called Pythagoras, and not by his name. With this compare the saying in the Palestinian Talmud (*Megillah*, iv. 1): “Scripture, Mishnah, and Talmud, and Agadah, and even that which the diligent scholar was destined to point out before his master, were already spoken to Moses from Sinai.” Such dicta cannot be taken literally, but are the paradoxes of idealists, which leave us in doubt as to how much they supposed to have been revealed explicitly.^b They assume that the literary embryo comprehends what can and is to be evolved from it: the progenitor includes the race (Heb. vii. 10). On this principle the tradition which ascribes Ecclesiastes to Solomon may only mean that its germ or basis is Solomonic. That the Book as a whole owes something to post-Solomonic editing—how much or how little depends upon the sense to be attached to the word “wrote”—seems to be suggested by the tradition of the Babylonian Talmud (*Baba Bathra*, 15 a), that “H Ezekiah and his company (Prov. xxv. 1) wrote Isaiah, Proverbs, Song of Songs, Qoheleth,” where Ezekiah and his college or company may range over a succession of generations from king Ezekiah, “the Pisistratus of Israelitish literature,” to the Captivity. Further, it may be doubted whether the words of the Targumist are to be taken quite literally when he recognises repeated anachronisms in the Book, and characterises them as “words of prophecy which Qoheleth,

* No trace of the *qal* occurs except in *Qoheleth*, and the primary meaning of the root may be uncertain, but in the *hiph'il* it means “to summon an assembly” (**קָהַל**, **קְהֵלָת**), and in the *niphal* *congregari* (1 K. viii. 1, 2, 66).

^b See *Sayings of the Jewish Fathers*, p. 122 (1877).

that is, the son of David the king, who was in Jerusalem, prophesied." It remains to touch upon some points in the internal evidence bearing upon the question now under discussion.

Qoheleth's reference to his kingship as in the past is alleged in support of the conclusion that he is not the true son and successor of David, but a second Solomon or "Solomon redivivus." He writes: "I the Preacher was king over Israel in Jerusalem. And I applied my heart to seek and to search out by wisdom concerning all that is done under heaven" (i. 12, 13); and this has given rise to a legend in the Talmuds (T. B. *Gittin*, 68 b; Jerus. *Sanhedr.* ii. 6), to the effect that he was dethroned for his sins and succeeded by a spirit in his outward form, whilst he himself wandered from place to place in the land of Israel, begging his bread and crying, "I Qoheleth was king over Israel in Jerusalem," which may have been intended as a word to the wise, hinting that Qoheleth was not the actual Solomon, but one who wrote in his "spirit and power" (Luke i. 17). But the point of departure in this legend being the words "I was king," considered in and by themselves, after the manner of the Agadah, we cannot argue therefrom to their true significance in their proper context. Qoheleth, writing for the future, may possibly mean that he applied his heart to seek and to search out by wisdom, &c., and that he was at that time king over Israel in Jerusalem, and therefore in the best of positions (i. 12; ii. 12) for bringing his experiments to a successful issue. Nevertheless, whatever may be the significance of this much discussed preterite *הָיִיתִי* in relation to its context, the phrase "king over Israel in Jerusalem" does seem to point to the division of the kingdom after the time of Solomon, and is such as a historian writing after his death might most fitly have used. Compare 1 Kings xi. 41, 42: "Now the rest of the acts [or words, cp. Eccles. i. 1] of Solomon, and all that he did, and his wisdom, are they not written in the book of the acts [or words] of Solomon? And the time that Solomon reigned in Jerusalem over all Israel was forty years." The Targum teaches that the division of the kingdom is referred to repeatedly in the Book (i. 1, 2; ii. 18; iii. 11; iv. 15, &c.), calmly accepting, as we have said, such anachronisms and signs of later date as "words of prophecy which Qoheleth prophesied."

Other allusions to Solomon in the Book are consistent with the theory that he is not the writer of it, and some of Qoheleth's sayings would come better from a commoner than from a king (iii. 16; iv. 1, 13; x. 5, &c.). Lastly, except for the tradition that Solomon wrote the Book, there is no reason to think of it as the record of a merely personal experience. Qoheleth is rather an abstraction, who speaks with preternatural calm of addicting himself to sensual pleasure and making fair trial of madness and folly by way of philosophical experiment; and the Book, although ostensibly a sort of autobiography, can scarcely be said to add anything to our knowledge of the facts of the life of Solomon. To conclude, it is not proven that the Book claims Solomon as its author, nor is it the quite unanimous verdict of tradition that he "wrote" it. The matter being thus uncertain,

BIBLE DICTIONARY.—VOL. I.

we have to consider what limits of date can be assigned to Ecclesiastes on other grounds.

3. DATE. — A list of dates conjecturally assigned to the Book is quoted in the *Speaker's Commentary*. They range from the time of Solomon to that of Herod, to whom Graetz, dating it B.C. 8, makes it refer. By Graetz and others the superscription (i. 1), which styles Qoheleth "son of David," and the epilogue (xii. 9-14), which again seems to point to Solomon, are ascribed to an editor distinct from the author of the main body of the work. Following Krochmal, he maintains that the verses xii. 12-14 do not refer exclusively to Ecclesiastes, but form the conclusion of the Hagiographa, the division of the O. T. to which it belongs. He supposes it to be the latest of the Books, and to have been finally pronounced canonical only at the Synod held in Jamnia about 90 A.D., up to which date the schools of Shammai and Hillel had disputed whether it "defiled the hauda." In confirmation of this view it was necessary to show that the LXX. Version of the Book was of comparatively recent origin. Accordingly, he refers it to the 2nd century A.D., laying stress upon its renderings of the objective prefix *ἐπὶ* by *σύν*, as in *σύν τὸν δίκαιον* καὶ *σύν τὸν ἀσεβῆ* κριεὶ ὁ θεός (iii. 17), and *καὶ ἄνθρωπος οὐκ ἐμνήσθη σὺν τοῦ ἀνθρώπου τοῦ πένθους ἐκείνου* (ix. 15), which are thought to mark the translator as of the school of Aquila, who writes *σύν τὸν οὐρανὸν* καὶ *σύν τὴν γῆν* (Gen. i. 1), and *σύν σκώληκος τὸ διδοῖον* (Ex. xxviii. 5). This correspondence in style of rendering is remarkable, and invites careful consideration; but we shall not dwell upon it here, as it does not in any case constitute a positive argument for the late date assigned to the original of Ecclesiastes. Nor do the continued questionings of its authority, even if in all cases to be taken seriously, prove anything more than that it was still treated as an *antilegomenon*, although it may have been received long before into the Canon.

A most interesting and instructive attempt to fix the date of the Book is to be found in Mr. Thomas Tyler's concise treatise on Ecclesiastes, published in 1874. From the supposed clear traces of the post-Aristotelian philosophies of Zeno and Epicurus in it on the one hand, and from the traces of the Book itself in Ecclesiasticus and the Wisdom of Solomon on the other hand, it is inferred that it must have been written between the years 250 B.C. and 180 B.C., and the specific date c. 200 B.C. is then assigned to it. Of his two limits of date the lower is perhaps the more conclusively established.

Ecclesiasticus. — The following series of parallels raises a strong presumption that there is some sort of interdependence between the books of Ecclesiastes and Ecclesiasticus. According to one view, the title of the latter book was itself chosen with reference to the former.

ECCLESIASTES.	ECCLESIASTICUS.
iii. 1. To everything there is a season, and a time to every purpose under heaven.	xxxix. 16, 17, 33. All the works of the Lord are exceeding good, and whatsoever he commandeth shall be in due season, &c.

* See Nachman Krochmal's article in *Keren Chemed*, vol. v. 79 (1841).

- ECCLESIASTES.**
 iii. 2-6. A time to be born and a time to die, &c.
 iii. 7. A time to keep silence, and a time to speak.
 iii. 11. He hath made everything beautiful in its time.
 vii. 16. *μη σοφίζου περυσά.*
 viii. 5. . . . a wise man's heart discerneth both time and judgment.
- ECCLESIASTICUS.**
 xi. 14. Prosperity and adversity, life and death, poverty and riches, come of the Lord.
 xx. 6, 7. . . . and some keepeth silence *αἰῶς καιρόν.* A wise man will hold his tongue *ἔως καιροῦ.*
 xxxix. 34. So that a man cannot say, This is worse than that: for in time they shall all be well approved.
 xxxxi. 4. *ἀκαίρως μὴ σοφίζου.*
 xxvii. 12. If thou be among the indiscreet, observe the time.

A marked characteristic of Qoheleth is his doctrine that there is a time for everything, which finds its justification in the saying that everything that God made was "very good." This doctrine the Son of Sirach likewise dwells upon, and he advocates and defends it against objectors, when he writes, "So that a man cannot say, This is worse than that: for in time they shall all be well approved." The presumption thus raised that he was an imitator of Qoheleth is confirmed by numerous other parallels, of which the following are examples.

- ECCLESIASTES.**
 i. 4. One generation passeth away, and another generation cometh.
 i. 18. For in much wisdom is much grief: and he that increaseth knowledge increaseth sorrow.
 iii. 14. *ἀφελαιν.*
 iv. 2. Wherefore I praised (Sym. *ἐπακάρισα*) the dead which are already dead more than the living which are yet alive. Cp. vii. 1.
 v. 2-9.
 vii. 12. *σκέπει σοφία* (Sym.).
 vii. 13-15. Consider the works of God (*ὡς τὰ ποιήματα τοῦ Θεοῦ*): for who can make that straight which He hath made crooked? In the day of prosperity be joyful, but in the day of adversity consider: God hath also set the one over against the other (*וְהָיָה לְעֵמָת זֶה וְזֶה*, *τοῦτο σὺνπαρὸν τοῦτο*), to the end that man should find nothing after him . . . There is a just man that perisheth in his righteousness, and there is a wicked man that prolongeth his life to his wickedness.
- ECCLESIASTICUS.**
 xiv. 13. . . . so is the generation of flesh and blood, one cometh to an end, and another is born.
 xxi. 12. . . . there is a wisdom (*πανουργία*) which multiplieth bitterness.
 xxviii. 6; xliii. 21. *ἐλαττώσαι.*
 xl. 28. *πρὸ τελευτῆς μὴ μακάριζε μηδένα.* Cp. Herod. i. 32.
 vii. 14; xiv. 1; xviii. 22; xxxix. 5-7; vii. 15 (?).
 xlv. 28. *ἐν τῇ σκέπῃ αὐτῆς.*
 xxxiii. 13-15. As potter's clay in his hand, all his ways are according to his good pleasure (straight or crooked (Targ. on i. 15)): so man is in the hand of Him that made him, to render to them according to His judgment. Good is set against (*ἀνέναντι*) evil, and life against death: so is the sinner against the godly. *Καὶ οὗτοι ἐμβλεψόντες εἰς πάντα τὰ ἔργα τοῦ ὑψίστου, δύο δύο, ἢ κατέναντι τοῦ ἐνός.*

- ECCLESIASTES.**
 viii. 1. A man's wisdom maketh his face to shine, and the hardness of his face shall be changed (*μισθώσθεται*).
- ECCLESIASTICUS.**
 xiii. 25. The heart of a man changeth his countenance (*ἀλλασσέ*), whether it be for good or evil. Cp. xxv. 17; xxxvii. 17.

We may conclude that the Son of Sirach made free use of Qoheleth in the original Hebrew;⁴ and if so, that it was in all probability referred to by him as one of "the rest of the books," *τὰ λοιπὰ τῶν βιβλίων*, the Hagiographa, and was written before the commencement of the 2nd century B.C. It will be noticed that the contrast between the Greek of Ecclesiasticus and the Septuagint version of Qoheleth is strongly marked in some of the passages cited.

We shall next show reason to think that there may possibly be allusions to Qoheleth in a book of very different style and tone, the Book of the Wisdom of Solomon, which has been called "anti-Ecclesiastes."

The Book of Wisdom.—The Book of the Wisdom of Solomon, like Ecclesiastes, introduces Solomon as speaking, and provides a corrective to some of the doctrines of Qoheleth, or at least a caution against inferences which the unwary might draw from his enigmatical teaching. The contrast between the books will be apparent from the following examples. The "wisdom" of the one Book, Qoheleth, is human philosophy: that of the other is the ideal and absolute Wisdom. Doctrines propounded in the one with apparent approval are in the other expressly attributed to the ungodly. If Ecclesiastes is really aimed at, this again gives a lower limit for its date.

- ECCLESIASTES.**
 i. 18. In much wisdom is much grief, and he that increaseth knowledge increaseth sorrow.
 iv. 2. I praised the dead which are already dead &c.
 iii. 2, 11. . . . a time to be born, and a time to die. . . . He hath made everything beautiful in its time.
 iii. 19. For the sons of men are a chance, and the beasts are a chance . . . as the one dieth, so dieth the other; yea, they have all one breath; and man hath no preeminence &c.
 iii. 11. He hath made everything beautiful in its time: also He hath set the world (*קוֹנֵה עוֹלָם*, Sept. *τὸ αἶωμα*) in their heart, yet so that man cannot find out the work
- WISDOM.**
 viii. 16. . . . her conversation hath no bitterness; and to live with her hath no sorrow, but mirth and joy.
 i. 12. Seek not death is the error of your life . . . &c.
 i. 13, 16. For God made not death . . . But ungodly men with their works and words called it to them, &c.
 ii. 1, 2. For they mist reasoning with themselves, but not aright, . . . we are born at all adventure (*αἰσχρογένηται*): and we shall be hereafter as though we had never been: for the breath in our nostrils &c.
 xiii. 7-9. For being conversant in His works they search Him diligently, and believe their sight: because the things are beautiful that are seen. Howbeit neither are they

⁴ There are sayings attributed to him in Rabbinic literature which agree more or less with the Greek of Ecclesiasticus. A collection of these has been made for the *Jewish Quarterly Review* (iii. 682 sq. 1891) by Mr. S. Schechter, Univers. Lect. in Rabbinic at Cambridge.

ECCLESIASTES.

that God hath done from the beginning even to the end.

WISDOM.

to be pardoned (Rom. i. 20). For if they were able to know so much, that they could aim at the world (στοχάζεσθαι τὸν αἰῶνα); how did they not sooner find out the Lord thereof?

The true rendering of the above verse, Eccles. iii. 11, is of critical importance, on account of its bearing upon the linguistic argument for the date of the book. Everything turns upon the

meaning of עוֹלָם, of which a favourite modern rendering in this place is "eternity" (R. V. margin). At the same time it is admitted that the use of the word "in the sense in which here alone it can be taken, i.e. in the signification of the idea of eternity, must in any case be regarded as unique" (Wright, *Koheleth*, p. 196). Against the rendering of the world (LXX. τὸν αἰῶνα) it is urged that the word is not so used elsewhere in the Hebrew Scriptures. But, having regard to the exceptional character of the diction of Qoheleth, we need not therefore reject it on *a priori* grounds; and it yields the appropriate sense, "he hath given the world into their heart," or *mind—mundum tradidit disputationi eorum* (Vulg.). Man is led by his instincts to give attention to the passing things of the world, each "beautiful in its season," while he fails to grasp the working of God in its entirety, "from beginning to end." He has no capacity for absolute knowledge, and so God has given him by way of compensation to find pleasure in mundane affairs.

If this interpretation of Eccles. iii. 11 be the true one, we may conclude that the verse is referred to in Wisd. xiii. 9. According to Qoheleth, man gives his mind to the things of the world in detail without fathoming the depth of God's working: according to Wisdom, he forms his theories of the outer world (τὸν αἰῶνα) without finding its Creator at work therein.

Assuming that Qoheleth was reckoned by the Son of Sirach amongst "the rest of the books," we have next to notice some of the attempts which have been made to assign an upper limit of date to it.

Philosophy in Qoheleth.—By way of assigning such upper limit of date to Ecclesiastes, it has been maintained by some that both Stoic and Epicurean elements are present side by side in it, and that this points to the post-Aristotelian period, and indicates that the Book was written probably after the deaths of Epicurus and Zeno. It has accordingly been placed between 250–40 B.C. and 180 B.C., the supposed date at which the Son of Sirach wrote. "Perhaps we cannot, on the whole, better satisfy the conditions of the problem than by placing the composition of our book at about 200 B.C., nearly the date assigned by Hitzig on other grounds" (Tyler, *Ecclesiastes*, p. 31). Its relation to Stoicism and Epicureanism is set forth as follows.

The conquests of Alexander had paved the way for the reception of the post-Aristotelian philosophy in the East, whilst, on the other hand, as regards Stoicism, its principal teachers all came from the East, and the most famous of

them were not only Oriental but Shemitic. This philosophy may therefore have been known in Palestine, where the writer of the Book probably lived, at an early period.

The great Stoic principle of living conformably to nature is set forth in the catalogue of times and seasons in Eccles. iii. 2–8. For everything there is an appointed time. The righteous lives conformably to this order: the wicked violates it (iii. 16, 17). In the Stoic physical philosophy the course of nature is a succession of similar cycles of events, and Qoheleth accordingly teaches that "That which is hath been already; and that which is to be hath already been: and God seeketh again that which is passed away" (iii. 15). "That which hath been is that which shall be; and that which hath been done is that which shall be done: and there is no new thing under the sun" (i. 9). The Stoic doctrine of fatalism is conspicuous in Qoheleth (ix. 11, 12, &c.), and the influence of the same philosophy, according to which folly was madness (τῶντας δὲ τοὺς ἄφρονες μαινεσθαι, Diog. Laert. vii. 124), accounts for their remarkable collocation or parallelism in several verses of our Book (i. 17; ii. 12; vii. 25; x. 13).

The opposite doctrine of Epicureanism is set forth in iii. 18–22 and v. 18–20.

The admonition, that "of making many books there is no end; and much study is a weariness of the flesh" (xii. 12), hints at the fruitless literary activity of the post-Aristotelians, of whom Epicurus is said to have composed about 300 books, Apollodorus above 400, Chrysippus more than 705, and so forth, in which the same problems were handled again and again without decisive result.

For collateral arguments in favour of this theory we must refer the reader to the treatises of Mr. Tyler and Dean Plumptre, who are fully convinced of its truth. It is an attractive theory, but is not generally accepted. If the teachers of a Greek philosophy came from the East, what there may be of it in Ecclesiastes need not have been borrowed from the West.

The theory shows a true appreciation of the tone and tendency of the Book, whether it be post-Aristotelian or not. Its gloomy and introspective character points to a time when the glory of the kingdom had departed. Political life was at a low ebb, faith in the God of Israel was on its trial, and the writer has recourse to philosophical speculation in the vain hope of throwing light for himself on the mysteries of human life and the apparent miscarriage of justice in the moral government of the world. All this fits in well with the opinion that it was written after the Captivity, but is not in itself irreconcilable with some pre-exilic date, falling within the period of the activity of "Hezekiah and his company," referred to in the above-cited tradition of the Babylonian Talmud. But Delitzsch and others of the most modern commentators place it after the Captivity, laying much stress upon the linguistic peculiarities of the Book, to which we must here call attention, referring the reader for full details to the commentaries of Delitzsch and C. H. H. Wright (1883) on the one hand, and on the other hand to the well-known anonymous treatise on the *Authorship of Ecclesiastes* [auct. David Johnston],

published in 1880, in which the Solomonic authorship is unhesitatingly maintained. The same side is taken by Dr. M. Friedländer in the *Jewish Quarterly Review*, vol. i. Nos. 1, 4 (1888-9).

Style.—The argument from its linguistic style is now much relied upon in proof of the late date of Ecclesiastes. That the Book was not actually Solomon's was expressly concluded on other grounds, viz. from its *structure*, by a Jewish writer of unknown date, quoted by R. Abraham ibn Ezra* of Toledo in his commentary on Qoheleth. In the course of a note on Eccles. vii. 3: "Sorrow (marg. A. V., Anger) is better than laughter," &c.; he calls attention to the opposite opinions expressed in different parts of the Book, contrasting vii. 3, viii. 15, vi. 8, iv. 2, &c., with vii. 9, ii. 2, ii. 13, ix. 4, &c. respectively, on account of which self-contradictions there was a tradition, that "the wise sought to apocryphise the book of Qoheleth;" and he adds, that *one of the interpreters felt himself accordingly constrained to interpret QOHELETH as ASSEMBLY* (Deut. xxxiii. 4), and he said that HIS DISCIPLES compiled the book, and each spoke according to his own opinion—or as it runs in the original:

והוצרך אחד מן המפרשים לפרש מלת קהלת
כמו קהלת יעקב ואמר כי תלמידיו חברו
הספר וכל אחד אמר כפי מחשבתו.

Although this much older commentator had thus distinctly laid down that Ecclesiastes emanated from the school of Solomon and set forth the various views of his "disciples"—whether in the sub-Solomonic age or at some later date—but was no composition of the master himself, the denial of its Solomonic authorship is commonly said to date only from Luther. Following him, Grotius, in the 17th century, gave it as his opinion (*Comm. on Eccles. i. 1*) that it was written later, under the name of Solomon, and he put forward a linguistic argument in support of his opinion: "Ego tamen Solomonis esse non puto, sed scriptum serius sub illius regis, tanquam poenitentia ducti nomine. Argumentum ejus rei habeo multa vocabula, quae non alibi quam in Daniele, Esdra et Chaldaeis interpretibus reperias."

There is no need to dwell at length on the proof that the diction of Qoheleth is peculiar or unique in the Hebrew Scriptures, since thus much is admitted on all hands; and the reader, on passing from the remaining Solomonic or other canonical writings to this Book, cannot but feel with Bishop Lowth, that "alia est totius operis ratio, alius color, longe dispar stylus." The only question is, what inference is to be drawn from this peculiarity of style? Can it be by any means accounted for on the supposition that Solomon wrote the Book? Delitzsch, whose glossary of *hapaxlegomena* and modernisms in Qoheleth extends to nine pages (cp. C. H. H. Wright's *Koheleth*, Exc. iv.), concludes that if it could have been written by Solomon, there is no history of the Hebrew language, and further, that it is without doubt a product of the post-exilic period (p. 206,

1875). Pusey (*Daniel*, Lect. vi.), going to the opposite extreme, maintains that there is not one word in Ecclesiastes to characterise a later age than Solomon's. The history of the Hebrew language may well be more defective than is generally supposed, if there be any truth in the Talmudic legend, that "When the Law was forgotten from Israel, Ezra came up from Babylon and established it" (T. B. *Sukkah*, 20a), or that the Law was burnt and he re-wrote it (2 Esd. xiv.); but it must be admitted that the character of the diction of Qoheleth constitutes a strong objection to the traditional view of its authorship, while on the other hand we may admit, with Rezan, that too much is sometimes made of this kind of argument, and that much allowance has to be made for its literary style and its subject-matter, which drive the writer to use words and expressions that are not found in other biblical Books. Nevertheless, the linguistic argument in itself points more or less indefinitely to a late date, and the utmost that can be done as against it is to minimise its significance.

Professor Driver (*Hebr. Tenses*, chap. ix.) argues from a comparative view of the uses of *vav* with the tenses in the several Books to the late date of Qoheleth: "Although in Hebrew the continuation of a historical narrative is most usually expressed by the imperfect with ו —we find occasionally in the earlier Books of the O. T., and with increasing frequency in the later ones, that this idiom, which is so peculiarly and distinctively a creation of the Hebrew language, has been replaced by the perfect with the simple or weak *vav*, ו There is only one Book in the O. T. in which this state of things is reversed, and the perfect with simple *vav* obtains a marked, and indeed almost exclusive, preponderance. In the whole of Qoheleth ו occurs not more than *three* times (i. 17; iv. 1, 7), whereas the other construction is of repeated occurrence. This circumstance, estimated in the light of what is *uniformly* observable in other parts of the O. T., is of itself, though naturally it does not stand alone, a strong indication of the date at which that Book must have been composed."

As regards single words, we have already discussed the use of העלם in iii. 11, and have concluded that it there means *the world*, according to the usage of the later Hebrew. On the other side, it should be remarked on the use of the Divine name ELOHIM in this Book, which is said to approximate so closely in its diction to the Mishnah, that neither that nor any other of the biblical names of God is used in the Talmudic and Rabbinic writings *except in citations from the Bible*.[†] In place of such names, the Rabbis' feeling of reverence led them to speak of HEAVEN, or SPACE (cp. מאבדן), or THE NAME, or THE HOLY ONE, &c. (*Sayings of the Jewish Fathers*, 1877, pp. 53, 80). Thus its use of ELOHIM differentiates Qoheleth from the later and non-canonical Jewish writings.

[†] It may also have been used exceptionally, as in oaths; but see in the Gospel, Matt. v. 34 and xiii. 16-22. Schechter refers to *Synonyma für Gott in der neuhäbräischen Literatur von Dr. E. Landau* (Zürich, 1888) as a very instructive work upon the subject.

* He was born at Toledo about 1090 A.D., and died at Rome (?) after 1185 A.D.

Graecisms.—Graetz (1871) devotes an appendix to the traces of Greek influence on the diction of Ecclesiastes. Zirkel first (1792) claimed to have found Graecisms in the Book, and, overjoyed at his discovery, sought to explain everything from the Greek which he could not rightly explain from the Hebrew. He was opposed by Schmidt and Eichhorn, and his theory fell into oblivion. Of his examples Graetz approves but few, but thinks it mere exegetical caprice to refuse to see Graecisms in יָפָה, יָפָה, תָּוֹר, and at all events יוֹם טוֹבָה (vii. 14). In the first hemistich of v. 17, טוֹב אֵלֶּיךָ יָפָה is supposed by Graetz to stand for καλὸν καὶ γάργυρον, but the construction of the clause is much disputed. It would be in accordance with analogy to render it somewhat as follows: *Behold that which I have seen* [this phrase with the same punctuation occurs in ii. 13, 24, cp. ix. 16]; *it is a good thing that* [cp. ii. 24; v. 4; vii. 18] *it is comely to eat and to drink, &c.* Since man cannot rise out of the common concerns of life, it is well that he can take pleasure in them, and it is by the gift of God that he can find satisfaction therein. Further traces of Greek influence are detected

by some in the uses of ראה, in לעשות טוב (iii. 12), וזה כל הארץ and הכל (iv. 14), נולד (xii. 13), in vii. 16, 17 (cp. עשה, עשה, in the oft-recurring phrase "under the sun," and in "the repeated employment of plural nouns with a singular verb" (Tyler, *Eccles.* p. 71).

The linguistic peculiarities of the Book are considered by many to "point with great definiteness to an epoch after the exile," whilst the political condition of the people described in it, the tyranny and perversion of justice, the dissolute court life, and the elevation of unworthy persons to positions of dignity, fall in with the theory that it was written before the end of the Persian period. Many commentators accordingly place it between the middle of the 5th century, and about 330 A.D., while some, as we have seen, have been led by the philosophical character of its contents, and its supposed Hellenic affinities, to place it more than a century later. "The simple reason," it has been said, "why no more definite date can be assigned is that Jewish history is almost a blank from the death of Nehemiah down to the accession of Antiochus Epiphanes (c. 415-175 B.C.). The annals of the Persian empire, too, are very deficient from the death of Xerxes in 465 B.C. down to the appearance of Alexander the Great on the stage of history" (Wright, *Kohelah*, p. 136).

4. CANONICITY.—There are not adequate data to determine when Ecclesiastes first came to be regarded as canonical; but we have seen reason to think that it was already included in the Kethubim or Hagiographa (τὰ ἁγία τῶν Βιβλίων) when the Prologue to Ecclesiastes was written. There is no clear trace of it in the New Testament, nor is it very frequently quoted in the Talmud, doubtless on account of its abstruse and esoteric character. Solomon, according to a saying of the Zohar on Levit. xiii. 40, with reference to a passage of Ecclesiastes, hiding his words, **בנו לנו היכל קריש**, *in the inmost recesses of the holy temple*.

To understand ~~it~~ one must set out with the fact that many of its conclusions are tentative, and not in accordance with the deliberate verdict of the writer. In the course of his inquiry he seems to give in his adhesion now to this system, now to that, as if all manner of doctrines and their opposites were each "beautiful in its season." To appreciate the Book we must take it as a whole, regarding the epilogue as an integral and indispensable part of it. If otherwise treated, it cannot fail to mislead, many of its statements not being intended to be accepted as final. We can well understand therefore how, even after it had been accepted as Scripture, its authority may have been impugned and called in question, on account of its apparently erroneous teaching. Or it may have been attempted to "hide" it as a Book hard to be understood, which the unlearned might haply "wrest to their own destruction." So it was sought to set aside the Book of Ezekiel, not only as containing ordinances at variance with the Pentateuch, but because of the matter of the "chariot," which it was dangerous for the immature and simple-minded to speculate upon; for we read in the Talmud that a story is told of a boy who was reading Ezekiel in his teacher's house, and he was pondering on the word *amber* (Ezek. i. 27), "and fire went forth from the *amber* and burnt him, and they sought to apocryphise the Book of Ezekiel" (T. B. *Chagigah*, 13 a). For like reasons they may have attempted to set aside Qoheleth.

Before proceeding to notice the ancient controversies about the Book, we should mark the use of an archaic term in referring to it, which tells somewhat against extreme theories as to its late date. The Pentateuch alone being sometimes distinguished as Torah, the remaining Books of Scripture are then styled Qabbalah, which is literally *tradition*, that is to say, *tradition* regarded from the point of view of reception. "This mode of speaking may be assumed to be a survival from a remote period at which the Pentateuch alone had been accepted as canonical; for it could scarcely have arisen in comparatively recent times" (*Jewish Fathers*, p. 121). Qoheleth is quoted under that name in Siré on Dentonomy, *Pisqa* 48 (Eccles. x. 8): "Solomon came and interpreted it in QABBALAH, And whoso breaketh a fence, a serpent shall bite him. Lo! thou hast learned that whoso breaketh fences of the wise, eventually punishments come upon him."

It is related that the wise sought to apocryphize the Book of Qoheleth (T. B. *Shabbath*, 30 b.; *מִשְׁנֵי תַּסְפִּיקָא*, *Pisga* 8, fol. 68 b., ed. Buber, 1868), because its words contradicted one another, or because some of them were of heretical tendency. And why did they not do so? Because its beginning and its end were words of Torah. That is to say, these critics, taking a general view of the Book, found its thesis and its conclusion orthodox, whatever objection might be made to particular statements made by the way and in the course of the inquiry. Its beginning is made out to be "words of Torah," because the phrase "under the sun" (i. 3) carries with it a reference by implication to another world, "*above* (or *before*) the sun."

There are various other passages in the Talmudim and Midrashim bearing upon this

controversy, in some of which the question takes the technical form, Does the Book of Qoheleth *defile the hands*? The school of Shammai said, No: the school of Hillel, Yes. That is to say, the former pronounced against it, and the latter in its favour, with reference to the saying (Mishnah, *Yadain*, iii. 5), that "All Holy Scriptures defile the hands,"—a peculiar form of expression which is explained as follows. It having been the custom to keep the Book of the Law along with the heave-offerings, it was found that it suffered injury from mice, &c., and was accordingly said to *defile the hands*, as if it were unclean, in order that it might be kept apart, and be no longer in danger of such attacks (T. B. *Shabbath*, 14 a).

For further details of these controversies see the commentaries of Delitzsch and C. H. H. Wright, and Dr. S. Schiffer's *Das Buch Koheleth nach der Auffassung der Weisen des Talmud und Midrasch und der jüdischen Erklärer des Mittelalters*.

It is possible that some of the discussions about Qoheleth were of a merely scholastic character, and intended to bring out the true meaning of sayings by which the superficial reader was in danger of being misled; but it must be admitted that there was a certain amount of *bona-fide* antagonism to the Book at a comparatively late date. This, however, as we have said, is not inconsistent with the opinion that it was still disputed, like the *ἀποκάλυψις* of the New Testament, long after it had taken its place amongst the Canonical Books. It seems to have been regarded by some amongst the Jews as "obliterated" as late as the time of Jerome (*Comm.* on Eccles. xii. 13).

5. CONTENTS.—From these questions we pass to the Book itself, which in places almost defies analysis, owing to the indefiniteness of its language or the want of obvious connexion between consecutive sayings. It is characterised, however, by some leading thoughts which are continually recurring.

The text of the Preacher is: "Vanity of vanities; all is vanity." What profit (asks he) hath a man of all his labour that he laboureth under the sun? The generations come and go. There is a perpetual flux and reflux of the elements, whilst Nature in her totality stands unchanged. There is neither rest from toil nor real progress, but wearisome iteration of the same sequence of things, so that that which has been is that which shall be, and there is nothing new under the sun.

Qoheleth had been king over Israel in Jerusalem, and with all the resources of wealth and wisdom at his command had given his mind to philosophic inquiry into terrestrial and human affairs. But the result was disappointing; for on a comparison of wisdom with "madness and folly," he had found no satisfaction in the former, but rather that "In much wisdom is much grief: and he that increaseth knowledge increaseth sorrow" (i. 12-18).

Wisdom alone does not bring happiness: neither does uncontrolled mirth. Accordingly he makes trial of pleasure under the sober guidance of wisdom, still hoping to discover what is that good for the sons of men which they should do under the heaven all the days of their

life (ii. 3). But though his plans for the refined enjoyment of life afford him pleasant occupation for the time being, in the retrospect he sees no satisfaction in all his labours. And turning again to the comparison of wisdom with "madness and folly," he concludes that though it may command success in life, yet in the end the wise man is none the better for his wisdom, but he too dies and is forgotten like the fool, and leaves the fruit of his toil to he knows not whom. It was not in man to find his supreme good* [cp. ii. 3] in the way in which he had sought it, else why should he with his unique advantages have failed to secure it (ii. 24, 25)? But God decrees that one shall labour to heap up riches which he is not to enjoy, and freely grants to another wisdom and knowledge and tranquil joy, according to His good pleasure. "This also is vanity and vexation of spirit" (R. V. "a striving after wind").

This leads up to his doctrine of opportuneness. *Καὶ πόρρον γινώσκει* (Pittacus in Diog. Laert. i. 4, § 6). For all manner of things and their opposite there are set times in the course of nature (iii. 1-8). What profit then hath he that worketh, if all things are thus changeful? God has made everything beautiful in its season, and has so framed man that he can find satisfaction in the affairs of life as they come to pass, albeit unable to comprehend His work in its fulness (iii. 11). Man's instincts are regulated by an immutable law. What God doeth shall be for ever, and He hath done it that men should fear before Him. The observed perversions of the Divine order raise the hope of a just judgment to come. Or may it not, on the contrary, be that man is not morally accountable for his actions, and has no pre-eminence over the beasts? Let him then enjoy the world, for that is his portion, "for who shall bring him (R. V. *back*) to see what shall be after him?" (iii. 16-22).

Still brooding over the failures of justice in the world's course, he is led to praise the dead which are already dead more than the living which are yet alive. Successful competition is rewarded with envy. The fool who folds his hands and "eats his own flesh," is perhaps the wisest in his generation. It is a weary lot to toil even successfully if one has none for whom to labour. In every way "two are better than one," and "a threefold cord is not quickly broken" (iv. 1-12).

Then follows, perhaps in pursuance of the thought of the evil of isolation, a passage of great difficulty, in which many have imagined that there must be a historical reference of a nature to determine something as to the date of Qoheleth. Better is a youth needy and wiser than a king old and foolish, who will no longer listen to the advice of counsellors (iv. 13; cp. Wisd. iv. 8, 9), for one has risen from the state of thralldom to a throne, and one born to a kingdom has come to poverty (Sym., Vulg.; cp. R. V. marg.). He passes in review the living, telling

* The clause *אין טוב באדם שיאכל כו'* (ii. 24) is much disputed. The A. V. and R. V.: "There is nothing better for a man than that he should eat and drink," &c. is a rendering not of the text but of *כשיאכל כו'*, with *mem* repeated from *באדם*. Cp. in iii. 22, *אין טוב מאשר*.

multitude, with the younger generation that is to stand in their stead. They that come after will not rest satisfied with what has been before them.^a This also is vanity and vexation of spirit.

"Be not rash with thy mouth, and let not thine heart be hasty to utter anything before God." From the oppressions done under the sun it does not follow that there is none that regardeth. What is objected to may be ineradicable from the linked system of things, in which grade rises above grade, and even the supreme ruler is subject to conditions (v. 2-9). Besides, men's conditions are not altogether so unequal as they seem; but poverty has its blessings and wealth its cares. A man's laying up in store for the future may bring him no real advantage. And so the Preacher comes round again to the conclusion that it is well to enjoy the lawful pleasures of the hour as they present themselves. Yet it is but a limited measure of enjoyment that is possible for man, and what advantage has the wise over the fool? Were it not better not to have been born? "Who knoweth what is good for man in his life, all the days of his vain life, which he spendeth as a shadow? for who can tell a man what shall be after him under the sun?" (vi. 12).

In the later chapters of the Book there is on the whole less of sustained speculation, and the Preacher shows more and more as the Paroemiast, who "sought out and set in order many proverbs." The gnomic character of the seventh and following chapters is very marked. The seventh corresponds in a manner to the third, with its contrasts of life and death, mirth and mourning, prosperity and adversity. "A good name is better than precious ointment, and the day of death than the day of one's birth . . . God hath set the one over against the other, to the end that man should find nothing after him" (vii. 1-14). The wise man will avoid extremes: he will preserve a philosophic calm in all vicissitudes: he will enjoy his prosperity and profit by the uses of adversity. Wisdom is a tower of strength, but its range is limited. What was the essence and origin of that evil which had so corrupted all women and most men? "Behold, this only have I found, that God made man upright; but they have sought out many inventions" (vii. 29).

Wisdom, in the realm of politics, will make a man respect the powers that be as ordained of God (viii. 2-5). But here also the same inequalities are observed: the same uncertainties and disappointments and failures of justice, which vex the heart of the righteous and tempt the sinner to persevere in his wickedness (viii. 11). And the Preacher comes round again by the old path to the old conclusions, that "There is one event to the righteous and to the wicked . . . Go thy way, eat thy bread with joy, and drink thy wine with a merry heart . . . Whatsoever thy hand findeth to do, do it with thy might (?), for there is no work, nor device, nor

knowledge, nor wisdom, in the grave, whither thou goest" (ix. 2, 7, 10).

Taking a fresh departure, he remarks that wisdom and capacity may fail of success, or, having done their work, may not receive due recognition. And wisdom itself is sometimes marred by some "little folly" in its possessor (ix. 11-x. 1). The wise man will be the more on his guard, and will have his wisdom always at hand. Though folly may be exalted, and true merit debased, he will know the danger of attempting hasty reforms. If the time is out of joint, he will observe the caution: "Curse not the king, no, not in thy thought; and curse not the rich in thy bedchamber: for a bird of the air shall carry the voice, and that which hath wings shall tell the matter" (x. 20).

But caution and reserve are but one side of wisdom. He who would command success must discharge the plain duties that lie before him, uncertain as may be the future. He must do the work of to-day in a spirit of enterprise, taking no thought for the morrow. This will make life worth living, even in face of the darkness that lies beyond. Rejoice therefore in the blessings of life and in all its lawful pleasures, "but know thou that for all these things God will bring thee into judgment" (xi. 1-9).

Chapter xii. consists of two parts. The former describes the approach of death in highly poetical language, and concludes with the refrain: "Vanity of vanities, said Qoheleth; all is vanity." The latter consists of the epilogue, the composition of some writer distinct from "Qoheleth." It tells therefore against the Solomonic authorship, unless we assume that it was itself no part of the original work. But after the Preacher's weary round of inconclusive speculation, ending in "all is vanity," how natural is the commendation of the well-considered "words of the wise." How seasonable the warning: "And furthermore, my son, be admonished: of making many books there is no end; and much study is a weariness of the flesh." The conclusion is, that God will bring every work into judgment, and unveil all that is mysterious. "Fear Him therefore, and keep His commandments; for this is the whole duty of man." The lame conclusion of the Book curtailed (as some think it should be) of its epilogue might have been arrived at without the wisdom of Solomon; and unless we can somehow divest the Preacher of the character which he assumes at the outset, we must allow the opening of Ecclesiastes to be a designed prelude to the "words of Torah" with which it ends.

In the description of the approach of death (xii. 1-7), the long array of commentators who follow the Rabbinic tradition find a more or less complete anatomy of the human body in its decrepitude. But we are no more obliged on such authority to accept this, in one or other of its numerous forms, as the true and only rendering, than in ix. 13-16 to see an allegory of the city of "Mansoul," in which the "great king" is the personified Evil in man's nature, and the neglected saviour of the city the Good. Without pronouncing upon the intrinsic merits of the anatomical rendering, I shall here try to

^a The transference of a ל gives the reading וְאִין כִּי קִץ לְכָל הָעֹמֵל כָּל בֹּי in iv. 16 (cp. iv. 8), which is perhaps worth considering. Then for שְׂמֵחַן compare it. 10 and v. 18.

ing "a coat of mail:" Schürer, *The Jewish People in the Time of the Christ*, ii. 2, 24); but that the true name of the author's father was Simon, and that of his grandfather Eleazar, cannot be asserted with confidence, although the latter seems to rest on sufficient authority. The conjectures which have been made to fill up this short notice are either unwarranted or absolutely improbable. There is no evidence to show that he was of priestly descent. The mistake of Syncellus (*Chron.* ed. Dindorf, i. 525), who states that he was a high priest after Simon, probably arose from the fact that in Eusebius' *Chronicle* his name followed that of Simon, son of Onias II., not as high priest, but as author of this book (Schürer, *ut supra*, 25). The Palestinian authorship of the book is substantiated by internal evidence. Of the author's life we know no more than that he had travelled and had been often in extreme danger (xxx. 10, 11), owing, on one occasion, to his being slandered before a king (li. 5).^b

3. The language in which the book was originally composed was "Hebrew" (*Ἑβραϊστὶ*) according to the express statement of the Greek translator, and Jerome says (*Praef. in Libr. Sal.* l. c.) that he had met with the Hebrew text. From the remaining fragments we know that the language was rather Judaeo-Aramaic (Fürst, *Aramäische Chrestomathie*, p. 73); i.e. the language used by the Jewish doctors of the 2nd century, of which the basis was the Hebrew of the Bible, but which was greatly mixed with Aramaic words and forms. Attempts which have been made in recent times to reconstruct the original from the errors of the Versions have confirmed this. The Greek translator has for the most part retained the Hebraisms unaltered, and hence the difference between the Greek of the translation and that of the Prologue is very noticeable.

4. There are fragments of the original scattered over the Talmud and Midrash (collected by Delitzsch, *Zur Geschichte der Jüdischen Poesie*, Appendix, and more fully by Dukes, *Rabbinische Blumenlese*, p. 31 sq.), corresponding with about thirty verses of the Versions (iii. 21, 22; vi. 6; ix. 8 sq.; xi. 1, 29; xiii. 16; xiv. 18; xviii. 23; xxiii. 15; xxv. 2; xxvi. 1; xxviii. 6; xxx. 23; xxxviii. 1, 4, 7; xlii. 9 sq.), besides others, to which nothing in the Versions corresponds.^c These fragments are variously read, and show signs of inaccurate reminiscence or careless quotation; and it is wholly uncertain when the original disappeared from the world.^d

^b The Alphabet or book of Ben Sira (sometimes called "the younger Ben Sira") which exists at present, is a later compilation (Zunn, *Gottesdienstliche Vorträge der Juden*, pp. 100-105) of proverbs in Hebrew and Chaldean, containing some genuine fragments, among much that is worthless. See also Fürst, *Aramäische Chrestomathie*, pp. 22, 23.

^c Dukes has also collected several anonymous or pseudonymous quotations: e.g. vii. 17, where the Syriac translation is verbally identical with a maxim in *Aboth*, p. 74 b (ed. Schechter), assigned to a different author. Several more remain.

^d In the *Sahih* of Muslim (ed. Boulak, 1290, i. 41), a saying taken from Ben Sira is put in Mohammed's mouth: "There are three whom God will not speak to on the day of judgment,—an old adulterer, and a lying king, and a poor man who is proud." This clearly comes from Ecclus. xxv. 2, *πτωχὸν ὑπερήφανον καὶ*

The Greek translation incorporated in the LXX. was made by the grandson of the author in Egypt, *ἐν τῷ ὀγδόῳ καὶ τριακστῷ ἔτει ἐπὶ τοῦ Εὐεργέτου βασιλέως*, "in the thirty-eighth year of king Euergetes." Two kings of Egypt bore the name Euergetes.—Ptol. III., son and successor of Ptol. II. Philadelphus, B.C. 247-222; and Ptol. VII. Physcon, the brother of Ptol. VI. Philometor, B.C. 170-117, who reigned jointly with his brother till the latter's death in B.C. 145. Obviously the date given must refer to the second of these; and we thus get the date B.C. 132 for the arrival of the translator in Egypt, and may place the composition of his grandfather's work at about B.C. 200-180. This date has been thought by many to conflict with the panegyric upon Simon of Onias (ch. i.), whom the author would seem to describe from personal knowledge (v. 5, 15 sq.); the person to whom this description applies being most probably Simon I., high priest about B.C. 310-290, surnamed the Just. The following ways of reconciling these data have been attempted (see H. Bois, *Essai sur les Origines de la Philosophie Judéo-Alexandrine*, pp. 314-344):—(i.) To suppose the Simon of ch. i. to be Simon II., also son of Onias, high priest B.C. 219-198, a personage of whom little is known (Herzfeld, Jost, Derenbourg, Seligmann, Schürer). (ii.) To interpret *παῖρος* of the Greek Prologue not as grandfather, but as ancestor (Horowitz; also suggested by Grätz and Ewald). (iii.) To interpret the words quoted from the Greek Prologue as meaning in the translator's thirty-eighth year, in which case they will cease to have any chronological value; and some have indeed maintained that this is the only sense which the words can bear; however, although the translation "in the thirty-eighth year of king Euergetes" somewhat violates Greek usage, the translator, who shows no skill in manipulating Greek syntax, may well be made responsible for this. The question whether Simon I. or Simon II. be the most likely object of the panegyric is difficult to settle, owing to the scanty notices that we have of both of them. If Seligmann (*Das Buch der Weisheit des Jesus Sirach*, Breslau, 1883) be thought to have proved against Josephus that Simon II. was surnamed *Ἰσχυρ*, the first of the above solutions will be the most probable; but, on the whole, it is best to suppose that the author had not really seen the high priest whom he describes, nor is there anything in the panegyric which necessarily implies that he had done so. Of late years there has been a consensus in favour of assigning the original work to about 200 B.C., and the later date of the translation seems also confirmed by the manner in which the translator speaks of the Alexandrine Version of the Old Testament, and the familiarity which he shows with its language (e.g. xlii. 16, *Ἐνῶχ ἐντίστησε*

ἡλούσιον ψεύστην, γέροντα μοιχόν, ἡσυχρὸν καὶ ἡσυχρὸν (see Delitzsch and Dukes, *ut supra*). Mohammed must have got it from the Jews of Medina, who therefore may have possessed copies of Ben Sira. Since the true reading is evidently *γέροντα μοιχόν* (of several MSS. and Versions), the coincidence cannot be accidental. In the *Sefer Yetzira* (of uncertain date) some words in § 42 bear a striking likeness to Ecclus. xxxix. 25.

καὶ μετετέθη, Gen. v. 24); the allusions, too, to Greek customs and perhaps to Greek literature, which have been found in the book, will suit the beginning of the 2nd rather than the middle of the 3rd century.

5. The name of the first Greek translator, the grandson of the author, is unknown. He is commonly supposed to have borne the same name as his grandfather, but this tradition rests only on conjecture or misunderstanding (Jerome, l. c.; *Synops. S. Script.*, printed as a Prologue in the Compl. ed. and in A. V.). There seems no reason to doubt that his translation is in the main preserved in the text of the uncials ABCN, which the editions of Swete and Fritzsche (in the main) follow very closely. Yet this translation must at an early time have undergone revision by comparison with Hebrew copies, and the different families of MSS. are differentiated by the character of these alterations. They consist (a) in slight modifications of the translation, e.g. xix. 14, τὸν φίλον ABN τὸν πλησίον SN, &c., for U; iii. 26, ἐμπεσέται B, ἀπολείται ACN, &c.; xix. 30, τὰ περὶ αὐτοῦ BN, τὰ περὶ ἐμοῦ A, U, for V, &c.; (b) in slight additions intended to make the verses clearer, e.g. iv. 4, πᾶν ὃ ἐὰν ἐπαχθῇ σοι δέξαι (ἀσμένως added by 106, 248, 253); iv. 8, κλῖνον τὸ οὖς σου (ἀλύτως added by 248); (c) in the addition of a considerable number of verses, some of which are quoted by very early authorities (e.g. Chrysostom and Clement of Alexandria), or are confirmed by the best collateral evidence (e.g. the Syriac, Latin, and Coptic Versions). Many of these verses are translated in the Syro-Hexaplar Version, where they are marked with asterisks, the meaning of which in the Apocryphal Book is a matter of difficulty (Field, *Hexapla*, i. p. lxx.). That they are translations of Hebrew verses is shown by the fact that the sense of many of them only becomes clear after retranslation: e.g. in i. 10, ἀγάπησις Κυρίου ἐνδοξος σοφία, ἐνδοξος σοφία probably represents חֵן וְכָבוֹד (wrongly written or read כְּבוֹד וְחֵן), "the fount of wisdom."

The following is a list of these verses, most of which are supplied by MSS. 23, 55, 70, 106, 248, 253:—i. 5, 7, 10, 12, 18, 20; ii. 4, 9; iii. 19, 25; iv. 23 b; v. 7 h, 11 b; ix. 8 c; x. 8, 20; xi. 11 c, 15, 16; xii. 6 c; xiii. 14, 25; xvi. 10 b, 14; xvii. 5, 17, 18, 21, 22, 26; xviii. 5, 9 b, 27 b, 29; xix. 5 b, 6 a, 13 b, 14 a, 18, 19, 21, 25 c; xx. 3, 14 b, 17 b, 32; xxii. 9, 10, 13 b, 23 c, d; xxiii. 3 a, 4 c, 5 b, 28; xxiv. 18, 24; xxv. 12, 26 c; xxvi. 19–27 (also in Syriac Version); xxix. 23 b; xxx. 12 b; xxxviii. 32; xlvii. 9; l. 29 b.

In all the Greek MSS. hitherto collated (except, perhaps, 248, a Vatican MS. of the 14th century), the original order of the chapters is disturbed. They proceed from xxx. 24 (Co.) to xxxiii. 16 (ὡς καλεόμενος), which is continued till xxvi. 11 a, after which follow xxx. 25 to xxxiii. 16, when the rest of xxxvi. 11 is taken up, slightly altered. The true order (which is rendered certain by the context) is preserved in the Peshitto and Vetus Latina (being indeed no slight proof of their independence), and was exhibited in the Compluteasian and other early editions of the LXX., and more recently in Fritzsche's *Libri Apocryphi Veteris Testamenti*. In the Vatican edition, followed

by Tischendorf, the order of the Greek MSS. was followed, and the numbers of the chapters altered accordingly.

The Greek MSS. in which Ecclesiasticus is preserved are enumerated by Hatch, *Essays in Biblical Greek*, p. 247 sq. To these must be added a fragment of a Jerusalem uncial, comprising the Prologue and parts of chs. i. and ii., edited by R. Harris, in *Biblical Fragments from Mt. Sinai* (No. iv.). Dr. Hatch's *Essay* contains some important observations on the grammatical varieties of the MSS. It may be said that of the MSS., 248 represents best the recension furthest removed from the uncials, while 106 and 253 constitute an intermediate family, often independent of both.

6. The Peshitto Syriac is an independent version of the original of uncertain date and origin; its independence, first noticed by Beestien (*Spec. Exercit. Crit. in Vet. T. lib. Apoc.* pp. 16, 29), has since been proved by Geiger and others, and is now generally acknowledged (see the *Speaker's Comm.* on the Apocrypha, i. p. 27). It offers a wholly different text from the Greek in i. 20–28; omits xli. 12–xlii. 8; and has many other minor omissions and variations (especially in the last chapters). Of the Greek MSS. hitherto collated, MS. 248 agrees with it most closely. A large number of its variations may be accounted for by different reading or interpretation of the original. While ordinarily literal, even to absurdity, it appears in some cases to paraphrase the original with a view to clearness or for dogmatic reasons. Its great importance for the criticism of the text has found hitherto scanty recognition. The best edition is by Lagarde (*Libri Apocryphi Vet. Test. Syriace*, 1861).

The Latin Version (part of the Vetus Latina, unrevised by Jerome, *Praef. ut supra*) gives proof of the work of a great many hands. Many verses are rendered twice or even thrice; the renderings sometimes agree very closely with the Peshitto, at other times with different families of the Greek; while occasionally it has independent varieties, some of which probably represent the original more faithfully than the other authorities. Hence it was conjectured by Sabatier and Bengel (*Eichhorn's Bibliothek*, vi. 481) that this translation was made with the aid of a Jew or by a Jewish Christian in possession of the original. Cases which make for this hypothesis are such as ix. 7, ἐν ταῖς ἐρημίαις αὐτῆς μὴ πλανᾷ, Vet. Lat. in plateis eius, clearly representing בְּרִחְבוֹתֶיהָ בְּרִחְבוֹתֶיהָ, in accordance with the context; xvii. 11, σοφία, Vet. Lat. ut sol, apparently כְּכֶסֶד for חֵן, rendered very probable by the antithesis: xv. 12, πλεγγὺν καρδίας, Vet. Lat. tristitiam cordis, agreeing with the Talmudic quotation

(Dukes, l. c.) לֵב כְּכֶסֶד. Some remarkable additions are found in chs. i. and xxiv., especially xxiv. 45, which perhaps betrays the hand of a Christian. The Latin presents great peculiarities; even in the first two chapters the following words occur which are found in no other part of the Vulgate: *defunctio* (i. 18), *religiositas* (i. 17, 18, 26), *compartior* (i. 24), *inhonoratio* (i. 38), *obductio* (ii. 2; v. 1, 10), *receptibilis* (ii. 5). The MSS. in which it exists are enumerated by Hatch, l. c. They present

few varieties, as Sabatier observed; the text of the Amiatinus has been separately edited by Lagarde (*Mittheilungen*, vol. i.).

7. Of the remaining Versions the ARABIC published in the Polyglot is from the Peshitto; it is not clear whether this is the same as that made by Al-hārith ibn Sinān ibn Sanbāt (De Slane, *Catal. des MSS. Arabes de la Bibliothèque Nationale*, i. 11). The other ancient Versions are from the Greek. Of these the most important is the COPTIC (Sahidic dialect), existing in a Turin MS. of the 6th century, published by Lagarde in his *Aegyptiaca* (1884). A fragment of a Memphitic Version (ii. 1-9) was published by the same scholar in his *Orientalia* (Pt. i. 1880). The ARMENIAN Version which existed before the time of Moses of Chorene was published from a fragmentary MS. by the Mechitarists of Venice, 1833; it has a lacuna from xxxv. 19—xxxviii. 14 (inclusive), and breaks off at xlii. 24; besides minor omissions (e.g. the whole of ch. viii.). While exhibiting a text similar to that of the uncials, it has some remarkable readings (e.g. xl. 6 and xli. 17). The AETHIOPIAN Version (of which an edition is promised) exists in MSS. of the British Museum, the Bibliothèque Nationale, and Tübingen. The SYRO-HEXAPLARI (published by Ceriani in vol. vii. of *Anecdota Sacra et Profana*) has a text remarkably similar to that of MS. 257. The translator would appear to have consulted the Peshitto concerning difficult words (e.g. iv. 30, *φαντασιοκοτών*). The Ambrosian MS. contains some marginal scholia besides the critical marks.

8. It is impossible to make any satisfactory plan of the book in its present shape. Separate portions seem constituted by (1) the *hymns* to Wisdom, i. 1-18, and ch. xxiv.: (2) the *prayers*, xxxiii. 1-11, with xxxvi. 16 b-22, and ch. li., which Bickell (*Ein Alphabetisches Lied Ben Sira's*) fancied, but on insufficient grounds, to be alphabetical: (3) the hymn to God, xxxix. 12-21, called by the author a "fresh thought;" cp. xvi. 22—xviii. 13: (4) the praise of famous men (*κατέρων ὕμνος*), xlv. 1-1. 24. The attempts which have been made to show that the book was made up out of several collections (Eichhorn, *Eintl.* 50 sq.; Ewald, *History of Israel*, E. T. v. 205), belonging to different epochs, cannot be considered successful; although, doubtless, as might be expected in a gnology, most of the maxims are not original. The words of Jerome, *Praef. in Libr. Salom.* ("Quorum priorem [*κατέρων* Jesu filii Sirach librum] Hebraicum repperi, non *Ecclasiasticum* ut apud Latinos, sed *Parnabolas* praenotatum, cui juncti erant *Ecclasiastes* et *Canticum Cantorum*, ut similitudinem Salomonis non solum librorum numero, sed etiam materiarum genere coaequaret") can scarcely point, as has been thought, to any threefold division of the present book, but rather imply that under Ben Sira's name two other Hebrew works were known, corresponding with the two other Books of Solomon; and this is somewhat confirmed by the fact that the Rabbis speak occasionally of the *books* of Ben Sira (Seligmann, *ut supra*), and that passages are quoted by them from Ben Sira which are not found in the Greek; notably some *rhyming* verses, quoted in the appendix to the *Massecheth Kallah* (published in Coronei's

חכמה קונטרסים: see the *Expositor* for November 1890, pp. 357-8). In the central portion of Ecclesiasticus several headings are introduced in the oldest MSS. (xviii. 29, *ἐγκάρτεια ψυχῆς*; xxxii. *καὶ ἡγαπημένον*), and similar titles preface ch. xlv. (*κατέρων ὕμνος*) and ch. li. (*προσευχὴ Ἰησοῦ υἱοῦ Σειράχ*); vestiges of these are not wholly wanting in the Peshitto, and all are found in the *Vetus Latina*. These sections may have contributed to the disarrangement of the text, but they do not offer any sufficient clue to its true subdivisions.

9. The earliest clear coincidence with the contents of the book occurs in the Epistle of Barnabas (ch. xix. = *Ecclesi.* iv. 31; cp. *Const. Apost.* vii. 11; this maxim, however, is found in other Jewish gnologies). The parallels which have been discovered in the N. T. are thought by many too general to show that they were derived from the written text, and not from popular language. There is no sign of the use of the book in Justin Martyr, which is the more remarkable as it offers several thoughts congenial to his style. The first distinct quotations occur in Clement of Alexandria; but from the end of the 2nd century the book was much used and cited with respect, and in the same terms as the canonical Scriptures (August. *de Cura pro Mort.* 17). Clement speaks of it continually as *Scripture* (*Paed.* i. 8, § 62; ii. 2, § 34; 5, § 46; 8, § 69, &c.), as the work of Solomon (*Strom.* ii. 5, § 24), and as the voice of the great Master (*καθ' αὐτόν*, *Paed.* ii. 10, § 98). Origen cites passages with the same formula as the Canonical Books (*γέγραται*, in *Johann.* xxxii. § 14; in *Matt.* xvi. § 8), as *Scripture* (*Comm. in Matt.* § 44; in *Ep. ad Rom.* ix. § 17, &c.), and as the utterance of "the divine word" (c. *Cels.* viii. 50). The other writers of the Alexandrine school follow the same practice. Dionysius calls its words "divine oracles" (*Frag. de Nat.* iii. p. 1258, ed. Migne), and Peter Martyr quotes it as the work of "the Preacher" (*Frag.* i. § 5, p. 515, ed. Migne). The passage quoted from Tertullian (*de Exhort. Cast.* 2, "eicut scriptum est: ecce posui ante te bonum et malum; gustasti enim de arbore agnitionis . . .") cp. *Ecclesi.* xv. 17, *Vulg.* is not absolutely conclusive; but Cyprian constantly brings forward passages from the book as *Scripture* (*de bono Pat.* 17; *de Mortalitate*, 9, § 13) and as the work of Solomon (*Ep.* lix. 20, &c.). The testimony of Augustine sums up briefly the result which follows from these isolated authorities. He quotes the book constantly himself as the work of a prophet (*Serm.* xxxix. 1), the word of God (*Serm.* lxxxvii. 11), "*Scripture*" (*Lib. de Nat.* 33), and that even in controversy (c. *Jul. Pelag.* v. 36); but he expressly notices that it was not in the Hebrew Canon (*de Cura pro Mort.* 18), "though the Church, especially of the West, had received it into authority" (*de Civit.* xvii. 20, cp. *Speculum*, iii. 1127, ed. Paris). Jerome, in like manner (l. c. § 7), contrasts the book with "the Canonical Scriptures" as "doubtful," while they are "sure;" and in another place (*Prolog. Galat.*) he says that it "is not in the Canon," and again (*Prolog. in Libr. Sol.*) that it should be read "for the instruction of the people (*plebis*), not to support the authority of ecclesiastical doctrines." The book is not quoted by Irenaeus, Hippolytus, or Eusebius; and is not contained in the Canon of Melito,

Origen, Cyril, Laodicea, Hilary, or Rufinus (cp. Diestel, *Gesch. des alten Testaments*, pp. 71-77; Edersheim, *Introduction*, p. 35). [CANON.] It was never included by the Jews in their Scriptures, in the opinion of Geiger (*ZDMG.* 1858, p. 538 = *Schriften*, iii. 275) partly for political reasons, more probably owing to its late origin; but among the "outer books," not however the heretical sort, but such as were harmless, though not fit for profound study (*M. Joel, Blicke in die Religionsgeschichte zu Anfang des Zweiten christlichen Jahrhunderts*, Breslau, 1880, pp. 68-76). Edersheim (*Introduction*, p. 34) endeavours to show that the opinion of the Rabbis varied at different epochs, and suggests that the condemnation of the book which appears in some passages (*Jerus. Sanh.* 28 a; *Midr. Kohaleth*, xii. 12) may have been due to its wide use in the Christian Church.

10. But, while the book is destitute of the highest canonical authority, it is a most important monument of the condition and language of the Jews at the period of its composition. As an expression of Palestinian theology it stands alone; although the writer's travels may have inspired him with certain Greek ideas (e.g. the love of beauty, xl. 22; of music and good cheer, xl. 21, &c.; appreciation of the medical art, xxxviii. 1-15; Bois, *ut supra*, pp. 160-163), and certain parallels with Greek writers seem too close to be the result of accident (e.g. xiii. 2, the fable of the pot and the jar = *fab. Aesop.* 422, *Halm, Avianus*, xi. ed. Ellis; xiv. 18 = *Iliad*, vi. 146-7; xii. 12, 13 are to be explained from *Hesiod, Works and Days*, 652-4), there is no sufficient reason for assuming Alexandrine interpolations or Alexandrine influence (Bois, *ut supra*, pp. 163-204, against Grfrörer and Dähne). Nor does it seem probable that the translator has intentionally altered the text with the view of introducing Alexandrine doctrines, although this has been maintained by Edersheim (*Speaker's Comm.*, *passim*). The statement that "Enoch became an example of repentance for all the generations" (xliv. 16), although this notion is to be found in Philo (ii. pp. 410-11; *de Praemiis et Poenis*, § 3) is not sufficiently characteristic of Alexandrine hermeneutics to give support to either hypothesis; and the omission of that verse in the Peshitto, combined with the mention of Enoch in xlix. 14, renders it peculiarly liable to suspicion. The conception of God as Creator, Preserver, and Governor is strictly conformable to the old Mosaic type; but at the same time His mercy is extended to all mankind (xviii. 11-13). The angelology would seem to be similar to that of the Book of Daniel (cp. xvii. 17 with *Dan.* x. 20); while the identification of the forces of nature with spirits (xxxix. 28, &c.) corresponds with certain representations in the Psalms. The doctrine of a resurrection seems emphatically denied (xvii. 27, 28). Yet this can scarcely have been a ground for the exclusion of the book from the Canon, as Geiger held). In addition to the general hope of a restoration (xxxvi. 1, &c.), one trait only of a Messianic faith is preserved, in which the writer contemplates the future work of Elias (xlviii. 10, a somewhat obscure passage). The prophetic notion of the superiority of "charity" to ceremonious observance is maintained (xxii. 1-12), at the same time as the writer is exhorting to a

punctilious observance of the prescribed ritual, on the sole ground of its being prescribed (v. 6). As is so often the case in proverbial philosophy, little attempt is made to harmonise the often contradictory maxims in which common sense expresses itself.

11. Numerous commentaries on Ecclesiasticus appeared in the 16th and 17th centuries (cp. Bretschneider, *Lib. Sirac.* Praef. x. note, for a list of these), of which the most important were those of Drusius and Grotius (reprinted in *Critici Sacri*, vol. v.); the latter is especially valuable in collecting parallel passages from classical writers, which of course are very numerous. An edition was published with commentary by Bretschneider in 1806 (*Lib. Jesu Siracidae ad fidem Codd. et Verss. emend. et perpet. Comm. illustratus a Car. Gottl. Bretschneider* ... Ratisbonae, MDCCCLVI.), which however was an immature work, and showed but slight progress. Fritzsche's Commentary in the *Kurzg. exeget. Handbuch (Die Weisheit Jesus Sirachs's erklärt und übersetzt)*, Leipz. 1859, followed by a Greek text with critical notes in *Libri Apocryphi Veteris Testamenti*, Lips. 1871) was an advance on Bretschneider; but, owing to the writer's failing to perceive the value of the Syriac and Latin Versions, and to estimate aright the importance of the MSS. and secondary Versions, left very much still to be done; moreover the contributions of Geiger, Delitzsch, and Herzfeld are unduly neglected. A critical edition collecting all the evidence of MSS. and Versions, to be followed by a restoration of the Hebrew so far as the materials at our disposal admit of its being restored with certainty, should be the basis for any satisfactory treatment of the book. A beginning was made towards this in the commentary of A. Edersheim (*Speaker's Comm.*, Murray, 1888), which both for criticism and exposition was a considerable advance on all its predecessors. A brief Commentary, with a valuable Introduction (by O. Zöckler), is to be found in the ninth section of Strack and Zöckler's *Kurzgefasster Kommentar*, &c. (München, 1891). Cp. Ball, *Var. Apocrypha*, 1892.

The monographs which deal with special questions have been mentioned in the foregoing paragraphs; the connexion between Ecclesiasticus and Ecclesiastes by C. H. H. Wright, *The Book of Kohaleth* (London, 1883); while contributions of interest are to be found in the histories of Jost, Grätz, Ewald, Herzfeld, and Schürer; in Geiger's *Urschrift und Uebersetzungen*; in T. K. Cheyne's *Job and Solomon* (London, 1887); and in the various Introductions to the Old Testament. [B. F. W.] [D. S. M.].

ECLIPSE OF THE SUN. No historical notice of an eclipse occurs in the Bible, but there are passages in the Prophets which were once considered to contain manifest allusion to this phenomenon:—"The sun goes down at noon," "the earth is darkened in the clear day" (*Amos* viii. 9), "the day shall be dark" (*Mic.* iii. 6), "the light shall not be clear nor dark" (*Zech.* xiv. 6), "the sun shall be dark" (*Joel* ii. 10, 31; iii. 15). Hence these notices were taken to refer to eclipses that occurred about the

time of the respective compositions: thus the date of Amos was said to coincide with a total eclipse which occurred Feb. 9, B.C. 784, and was visible at Jerusalem shortly after noon (Hitzig, *Comm. in Proph.*), or with eclipses of the sun in B.C. 791, 771, and 770 (Ussher. See *Speaker's Comm. in loco*); that of Micah with the eclipse of June 5, B.C. 716, referred to by Dionys. Hal. ii. 56, to which same period the latter part of the Book of Zechariah was assigned. A passing notice in Jer. xv. 9 was said to coincide in date with the eclipse of Sept. 30, B.C. 610, so well known from Herodotus' account (i. 74, 103). Such opinions are now given up. The darkness that overspread the world at the Crucifixion cannot with reason be attributed to an eclipse, as the moon was at the full at the time of the Passover. [DARKNESS.] The awe which is naturally inspired by an eclipse in the minds of those who are unacquainted with the cause of it, rendered it a token of impending judgment in the Prophetical Books. [W. L. B.]

ED = witness, a word inserted—as a name—in the A. V. and R. V. of Josh. xxii. 34, apparently on the authority of a few MSS., and also of the Syriac and Arabic Versions, but not existing in the generally-received Hebrew Text. The passage may be translated as follows: "And the children of Reuben and the children of Gad named (LXX. *ἐπωνόμασαν*) the altar: for it is a witness (Ed) between us that Jehovah is God." The rendering of the LXX. ("Joshua named the altar of Reuben and of Gad and of the half-tribe of Manasseh, and said," &c.), though in some respects differing materially from the present text, shows plainly that at that time the word Ed (עֵד) stood in the Hebrew in its present place (for a further investigation of this passage, see Keil and Dillmann in loco). If we may trust the indications in Josh. xxii. 9-34, the altar was in Gilead, on the east side of Jordan, and not far from that river; and this is more directly stated by Josephus (*Ant. vi. 1, § 26*). A position near the mouth of the Jabbok would seem to meet the requirements of the narrative. [G.] [W.]

EDAR, TOWER OF (accur. EDER, מִגְדָּל עֵדֶר; LXX. *v. 16*; A. *πύργος Γαβέρ*, E. *Γαβέρ*; *Turna Eder*), a place named only in Gen. xxxv. 21. Jacob's first halting-place between Bethlehem and Hebron was "beyond (מֵעֵדֶר) the tower Eder." It was possibly a shepherd's tower, for protection against robbers, near "Solomon's Pools," or on the pass beyond them. According to Jerome (*OS*, p. 101, 9) it was 1000 paces from Bethlehem. The name signifies "a flock" or "drove," and is quite in keeping with the pastoral habits of the district. Jerome sees in it a prophecy of the announcement of the birth of Christ to the shepherds; and there seems to have been a Jewish tradition that the Messiah was to be born there (Targum Ps.-Jon. Cp. Ederheim, *Life and Times of Jesus the Messiah*, i. 186), possibly founded on or alluded to in Micah iv. 8 (A. V. "Tower of the flock"). This, however, Kimchi explains as "the tower of David where Israel assembled," a notion which receives some

countenance from the use of the word Ophel (A. V. "stronghold"), the name of one of the chief fortifications of Jerusalem. [G.] [W.]

EDDI'AS (B. 'Is'elias, A. 'Is'elias; *Geddias*). One of those who had taken a "strange" wife and agreed to put her away (1 Esd. ix. 26). [JEZIAH.] [F.]

E'DEN (עֵדֶן; 'Eḏēn), the biblical and well-known name of the first abode of man, in a part of which a garden ("the garden of Eden") was planted, which the first man was to dress and keep, but from which he was expelled for disobedience.

No subject has probably attracted the attention of men of learning so much as that of the identification of the land of Eden and its garden. Every quarter of the Old World has, at one time or other, formed the subject of examination to this end. India, Ceylon, China, the Mountains of the Moon, the Canary Islands, the coasts of the Baltic—all these have been fixed on as possible localities. Columbus, when sailing to find the New World (then supposed to be part of India), expected to come across it there; and a very bold and learned contention, published of late years, locates it—at the North Pole! Notwithstanding the new material of late brought to bear on the subject, however, the matter must still be regarded as doubtful, and many will probably look upon its ultimate settlement as unlikely.

The words of Gen. ii. 8-14 concerning Eden are as follows: "And the LORD God planted a garden eastward in Eden; and there He put the man whom He had formed. And out of the ground made the LORD God to grow every tree that is pleasant to the sight, and good for food; the tree of life also in the midst of the garden, and the tree of the knowledge of good and evil. And a river went out of Eden to water the garden; and from thence it was parted, and became four heads. The name of the first is Pishōn: that it is which compasseth the whole land of Havilah, where there is gold; and the gold of that land is good: there is bdellium (*b'dolakh*) and the onyx stone (*eben haashshoham*). And the name of the second river is Gihon (*Gihōn*); the same it is which compasseth the whole land of Cush. And the name of the third river is Hiddekel: that it is which goeth in front of (R. V. marg., Or, *toward the east of*) Assyria. And the fourth river is Euphrates."

From this detailed and circumstantial description there is hardly any doubt that the writer of it was trying to describe a place which he had in his mind, and which, though he may not have seen, he had heard of. Whatever allegory there may have been, therefore, in the story of Paradise, for the Hebrew author of Genesis it was a real tract of country, with a garden situated in the eastern part. The river which flowed through Eden watered the garden, and then became four distinct streams, two of which, the Hiddekel (Assyr. *Idiglat*, the Tigris) and the Euphrates (Assyr. *Purattu*), are well-known and important waterways. For the proper identification of the garden of Eden, therefore, it is useful to find a tract of country fulfilling all the above conditions, both as to geographical situation and natural products.

The more reasonable of the theories as to the position of Paradise may be roughly divided into two classes: namely, those which place the garden of Eden below the junction of the Tigris and the Euphrates, and seek the Pishon and Gihon among the many natural or artificial tributaries of those streams; and those which locate the site in the high tableland of Armenia, where so many noble streams have their origin. These theories have been supported by learned men of all nations and ages, representing every shade of theological belief; but there is not one which is not based in some degree upon a forced interpretation of the words of the narrative. Those who contend that the united stream of the Tigris and the Euphrates is the "river" which "went out of Eden to water the garden" have been obliged to neglect the primitive meaning of נָחַל, which generally indicates the origin or source of a thing, and to accept the more general one of "running on" or "through" (boundary, &c.). According to the description (v. 10), the river should begin (have its outlet into the sea) in Eden, pass through the garden, and then divide into four branches, the separation taking place either in the garden or after passing through it, becoming four heads or sources (see Gesenius, נָחַל מִן הַמַּיִם; and compare the Assy. *nāḫ ēni*, "source," lit. "head of a spring"). There are other difficulties in the details of the several theories, which may be obstacles to their entire acceptance, but no theory which involves undue forcing of the words of the sacred narrative ought to be allowed to take its place even among the probable explanations.

With regard to the meaning of the name Eden, the old Versions or translations give us little or no assistance. The translators seem to have halted between a mystical and a literal interpretation. The word עֵדֶן is rendered by the LXX. as a proper name in three places only (Gen. ii. 8, 10, and iv. 16), where it is represented by Ἔδέμ. In all others, with the exception of Is. li. 3 (where it is translated by *paradisus*), it is translated by *ἡδονή*, "delight" (the plural of the word, with the meaning "delights," occurs in Ps. xxxvi. 9). In the Vulgate it does not occur as a proper name, but is rendered "voluptas," "locus voluptatis" or "deliciae." The Targum of Onkelos gives it uniformly as עֵדֶן, and the Peshitto Syriac the same, with the slight variation, in two passages, of *עֵדֶן* for *עֵדֶן*.

It would be a hopeless task to attempt to chronicle the opinions of all the commentators upon this question: their name is legion. Philo (*de Mundi Opif.* § 54) is the first who ventured upon an allegorical interpretation. He conceived that by Paradise is darkly shadowed forth the governing faculty of the soul; that the tree of life signifies religion, whereby the soul is immortalised; and that the faculty of knowing good and evil was the middle sense, by which are discerned things contrary to nature. In another passage (*de Plantat.* § 9) he explains Eden, which signifies "pleasure," as a symbol of the soul, that sees what is right, exults in virtue, and prefers one enjoyment, the worship of the Only Wise, to myriads of men's chief delights. And again (*Legis Allegor.* i. § 14) he says, "Now virtue is tropically called Paradise, and the site of

Paradise is Eden, that is, pleasure." The four rivers he explains (§ 19) of the several virtues of prudence, temperance, courage, and justice; while the main stream of which they are branches is the generic virtue, goodness, which goeth forth from Eden, the wisdom of God. The opinions of Philo would not be so much worthy of consideration, were it not that he has been followed by many of the Fathers. Origen, according to Luther (*Comm. in Gen.*), imagined Paradise to be heaven, the trees Angels, and the rivers wisdom. Papias, Irenaeus, Pantænus, and Clemens Alexandrinus have all favoured the mystical interpretation (Huet. *Origéniana*, ii. 167). Ambrosius followed the example of Origen, and placed the terrestrial Paradise in the third heaven, in consequence of the expression of St. Paul (2 Cor. xii. 2, 4); but elsewhere he distinguishes between the terrestrial Paradise and that to which the Apostle was caught up (*De Parad.* c. 3). In another passage (*Ep. ad Sabinum*) all this is explained in allegory. Among the Hebrew traditions enumerated by Jerome (*Trad. Hebr. in Gen.*) is one that Paradise was created before the world was formed, and is therefore beyond its limits.* Moses Bar Cepha (*De Parad.*) assigns it a middle place between the earth and the firmament. Some affirm that Paradise was on a mountain, which reached nearly to the moon; while others, struck by the manifest absurdity of such an opinion, held that it was situated in the third region of the air, and was higher than all the mountains of the earth by twenty cubits, so that the waters of the Flood could not reach it. Others, again, have thought that Paradise was twofold, one corporeal and the other incorporeal: others that it was formerly on earth, but had been taken away by the judgment of God (Hopkinson, *Proc. Parad.* in Ugol. *Theo.* vii.). Among the opinions enumerated by Morinus (*Diss. de Parad. Terrest.* Ugol. *Theo.* vii.) is one that, before the Fall, the whole earth was Paradise, and was really situated in Eden, in the midst of all kinds of delights. Ephraem Syrus (*Comm. in Gen.*) expresses himself doubtfully upon this point. Whether the trees of Paradise, being spiritual, drank of spiritual water, he does not undertake to decide; but he seems to be of opinion that the four rivers have lost their original virtue in consequence of the curse pronounced upon the earth for Adam's transgression.

Conjectures with regard to the dimensions of the garden have differed as widely as those which assign its locality. Ephraem Syrus maintained that it surrounded the whole earth, while Johannes Tostatus restricted it to a circumference of thirty-six or forty miles, and others have made it extend over Syria, Arabia, and Mesopotamia (Hopkinson, as above). But of speculations like these there is no end.

What is the river which goes forth from Eden to water the garden? is a question which has been often asked, and still waits for a satisfactory answer. That the ocean stream which surrounded the earth was the source from which the four rivers flowed was the opinion of Josephus (*Ant.* i. 1, § 3) and Johannes Damascenus (*De*

* The Akkadian or Sumerian legend of the Creation indicates that they, too, believed that Eridu, "the happy city," was created before the world was formed (see below, p. 850).

Orthod. Fid. ii. 9). It was the *Shatt-al-Arab*, according to those who place the garden of Eden below the junction of the Tigris and Euphrates. By those who refer the position of Eden to the highlands of Armenia, the "river" from which the four streams diverge is conceived to mean "a collection of springs," or a well-watered district. It is scarcely necessary to say that this signification of נָחַר (*nāhār*) is wholly without a parallel; and even if it could, under certain circumstances, be made to adopt it, such a signification is, in the present instance, precluded by the fact that, whatever meaning we may assign to the word in v. 10, it must be the same as that which it has in the following verses, in which it is sufficiently definite. Sickler (*Augusti, Theol. Monatschrift.* i. 1, quoted by Winer), supposing the whole narrative to be a myth, solves the difficulty by attributing to its author a large measure of ignorance. The "river" was the Caspian Sea, which in his apprehension was an immense stream from the east. Bertheau, applying the geographical knowledge of the ancients as a test of that of the Hebrews, arrived at the same conclusion, on the ground that all the people south of the Armenian and Persian highlands place the dwelling of the gods in the extreme north, and the regions of the Caspian were the northern limit of the horizon of the Israelites (Käobel, *Genesis*). But he allows the four rivers of Eden to have been real rivers, and not, as Sickler imagined, oceans which bounded the earth east and west of the Nile.

That the Hiddekel^b is the Tigris, and the Phrath the Euphrates, has never been denied, except by those who assume that the whole narrative is a myth which originated elsewhere, and was adapted by the Hebrews to their own geographical notions. As the former is the name of the great river by which Daniel sat (*Dan.* x. 4), and the latter is the term uniformly applied to the Euphrates in the Old Testament, there seems no reason to suppose that the appellations in Gen. ii. 14 are to be understood in any other than the ordinary sense. One circumstance in the description is worthy of observation. Of the four rivers, one, the Euphrates, is mentioned by name only, as if that were sufficient to identify it. The other three are defined according to their geographical positions, and it is fair to conclude that they were therefore rivers with which the Hebrews were less intimately acquainted. If this be the case, it is scarcely possible to imagine that the Gihon, or, as some say, the Pishon, is the Nile, for that must have been even more familiar to the Israelites than the Euphrates, and have stood as little in need of a definition.

With regard to the Pishon, the most ancient and most universally received opinion identifies it with the Ganges. Josephus (*Ant.* i. 1, § 3), Eusebius (*Onom.* s. v.), Ambrosius (*de Parad.* c. 3), Epiphanius (*Anchor.* c. 58), Ephr. Syr. (*Op. Syr.* i. 23), Jerome (*Ep. 4 ad Rust.* and *Quæst. Heb. in Gen.*), and Augustine (*de Gen. ad lit.* viii. 7) held this. But Jarchi (*on Gen.* ii. 11), Saadiah Gaon, R. Moses ben Nachman, and

Abr. Peritsol (*Ugol. Thes.* vii.), maintained that the Pishon was the Nile. The first of these writers derives the word from a root which signifies "to increase," "to overflow" (cf. *Hab.* i. 8), but at the same time quotes an etymology given in *Bereshith Rabba*, § 16, in which it is asserted that the river is called Pishon "because it makes the flax (פִּשְׁוֹן) to grow." Josephus explains it by *πληθύνω*, Scaliger by *πλημμυρῶ*. The theory that the Pishon is the Ganges is thought to receive some confirmation from the author of the book of Ecclesiasticus, who mentions (*xxiv.* 25, 27) in order the Pishon, the Tigris, the Euphrates, Jordan, and Gihon, and is supposed to have commenced his enumeration in the east and to have terminated it in the west. That the Pishon was the Indus was an opinion current long before it was revived by Ewald (*Gesch. d. Volk. Isr.* i. 331, note 2) and adopted by Kalisch (*Genesis*, p. 96). Philostorgius, quoted by Huet (*Ugolin.* vol. vii.), conjectured that it was the Hydaspes; and Wilford (*As. Res.* vol. vi.), following the Hindoo tradition with regard to the origin of mankind, discovers the Pishon in the Laudi-Sindh, the Ganges of Isidorus, called also Nilāb from the colour of its waters, and known to the Hindoos by the name of Nilā-Gangā or Gangā simply. Severianus (*de Mundi Creat.*) and Ephraem Syrus (*Comm. on Gen.*) agree with Caesarius in identifying the Pishon with the Danube. The last-mentioned Father seems to have held, in common with others, some singular notions with regard to the course of this river. He believed that it was also the Ganges and Indus, and that, after traversing Ethiopia and Elymais, which he identified with Havilah, it fell into the ocean near Cadiz. Such is also the opinion of Epiphanius with regard to the course of the Pishon, which, he says, is the Ganges of the Ethiopians and Indians and the Indus of the Greeks (*Anchor.* c. 58). Some, as Hopkinson (*Ugol.* vol. vii.), have found the Pishon in the Naharmalca, one of the artificial canals which formerly joined the Euphrates with the Tigris. This canal is the *flumen regium* of Amm. Marc. (*xxiii.* 6, § 25, and *xxiv.* 6, § 1), and the *Armalchar* of Pliny (*N. H.* vi. 30). Grotius, on the contrary, considered it to be the Gihon. Even those commentators who agree in placing the terrestrial Paradise on the *Shatt-al-Arab*, the stream formed by the junction of the Tigris and Euphrates, between Ctesiphon and Apamea, are by no means unanimous as to which of the branches, into which this stream is again divided, the names Pishon and Gihon are to be applied. Calvin (*Comm. in Gen.*) was the first to conjecture that the Pishon was the most easterly of these channels, and in this opinion he is followed by Scaliger and many others. Huet, on the other hand, conceived that he proved beyond doubt that Calvin was in error, and that the Pishon was the westernmost of the two channels by which the united stream of the Euphrates and Tigris flows into the Persian Gulf. He was confirmed by the authority of Bochart (*Hieroz.* pt. ii. l. 5, c. 5). Juains (*Prael. in Gen.*) and Raak discovered a relic of the name Pishon in the Pasitigris. The advocates of the theory that the true position of Eden is to be sought for in the mountains of Armenia have been induced, from a certain resemblance in the two names, to identify the Pishon with the Phasis, which rises in the elevated

^b This name is said to be still in use among the tribes who live upon its banks (Sir G. Chesney, *Expto Tigris and Euphrates*, i. 13).

plateau at the foot of Mount Ararat, near the sources of the Tigris and Euphrates. Reland (*de Situ parad. terr.* Ugol. vii.), Calmet (*Dict. s. v.*), Link (*Urcelt.* i. 307), Rosenmüller (*Handb. d. Bibl. Alt.*), and Hartmann have given their suffrages in favour of this opinion. Raumer (quoted by Delitzsch, *Genesis*) endeavoured to prove that the Pishon was the Phasis of Xenophon (*Anab.* iv. 6); that is, the Aras or Araxes, which flows into the Caspian Sea. There remain yet to be noticed the theories of Leclerc (*Comm. in Gen.*) that the Pishon was the Chrysorrhoas, the modern Barada, which takes its rise near Damascus; and of Buttmann (*Aelt. Erdk.* p. 32), who identified it with the Besynga or Irabatti, a river of Ava. Mendelssohn (*Comm. on Gen.*) mentions that some affirm the Pishon to be the Gozan of 2 K. xvii. 6 and 1 Ch. v. 26, which is supposed to be a river, and the same as the Kizil-Uzen in Hyrcania. Sir G. Cheaney, from the results of extensive observations in Armenia, was "led to infer that the rivers known by the comparatively modern names of Halys and Araxes are those which, in the Book of Genesis, have the names of Pishon and Gihon; and that the country within the former is the land of Havilah, whilst that which borders upon the latter is the still more remarkable country of Gnsh" (*Exp. to Euphr. and Tigris*, i. 267).

Such, in brief, is a summary of the various conjectures which have been advanced, with equal degrees of confidence, by the writers who have attempted to solve the problem of Eden. The majority of them are characterised by one common defect. In the narrative of Genesis the river Pishon is defined as that which surrounds the whole land of Havilah. It is, then, absolutely necessary to fix the position of Havilah before proceeding to identify the Pishon with any particular river. But the process followed by most critics has been first to find the Pishon and then to look about for the land of Havilah. The same inverted method is characteristic of their whole manner of treating the problem. The position of the garden is assigned, the rivers are then identified, and lastly the countries mentioned in the description are so chosen as to coincide with the rest of the theory.

With such diversity of opinion as to the river which is intended to be represented by the Pishon, it was scarcely possible that writers on this subject should be unanimous in their selection of a country possessing the attributes of Havilah. In Gen. ii. 11, 12, it is described as the land where the best gold was found, and which was besides rich in the treasures of the *ôdolakh* and the stone *shoham*. A country of the same name is mentioned as forming one of the boundaries of Ishmael's descendants (Gen. xxv. 18), and the scene of Saul's war of extermination against the Amalekites (1 Sam. xv. 7). In these passages Havilah seems to denote the desert region south-east of Palestine. The word occurs also as the proper name of a son of Joktan, in close juxtaposition with Sheba and Ophir, also sons of Joktan and descendants of Shem (Gen. x. 29), who gave their names to the spice and gold countries of the south. Again, Havilah is enumerated among the Hamites as one of the sons of Gnsh; and in this enumeration his name stands in close connexion with Seba, Sheba, and

Dedan, the first founders of colonies in Ethiopia and Arabia which afterwards bore their names. If, therefore, the Havilah of Gen. ii. be identical with any one of these countries, we must look for it on the east or south of Arabia, and probably not far from the Persian Gulf. In other respects, too, this region answers to the conditions required. Bochart, indeed, thought the name survived in *Chaula*, which was situated on the east side of the Arabian Gulf, and which he identified with the abode of the Shemitic Joktanites; but if his etymology, in which he connects Havilah with the root *חלף*, "sand," be correct, the appellation of "the sandy" region would not necessarily be restricted to one locality. That the name is derived from some natural peculiarity is evident from the presence of the article. Whatever may be the true meaning of *ôdolakh*—be it carbuncle, bdellium, ebony, pepper, cloves, beryl, pearl, diamond, or emerald—all critics detect its presence, under one or other of these forms, in the country which they select as the Havilah most appropriate to their own theory. As little difficulty is presented by the *shoham*: call it onyx, sardonyx, emerald, sapphire, beryl, or sardius, it would be hard indeed if some of these precious stones could not be found in any conceivable locality to support even the most far-fetched and improbable conjecture. That Havilah is that part of India through which the Ganges flows, and, more generally, the eastern region of the earth; that it is to be found in Susiana (Hopkinson), in Ava (Buttmann), or in the Ural region (Raumer), are conclusions necessarily following upon the assumptions with regard to the Pishon. Hartmann, Reland, and Rosenmüller are in favour of Colchis, the scene of the legend of the Golden Fleece. The Phasis was said to flow over golden sands, and gold was carried down by the mountain-torrents (Strabo, ii. 2, § 19). The crystal (*ôdolakh*) of Scythia was renowned (Solinus, c. xx.), and the emeralds (*shoham*) of this country were far superior to other emeralds as the latter were to other precious stones (Plin. *H. N.* xxxvii. 17), all which proves, say they, that Havilah was Colchis. Rosenmüller argues, rather strangely, if the Phasis be the Pishon, the land of Havilah must be Colchis, supposing that by this country the Hebrews had the idea of a Pontic or Northern India. In like manner Leclerc, having previously determined that Pishon must be the Chrysorrhoas, finds Havilah not far from Coele-Syria. Hassé (*Entdeck.* pp. 49, 50, quoted by Rosenmüller) compares Havilah with the *Ῥαία* of Herodotus (iv. 9), in the neighbourhood of the Arimaspians, and the dragon which guarded the land of gold. For all these hypotheses there is no more support than the merest conjecture.

The second river of Paradise presents difficulties not less insurmountable than the Pishon. Those who maintained that the Pishon is the Ganges held also that the Gihon was the Nile. One objection to this theory has been already mentioned. Another, equally strong, is, that although in the Books of the Old Testament frequent allusion is made to this river, it nowhere appears to have been known to the Hebrews by the name Gihon. The idea seems to have originated with the LXX. rendering of *גִּיחֹן* by *Γήεν* in Jer. ii. 18; but it is clear from the

manner in which the translators have given the latter clause of the same passage that they had no conception of the true meaning. Among modern writers, Bertheau (quoted by Delitzsch, *Genesis*) and Kalisch (*Genesis*) have not hesitated to support this interpretation, in accordance with the principle they adopt, that the description of the garden of Eden is to be explained according to the most ancient notions of the earth's surface, without reference to the advances made in later times in geographical knowledge. If this hypothesis be adopted, it certainly explains some features of the narrative; but, so far from removing the difficulty, it introduces another equally great. It has yet to be proved that the opinions of the Hebrews on these points were as contradictory to the now well-known relations of land and water as the recorded impressions of other nations at a much later period. At present we have nothing but categorical assertion. Pausanias (ii. 5), indeed, records a legend that the Euphrates, after disappearing in a marsh, rises again beyond Ethiopia and flows through Egypt as the Nile. Arrian (*Exp. Alex.* vi. 1) relates that Alexander, on finding crocodiles in the Indus, and beans like those of Egypt on the banks of the Acesines, imagined that he had discovered the sources of the Nile; but he adds, what those who make use of this passage do not find it convenient to quote, that on receiving more accurate information Alexander abandoned his theory, and cancelled the letter he had written to his mother Olympias on the subject. It is but fair to say that there was at one time a theory afloat that the Nile rose in a mountain of Lower Mauretania (Plin. *H. N.* v. 10).

The etymology of Gihon (גִּיחוֹן, to burst forth) seems to indicate that it was a swiftly-flowing impetuous stream. According to Goliuz (*Lex. Arab.*) جِيحُون (*G'ahoon*) is the name given to the Orus, which has, on this account, been assumed by Rosenmüller, Hartmann, and Michaelis to be the Gihon of Scripture. But the Araxes, too, is called by the Persians *G'ahoon ar-Ras*, and from this circumstance it has been adopted by Reland, Calmet, and Sir G. Chesney as the modern representative of the Gihon. It is clear, therefore, that the question is not to be decided by etymology alone, as the name might be appropriately applied to many rivers. That the Gihon should be one of the channels by which the united stream of the Tigris and Euphrates falls into the Persian Gulf, was essential to the theory which places the garden of Eden on the Shatt-al-Arab. Bochart and Huet contended that it was the easternmost of these channels, while Calvin considered it to be the most westerly. Hopkinson and Junius, conceiving that Eden was to be found in the region of Auranitis (= *Audanitis*, *quasi Edenitis*) on the Euphrates, were compelled to make the Gihon coincide with the Naharsar, the Mares of Amm. Marc. (xxiii. 6, § 25). That it should be the Orontes (Leclerc), the Ganges (Buttmann and Ewald), the Kur or Cyrus, which rises from the side of the Saghanlon mountain, a few miles northward of the sources of the Araxes (Link), necessarily followed from the exigencies of the several theories. Rask and Verbrugge are in favour of the Gyndes of the ancients (Her. i. 189),

now called the Diyâlah, one of the tributaries of the Tigris. Abraham Peritso (Ugol. vol. vii.) was of opinion that the garden of Eden was situated in the region of the Mountains of the Moon. Identifying the Pison with the Nile, and the Gihon with a river which his editor (Hyde) explains to be the Niger, he avoids the difficulty which is presented by the fact that the Hiddekel and P'raht are rivers of Asia, by conceiving it possible that these rivers actually take their rise in the Mountains of the Moon, and run underground till they make their appearance in Assyria. Equally satisfactory is the explanation of Ephraem Syrus that the four rivers have their source in Paradise, which is situated in a very lofty place, but are swallowed up by the surrounding districts, and, after passing underneath the sea, come to light again in different quarters of the globe. It may be worth while remarking, by the way, that the opinions of this Father are frequently misunderstood in consequence of the very inadequate Latin translation with which his Syriac works are accompanied, and which often does not contain even an approximation to the true sense (for an example, see Kalisch, *Genesis*, p. 95).

From etymological considerations, Huet was induced to place Cnsh in Chusistan, Leclerc in Cassiotis in Syria, and Reland in the "regio Cos-saeorum." Bochart identified it with Susiana, Link with the country about the Caucasus, and Hartmann with Bactria or Bálkh, the site of Paradise being, in this case, in the celebrated vale of Kashmir. The term Cush is generally applied in the Old Testament to the countries south of the Israelites. It was the southern limit of Egypt (Ezek. xxix. 10), and apparently the most westerly of the provinces over which the rule of Ahasuerus extended, "from India, even unto Ethiopia" (Esth. i. 1, viii. 9). Egypt and Cush are associated in the majority of instances in which the word occurs (Ps. lxxviii. 31; Is. xviii. 1; Jer. xli. 9, &c.); but in two passages Cush stands in close juxtaposition with Elam (Is. xi. 11) and Persia (Ezek. xxxviii. 5). The Cushite king, Zerah, was utterly defeated by Asa at Mareshah, and pursued as far as Gerar, a town of the Philistines, on the southern border of Palestine, which was apparently under his sway (2 Ch. xiv. 9, &c.). In 2 Ch. xxi. 16, the Arabians are described as dwelling "beside the Cushites," and both are mentioned in connexion with the Philistines. The wife of Moses, who, we learn from Ex. ii., was the daughter of a Midianite chieftain, is in Num. xii. 1 denominated a Cushite. Further, Cush and Seba (Is. xliii. 3), Cush and the Sabaeans (Is. xlv. 14), are associated in a manner consonant with the genealogy of the descendants of Ham (Gen. x. 7), in which Seba is the son of Cush. From all these circumstances it is evident that under the denomination Cush were included both the country north of Arabia, including a portion of Cappadocia, and the country south of Egypt on the western coast of the Red Sea. It is possible, also, that the vast desert tracts west of Egypt were known to the Hebrews as the land of Cush, but of this we have no certain proof. The Targumist on Is. xi. 11, sharing the prevailing error of his time, translates Cush by India, but that a better knowledge of the relative positions of these countries was anciently possessed is clear from

Esth. i. 1. With all this evidence for the south-western situation of Cuah, on what grounds are Rosenmüller and others justified in applying the term to a more northern region on the banks of the Oxus? We are told that, in the Hindoo mythology, the gardens and metropolis of Indra are placed around the mountain Méru, the celestial north pole; that, among the Babylonians and Medo-Persians, the gods' mountain, Albordj, "the mount of the congregation," was believed to be "in the sides of the north" (Is. xiv. 13); that the oldest Greek traditions point northwards to the birthplace of gods and men; and that, for all these reasons, the Paradise of the Hebrews must be sought for in some far distant hyperborean region. Guided by such unerring indications, Hasse (*Entdeckungen*, pp. 41, 50, n.) scrupled not to gratify his national feeling by placing the garden of Eden on the coast of the Baltic; Rudbeck, a Swede, found it in Scandinavia, and the inhospitable Siberia has not been without its advocates (Morreo, Rosenmüller's *Geog.* i. 96). But, with all this predilection in favour of the north, the Greeks placed the gardens of the Hesperides in the extreme west, and there are strong indications in the Puráns "of a terrestrial Paradise, different from that of the general Hindu system, in the southern parts of Africa" (*As. Res.* iii. 300). Even Méru was no further north than the Himalayan range, which the Aryan race crossed in their migrations.

In the midst of so much diversity of opinion, it is very difficult to arrive at any conclusion. Among the most worthy of consideration, however, may be quoted the recent view expounded by Prof. Fried. Delitzsch. This scholar regards the word Eden as being borrowed from the Akkadian *edina*, "field," "land," "desert," which, he contends, was applied to a part of Babylonia as "the country" *par excellence*; and this contention of his receives some support from the fact that, in a geographical list from Babylonia, one of the cities known as Sipar or Sippara (identified with the Biblical Sepharvaim) is called Sipar Edina, "Sippara of Eden." He quotes the common name of Babylonia, Kar-Duniaš, "the garden" or "enclosure of the god Duniaš," which, he says, might also be read Gan-Duniaš* (cp. Gan-Eden, "the garden of Eden"), and contends that this is the garden of Eden of the Bible. He says moreover that the two names Havilah and Cush also speak in favour of Babylon being the land of the garden of Eden. With regard to the former, he identifies it with the tract immediately to the south and west of the Euphrates, and, in order to make things fit, identifies the Pishon with the Pallacopas (Bah. *Pallukatu*) canal, and quotes the fact that in Bit-Yakin, the neighbouring tract to the east, Merodach-baladan brought to the Assyrian king "gold, the dust of his land, in great quantity," also "stones, the produce of the sea." The *shoham*-stone he regards as the same as the Assyrian *sāmtu*, a grey or brown stone (chalcodony or cornelian). Cush he identifies with Meluhha, a tract of country to the south-east

of Babylon, and the Gihon is the canal known as the Shatt-an-Nil. In defence of this theory he contends that, as the word *nāru*, "river," in Assyrian means also "canal," then the Pishon and the Gihon might easily be artificial waterways, and he quotes Wetzstein in Franz Delitzsch's *Commentary on Genesis*, p. 535, who says that "the idea of watering lies at the bottom of the fourfold division of the river of Paradise: in a country poor in water, and therefore sterile, a river has no other meaning," and Fried. Delitzsch finds in this a welcome confirmation of his view of the Pishon and Gihon as irrigation canals.

Excellent as all this is in its way, it is far from being satisfactory, for the identification of the rivers Pishon and Gihon, as well as the lands of Cush and Havilah, cannot be regarded as based by any means on a firm foundation. All four rivers are spoken of in the same way, so that they should all be regarded as of the same nature. In connexion with the identification of the Gihon, it may be remarked that a portion of Cappadocia seems anciently to have borne the name of Cush, so that there is no need to seek in Egypt or in India the name of that country; or to force that name on any tract in the neighbourhood of the two rivers Tigris and Euphrates. With this the *G'azhō ar-Ras* would fall in very well; but the Pishon and Havilah still remain a crux. That the site of Paradise should be located by the Semites and other nations of the East in the cradle-land of their race, and of civilization, namely, Babylonia—a veritable garden in the time of its prosperity, and a land of romance to all who took interest in the affairs of the time—is, after all, one of the most natural things that could be expected. Moreover, it is to be noted that modern scholars locate in Southern Babylonia the city of Eridu or Enrūduga, "the good city," and apparently a type, with the Babylonians, of the Eridu, "the good city" or divine Paradise under the sea, which they seem to have believed existed, and which those more modern writers who have located the site of Paradise beneath the waters seem to have unconsciously imitated. This "good city" was situated within the abyss (*abzu*, "the abode of knowledge"), and, according to the Akkadian creation-story, was made or built "when within the sea there was a stream," and É-sagila ("the high-headed house") was founded by the god Lug-al-du-a-zaga ("the king of the glorious mound"). The abyss (*abzu*) was the abode of the god of wisdom, Éa or Oannes, and it had a channel (*nahbu*) and a gate (*dābu*). Its king was Éa, and Damkina or Dāuké was the queen. A special incantor of the abyss was supposed by the Babylonians to exist, and the incantation of Eridu, the good city therein, was regarded as the most precious and effective of all.

It must not be denied, however, that other methods of meeting the difficulty than those above mentioned have been proposed. Some ever ready to use the knife, have unhesitatingly pronounced the whole narrative to be a spurious interpolation of a later age (Granville Peck. *Min. and Mos. Geol.* p. 184). But, even admitting this, the words are not mere unmeaning jargon, and demand explanation. Ewald (*Gen.* i. 331, note) affirms, and we have only his word

* This rests partly upon a misreading of George Smith's; the form Kar-Duniaš is the only one justified by the inscriptions.

† See above, on the position of Havilah and the Pishon, pp. 847-8.

for it, that the tradition originated in the far East, and that in the course of its wanderings the original names of two of the rivers at least were changed to others with which the Hebrews were better acquainted. Hartmann regards it as a product of the Babylonian or Persian period. Luther, rejecting the forced interpretations on which the theories of his time were based, gave it as his opinion that the garden remained under the guardianship of angels till the time of the Deluge, and that its site was known to the descendants of Adam; but that by the Flood all traces of it were obliterated. On the supposition that this is correct, there is still a difficulty to be explained. The narrative is so worded as to convey the idea that the countries and rivers spoken of were still existing in the time of the historian. It has been suggested that the description of the garden of Eden is part of an inspired antediluvian document (Morren, Rosenmüller's *Geogr.* i. 92). The conjecture is beyond criticism; it is equally incapable of proof or disproof, and has not much probability to recommend it. The effects of the Flood in changing the face of countries, and altering the relations of land and water, are too little known at present to allow any inferences to be drawn from them. Meanwhile, as every expression of opinion results in a confession of ignorance, it will be more honest to acknowledge the difficulty than to rest satisfied with a fictitious solution.

The idea of a terrestrial Paradise, the abode of purity and happiness, has formed an element in the religious beliefs of all nations. The image of "Eden, the garden of God," retained its hold upon the minds of the poets and prophets of Israel as a thing of beauty whose joys had departed (Ezek. xviii. 13; Joel ii. 3), and before whose gates the cherubim still stood to guard it from the guilty. Arab legends tell of a garden in the East, on the summit of a mountain of jacinth, inaccessible to man: a garden of rich soil and equable temperature, well watered, and abounding with trees and flowers of rare colours and fragrance. In the centre of Jambudwīpa, the middle of the seven continents of the Purāṇas, is the golden mountain Méru, which stands like the seed-cup of the lotus of the earth. On its summit is the vast city of Brahmā, renowned in heaven, and encircled by the Ganges, which, issuing from the foot of Vishnu, washes the lunar orb, and, falling thither from the skies, is divided into four streams, that flow to the four corners of the earth. These rivers are the Bhadrā, or Oby of Siberia; the Sitā, or Hoangho, the great river of China; the Alakanandā, a main branch of the Ganges; and the Chakshu, or Oxus. In this abode of divinity is the Nandana, or grove of Indra; there too is the Jambu tree, from whose fruit are fed the waters of the Jambu river, which give life and immortality to all who drink thereof (*Vishnu Purāna*, trans. by Wilson, pp. 166-171). The enchanted gardens of the Chinese are placed in the midst of the summits of Hounanlun, a high chain of mountains further north than the Himalāya, and further east than Hindukush. The fountain of immortality which waters these gardens is divided into four streams, the fountains of the supreme spirit, Tychin. Among the Medo-

Persians the gods' mountain Albordj is the dwelling of Ormuzd and the good spirits, and is called "the navel of the waters." The Zend books mention a region called *Heden*, and the place of Zoroaster's birth is called *Hedenesh*, or, according to another passage, *Airjana Veedjo*. Cp. Dillmann³ and Delitzsch (1887) on Gen. i. c.

All these and similar traditions are but mere mocking echoes of the old Hebrew story, jarred and broken notes of the same strain; but, with all their exaggerations, "they intimate how in the background of man's visions lay a Paradise of holy joy,—a Paradise secured from every kind of profanation, and made inaccessible to the guilty; a Paradise full of objects that were calculated to delight the senses and to elevate the mind; a Paradise that granted to its tenant rich and rare immunities, and that fed with its perennial streams the tree of life and immortality" (Hardwick, *Christ and other Masters*, pt. ii. p. 133).

In addition to the numerous works already quoted, the reader who wishes to go still deeper into the question may consult Fried. Delitzsch's *Wo lag das Paradies?* (Leipzig, 1881), and Warren's *Paradise Found, the Cradle of the human Race at the North Pole* (Boston, U.S.A., 1886). [W. A. W.] [T. G. P.]

ED'EN. 1. (עֵדֶן; 'Eḏēn; *Eden*; omitted by LXX. in Is. xxxvii. 12 and Ezek. xxvii. 23), one of the marts which supplied luxurious Tyre with richly embroidered stuffs. It is associated with Haran, Sheba, and Asshur; and in Amos i. 5, Beth-Eden, or "the house of Eden," is rendered in the LXX. by Χαῖδαν. In 2 K. xix. 12 and Is. xxxvii. 12, "the sons of Eden" are mentioned with Gozan, Haran, and Rezeph, as victims of the Assyrian greed of conquest. Modern criticism identifies it with Bit-Adini on the banks of the Euphrates between Bālis and Bireg'ik (Schrader, *KAT.* p. 327).

2. BETH-EDEN (בֵּית עֵדֶן, "house of pleasure;" ἡδύς Χαῖδαν; *domus voluptatis*), probably the name of a country residence of the kings of Damascus (Amos i. 5). Grotius pointed to the *παρθεῖστος* of Ptolemy (v. 15) as the locality of Eden (see MV.¹¹). The ruins of the village of *Júsieh el-Kādīneh* are supposed by Dr. Robinson to mark the site of the ancient Paradisus, and his suggestion is approved by Mr. Porter (*Handb.* p. 577). [W. A. W.] [F.]

EDEN (עֵדֶן=*pleasantness*; LXX. has a different text, B. 'Eḏān, A. 'Eḏā; *Eden*). 1. A Gershonite Levite, son of Joah, in the days of Hezekiah (2 Ch. xxix. 12). He was one of the two representatives of his family who took part in the purification of the Temple.

2. EA. 'Oḏom. Also a Levite, contemporary and probably identical with the preceding, under Kore the son of Imnah (2 Ch. xxxi. 14, 15).

[W. A. W.] [F.]

ED'ER (עֵדֶר=*a flock*; B. omits; A. 'Eḏ-pal; *Eder*). 1. One of the towns of Judah in the extreme south, and on the borders of Edom (Josh. xv. 21). No certain trace of it has been discovered in modern times, unless, as has been suggested, it is identical with ARAD, by a transposition of letters. Conder suggests (*PEF.*

Mem. iii. 236) *Kh. el-'Adâr*, 5 miles S. of Gaza; and is followed by Tristram, *Bible Places*, p. 11.

2. 'Eḏēp; *Eder*. A Levite of the family of Merari, in the time of David (1 Ch. xxiii. 23, xxiv. 30). [G.] [W.]

E'DES (B. Ḥōḏs, A. Ḥōḏs; *Sedni*), 1 Esd. ix. 35; one of those who put away his "strange" wife. [JADAU.] [F.]

ED'NA (עֲדָנָה, i.e. עֲדָנָה = *pleasure*; *Anna*), the wife of Raguel (Tob. vii. 2, 8, 14, 16; viii. 12; x. 12; xi. 1). [B. F. W.]

EDOM, IDUMEA or IDUMAEA (עֲדוֹמָא) = *ruddy*. The R. V. correctly gives Edom (for Idumea, in Is. xxxiv. 5, 6, Ezek. xxxv. 15 and xxxvi. 5. In LXX. Εδωμ; in N. T. Ἰδουμαία, Mark iii. 8 only).

The mountain country, on the east side of the 'Arabah, or open valley between the Dead Sea and the Gulf of 'Akabah, is so called in the O. T. The term is usually equivalent to MOUNT SEIR (סֵעִיר), "the rough mountain." It is generally supposed that the name Edom, or "ruddy," is connected with the colour of the sandstone and volcanic rocks of which these mountains mainly consist, and which is remarkable in contrast with the white of the neighbouring chalk districts. The name Edom, however, is given to Esau (Gen. xxv. 30, xxxvi. 1 and 8), and the reason is stated (Gen. xxv. 30) in the words, "And Esau said to Jacob, Feed me, I pray thee, with the red (pottage), this red (pottage, R. V. marg.), for I am faint: therefore was his name called Edom." In a previous verse (v. 25) we read that Esau was red from his birth, and the word *Seir* ("rough" or "hairy") is also applied—with a different pointing—to Esau (סֵעִיר, Gen. xxvii. 11, 23; see Gesen. *Lex.*). Esau is also called "the father of Edom" (Gen. xxxvi. 9, 43), "in Mount Seir," and Josephus also connects Esau and Seir (*Ant.* i. 18, § 1).

The exact boundaries of Edom are only to be deduced from incidental notices, and from the special meaning of the Hebrew words describing the region. In the earliest notice of Mount Seir it appears to be adjacent to the "plain of Paran" (Gen. xiv. 6), "which is by the wilderness." It appears that this region was not in Canaan (Gen. xxxii. 3, xxxvi. 6), and in the latter passage the Peshitto reads, "Esau . . . went into the country of Seir." The 'Arabah itself was not in Edom, as appears from another passage (Deut. ii. 8), where it is noticed that Israel, being denied a way through Edom, "turned and passed" "through the way of the 'Arabah," in order to "compass the land of Edom" (Judg. xi. 18; see R. V.). Mount Hor, which Josephus places where it is still shown near Petra, was on the border of Edom (Num. xx. 23), or "in the edge of the land of Edom" (xxxiii. 37), and Kadesh-barnea was "a city in the uttermost of thy (the Edomites) border" (Num. xx. 16). Jewish and Christian traditions place this city at Rekem or Petra (Targum of Onkelos on Num. xxxiv. 4; Euseb. in *OS*, p. 269, 4, s. v., and Peshitto of same passage); but its locality is still matter of controversy. No passage in the O. T., however, connects Edom with any localities west of the 'Arabah. On the north it appears that the boundary between Edom and

Meab was the river Arnon (Judg. xi. 18), but the line seems to have varied at various historic periods (cp. Num. xxi. 13, 21). On the north-west Edom bordered on the tribe of Judah in the wilderness of Zin, near the Dead Sea and the ascent of Acrabbim (Josh. xv. 1, 21). It was here apparently that border contests occurred in the Valley of Salt (or "salt brook," 2 Sam. viii. 13, 14; 2 K. xiv. 7; 1 Ch. xviii. 12. The Peshitto brings these passages into accord by reading, Edomite עֲדוֹמִי for Syrian אֲרָמִי in the first—c. 13). The Valley of Salt was thus apparently the northern part of the 'Arabah (where 'Ain Melihy, "the salt spring," is still known), west of Petra. The distance from Horeb or Sinai "by way of Mount Seir" to Kadesh-barnea is given (Deut. i. 2) as eleven days' journey.

The various terms applied to this region agree with its mountainous character. The land of Seir is called the country of Edom (Gen. xxxii. 8, סֵעִיר, i.e. plain field or plateau), apparently with reference to the plateau above the rugged slopes on the east: the same term is also rendered "field" (A. V. Judg. v. 4): the "wilderness of Edom" is also mentioned (2 K. iii. 8; Josephus, *Ant.* ix. 3, § 1), and Mount Seir (Gen. xiv. 6, xxxvi. 8, 9; Deut. i. 2; Josh. xxiv. 4; Ezek. xxxv. 5) is constantly connected with Edom, and is called "the Mount of Esau" by Obadiah (vv. 1, 8, 9, 19, 21). The rugged character of the country is noticed in the latter prophet, and also by Jeremiah (xlix. 16), "O thou that dwellest in the clefts of the rock, that holdest the height of the hill."

At a later period the term Gabla, or Gebelene, meaning "mountainous," is applied to Edom,

and still survives in the name el-Jebāl (الجبال),

"the hills"), applying to the district round Petra. Eusebius and Jerome both identify Edom with Gebelene near Petra (see the passages quoted by Reland, *Pal. Illustr.*, p. 71).

The Jerusalem Targum reads, סֵעִיר דְּנַבְלָה, "Mount of Gabla," for Mount Seir: in Deut.

xxxiii. 2, the Samaritan Version also reads נַבְלָה for Seir. Josephus includes Gobolitis in Idumea (*Ant.* ii. 1, § 2, Γεβολίτις): in the *Onomasticon* this is rendered Γεβόληνη by Eusebius (*OS*, p. 266, 84). In another passage Josephus mentions Edomites and Gebalites (Γεβαλιτῶν, *Ant.* ix. 9, § 1). From a passage in Jeremiah (*Lam.* iv. 21) it appears that the land of Uz was in Edom (cp. Jer. xxv. 20); and Uz (עֻז) has been

compared with the name 'Aud (عوض), which

was that of a deity adored by the early Arab tribes of this region with So'air, whose name is radically the same as Seir. In Gen. xxxvi. 28 Uz is mentioned as an early inhabitant of Edom (cp. Gen. x. 23 and xxii. 21). Eusebius and Jerome mention this identification of Ausitis or Uz with Gebelene or Edom (see Reland, *Pal. Illustr.* p. 71), and many circumstances favour this view as to the country of Job (i. 1).

The names of towns in Edom mentioned in the Old Testament, so far as the sites are known, favour the restriction of the district to the region east of the 'Arabah. The situations of

Arith, Dinhabah, Dizahab, Masrekah, and Pau or Pai are unknown (see under those heads); but Selah ("the rock") or Joktheel is believed to be the later Petra (see 2 K. xiv. 7). Elath and Ezion-geber, the southern ports of Edom, were at the head of the Gulf of 'Akabah (see Dent. ii. 8), and are stated to have been "in the land of Edom" in Solomon's time (1 K. ix. 26). The old capital of Edom was Bozrah (Gen. xxxvi. 33; Is. xxiv. 6, lxiii. 1; Jer. xlix. 13, 22; Amos i. 11), and was found by Burckhardt at *Buseirah*, on the plateau of Mount Seir, 25 miles south of *Kerak*, in Moab. Punon appears to have been in the same region (Num. xxxiii. 42), and Tophel (Deut. i. 1) is the present *Tufileh*, N.E. of Petra. Teman, an important Edomite town (Gen. xxxvi. 34; Job iv. 1; Ezek. xxv. 13; Amos i. 12), which is sometimes mentioned in connexion with Bozrah, is not identified, though said by Jerome to have been 5 miles from Petra. The Maonites (Judg. x. 12) also appear to have dwelt at Maon (now *Mu'ân*) in Edom, if the usual reading be correct.

Several direct statements in the Old Testament also show that no part of the land of Edom fell within the limits of the land of Israel. Esau was to be left in possession of his own country, although in the days of David and of Solomon the Edomites were subjected for a time. In Deuteronomy we read, "for I will not give you of their land, no, not so much as a foot breadth; because I have given Mount Seir unto Esau for a possession" (Deut. ii. 5; cp. Josh. xxiv. 4). It appears clear, therefore, that the possessions of the tribe of Simeon, west of the 'Arabah, in the Tih plateau, were not in the country belonging to the Edomites. When, however, we turn to the later Greek and Roman periods, we find that the term Idumea has a much wider application than the ancient Edom; which is natural, since the power of the Edomite was at this time much increased. Josephus includes in Idumea not only Gebalene or Gobiolitis, but also Amalekitia, or the Amalekite country, which was in the Tih, west of the 'Arabah. Thus he states that the lot of Simeon was "that part of Idumea which bordered upon Egypt and Arabia" (*Antiq.* v. 1, § 22); and in another passage he states that Idumea was a large country including the Amalekite region (*Ant.* ii. 1, § 2).

This extended application of the term Idumea first meets us in the First Book of Maccabees. The border contests between Hebrews and Edomites, in the 2nd century B.C., occurred even in the hills north of Hebron. Bethsura (now *Beit Sûr*) was the Jewish outpost (1 Macc. iv. 15, 29, 61), and Hebron was an Idumean city (1 Macc. v. 65). Josephus gives us further information to the same effect, for it appears that not only Hebron, but Dora (*Dûra*) and Marissa (*Mer'ash*), were Idumean cities (*Antiq.* xii. 8, § 6; xiii. 9, § 1;—*Wars*, iv. 9, § 7), thus carrying the border to the line from Beit Jibrin to Beit Sûr, and including all the Hebron hills in Idumea. Jerome accepts this larger definition in connexion with Beit Jibrin (see ELEUTHEROPOLIS), and says that "all the southern region of the Edomites from Eleuthropolis as far as Petra and Elath" was the possession of Esau (see Reland, *Pal. Illustr.* p. 72). The geographer Ptolemy also, in the 2nd century A.D., enumerates five cities of Idumea, including

Elousa, or *Khalasah*, in the Tih district, west of the 'Arabah. Many classical writers speak of the Idumeans without distinguishing them from the Jews, which was not unnatural in an age when the Idumean dynasty was ruling in Jerusalem (*Virg. Georg.* iii. 12; *Juv. Sat.* viii. 160; *Stat. Sylv.* i. 6, v. 2; *Mart. ii. Epig.* 2, x. 50; *Val. Flac. Argonaut.* i. 12; see Reland, pp. 49 and 462). Thus with the rise of Edomite power, culminating in the accession of Herod the Great (see the next article), the old meaning of Edom, "the red land," was forgotten, and the whole country south of the Jerusalem hills, including the western as well as the eastern deserts, came to be included under the name Idumea, although no region west of the 'Arabah presents the ruddy sandstone mountains which rise to the east of that natural highway.

The topography of Edom is still very imperfectly known. Of the towns mentioned in the Old Testament, as we have seen above, only four out of about a dozen are identified; and we are little better off in treating of those which existed in the Roman and Byzantine ages, when the Arab trade from the port of Leuke Kome, at the mouth of the Gulf of 'Akabah, extended northwards to Damascus and westwards from Petra to Gaza and to Egypt (*Strabo*, xvi. 4, 24). Military stations existed along the great Roman road, still strewn with milestones, which ran along the plateau of Edom; and in Christian days the Metropolitan of Petra had under him bishops of the Edomite villages. Arindela, one of these bishoprics, is probably the present ruin *Ghurundel*, on the plateau north of Petra. *Dhâna*, a village visited by Burckhardt, on a declivity of the same plateau, is no doubt the Thana, or Thoana, of Ptolemy; and the spring of *Uddakah* is probably the Zadagatha of the Pentinger Tables, 18 Roman miles south of Petra, and the episcopal see of Zodoacatha in the 5th century A.D. (see Robinson, *Bib. Res.* ii. 117, 168). Bozrah had then its Metropolitan, but the greater part of the bishoprics have names not to be discovered, especially as the texts are much corrupted in the ecclesiastical lists. The Roman military stations, where native archers and foreign cohorts were quartered, included Elath and Arindela, and the old city of Teman, with Bozrah and Zodoacatha and other unknown places (see Reland, *Pal. Ill.*, p. 230). The Crusaders, who opened up again this trade route with the south, built the strong castle of Montreal at Shobek, north of Petra; and Renaud of Châtillon held the road from his great fortress of Kerak, east of the Dead Sea, to Elath, or 'Akabah, with stations at Tophel (*Tufileh*) and at *Mu'ân*, then called Ahament. Petra was then known by the name which it still bears, "the Valley of Moses" (*Wâdy Mûsa*), on account of the tradition which regarded the *Sik* or "gorge" leading to Petra as having been cloven by the rod of Moses, arising out of the identification of Petra, as above mentioned, with Kadesh-barnea.

With the decay of civilisation the settled places in Edom fell into ruins, and even the site of Petra was forgotten and supposed to be at Kerak, until the famous ruins were rediscovered in 1812 by Burckhardt. It would seem that in the 12th century there was some cultivation round Petra, the chroniclers describing extensive fig and olive gardens (Rey, *Colonies Françes*,

p. 397). At the present day there are only a few mud houses in one or two miserable hamlets, and over the rest of the region the nomadic Arabs hold sway. The northern district near Petra is known as *el-Jebāl*, and the southern mountains as *esh-Sherah*, a word which has no connexion with the Hebrew *Seir*. It is worthy of notice in passing that the village of *el-J*, close to Petra, probably preserves the Hebrew *N*'s (valley or brook), whence the name "Rekem of the brook," already noticed as given to Petra, was derived. Josephus gives this old name of Petra as still surviving in his day in the forms *Arecem* (*Ant.* iv. 7, § 1) and *Arce* (*Ant.* iv. 4, § 1). In the Commentary, *Siphre*, the same place is called רֶקֶם רְחוֹב, "Rekem of Hagrah."

The district of which the limits have thus been noted has an important history, noticed in the succeeding article. It remains to give an account of its physical features, which have been recently examined by Dr. Hull (*PEF. Mem.* 1886). It is in this region that the Nubian sandstone, which forms the base beds of the Lebanon and appears on the east of the Jordan Valley and of the Dead Sea, becomes the principal constituent of the mountain slopes. The mountains extend about 100 miles south of the Dead Sea, with a maximum width of 20 miles between the 'Arabah and the plateau of Mount Seir. The highest ridges approach to some 4000 feet above the Mediterranean level, so that when they are covered with snow they can be distinctly seen from Jerusalem (a fact which is noted by Josephus, *Wars*, v. 4, § 3). The 'Arabah itself falls northwards and southwards from a watershed 650 feet above the Mediterranean, south of Petra, to sea-level at 'Akabah, and to the Dead Sea-level (1292 feet lower) on the north. The old Red Sea shore line within historic times was perhaps further north than at present, for the mud flats extend 20 miles inland to 'Ain Ghudān, in which name Robinson recognises that of Ezion in Ezion-geber. Palms flourish on the east side of the valley at this point, as also at 'Akabah, near which Elath is supposed to have stood. The soil of the 'Arabah consists mainly of gravel in the higher part, giving place on the north to lacustrine marls like those of the Jordan Valley, and to the alluvial deposits of the Dead Sea shore.

The great fault in the strata, which forms the Jordan Valley, runs south, on the east side of the 'Arabah. Thus the foot hills of Edom, close to the 'Arabah, are of the same calcareous limestone which forms the Tih plateau, west of the valley. Beyond these the sandstone rises abruptly in rugged mountains, which the underlying granite and porphyry, veined with dykes of basalt and felsstone, and belonging to the system of the Sinaitic region, break through, and present crags which recall the Hebrew name *Seir*, or "rugged." Mount Hor, a double-peaked, isolated mountain formed by the upheaval of the sandstone, rises to about 3,000 feet above the Mediterranean, west of the Petra hollow, and on the east the strata rise in higher steps, capped by the chalky limestone, which forms the plateau of Edom and of Moab, stretching eastward into the desert. The Tih plateau rises only to about 1800 feet above the Mediterranean, so that the elevation of Mount Seir appears considerable, not only from the valley, but also

from the western desert, while the variegated hues of the sandstone and granite, contrasted with the white chalk, appear to give a natural explanation of the old name Edom, or "red."

The Edomite mountains are deficiently supplied with water. Springs occur at considerable intervals near the edge of the plateau, and along the course of the principal valleys, such as *Wādī Ghuweir*. The brook at Petra, and 'Ain Delāghah further south, spring close to the outcrop of the sandstone, beneath the porous limestone; and further south, where the mountains are granitic, the springs rise in the 'Arabah itself. The old road from 'Akabah, leading over the plateau to Petra, has ruined posts along it, which were supplied by cisterns;

Map of Edom.

and only one spring is known on this route, namely the 'Ain el-Udata, already mentioned as a Roman station.

The climate of this desert region is healthy, and a considerable population has always resided among the mountains. In winter there is snow on the plateau, but the presence of palms in the 'Arabah marks a region where severe frosts do not occur. In the Petra gorge, thickets of oleander exist, with wild figs and tamarisks among the rocks; and creeping vines hang from the cliffs. The mountains are barren and treeless, the principal desert shrub being the white broom called "juniper" in the English Version, but still preserving its Hebrew name as mentioned in Job (xx. 4). It is said by Tristram (*Nat. Hist. of Bible*, p. 359) to be specially frequent near Petra. The fauna and flora of the Book of Job

are indeed, generally speaking, those of the deserts of Moab and Edom. The waterless condition of the desert of Edom is also specially mentioned in the Old Testament, on the occasion when the kings of Judah, Israel, and Edom made a circuit of seven days' march, and attacked Moab, probably travelling along the old highway by which Israel had advanced (2 K. iii. 9).

The standard authorities on this region are Reland's *Palestina* (as quoted above), Burekhardt's *Travels in Syria*, Laborde's *Voyage*, Robinson's *Biblical Researches*, Irby and Mangles' *Travels*: to these may now be added Prof. Hull's *Mount Seir*, giving the latest scientific information, and his Memoir on the geology of the region already noticed. See also Dr. Clay Trumbull's *Kadesh Barnea*. [C. R. C.]

EDOMITES (עֲדוּמִי, Deut. xxiii. 8, and fem. pl. עֲדוּמִיּוֹת, 1 K. xi. 1; עֲדוּמִי, Deut. ii. 4: Ἰδουμαῖοι), the inhabitants of Edom. The aborigines were the "children of Seir" or Horites (Gen. xiv. 6; xxxvi. 20), who, according to the usual translation of the latter word (עֲדוּמִי, "cave man," from עָדוּר, "cave"), were dwellers in holes or caverns, like the Troglodytes whom Strabo mentions east of the Red Sea (xvi. 4, 17). The soft sandstone of Edom was easily burrowed, and Jerome (in *Obad.*) speaks of the Idumeans as in his time dwelling in caves, on account of the heat—a practice still usual throughout Syria among the poorest class of the population. At a very early period we find mention of an attack on these cave men by the Chaldeans and Elamites from the east (Gen. xiv. 6). The nationality of these early Edomites is not stated. They possessed some kind of organisation under chiefs

(דְּבִירִים, "leaders," Gesen. *Lex.*: "dukes" in A. V. and R. V. text, in R. V. marg. *chiefs*; also used of other leaders, Jer. xiii. 21, Zech. ix. 7, xii. 5, 6) whose names appear to be Semitic, and who were of the Bene Esau (Gen. xxxvi. 20): to one of these (v. 24) was due the discovery of hot springs (see R. V.) in the desert. The Horites were destroyed by the Bene Esau, who attacked them from the west (Deut. ii. 12; cp. Gen. xxii. 3 and xxxvi. 6, 8), and who were of mixed race, Hebrew and Canaanite, the wives of Esau being Hittites and Hivites (Gen. xxxvi. 2). It would seem that the Horites were Hivites, and allied to Esau by marriage, if we may judge from the names Zibeon and Anah (cp. vv. 2 and 20); while another of Esau's wives was a Nabathean (v. 4) or Ishmaelite—a people who also somewhat later became powerful in Edom.

The sons of Esau also had their "dukes" (Gen. xxxvi. 40–43), and the same chapter gives us the names of early kings of Edom (עֲדוּמִי) "before there reigned any king over the children of Israel" (v. 31): they appear to have been petty monarchs, like those encountered by the Assyrians, and came from different cities, if not of different families. Of these cities some (such as Bozrah and Teman) were in Edom; but Saul of "Rehoboth by the river" seems to have come from the town of that name on the Euphrates (cp. Gen. x. 12), and it is not stated whether these kings were sons of Esau or not (cp. 1 Ch. i. 43–54). At the period of the Exodus we find Edom governed by a king (Num. xx. 14; Judg.

xi. 17, 18), and in the time of David and Solomon there was a royal house (1 K. xi. 14) with a name (Hadad) for one prince which also belongs to a prince of the earlier period (Hadad, son of Bedad); after Edom was subdued by David, the king appears still to have ruled as an allied tributary (2 K. iii. 8, 12), and such monarchs claimed independence when possible (2 K. viii. 20).

Esau is called the "father of Edom" (Gen. xxxvi. 9 and 43), and in Deuteronomy the relationship to the Hebrews is insisted on (Deut. ii. 4–5): an Edomite was not to be abhorred like a Canaanite (Deut. xxiii. 7); yet in a later age great mutual hatred appears to have arisen, and wars were of constant occurrence between Hebrews and Edomites. The "dukes" of Edom are mentioned as unfriendly as early as the time of the Song of Moses (Ex. xv. 15); and the king of Edom refused a passage to Israel (Num. xx. 14–21), and armed to protect the road, thus forcing the Hebrews to make a long detour by Elath and the eastern deserts, before reaching the border-land of the Amorites.

Some light seems to be thrown on the early history of the Edomites by the early Egyptian records. It is thought by Chabas and by Brugsch that the country *Adma* or *Atuma*, near Egypt (); Chabas, *Voyage*,

p. 307), was Edom. It is mentioned as early as the Twelfth Dynasty (see *Records of the Past*, vi. pp. 135–150; and Brugsch, *Hist.* i. pp. 146, 216). The inhabitants are called Shasu—apparently a Semitic word for "nomads" (see Gesen. *Lex.* שָׁשׁוּ: "to stray"). The Shasu were found even in Northern Syria, but one of their tribes were the *Soar*, whose name Chabas compares with Seir (*Recherches*, p. 50: see Pierret, *Vocab.* p. 457). The Egyptians called the Shasu chiefs *Mahautu* (Chabas, *Voyage*, p. 146) or "leaders," equivalent to the Hebrew term rendered "dukes" in the English Version. The accounts which we have of the Shasu agree with the Biblical notices of Ishmael's lawless life, and of Esau's living by his sword; for they are represented in the time of Rameses II. as brigands seeking to waylay the Egyptian officials. Possibly, also, the "officer of the *Se-ir-ru-u*," which people appear to be mentioned on the Tell Amarna tablets (1430 B.C.) as being near "the entrance to the land of Egypt," may be connected with the dukes of Seir. The relations existing at that time between the kings of Mesopotamia and the Egyptians serve to illustrate the yet earlier incursions of the Chaldeans into Mount Seir—already noted—when the Jordan Valley towns were made tributary to the Chaldean king.

The establishment of a kingdom in Palestine was soon followed by conflicts with the Edomites. Saul attacked them (1 Sam. xiv. 47), and David subdued them (2 Sam. viii. 13) and "got him a name," when, after defeating them in the Valley of Salt (as explained in the preceding article), he put garrisons in Edom. The heading of Ps. lx. refers to this victory, and the words of Gen. xxvii. 40 agree with this subjection of the sons of Esau to the sons of Jacob. Hadad of the Edomite royal house fled, as we are told, while Joab was burying the dead (1 K. xi. 14), and became an adversary to Solomon, who continued

to hold Edom, and built his fleets at the Edomite port of Ezion-geber (1 K. ix. 26; 2 Ch. viii. 17). Some of his wives also were Edomite princesses (1 K. xi. 1).

With the decay of the power of the kings of Judah, troubles in Edom coincide. In the reign of Jehoshaphat (about 890 B.C.) a joint attack on Moab was made, from the south of Edom, by the allied kings of Judah, Israel, and Edom (2 K. iii.); but this appears to have failed, and was followed by the victories of Mesha, king of Moab, recorded on the Moabite Stone. In Chronicles (2 Ch. xx. 10-30) we read of a combined attack on Judah by Moabites, Ammonites, and "Mount Seir," not occurring in Edom, but north of Hebron, on the edge of the desert, at Bersabee (v. 27), now *Breikūl*, where Jehoshaphat was victorious. This apparently explains the abrupt ending of the account in the parallel passage (2 K. iii. 27): "And there came great wrath upon Israel" (see R. V.). King Joram not long after endeavoured to quell the revolt of Edom, passing over to Zair (Seir, according to Vulgate), but was surrounded and had to cut his way out at night (2 K. viii. 21, 22), "so Edom revolted from under the hand of Judah unto this day." At the close of the 9th century, however, Amaziah succeeded in re-asserting the power of Judah. He fought the Edomites as David had done in the Valley of Salt, and took Sela or Petra (2 K. xiv. 7; cp. Ps. lx. 8 and cxxxvii. 7).^{*} The Book of Chronicles adds that Amaziah killed the Edomites by throwing them from the "top of the rock" (*Sela*, 2 Ch. xxv. 12); and brought back with him the gods of the children of Seir (as the Babylonians also used to remove the idols from conquered cities), which he afterwards himself adored (v. 14). Josephus speaks of an Idumean god called Koze (*Ant.* xv. 7, § 9), from whom the name of the Idumean Costobarus was taken. In cuneiform records (as will be seen below), Kaus Malka and Kaus Gabri are Edomite names. At Cyrene, a Greek inscription has been found with the words ΚΟΣΒΑΡΑΚΟΣ ΜΑΛΙΧΟΥ ΙΔΟΥΜΑΙΟΣ, showing that this deity Κοζέ or Κορὲ was the chief Idumean god. The same name has been compared with that of a Nabathean god, 𐤓𐤁, and of a town in Edom, and the Arabs appear to have preserved this (as

قزح or قزى, calling the rainbow the "bow of Kozah" (Lenormant, *Lettres Assyriennes* ii. 119). We are thus not without information as to the Edomite gods (cp. Bähgen, *Beitr. z. Sem. Religionsgeschichte*, p. 10, &c.).

About the middle of the 8th century B.C. we find Uzziah still holding Elath in the extreme south of Edom, having "restored it to Judah" (2 K. xiv. 22), but this was the last of Jewish supremacy. Tiglath-pileser II., king of Assyria (2 K. xv. 29), about 743 B.C. records in his Annals that he made Kaus Malka king of Edom tributary, after having shut into his capital Rezon or Reziu, the Syrian king of Damascus; but on the retreat of the Assyrians Rezin recovered power, and took Elath from the king of Judah (2 K. xvi. 6): the Syrians (or Edomites,

according to the Hebrew margin and many MSS.—also the LXX. and Vulgate) then came to Elath and drove out the Jews "unto this day." Some ten years later Ahaz, who was a tributary of Assyria, appealed for help against Edomite incursions, in which captives (or daughters) were taken from Judah (2 Ch. xxviii. 17). With the close of the 8th century B.C. Sennacherib, besieging Hezekiah, was received by the various petty kings inimical to Judah as a master, and Airammū, king of Edom, is mentioned in his records as a tributary; while thirty years later Esarhaddon received tribute from Kaus Gabri of Edom (see Schrader, *KAT.* in locis). These Edomite names—Costobarus, Kosbaraka, Kaus Malka, and Kaus Gabri, all taken probably from the national deity—are possibly comparable with the Hebrew Kushiāh (כִּשְׁיָהּ), "the bow of Jehovah."

The cuneiform inscriptions serve to fill up a gap in the history of Edom during the reign of Manasseh. There was at this period a general upheaval of the Arabs, who, forced northwards probably by the pressure of population, about 650 B.C. attacked Assyria (though unsuccessfully) and overran Edom, Moab, and the Hsuran, advancing even to Hamath. This sudden success of the Arab king Vaita, whose line of advance was the same afterwards followed by Omar, was however soon checked. A parallel attack by Arabs and Babylonians and Elamites revolting from Assyria was repulsed by Assur-bani-pal in 648 B.C., and Vaita was driven back towards Edom. He sought refuge with the Nabathean king, Nathan, who appears to have given him up to the Assyrians. This Arab outbreak was put down with great cruelty by Assyria, but it marks the commencement of a northward movement of the inhabitants of the Nejed, which continued century by century—the base of attack on Palestine being always in Edom.

In the time of Nebuchadnezzar Edom, still ruled by a king (Jer. xxvii. 3), was attacked by the Chaldeans about 582 B.C., but the Nabathean power in this region appears to have become strong during the troubles which preceded the fall of Babylon; and the denunciations of the prophets show how unfriendly the Edomites were to Judah during all the later times of her kings (Is. xxxiv. 5-8, lxi. 1-4; Jer. xlix. 17; Lam. iv. 21; Ezek. xxv. 13, 14; Amos i. 11. 12: Obad. v. 10).

During the Greek period we have one notice of the history of Edom; for in 312 B.C. Antigonus, one of Alexander's successors, attacked the Nabatheans in Petra in two expeditions (Diodorus Siculus, xix. 94-98). These children of Nebaioth (Gen. xxv. 13; Is. lx. 7) extended their sway, according to Josephus, from the Red Sea to the Euphrates (*Ant.* i. 12, § 4), and were already beginning to trade. Their kingdom of Arabia Petraea had its centre at Petra, in Edom, and we have already seen that they were allied by birth to the Edomites. The names of their kings—such as Aretas and Obodas—were Semitic, the former being the Arabic *Hārīs* or *Hārīk*, a common name for Arab legendary heroes. The Hasmonean chiefs in Judea warred against Edom, but were apparently friendly with the Nabatheans in Moab and Gilead (1 Macc. v. 25; ix. 35). Judas Maccabeus defeated the Idumeans on the old battle-field by the ascent of Akrabān

^{*} The expression "over Edom will I cast my shoe" is illustrated by Egyptian sandals which have been found, with pictures of enemies bound together, and thus daily trodden under foot by the wearer.

(1 Macc. v. 3); but, as noticed in the last article, the Idumean power now extended to Bethsura, north of Hebron (1 Macc. iv. 29, 61). Hyrcanus took Dora and Marissa, and compelled the Idumeans to become circumcised about 130 B.C. (*Ant.* xiii. 9, § 1); so that, as Josephus says (and as classical writers appear also to have thought), "they were hereafter no other than Jews." In 93 B.C. Alexander Jannæus was defeated by Obodas, the Arab (*Ant.* xiii. 13, § 5; *Wars*, i. 4, § 4); and the Nabathean rulers, even in 166 B.C., seem to have ruled as far as Damascus (2 Macc. v. 8). The names Obodas and Aretas are found as those of Arab kings in Damascus and in Petra, in the 2nd and 1st centuries B.C. (*Ant.* xiii. 13, § 5, 15, §§ 1, 2; *xiv.* 1, § 4;—*Wars*, i. 4, §§ 4, 7, 8; i. 6, § 2; *Dio Cass.* xxxvii. 15). In 63 B.C. Scarrus was sent by Pompey against Petra: he was aided with supplies by the Idumean Antipater, and levied a fine on Aretas (*Ant.* xiv. 5, § 1): immediately after the death of Pompey, Costabarus the Idumean was made governor of Idumea and Gaza by Herod, being one of the old priestly family who adored Koze. He was, however, afterwards suspected and slain by the tyrant (*Ant.* xv. 7, § 9).

The astuteness of the Idumean Antipater, who took the side of the Romans, led to the extension of Idumean rule over the whole of Palestine, in the person of his son Herod the Great. Augustus, however, bestowed the kingdom of Edom on Aeneas or Aretas (*Ant.* xvi. § 9, 4; 10, § 9; xvii. 3, § 2). Antipater's father had ruled Idumea under Alexander Jannæus, and he himself was a prominent figure in Jewish politics, becoming Procurator under Julius Caesar. His daughter Salome was the wife of Costabarus, whom she divorced: to his grandson Archelaus, the Roman province, including Samaria, Judea, and Idumea, was given by Rome in confirmation of Herod's will. The Idumeans also played a part in the history of the great revolt, besieging Sabinus in Jerusalem (*Wars*, ii. 3, § 1), and forming a very important faction in the same city during the siege (*Wars*, iv. 1, § 5, and iv. 4, §§ 4, 5, &c.: cp. *Ant.* xiv. 1, § 3, 8, § 5; xv. 7, § 9; xvii. 11, § 4; *Wars*, i. 8, § 1).

Coin of the kings of Petra and of Nabathean queens exist, from the time of the Hasmoneans down to the days of Pompey and Herod, and as late as Trajan. About thirty types are known with the names Malchus, Aretas, Dabel, Gamalith and Sycamith (Levy, *ZDMG.* xiv. 363-480); and the Nabathean alphabet, which was of Aramean origin, is known from these, and from the later inscriptions of the Sinaitic desert (Taylor, *Hist. Alph.* i. 330). Coins of Petra also occur after the annexation of Idumea to Rome, which occurred in 105 A.D. in the time of Trajan, being effected by Cornelius Palma, then Governor of Syria (*Dio Cass.* lxxviii. 14). Eight of these coins have been described, three with the name of Hadrian, one of Marcus Aurelius and Verus, two of Septimius Severus, and two of Geta: they generally bear on the reverse the words 'Ἀδριανὴ Πέτρα Μητρόπολις' (see authorities in Robinson, *Bib. Res.* ii. p. 170). During this period the Nabatheans of Petra, mentioned by Pliny (*H. N.* vi. 28 and 32), were mingled with Romans and lived peacefully under the law (Strabo, xvi. 4, § 21). It is to this period that the celebrated Roman remains of Petra are

to be ascribed, together with many other important cities in Syria: Strabo calls Petra the Nabathean metropolis.

The Edomite or Nabathean population shared the trading prosperity of Syria under the Romans; Strabo speaks of the merchandise from the Gulf of Akabah which was carried to Petra and thence to Rhinocolura (*el-Arish*) for the west (xvi. 4, § 24). The military stations in Edom were held by levies from Asia, Europe, and Africa, the Alpine cohort being stationed on the Arnon, and the Galatians at Ghurndal, with Carthaginians at Bozrah (cp. Reland, *Pal.* pp. 230-232). Christianity penetrated into this region early, and Germanus was Bishop of Petra in 359 A.D. (Council of Seleucia) and Theodorus in 536 A.D. (Council of Jerusalem): cp. Le Quien, *Oriens Christ.* iii. 725; Rob. *Bib. Res.* ii. 170. The Christians of Elath paid tribute to Muhammad in 630 A.D., and those of Bozrah to Abu Bekr in 634 A.D. (Abu el Fedas's Annals quoted by Robinson, *Bib. Res.* ii. 162).

The Nabathean texts of Sinaitic Idumea belong to the Christian period (3rd and 4th cent. A.D.: Levy, *ZDMG.* xiv.), and are often marked with the cross; but these and earlier texts from the Haurân also show (as do Patristic accounts) that the Paganism of Arabia flourished side by side with Christianity among the Edomites; and indeed to the present day the Arabs of Edom and Moab remain almost pagan. Robinson remarks on their sacrifices (still offered) and on their marking camels with crosses from the blood of a kid, offered to secure the health of the Bedouin livestock. The chief Edomite deities of the Roman and Arab age were Dushera, whose name occurs in Nabathean texts, even as far north as Bashan and Sidon (דושרא),

ذو الشرى *Douráps*), and the goddess called

Khabou by Epiphanius (الكعبم): an annual festival of the two was held at Petra, and Suida (s. v. *Θεοδράψ*) says that Dushera was represented by a black stone 4 feet high and 2 feet broad. The Meccan goddess Khalasah

(الخلاصة on Sinaitic texts, חללה) appears,

according to Tuch (*ZDMG.* iii. p. 196), to have been adored at Elusa (now Khalasah) in Western Idumea. The festival of this goddess, which was celebrated by women with perambulations, and with orgies like those of the Moabite women, is mentioned by Jerome (*Vita Hilarion.* 25). In Justinian's reign a stone idol was also adored on Sinai (Antoninus, *Itin.* xxxviii.), at a time when the desert was full of anchorites and nuns (*ib.* xxxiv.). This barbarous idolatry—having erect stones for its objects—was prevalent at the same time all over Arabia, and has been elucidated by the inscriptions discovered east of Jordan (see De Vogüé, *Syrie Centrale, Textes Nabatéens*; and Lenormant, *Lettres Assyri.* ii. 88, 121, 151, 167, 244). Islam first reached Syria through Edom, following the line of the Nabathean advance; but the region is unnoticed in Moslem writings, and only again appears in history during the Crusades. Baldwin I. in 1100 A.D. marched from Hebron to the Valls Moysi or Petra (Will. of Tyre, xvi. 6, &c.), and fifteen years later he advanced through Moab and built the Castle of Montreal (in 1116 A.D.)

at Shobek, on the great southern road. In 1144 King Baldwin III. cut down the olive-trees at Petra, and in 1182 Rainaud of Chatillon, whose tief included all the Sinaitic peninsula, embarked at Aila on his adventurous expedition into Arabia. In 1188 Saladin took Montreal after reducing Kerak in Moab, and nothing more is heard of the history of Edom until the time of Burckhardt's journey in 1812 (see Rob. *Bib. Res.* ii. 164-5): by the Crusaders the region was called Arabia Prima, but the country was not so well known as in the Byzantine period. The first Crusaders considered Mount Hor near Petra to be Mount Sinai, and Ernoul, writing about 1231 A.D., seems to suggest the same. Nabathean inscriptions of the prosperous Roman period have been discovered at Petra and also at Bozrah, and a bilingual in Nabathean and Greek has been discovered at Sidon with the name of Dushera, as also on a stone in the Haurân. It appears to be from this Edomite script that the early Arabic characters of the time of Muhammad are derived. To this also belong the Sinaitic inscriptions which before the time of scientific study were attributed even to the days of Moses (see Taylor's *Hist. Alph.* i. 330).

The leading authorities are those quoted above, together with the list in the preceding article.

[C. R. C.]

ED'REI. 1. עֲדְרַי = *strong, mighty*: B. 'Eḏpdeiv, exc. Deut. iii. 1, 10, 'Eḏpdeiv; A. 'Eḏpdeiv, exc. Josh. xiii. 12, corrupt, and xiii. 31 'Eḏpdeiv: Edrai. One of the two cities, Ashtaroth being the other, in which Og king of Bashan resided (Deut. i. 4; Josh. xii. 4, xii. 12, 31), and at or near which he was defeated by the Israelites (Num. xxi. 33; Deut. iii. 1). In Deut. iii. 10, Edrei is mentioned with Salecah as a limit of Bashan; but in Josh. xiii. 11, the latter name only occurs. It was within the territory allotted to the half tribe of Manasseh (Num. xxxiii. 33), but is not mentioned in the later Books of the O. T. The town was apparently not far from Ashtaroth (Deut. i. 4); and on or near "the way to Bashan," probably the *Derb el Haj*, which the Israelites followed after defeating Sihon, king of the Amorites (Deut. iii. 1; Num. xxi. 33).

Eusebius says (*OS.* p. 253, 30, s. v. Edrai) that it was in his day called Adraa ('Aḏpad), and was an important town in Arabia, 24 miles from Bostra; and (*OS.* p. 213, 35, s. v. Ashtaroth) that it was 6 miles from Ashtaroth and 25 from Bostra. In the *Tab. Pent.* Adraha is placed on the Roman road from Gadara to Bostra, 16 miles from Capitolias, *Beit er-Rās*, and 24 from Bostra. It is alluded to by Euphrosinus (*adv. Haer.* i. 142, cxi. 874) and is placed by Ptolemy in the same latitude as Gadara. The names of Bishops of Adraa appear at the General Councils of Constantinople (381 A.D.) and Chalcedon (451 A.D.); and the place is mentioned as the seat of a bishopric under the Archbishop of Bostra in the 6th century (*Not. Ant. Pat.*). During the Roman period it was one of the chief towns of the Arabian province, and was apparently autonomous, coining its own money. The legends on the coins and the inscriptions found on the site are Greek, indicating that the population was in great part Hellenised, or that it was of Macedonian origin. In 1142

A.D. it was known as *Civitas Bernardi de Stampis*, and was attacked by Baldwin III. on his way to Bostra. The Crusaders suffered, on this occasion, from thirst; for when they attempted to draw water from the wells, the ropes attached to the buckets were cut by men concealed in the subterranean chambers (W. of Tyre, xvi. 10).

It is now *Dera'ah*, ادرعات, one of the largest towns in the *Haurân*, situated 6½ miles S.S.E. of *el-Mezirib*, the first station, on the *Derb el-Haj*, after leaving Damascus. The position agrees with that assigned to Adraa by Eusebius and the *Peutinger Table*. The extensive ruins, and the remarkable series of underground chambers beneath them, have been described by Wetzstein (*Reisebericht*, pp. 47, 48) and by Schumacher (*Across the Jordan*, pp. 121-147; see also Wright in *Leisure Hour*, 1874, pp. 523, 557). The subterranean town was probably excavated like those in Cappadocia, to receive the population in times of danger. Knobel and Keil (*Com. on Num.* xxi. 33-35; Deut. iii. 10) suppose that there were two Edreis, and identify the one mentioned in Deut. iii. 10 as the limit of

Bashan, with *Ezra'a*, or *Edhra'a*, اذرع, the ancient Zorava, on the W. border of the *Lejah*. This place is identified by Porter, on doubtful grounds, with Edrei, the royal city of Og (*Five Years in Damascus*, ii. 220). The supposition of two Edreis is, however, unnecessary (see Billmann² on Deut. iii. 10).

2. 'Eḏpdeiv; A. 'Eḏpdei. A place named only in Josh. xix. 37, as one of the towns allotted to Naphtali. It is mentioned between Kedesh and En-hazor, and has been identified doubtfully by Porter (*Hdbk.*) and Tristram (*Bible Places*) with *Tell Khureibek*; and by Conder (*PEF. Mem.* i. 203, 205, 260) with the village of *Fâter*. [W.]

EDUCATION. Although nothing is more carefully inculcated in the Law than the duty of parents to teach their children its precepts and principles (Ex. xii. 26, xiii. 8, 14; Deut. iv. 5, 9, 10, vi. 2, 7, 20, xi. 19, 21; Acts xxii. 3; 2 Tim. iii. 15; Hist. of Sus. 3; Joseph. c. Ap. ii. 16, 17, 25), yet there is little trace among the Hebrews in earlier times of education in any other subjects. The wisdom, therefore, and instruction, of which so much is said in the Book of Proverbs, is to be understood chiefly of moral and religious discipline, imparted, according to the direction of the Law, by the teaching and under the example of parents (Prov. i. 2, 8; ii. 2, 10; iv. 1, 7, 20; viii. 1; ix. 1, 10; xii. 1; xvi. 22; xvii. 24; xxxi.). Implicit exceptions to this statement may perhaps be found in the instances of Moses himself, who was brought up in all Egyptian learning (Acts vii. 22); of the writer of the Book of Job, who was evidently well versed in natural history and in the astronomy of the day (Job xxxviii. 31, xxxix. xl., xli.); of Daniel and his companions in captivity (Dan. i. 4, 17); and above all, in the intellectual gifts and acquirements of Solomon, which were even more renowned than his political greatness (1 K. iv. 29, 34, x. 1-9; 2 Ch. ix. 1-8), and the memory of which has, with much exaggeration, been widely preserved in Oriental tradition. The statement made above may, however, in all probability be taken as

representing the chief aim of ordinary Hebrew education, both at the time when the Law was best observed, and also when, after periods of national decline from the Mosaic standard, attempts were made by monarchs, as Jehoshaphat or Josiah, or by prophets, as Elijah or Isaiah, to enforce, or at least to inculcate, reform in the moral condition of the people on the basis of that standard (1 K. xix. 14; 2 K. xvii. 13, xxii. 8-20; 2 Ch. xvii. 7, 9; Is. i. et sq.).

In later times the prophecies, and comments on them as well on the earlier Scriptures, together with other subjects, were studied (Prol. to Eccles. and Eccles. xxxviii. 24, 26, xxxix. 1-11). St. Jerome adds that Jewish children were taught to say by heart the genealogies (Hieronym. on Titus iii. 9; Calmet, *Dict. s. v. Généalogie*). Parents were required to teach their children some trade, and he who failed to do so was said to be virtually teaching his child to steal (Mishn. *Kiddush*. ii. 2, vol. iii. 413, ed. Surenh.; Lightfoot, *Chron. Temp.* on Acts xviii. vol. ii. 79).

The sect of the Essenes, though themselves abjuring marriage, were anxious to undertake and careful in carrying out the education of children, but confined its subject-matter chiefly to morals and the Divine Law (Joseph. *B. J.* ii. 8, § 12; Philo, *Quod omnis probus liber*, vol. ii. 458, ed. Mangey; see *ESSENES*).

Previous to the Captivity, the chief depositories of learning were the schools or colleges, from which in most cases (see Amos vii. 14) proceeded that succession of public teachers who at various times endeavoured to reform the moral and religious conduct of both rulers and people. [SCHOOLS OF PROPHETS.] In these schools the Law was probably the chief subject of instruction; the study of languages was little followed by any Jews till after the Captivity, but from that time the number of Jews residing in foreign countries must have made the knowledge of foreign languages more common than before (see Acts ii. 5, 8; xxi. 37). From the time of the outbreak of the last war with the Romans, parents were forbidden to instruct their children in Greek literature (Mishn. *Sotah*, c. ix. 15, vol. iii. 307, 308, ed. Surenh.).

As well as in the prophetic schools instruction was given by the priests in the Temple and elsewhere, but their subjects were doubtless exclusively concerned with religion and worship (Lev. x. 11; 1 Ch. xxv. 7, 8; Ezek. xlv. 23, 24; Mal. ii. 7). Those sovereigns who exhibited any anxiety for the maintenance of the religious element in the Jewish polity, were conspicuous in enforcing the religious education of the people (2 K. xxiii. 2; 2 Ch. xvii. 7-9, xix. 5, 8, 11).

From the time of the settlement in Canaan there must have been among the Jews persons skilled in writing and in accounts. Perhaps the neighbourhood of the tribe of Zebulun to the commercial district of Phœnicia may have been the occasion of their reputation in this respect. The "writers" of that tribe are represented (Judg. v. 14) by the same word *כְּתֻבִּים*, used in that passage of the levying of an army or perhaps of a military officer (Ges. p. 966), as is

applied to Ezra, in reference to the Law (Ezra vii. 6); to Serniah, David's scribe or secretary (2 Sam. viii. 17); to Shebna, scribe to Hezekiah (2 K. xviii. 37); Shemaiah (1 Ch. xxiv. 6); Baruch, scribe to Jeremiah (Jer. xxxvi. 32), and others filling like offices at various times. The municipal officers of the kingdom, especially in the time of Solomon, must have required a staff of well-educated persons in their various departments under the recorder *כְּתֻבִּים*, or historiographer, whose business was to compile memorials of the reign (2 Sam. viii. 16, xx. 24; 2 K. xviii. 18; 2 Ch. xxxiv. 8). Learning, in the sense above mentioned, was at all times highly esteemed, and educated persons were treated with great respect, and, according to Rabbinical tradition, were called "sons of the noble," and allowed to take precedence of others at table (Lightfoot, *Chron. Temp.* on Acts xvii. vol. ii. 79 sq.; *Hor. Hebr.* Luke xiv. 8-24, ii. 540). The same authority deplors the degeneracy of later times in this respect (Mishn. *Sotah*, ix. 15, vol. iii. 308, ed. Surenh.).

To the schools of the Prophets succeeded, after the Captivity, the synagogues, which were either themselves used as schools or had places near them for that purpose (see on this subject generally Simon, *L'Éducation et l'Instruction des Enfants chez les anciens Juifs*, 1879). In most cities there was at least one, and in Jerusalem, according to some, 394; according to others, 460 (Calmet, *Dict. Eccles.*). It was from these schools and the doctrines of the various teachers presiding over them, of whom Gamaliel, Shammai, and Hillel were among the most famous, that many of those traditions and refinements proceeded by which the Law was in our Lord's time encumbered and obscured, and which may be considered as represented, though in a highly exaggerated degree, by the Talmud. After the destruction of Jerusalem, colleges inheriting and probably enlarging the traditions of their predecessors were maintained for a long time at Japhne in Galilee, at Lydda, at Tiberias, the most famous of all, and at Sepphoris. These schools in process of time were dispersed into other countries, and by degrees destroyed. According to the principles laid down in the Mishnah, boys at five years of age were to begin the Scriptures, at ten the Mishnah, at thirteen they became subject to the whole Law (see Luke ii. 46), at fifteen they entered the Gemara (Mishnah *Pirk. Ab.* iv. 20, v. 21, vol. iv. 460, 482, 486, ed. Surenh.). Teachers were treated with great respect, and both pupils and teachers were exhorted to respect each other. Physical science formed part of the course of instruction (*ib.* iii. 18). Unmarried men and women were not allowed to be teachers of boys (*Kiddush*. iv. 13, vol. iii. 383). In the schools the Rabbins sat on raised seats, and the scholars, according to their age, sat on benches below or on the ground (Lightfoot on Luke ii. 46; Philo, *ibid.* 12, ii. 458, Mangey). Teachers, however, at Antioch are called by Evagrius *χαμαῖδιδάσκαλοι* (Evagr. *H. E.* iv. 29).

Of female education we have little account in Scripture, but it is clear that the prophetic schools included within their scope the instruction of females, who were occasionally invested with authority similar to that of the Prophets themselves (Judg. iv. 4; 2 K. xxii. 14). Needle-

work formed a large but by no means the only subject of instruction imparted to females, whose position in society and in the household must by no means be considered as represented in modern Oriental, including Mohammedan, usage (see Prov. xxxi. 16, 26; Hist. of Sus. 3; Luke viii. 2, 3, x. 39; Acts xiii. 50; 2 Tim. i. 5).

Among modern Mohammedans, education, even of boys, is usually of a most elementary kind, and of females still more limited. In one respect it may be considered as the likeness or the caricature of the Jewish system, viz., that besides the most common rules of arithmetic, the Kurān is made the staple, if not the only, subject of instruction. In Oriental schools, both Jewish and Mohammedan, the lessons are written by each scholar with chalk on tablets which are cleaned for a fresh lesson. All recite their lessons together aloud; faults are usually punished by stripes on the feet. Female children are, among Mohammedans, seldom taught to read or write. A few chapters of the Kurān are learnt by heart, and in some schools they are taught embroidery and needle-work. In Persia there are many public schools and colleges, but the children of the wealthier parents are mostly taught at home. The Kurān forms the staple of instruction, being regarded as the model not only of doctrine but of style, and the text-book of all science. In the colleges, however, mathematics are taught to some extent (Jahn, *Arch. Bibl.* §§ 106, 166, Engl. tr.; Fabri, *Evagatorium*, i. 322; Shaw, *Travels*, p. 194; Rauwolf, *Travels*, c. vii. p. 60; Burckhardt, *Syria*, p. 326; *Travels in Arabia*, i. 275; Porter, *Damascus*, ii. 95; Lane, *Mod. Eg.*, i. 89, 93; *Englishes in Eg.*, ii. 168-171; Wellsted, *Arabia*, ii. 6, 395; Chardin, *Voyages*, iv. 224 [Langlès]; Olearius, *Travels*, pp. 214, 215; Pietro della Valle, *Viaggi*, ii. 188). [SCHOOLS OF PROPHETS.]

EGGS. [FOWLS.]

EG'LAH (עֵגְלָה = a heifer; *Egla*), one of David's wives during his reign in Hebron, and the mother of his son Ithream (2 Sam. iii. 5 [B. Αἰγλά, A. Αἰγός]; 1 Ch. iii. 3 [B. 'Αλά, A. 'Αγλά]). In both lists the same order is preserved, Egla being the sixth and last, and in both is she distinguished by the special title of David's "wife." According to the ancient Hebrew tradition (see Jerome, *Quaest. Heb.* on 2 Sam. iii. 5, vi. 23) she was Michal, the wife of his youth; and she died in giving birth to Ithream. A name of this signification is common amongst the Arabs at the present day. [G.] [F.]

EGLA'IM (עֵגְלַיִם = two ponds; 'Agalléim; Ν. Ἀγαλλίμ; *Gallim*), a place named only in Is. xv. 8, and there apparently as a point on the northern boundary of Moab, BEER-ELIM being on the southern boundary. It is perhaps the same as EN-EGLAIM. A town of this name was known to Eusebius (*OS.* p. 98, 10; p. 228, 61, Agallim), who places it 8 miles to the south of Areopolis, i.e. Ar-Moab (*Rabba*). Exactly in that position, however, stands *Kerek*, the ancient Kir Moab.

A town named Agalla is mentioned by Josephus as one of twelve cities—Medaba, Libyas,

Zoar, and Marissa being amongst the number—which were taken from the Arabians by Alexander Jannaeus (*Ant.* xiv. 1, § 4).

With other places on the east of the Dead Sea, Egla'im yet awaits further research for its identification. [G.] [W.]

EG'LOM (עֵגְלוֹן = *vitulinus*; 'Eglám; *Eg-lon*), a king of the Moabites (*Judg.* iii. 12 sq.), who, aided by the Ammonites and the Amalekites, crossed the Jordan and took "the city of palm-trees," or Jericho (*Joseph.*). Here he built himself a palace (*Joseph. Ant.* v. 4, § 1 sq.), and continued for eighteen years (*Judg.* and *Joseph.*) to oppress the children of Israel, who paid him tribute (*Joseph.*). Whether he resided at Jericho permanently, or only during the summer months (*Judg.* iii. 20; *Joseph.*), he seems to have formed a familiar intimacy (συγγενής, *Joseph.* not *Judg.*) with Ehud, a young Israelite (Ἰσραηλῆς, *Joseph.*), who lived in Jericho (*Joseph.* not *Judg.*), and who, by means of repeated presents, became a favourite courtier of the monarch. Josephus represents this intimacy as having been of long continuance; but in *Judges* we find no mention of intimacy, and only one occasion of a present being made, viz. that which immediately preceded the death of Egla. The circumstances attending this tragical event are somewhat differently given in *Judges* and in *Josephus*. That Ehud had the entrée of the palace is implied in *Judges* (iii. 19), but more distinctly stated in *Josephus*. In *Judges* the Israelites send a present by Ehud (iii. 15); in *Josephus* Ehud wins his favour by repeated presents of his own. In *Judges* we have two scenes, the offering of the present and the death scene, which are separated by the temporary withdrawal of Ehud (rr. 18, 19); in *Josephus* there is but one scene. The present is offered, the attendants are dismissed, and the king enters into friendly conversation (ἀμειβόμενος) with Ehud. In *Judges* the place seems to change from the reception-room into the "summer-parlour," where Ehud found him upon his return (cp. rr. 18, 20). In *Josephus* the entire action takes place in the summer-parlour (ἐκθεσίου). In *Judges* the king exposes himself to the dagger by rising apparently in respect for the Divine message which Ehud professed to communicate (*Patrick*, in loco): in *Josephus* it is a dream which Ehud pretends to reveal, and the king, in delighted anticipation, springs up from his throne. The obesity of Egla, and the consequent impossibility of recovering the dagger, are not mentioned by *Josephus* (vid. *Judg.* ii. 17, *fat, δασύειος*, LXX.; but "crassus," Valg., and so *Gesen. Lex.*).

After this desperate achievement Ehud repaired to Seirah (R. V.; not Seirath, as in A. V.) in the mountains of Ephraim (iii. 26, 27), or Mount Ephraim (*Josh.* xix. 50). To this wild central region, commanding, as it did, the plains E. and W., he summoned the Israelites by sound of horn (a national custom, according to *Joseph.* A. V. and R. V. "a trumpet"). Descending from the hills, they fell upon the Moabites dismayed and demoralised by the death of their king (*Joseph.*, not *Judg.*). The greater numbers were killed at once, but 10,000 men made for the Jordan with the view of crossing over into their own country. The Israelites, however,

had already seized the *fords*, and not one of the unhappy fugitives escaped. As a reward for his conduct Ehud was appointed Judge (Joseph., not Judg.).

Note.—The sentence "the quarries that were by Gilgal" (iii. 19) is better rendered in the margin, as in Deut. vii. 25, "graven images"

(cp. Gesen. a. v. מִצְרַיִם). [T. E. B.] [F.]

EG'LON (עֵגְלוֹן: in Josh. x. BA. Ὀδολλάμ; in Josh. xii. 12, B. Αἰλάμ, A. Ἐγλάμ, F. Ἐγλῶν; in Josh. xv. 39, B. omits, A. Ἐγλάμ: *Eylon, Aglon*), a town of Judah in the *Shefelah* or low country (Josh. xv. 39). During the struggles of the conquest, Eylon was one of a confederacy of five towns, which under Jerusalem resisted, by attacking Gibeon after the treaty of the latter with Israel. Eylon was then Amorite, and the name of its king Debir (Josh. x. 3-5). The story of the overthrow of this combination is too well known to need notice here (x. 23-25, &c.). Eylon was soon after visited by Joshua and destroyed (x. 34, 35; xii. 12). The name survives in the modern 'Ajlān, a low mound covered with scattered heaps of stones, about 10 miles W.S.W. of *Beit Jibrin* (Eleutheropolis), and 15 from Gaza, on the south of the great maritime plain (Porter, *Handb.*; Van de Velde, ii. 188; Rob. ii. 49; *PEF. Mem.* iii. 261, 278; Guérin, *Judée*, ii. 297, 298). Eusebius mentions (*OS.* p. 103, 21; p. 234, 91) a village called Bethagla on this site, but does not identify it with Eylon. Mr. Petrie (*PEFQy. Stat.* 1890, pp. 161-3) identifies Eylon with *Tell Nejfeh*, which, from the character of the remains, must have been an older site than 'Ajlān. He supposes that the Jews who returned after the Captivity, not being strong enough to dispossess the occupiers, built a new Eylon, at 'Ajlān, within sight of the old one.

In the *Onomasticon* (*OS.* p. 118, 21) it is given as *Eylon quao et Odollam*; and its situation is stated as 10 miles east of Eleutheropolis. The identification with Adullam arose no doubt from the reading of the LXX. in Josh. x. given above; and it is to the site of that place, and not of Eylon, that the remarks of Eusebius and Jerome refer (cp. *ADOLLAM*). [G.] [W.]

EGYPT (מִצְרַיִם, מִצְרָיִם, gent. מִצְרַיִם; Αἴγυπτος; *Aegyptus*), a country occupying the north-eastern angle of Africa, and lying between N. lat. 31° 37' and 24° 1', and E. long. 27° 13' and 34° 12'.

1. *Boundaries.*—Its limits appear to have been always very nearly the same. Under the Pharaohs, the most southern province was the district of Elephantine, called the "beginning of the southern country," which means Upper Egypt. Ezekiel, speaking of the country in all its extent (xxix. 10, xxx. 6), gives as its limits, according to the obviously correct translation, Migdol and Syene. Migdol (Magdolon) is mentioned by the Itinerary of Antoninus; it was situate at 12 miles' distance from Pelusium, and being on the road to the land of the Philistines, was one of the first places reached by travellers coming from Syria or Palestine. At the other end, Syene or Elephantine corresponds nearly with the tropic of

Cancer, and Strabo says that going southwards it is the first place where the sun may be seen shining at the bottom of wells.

The ancients have attributed Egypt sometimes to Asia, sometimes to Africa. Several authors considered the Nile as dividing what we should call the two continents. Strabo observes that the most sensible opinion is that which considers the Arabian Gulf as separating Asia from Africa. With the ancient geographers, Egypt included no more than the tract irrigated by the Nile, within the limits we have specified. The deserts on each side were not considered as being part of it. It was Libya on one side, and Arabia on the other, both of which have been at times subject to Egypt, but only exceptionally; they generally were independent.

2. *Names and Divisions.*—The common name of Egypt in the Bible is "Mizraim," or more fully the "land of Mizraim." This word is a dual of which the singular appears to be "Mazor" (מִצְרַיִם). There has been much discussion about the sense and the origin of the name Mizraim, which Prof. Ebers considers as signifying the "double fortified enclosure," because the Shemites coming from Asia found on the border the walls constructed by the Pharaohs in order to defend themselves against the invasions of Asiatic nomads. Gesenius translates by "limit;" Dillmann, by "district" (*Gebiet*). No satisfactory explanation has yet been given of this name. Undoubtedly it is a Semitic word, the meaning of which is not to be looked for in Egyptian, and which must have been the translation of one of the usual names of Egypt, perhaps of one of the ideographic groups by which Egypt was designated. As long as the true sense of the Semitic word has not been established, it is difficult to find the hieroglyphic group to which it corresponds. It is important to observe that while the sense of the dual "Mizraim" is absolutely certain, it is not the case with the singular "Mazor," which can hardly be considered as meaning Egypt.* What has led to this interpretation is the fact that in three cases (*Is.* xix. 6, xxxvii. 25; 2 K. xix. 24) it is connected with מִצְרַיִם, which commonly means rivers of Egypt, the Nile, or its canals. In none of those passages have the LXX., followed by the Coptic Version, translated מִצְרַיִם by Egypt; but we find these expressions: מִצְרַיִם מִצְרַיִם, 2 K. xix. 24; ποταμὸν συνοχῆς, *aquae clausae* (Vulg.); *Is.* xix. 6, xxxvii. 25, συναγωγῇ ὕδατος, *river aggerum*; just as Mic. vii. 11, מִצְרַיִם מִצְרַיִם, *ἑλκεῖς ὀχυρά, citaites munitae*, i.e. surrounded by walls: and this leads us to consider the dual Mizraim as meaning neither a district or limited space, nor a fortified enclosure, but as the Vulgate translates in the passage above quoted, *aquae clausae*, water enclosed in dykes or walls, basins or canals. Thus Mizraim would be quite analogous to the name of *Kebui* or *Kebuih*, which means the two basins, and which is common in Ptolemaic times. Besides, in the hieroglyphical inscriptions the Nile has often a dual form; we hear of a Nile of Upper Egypt and a Nile of Lower Egypt, as if

* Gesenius, *Lex.*; Bochart, *Geogr.* c. 258; A. V., *MY.* 11, and R. V. adopt "Egypt."

they were two separate rivers. The dual Mizraim might refer either to the two Niles, or to the two chief branches of the Delta, which were best known to the Israelites. It seems natural that the Shemites should have given to Egypt a name derived from her hydrographic description, which must have struck them at first sight, and which gave to the country its peculiar character.

Another name which is often met with in Scripture is that of "laud of Ham," **חֹמְרֵי**, which refers to Ham, the son of Noah. It is generally considered that the word **חֹמְרֵי**, "the proud," "the insolent," is a poetical appellation of Egypt. It is to be remarked, however, that in all the passages where this sense has been attributed to the word Rahab, the LXX. and the Coptic Version invariably take it as a common name, except in Pa. lxxvii. 4, where both versions read **Ῥαββ**, **Ραββ**, which does not necessarily apply to Egypt.

The usual name of Egypt in the hieroglyphic texts is *Kem*, demotic *Kemi*; it is written by a sign which represents the tail of a crocodile. As a common name, *Kem* means "black," and the name of the land is derived from the colour of the arable soil (cp. Plut. *de Is. et Osir.* c. 33: *ἐν τὴν Αἴγυπτον ἐν τοῖς μέλλιστα μελάγγειον οὖσαν, ὡς περ τὸ μέλαν τοῦ ὀφθαλμοῦ, Χρῆμα καλοῦσι*); while the surrounding deserts, the pink and yellow colour of which makes such a strong contrast with the valley of the Nile, are called *Tesher*, "the red," just as the ideographic sign representing an undulated country is painted red. The Coptic forms of this name are **KHME** (T.), **KHEI** (B.), **ΧΜΕ**, **ΧΜΕΙ** (M.), which signify as well the black colour as the land of Egypt; and it is impossible not to notice the likeness which exists between this word and the name of Ham, **ΧΜ**, who is the ancestor of the Egyptians and of the neighbouring nations.

As for the name of *Αἴγυπτος*, which has been adopted by the Greeks, and which originally in Homer means "the river," it seems to be the transcription of the word *Ageb* or *Akeb*, which is a common name of the Nile.

As high as we may go up in the Egyptian documents, we find the land divided into two portions, or two regions; the south, which is always named first, and the north. A great number of ideographic groups indicate this division. Egypt is called to us, "the two lands," the "land of the two crowns," the white one being the emblem of the South, and the red of the North: both combined form the *pschent* or the *schent*, which is the head-dress of the king reigning over the whole land. Other names signify "the land of the lotus and of the papyrus," "the land of the asp and of the vulture," "the portion of Horus and that of Set," "the two stalks," "the two basins," &c. The usual emblems of royalty are the reed for the South, and the wasp for the North; both together read *suten nit*, and indicate that the king ruled over the country in all its extent. This is what Josephus and the bilingual stone of Rosetta translate by βασιλεὺς τῶν τε ἐνὸς καὶ τῶν κἀτω χωρῶν.

The Romans divided Upper Egypt into two, the

Heptanomis and the Thebais; however, the old division survived. There are no traces of the change in the hieroglyphical inscriptions dating from the time of the emperors, who, like the Pharaohs, were called lords of the two lands, or of the two regions.

3. *Superficies*.—The superficies of the land watered by the Nile was, in the year 1798, 9,582 square miles (including the bed of the Nile and the islands within it, together representing 294,217 acres). Since, the irrigated area has increased, and the superficies of the land below Assouan may be reckoned as 11,351 square miles, equal to 7,264,640 acres, of which 4,625,000 are cultivated (McCoan, *Egypt* as it is, p. 19). Mr. Lane calculated from Abdallatif that the extent of the cultivated land in the year 1375 A.D. was 5,500 square geographical miles. If we compare the present extent of arable soil with what it was in ancient times, it is evident that it has greatly diminished. On the western side the artificial Lake Moeris caused a considerable area to be watered between the Fayoum and Mariout. Linant Bey has calculated that if it were restored to its original size, it would recover to agriculture about 800,000 acres, a great part of which was cultivated under the Pharaohs. In the north, all the space which is now covered by Lake Menzaleh (40 miles long and 18 miles wide), and by salt marshes around it, not only was not under water, as we find there ruins of large cities, but constituted what Scripture compares to the garden of the Lord (Gen. xiii. 10). In the east, the Wādî Tumilat was the land of Goshen, renowned for its good pastures, one of the most productive parts of the country, which is now a barren desert.

4. *Nomes*.—From a very remote period we find Egypt divided into administrative districts, which the Greeks called *νόμοι*, nomes, and which lasted even under the Romans. We have several lists of these provinces in the temples of Egypt: some of them are of the 18th and 19th dynasties, but most of them belong to the Ptolemaic period. The number of the nomes has varied. Under Seti I. it was 37. In later times, under the Ptolemies, some of them were divided, and thus the number was increased. Strabo mentions 36, Pliny 43, Ptolemy 47. The hieroglyphical lists vary between 42 and 44, while there are coins of 46.

A nome was called in Egyptian *hesep* or *tesep*. It had four particular elements: (1) the capital, which was the residence of the governor, but which was chiefly the abode of the divinity special to the province; (2) a cultivated territory; (3) a certain amount of marshes which were very likely pasture-land; (4) a canal or canals, the care of which was very important for the prosperity of the land. As in Egypt everything was based on religion, we find that each nome had a god or several gods, under whose protection it was specially placed, a college of priests and priestesses, a high priest and a high priestess who had both a particular name, sacred boats, sacred trees, and special festivals. Besides, each nome was considered as having as a relic a part of the body of Osiris. The lists of nomes which are engraved on the walls of the temples give us all these details at great length, while they are silent as to the political administration of the nome.

The division seems to have originated from religion, and from local worship, to which the inhabitants remained very much attached, even in the time of the decline of Egypt. The same animal was sacred in one nome, and profane in the next; and we hear under the Romans of a war between the Tentyrites and the Ombites on account of the crocodile. Under the emperors Domitian, Trajan, Hadrian, and Antoninus Pius, each nome had an intermittent coinage of its own.

5. *General Appearance, Climate, &c.* — The general appearance of the country cannot have greatly changed since the days of Moses. The Delta was always a vast level plain, although of old more perfectly watered than now by the branches of the Nile and numerous canals, while the narrow valley of Upper Egypt must have

suffered still less alterations. Anciently, however, the rushes must have been abundant, whereas now they have almost disappeared, except in the lakes. The whole country is remarkable for its extreme fertility, which especially strikes the beholder when the rich green of the fields is contrasted with the utterly bare yellow mountains, or the sand-strewn rocky desert on either side. Thus the plain of Jordan, before the cities were destroyed, was, we read in the passage already referred to, "well watered everywhere," . . . "like the garden of the Lord, like the land of Egypt as thou goest unto Zoar"^b (Gen. xiii. 10). This passage refers to the part of Egypt which was watered by the Pelusiac branch, and which was first reached coming through "the way of the land of the Philistines." In Deuteronomy also

Map of Lower Egypt and Sinai.

(xi. 10, 11), contrasting the land of Canaan with Egypt, Egypt is described as a country where artificial irrigation is necessary, and which does not depend on rain for cultivation. The climate is equable and healthy. Rain is not unfrequent on the northern coast; in Upper Egypt it is very rare; it has occurred more frequently in later years. There is hardly a traveller who has not seen one or two showers in Upper Egypt, though Herodotus describes (iii. 10) a shower, which took place under the reign of Psammenitus, as an event worth mentioning. The Egyptians considered it as a great advantage for their country not to have to rely on rain, as was the case with the Greeks (Herod. ii. 14). "Some day," they said, "the Greeks will be disappointed of their grand hope, and they will be wretchedly hungry." This remark is still often made by the lower classes of Egypt.

However, whenever the Nile did not rise sufficiently high, famine ensued, and it was one of the common calamities of the country. Dr. Brugsch quotes an inscription which may be contemporary with the end of the Hyksos dynasty, in which an officer called Baba says that "when there was a famine which lasted several years, he delivered corn to his city." Another instance is found in the inscription of Canopus. It is said that, when it happened, in the reign of king Ptolemy Euergetes, that a low Nile brought great misery on the land, the king took care that corn should be brought from Syria, Phoenicia, and Cyprus. It was therefore just the converse of what happened in Jacob's time.

Egypt has been visited in all ages by severe pestilences, but it cannot be determined that

^b Or Zoan, according to the Syrian Version.

any of those of ancient times were of the character of the modern plague. The medical papyri, and chiefly the so-called Papyrus Ebers, mention a great number of diseases which have not yet been all identified. Several of those maladies were no doubt peculiar to Egypt, and are still prevalent in the country, such as ophthalmia, dysentery, and diseases of the skin. It is in these medical texts of the old Egyptians that we shall very likely find the explanation of the "evil diseases of Egypt," with which the Israelites are threatened several times (Deut. vii. 15; xxviii. 27, 35, 60).

6. *Geology*.—The fertile plain of the Delta and the valley of Upper Egypt are bounded by rocky deserts, covered or strewn with sand. On either side of the plain they are low, but they overlook the valley, above which they rise so steeply as from the river to present the aspect of cliffs. The formation is limestone, as far as a little above Thebes, where sandstone begins. The First Cataract, the southern limit of Egypt, is caused by granite and other primitive rocks, which rise through the sandstone and obstruct the river's bed. In Upper Egypt, the mountains near the Nile rarely exceed 300 feet in height, but far in the Eastern desert they often attain a much greater elevation. The highest is Gebel Ghârib, which rises about 6,000 feet above the sea. The highest summit of the mountains of Thebes on the western side of the Nile is about 1,000 feet high.

The geological formation of the country has certainly had a great influence on its civilisation, and particularly on the development of art. Unlike the Chaldean, who, in the vast plains of Lower Mesopotamia, had nothing but bricks to build with, the Egyptian found in his own country the very best materials for construction and for sculpture; besides, the difficulties of transport were minimised by the fact of his being able to reach every important city of the country by water. These very favourable circumstances explain how, already at a very remote epoch, stone architecture had been carried so far. For the bulk of the constructions nothing could be better than the limestone of Toura, which may be polished like marble, and which was used for the coating of the Pyramids. At Thebes, the most delicate hieroglyphics could be carved in the walls of the galleries which were cut in the mountain. The sandstone of Gebel Silsileh, where the immense quarries are still to be seen, belongs to the most durable of the kind. Besides, there were all the more valuable stones, like the syenite of which the obelisks were made, diorite, breccia, serpentine, and alabaster, which were chiefly used for statues, and the porphyry of Gebel Dukhân, near the Red Sea.

Great geological changes have taken place at different epochs. The most important must have been the change in the bed of the river, which took place between the 13th and the 18th dynasty. There was a harrier at Gebel Silsileh which formerly was the entrance of the Nile into Egypt, and through which the Nile broke, —we do not know exactly when. The proof of this important fact consists in the discovery which Lepsius made at Semneh of a series of inscriptions of the 12th and 13th dynasties, recording the height of the rising of the Nile,

and which show that at that time the Nile rose on the average 24 feet higher than it did at the time of the 19th dynasty. Whether the change was sudden or not, we cannot say; but the result was, that while it deprived Lower Nubia of the benefit of the inundation, it must have increased considerably the surface of irrigated soil in Egypt proper.

Another change, which must have been very slow, is the retreat of the Red Sea or Arabian Gulf, which even in Roman times extended a great deal more north than it does now, and which by degrees reached its present boundaries, as we may see described in Isaiah: "The Lord shall utterly destroy the tongue of the Egyptian sea" (xi. 15); "the waters shall fail from the sea" (xix. 5). There has been a raising of the soil which caused the old canal of the Pharaohs to be dried up, so that the Wady Tumilat, which used to be the land of Goshen covered with pastures, became a barren desert until the present canal was dug. In this region there are constant changes in the appearance of the surface because of the great facilities with which mounds and banks are formed through obstacles which stop the sand blown by the wind (Léon, *Mémoires sur les princip. travaux d'utilité publ.* pp. 104, 105). Farther north, on the contrary, the soil has sunk considerably: several of the north-eastern nomes are now either under water or covered with salt marshes, difficult to cross, and amidst which are the cities which were on the military road going from Egypt to Syria.

Outside of the narrow winding valley of Upper Egypt was the oasis of the Fayoom, the two Arsinoite nomes. This very fertile land was already in the Libyan desert, and connected with the valley of the Nile through a breach in the mountains. It was watered chiefly by Lake Moeris, a work of the 12th dynasty.

7. *The Nile*.—The Nile has several names in Scripture. [NILE.] It is usually called נַיִל, נַיִל, and besides נַיִל מִצְרַיִם, נַיִל מִצְרַיִם. In Egyptian there are a great number of names for the river. The most usual is *Hâpi*, the same word as the name of the bull Apis, a coincidence which is not at all surprising, as even in Greek mythology the fertilising power of water is represented by a bull, and several rivers—such as the Achelous, the Eurotas, and the Asopos—were considered as having this form. As Egypt was divided into two regions, we have also two Niles: *Hâpi res* or *Hâpi kema*, the Southern Nile, which was considered as issuing from two caves (*Kati*) near Elephantine, and *Hâpi mehit*, which was thought to originate at Babylon, near Heliopolis, and from thence to form the Delta.

The river, the watering element, the canals which are derived from it, are generally named *atur*, *aur*; dem. *ial*, *iar*; Copt. *top*, *topw*, *lepo*, *eiop*, *eiop*, *eiop*, which is evidently the origin of the Hebrew נַיִל. It must not be taken as being a proper name; it must be considered as meaning the river, the canal, the water, very much like the *نهر* of the Arabs.

Though we do not admit the theory of Herodotus (ii. 5, 10) as to the origin of Egypt, we agree with him as to the land being a gift of the river; for Egypt depends entirely on the

inundation, which begins about the summer solstice. The water rises generally during one hundred days, the greatest height being attained somewhat after the autumnal equinox. The inundation lasts about three months, but in fact the level of the Nile is always changing. The water falls during the winter and the spring months until it begins again to rise. It is constantly going up and down. An allusion is made to the inundation in the Prophet Amos, who, speaking of the ruin of Israel, says that the land shall be "drowned as by the flood of Egypt" (viii. 8, ix. 5).

In former times the Nile divided itself into seven branches, the most important of which were the outer ones,—the Canopic on the west, and the Pelusiatic on the east. At present, there are only two: the Rosetta and the Damietta branches. The Suez Canal has dried up the eastern part of Lake Menzaleh and the end of the Pelusiatic branch. The Tanitic branch may still be recognised in the canal called Muezz.

The Nile was of course considered as a god and an object of worship. Several hymns are addressed to him, in which he is generally called the father of the gods. One of his sacred names is *Nun*, the celestial water or the celestial ocean. He is praised for all the benefits which he confers on the country, especially through the inundation.

Researches disagree as to the rate at which the Nile deposits the alluvial soil of Egypt. The opinion which seems to prevail is that it amounts at most to five inches in a century.

8. *Cultivation, Agriculture, &c.*—The richness of Egypt has always been in agriculture. The most ancient monuments indicate that it was on the produce of the soil much more than on trade that a population lived which certainly was more numerous than now, judging from the number of ruined cities and the extent of several of them.

We have still very interesting representations of Egyptian agriculture at the most remote epochs; they may be seen in the sculptures of the tombs of the Old Empire, contemporaneous with the builders of the Pyramids. In those pictures we find the image of what the deceased considered as a life endowed with all the enjoyments of riches and prosperity. In this respect it makes no difference whether those pictures relate what his past life has been, or whether according to Mariette's opinion it is the ideal existence which he is supposed to lead in the other world; in any case, we have there a description of the customs and civilisation of the land.

Wealth was derived chiefly from agriculture; gold, silver, precious stones are rather foreign

imports: in later times they constitute the tributes which are paid by conquered nations. A rich man owns a great number of estates, each of which has its particular name; they are generally due to the generosity of the king, they are rewards for long and faithful service, or some deed of valor.

Husbandry was very nearly the same as it is now; it was regulated by the inundation of the Nile. As soon as the river began to fall the grain was sown on the moist fields, on which sheep and oxen were driven instead of harrowing it. When the soil was getting drier, a hoe or a plough with a wooden share was sufficient in order to break up the alluvial deposit in which there is no stone. Artificial irrigation completed the effect of the inundation. The canals were numerous and better taken care of than now. In order to fill them, the cultivators used an elementary means, still seen all along the Nile—the *shádoo*, which is a pole having a weight at one end and a bucket at the other,

Shádoo, or pole and bucket, for watering the garden. (Wilkinson.)

so hung that the labourer is aided by the weight in raising the full bucket. There are detailed

Granary, showing how the grain was put in, and that the doors *a* & *b* were intended for taking it out. (Wilkinson.)

pictures in the tombs of breking up the earth, of ploughing, sowing, harvest, threshing, and storing the wheat in granaries. [See cuts under AGRICULTURE, pp. 63, 64, 65.] The threshing
3 K

was simply treading out by oxen or cows unmuzzled (cp. Deut. xxv. 4). The granaries were often vaulted, and the corn thrown in through an opening at the top; scribes are seen keeping accounts of the corn which has been

gathered. The corn is generally common wheat, or the doorah which is still cultivated.

The Egyptians seem to have cultivated the vine much more than at present. The vines are of a picturesque appearance; they are raised

Vineyard. (Wilkinson.)

on high poles like the Italian *pergole*. The wine was pressed in different ways. Small quantities of grapes were put in a bag, which was twisted so as to squeeze out the juice. For large quantities the foot-press was used; it re-

quires several men to work together (Is. lxiii. 2). There were several qualities of Egyptian wines which were celebrated; one of them is called *the morning star in the sky*: they came from Lower Egypt or from the oasis in the Libyan desert. For the sacred offerings they used what they called wine from Asia, which came from Syria and from Mesopotamia. The olive-tree and the date-palm were also objects of cultivation. The Egyptians seem to have had a great quantity of live stock on their estates,—oxen, sheep, goats, and asses; they had domesticated antelopes, which were very numerous; besides, they had a great number of birds, geese, pigeons, and several kinds of cranes, but not the common fowl. A deceased at Sakkarah boasts that he owned 15,360 oxen of different descriptions. Another, a contemporary of the building of the Second Pyramid, says he had 974 sheep, 2,235 goats, 838 oxen, and 760 asses. Another says he had more than a hundred thousand ducks. We cannot believe that all these numbers are real; yet they give us an idea of what the riches of the land may have been.

Winepress. (Wilkinson.) [For another large Winepress, see *Dict. of the Bible*, III., p. 1774.]

quired several men to work together (Is. lxiii. 2). There were several qualities of Egyptian wines which were celebrated; one of them is called *the morning star in the sky*: they came from Lower Egypt or from the oasis in the Libyan desert. For the sacred offerings they used what they called wine from Asia, which came from Syria and from Mesopotamia. The olive-tree and the date-palm were also objects of cultivation. The Egyptians seem to have had a great quantity of live stock on their estates,—oxen, sheep, goats, and asses; they had domesticated antelopes, which were very numerous; besides, they had a great number of birds, geese, pigeons, and several kinds of cranes, but not the common fowl. A deceased at Sakkarah boasts that he owned 15,360 oxen of different descriptions. Another, a contemporary of the building of the Second Pyramid, says he had 974 sheep, 2,235 goats, 838 oxen, and 760 asses. Another says he had more than a hundred thousand ducks. We cannot believe that all these numbers are real; yet they give us an idea of what the riches of the land may have been.

It is difficult to know what the laws of the tenure of land were under the old Pharaohs, and whether there was a private property in land. On this point we have to resort for information chiefly to the documents of the Ptolemaic epoch and to the numerous deeds of various kinds which have been preserved. If we consider the style of most of those deeds, some of which are written in demotic and others in Greek, we see that the Ptolemies had innovated very little, and that, as regards civil laws as well as in relation to the worship of

the country, they had adhered in most cases to the old tradition. Under the Ptolemies, land could be sold freely, under certain regulations and subject to the tax of excise; it could be inherited and divided between the members of the family. The Greek authors, Diodorus and Strabo, speak of the land of Egypt being divided into three parts, of which one-third belonged to the priests, or rather to the caste of the priests, the income of which was devoted to the expenses of the temples and to keep up the priests and their servants. Another third belonged to the king, who out of it kept up his court, his army, and rewarded his officers. The last third belonged to the soldiers, who being provided for could devote themselves entirely to their military life. This description of the Greeks excludes the idea of private property in land, and of small landowners; but it agrees only partially with the documents. It is likely that the greatest part of the land was possessed by the king, who made grants to the temples and to some of his officers. Probably the small landowners must have been few, and the great bulk of the agricultural population were tenants.

who hired for a small rent the land of the king, of the priests, and of the soldiers. One circumstance seems to indicate that individual property existed to a greater extent at the time of the Pharaohs than under the Greek kings. This is what is related of Joseph (Gen. xlvii. 20-26). It is said that he gained for Pharaoh all the land except that of the priests in exchange for food, and required for the right thus obtained a fifth of the produce, which became a law. This act seems to be in accordance with the policy of the king under whose rule Joseph was raised to his high position. In suppressing thus all landed property except that of the priests, he had the whole people in his power; while being a stranger, of a different race than the Egyptians, he would not alienate the priests, a class which in many cases proved more powerful than the king. Whether the state of things which prevailed under the Ptolemies is a consequence of what Joseph did, we cannot say. It is not likely that what he did outlived the war which caused the Hyksos to be expelled and the reaction which ensued. But the idea of the absolute right of the king over the land is so common in Eastern monarchies, even at present,

that it is quite natural that we should find something of the kind in Egypt.

Besides agriculture, one of the important incomes of Egypt was derived from the fisheries. The Greek authors speak of the great amount of salt fish which was eaten in Egypt. Lake Moeris was one of the places which was most productive, as well as the northern part of the Delta. Fishing, like hunting, was one of the sports of the upper classes, and there were officers specially entrusted with the supervision of the lakes preserved for the kings. There were evidently many more canals and lakes than at present, and great care was taken of them as well as of the dykes. The rising of the Nile was registered in the nilometers, and great festivals took place at the beginning of the inundation.

An art which is intimately connected with agriculture, and which the Egyptians carried very far, is land surveying. The invention of it was attributed to the god Thoth; it was more necessary in Egypt than anywhere else, as constantly the Nile carries away the landmarks, and there is great difficulty in recognising the limits of different properties.

Making a papyrus boat. (Wilkinson.)

9. *Botany*.—The cultivable land of Egypt consists almost wholly of fields, in which are few trees. There are no forests and few groves, except of date-palms, and in some parts of Lower Egypt a few of orange and lemon trees. The two kinds of palms are represented on the monuments; they seem to have been as common as they are now. The date-palm was cultivated not only for its fruit, but also as an ornament in the gardens; its fibres were used as thread. The dóm-palm—which, according to an inscription, sometimes reached the height of sixty cubits—was employed for the masts which adorned the pylons of the temples. The sycamores and several kinds of acacia were also very much grown. One of them, the *Acacia nilotica*, was a most useful tree. With its wood were made doors, boxes, coffins, boats, and statues; it gave also a kind of oil, which was one of the sacred offerings, and from which some medicine was also prepared. We find in the inscriptions a great number of names of trees which have not been identified.

The fruits of Egypt were considered as very good, as well as the vegetables; and the Israelites in the desert looked back to the time when they enjoyed the luxuries of the Egyptian soil: "We remember the fish, which we did eat in Egypt freely; the cucumbers, and the melons,

and the leeks and the onions, and the garlick" (Num. xi. 5). The numerous pictures in the tombs give us an idea of the variety of fruits and vegetables: grapes, figs, dates, pomegranates, water-melons, onions, cucumbers, lentils, all those things are found in abundance, as well as different kinds of corn—wheat, which was the most common, and also oats, barley, millet, and doorah. In the account of the plague of hail (Ex. ix. 32), mention is made of a field product called *ḥḥḥḥ*, "spelt," which is rendered there *δλυστα* (*far*, Vulg.); Ezek. iv. 9, *miliūm*, Vulg.; in Is. xxviii. 25, *śā*, *miliūm*. It is doubtful whether it is a cereal or a leguminous product; but if it is a cereal, it is likely that it must be millet or even doorah, as spelt is not cultivated in such a hot climate as Egypt.

The reeds were very common along the canals and the river, and the most famous of them was the papyrus (*Cyperus papyrus*). There were several kinds of reeds which have different names in Egyptian. One of them is called *kem*, *keman*, *KOλλῖ*; in Heb. *נֶחְמֶה*. Reeds, and among them the papyrus, were employed for making boxes, baskets, and also very light boats, which were used for hunting the hippopotamus in the marshes. Baskets of reeds are still made

in Nubia and on the Upper Nile, and sold in great quantities in Egypt. The *פפירוס*, the ark or skiff of reeds, in which the mother of Moses put her child (Ex. ii. 3), must have been something of the kind. Isaiah (xviii. 2) also tells us of *פפירוס*, vessels of reeds, which were sent to Ethiopia. The papyrus or hybla was particularly cultivated in Lower Egypt; the paper was made with the inner part of the stalk, which was cut in thin slices after the rind had been removed. The use of the papyrus seems to have been contemporary with the origin of the civilisation; the papyrus roll is a common sign in all the inscriptions. The plant which was the object of such a flourishing industry has now entirely disappeared from the soil of Egypt, and is found only on the Upper Nile.

The Egyptians bestowed great care on their gardens, in which we see trees, vegetables, and a great many plants which were purely ornamental; some of them came from abroad. There are always ponds in the gardens, and they were favourite places of resort during the heat. [For a drawing of an Egyptian garden, see GARDEN.] Both sexes seem to have had a particular taste for flowers; they made great use of wreaths and garlands, and certain priests were especially entrusted with the flowers of the temples.

Much valuable information has been brought to us concerning the flora of Egypt, by the offerings which have been found in the tombs, and quite lately by the wreaths which adorned the mummies of kings and princesses discovered in the hiding-place of Deir-el-Bahri. The tombs of the 11th dynasty contained wheat, oats, barley, flax, doorah, olives, beans, millet. The flax is the *Linum humile*, the same which is now cultivated. None of those seeds has ever grown, whatever care has been applied in sowing them. The wreaths of the kings who reach from the 18th to the 21st dynasty are made in the most artistic way; they are chaplets, made of several kinds of flowers sewn in folded leaves. The outward cover is generally made with the leaves of a tree now common in Abyssinia, but which is not found in Egypt, the *Mimusops Schimperii*, the so-called *persea*; it must have been cultivated for its red berries, which are now the food of the inhabitants of the land of Bongo. Among the flowers some of the most handsome are the *Centaurea depressa* and the *Delphinium orientale*, which do not belong to the flora of Egypt at present. Before the time of the Ptolemies, the Egyptians had only two lotus flowers, the white and the blue lotus; the pink one, *Nelumbium spinosum*, is not found with the royal mummies. The blue was a favorite flower in festivals, for its fine hue and its good smell. One of the most curious results of the discovery of Deir-el-Bahri is to show that at that early time there was already a trade in plants with the Greek islands. There was a basket full of a kind of lichen, *Parnelia furfuracea*, which does not grow in Egypt, and which is common in all the bazaars, where it comes from Greece. This lichen is called *cheba*, and is used as leaven for making Arab bread. It is also very much employed as medicine in diseases of the chest. Another product which has very likely the same origin, and came either from Syria or from

Greece, are the berries of the juniper. In the garlands of Amenophis I., the flowers of the *carthamus* had preserved their beautiful red colour.

10. *Zoology*.—Of old, Egypt was a far more pastoral country than at present. Cattle were very abundant, and the Egyptians seem even to have succeeded in domesticating animals which are no longer such. They had several kinds of oxen—we see even in one instance the zebu, which very likely must have been imported; goats and sheep were numerous, and chiefly antelopes of various descriptions, of which they ate the flesh, and which were sacrificed with the oxen. As early as the 4th dynasty we find the swine, but it is rarely represented in the tombs, very likely on account of its being a Typhonic animal. In general we cannot argue, because an animal has not been found represented in the tombs, that it did not exist in the country. There may have been some religious idea which prevented its being sculptured or painted in a funeral picture. For instance, we never find the camel, although it is several times mentioned in the papyri of the 19th dynasty. It is spoken of as an animal that came from Ethiopia, that was of a very submissive character and easy to be trained; a teacher even gives this animal as an example to a lazy disciple, a fact which shows that it must have been familiar to him. The neighbouring nations of Arabia and Syria had a great number of camels, and it would be strange if the Egyptians should not have known this animal and made use of it. Abraham coming to Egypt had camels, and the Ishmaelites who took Joseph with them had their merchandise carried on these animals.

The horse is not found in the pictures of the earlier dynasties, while we find large flocks of asses. It is likely that the horse was brought to Egypt by Syrian or Mesopotamian invaders, such as the Hyksos. The horse seems to have particularly thrived in Egypt: the Pharaohs had a great number of them, and the best part of their army was formed of chariots. They had studs which were under the supervision of high officers, and which they seem to have valued very much, as we see in the inscription of Piankhi that it is one of the first things the conqueror looks after. The result was that Egypt, which at the beginning was dependent on Syria for her horses, became on the contrary the market-place of her eastern neighbours. Thus it is commanded respecting a king of Israel: "He shall not multiply horses to himself, nor cause the people to return to Egypt, to the end that he should multiply horses" (Deut. xvii. 16), which shows that the breed of the royal studs was in high repute. "Solomon had horses brought out of Egypt, and linen yarn: the king's merchants received the linen yarn at a price. And a chariot came up and went out of Egypt for six hundred shekels of silver, and a horse for a hundred and fifty: and so for all the kings of the Hittites, and for the kings of Syria, did they bring them out by their means" (1 K. x. 28, 29). The number of horses kept by Solomon for chariots and cavalry was large (1 K. iv. 26, x. 26; 2 Ch. i. 14, ix. 25). Some of them came as yearly tributes from his vassals. Such was the case also for

the kings of the Hittites mentioned above, and who appear often in the Egyptian inscriptions. The Kheta (Hittites) were among the fiercest enemies of the Pharaohs of the 19th dynasty: their principal arm was a force of chariots resembling those of the Egyptians. Among the tributes brought by the Rotennu (Syrians) to the kings of the 18th dynasty we see white horses. The horse was also used for ploughing.

Dogs were more prized formerly than they are now, for they are held by the Muslim to be unclean animals. We can trace on the monuments several kinds of dogs of various breeds and colours: hounds for hunting the gazelle; the modern spitz; the mastiff, which was used in the chase of the lion; besides the common watchdog, which is now seen everywhere in Egypt. [Dog.]

The deserts have always abounded in wild animals, especially the hyænas, which could be domesticated, several kinds of jackals and foxes, and antelopes. The lion was found much further north than now. The cat was one of the sacred animals, particularly venerated at Bubastis. Like the Indian princes of the present day, the kings and the very wealthy men liked to have strange animals; we see that Negroes brought from Ethiopia giraffes, a kind of leopard which was used for hunting, besides elephants. From the land of Punt came a kind of cynocephalus, which the inscriptions call *kafu*, the *דִּקְפִּי* of Solomon (1 K. x. 22; 2 Ch. ix. 21).

The pictures of the tembs very often show the deceased hunting the hippopotamus, which is found in the marshes. It was chased with spears and nooses by men standing on small boats made of reeds. According to the sculptures in the tombs, at a very remote epoch the hippopotamus was frequent in Lower Egypt. Tradition said that the first king, Mena, had been carried off by one of these animals. But if we consider that we see the chase of the hippopotamus only in funereal pictures, and that the same word applies in Egyptian to the wild boar, we may reasonably suppose that it is a merely conventional representation. In the text of the myth of Horus we find that the sacrifice of a pig commemorated the victory of the god over Typhon, who had taken the form of a hippopotamus. There may be something of the kind in the funereal pictures. In the other world the deceased chases the huge Typhonic animal; while in real life he amused himself in chasing the wild boar, which must have been still more abundant than it is now, in the marshes of the Fayoom. The description of Herodotus (ii. 71) would apply much better to the boar than to the hippopotamus. On the contrary, in the Book of Job, the poetical description of the behemoth must be understood as meaning the hippopotamus. [БЕНОМОТ.] The elephant is always represented as a strange animal; however, it gave its name to the city of Elephantine.* Among the small animals, which were very numerous in the country, we may mention the hare, the porcupine, the ich-

neumon (which was a sacred animal), the rat, and about fifteen varieties of bats.

Birds abounded as they do still now; among them, the hawk, the vulture, the ibis, the plover were sacred, as being emblems of civilities. The poultry consisted of several kinds of geese, ducks, pigeons, as well as herons and cranes. The ordinary fowl does not appear in the sculptures, although the hieroglyphic sign for the letter *u* represents a chicken. The chase of water-fowl was a very common sport.

Among the reptiles, the crocodile must be especially mentioned. In the Bible it is usually called *דִּרְבָּן*, "dragon," a generic word of almost as wide a signification as "reptile," and it is used as a symbol of the king of Egypt. Thus in Ezekiel: "Behold, I am against thee, Pharaoh king of Egypt, the great dragon that lieth in the midst of his rivers, which hath said, My river is mine own, and I have made it for myself. But I will put hooks in thy jaws, and I will cause the fish of thy rivers to stick unto thy scales, and I will bring thee up out of the midst of thy rivers, and all the fish of thy rivers shall stick unto thy scales. And I will have thee thrown into the wilderness, thee and all the fish of thy rivers . . . I have given thee for meat to the beasts of the field and to the fowls of the heaven" (xxix. 3-5). Here seems to be a retrospect of the Exodus, which is described with a closer resemblance in Pa. lxxiv. 13, 14: "Thou didst divide the sea by thy strength: Thou brakest the heads of the dragons (*דִּרְבָּן*) in the waters. Thou

brakest the heads of leviathan (*לִוְיָתָן*) in pieces, and gavest him to be meat to the dwellers in the wilderness." The last passage is important, as indicating that whereas *דִּרְבָּן* is the Hebrew gene-

ric name for reptiles and whales, *לִוְיָתָן* is the special name of the crocodile. Its description in Job (xl., xli.) fully bears out this opinion. The crocodile was found even in Lower Egypt; now it has retired to the upper part of the country, and it is seldom seen below the First Cataract except near Kom Ombo, the ancient Ombos, or even as far as Keneh. It was one of the animals which played a most important part in religion. In some places, like Apollinopolis (Edfoo), Tentyra (Denderah), Heracleopolis (Abnas el Medineh), it was considered as an emblem of Set, who had taken this form in making war against Horus; while at Ombos and Arinoë it was the object of great reverence; it was fed by priests and worshipped as a god. The reason of this is that the Egyptians attributed to the crocodile a certain power in causing the Nile to rise, and, besides, the crocodile was also a solar god.

Among the reptiles we must mention the serpents, which are very numerous. Some of them are considered dangerous, like the horned snake or cerastes, which constantly occurs in the inscriptions as the letter *f*. The asp is the sign of royalty; it adorns all the head-dresses of the kings, and of most of the gods. As in many other countries, the snake was one of the animals to which the idea of divinity was most commonly attached. Being the symbol of eternity, it was also the emblem of royal power.

Frogs are so numerous that it is not difficult

* The name of this city must be understood as meaning the city of ivory, and not of the elephant. There ivory was brought by the traders of the Upper Nile.

to picture the second plague. There was a goddess with a frog's head who was connected with the measure of time, in reference to some very long period. The tadpole in the hieroglyphs is the sign for 100,000.

There was abundance of fishes in the lakes and the canals. Although the fisheries have greatly fallen away, their produce is still a common article of food, especially in the northern districts near Lake Menzaleh and Lake Mareotis. Several of them were sacred,—the oxyrhynchus (*Mormyrus oxyrhynchus*), which gave its name to one of the nomes of Upper Egypt, and the latus (*Perca latus*) which was worshipped at Latopolis, Esneh; also the phagros, which is perhaps an eel, and the lepidotus (*Cyprinus lepidotus*).

The scorpion is common in the desert and in the ruins of Upper Egypt; it is much more dangerous in summer than during the winter time. It is also the emblem of the goddess Selk or Serk, who was one of the forms of Isis.

Among the insects the locusts must be mentioned, which sometimes came upon the cultivated land in a cloud, and eat every herb, fruit, and leaf where they alight. They are more common in Nubia, where they are an article of food. Flies are one of the permanent plagues of Egypt, as well as mosquitoes. The fourth plague (Ex. viii. 21), *עָרָב, קַרְדָּמִיָּה* (Sept.), *καρδამύνα* (Hieron.), seems to have been a plague of those animals; while the third, *דִּבֶּקֶת, סַנְיִפִּים*, would rather refer to fleas or lice (Ex. viii. 16; Heb. v. 11).

11. *Ancient Inhabitants*.—The old inhabitants, studied from an anatomical point of view, appear now with certainty to have belonged to the Caucasian race, and to the branch of the Noachian family which is called Hamite or sometimes Cushite. The great number of their mummies which have been preserved, and also the very clear and instructive representations which they have left, show that in their corporal structure they had none of the characters of the Negro race; they had neither the protruding lower jaw, the so-called prognathism, nor the flat nose, nor the sloping forehead. The hair was long and flaxy, and the stature does not show the common feature of the Negro races, the pelvis projecting backwards and forming an angle with the spinal cord. The Caucasian character of their type is most visible in the skulls which belong to the mummies of the Old Empire. This natural kinship with the Semitic and Indo-Germanic races compels us to admit that their cradle must have been somewhere in Western Asia, very likely in Mesopotamia, and that from thence they migrated to the valley of the Nile and settled there. The question is, whether they came through the Isthmus of Suez, or whether, like other Cushite nations, they crossed over from Arabia, and following the course of the Nile reached Egypt proper. This point is very much discussed among Egyptologists, who generally admit that the migrations of the Egyptians must have been from the North through the Isthmus of Suez, considering that the oldest monuments are those of the neighbourhood of Memphis, and that in the Upper Nile and in Meroë we find nothing but monuments of very late date. However, the traditions of the old Egyptians seemed to point

to the land called Toneter, the divine land, as their birthplace. Toneter and Punt (Phut) are two names intimately connected, the site of which must be looked for on the African coast in the land of the Somalis and on the opposite side of the strait in Southern Arabia. They would thus have come over through Arabia with all the other Cushite nations, and followed the same track. It must be remarked that the Egyptians in their orientation turn to the South, and that the South is always mentioned before the North. The tradition was that Mena, the first king, had started from This in Upper Egypt, and founded Memphis, thus pushing farther north than had been done before him. It seems natural to admit that he only yielded to the impulse which had been given by former generations, which had migrated from the South to the North, following the course of the Nile.

The Egyptians, a Hamite race, are thus quite distinct from the Negroes and other African races, while they are closely connected with the Cushites, to whom, according to the latest researches, belong very likely the Phœnicians, the *Kefa* of the inscriptions. It is extraordinary that, although the conquests of the Egyptians extended very far, from the Upper Nile to the north of Syria, they never spread as a population outside of Egypt proper. They remained confined between the First Cataract and the Mediterranean. Immediately above Elephantine began the Negroes of Uaua, who were at times subject to the Pharaohs, but only at intervals, and who never were amalgamated with the Egyptians. The same may be said in regard to the populations of the desert of Sinai, who were in constant contact with the Egyptians. The Egyptians must have had a very strongly marked individual character, which was derived perhaps from their religious ideas, perhaps also from the peculiar circumstances in which their country was placed, and which gave them customs quite different from those of other nations. They were suspicious towards strangers, except those who could be reduced to slavery. For example, the Cushites are often called "the vile Kush," or the Hittites "the vile Kheta," while the Negro is praised for his submissive character.

Like all other Eastern nations, they used their prisoners as slaves, who very likely were not treated more cruelly than the inhabitants of the country subject to forced labour. While everything connected with the Egyptian religion is most strongly condemned in the Bible, the Israelites do not seem to have had a particular antipathy towards the Egyptians, for they gave them the privilege of admission into the congregation in the third generation (Deut. xxi. 8), while the Ammonites and the Moabites were absolutely excluded.

12. *Language; Writing*.—The language of the Egyptians is known to us from a very early period. The inscriptions in the Pyramids and on some statues are the first remains of it. It may be said that from the beginning until the Roman time, during a period which lasted more than four thousand years, there has been little change in the language, considering the immense duration of the Egyptian empire. Of course there has been some alteration: the language of the scribes of the 19th dynasty is

not identical with that of the hymns or prayers which are engraved in the Pyramids; the Book of the Dead, which can be traced to a very early date, contains many grammatical forms which were obsolete in the New Empire and under the Ptolemies. However, the general features of the language are the same.

The language is agglutinative, with biliteral roots, which become first quadriliteral by reduplication, then trilateral by the fall of one of the letters. It has in common with the Semitic and Indo-Germanic branches the distinction of genders, which does not exist in African languages; besides, there are some affinities with the Semitic idioms in the personal pronouns and in the numerals. Many more likenesses with the Semitic languages might be traced, chiefly in the roots and the words; but they must be considered as importations coming from the intercourse of the Egyptians with the Semites, which followed the Hyksos period. Very few are found in the old language.

The other languages which with the Egyptian constitute the Hamitic branch are the Libyan or Berber languages, such as the Tuareg and the Tamashek, and the languages spoken in some parts of Soudan and Abyssinia, the Bedja, the Soho, the Galla, the Somali, to which Dr. Lepsius adds the Hottentot in South Africa (Lepsius, *Nub. Gram.* p. xvii.; Hommel, *Die vorsem. Culturen*, p. 92).

The writing was hieroglyphical; it is interesting because it is transitional, between the pure picture-writing, or ideographic, and the phonetic. It may be said that the Egyptians were the inventors of phonetic writing, as they have signs corresponding to a definite sound quite irrespective of the object which the sign represents. Thus an eagle is *a*, an owl *m*. It was through these signs that Champollion succeeded in deciphering two proper names which gave him the key to the rest of the alphabet. The Egyptians could never free themselves from the old tradition of the picture-writing. A sentence is never written in phonetic signs only; it is a mixture of the three kinds of signs: the ideographic, the syllabic, and the phonetic. From the ideographic they passed to the syllabic, a sign being used for the same sound irrespective of the object it represents. The ideographic is generally used as determinative, as a kind of explanatory picture added to the word which is written with syllabic or phonetic signs. From the beginning we find this threefold writing. In the old language, for instance in the inscriptions of the Pyramids, there are no more ideographic signs than subsequently; the phonetic alphabet is used as frequently as at another epoch. The result of the existence of these three kinds of signs is that in Egyptian there is no orthography in the sense which we give to that word. There is not one single spelling for a word; it can be written in many ways according to the space, or the material, or the fancy of the scribe.

We must bear in mind that hieroglyphical writing has also an ornamental character. In stone monuments the inscription is the necessary accompaniment of the sculpture; it is part of a picture, and therefore it must follow the rules of elegance and taste. That is why we often find inscriptions written from left to right, while the usual way is the contrary. Hiero-

glyphical writing being difficult and slow, the Egyptians employed for the common use a shorthand, which is called by the quite inadequate name of "hieratic." There is a hieratic sign corresponding to each hieroglyph. We find hieratic texts already in the Old Empire. A farther simplification is the demotic, which goes parallel with a modification in the language. We have no demotic text earlier than the 22nd dynasty. There the signs very much deviate from the original hieroglyph, and are often difficult to recognise; but there are still the three kinds of signs. It is curious that the desire to simplify affected only the drawing of the sign itself, and never induced the Egyptians to adopt a purely phonetic alphabet of which they had the elements. To the last they adhered to the rather cumbersome system of three kinds of signs, including determinatives, until they rejected their writing entirely and adopted the Greek letters with four additional signs, i.e. the Coptic alphabet. Then the language was very much altered, chiefly under the influence of Greek, which was the common language in the cities. The Coptic is still the sacred language of the Copts, who read their prayers without understanding the meaning, unless they have the Arabic text by the side. It seems to have ceased to be spoken only at the end of the last century.

The pure hieroglyphs were used only for monumental inscriptions and for sacred texts, like the Book of the Dead. Owing to the monumental character of this writing, it has gone through the same phases as the architecture. The affected taste of the Ptolemies, the pompous style of the time, is felt even in the engraving of the Egyptian scribe. A great many new signs were adopted, and increased in number under the Romans. Nothing is more difficult to decipher than the enigmatic inscriptions of the late Ptolemies or of the emperors.

13. *Religion.*—The religion of the ancient Egyptians has often been viewed in a very false light, owing to the prejudiced ideas with which it has been studied. The fault rests first with the Greeks, who translated in their own language the names of a certain number of Egyptian gods, giving thus an utterly wrong idea of their nature and their attributes. It is quite certain that there are some likenesses between Zeus, Dionysos, and their Egyptian substitutes Amon and Osiris; but there is a fundamental difference between the Hellenic and the Egyptian gods. It is equally erroneous to reconstitute the Egyptian religion from the works of the Gnostic philosophers, or even from the late Alexandrine writings, like the Orphic hymns or "Hermes Trismegistos." Whether in some of them a Christian influence is recognisable or not, it is certain that these writings belong to an epoch where metaphysical speculation had taken a development which is quite unknown in ancient Egypt; and in adopting the interpretation of these late philosophers, we attribute to the early priests a mode of thought which they very likely never had.

The Egyptian religion is not a system well coordinated in all its parts, and in which every element has its definite place, nor can it be considered as having been immutable during the 4,000 years that the Egyptian empire lasted.

It certainly underwent some alterations, although on the whole, like the language, it remained very similar in itself in proportion to its immense duration. Religious inscriptions are innumerable: they constitute the great bulk of the texts which have come down to us; and at first sight the mass presents itself as a confused and perplexing mixture of ideas which are sometimes contradictory, sometimes remarkably simple and beautiful, sometimes on the contrary childish and even ridiculous. However, in spite of the difficulty of discovering the way in which abstract ideas were expressed, and of penetrating the sense of a fantastical and wild symbolism, there are now some well-established facts which give us a general idea of what the religion was.

It is, of course, the doctrine of the priests which must be examined. Popular religion was very much alike everywhere; it was the worship of the local god, to whom, more or less, all the attributes of the deity were given. Looking at the texts of the Pyramids or the inscriptions of the tombs of the kings, or the Book of the Dead, we find that the religion of the Egyptians was pre-eminently a worship of nature and its leading manifestations. The chief god was the god Tum Khepra, also called Ra, who was considered as born from water, and who gave birth himself to his limbs, which were gods. The cosmogonic cycle of gods was composed of nine divinities, the gods of Heliopolis, the city which was said to be the most ancient in the whole land. These gods were Ra Tum Khepra, Shu, Tefnut, Seb, Nut, Osiris, Isis, Nephthys, and Horus. All manifestations of nature, all the natural forces were gods, but were not separated from the Creator, and were part of him. This idea is very unlike what we call monotheism, although there is in fact but one god from whom everything originates. It would rather correspond to what we call pantheism. Besides this general substratum of religion, there is the local element, which has a considerable influence. Each large locality or city had its peculiar god: Pthah was the god of Memphis, Neith of Saïs, Bast of Bubastis, Amon of Thebes, Khnum of Elephantine, Hathor of Denderah, Horus of Edfoo, Khem of Panopolis, Isis of Philæ, Osiris of Abydos. Each of those divinities was considered as the chief god, was adorned with the attributes of the Creator, so that the Egyptian pantheon is composed of gods who differ in name, but are very much alike in their nature. Especially they were identified with the elements which are most beneficial,—the sun, the earth, and the water. It would thus be wrong to give to one of these gods, like Amon, the pre-eminence over the others,—it might just as well be done for Horus of Edfoo,—except as regards the cycle of the nine gods of Heliopolis, who seem to have been the most anciently worshipped, and who are the cosmic gods of the Book of the Dead, which was venerated in all Egypt.

In the relation of the gods to mankind there are some ideas which seem to contradict the system of the cosmic gods. The great god of the Lower World is Osiris, who, sitting on a throne in a sanctuary called, like the temple of Heliopolis, "the great abode," presides over a court of justice in which he is assisted by four

judges, and where forty-two witnesses are successively appealed to by the deceased, who declares that he has not committed one particular sin. Then the heart of the deceased is weighed against the goddess of truth and justice; and if the weight is exactly equal, he is called "justified." This most interesting scene is part of what is called the Book of the Dead, and in the negative confession of the deceased we find the expression of the highest moral commands. This strong feeling of the responsibility of man, and the character which is here given to Osiris, do not agree with the indifference to good and evil which is the necessary consequence of pantheistic doctrine.

As regards the fate of the soul after death, the ideas of the Egyptians are very vague. The Book of the Dead does not give us one definite line which each soul has to follow; it teaches us all that may befall the soul of the deceased, all the forms it may assume, all the gates it may pass, without its being compelled to do so. Sometimes also it seems to be merged in the one all-comprising god. One thing is certain, the body was not to be destroyed; it must be preserved by all means and reconstituted in all its vital parts in the Ament; the body must not decay. That is the reason why they embalmed the corpses with such care, and why the kings shrank from no expense and difficulties, and built pyramids or excavated long galleries in the mountains in order to be certain that their burial-places would not be violated.

The worship of the forces and manifestations of nature led the Egyptians to adopt as symbols the figures of animals. The hawk was the representative of Horus, the ibis of Thoth, the ram of Amon. Two sacred bulls, Apis and Mnævis, were worshipped,—one at Memphis, the other at Heliopolis; the latter, as it was of yellow colour, probably was the animal that gave to the Israelites the idea of the golden calf. The adoration of animals must have been to the Hebrew legislator the most offensive feature of the Egyptian religion; and in the detailed prohibitions of the second commandment to make "any likeness of anything that is in heaven above, or that is in the earth beneath, or that is in the water under the earth," Moses seems to have remembered those countless representations of hawks, ibises, bulls, rams, and crocodiles which he and his countrymen had seen so often, and to have warned the Israelites against such a profanation.

A few foreign divinities were admitted in the Egyptian pantheon. Set or Baal, the god of the Hyksos, remained after the invaders had been expelled; Ramses II. associated him with Amon in the temples of Tanis and Bubastis, and was one of his most faithful worshippers. Astarte (Astarte) was worshipped at Memphis. Her foreign origin is proved by her being represented on a chariot, while the Egyptian gods travel by boat.

The mystical turn of mind of the Egyptians, their strange symbolism, which was not understood by the Greeks, caused their religion to degenerate. Under the Romans the Egyptian priests fell into disrepute for their gross superstitions and their magical practices.

14. *Laws*.—We have only very imperfect accounts of the laws of the Egyptians during

the Old and Middle Empire, and even under the great Theban dynasties. However, from a certain number of papyri which contain records of suits of law either civil or criminal, we may infer that there were very definite laws, and that the organisation of justice was very high and dated from a very early epoch. Among the titles of the deceased in the tombs of the Old Empire, we find some which evidently indicate magistrates; for instance, what is called the royal *thuty*, which must have been a court of law, and the title of the *arch-judge*, who, according to Diodorus, wore around his neck a chain from which hung the image of the goddess Ma (Truth and Justice).

The most interesting trials of which records have been preserved, belong to the reign of Ramses III. and Ramses IX. One is a trial for high treason which had taken place in the palace of the king himself, and where the king seems to delegate to the court the prerogative which he possessed of condemning the culprits. The other document is the inquest which takes place on the state of the royal tombs at Thebes, which had been violated by thieves, and where the guiltiness of the accused not being proved they were acquitted. From these and from other documents of the same kind we may see that generally a suit of law was introduced by the plaintiff, who handed his grievance in writing to the governor; then the court was assembled, which was composed of priests and several high officers. The debates were public and verbal, each party speaking in turn. The court pronounced only the verdict for or against the plaintiff, and the right of passing the sentence belonged to the king. It must be admitted that this right was only exercised by the king in important cases, or before the high court, which, according to the Greek authors, was composed of thirty judges, ten from each of the greatest cities—Thebes, Memphis, and Heliopolis.

Capital punishment was often applied, but sometimes in the form (which is still used in some Eastern countries) of compelling the condemned to commit suicide. Bastinado was the most common of corporal punishments applied to both sexes; a much more severe one was the cutting off of the nose and ears. Torture was also applied in order to extort an avowal from the accused.

Very much information has been acquired by the translation of the demotic contracts of late epoch; of which there is a great number in the various museums. We have thus obtained an insight into the civil law of the Egyptians, which, under the last Pharaohs and the Ptolemies, was most precise and definite. The stipulations concerning the sale of land, mortgage, inheritance, the rights of the wife and children, show that there was a code of laws which certainly was the result of very old traditions and of a time when the state of the country was settled and peaceful.

The judges were chiefly priests: among the lists of members of the courts we find men who were merely civil officers; nevertheless it is likely that the priestly order, the most powerful in the state, furnished the greatest number of judges. Crimes of impiety were looked at with abhorrence, even by the population; and de-

stroyers of temples, like the stranger Cambyse, were always the objects of popular hatred.

15. *Government.*—The government was monarchical, but limited by laws and customs, which originated from the fact that the king was the first priest and the head of all that was connected with religion. The right of succession was by inheritance. Queens were not excluded from occupying the throne, and some of them were very powerful and warlike. Though the king did not belong to the priestly order, he was initiated in their knowledge and their mysteries, and he is considered as performing himself all the important acts concerning the worship of the gods. On the countless sculptures which adorn the walls of the temples he is always represented and named as doing what must have been the duty of the priests. The Greek authors, and specially Diodorus, speak in the most laudatory terms of what we should call the constitution, of the way in which the rights and duties of the kings were determined, of the laws which limited his power, and of the education which was given to the heir to the throne. Considering the advanced state of civilisation which the Egyptians reached at a very early epoch, we must admit that the royal power in Egypt was very different from the dominion of the barbarous tyrants who ruled over African or most of the Asiatic nations. The court of Egypt may well be compared to the court of Persia, which also excited the admiration of the Greeks. That there were really some of these sovereigns who cared for the welfare and prosperity of their subjects, is proved by the traditions which have been preserved by Manetho concerning several of them, and also by two Egyptian books which are instructions to royal princes. One of them is the so-called Papyrus Priase, written by the son of king Assa, containing a moral teaching similar to the Proverbs of Solomon, and in which the conditions of real greatness, the duties of man towards his neighbour, of a son towards his father, are expounded in simple words which indicate a very high standard of morality. The other one, which has been preserved by a scribe of the 20th dynasty, is called the teaching of Amenemha I. to his son Usertesen I. (12th dynasty). The reigning father gives advice to his son on his duties when he will ascend the throne. Even at the time when Joseph was raised to his high position, when the Hyksos kings were reigning, it is easy to see that the king felt some limitation to his power. Not only did he not dare to monopolise the land of the priests as he did in the case of the rest of the people, but he would not defy the prejudice of his subjects against shepherds, a prejudice which arose not so much from the profession in itself as from the fact that it was that of the invaders who had conquered the land.

It is quite a wrong idea to imagine that there were in Egypt hereditary castes. It is certain that high employments were often monopolised by families who very likely enjoyed the favour of a king or of a dynasty. But a priest might be at the same time a general or a civil officer, and we do not see those insuperable barriers between the professions which are found in India.

16. *Foreign Policy.*—The foreign policy of the Egyptians has generally been considered as

being marked by extreme exclusiveness and by a great reluctance to admit foreigners into Egypt. The Egyptians, like all other nations of antiquity, considered the strangers more or less as barbarians; and this idea, which is derived chiefly from a religious feeling, had a kind of justification as long as they had as neighbours only nations which stood very far behind them in civilisation. They seem to have admitted strangers in Egypt whenever they found that they could employ them to their own advantage.

The kings of the first six dynasties waged war chiefly with the inhabitants of the Sinaitic peninsula, which they held under their rule; but from the end of the 11th, and during the 12th and the 13th dynasties, we see the efforts of the Pharaohs directed against the southern countries, the Negroes and the Cushite populations. Many inscriptions indicate that those nations were considered as subjects, and very likely reduced to slavery; however, when we find at Tanis a prince of the 13th dynasty called *the Negro*, and also a king of the Papyrus of Turin bearing the same name, it shows that the strangers had acquired in Egypt a certain influence. Under the 12th and the 13th dynasties the country seems to have been more accessible to the admission of foreign elements than earlier. At this time we find the first intercourse with the Ma'ta'ion, a Libyan nation out of which the Pharaohs of the great dynasties recruited a foreign police. Then also we see the peaceful invasion of the Shemites, or, according to some authors, of the semitising Khamites who settled in the eastern part of the Delta, the *Amu Boukôloi*, the forerunners of the Hyksos, who were to conquer the whole land.

When Egypt had been liberated from her foreign rulers, there began the long war with the nations of Palestine, Syria, and the upper part of Mesopotamia. The Semitic element had not disappeared from the country with the Hyksos. Not only did a great part of the Semitic population remain in the Eastern Delta, but their influence was felt very strongly in many respects. We have spoken before of the introduction of horses and of chariots. The worship of Baal remained at Tanis, and even in the language there are many Semitic words which are employed rather than the corresponding Egyptian, as if it had been fashionable to choose the Semitic rather than the vernacular. The conquests of the Pharaohs in Syria did not last longer than the lives of the conquerors; they had no influence on the conquered nations, and except a few inscriptions no trace remained of the passage of the Egyptians, who exacted tribute from their vassals, but did not attempt to press upon them their civilisation. There is one nation for which the Egyptians seem to have had more respect than for any others, the Hittites or Kheta. In spite of their being always called "the vile Kheta," Ramses II. must have found that they were rivals worthy of him, and that it had cost him great difficulty to beat them, as he made a treaty of peace in which both nations are on the same footing, and which is the first diplomatic document of which we know. In this treaty we find a positive alliance between the two nations, which are to help each other in case of attack; besides, there

are clauses of extradition of fugitive criminals, and a kind of protection of industry, for it is stipulated that clever workmen coming from Egypt will not be allowed to settle in the land of the Kheta, but will be sent back, and the reciprocal clause. Another proof of the respect which Ramses II. had for the Kheta is the fact of his marrying the king's daughter.

Of the relations of the Egyptians to the Israelites, the first we know of is the arrival of Abraham in the reign of a Hyksos king, who received him just as one of his followers, Apepi, was to receive Jacob. The revolution which took place at the beginning of the 17th dynasty, and the return to power of the native line, greatly altered the feeling of the Egyptians towards the foreign settlers, who were then considered as prisoners of war and treated as such. The anarchy which prevailed in Egypt at the end of the 19th dynasty, and the weakness of most of the rulers of the 20th, prevented them from doing anything against the Israelites; and later still, when the kingdom of Israel had risen to a great power, one of the kings of the 21st dynasty, very likely a Tanite, gave his daughter to Solomon. The expedition of Shishak in Palestine may be considered as the last of those great conquering campaigns in Syria of which there had been so many in the 18th and the 19th dynasties. After that time Egyptians and Hebrews were natural allies against the Assyrians and Babylonians. It was this reasonable policy which Necho advocated in his message to Josiah. As to Zerah, who is said to have been beaten by Asa, he may have been one of the Osorkons, or he may perhaps have been one of the Ethiopian chiefs who at that time began already to invade Egypt. The history of Jeremiah shows how the Jews were accustomed to look to Egypt for support and to take refuge there.

With respect to the African nations, the Libyans, the Mashuash (Maries), and the Ma'ta'ies were very early employed by the Egyptians as gendarmerie, and also as mercenaries; they had likewise some Negro troops. The chiefs of these mercenaries succeeded sometimes in usurping the kingly power. The dynasty of Shishak and of the Bubastite kings very likely attained to the throne by the help of their foreign mercenaries. Generally we may consider that the Negroes were subject to predatory attacks, like the slave-hunts of modern times. The Negroes were liked as slaves; they are spoken of as the "good Negroes;" they were diligent and attentive in their work.

The Greeks and the other nations of the Mediterranean, which had been kept out because several times the Pharaohs, like Menephtah and Ramses III., had had to repel their invasions, were not only admitted, but called in by Psammetik and the kings of the 26th dynasty, who put an end to the Dodecarchy, and who made great use of them in their wars. From that time the foreign soldiery is an important element in the history of Egypt. The native population was exhausted, and had not sufficient energy to resist foreign invaders. They depended on their mercenaries for their defence, and their independence was in the hands of those troops. They could not resist the Persians, and after that they easily submitted to the Macedonians.

17. *Army*.—The Egyptians do not seem to have been from the first a very warlike people; they were rather engaged in agricultural pursuits. Their first kings were not great conquerors, and except Pepi, who fought against the Sinaites, we do not see records of great wars at this early period. The army was then also in a much more elementary state than later, and very likely much less trained and disciplined than under the great Theban dynasties. How-

ever, even under the 6th dynasty they had already African mercenaries from different Negro races. The fact of their having to fight only barbarians like the Negroes did not develop their military skill, and it is perhaps the reason why they were such an easy prey to the Hyksos invaders. With the beginning of the 18th dynasty we see a complete change in this respect. The horse and the chariot become an important element in the warfare. Then we

Phalanx of heavy infantry. (Wilkinson.)

see well-disciplined troops uniformly armed and divided into various regiments or bodies. Chariots and cavalry were the rapid part of the army. Though we hardly see any representation of horsemen in the battle-scenes, it is likely that there were some. But the chariots were far more important. It was the way in which the king fought. Each car carried two men, the charioteer and the warrior, who generally was an archer.

The infantry consisted of several kinds of troops. The spearmen had a large shield and a spear, and also a kind of falchion. The archers had, beside their bow, a hatchet or a kind of curved stick, which is still used by African nations. Slingers are seen on the boats in a naval fight. Pole-axes and maces are also common weapons. Even at the time of their great conquests the Egyptians had mercenaries: the Shartana, who wore a metal helmet and a

short dagger, the Mashuash (Maxyes), and the Kahek, another Libyan tribe. Not only could these troops fight pitched battles, but they knew to a certain degree the art of making sieges. We see on some sculptures the capture

of very strongly fortified cities of Syria, which could only be taken by a regular siege.

The description which Scripture gives of the army of Shishak corresponds to the variety of foreign troops which are often found in an

Disarmed troops of the time of the 18th Dynasty. (Wilkinson.)

Egyptian army (2 Ch. xii. 2): "It came to pass that in the fifth year of king Rehoboam, Shishak, king of Egypt, came up against Jerusalem... with twelve hundred chariots and threescore thousand horsemen, and the people were without

number that came with him out of Egypt: the Lubim, the Sukkiim, and the Ethiopians." Here the Septuagint translates the word *Sukkiim* *Troglodytes*. We have no reason to contest this translation; we should thus have menti-

of three kinds of African mercenaries—the Libyans, the Troglydites, and the Ethiopians. It is curious to find such a very large cavalry,

which does not appear in the Egyptian pictures. They may have been the Libyans, something like the Numidian cavalry.⁴

18. *Domestic Life.*—The sculptures and paintings of the tombs give us a very full insight into the domestic life of the ancient Egyptians, as may be seen in Sir Gardner Wilkinson's great work. One of the most striking features is the high position occupied by women; it is not rare in the funeral pictures to see them represented near their husbands: the wife is called "the lady of the house," "a palm of loveliness," "beloved by her husband." Monogamy seems to have been the rule; polygamy, however, was not forbidden, nor marriage between brother and sister, which may perhaps be traced to the early tradition of "endogamy," the marriage within the family. It is certain that polygamy was very common with the kings.

As to their general manner of life it is that of a highly civilised people, whose pursuits and occupations were essentially agricultural. The occupations of the upper classes, independently of the employments, which must have been very numerous, either in the administration of the country or in everything which concerned religion, consisted in the superintendence of their fields and gardens. The Egyptians were of a cheerful and rather careless nature, and were very fond of amusements of all kinds. Their turn of mind seems to have been rather witty; they liked caricatures; and in the dialogues of workmen which we often meet with, there are jokes of the same kind as one would hear now in a gang of fellâh-labourers. They were fond of banqueting, and their parties were very merry and distinguished by great luxury. Women sat with men; they were attended by female slaves, who brought them the dishes and cups of wine and flowers in abundance, especially the lotus, very much liked because of its good perfume. Dancing girls would come to amuse the guests, accompanied by players on the flute and tambourine, and women clapping their hands. They were fond of music: the flute, the "dara-booka," the harp, and several kinds of guitars

were their instruments. They had many games: draughts, which men and women would play together, dice, and another called "the vase." Besides, they liked gymnastics, and one of their entertainments was to see women juggling, or performing feats of agility.

All this was in the greatest possible contrast with the mode of life of the Israelites, who were from the first a pastoral people (2 K. xiii. 5). Joseph's brethren must have felt very much as strangers in his company and amidst his Egyptian attendants, and this explains the distance which Joseph is obliged to keep between them and the Egyptians when he admits them to eat in his presence.

The funeral ceremonies were an important part of the Egyptian life. A considerable number of priests and workmen were occupied in the embalming of the body, which took a long time, and had to be done carefully. This custom, which continued to a very late period, originated in the religious idea above mentioned (p. 872); the body was to be preserved from corruption. The ceremonies accompanying the funeral were of various kinds: there was a procession in which the mummy lying on a sledge was drawn by cows, while the mourners followed, and priests read prayers and burnt frankincense. The mourning lasted seventy-two days. Jacob and Joseph, according to Scripture, were treated in that respect exactly as if they had been born Egyptians.

⁴ It is through sacred and profane writers that we know of the existence of Egyptian cavalry. In the case of Shishak's army, horsemen are clearly indicated by the use of the word 𓂏𓂐𓂱, which is a riding-horse, while chariot-horses are 𓂏𓂐𓂱. It is a question whether cavalry was employed independently or only in conjunction with the chariots which had the main work to do. This conjunction would explain their not being represented on the battle-scenes, and also the fact that the 𓂏𓂐𓂱 are generally mentioned after the chariots.

19. *Literature and Art.*—In the Egyptian language there is what we call a literature, a collection of works of various descriptions, some of which date from the remotest origin. There is the religious literature, which is preserved both by stone monuments and by papyri, besides all other works contained in the numerous papyri which are deposited in the museums. The Egyptians and their sovereigns were a very literary nation; they were the first to have what the Assyrians had also after them, libraries, which were preserved in the temples. In the temple called the Ramesseum, and which Diodorus describes as the tomb of Osymandias, there is a hall, part of which is still extant, which is consecrated to Thoth and Sakh, "the lady of the house of books," and which is clearly the library which Diodorus mentions. In the Ptolemaic temples we also find the library, and the inscriptions on its walls show the catalogue of the books it contained.

Clemens Alexandrinus (*Strom. lib. vi. p. 286*) gives us very important information on what he calls the Hermetic books of the Egyptians, the books attributed to the god Thoth, sacred books. They did not cover the whole extent of the Egyptian literature, but they must have comprised a large part of it. Most of them have been lost, but there are some works which we may consider as being part of the forty-two Hermetic books: they were, first, the two books of the chants, of which one contained songs in honour of the gods, the second a description of royal life and its duties. The next class comprised the four astronomical books of the Heracopus; then came the ten books of the hieroglyphic, some of which referred to the art of writing, others to the geography of Egypt, the course of the Nile; and then the description of the properties of the temples. The great Harris Papyrus, giving detailed accounts of the donations of king Ramses III. to the chief temples of Egypt, would undoubtedly belong to the last class. Then came the ten books of the Stolistes, devoted to all the ordinances concerning religious worship. It is likely that long inscriptions found in the temples of Abydos, or more frequently in the Ptolemaic temples, and giving ritualistic prescriptions, are derived from the books of the Stolistes. Then came the sacred books *par excellence*, the books of the prophet, also ten in number, which contained the laws and everything concerning the gods and the education of the priests. It is to this class that belongs the most important religious work we know, the Book of the Dead. The last six books contained treatises on medical science, an art which was very popular in Egypt. Manetho says that the second king of Egypt, Athethis, practised medicine and wrote books on anatomy. The same is said of a king of the 3rd dynasty. And in fact in the medical papyri, the largest of which is the Ebers Papyrus, we find that parts of the book are attributed to very early kings.

The Book of the Dead, of which a great number of copies have been preserved, is a collection of hymns and prayers, which are considered as being pronounced by the deceased. They describe all that may happen to the soul after it has been separated from the body. This book is not a whole; it is a mere collection; but

it was usual to put at least part of it near the mummies in the coffins. Therefore the papyri differ very much in length. The first publication of it was made by Lepsius from a copy preserved at the Museum of Turin, which probably belongs to the early Ptolemies.

Besides the religious books, we have papyri on mathematics and on moral teaching; descriptions of travels; descriptions of the different conditions of men; various tales, some of them very old, relating the life of adventurers, the tale of a doomed prince, and the famous tale of the Two Brothers. Magical books are frequent: correspondences between a teacher and his disciple, in which generally the teacher endeavours to persuade his pupil of the great advantage of learning; besides what is called poems, without our being certain that they were poetry. A work like the poem of Pentaur, celebrating the campaign of Ramses II. against the Kheta, is certainly written in a poetical style. But the laws of the verse have not yet been recognised. If there were real poetry, it consisted in something like the Hebrew verse, in parallel sentences.

It is a great misfortune that we have lost all historical books of the Egyptians, except one list of kings, of which only a few fragments can be used, owing to the very bad state of the papyrus.

The great interest which attaches to Egyptian art is derived from several circumstances. It is perhaps the oldest we know. It had reached a high point of perfection when all around there was nothing but nations which could justly be called barbarians. It had grown out of itself; there was no borrowing of foreign elements, for they did not exist. We do not know how long it took what we may call the prehistoric Egyptians to reach the state of civilization indicated by the tombs near the Pyramids and by those monuments themselves; but we may be certain that this was the result of the artistic sense developing itself gradually; interpreting nature without any external influence: everything is indigenous, and has sprung up in the valley of the Nile, which was for such a long time like a well-built house surrounded by hots of savage barbarians.

The foundation of the Egyptian art being religion, architecture has had by far the pre-eminence over sculpture and painting. The temple was the abode of the god, and on it the kings have lavished their treasures and the labour of their subjects. The remarkably good stones which are found everywhere in the valley of the Nile favoured the special gift of the Egyptians for building; the colossal and magnificent buildings which they raised are still the admiration of travellers. They invented the column and the architrave, in which the imitation of nature and of the vegetable kingdom is easily to be recognised.

On the other hand, they raised the Pyramids, specially destined to protect the body which each contained, and the construction of which implies an advanced knowledge of mathematics and even of mechanics.

The architect was a man of high position, while the sculptor and the painter were only workmen. Their arts were only the accompaniment of architecture, and, though they attained a high degree of beauty, they never extricated them-

selves entirely from the conditions which recall their original purpose. The characteristics of sculpture and painting are remarkable skill in the portrait, in the reproduction of the features which distinguish the individual, and at the same time great purity in line and great boldness in drawing. The harmony of colour is quite remarkable. Nevertheless there remains a conventional style and certain characteristics of an art still in its infancy. The complete independence of the sculptor, coupled with great ability in handling the stone or the metal, was only attained by the Greek sculptor. However, Egyptian art was very much admired in antiquity, and the Phœnicians made very many imitations of works of art as well in Egyptian as in Assyrian style, and sold them in their colonies in the Mediterranean.

The Hebrews, who were a pastoral people, had not much propensity for art, not even for architecture; besides, the second commandment did not allow sculpture to develop itself among them. In that respect they borrowed little from Egypt, except perhaps some details in the construction of the Tabernacle and the Ark, like the cherubs. Their first great monument was the temple of Solomon. It is difficult to know what in that building came from Egypt, or what was due to the Phœnicians, to whose skill they appealed.

20. *Magicians*.—We find frequent reference in the Bible to the magicians of Egypt, and to the interpreters of dreams (Gen. xli. 8). Visions at night were considered as a way in which the gods spoke to men. We have several accounts of dreams in the inscriptions: for instance, Harmachis, the god of the great sphinx, appears to king Thothmes II. during his sleep, and orders him to repair his monument near the Pyramids; the king of the Exodus, Menephtah, when threatened by an invasion from nations of the Mediterranean, is warned by the god Phtah not to take part himself in the battle.

Generally magic was not separated from medicine. There was a wide-spread belief in spells, in the magic power of certain words; we have several magical books written both in hieratic and in demotic, in which the most extraordinary prescriptions are made, mixed with strange invocations and unintelligible words, which when pronounced were thought to have some mysterious effect. Magicians were not in the least disrepute, and their art seems on the contrary to have been the sign of profound and hidden knowledge. The serpent was an animal which always was connected with magical practices, and what is said of the sorcerers of Pharaoh and of their changing their rods into serpents reminds us of the extraordinary power which some men exert over those animals, as may be seen constantly even now in the streets of an Oriental city. (Ex. vii. 11 sq., viii. 18, 19, ix. 11; 2 Tim. iii. 8, 9.) [MAGIC; JAMBRES; JANNES.]

21. *Industrial Arts*.—The industrial arts held an important place in the occupations of the Egyptians, and here we have again to revert to the tombs, not only to their pictures and to the representations they give us of the industry of the country, but to the numerous objects which have been preserved in them. Owing to the very good flax which grew in the valley of the

Nile, the industry of weaving had a great development; they made linen of all qualities, from the coarsest to the most delicate, which they dyed in brilliant colours. Egyptian linen had a great repute (Is. xix. 9), and found its way to Palestine, very likely through Phœnician traders (Prov. vii. 16). A stouter material was leather, which was worked in large pieces, painted and ornamented most brilliantly, like the funeral canopy of Queen Isis em Kheb. Many arts connected with good housing and comfort in the dwellings were found in Egypt. Carpenters and cabinet-makers are seen, as well as turners, who used the bow as they do now in the bazaars of Cairo. There was very fine furniture; most elegant chairs, beds, and stools are represented in the tombs, besides boats of pleasure, which must have been most luxurious. A great quantity of pottery was made. It was perhaps one of the employments of the Hebrews during their bondage. Glass seems to have been known as early as the 11th dynasty, and pictures of glass-blowers are met with in the tombs of Beni-Hassan of the 12th dynasty.

Boat-making must have employed a great number of people, as nearly all transport was made by water; however, they also made chariots, but only after the use of the horse became frequent in the army.

Egyptian jewellers have left us pieces of their work which still excite the admiration. The famous jewels of Queen Aahhotep of the 17th dynasty show how skillful they were. These are made in silver and gold, precious stones, and a glass paste or enamel. In the ornamenting of the temples, besides gold and silver, the Egyptians used the metal called *asen*, the *ἄλεκτρος* of the Greeks, which is a mixture of gold and silver; for common use they had chiefly copper and bronze; iron, though known already at an early epoch, was much rarer, and very likely a foreign import. Precious metals were never coined; there was no Egyptian coinage before Alexander; the gold is seen in rings or purses, or plates, and the exchanges were paid by weighing the precious metals, as was customary in Palestine at the time of the Patriarchs (Gen. xxiii. 16).

22. *Festivals*.—The religious festivals were in great number, judging from the lists which are found in the calendars; and in the great temples like Thebes, Denderah, and Edfoo, they were kept with great pomp. The processions were an important part of the festivals: the emblems of the gods were carried in the halls or sometimes outside of the temple at certain fixed days and hours. It is certain that some of those festivals were attended with much licence—for instance, the grand festivity of Bubastis, which is described by Herodotus (ii. 59, 60); this was particularly the case with the festivals of gods of generation. The description of the festival of the golden calf given in Ex. xxxii. shows that it also took that character. Whether the golden calf was a recollection of Apis or Mnevis or some other bull, it was an emblem of the generative power, and the description has a certain likeness to the festival of Amon Khem represented on the temples at Thebes, where a white bull appears, and where there is much dancing.

23. *Manners of modern Inhabitants*.—In the

manners of the modern inhabitants there is much which recalls the old Egyptians, which is derived from peculiar circumstances of the nature and the climate of Egypt, so different from other countries; much also which illustrates the Bible, owing to the immutability of things in the East, and also to Arab influence. In this respect the standard work to be consulted is Lane's *Modern Egyptians*; cp. also Mrs. Poole, *The Englishwoman in Egypt*.

24. *Chronology*.—No subject in Egyptology is more discussed than chronology; there is none on which opinions are more at variance, and which is to be treated with more caution. Chronology is based upon astronomy; and although we have a certain number of astronomical representations, they are so intermingled with mythology, so evidently recorded for a religious purpose, that it is difficult to make any safe use of them. We know, however, that there were some astronomical books, but none of them have come down to us, except perhaps a few fragments inscribed on the walls of some temple.

According to the generally prevalent ideas which were first advocated by Lepsius in his standard book on Egyptian chronology, the Egyptians had two different years: a vague year, consisting of twelve months of thirty days and five intercalary days; and, besides, a fixed solar year, consisting of 365½ days. Those years began originally on the same day, the first of the month of Thoth (20th July, Greg.), with the heliacal rising of Sothis. But as after four years there was a difference of one day in the beginning of the two years, it is admitted, and confirmed by testimonies of Greek authors, that they made use of the so-called Sothiac cycle, 1460 solar years corresponding to 1461 vague years: after the lapse of that period, the two years began again on the same day. Although we find no allusion in the hieroglyphic texts to the Sothiac period, the constant mention of Sothis in reference to the beginning of the year makes it very probable that they knew the period and made use of it; while on the contrary there is no reason at all to admit the existence of a period of Apis (25 years), or of the Phoenix (500 years), which are not supported even indirectly by the monuments. In the inscriptions, when a great number of years is indicated, it is generally by means of the *Set* cycle, the *τριακοστῆτης* (30 years), or the *hunti*, a period of 120 years.

The Egyptians had three seasons of four months. The first was the season of the inundation, which began shortly after the summer solstice, and which comprised the months of Thoth, Paophi, Athyr, and Choiak. The second, comprising the months of Tybi, Mechir, Phamenot, and Pharmuti, was the season of ploughing and agricultural labours. The third was the season of harvest,—Pachons, Payni, Epiphi, Mesori. The names of the seasons had no sense in the vague year, as in the course of time the seasons went through all the different parts of the year.

There was no fixed era: no mention has been found of anything like it except in mythological texts and in the tablet of the year 400, in which an officer of Ramses II. dates his arrival at Tanis in the 400th year of the king Set Nubti, in the 4th day of Mesori. It is difficult to

know what real historical value may be attributed to this date. The events are always dated by the year of the reigning king. Besides, the Egyptians do not seem to have felt the need of fastening their history to some fixed astronomical facts. Their chronology was more a succession of kings and names, with the sum of years during which they had reigned. The calendars seem to have had a specially religious purpose; they indicate when the festivals of the gods are to take place, when the offerings are to be brought. The mention of an era is derived from a passage of the Greek mathematician Theon, who speaks of an era of king Menophres, the beginning of a Sothiac cycle, which would correspond to July 20, B.C. 1322. Lepsius has endeavoured to prove that king Menophres was the son of Ramses II., Menephtah of the 19th dynasty. In fact, the name of Menophres has not been identified in this form, and it is a question whether it is not the coronation name of a king, the name of the first cartouche including the syllable Ra, rather than the second name, as is the case with Menephtah.

Extensive researches on the calendar have been lately made by several scholars, and particularly by Brugsch, who, in his book written in 1865 (*Matériaux pour servir à la reconstruction du Calendrier des anciens Égyptiens*), had come to the conclusion that under the 12th dynasty the Egyptians used four different years—the vague year, the solar year, a lunar year, and a lunar year with intercalation. Quite lately, reverting to his former studies with the addition of a great number of new texts, and interpreting many of the mythological expressions which refer to astronomical facts, Dr. Brugsch discards several of the results which he advocated in his previous works, and brings forward conclusions which, if they can stand the test of a severe criticism, would certainly be a great progress in our knowledge of the Egyptian calendar. According to the new theory of the eminent Egyptologist, the principal facts would be the following.

The dates of all Egyptian monuments are given in the vague year of 365 days, which began originally with the heliacal rising of Sothis in the night of the 19–20 July. There are only two mentions of a fixed solar year with an intercalary day after four years, and both of them are later than the reform of the calendar made by the emperor Augustus and the introduction of the Alexandrian year. The correspondence of the vague year with a fixed year is indicated through the phases of the moon, the stations of the sun, the beginning of the seasons, and the rising of certain stars, particularly Sothis. The existence of a lunar year running parallel with the solar year, and which was used as well as the civil year for the dating of certain festivals, is with Dr. Brugsch an established fact. The eminent Egyptologist, although denying that there is any mention of the Sothiac cycle, quotes three inscriptions giving the rising of Sirius at a certain date of the vague year: of those dates one belongs to the 6th, another to the 18th dynasty, and the last to a Roman emperor at Esneh; they are evidently separated by the so-called *Arakotocras*, the period of 1461 years of the Sothiac

cycle; which would imply that this period was well known to the ancient Egyptians.

These few facts will show how difficult it is at present to reconstruct the chronological system of the Egyptians, the more so because there are evidently many expressions of which we do not yet know the real sense.

We are not much more fortunate with historical chronology. Our best materials for establishing it are the lists of kings, the most important of which is contained in the Papyrus of Turin. It is written in hieratic characters, very likely under the reign of Ramses III. of the 20th dynasty. It consisted of ten columns of text giving the names of all the kings, from the gods or heroes down to the time of the Hyksos, with the number of years, months, and days which they had reigned; at the end of each dynasty the numbers were summed up. This document, which contained more than 200 names, and which would be invaluable for the reconstruction of historical chronology, is unfortunately broken into 164 pieces. A few larger portions have been put together, but a running text cannot be restored.

There are some other lists on different monuments: the largest is the list of Seti I. in the temple of Abydos, giving 75 names of predecessors of Seti I., the first being Mena. Although this list is of great value for the sequence of the kings, it is far from being complete. Apart from the Hyksos, who are entirely omitted, it is certain that Seti has made a choice between his ancestors, and has neglected those whose reigns were very short or inglorious. This list was copied by the son of Seti I., Ramses II., in the same temple of Abydos. The fragments of his copy have been brought to the British Museum.

Further, we have the list of Sakkarah, which comes from the tomb of an officer called Tounari; it contains only 47 names, begins with the sixth king of the 1st dynasty, and is less reliable than that named above, as the scribe has evidently shown some carelessness in the way he copied his original. It belongs also to the time of Ramses II. There are several others of minor importance.

According to tradition, the lists of kings preserved in the temples were used as documents by a Sebennytic priest called Manetho, who wrote under Ptolemy Philadelphos, and by his command. He is said to have written three books on *Ἀἰγυπτιακὰ βρομύματα*. This work was not noticed by the Greeks, and particularly not by Diodorus; but the Christian chronographers and Josephus have made great use of it, and we know Manetho only through their writings. Josephus gives us a few fragments, but the lists of dynasties are known by the extracts of Africanus quoted by Syncellus and those of Eusebius. It is therefore hardly possible to say that we have the text of Manetho himself, as it has mainly come to us third hand. Manetho divided the history of Egypt down to the Ptolemies into thirty dynasties, the thirty-first being the Persians; for each dynasty he gives the names of the kings and the number of years they reigned. It was long supposed that Manetho would be a sound basis for the reconstruction of Egyptian chronology. However, it has proved not to be so. Wherever we

can check his dates by monumental evidence, there is a considerable difference between his numbers and those of the Egyptian inscriptions, and that chiefly for the time previous to the 20th dynasty. Admitting all his dynasties to have been successive, Mena, the first king, would have to be placed in the year 5613 B.C. On the other hand, a passage of Syncellus says that Manetho reckoned the length of the history of Egypt as 3555 years from Mena to the conquest under the Persian king Ochus; which would place the beginning of the first reign in the year 3892. Lepsius lays a great stress on this passage, which he considers as taken from the original Manetho, while others think that it is derived from a book called *Sothis*, which was falsely attributed to Manetho. In order to make the lists of the kings coincide with this sum, Lepsius has admitted that several of the dynasties must be considered as having reigned simultaneously. It is certain that the nearly total absence of monuments of the 7th to the 10th dynasties and the great gap of the Hyksos' time may justify such an assumption. However, there is hardly any evidence of collateral dynasties in the inscriptions, and, besides, we know many names of kings who are not mentioned by Manetho.

It is easy to understand that with such scanty and unreliable information there is considerable difference of opinion among Egyptologists as to the dates, chiefly for the Old and the Middle Empire. After the 18th dynasty we have some synchronisms which help us, to a certain degree; the date of the Exodus, which historical proof shows to have taken place very soon after Ramses II.; and the capture of Jerusalem by Shishak (Sheshonk I.).

* See Lepsius, *Königsbuch der Aegypter*.

The following table gives the date of the beginning of each dynasty according to the view of three of the leading Egyptologists. It is to be remarked that, as has been said before, the system of Lepsius starts from the datum which he considers as Manethonian, that the whole duration of the Egyptian empire was 3555 years. Mariette (*Aperçu de l'Hist. Anc. de l'Égypte*) merely sums up the numbers of Manetho, while Brugsch alone has a chronological system which is given here from his last History of Egypt* (Leipzig, 1877).

25. *History.*—We shall now give a short sketch of the history of Egypt, insisting chiefly on the general features, and on the facts connected with Scripture.

The early age, as we know from Manetho and the Turin Papyrus, is mythological. The gods were considered as having reigned over the country, even Set himself; and the duration of each dominion was assigned in the papyrus. After the gods came the age of the Shesn-Hor, the followers of Horus, who are said to have helped Horus in his conquest of Egypt from Set. The time of the followers of Horus is mentioned in the texts as what we should call the *prehistoric age*.

The first historical king is called by the inscriptions Mena. We have no Egyptian inscriptions concerning him, only the mention of his name; but the Greek authors speak of him. By them he is said to have left This (near the present town of Girgeh), and to have founded Memphis on a spot which he gained from the Nile

through changing the bed of the river by means of a dyke. Diodorus relates (i. 45) that he taught his subjects how to worship the gods and to offer sacrifices, and besides how to make tables and beds and use precious clothing, and to introduce into their life all kinds of luxuries. Thus he seems to have been the first sovereign who, if he did not introduce civilisation in the country, at least did very much to further it. It is quite possible that his work consisted in uniting under his sceptre districts which were under the dominion of different rulers, and in making thus one kingdom. It is a difficult question, which very likely will never be solved, how far the Egyptians were civilised before Mena, and how long it took them to reach that point. This question is intimately connected with that of the origin of the Egyptians. It has been said above that most of the historians are of opinion that they came into the country through the isthmus of Suez, and not from Ethiopia, as is said by Herodotus, because the most ancient monuments are found near Memphis; and that, on the contrary, on the Upper Nile there is nothing except of a very recent date. However, it may be observed that civilisation does not always go parallel with the migrations of nations. In the Egyptian tradition everything points to a migration from the South, as if they had come from Asia through Arabia, crossing the Red Sea; and particularly the fact that Mena himself, a native of This, has to go north a great distance in order to found Memphis near the point of the Delta. As that part of the country has always been called Typhonian, it indicates that it was occupied by a population of foreign race. Memphis, in Egyptian Mennefer, the *god building*, was celebrated for its temples of Phtah and of the bull Apis, of which the burial-place has been found. Besides erecting these temples, Mena is described as a warlike king who fought the Libyans; but he was killed by a hippopotamus, which is perhaps a mythical way of saying that he perished in a war against the Shemites.

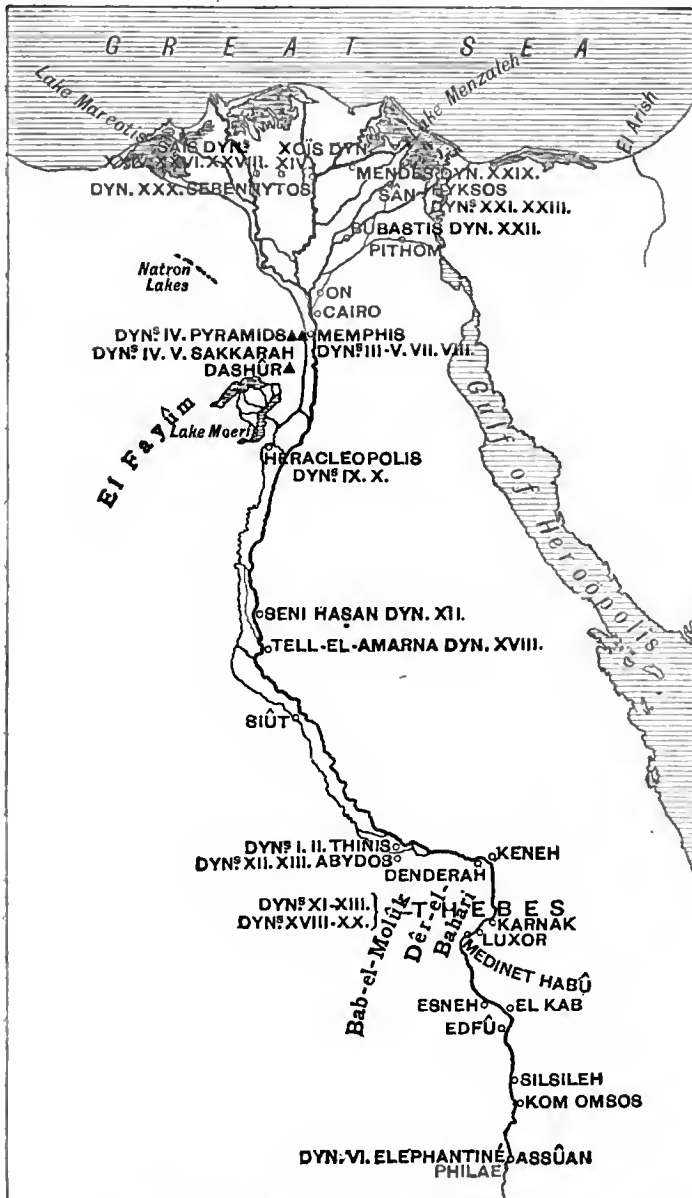

The succession of kings has been divided into three periods: the Old Empire, which reaches from the 1st to the 10th dynasty; the Middle Empire, which comprises the 11th and following dynasties, to the end of the Hyksos period; and the New Empire, which goes down to the conquest of the country by the Persians.

The monuments, except the lists of kings, are silent on the first three dynasties; but suddenly there is a great number of those of the fourth dynasty, in the time of which the prosperity of Egypt increased considerably. The kings of the Pyramids raised Egypt to a very high degree of civilisation, which has hardly been surpassed later. The first of them, Snefru, fought the natives of Sinai, and probably was the first to make use of the mines of copper and turquoise which are found in the peninsula. His son Khufu, was the builder of the Great Pyramid. He also made war against the Shemites of Sinai. A tradition which lasted down to the time of the Ptolemies attributes to him the plan of the temple of Hathor at Denderah. But he is chiefly famous for the construction of the Great Pyramid, that gigantic monument which has been the object of wonder to all generations.

* Since Brugsch wrote his history, his recent discoveries will probably modify his numbers. As he refers to the reign of Thothmes III. the astronomical coincidence of the stone of Elephantine, which falls in the years 1477–1474, this lowers his numbers by about 126 years.

His successor, Khafra, followed his example, and also Menkaura, who reigned after them. These three kings are the constructors of the three pyramids of Geezeh, which are most frequently visited.

It is a very common error to think that there are only the three pyramids of Geezeh, and that this is a kind of construction which was special to those three kings. On the whole ridge of the desert which goes from Meydoom to Abou Ruash,

Outline Map of Egypt, showing the seat of the Dynasties.

a length of more than twenty miles, are scattered pyramids which amount to nearly a hundred, besides probably a considerable number which have disappeared. They differ very much in size, but they originate from a religious idea which induced the sovereigns to choose that

particular kind of burial. The pyramids stand in one vast cemetery, where thousands of dead were buried, not only from Memphis, but also from other neighbouring cities. This fact alone would make it probable that they were intended to be tombs; besides, all inscriptions

which mention pyramids speak of them as funeral monuments, and this form is represented on papyri of a much later epoch as the abode in which the mummy was placed. It would be extraordinary that all the hidden wisdom which, according to new theories, lay concealed in the proportions of the Great Pyramid should be a privilege of which all the others would be entirely deficient. These facts, and others on which it is not possible to dwell, have induced Egyptologists unanimously to discard entirely the ideas which have been brought forward lately about the purpose of the Great Pyramid, or which consider it as an observatory; not to speak of the opinion which supposes all the pyramids to have been built in order to prevent the sand from covering the valley of the Nile.*

Let us remember the fundamental principle of Egyptian eschatology: the body is to revive in the Ament, but on condition that it should not be dissolved, and that it should be preserved at any price from corruption or violation. Nearly everywhere in antiquity the tomb of the chief, the tomb which is to be respected, is a tumulus covering a chamber or a coffin. The peculiar circumstances in which Egypt was placed prevented the inhabitants from using the mere mound as a burial. If it had been in the valley, the inundation would have washed it off; or had it been made of sand in the desert, the wind would soon have blown it away. That is why they made it of stone. A pyramid is a much improved tumulus, but its purpose is the same.

All around the pyramids, the chief officers of the kings have been buried in tombs cut in the rock. The funeral chamber which contained the mummy is generally at the bottom of a deep shaft, which has been filled up, so that the coffin was held to be absolutely safe. The upper chambers, in which offerings were made to the deceased, are adorned with fine reliefs, which give us a picture of what is considered to be in the other life. We have thus by means of these representations an idea of what was the state of Egypt at that time. As the picture is funeral, it is necessarily incomplete, but we derive from it very much information on the state of the country, on the customs of the inhabitants, on their industry, on their way of life, on their art. It is remarkable that art in certain respects had reached a degree of perfection beyond which it would not advance; it is more free than later, nearer to nature, less conventional. At that time the turn of mind of the Egyptians was less mystical than later. Their representations of future existence are nothing but the pictures of a rich and prosperous life in this world. Properly religious texts are never found except in the pyramids themselves.

Though we do not know much of the history of Snefru, Khufu, Khafra, and Menkaure (Menkheres), the chief kings of the 4th dynasty, their constructions show that they were powerful sovereigns. They were the first conquerors. We know the names of the kings of the 5th dynasty and the pyramids of most of them. The 6th is said to have come from Elephantine; the most eminent of the kings is Pepi, who made war against the Herusha, who very likely

were a Semitic nation, and against several of the negro clans or tribes. He was also the founder of the temples of Tanis and Bubastis. The last ruler of the dynasty was Queen Nitocris, to whose name the Greek authors have fastened legends which are not attested by the Egyptian documents.

The most complete obscurity reigns over the four next dynasties till the end of the 10th. According to Manetho, the first two were Memphitic, while the last two came from Heracleopolis. We cannot control these data from the monuments, having only the lists and the very fragmentary information derived from the Papyrus of Turin. Excavations made at Heracleopolis (Hanes, *ls. xxx. 4*), the present Ahnâ el Medîneh, would perhaps throw some light on that dark period.

The monuments agree with Manetho in giving to the 11th dynasty a Theban origin. The sovereigns of this dynasty, of which the exact order is unknown, are called Antef and Mentuhotep: the Antefs were buried at Thebes. It is doubtful whether there was not at the same time a rival line at Heracleopolis. Under the last king, Sankhkara, we see the first naval expedition of which we have any record. A fleet is sent to the land of Punt, the Somali coast, to fetch frankincense.

The 12th dynasty is very well known, owing to the great number of documents which have been left. These kings were the founders of the great temple of Amun at Thebes, and since their age Thebes became the capital of the Egyptian empire. The Amenemhas and Usertesen were warlike princes; they directed their efforts chiefly against the negro nations; they extended the limits of their kingdom into Nubia, as far as Dongola; they had also to fight the Libyans and the Herusha; besides, they made great constructions: they enlarged the temple of Tom at Heliopolis, of which one of the obelisks yet stands, bearing the name of Usertesen I., the second ruler of the dynasty; they enlarged also the temple of Tanis (Zoan), the entrance hall of which was adorned with the statues of almost all these kings. To the sixth king, Amenemha III., is attributed the digging of Lake Moeris, a large artificial basin at the entrance of what is now called the Fayoom, the purpose of which was to regulate the waters of the inundation. When the Nile was very high, a great quantity of water was gathered there, which could be used for inundating the country around when the Nile was low. The site of Lake Moeris is much discussed; its restoration has been strongly advocated. Near the lake was situated the city of Shet, called by the Greeks Arsinoë, and now Medinet el Fayoom. Another construction of Amenemha was the temple described by Herodotus as the Labyrinth, some remains of which Lepsius discovered near the village now called Howâra. A literary document of the 12th dynasty is the curious tale of Saneha, who relates how, leaving Egypt, he took refuge with the prince of Atima, who gave him his daughter; after many years spent there and successful wars Saneha returned to Egypt in the time of Usertesen I. This text gives us as interesting insight into the friendly intercourse which there was then between Egypt and the inhabitants of the Sinaitic peninsula. Of this

* Cp. the admirable book of Mr. Flinders Petrie, *The Pyramids and Temples of Gizeh*.

dynasty we have most beautifully painted tombs at Beni-Hassan, which depict the life and the customs of the Egyptians. One of them in particular, the tomb of the officer called Khnumhotep, who lived under Amenemha II. and User-tesen II., contains a most interesting picture, showing a Semitic family, numbering thirty-seven people, coming from the land of Abesha. That they are of Semitic origin is shown by their very characteristic type, by the name of Abesha, and by their being called Amu. The chief bows respectfully before Khnumhotep and presents him with a wild goat of the same kind as are found in Sinai; behind him are women and children riding on asses. The women wear garments of various colours, and carry musical instruments; it is said also that they bring with them a kind of balm for the eyes, called *mestem*. It is obvious that these Shemites desire to settle in the country, and that they are entrusted to the officer who has to take charge of them. This shows that the Semitic nations had then begun to advance into Egypt. They came at first peacefully and settled in the land, but such tribes or families were the forerunners of the Hyksos invaders, who for several centuries put an end to the Egyptian dominion.

The 13th dynasty was also Theban. The first sovereigns, the Sebekhoteps, of whom monuments are found as well in Nubia as at Thebes and at Tanis, certainly held the whole land under their sceptre, but we have not the complete list of these rulers, and still less of those of the 14th dynasty. We reach here the second great chasm in Egyptian history, the period of the Hyksos, the time when not the whole land, but certainly Lower Egypt, was subjugated by a foreign race.

Much has been written about the Hyksos, to whom very different origins have been attributed. As for the sense of their name, it is given correctly by Josephus; it means the Kings of the Shepherd: *shasu* (*shos* in demotic) is the usual word for nomads. The longest account of their invasion is given by Josephus, who relates, on the authority of Manetho, that, under the reign of a king called Timaios, men of unknown origin, coming from the East, invaded the country and conquered it easily without a struggle. After having subdued the kings, they burnt the cities, destroyed the temples, and behaved most cruelly towards the inhabitants, killing the men and reducing the women and the children to slavery. He goes on to say that one of their kings was Salatis, who resided at Memphis; then he names others: Beon, Apaknas, Apophis, Jannas, Asses, who are also quoted with variants by Africanus and Eusebius. The duration of their rule is said by Africanus to have been 284 years, and by Josephus 511, until they were expelled by a king called Misiaphramuthosis.

At present the scarcity of the monuments makes it guess-work to reconstruct the events which Josephus relates. We do not know exactly at what time the invasion took place; the end of the 13th dynasty and the 14th are a chaos from which we shall perhaps never be able to extricate ourselves. There must have been anarchy in the land; many of the so-called kings reigned only a very short time, considering the great number of names which have

been preserved by the Papyrus of Turin, most of which are only fragmentary. Generally the 14th dynasty is called Egyptian, while the pure Hyksos are the 15th and 16th. What was the origin of the Hyksos? They certainly belonged to a race different from the Egyptians. They have been called Phœnicians, Arabs, Elamites, Akkadians, and Cushites. Their name *Shasu* means only nomads of the same kind as those who often met with in the campaigns of the Pharaohs against Syria. It is not improbable that their invasion of Egypt is connected with the conquests of the Elamites in Babylonia, who drove out of the country the former inhabitants. Besides, Egypt, the rich and fertile land, has always been the object of the covetousness of the neighbouring nomads, especially in time of famine. It is certain that they occupied the Delta, and that their principal cities were Tanis, Bubastis, and Avaris (Tell el Her); their god was Set Baal, the worship of whom already existed at Tanis during the 14th dynasty, as a newly discovered monument has shown. Light has been thrown on the race to which the rulers of the Hyksos belonged by the monuments discovered at Tanis, and quite lately at Bubastis—sphinxes and statues, some of which bear the name of Apepi, while others very likely give his portrait. The type of face is not Egyptian; nor is it Semitic. The strongly modelled face, with high cheek-bones, the broad mouth with thick and projecting lips, the curved nose, reveal an Asiatic race, which must have had Turanian or Mongolian affinities. It is evident that though the Hyksos princes were not Shemites themselves, they were accompanied in Egypt by nations of that race which, already under the preceding Pharaonic dynasties, came in great numbers to settle in the country. The fact that the Hyksos came from Mesopotamia may have contributed to dispose their kings favourably towards Hebrews like Abraham or Jacob, and towards Mesopotamians who came to take shelter in their kingdom.

The great importance of the history of the Hyksos for biblical criticism is derived from the fact that the arrival of Abraham in Egypt and the history of Joseph must be placed during the time of their dominion. We have no reason to doubt the accuracy of Eusebius and Syncellus, who say that it was under Apophis (Apepi) that Joseph was raised to his high position. We know two kings of the name of Apepi, and we cannot decide to which of the two it refers—more likely to him whose name has been found at Tanis. The description of the Egyptian court as given by Genesis shows that the Hyksos were no more the semi-barbarous pillagers who first conquered the land, but that they had adopted most of the customs and the civilisation of their subjects. Nevertheless, the amalgamation between subduers and subdued had not taken place. Traces of their different origin still subsisted, and often appear in the narrative. For instance, the king shows to the new comers a good will which is not shared by his subjects. He himself does not seem to have against the shepherds the hatred which the Egyptians felt towards that class of men. The old antipathy between the two races was not extinct, and was to revive shortly afterwards when after successful wars the Hyksos were expelled, and a native dynasty again ascended the

throne. The history of Joseph must be placed towards the end of the Hyksos dominion (cp. Tomkins, *The Life and Times of Joseph in the Light of Egyptian Lore*). Parallel with the last Hyksos dynasty runs the 17th dynasty of Thebans, who are nearly all called Rasquen. They were the first to attack the Hyksos. A papyrus which, if not a historical document, must yet be based on a historical tradition, relates how one of those princes had a quarrel with Apepi; we do not know how it ended.

The conqueror of the Hyksos, who captured their fortified city, Avaris, was the Pharaoh Ahmes, as we know from the biography of one of his generals who had the same name. With him begins the most powerful dynasty of Egypt, the 18th. Under the reign of these sovereigns the empire reached its greatest extent, and rose to a degree of prosperity and riches which was never equalled afterwards. This and the beginning of the 19th dynasty are the time which is best known, and from which we have the greatest number of monuments.

After having driven out the Hyksos, Ahmes pursued them to the east as far as the city of

Sheruhan, in the south of Palestine (Josh. xiv. 6). When the whole empire was again united under his dominion, he directed his steps towards the south, and conquered Nubia. His successor, Thothmes I., followed his example; he began the campaigns in Syria, and went as far as Mesopotamia. After him came Thothmes II. and his famous queen and sister Hatahepsu, who made the great naval expedition to the land of Punt. She survived her husband, and associated with herself on the throne her younger brother Thothmes III., who was her successor, and who may justly be called the greatest of all the Egyptian kings. During a reign of nearly fifty-four years he carried successfully the arms of Egypt from the Third Cataract to the north of Syria, and at the same time erected a considerable number of temples which have been enlarged by his successors. The art of his time is probably the most perfect of the New Empire. It is not possible to give here the catalogue of all the cities and nations which he boasts to have conquered, and the names of which cover some of the pylons of Thebes. The Euphrates and the Mount Amanus were at that

The son of King Ramses II., with his charioteer. (Wilkinson.)

time the western and northern limits of the empire. The king of Naharain was beaten: Phoenicia and Cyprus were tributary to the king, who in several of his campaigns marched through Palestine. The Syrian nations are called in the inscriptions Retennu; Phoenicia is called Keft (Kaphtor). We see also the first mention of the Kheta, the Hittites, who afterwards became dangerous enemies to Egypt. In the lands Thothmes conquered he left garrisons, but he had constantly rebellions to put down, and it is doubtful how far his successors could have kept up such a vast empire. One of them, Amenhotep III., was a rather peaceful king, who erected several of the principal temples at Thebes, in particular that of Luxor. At the end of the 18th dynasty there was a kind of religious revolution: Amenhotep IV. tried to destroy the worship of Amon, and to replace it by that of the solar disk Aten; but he did not succeed, and, after a short time of anarchy, Horus, the last king of the dynasty, re-established the old worship.

In the 19th dynasty, although Egypt is still mighty, the decline begins to be felt: the second king, Seti I., fights the Shasu and the Kheta, the

Hittites, whose power had grown considerably, and who ruled over the north of Syria. He began one of the most marvellous constructions of Egypt, the great hypostyle hall of Karnak, which was the entrance to the temple of Amon at Thebes. His son, Ramses II., made several successful campaigns against the Kheta, which he caused to be related and celebrated in high-flowing words, even on the walls of the temples. But his reign lasted too long (sixty-seven years); and the honourable peace which he concluded with the Kheta in his twenty-first year shows how little subdued they had been. Besides, Egypt was exhausted by several centuries of war and conquest; and in spite of the vanity of Ramses II., and of his fancy for writing his name everywhere, it is easily discernible that the kingdom was weakened. Ramses II., according to chronological synchronisms, is the Pharaoh of the oppression. In Scripture one short sentence is the only information which we have concerning all that took place between the death of Joseph and the rise of the oppressor: "Now there arose up a new king over Egypt which knew not Joseph" (Ex. i. 8). The Hyksos had been expelled; an Egyptian dynasty occupied again the throne. It

is quite natural that they had no sympathy for a race which was kindred to their former rulers, and to the nations they were fighting in the East. They employed them as they did their prisoners; but when they grew very numerous, the Egyptian king felt alarmed at the increase of these foreigners, and the more so because he felt that they soon would be more powerful than himself. This caused him to oppress the Israelites [EXODUS]. The best proof of the decay of the Egyptian empire is the fact that, a few years after his coming to the throne, the son of Ramses II., Menephthah, had to struggle against a formidable coalition of Mediterranean nations who invaded Egypt, and pushed forward nearly as far as Memphis. The difficulties in which Menephthah was engaged favoured the escape of the Israelites, who went out from the land of Goshen, through the northern part of the Arabian Gulf.

The 19th dynasty ended in anarchy; the beginning of the 20th is obscure. One of the first rulers, Ramses III., succeeded in restoring to Egypt part of its former splendour; but his successors, who all bore the name of Ramses, seem to have been idle and incapable kings, who allowed the high priests of Amon to usurp the power more and more, until, after Ramses XII., the high priest Her-Hor put aside the Ramsesides and began a new dynasty.

It is still uncertain whether Her-Hor, the founder of the dynasty, was a Tanite himself; however, one of his successors, Pisebchan, has left important monuments at Tanis, and at the same time we know that these kings had also Thebes and Upper Egypt in their power. Very likely they inhabited more frequently their northern capital, leaving the high priests of Amon to govern at Thebes. There is much uncertainty as to the order of succession and the length of their reigns; but it must be the last of them, Horpisebchan, who gave his daughter to Solomon, and who conquered for him the city of Gezer, which he gave as dowry to his daughter (1 K. ix. 16). It is also to one of the Tanite princes that Hadad fled (1 K. xi. 14), the Edomite who attained such a high position at the Egyptian court, which he left in order to retaliate on Solomon what David had done to his country.

With Jaro-boam we meet with the name of the first king of the 22nd dynasty, Sheshonk, or as Scripture calls him, Shishak (1 K. xi. 40), a chief of Libyan mercenaries, who came to the throne probably owing to military usurpation, but who legitimated the title of his family by giving a princess of royal blood as wife to his son and successor. In the fifth year of Rehoboam he invaded the kingdom of Judah, took Jerusalem, pillaged it, and carried away the treasures of the Temple (1 K. xiv. 25; 2 Ch. xii. 2). He recorded on the walls of the temple of Amon at Thebes this successful campaign, in which he took a considerable number of cities or villages of Judah and Israel, these latter mostly Levitical. The expedition of Shishak had no lasting result for Egypt. His successors, who bore the names of Osorkon, Sheshonk, and Takeloth, were engaged in wars with the east, and had some difficulty in defending their throne against foreign invaders. The second king, Osorkon I., may have been the Zerah of the Bible who invaded Palestine with a large army,

perhaps in the hope of following up the victories of his father (2 Ch. xiv. 9-13), but who was thoroughly beaten by king Asa. However, it is possible that he may have been only one of the generals of the king.

The 23rd dynasty began with kings of the same family, but then the Ethiopians of Napata, headed by their king Piankhi, invaded Egypt. He conquered the whole land, established governors in the principal cities, and returned to his capital. The 24th dynasty consists of one king only, Bocchoris, *Bek en renf*, of whom we have few monuments, and whom we know chiefly through the legends of the Greek authors. During the 25th dynasty Ethiopians again occupy the throne, but then we have other information than the Egyptian inscriptions: we have the records of the Assyrian campaigns against the Pharaohs.

The first king of the 25th dynasty, Shabaka, is called *Sea* in Scripture (A. V. and R. V. "So") and *Shabe* in the Assyrian texts. Hoshea, king of Samaria, sent messengers to him (2 K. xvii. 4) when Sennacherib had made him his tributary. The discovery of this treachery caused the Assyrian king to put Hoshea in prison, where he died. Shabak did not move in order to prevent the capture of Samaria by Sargon; his army was next routed at Raphia on the coast of the Mediterranean, and he also became vassal to the Assyrians. Under his son Shabatak, Sargon, the victor of Shabak, died, and was succeeded by Sennacherib. Shabatak himself, after having one of his armies beaten at Altaka by the Assyrian monarch, was put aside and killed by the Ethiopian conqueror Taharka, or, as Scripture calls him, Tirhakah (2 K. xix. 9; Is. xxxvii. 9). This valiant and persevering adversary of the Assyrians began his career by making a treaty with Hezekiah, an act which very likely brought upon Egypt the invasion of Esarhaddon, Sennacherib's son. Tirhakah was beaten and fled to Ethiopia; the Assyrians went as far as Thebes, and divided the country between twenty princes, one of whom was Necho, prince of Saïs. Soon after Esarhaddon's death, Tirhakah again invaded Egypt, and conquered it in the 24th year of his reign; but he could not resist Assurbanipal, and was obliged to fly again to Ethiopia. Thebes was taken by Assurbanipal, who re-established the twenty princes and returned to Nineveh. Shortly afterwards the governors entered into an alliance with Tirhakah, who, for the second time, swept down the valley of the Nile and conquered Memphis; but he soon retired to Ethiopia, where he died. His son Urdamane, or Nut Amen, as the Egyptian inscriptions call him, succeeded him; he put to death Necho, prince of Saïs, but he was obliged to retire before Assurbanipal, who again captured Thebes, which he boasts to have sacked and destroyed. Then the princes were once more re-installed, and Egypt was for a few years tributary to Assyria (cp. Nah. iii. 8-10).

One of the most energetic of the petty kings, Psammetik I., son of Necho, taking advantage of the fact that towards the end of the reign of Assurbanipal the power of Assyria was much diminished, succeeded, with the aid

^a The LXX. call this king *Zad*, *Zov*, and *Zyrop*: the Vulg. *Sua*.

of Ionian and Carian mercenaries, in subduing his rivals, and in becoming sole master of Egypt, which reached its former limits; he ventured even as far as Ashdod in the land of the Philistines. Psammetik I. was the founder of the 26th dynasty; he was a warlike king, but his power depended chiefly on his northern mercenaries, who from this time play an important part in the history of Egypt. Under the Saite kings there was a kind of revival in Egyptian art; we have many monuments of that period which show that the artistic traditions had not been lost during the great troubles Egypt had gone through. After he had reigned fifty-four years Psammetik was succeeded by Necho, who followed the traditions of his father, favoured the establishment of foreigners, especially of Greeks, in the country, and encouraged trade by opening again the canal which went from the Nile to the Red Sea. Nineveh was no more; it had been destroyed by the Medes. Babylon had risen in its stead under the mighty ruler Nabopolassar. Necho, wishing to restore to Egypt its old conquests, and understanding that Babylonia was his hereditary enemy, asked the king of Judah, Josiah, to allow him to go through his country, but Josiah tried to oppose him, and was killed at Megiddo (2 Ch. xxxv. 20-36; 2 K. xxiii. 29-35). The land became tributary to Necho, who did not recognise the new king, Jehoahaz, son of Josiah, but replaced him by his brother Eliakim, to whom he gave the name of Jehoiakim. Necho seems at that time to have been master of a great part of the territory which had been conquered by Ramses II.: his kingdom extended as far as Mesopotamia; but he had hardly returned to Egypt when Nebuchadnezzar marched against him. The two armies met at Carchemish. Necho was thoroughly routed and fled to Egypt; he lost all his Syrian conquests, and was so much weakened that he did not stir in order to come to the rescue of Jehoiakim when the latter was attacked by Nebuchadnezzar. The Babylonian conqueror did not follow Necho into Egypt; he was recalled to Babylon by the death of his father. Necho died two years afterwards. His successor, Psammetik II., was chiefly engaged in wars against Ethiopia. After him Uahabra, Apries, Hophra (Jer. xlv. 30), began with great successes: he beat the fleets of Cyprus and the Phoenicians, and conquered the coast of Syria, where the Jews had revolted (Jer. xxxvii. 5-11). But hearing that Nebuchadnezzar drew near, he fell back without helping Zedekiah, king of Jerusalem. The city was finally taken by the Babylonians, and the people carried to Babylon in 588 B.C.; a considerable number of Jews migrated to Egypt, and settled not only in the Delta, but even in Upper Egypt. Nebuchadnezzar was detained by the siege of Tyre, but at the end of the reign of Apries the king of Babylon invaded Egypt; however, it was a mere plundering expedition: no trace of the Babylonian dominion remained in Egypt when Amasis filled the throne with distinction during thirty-eight years. During his time the Persian empire of Cyrus had put an end to the second Chaldaean empire, and Cyrus had begun his conquests, which were soon to extend as far as Egypt. The Greek tradition says that Amasis excited the animosity of Cambyses, who marched into Egypt

and besieged the king, Psammetik III., in his citadel of Memphis. The city was taken, the king made prisoner, and, after an attempt at rebellion, cruelly put to death. From that time Egypt was a province of the Persian empire; her national history is only the narrative of her fruitless endeavours to free herself from the Persian rule.

Cambyses is described by the Greek authors as having been a cruel and unmerciful king to the Egyptians, in spite of all that he did for the goddess Neith at Saïs, which is related to us by one of his officers, called Uzahor en piris (Brugsch). No doubt, after his unsuccessful expeditions to the Oasis of Amon and to Ethiopia, his tyranny went beyond all bounds. Darius was a much milder sovereign: he re-established the worship of the gods, built some important temples, like that of the Oasis of El Khargeh, and worked at the canal of Necho. He came to Egypt himself, and put to death the satrap Aryandes, who by his cruelty had caused the Egyptians to revolt. But the spirit of independence was not extinct in the inhabitants, who, taking advantage of the defeat of Darius at Marathon, revolted under Khabbash, who reigned two years, as we know from the inscription on one of the bulls Apis. Xerxes reconquered the land easily before starting for his Greek campaign. When in 464, after the murder of Xerxes and his eldest son Darius, Artaxerxes ascended the throne, he had to put down a new rebellion headed by the Libyan king Inaros, who had secured the support of the Athenians. Inaros was at first victorious, and beat the satrap Achaemenes at Papremis, but next year a large army of Persians raised the siege of Memphis, destroyed the Athenian fleet, and brought Inaros to Persia, where he was put to death. His Egyptian ally, Amyrtaeos, fled to the marshes.

The 28th dynasty consisted of one single king, a Saite, Amyrtaeos, who succeeded for a short time under Darius II. in conquering Egypt; but his own mercenaries put him aside and chose as their ruler a native of Mendes, called Napherites, who was the first prince of the 29th dynasty. All the five princes who form this dynasty had but short reigns, except the second, Hakar, Acoris, who allied himself to Euagoras, king of Cyprus, and succeeded in beating the Persians. The last of them, Napherites II., was killed by his soldiers, who made king *Nekhtorheh* or Nectanebo I., a Sebennyte, the head of the last dynasty. Under his rule there was a kind of resurrection of the power of Egypt. *Nekhtorheh* successfully resisted the attack of Pharnabazus and Iphicrates. During his reign of eighteen years not only did he constantly fight the Persians, but he built considerably in all parts of Egypt, at Thebes as well as at Bubastis, Pharbaethus, Sebennytus, and Pithom. His successor, Teos, tried to fight the Persians in Syria with the help of Agesilaos, but he was driven out of Egypt by the rebellion of the army. Nectanebo II. (*Nekhtnebef*) ascended the throne, but in spite of successes at the beginning he could not hold his ground against the energy of Artaxerxes Ochus, and he was compelled to fly to Ethiopia. He was the last Egyptian Pharaoh; after him Egypt again became a Persian satrapy, and, like the whole

empire, was conquered by Alexander. It is a striking commentary on the words of Ezekiel—"there shall be no more a prince of the land of Egypt" (Ezek. xxx. 13)—that since Nectanebo II. no native ruler has ever reigned over the land of Egypt.

26. *Egyptology*.—It is not possible to give here a list of the works which have been published on ancient Egypt: since Champollion's discovery, Egyptian studies have largely developed, and the number of Egyptologists increases constantly. In France, after Champollion's death, Egyptology was represented only nominally by Charles Lenormant, until it revived with V^e Emmanuel de Rougé, who was soon followed by Mariette, Chabas, Maspero, Lefebvre, Pierret, Révillont, Gréhaut, V^e Jacques de Rougé, Robiou, Bouriant Guieysse, and Loret. In Germany the founder of Egyptology was Lepsius, and all the present scholars may be considered as his disciples: Brugsch, Duemichen, Ebers, Eisenlohr, Erman, Stern, Abel, Lauth, Lincke, Meyer, Pietschmann, and Wiedemann. In England Dr. Birch was for some years between Champollion and Lepsius the only representative of Egyptology, with the distinguished traveller, Sir Gardner Wilkinson; the other English scholars are Bonomi, Sharpe, Goodwin, Le Page Renouf, Reginald Stuart Poole, Lushington, Canon Cook, Rev. H. C. Tomkins, Miss Amelia B. Edwards, Flinders Petrie, and F. L. Griffith. Every country in Europe has now its Egyptologists: in Holland are Dr. Leemans and Dr. Pleyte; in Sweden, Dr. Lieblein and Dr. Piehl; in Austria, Dr. Reinisch, Dr. von Bergmann, and Dr. Krall; in Russia, Golenischeff; in Switzerland, Ed. Naville; in Italy, the country of Rosellini, the friend of Champollion, are now Rossi, Schiaparelli, and Lanzone. We must refer to the works of these authors, who have studied Egypt in all its aspects, as well as to the museums, of which the most important are the British Museum, the Louvre, the museums of Berlin, of Turin, of Leyden, of Florence, and of Gezebe. [E. N.]

EGYPTIAN (מִצְרַיִם, masc.; מִצְרַיִת, fem.; Αἰγύπτιος, Αἰγυπτία; *Aegyptius*), **EGYPTIANS** (מִצְרַיִם, masc.; מִצְרַיִת, fem.; מִצְרַיִם: Αἰγύπτιοι, γυναῖκες Αἰγυπτίου: *Aegyptii, Aegyptiae mulieres*). Natives of Egypt. The word most commonly rendered Egyptians (Mitzraim) is the name of the country, and might be appropriately so translated in many cases. [W. A. W.]

On the "Egyptian" leader of "murderers," with whom the chief captain confounded St. Paul (Acts xxi. 38), see Josephus (*B. J.* ii. 13, § 5; *Ant.* xx. 8, § 6; and note in *Speaker's Comm.* on Acts, l. c.). [F.]

E'HI (אֶחִי = brother or brotherly; BA. 'Αγχελς, D. -ειν; *Echi*), head of one of the Benjaminite houses according to the list in Gen. xli. 21, and son of Belah according to the LXX. Version of that passage. He seems to be the same as Ahi-ram, אֶחֱרָם, in the list in Num. xxvi. 38; and if so, *Ahiram* is probably the right name, as the family were called *Ahiramites*. In 1 Ch. viii. 1, the same person seems to be called אֶחֱרָם, Aharah, and perhaps also אֶחֱרָם, Ahoah, in v. 4, (B. 'Αχλα, A. om.), אֶחֱרָם (B. 'Αχσιδ), Abiah,

v. 7, and אֶחֱרָם (B. 'Αέρ, A. 'Αόρ), Aber, 1 Ch. vii. 12. These fluctuations in the orthography seem to indicate that the original copies were partly effaced by time or injury. [BECHER; CHRONICLES.] [A. C. H.]

E'HUD (אֶחָד; Joseph. 'Ηουδής; *Aod*), like Gera, an hereditary name among the Benjamites.

1. Ehud, the son of Bilhan, and great-grandson of Benjamin the Patriarch (1 Ch. vii. 10 [B. 'Αδδ, A. 'Αμδ]; viii. 6 [B. 'Αδδ, A. 'Ωδ]).

2. Ehud (BA. 'Αδδ), the son of Gera (אֶחָד; *Ἡνδ*; *Gera*: three others of the name, Gen. xli. 21; 2 Sam. xvi. 5; 1 Ch. viii. 3), of the tribe of Benjamin (Judg. iii. 15, marg. "son of Jemini," but *vid.* Gesen. *Lec.* s. v. יִמְיִי; R. V. "the Benjamite"), the second Judge of the Israelites. In the Bible he is not called a Judge, but a "deliverer" (l. c.; R. V. "Saviour"): so Othniel (Judg. iii. 9) and all the Judges (Neh. ix. 27). As a Benjamite he was specially chosen to destroy Eglon, who had established himself in Jericho, which was included in the boundaries of that tribe. [EGLON.] In Josephus he appears as a young man (*νεανίας*). He was very strong, and left-handed (see *Comm.* in loco). This enabled him to draw unobserved the dagger from his right thigh (Judg. iii. 21). For Ehud's adventures see EGLON; and for the period of eighty years' rest which his valour procured for the Israelites, see JUDGES. [T. E. B.] [F.]

E'KER (אֶכָר; 'Ακόρ; *Achar*), a descendant of Judah through the families of Hezron and Jerahmeel (1 Ch. ii. 27). [G.]

EK'REBEL (Εκρεβήλ; Pesh. אַכְרַבֵּל, *Ecrabat*; Vulg. omits), a place named in Judith vii. 18 only, as "near unto Chusi, that is on the brook Mochmur;" apparently somewhere in the hill-country to the south-east of the Plain of Esdraelon and of Dothain. The Syriac reading of the word points to the Talmudic עֲקֵרְבַת and the place *Acrabbein*, mentioned by Eusebius in the *Onomasticon* (*OS.*² p. 214, 61) as the capital of a district called *Acrabattine*, and still standing as 'Akrabeh, 8 miles from *Nāblus* (Shechem), at the mouth of a pass on the Roman road to the Jordan valley (*PEF. Mem.* ii. 386, 389). Though frequently mentioned by Josephus (*B. J.* ii. 20, § 4; iii. 3, § 5, &c.), neither the place nor the district is named in the O. T., and they must not be confounded with those of the same name in the south of Judah. [AKRABBITM; ARABATTINE; MAALEH-AKRABBIM.] [G.] [W.]

EK'RON (עֶקְרוֹן = uprooting, cp. Zeph. ii. 4, and note ^b next page; Ἀκκαρών; *Accaron* in Josh. xix. 43, *Acron*), one of the five towns belonging to the lords of the Philistines, and the most northerly of the five (Josh. xiii. 3). Like the other Philistine cities, its situation was in the *Shefelah*. It fell to the lot of Judah (Josh. xv. 11, 45, 46; Judg. i. 18), and indeed formed one of the landmarks on his north border, the boundary running from thence to the sea at JABNEEL (*Yebnah*). We afterwards, however, find it mentioned among the cities of Dan (Josh. xix. 43). But it mattered little to which tribe it nominally belonged, for before the monarchy it was again in full possession of the Philistines (1 Sam. v. 10). Ekron was the

last place to which the ark was carried before its return to Israel, and the mortality there in consequence seems to have been more deadly than at either Ashdod or Gath.* From Ekron to BETHSHEMESH was a straight highway. Henceforward Ekron appears to have remained uninterruptedly in the hands of the Philistines (1 Sam. xvii. 52; 2 K. i. 2, 16; Jer. xxv. 20). Except the casual mention of a sanctuary of Baal-zebub existing there (2 K. i. 2, 3, 6, 16), there is nothing to distinguish Ekron from any other town of this district—it was the scene of no occurrence, and the native place of no man of fame in any way. The following complete the references to it: 1 Sam. vi. 16, 17, vii. 14; Amos i. 8; Zeph. ii. 4; Zech. ix. 5, 7.

According to the Assyrian inscriptions, when most of the towns in Palestine revolted, on the death of Sargon, Padi, king of Ekron, remained faithful. His subjects, however, rebelled and handed him over to king Hezekiah, at Jerusalem, who retained him a prisoner until he was released and reseatd on the throne by Sennacherib. In the reign of Esarhaddon, the king was Ikanan or Ikasmanu (Schrader, *KAT.* p. 164). Eusebius (*OS.* p. 218, 57) calls it a large village inhabited by Jews. In the Middle Ages it was known by the same name (see the quotation in Rob. ii. 228, note).

'*Akir*, the modern representative of Ekron, lies at about 5 miles S.W. of *Ramleh*, and 4 due E. of *Yebnah*, on the northern side of the important valley *Wady Surir*. "The village contains about fifty mud houses, without a remnant of antiquity except two large finely-built wells." The plain south is rich, but immediately round the village it has a dreary forsaken appearance, only relieved by a few scattered stunted trees (Van de Velde, ii. 169; Rob. ii. 228; Guérin, *Judée*, ii. 36–44). In proximity to Jabneh (*Yebnah*) and Bethshehem (*'Ain Shems*), '*Akir* agrees with the requirements of Ekron in the O. T., and also with the indications of the *Onomasticon* (s. v. Accaron). Jerome (*OS.* p. 91, 6) mentions a tradition that the Turris Stratonia, Caesarea, was Ekron.

In the Apocrypha it appears as ACCARON (1 Macc. x. 89, only), bestowed with its borders by Alexander Balas on Jonathan Maccabaeus as a reward for his services. [G.] [W.]

EKRONITES, THE (עֲקֵרֹנִי, עֲקֵרֹנִי; B. δ

'Ακκαρωνίταις, B^A. -νι- [Josh.]; B. of 'Ασκαλωνίται, B^A. -νι- [Sam.]; Accaronitae, the inhabitants of Ekron (Josh. xiii. 3; 1 Sam. v. 10). On the LXX. reading in Sam. I. c., cp. EERON, note *. [W. A. W.] [F.]

ELA ('Hād; Jolaman), 1 Esd. ix. 27. [ELAM.]

* The LXX. in both MSS. and Josephus (*Ant.* vi. 1, § 1) substitute Ascalon for Ekron throughout this passage (1 Sam. v. 10–12, vii. 16). In support of this it should be remarked that, according to the Hebrew text, the golden trespass offerings were given for Aekelon, though it is omitted from the detailed narrative of the journeyings of the ark. There are other important differences between the LXX. and Hebrew texts of this transaction (see especially v. 6; consult Keil and Wellhausen in loco).

† There is a play on the meaning as well as on the sound of the name in this verse.

ELA'DAH (עֵלָדָה) = *God hath adorned*; B. Aaahā, A. 'Eledā; *Elada*), a descendant of Ephraim through Shuthelah (1 Ch. vii. 20).

ELAH. 1. (עֵלָה) = a *terebinth*: 'Hād; Joseph. 'Ηλαος; *Ela*), the son and successor of Baasha, king of Israel (1 K. xvi. 8–10); his reign lasted for little more than a year (cp. v. 8 with v. 10). He was killed, while drunk, by Zimri, in the house of his steward Arza, who was probably a confederate in the plot. This occurred, according to Josephus (*Ant.* viii. 12, § 4), while his army and officers were absent at the siege of Gibbethon.

2. Father of Hoshea, the last king of Israel (2 K. xv. 30; xvii. 1).

3. (עֵלָה; 'Hāās; *Ela*), one of the dukes of Edom (Gen. xxxvi. 41; 1 Ch. i. 52). On the supposition that this and other names in Gen. xxxvi. 40–43 represent district-names, Knobel, Dillmann,* and Delitzsch [1887] (in loco) compare the name with Elath (*Adā*) on the Red Sea (Gen. xiv. 6).

4. Shimei ben-Elah (accur. *Ela*, נֶשֶׁן; 'Hād) was Solomon's commissariat officer in Benjamin (1 K. iv. 18).

5. (B. 'Aḏā, A. 'Aād), a son of Caleb the son of Jephunneh (1 Ch. iv. 15). His sons were called Kenaz (A. V.); but the words may be taken as if Kenaz was, with Elah, a son of Caleb (R. V. see *QPB.*). The names of both Elah and Kenaz appear amongst the Edomite "dukes."

6. (B. om., A. 'Hād), son of Uzzi, a Benjamite (1 Ch. ix. 8), and one of the chiefs of the tribe at the settlement of the country. [G.] [F.]

E'LAH, THE VALLEY OF (עֵלָה עֲרֵב

= *Valley of the Terebinth*; ἡ κοιλάς 'ΗΛΑ, or τῆς θρύος, once ἐν τῇ κοιλάδι; *Vallis Terebinthi*), a valley in (R. V.; not "by," as in A. V.) which the Israelites were encamped against the Philistines when David killed Goliath (1 Sam. xvii. 2, 19). It is once more mentioned in the same connexion (xxi. 9). It lay near SOCOH, *Shuweikēh*, and AZEKAH, *Zakariya*; and is now the *W. es-Sunt*, or "Valley of Acacias." The great valley of Elah rises near Hebron, and, running northwards past Keilah, *Kā. K'ila*, and Adullam, *Ad el-Mā*, to Socoh, divides the low hills of the Shefelah from the mountains of Judah. At Socoh it turns westward, and passing Gath, *Tell es-Sāfi*, runs to the sea N. of Ashdod, *Esdūd*. Above Socoh the valley is known as *W. es-Sir*; below, first as *W. es-Sunt* and then as *Nahr Sukerir*. *W. es-Sunt* is one of the most fertile valleys in Palestine, about half a mile wide, and cultivated in fields of corn. In the centre is a torrent bed, apparently the *N'ḥā* ("valley;" cp. 1 Sam. xvii. 3), which has been cut by the winter torrents in the open valley (*Ḥāḥ*, v. 2); it is thickly strewn with white water-rolled pebbles, and is about 10 ft. deep and 20 ft. to 30 ft. wide. On either side rise stony hills covered with brushwood. The origin of the name "Valley of the Terebinth" may still be traced in the number of large specimens of that tree along its course: one of them, the largest in Palestine, is near *Shuweikēh*, and in the ruin known as *Deir el-Butm*, "Convent of the Terebinth," near *Tell*

es-Sâfi. For the valley, see Rob. ii. 20, 21; Van de Velde, ii. 191; Porter, *Handb.*; *PEF. Mem.* iii. 298; *PEFQy. Stat.* 1875, pp. 147, 191; Geikie, *Holy Land and the Bible*, i. 105-113.

Through the valley of Elah passed one of the main lines of communication between Philistia and the hill-country of Judah. From Gath, which guarded the entrance to the valley, it ran to Socoh, at the approach to the mountains, and there branched off, on the one hand, to Hebron, and, on the other, to Beth-lehem and Jerusalem. The Philistines, advancing from the plain, camped in Ephes-dammim, "the boundary of blood," between Socoh and Azekah. Saul, coming down from the hill-country by the old road to Gaza, must have met the Philistines, near the great bend at Socoh, and pitched in the open valley or Emek. The armies would thus be in their natural position; that of Saul facing W., and that of the Philistines facing E., with the deep torrent bed, Gai (v. 3), between them. The latter, when defeated, were pursued to Shaaraim, *Tell es-Zakariya* (?), Gath, *T. es-Sâfi*, and Ekron, *ʿAkir*, respectively 4, 8½, and 16 miles from the field of battle. The "valley" (Gai) of v. 52 is apparently the torrent bed of the lower course of the *W. es-Sunt*, or of the *W. es-Surâr* on the way to Ekron. There is no gorge, or ravine, as the usual interpretation of גַּי supposes, between Socoh and the sea.

The traditional "Valley of the Terebinth" is the *Wady Beit Hannina*, which lies about four miles to the N.W. of Jerusalem, and is crossed by the road to *Nebi Samu'el*. The scene of David's conflict is pointed out a little north of the "Tombs of the Judges," and close to the traces of the old paved road; but this spot is in the tribe of Benjamin, and also does not correspond with the narrative of the text. [G.] [W.]

ELAM (עֵלָם; Ἐλάμ; Strabo, &c. Ἐλαμιάς, Ἐλαμιά; *Aelam*: in Assyro-Babylonian, *Elamtu*, *Elammat*; Akkadian, *Nimma* or *Elamma*; in the neo-Susian version of the Behistun Inscription, *Apirti*). 1. The name of a country to the E. of Babylonia, bounded on the north by Persia (of which it now forms part), and on the S. and S.W. by the Persian Gulf. It is a country of fertile and picturesque mountains, valleys, and ravines, the only flat tract (called *Dustistan*) being on the shores of the Persian Gulf; the climate of which, during the winter and spring, is very pleasant, but the heat of autumn is excessive. In the interior also, the heat is often intense. The two principal rivers are the Karun and the Karkhah: the latter, rising in the mountains south of Hamadan, runs southwards towards the Mesopotamian plain, mingles with the Karun, and flows ultimately into the Persian Gulf. The principal stream, the Karkhah, was called the Ulai by the Hebrews, and is the Ulâa of the Assyrians, and the Eulæus of classical writers. In ancient times Elam seems to have been divided into several districts, the part on the banks of the Tigris being called *Râsu* by the Assyrians and Babylonians; whilst the ancient name of the district in which Shushan was situated was probably Anzan, Anšan, or Aššan, the most eastern portion being Elam proper. The principal cities were Shushan or Susa, *Metaštu*, *Bit-Burnaki*, *Bit-Imbi*, *Nagitu*,

Lahiru, *Til-humba*, *Bubê*, *Pillatu*, *Hilimu*, and *Bâb-Dûri*—the names of which, being taken from Assyrian sources, seem, in some cases, to have the Assyrian prefixes *bit*, "house of," *til*, "mound of," and *bâb*, "gate of," attached. Elam was evidently fairly well populated in ancient times, and is at present inhabited by Kurds, Lurs, and Arabs. Though, from Gen. x. 22 and 1 Ch. i. 17, the Elamites would seem to have been a Semitic people (Elam being in these passages given as son of Shem), their language is certainly unlike any of the Semitic tongues. Time can alone decide whether the Elamites are really to be regarded as the descendants of this Elam or not. The late-Susian name of the country, *Apirti*, may prove to have some bearing upon this question when more is known.

Language and Writing.—The language of Elam was agglutinative, and has been supposed to belong to the Finnish division of the Ugrian branch. It seems to have been similar to Kassite or Cossean, and, if so, may also have been allied to Akkadian and Sumerian. Two dialects are to be distinguished, the one earlier than the other ("Anzanian" and "neo-Susian"), one of the dialectic differences being, that where "Anzanian" had *w* (written, as is usual in the wedge-inscriptions, with the characters expressing *m*), the neo-Susian had *b*. Inscriptions are not over-pleatiful in either dialect, so that they are, as yet, rather imperfectly known. The form of the character in use in Elam was a modification of archaic Babylonian cuneiform, it having been borrowed, probably, when Babylonia was under the dominion of the Elamite kings (about 2300 B.C.), and modified and simplified in later times. No clay tablets have been found in Elam, but numerous inscribed bricks, used in building the palaces and temples of Susa, have been discovered. Any other literature that the Elamites may have possessed has probably perished, though the discovery of inscribed tablets in Elamite at Nineveh indicates that the chance of finding native records is not utterly hopeless.

History.—The history of Elam is almost entirely from foreign—that is, Assyrian and Babylonian—sources. The first king of the country of whom we have record is Kudur-Nanhundi, who, about 2280 B.C., invaded Akkad (northern Babylonia), and carried off an image of the goddess Nanâ from Erech [ERECH]. This king reigned about the time of Chedorlaomer, to whom he was probably related, the names being compounded with the same root; namely, Kudur or Chedor.* A probable successor of, or contemporary with, Chedor-Laomer, Kudur-Mabug (son of Simti-Silhak), and Eri-Aku, son of Kudur-Mabug, reigned at Larsa about this period [ARIOCH; ELLASAR].

It is not for several centuries that Elam again comes forth from its obscurity. About the year 1310 B.C. Hurba-tila, "king of Elammat" (see above for this form of the name), sent a challenge to Durri-gelzu, king of Babylon, to fight with him at Dûr-Dungi. The challenge was accepted, and the Elamite king was defeated and taken prisoner.

About the year 885 B.C. Bêl-nadin, king of

* Chedor-Laomer is apparently the Hebrew form of Kudur-Lagamar.

Babylon, seems to have sent an embassy to the then king of Elam.

Ummanigaš or Humbanigaš reigned from 733 to 716 B.C. He made alliance with Merodach-baladan, king of Babylonia, against Sargon, king of Assyria; and in the 2nd year of the former (720 B.C.),^b whilst Sargon was engaged in Palestine, he reconquered from the Assyrians the whole of Babylonia. Two years later, however, Sargon was able to lead his forces against the allied armies; and in a battle fought near Duran, Humbanigaš was driven across the border into his own country. After this defeat, Humbanigaš ruled for three years, and, when he died, was succeeded by Ištar-Hundu (a Babylonian corruption of the Elamite Šutruk-Nahhunte), his sister's son. This king seems to have been of a rather peaceful disposition, for he refused to fight against Sargon at the instigation of Merodach-baladan. In the year 697 B.C.* his brother Halluš revolted against him and took him prisoner by shutting him up in his palace, whilst he himself mounted the throne. Šutruk-Nahhunte had reigned eighteen years.

In the year 692 B.C. Sennacherib, having set his son, Aššur-nadin-šum,^c on the throne of Babylonia, marched to Nagitu, in Elam, where the relations of Merodach-baladan had taken refuge, and captured and spoiled several cities in the neighbourhood. Evidently in revenge for this inroad, Halluš invaded Akkad (the north of Babylonia), and penetrated as far as Sippara, putting to death the inhabitants of the districts through which he passed. The Elamite king captured Aššur-nadin-šum, son of Sennacherib, and placed on the throne in his stead Nergal-ušēzib, a Babylonian. Halluš also met with a violent death, and this at the hands of his own people, after having reigned only six years (B.C. 691). He was succeeded by Kudur-Nahhundi (or Kudur-Nahhunte). This king was no sooner on the throne than Sennacherib, king of Assyria, invaded Elam and ravaged the country from Rāšu to Burnaku; but in consequence of the state of the roads, it being rather late in the year, he was obliged to give up his attempt to subjugate the country. On account apparently of the new ruler's want of success, the Elamites revolted against and killed him, after a reign of only ten months.

Umman-mēnanu was the next king of Elam, and he, on the invitation of Šūzub, a Babylonian pretender, invaded Akkad, and fought a battle near the city of Halulē, with regard to which the Babylonians claim the victory for the Elamites, and Sennacherib, evidently with good reason, for his own army. A second battle was also fought near the city Halulina, where the Assyrians were again victorious. Umman-mēnanu, four years later, invaded for some reason the land of his former allies; and, taking Mušēzib-Marduk, king of Babylonia, prisoner, he sent him to Assyria. Umman-mēnanu died three months later, having ruled over Elam for four years.

Ummanaldaš (or Humbanaldaš) II. mounted the throne of Elam in 687 B.C. During his reign, Nabū-zēr-napišti-ēšir, son of Merodach-

baladan, having been defeated in battle by Esarhaddon, king of Assyria, took refuge in Elam. Ummanaldaš, however, wishing to be on good terms with the Assyrian king, put him to death. Ummanaldaš died in his palace (as the Babylonian Chronicle has it) "not sick"—an expression which would seem to imply that he was murdered. His brother Urtaku succeeded him in 682 B.C. During the reign of this ruler a famine took place in Elam, and the distressed people were aided by the Assyrians until the next harvest. Afterwards, however, Urtaku, forgetting the benefits he had received at the hands of the Assyrians, invaded Akkad, then under Assyrian rule. Being defeated by the Assyrian army, he fled back to his own land, where he died miserably.

Te-umman, a man regarded by the Assyrians as the very personification of evil, succeeded Urtaku. In order to have no rival, this new ruler tried to kill all the sons of Urtaku and his predecessor Ummanaldaš. These princes, five in number, fled for protection to the court of Aššur-bani-apli, king of Assyria. Te-umman sent messengers to the Assyrian king demanding their surrender, and, this being refused, war was declared. In a great battle fought by the Assyrians and the Elamites not far from Susa, the Elamite army was routed, and Te-umman and his son killed. Umman-igaš, one of the sons of Urtaku, was placed by the conqueror on the throne of Elam, whilst Tammaritu, a younger son, was raised to the under-kingdom of Hidaṇu, a mountainous part of Elam. In the battle above mentioned many Elamites fought on the side of the Assyrians against their own country.*

On the revolt of Saosduchinos, king of Babylon, against the over-lordship of his brother the king of Assyria, Umman-igaš turned traitor, and sent Undasi, son of Te-umman, to help the Babylonian king, telling him to go and revenge the death of his father. Retribution speedily followed this counsel, for Umman-igaš's own son, Tammaritu, revolted against and killed his father, with a part of his family, and took the throne.

The first act of the new king was also to side with Saosduchinos, but his plans were cut short by his being compelled to take to flight, with his principal adherents, in consequence of the successful rebellion of Indabigaš, one of his servants. Tammaritu, who took refuge in Assyria, was, notwithstanding his action against the power of Assyria, well received by Aššur-bani-apli. In a very short time, another revolution took place in Elam; Indabigaš, the usurper, was killed, and Ummanaldaš, son of Attametu, mounted the throne.

The new king had attracted the attention and enmity of the powerful monarch of Assyria, who, wishing to be suzerain of the country, marched with an army to set on the throne the man who had once already deceived him. Aššur-bani-apli relates the details of this campaign at great length. Among other cities, Bit-Imbi and Susa were captured, and Tammaritu, who had taken refuge with the Assyrian king, was restored. Aššur-bani-apli accuses him of treachery

^b 722 B.C. according to Assyrian chronology.

^c 695 B.C. according to Assyrian chronology.

^d The *Nadlos* of the Greeks.

* Aššur-bani-apli had the details of this battle sculptured on the walls of his palace at Kouyunjik. These bas-reliefs are now in the British Museum.

even at the moment when the former was working for his restoration. Tammartu was again deposed, and the country came once more under the sway of Ummanaldāš.

Aššur-bani-apli, however, was determined to conquer the country, if he could, and sent therefore a second army, the pretext being, that the Elamites detained an image of the goddess Nanā which had been carried off from Erech 1635 years before [ERECH]. An extensive district was overrun, and many cities captured, Susa, the capital, being one of them. An enormous amount of booty was carried off, including the most sacred images of the gods of the land, and thirty-two images of Elamite kings. A large number of captives also was sent to Assyria, and the goddess Nanā was restored with rejoicings to her old place at Erech. The Elamite king, fearing the total ruin of his country, whose principal cities were already practically heaps of ruins, fled and made submission (so Aššur-bani-apli relates). Later on, the servants of Ummanaldāš revolted against him and he fled to the mountains, whither he was followed by the Assyrian army, captured, and taken to Assyria. There, with other captive princes, yoked to Aššur-bani-apli's chariot, he drew the Assyrian king to the temple called É-mašmaš in Nineveh, where the great king made obeisance to and praised the gods who had bowed down his enemies to his feet.

After the fall of the Assyrian Empire, which took place some thirty years after these events, Elam disappears, to all intents and purposes, from history. From what the Babylonian records tell us of the history of Anzan or Anšan (see above), with which that of Elam was probably practically identical, we may infer that the country, about the years 600-555 B.C., was under the dominion of Teispes, Cyrus I., Cambyses I., and Cyrus II., who were all kings of Anzan. As is well known, the last named defeated and captured Astyages, king of the Medes, spoiled Ecbatana, and captured Babylon [BABYLON; BELSHAZZAR; CYRUS]. This celebrated ruler not only became "king of Babylon, Sumer, Akkad, and the four regions," but also made himself master of the whole of Persia. Of this new empire, under Cambyses II., Darius Hystaspis, and his successors, Elam, with its famous province of Anzan, became a mere unit, having no special history. At the time of the revolt of the provinces after Darius ascended the throne, Elam revolted under the leadership, first of Ašina, and afterwards of Martia, who claimed to be "Imanšī, king of Elam." This latter pretender, however, was put to death by the Elamites themselves, whilst the former was captured and killed by Darins. Elam formed a distinct and not unimportant satrapy of the Persian Empire, for she furnished to the crown an annual tribute of 300 talents, and the language spoken by the people seems to have been used as one of the official tongues. Susa, her capital, became the favourite residence of the king, and the metropolis of the whole empire [SHUSHAN]. Daniel (viii. 2) speaks of "Shushan the palace (or castle) in the province of Elam."

Besides the references to Elam in Gen. x. 22, xiv. 1, and 1 Ch. i. 17, the country is also referred to in Is. ix. 11, where it is mentioned as one of the countries from which the Lord

would bring His scattered people; again in xxi. 2, where the Prophet calls on Elam to go up, seemingly against Babylon. Cyrus, who captured Babylon, might, as we have seen, easily be called an Elamite. Jeremiah (xxv. 25) calls upon Elam, among a large number of other nations, to drink the cup of fury; to fall, and rise no more. Ezekiel (xxxii. 24) speaks of Elam with "all her multitude round about her grave, all fallen by the sword, which are gone down uncircumcised"—apparently referring to her as an idolatrous nation, like the other Gentiles. See G. Smith's *History of Sennacherib and History of Assurbanipal*; T. G. Pinches' *Capture of Babylon by Cyrus, &c.*, in the *Transactions of the Society of Biblical Archaeology*, vol. viii., and *The Babylonian Chronicle in the Journal of the Royal Asiatic Society*, vol. xix.; Weisbach's *Achämenideninschriften Zweiter Art* (Leipzig, 1890) and *Anzanische Inschriften* (Leipzig, 1891); also Bezold's *Achämenideninschriften* (Leipzig, 1882). [T. G. P.]

2. B. 'Iwādm; A. joins 'I. with previous name. A Koshite Levite, fifth son of Meshelemiah; one of the Bene-Asaph in the time of David (1 Ch. xxvi. 3).

3. B. Alādū, A. 'Aḥlādū; *Aelam*. A chief man of the tribe of Benjamin, one of the sons of Shashak (1 Ch. viii. 24).

4. "Children of Elam," *Bene-Elam*, to the number of 1254, returned with Zerubbabel from Babylon (Ezra ii. 7 [B. Maḥdū, A. Alādū]; Neh. vii. 12 [B. Alādū, N. 'Eḥlādū]; 1 Esd. v. 12 [B. 'Iwādm, A. 'Hlādū]), and a further detachment of 71 men with Ezra in the second caravan (Ezra viii. 7 [B. 'Hād, A. 'Hlādū]; 1 Esd. viii. 33 [B. Adū, A. 'Eḥlādū]). It was one of this family; Shechaniah, son of Jehiel, who encouraged Ezra in his efforts against the indiscriminate marriages of the people (x. 2, *Ḳeri*, *Ḳḥlū*, Elam; *Ḳetūb*, *Ḳḥlū*, Olam), and six of the Bene-Elam accordingly put away their foreign wives (x. 26). Elam occurs amongst the names of those, the chief of the people, who signed the covenant with Nehemiah (Neh. x. 14). The lists of Ezra ii. and Neh. vii. contain apparently an irregular mixture of the names of places and of persons. In the former, vv. 21-34, with one or two exceptions, are names of places; vv. 3-19, on the other hand, are not known as names of places, and are probably those of persons (see Bertheau-Ryssel in loco; Smend, *Die Listen d. BB. Ezra u. Nehemia*, p. 15). No such place as Elam in Palestine is mentioned either in the Bible or in the *Onomasticon* of Eusebius, nor has any such been discovered as existing in the country. We may therefore conclude that Elam was a person.

5. In the same lists is a second Elam, whose sons, to the same number as in the former case, returned with Zerubbabel (Ezra ii. 31; Neh. vii. 34), and which for the sake of distinction is called "the other Elam" (נְחֵמְיָהּ וְעִזְרָא [BA. Ezra] 'Hlādū, [BNA. Neh.] 'Hlādū; *Aelam alter*). The coincidence of the numbers is curious, and also suspicious (cp. Bertheau-Ryssel; Smend, p. 19).

6. One of the priests who accompanied Nehemiah at the dedication of the new wall of Jerusalem (Neh. xii. 42). The name is omitted by BN^a A., and read Alādū by N^a C. ^{ms}. [G.] [F.]

ELAMITES (אֱלָמִי, plural of the Chald. אֱלָמִי, "an Elamite" [from אֱלָם, Elam]: 'Ελαμίται, Strabo, Ptol., Josephus; 'Ελαμίται, Is. xi. 11, &c., Acts ii. 9; 'Ελαμίται, Judith i. 6: Assy. *Ēlamū, Ēlamāda*). This word, used to designate the inhabitants of Elam, is found (in the Hebrew form) only in Ezra iv. 9, but is left out in that place by the Septuagint translators, probably as being superfluous, as "Elamites" might be regarded as coming under the head of "Susanchites," inhabitants of Susa or Shushan, the capital.

From Gen. x. 22 and 1 Ch. i. 17, the Elamites would seem to have been a Semitic people, Elam being there stated to be a son or descendant of Shem. Their language [see **ELAM**], however, hardly bears out this statement, though, as is well known, language is no real test of nationality. On the Assyrian bas-reliefs they are represented with faces of somewhat singular type, owing to their rather low and retreating foreheads, contrasting with the type of the Assyrians, which contrast, however, is greatly intensified by their shorter beards. It is not impossible that they were of a kindred race to a certain section of the Akkadians of Babylonia, which exhibit similar peculiarities of type.

Like most of the other nations of that part of the world in ancient times, the Elamites were polytheists. Their principal deity seems to have been called Tišhu, god of libations, regarded by the Assyrians and Babylonians as the same as their god Ninip. He bore several names, among them being Adaene, Dagbak ("he of Dagab"?), and Šušinak, "he of Shushan" or Susa. Many of their kings' names are compounded with that of the god Umma or Humba, a name given by the Babylonians to the star which they regarded as "lord of Susa and Elam." Other deities were Lagamaru, Nahunda (Nahundi, Nahhunte), "the sun," Sumudu, Partikira, Amman-kašimas, Uduru, and Sapag, all but Nahunda being worshipped only by kings. Aššur-bani-apli mentions also twelve other minor deities. The Lagamaru mentioned above was probably pronounced Lagamar, and seems also to have been called Lagamal or Lagawal. In Susian the name was pronounced Lagabarri (? Lagavarri). It forms the second element in the name Chedor-Laomer, the king of Elam mentioned in Genesis. The deities Dipti and Tirutur are supposed to have been the Elamites' gods of literature. There was a great deal of secrecy about their religion, for Aššur-bani-apli, in his account of the Assyrian wars in Elam, speaks, when referring to the spoiling of Shushan, of the god of their oracle, "who dwelt in secret places, the image of whose divinity nobody ever saw."

The Elamites must have been skilled in various arts, for they were fair builders, and the fact that the Assyrians carried off thirty-two images of kings covered (inlaid) with silver, gold, bronze, and white marble or limestone, testifies to their possessing a certain skill as sculptors, inlayers, and artificers in metals. They often traded with Assyria and Babylonia, especially (at least with regard to the latter country) during the Persian period; and many Elamites seem to have settled there at various periods.

The Elamites were a very warlike people, as may be judged from their constant invasions of

Babylonia, and the difficulty which the Assyrian kings experienced in attempting to subdue them. They were also probably rather turbulent. Strabo (zv. 3, § 10) says that they were skilful archers, and with this agrees the incident of the battle in which king Te-umman lost his life, when Ituni, one of his generals (a eunuch), in despair destroyed his bow, "the defence of his body." Jeremiah also (xlix. 35) speaks of "the bow of Elam;" and Isaiah (xxii. 6) says that "Elam bare the quiver." From Isaiah we also gather that they fought both on horseback and from chariots, though their battle array was never equal to that of the Assyrians. They had the same kind of musical instruments, also, as the latter; namely, harps, pipes, and cymbals. Apparently they retained their nationality to a very late date, for, from the mention of them on the day of Pentecost (Acts ii. 9), it is clear that at that time they kept their own language, and Ptolemy's notice of them more than a century later seems to show that they still existed as a separate tribe or people. When, however, their language finally disappeared, and they themselves ceased to be distinguishable from the people among whom they lived, is unknown.

[T. G. P.]

EL-A'SAH (אֱלֵאֶסָא = *God hath made; Elasa*). 1. ('Ηλασαδ.). One of the Bene-Pashur, a priest, in the time of Ezra, who had married a Gentile wife (Ezra x. 22). In the apocryphal Esdras, the name is corrupted to TALASAR.

2. (T. 'Ελεαδρ, A. 'Ελεαδρ, B. 'Ελεαδρ; Vulg. om.). Son of Shaphan; one of the two men who were sent on a mission by king Zedekiah to Nehuchadnezzar at Babylon after the first deportation from Jerusalem, and who at the same time took charge of the letter of Jeremiah the Prophet to the captives in Babylon (Jer. xxix. [LXX., xxxvi.] 3).

Elasah is the same name as ELEASAH. [G.] [F.]

ELATH, E'LOTH (אֵילָת, possibly = *trees* (palm); אֵילָת, אֵילָת, אֵילָת, אֵילָת; Joseph. *Ant.* viii. 6, § 4, אֵילָת: *Elath, Ailath, Aelath, Aila*), the name of a town of the land of Edom, commonly mentioned together with Ezion-geber, and situate at the head of the Arabian Gulf, which was called the Elanitic Gulf. It first occurs in the account of the wanderings (Dent. ii. 8), and in later times must have come under the rule of David in his conquest of the land of Edom, when "he put garrisons in Edom; throughout all Edom put he garrisons: and all they of Edom became David's servants" (2 Sam. viii. 14). We find the place named again in connexion with Solomon's navy, "in Ezion-geber, which is beside Eloth, on the shore of the Red Sea, in the land of Edom" (1 K. ix. 26; cp. 2 Ch. viii. 17). It was apparently included in the revolt of Edom against Joram recorded in 2 K. viii. 20; but it was taken by Azariah, who "built [i.e. "restored"] Elath, and restored it to Judah" (xiv. 22). After this, however, "Rezin king of Syria recovered Elath, and drove out the Jews from Elath, and the Syrians came to Elath and dwelt there to this day" (xvi. 6). From this time the place is not mentioned until the Roman period, during which it became a frontier town

of the south, and the residence of a Christian

Bishop. The Arabic name is *Eyleh* (أيلة).

In the geography of Arabia, Eyleh forms the extreme northern limit of the province of the Hijāz (El-Makrizy, *Khilat*; and Yākūt, *Mo'jam*, s. v.; cp. ARABIA), and is connected with some points of the history of the country. According to several native writers, the district of Eyleh was, in very ancient times, peopled by the Sameyda', said to be a tribe of the Amalekites (the first Amalek). The town itself, however, is stated to have received its name from Eyleh, daughter of Midian (El-Makrizy, *Khilat*, s. v.; Causin de Perceval, *Essai sur l'Histoire des Arabes*, i. 23). The Amalekites, if we may credit the writings of Arab historians, passed in the earliest times from the neighbourhood of the Persian Gulf through the peninsula (spreading over the greater part of it), and thence finally passed into Arabia Petraea.

By the Greeks and Romans, Elath was called 'Ελάδα (Ptol. v. 17, § 1), Αἰλάνα (Strabo, xvi. 768), *Aelana* (Plin. v. 12, vi. 32). Under their rule it lost its former importance with the transference of its trade to other ports, such as Berenice, Myos Hormos, and Arsinoë; but in Mohammadan times it again became a place of some note. A few mounds and some palm-groves alone remain now to mark the site or neighbourhood (Robinson, *Pal.* i. 280; Stanley, *S. & P.* p. 84). It lies on the route of the Egyptian pilgrim-caravan, and the mountain-road or 'Akabah named after it was reconstructed by Ahmad Ibn-Tūlūn, who ruled Egypt from c. A.D. 868 to 883. [E. S. P.] [F.]

EL-BETH'EL (עֵלֶיֶל) is *God of the house of God*; LXX. omits the "El," B. Βαυθάλ, D. Βεθάλ; and so also Vulg., *Domus Dei*, Syr. and Arab. Versions), the name which Jacob is said to have bestowed on the place at which God appeared to him when he was flying from Esau (Gen. xxxv. 7). [BETH'EL.] [G.] [F.]

ELC'IA (Ελκεία), one of the forefathers of Judith, and therefore belonging to the tribe of Simeon (Judith viii. 1); probably the same name as Hilkiah (1 K. xviii. 18). The Syriac Version has Elkana. The Vulgate *Elai* is possibly a corruption of Elkai, itself a contraction of Hilkiah (Neh. xii. 15). Cp. *Speaker's Comm. on Apocrypha*, Judith in loco. [F.]

EL-DA'AH (עֵלְדָּאָה, perhaps = *whom God called*; Gen. xxv. 4 [A. Θεργαμᾶ, D. (Θ)εργαμᾶ), reser D^r. παμα, E^r. Αραγά, E^r. Εαραγά; 1 Ch. i. 33 [B. Ελλαδά, A. 'Ελλαδ]; *Eldad*), mentioned last, in order, among the sons of Midian. The name does not occur except in the two lists of Midian's offspring. The Himyaritic inscriptions record one similar to it, 𐩣𐩣𐩪𐩠 (see Delitzsch, *Gen.* in loco [1887]). [E. S. P.] [F.]

EL'DAD and ME'DAD (עֵלְדָּד, ? = *whom God loves*; 'Ελδὰδ καὶ Μεδὰδ; *Eldad et Medad*), two of the seventy elders to whom was communicated the prophetic power of Moses (Num. xi. 16, 26). Although their names were upon the list which Moses had drawn up (xi. 26), they did not repair with the rest of their brethren to

the Tabernacle, but continued to prophesy in the camp. Moses being requested by Joshua to forbid this, refused to do so, and expressed a wish that the gift of prophecy might be diffused throughout the people. The great fact of the passage is the more general distribution of the spirit of prophecy, which had hitherto been concentrated in Moses; and the implied sanction of a tendency to separate the exercise of this gift from the service of the Tabernacle, and to make it more generally available for the enlightenment and instruction of the Israelites, a tendency which afterwards led to the establishment of "schools of the prophets." The circumstance is in strict accordance with the Jewish tradition that all prophetic inspiration emanated originally from Moses, and was transmitted from him by a legitimate successor down to the time of the Captivity. The mode of prophecy in the case of Eldad and Medad was probably the extempore production of hymns, chanted forth to the people (Hammond): cp. the case of Saul, 1 Sam. x. 11.

From Num. xi. 25, it appears that the gift was not merely intermittent, but a continuous energy, though only occasionally developed in action. [T. E. B.]

ELDER (ἱερός; πρεσβύτερος; *senior*). The term *elder* or *old man*, as the Hebrew literally imports, was one of extensive use, as an official title, among the Hebrews and the surrounding nations. It applied to various offices: Eliezer, for instance, is described as the "old man of the house," i.e. the *major domo* (Gen. xxiv. 2); the officers of Pharaoh's household (Gen. l. 7) and, at a later period, David's head servants (2 Sam. xii. 17) were so termed; while in Ezek. xxvii. 9 the "old men of Gebal" are the *master-workmen*. As betokening a political office, it applied not only to the Hebrews, but also to the Egyptians (Gen. l. 7), the Moabites, and Midianites (Num. xxii. 7). Wherever a patriarchal system is in force, the office of the *elder* will be found to be the keystone of the social and political fabric; it is so at the present day among the Arabs, where the Sheikh (=the *old man*) is the highest authority in the tribe. That the title originally had reference to age, is obvious; and age was naturally a concomitant of the office at all periods (Josh. xxiv. 31; 1 K. xii. 6), even when the term had acquired its secondary sense: coupled with age would probably be position due to birthright in tribes and families. At what period the transition occurred, in other words when the word *elder* acquired an official signification, it is impossible to say. The earliest notice of the *elders* acting in concert as a political body is at the time of the Exodus (iii. 16-18). We need not assume that the order was then called into existence, but rather that Moses availed himself of an institution already existing and recognised by his countrymen, and that, in short, "the elders of Israel" (Ex. iii. 16, iv. 29) had been the *senate* (γενοῦσα, LXX.) of the people, ever since they had become a people. The position which the elders held in the Mosaic constitution, and more particularly in relation to the people, is described under CONGREGATION; they were the representatives of the people, so much so that *elders* and *people* are occasionally used as equivalent terms (cp.

Josh. xxiv. 1 with vv. 2, 19, 21; 1 Sam. viii. 4 with vv. 7, 10, 19). Their authority was undefined, and extended to all matters concerning the public weal; nor did the people question the validity of their acts, even when they disapproved of them (Josh. ix. 18). When the tribes became settled, the elders were distinguished by different titles according as they were acting as national representatives ("elders of Israel," 1 Sam. iv. 3; 1 K. viii. 1, 3; "of the land," 1 K. xx. 7; "of Judah," 2 K. xxiii. 1; Ezek. viii. 1), as district governors over the several tribes (Deut. xxxi. 28; 2 Sam. xix. 11), or as local magistrates in the provincial towns, appointed in conformity with Deut. xvi. 18, whose duty it was to sit in the gate and administer justice (Deut. xxi. 12, xxi. 3 sq., xxii. 15; Ruth iv. 9, 11; 1 K. xxi. 8; Judith x. 6); their number and influence may be inferred from 1 Sam. xxx. 26 sq. They retained their position under all the political changes which the Jews underwent: under the Judges (Judg. ii. 7, viii. 14, xi. 5; 1 Sam. iv. 3, viii. 4); under the kings (2 Sam. xvii. 4; 1 K. xii. 6, xx. 8, xxi. 11); during the Captivity (Jer. xxix. 1; Ezek. viii. 1, xiv. 1, xx. 1); subsequently to the Return (Ezra v. 5; vi. 7, 14; x. 8, 14); under the Maccabees,* when they were described sometimes as the *senate* (*γερονσία*; 1 Macc. xii. 6; 2 Macc. i. 10, iv. 44, xi. 27; Joseph. *Ant.* xii. 3, § 3), sometimes by their ordinary title (1 Macc. viii. 33, xi. 23, xii. 35); and, lastly, at its commencement of the Christian era, when they are noticed as a distinct body from the Sanhedrin, but connected with it as one of the classes whence its members were selected, and always acting in conjunction with it and the other dominant classes [SANHEDRIN]. Thus they are associated sometimes with the chief priests (Matt. xxi. 23), sometimes with the chief priests and the scribes (Matt. xvi. 21), or the council (Matt. xvi. 59), always taking an active part in the management of public affairs. St. Luke describes the whole order by the collective term *πρεσβυτήριον* (Luke xxii. 66; Acts xxii. 5). In Matt. xv. 2 and Heb. xi. 2 "elders" is expressive of time rather than office. For the position of the elders in the synagogue and the Christian Church, see SYNAGOGUE, BISHOP. Much interesting information on this subject is given in Hamburger, *RE*² s. n. "Aelteste," and (for the time of our Lord) in Schürer, *Gesch. d. Jüd. Volkes*² (see Index a. n. "Aelteste").

[W. L. B.] [F.]

EL'AD (עֶלְאָד; B. om., A. *Elæd*; *Elad*), named with Ezer as a descendant of Ephraim (1 Ch. vii. 21). They were probably heads of families co-ordinate with that of the elder Shuthelah (Keil in loco), or possibly his brother (Oettli), the second Shuthelah being taken as a son of Zabab. [G.] [F.]

EL-EA'LEH (עֶלְיָאֵל, ? = *God is exalted* [Num. v. 3]; 'Elealēh [Num. v. 37], B. *עֶלְיָאֵל*, B^{ab} 'Ela-

עֶלְיָאֵל, AF. 'Elealēh; *Eleale*), a place on the east of Jordan, in the pastoral country, taken possession of and rebuilt by the tribe of Reuben (Num. xxxii. 3, 37). We lose sight of it till the time of Isaiah and Jeremiah, by both of whom it is mentioned as a Moabite town, and, as before, in close connexion with Heshbon (Is. xv. 4, xvi. 9; Jer. xlviii. 34). The extensive ruins of the place are still to be seen, bearing very nearly their ancient name, *el-'Al*, though with a modern signification, "the lofty," a little more than a mile N. of Heshbon. It stands on the summit of a rounded hill commanding a very extended view of the plain and of the whole of the Southern *Belka* (Burckh. *Syr.* p. 365; Seetzen, i. 467, 1854). It is from this commanding situation that it doubtless derives its name, which, like many other names of modern Palestine, is as near as approach to the ancient sound as is consistent with an appropriate meaning. There are rock-hewn wine-presses (Is. xvi. 9; Jer. xlviii. 33, 34), the ruins of a church, and the remains of a Byzantine town (*PEF. Survey of E. Palestine*, i. 16). [G.] [W.]

ELEA'SA (Ἐλεασά, A. 'Alasā; *Lois*), a place at which Judas Maccabaens encamped before the fatal battle with Bacchides, in which he lost his life (1 Macc. ix. 5). It was not far from Mount Azotus (cp. v. 15). Josephus (*Ant.* xii. 11, § 1) has Bethzetho, probably *Bir ez-Zeit*, by which he elsewhere renders Bezeth. But this may be but a corrupt reading of Berzeth or Bethzetha, which is found in some MSS. for Berea in 1 Macc. ix. 4. Reland and others propose to change the reading to Adasa, where Judas had encamped on a former memorable occasion (vii. 40); but no such reading is found. It is singular that Bezeth should be mentioned in this connexion also (see v. 19). It is now, apparently, *Khurbet Ifasa*, near Beth-horon (*PEF. Mem.* iii. 36, 115). [AZOTUS, ΜΟΥΣΤ. BEREIA, 3.]

The reading of the Vulgate suggests a possible identification with the Laishah (A. V. Laish) of Is. x. 30. [LAISH.] [G.] [W.]

EL-EA'SAH (עֶלְיָאֵשׁ = *God hath made*; *Elasa*). 1. (B. 'Euds, A. 'Eleasā), son of Helez, one of the descendants of Judah, of the family of Hexron (1 Ch. ii. 39).

2. (B. 'Eshā or 'Esaḥā; A. 'Eleasā), son of Rapha, or Rephalah; a descendant of Saul through Jonathan and Merib-baal or Mephibosheth (1 Ch. viii. 37; ix. 43).

This name is elsewhere rendered in the A. V. ELASAH. [G.] [F.]

EL-EA'ZAR (עֶלְיָאֵזָר = *God hath helped*; 'Eledzār; *Eleazar*). 1. Third son of Aaron, by Elisheba, daughter of Aminadab, who was descended from Judah, through Pharez (Ex. vi. 23, 25; xxviii. 1: for his descent see Gen. xxxviii. 29, xli. 12; Ruth iv. 18, 20). After the death of Nadab and Abihu without children (Lev. x. 1; Num. iii. 4), Eleazar was appointed chief over the principal Levites, to have the oversight of those who had charge of the sanctuary (Num. iii. 32). With his brother Ithamar he ministered as a priest during their father's lifetime, and immediately before his death was invested on Mount Hor with the sacred gar-

* Some difficulty arises at this period from the notice in 1 Macc. xiv. 28 of a double body, *ἀρχοντες ἔθρους*, and *πρεσβύτεροι τῆς χώρας*; and again in 2 Macc. i. 8, *γερονσία* and *πρεσβύτεροι*: the second term may refer to the municipal authorities, as is perhaps implied in the term *χώρα*. The identity of the *γερονσία* and the *πρεσβύτεροι* in other passages is clear from 1 Macc. xii. 6 compared with v. 35.

ments, as the successor of Aaron in the office of high-priest (Num. xx. 28). One of his first duties was in conjunction with Moses to superintend the census of the people (Num. xvi. 3). He also assisted at the inauguration of Joshua, and at the division of spoil taken from the Midianites (Num. xxvii. 22; xxxi. 21). After the conquest of Canaan by Joshua he took part in the distribution of the land (Josh. xiv. 1). The time of his death is not mentioned in Scripture; Josephus says it took place about the same time as Joshua's, twenty-five years after the death of Moses. He is said to have been buried in "the hill of Phinehas" his son (Ges. p. 260), where Josephus says his tomb existed (*Ant.* v. 1, § 29); or possibly in a town called Gibeath-Phinehas (Josh. xxiv. 33; cp. Dillmann²). The high-priesthood is said to have remained in the family of Eleazar until the time of Eli, a descendant of Ithamar, into whose family, for some reason unknown, it passed until it was restored to the family of Eleazar in the person of Zadok (1 Sam. ii. 27; 1 Ch. vi. 8, xxiv. 3; 1 K. ii. 27; Joseph. *Ant.* viii. 1, § 3), and continued in his family till the times of the Maccabees (see Schürer, *Gesch. d. Volkes Israel*,² Index s. n. "Hohepriester").

2. The son of Abinadab, of the "hill" (הַר הַיְּזֵר) of Kirjath-jearim, consecrated by the people of that place to take care of the Ark after its return from the Philistines (1 Sam. vii. 1).

3. The son of Dodo the Ahohite (אֲחֹיָהּ), i.e. possibly a descendant of Ahoah of the tribe of Benjamin (1 Ch. viii. 4); one of the three principal mighty men of David's army, whose exploits are recorded in 2 Sam. xxiii. 9, 1 Ch. xi. 12.

4. A Merarite Levite, son of Mahli, and grandson of Merari. He is mentioned as having had only daughters, who were married by their "brethren" (i.e. their cousins; 1 Ch. xxiii. 21, 22; xxiv. 28).

5. A priest who took part in the Feast of Dedication under Nehemiah (Neh. xii. 42).

6. One of the sons of Parosh; an Israelite (i.e. a layman) who had married a foreign wife, and had to put her away (Ezra x. 25; 1 Esd. ix. 26).

7. Son of Phinehas a Levite (Ezra viii. 33; 1 Esd. viii. 63).

8. ELEAZAR (Ἐλεάζαρ; Joseph. Ἐλεάζρος), surnamed AVARAN (1 Macc. ii. 5, Ἀβάρων, or Ἀβάρων, and so Joseph. *Ant.* xii. 6, § 1; 9, 4. In 1 Macc. vi. 43, the common reading ὁ Σαυαράν arises either from the insertion of C by mistake after O, or from a false division of Ἐλεάζρος Ἀβάρων. The fourth son of Mattathias, who fell by a noble act of self-devotion in an engagement with Antiochus Eupator, B.C. 163 (1 Macc. vi. 43 sq.; Joseph. *Ant.* xii. 19, § 4; B. J. i. 1, § 5; Ambr. *De offic. min.* 40). In a former battle with Nicanor, Eleazar was appointed by Judas to read "the holy book" before the attack, and the watchword in the fight—"the help of God"—was his own name (2 Macc. viii. 23).

The surname Avaran is of uncertain meaning. Some (see *Speaker's Comm.* in loco) have derived it from his exploit, others from his pale complexion (Zöckler, in Strack u. Zöckler's *Kgf. Komm.* zu den *Apokryphen*).

BIBLE DICTIONARY.—VOL. I.

9. A distinguished scribe (Ἐλεάζρος . . . τῶν πρωτεύοντων γραμματέων, 2 Macc. vi. 18) of great age, who suffered martyrdom during the persecution of Antiochus Epiphanes (2 Macc. vi. 18–31). His death was marked by singular constancy and heroism, and seems to have produced considerable effect. Later traditions embellished the narrative by representing Eleazar as a priest (*De Macc.* 5), or even high-priest (Grimm, *ad Macc.* l. c.). He was also distinguished by the nobler title of "the proto-martyr of the old covenant," "the foundation of martyrdom" (Chrys. *Hom.* 3 in *Macc.* init. Cp. Ambr. *de Jacob.* ii. 10).

For the general credibility of the history cp. Grimm, *Excurs. über 2 Macc.* vi. 18–viii. in *Exeg. Handb.*; Ewald, *Gesch.* iv. 341, 532; *Speaker's Comm.* on the Apocrypha, "Introd." §§ 2, 4; Zöckler, *Einleit.* § 2. [MACCABEES.]

The name Eleazar in 3 Macc. vi. appears to have been borrowed from this Antiochian martyr, as belonging to one weighed down by age and suffering and yet "helped by God." For the name cp. LAZARUS, Luke xvi. 19–25.

10. The father of Jason, ambassador from Judas Maccabaeus to Rome (1 Macc. viii. 18).

11. The son of Eliud, three generations above Joseph, the husband of the Virgin Mary (Matt. i. 15). [B. F. W.] [F.]

ELEAZURUS (B. Ἐλεάζρος, A. -σι-; *Eliasib*), 1 Esd. ix. 24. [ELIASIB.] One of the "holy singers" who had taken to himself a "strange wife." Lupton (*Speaker's Comm.* in loco) conjectures that the E. V. got their form of this name from the Aldine Ἐλεάζροφος, reading ρ instead of φ. [G.] [F.]

EL ELOHE ISRAEL (אֱלֹהֵי יִשְׂרָאֵל) = God (Almighty), the God of Israel; καὶ ἐπεκαλέσατο τὸν θεὸν Ἰσραήλ; *Fortissimum Deum Israel*), the name bestowed by Jacob on the altar which he erected facing the city of Shechem, in the piece of cultivated land upon which he had pitched his tent, and which he afterwards purchased from the Bene-Hamor (Gen. xxxiii. 19, 20; see Delitzsch [1887] and Dillmann² in loco). [G.] [F.]

E'LEPH (אֵלֶפֶת = the ox; B. om., A. Σελαλέφ; *Eleph*), one of the towns allotted to Benjamin, and named next to Jerusalem (Josh. xviii. 28). The signification of the name may be taken as an indication of the pastoral pursuits of its inhabitants. The LXX. A. reads Zelah and Eleph as one name, possibly owing to the "and" between them having been dropped; but if this is done, the number of fourteen cities cannot be made up. The Peshitto has ܐܠܦܬܐ, *Gebro*,

for Eleph; but what the origin of this can be is not obvious. Conder (*PEF. Mem.* iii. 47) identifies it with *Lifta*, to the right of the road from Jerusalem to *Jaffa*; the usual identification of this place with NEPHTOAH being unsatisfactory. [G.] [W.]

ELEPHANT. The word does not occur in A. V. excepting as a marginal reading for Behemoth in Job xl. 15, where the hippopotamus (R. V. marg.) is clearly intended. But the most valuable product of that animal, ivory, is

3 M

repeatedly mentioned under the name of שֵׁן, *shen*; and in two passages (1 K. x. 22, 2 Ch. ix. 21) we read שֵׁן הַבָּבִים, *shenhabbim* (A. V. and R. V. "ivory," A. V. marg. *elephants' teeth*; LXX. ὀδόντες ελεφάντων), in the account of the imports brought to Solomon by the navy of Tarshish. *Habbim* is not a Hebrew word. The derivation of Gesenius from the Sanskrit *ibhas*, "an elephant," is now given up; but the word

may have arisen out of הַבָּבִים (cp. the Assyrian *al-ab*, MV.¹¹).

The Hebrew expression shows that the Jews, though at that time they do not appear to have had any further acquaintance with the elephant, knew that ivory was the tusk or tooth, not the horn of the animal. The term "horns of ivory" (Ezek. xxvii. 15) is merely applied to the shape of the tusk, not its growth, and is literally "horns of teeth."

Elephants (ἐλέφαντες) are frequently mentioned in the Books of the Maccabees. Antiochus Epiphanes had thirty-two elephants in his army when he went to attack Jerusalem, and one of them was killed by Eleazar, who crept under it and slew it, but was himself crushed to death by its fall (1 Macc. vi. 46). At the battle of Magnesia, Antiochus is stated to have had 120 elephants (do. viii. 6). That the Seleucian kings of Syria attached great importance to their elephants in warfare is shown by the fact that the tetradrachms of Seleucus I. bear four elephants in a row on the reverse. It is evident, from the various allusions to ivory, that it was obtained by the Jews and Phoenicians both from Ethiopia through Egypt, and also from India by the traders to Ophir and by the men of Dedan, in the Persian Gulf. But the elephants of the Syrian kings must have been the Asiatic species imported from India by way of Persia. [See IVORY.] [H. B. T.]

ELEUTHEROPOLIS (Ἐλευθεροπόλις, "free city"), a word not found in the Bible, but curiously connected in early Christian and Jewish Commentaries with the Horites and Mount Seir. Jerome (*ad Obad.* v. 1) says that Seir was "in the region of Eleutheropolis, where before dwelt the Horites, which is interpreted 'free,' whence perhaps the town was afterwards named." In *Bereshith Rabba* (xlii.) we read, "The Horites (הַחֹרִיתִּים), that is Eleutheropolis

(אֵלִיּוּתֶרּוּפּוֹלִים); and why was it called Eleutheropolis? Because they chose it and entered it free at the time of the division, since in Greek *eleuthero* (אֵלִיּוּתֶרּוּ, ελευθερο) is 'free,' and *phulis* (פּוֹלִים, πόλις) 'town.' Again in another passage the Midrash (*Falkut*, Gen. xxxiii.) renders Seir by Beth Gubrin (בֵּית גּוּבְרִין), and this town was the same as Eleutheropolis, as appears below. The reason for this curious opinion is found in what is probably a false etymology for the word Horite, which means "cave man" (EDOMITES): the Jews, whose interpretations Jerome so often followed, seem to have rendered this word חֹרִיתִּים as though it were חֹרִיתִּים, "free born," "nobles" (see Gesen. *Lex.* s. v.).

The identity of Eleutheropolis with Beth

Gubria was supposed by Robinson (*Bib. Res.* ii. p. 57), and is established by distances mentioned in the *Onomasticon* to towns near it as measured from the present village Beit Jibrin (בֵּית גִּבְרִין).

The Greek name Eleutheropolis was perhaps a translation of the Hebrew Beth Gibborim (from גִּבּוֹר, "hero"), meaning "house of mighty ones," whence the Aramaic name of Beth Gubria above noticed. The Horites are included among the old heroic aborigines of Palestine (see Deut. ii. 12). The Semitic name first appears in Ptolemy (iv. 16) as Baetogabra (*Βατογὰβρα*, Reland, *Pal.* p. 641) in the 2nd century A.D., and again in the old Roman map of the Pentinger Tables as Betogabari. It is mentioned in other Jewish works (Midrash Koheleth, &c.; see Reland, p. 641), and in the 12th century by the Jewish traveller Rabbi Benjamin of Tudela (בֵּית גִּבְרִין). Reland also thinks it is the Begabris of some editions of Josephus (*Bell. Jud.* iv. 8, § 1, *Βήγαβρις*). In the 10th century the name appears corrupted by El Mukaddasy (985 A.D.) as Beit Jibril or "House of Gabriel," and a spot is still shown near the village sacred to Neby Jibril (*P.E.F. Mem.* iii. pp. 270, 271). William of Tyre calls this place "The House of Gabriel," but the commoner Crusading name was Gibein. He states that the Arab name was then (in 1136 A.D.) Bethgebrim, and believes it to be the ancient Bersabe or Beersheba. So also Marino Sanuto speaks of Bersahre as Ziblin (vi. 15, 18), and says it was vulgarly called Gybelyn (1321 A.D.).

The Greek name of this place is mentioned on coins of the city with the name of Julia Domna in 202 A.D. Severus, her husband, bestowed privileges on Palestine cities in that year (see Robinson, *Bib. Res.* ii. p. 60). The earliest Bishop of Eleutheropolis attended the Nicene Council, 325 A.D., and the names of four others occur down to 536 A.D. In the mediæval ecclesiastical lists (Bongar, *Gesta Dei per Francos*, p. 1044) the Latin Beit Gerbein seems to answer to the Eleutheropolis of a corresponding Greek list (Robinson, *Bib. Res.* ii. p. 62, note). This place was regarded by the Patristic writers as Ramath Lehi. Hence Jerome (*Ep.* 86, *Epistola Paulae*) says that Morasthim or Marashah (*Merash*, close to Beit Jibrin) was near Samson's Fountain, and the pilgrim Antoninus Martyr (circa 530 A.D.) calls Eleutheropolis (ch. xxxii.) the place where Samson slew a thousand men with the jaw-bone of an ass, whence water sprang forth (Judg. xv. 19). Marino Sanuto seems to mention the same site in the 14th century as the "fountain of the jaw." In the *Acta Sanctorum Martyrum* the Syriac reads

Leth Gubrin, the Greek and Latin Eleutheropolis (Robinson, *Bib. Res.* ii. p. 66; cp. Reland, *Pal.* pp. 749-754).

The place was important in Crusading times. William of Tyre records its fortification by King Fulke of Anjou in 1136 A.D. It was confided to the Knights Hospitallers as a bulwark against Ascalon. Geoffry de Vinauf (v. 44) says that Ybelin of the Hospitallers by Hebron was near the valley where St. Anne was born. A great church of *Sanda Hannah* now lies in ruins near Beit Jibrin.

The modern village, in a sheltered valley full of olive groves, has a population of about 1000 souls, living in mud and stone houses. It has four spring wells, the largest to the south (Bir Umm Judeia) being regarded by Robinson as the traditional "Fountain of the Jaw-bone" above mentioned. It is perhaps worthy of note that this name may mean "Well, the mother of

clamour" (جَدَاع, Freytag, *Ler.*), comparable

to the Hebrew En Hakkore, or "spring of the crier." The site, however, of Samson's exploit may have lain further north than Beit Jibrin. Outside the village on the north the remains of the Crusading walls and castle extend for about a third of a mile east and west. The ditch remains and a cloister, which is clearly Norman work. The castle was, however, repaired in 958 A.H. (1551 A.D.) by Moslems, as evidenced by an Arab text on the wall. The church near the village must in Byzantine times have been one of the largest in the country. The length was 124 feet, with a nave 32 feet wide. The Crusading restoration was much smaller.

There are fourteen remarkable caverns near Beit Jibrin, which have often been described and supposed to be very ancient. Some writers have called them "Horite caves," but they are like many others in this part of Palestine, apparently formed by quarrying in the first instance, and now used as stables for goats and cows. There is no evidence of their being very ancient. In one case a Jewish tomb has been destroyed in enlarging the cavern, showing that this at least is not as old as the tomb. There are a good many Arabic texts on the walls, one of which perhaps contains the name of Saladin. There are also crosses cut by Christians, but nothing more ancient than these remains is known. One cave has a finely-carved band of bas-relief arabesque work on the walls. El Mukaddasy speaks of "marble quarries" at Beit Jibrin, which may account for these caverns.

There are several very fine specimens of ancient Jewish tombs near the village, and a very curious excavation at *Tell Sandahannah*, consisting of well-like chambers with staircases running down round the walls. There is also a large *columbarium*, perhaps of the Roman period, called *es Sûh*, "the market."

A curious legendary character called Sultan el Feniah is connected with the vicinity. He is said to have been a Christian king, and a cavern and garden called after him are shown at Beit Jibrin: he is also known elsewhere in the lowlands west of Jerusalem.

The authorities on the ancient history have already been quoted. The fullest account of Beit Jibrin and its antiquities will be found in

the *PEF. Mem.* (iii. 257-8, 264-274, 275-278, 289-292, with the Feniah legenda, p. 294).

[C. R. C.]

ELEUTHERUS (Ἐλευθερος), a river in Phoenicia, where Jonathan the Hasmonaean met Ptolemy (1 Macc. xi. 7), and which appears to have been beyond the limits of Hasmonaean rule (xii. 30). Josephus makes it the limit of the country given to Cleopatra by Antony (*Ant.* xiii. 4, § 5; 5, § 10; xv. 4, § 1; *Bell. Jud.* i. 18, § 5). Strabo (xvi. 2, 12) makes it the northern limit of Phoenicia. Pliny (*H. N.* v. 17) places it north of Tripoli, and says that it swarmed with tortoises (ix. 10). Reland is inclined to connect

the name with the Arabic العود, "tortoise."

Strabo clearly places the river north of Tripoli. In the Middle Ages it was incorrectly shown near Lydda (William of Tyre). The Sabbatic river (*Nahr es Sebtâ*, further north) has also been incorrectly identified with the Eleutherus.

The river in question is now called *Nahr el Kébir* ("the great river"), and it divides the northern Lebanon (*Jebel Akkâr*) from the chain which joins Mount Amanus. It rises in a sort of natural crater or hollow plain, called *el Bukcia*, in the pass between the two ranges, west of the lake of Homs. This crater is several miles across, marshy, and dotted with oaks. It is the camping-ground of the Turkoman tribes. On the south are the rugged and snowy ridges of Lebanon. On the north the old Crusading castle *Krak des Chevaliers* commands the pass. The soil is of hard black basalt round the crater. The river runs west for twenty miles into the sea, fifteen miles north of Tripoli. The bed near the shore is full of canes. It is easily fordable, except when swollen by the rains, when it is for a time a deep and rapid stream.

[C. R. C.]

ELEUZAI, the reading of the A. V. (A.D. 1611) in 1 Ch. xiv. 5 for ELUZAI (R. V.).

ELHA'NAN (אֱלְחָנָן) = *God hath been gracious*, al. *whom God gave* [cp. אֱלֹהֵי הַחַיִּים, and Phoen. Hannibal. See Renan, *Des Noms Théophores apocopes*, p. 176 in *REJ.* 1882; Baethgen, *Beiträge z. Semit. Religionsgeschichte*, p. 302]; *Eleazar*; *Aedeodatus*). 1. A distinguished warrior in the time of king David, who performed a memorable exploit against the Philistines, though in what that exploit exactly consisted, and who the hero himself was, it is not easy to determine.

(a.) 2 Sam. xxi. 19 says that he was the "son of Jaare-Oregim the Bethlehemite," and that he "slew Goliath the Gittite, the staff of whose spear was like a weaver's beam." Here, in the A. V., the words "the brother of" (omitted in R. V.) are inserted, to bring the passage into agreement with

(b.) 1 Ch. xx. 5, which states that "Elhanan the son of Jair slew Lahmi the brother of Goliath the Gittite, the staff of whose spear," &c.

Driver (*Notes on the Hebrew Text of the B.E. of Samuel*, in loco) comes to the conclusion that the text of Samuel* (independent of questions

* Cp. Kennicott's *Dissertation*, p. 78. Deutch (Kitt's *Cyclop. of Biblical Literature*, s. o.) deals with the question as one of emendation of the text.

with reference to *Oregim*, which is generally allowed to have found its way to connexion with Jaare from the line below of the Hebrew text) is the more likely to be correct; the original writer of this article considers the text of Chron. as probably the more correct.^b

1 Sam. xvii. declares that Goliath the Gittite was killed by David (see a. n. p. 723, n. *); but even if the reading of Samuel here be accepted as the original, it does not follow that Ewald's suggestion would be true (*Gesch.* iii. 91, 2), viz. that from the fact that David's antagonist is, with only three exceptions (one of them in the doubtful verses, xvii. 12-32), called "the Philistine," and for other linguistic reasons, Elhanan was the real victor of Goliath; and that, after David became king, the name of Goliath was attached to the nameless champion whom he killed in his youth. Against this is the fact that Goliath is named thrice in 1 Sam. xvii. and xxi.—thrice only though it be; and also that Elhanan's exploit, from its position both in Samuel and in Chronicles, and from other indications, took place late in David's reign, and when he had been so long king and so long renowned, that all the brilliant feats of his youth must have been brought to light, and well known to his people. It is recorded as the last but one in the series of encounters of what seems to have been the closing struggle with the Philistines. It was so late that David had acquired among his warriors the fond title of "the light of Israel" (2 Sam. xxi. 17), and that his nephew Jonathan was old enough to perform a feat rivaling that of his illustrious uncle years before. It was certainly after David was made king, for he goes down to the fight, not with his "young men" (עַבְדָּי),^c as when he was leading his band during Saul's life, but with his "servants" (עַבְדָּי), literally, his "slaves," a term almost strictly reserved for the subjects of a king. The vow of his guard, on one of these occasions, that it should be his last appearance in the field, shows that it must have been after the great Ammonite war, in which David himself had led the host to the storming of Rabbah (2 Sam. xii. 29). It may have been between this last event and the battle with Absalom beyond Jordan, though there are other obvious reasons why David stayed within the walls of Mahanaim on that occasion.

On the whole, therefore, it seems best to conclude that the passages in 1 Sam. xvii. and in 2 Sam. xxi. do not refer to the same occurrence.

^b Ewald has overcome the difficulty of the two discrepant passages by a curious eclectic process. From Chronicles he accepts the name "Jair," but rejects "Lahmi, the brother of." From Samuel he takes "the Bethlehemite," and rejects "Oregim." Cp. also Grätz, *Gesch.* i. 427.

^c Nothing can be more marked than this distinction. נָאָר (נָאָר) is used almost invariably for David's followers up to the death of Saul, and then at once the term changes, and עַבְדָּי (עַבְדָּי), a "slave," is as exclusively employed. Even Absalom's people go by the former name. This will be evident to any one who will look into the quotations under the two words in that most instructive book *The Englishman's Hebrew Concordance*.

Jerome, in his *Quest. Heb.* on both passages—he does not state whether from ancient tradition or not—translates Elhanan into *Adeo-datus*, and adds *filius saltus Polymitaris Bethlehemites*—"a wood-man (?), a weaver, a Bethlehemite." Adeo-datus, he says, is David, which he proves not only by arguments drawn from the meaning of each of the above words, but also from the statement in the concluding verse of the record that all these giants "fell by the hand of David and by the hand of his servants;" and as Elhanan slew Goliath, Elhanan must be David.

2. The son of Dodo of Bethlehem, one of "the thirty" of David's guard, and named first on the list (2 Sam. xxiii. 24; 1 Ch. xi. 26). See Kennicott's *Dissertation*, p. 179.

The same name is also found with Baal substituted for Eli,—BAAL-HANAN. (Cp. BEEL-IADA.) [G.] [F.]

ELI (אֵלִי, (?)=*elevation*; 'חַלִּי; 'חֶלֶל, Joseph; *Heli*), high-priest and judge, was descended from Aaron through Ithamar, the younger of his two surviving sons (Lev. x. 1, 2, 12; 1 Ch. xxiv. 2), as appears from the fact that Abiathar, who was certainly a lineal descendant of Eli (1 K. ii. 27), had a son Ahimelech, who is expressly stated to have been "of the sons of Ithamar" (1 Ch. xxiv. 3; cp. 2 Sam. viii. 17). With this accords the circumstance that the names of Eli and his successors in the high-priesthood, up to and including Abiathar, are not found in the genealogy of Eleazar (1 Ch. vi. 4-15; cp. Ezra vii. 1-5). As the history makes no mention of any high-priest of the line of Ithamar, before Eli, he is generally supposed to have been the first of that line who held the office (חֶלֶל *πρώτου ταύτην [τὴν ἀρχιεροσύνην] παραλαβόντος*, Joseph. *Ant.* viii. 1, § 3). From him, his sons having died before him, it appears to have passed to his grandson, Ahitub (1 Sam. xiv. 3; Josephus, however, says, *φινεετός δὲ ἦδη καὶ ἱερεὺς, τοῦ πατρὸς αὐτῷ παρακεχωρηκός* διὰ τὸ γῆρας. *Ant.* v. 11, § 2), and it certainly remained in his family till Abiathar, the grandson of Ahitub, was "thrust out from being priest unto the Lord," by Solomon, for his share in Adonijah's rebellion (1 K. ii. 26, 27; cp. i. 7). The high-priesthood then passed back to the family of Eleazar in the person of Zadok (1 K. ii. 35), where it continued as long as the monarchy lasted (1 Ch. vi. 4-15), and still remained after the Captivity in Babylon (Ezra vii. 1-5). How the office ever came into the younger branch of the house of Aaron we are not informed, though we are expressly told that it did so, with the sanction of Almighty God (1 Sam. ii. 30, in which and the following verses, 31-36, as Ewald points out, Eli's "father's house" is evidently restricted to his particular branch of the sacerdotal line, though in the preceding verses, 27-29, it must be understood of the whole tribe of Levi, as is clear from the historical reference to Egypt, and the contrast with the other tribes of Israel. *Hist. of Isr.* ii. 410, Eng. trans.).

In addition to the office of high-priest, Eli held that of judge (1 Sam. iv. 18), being the immediate predecessor of his pupil Samuel, the last of the judges (1 Sam. vii. 6, 15-17). Of the circumstances which led to the combination of the two offices in one person we know

nothing. It has been suggested that "Eli in his youth was a great hero and deliverer of Israel, and that, like all the judges, he attained his position by extraordinary prowess." And support has been found for this suggestion, in the fact, which is thought to be deducible from the history, that "in the forty years ascribed to Eli's rule, the Philistines had no longer the same preponderance as in the forty years of their first ascendancy, within which Samson's isolated resistance is comprised" (Ewald, *Hist. of Isr.* ii. 411; Stanley, *Jewish Ch.* i. 333). The length of time during which he judged Israel is given as forty years in our present Hebrew copies, whereas the LXX. make it twenty years (ἐκοσὼν ἔτη, 1 Sam. iv. 18). Some have thought that the discrepancy is to be accounted for by supposing that Eli was sole judge for twenty years, after having been co-judge with Samson for a like period (Judg. xvi. 31).

The figure of Eli stands out in bold relief on the sacred page. It is portrayed in few lines, but they are drawn by a master's hand. When first introduced to us, he is already an old man—sixty-eight, according to the received chronology. The Tabernacle, with the Ark of the Covenant, is still at Shiloh, where Joshua had placed it; but buildings have grown up around it, so that the name "Temple," or "palace" of

Jehovah, is already given to it (יהוה' הַבַּיִת, 1 Sam. i. 9; iii. 3), and there are gates or

"doors" to the court in which it stands (1 Sam. iii. 15). In the corresponding porch or gateway, fixed against one of the posts or pillars which support it, and commanding, it would seem, the outer court in which the worshippers assembled, and perhaps the road beyond, is a "seat" or "throne," on which Eli is accustomed to sit ("the seat," 1 Sam. i. 9; iv. 13). Here he is found when the sacred history first mentions him. His watchful survey of the multitudes who had come up to worship at the Feast, his dignified rebuke of the supposed delinquent, who, after the evil example of his own sons, was profaning, as he thought, the Temple of the Lord, his priestly blessing bestowed upon her when he discovered his mistake, set him before us as no unworthy occupant of the high offices which he held. His subsequent reception from the hands of Hannah, of the child which had been given to her prayer, together with his benediction of her and her husband (1 Sam. i. 25-28; ii. 20), are quite in keeping with this first description of him. His relations with Samuel, throughout the history, justify the conclusion that his heart found solace in the purity and piety of the child who was growing up under his care, uncontaminated by the wickedness which, springing from his own family and office, as from a corrupt fountain-head, was overflowing and polluting the whole nation. It is his weak toleration of this wickedness with which he had no sympathy whatever, but which he failed effectually to curb, that is the one great blot in the character of Eli: "His sons made themselves vile, and he restrained them not" (1 Sam. iii. 13). As a private person, it would have been his duty to "put away evil from among" his people, by bringing his sons to punishment (Deut. xxi. 18-21). As high-priest and judge, the power and

the responsibility of dealing with them were alike his own. This he failed practically to recognise. He spoke when he should have acted. He remonstrated when he should have restrained. He allowed his sons by their rapacity and licentiousness to profane the office of the priesthood, and to bring the rites of religion into abhorrence among the people (1 Sam. ii. 12-17, 22; in which latter verse we ought probably to render "the women that served,"—"did service," R. V.—i.e. discharged various offices in connexion with the Tabernacle; cp. Driver, *Notes on the Heb. Text of the BB. of Sam.* in loco, Exod. xxxviii. 8, and Num. iv. 23, where the same Hebrew word is rendered, "perform the service"). The sin of which he was thus guilty was grievous and, in its temporal consequences, unpardonable. Neither bloody nor unbloody sacrifice could purge it away (1 Sam. iii. 14). His doom, which had been previously foretold by an unknown prophet sent to Shiloh (1 Sam. ii. 27-36), became the subject of the first prophetic revelation made to Samuel (iii. 11-14). The meek submission with which the aged high-priest received the terrible sentence from the lips of the reluctant child who was commissioned to deliver it, is another proof of his genuine piety, while it forms at the same time a touching episode in the history. The closing scene in the life of Eli is full of solemnity and pathos. The Israelites have again encountered and been defeated by their ancient enemies, the Philistines. They have left 4,000 men dead upon the field. To retrieve this disaster, they fetch from Shiloh the Ark of the covenant of the Lord, by which such mighty things had been done for them in times past. But the expedient is vain. Despite a transient enthusiasm in their own ranks and panic among their enemies, they are again defeated, and the Ark is taken, and the sons of Eli, Hophni and Phinehas, are slain. A swift runner bears the news to Shiloh. The city, which is first reached, sends up a wail of anguish as he proclaims it. Eli, anxious and expectant, is sitting on his throne or seat in the gateway of the temple, on the hill beyond. He is ninety-eight years old, and blind, but he hears the cry, and asks those around him what it means. Calamity after calamity in quick succession is poured upon him. "Israel is fled." "There hath been a great slaughter among the people." "Thy two sons, Hophni and Phinehas, are dead." And, to crown all, "The Ark is taken." It was this last intelligence which proved the death-blow of Eli, for his heart was still true to God and to His service. "It came to pass, when he made mention of the Ark of God, that he fell from off the seat backward, by the side of the gate, and his neck brake and he died, for he was an old man and heavy" (1 Sam. iv. 1-18; cp. Stanley, i. 338). Another part of his punishment, the return of the high-priesthood to the elder branch of the family, took effect, as we have seen, in the time of Solomon. The decay of his house, which had also been predicted (1 Sam. ii. 31-33), appears to have been in progress in the reign of David, when we read that "there were more chief men found of the sons of Eleazar, than of the sons of Ithamar," sixteen of the former, and only eight of the latter.

(1 Ch. xxiv. 4.) [ABIATHAR; ELEAZAR; ITHAMAR.] (See Lightfoot's *Works*, i. 53, 907, fol. Lond. 1684; Selden, *de Success. in Pontif. Hebr.* lib. i. cap. 4.) [T. T. P.]

ELI'AB (עֲלִיָּאב = *my God is Father* [see Olshausen, *Lehrb. d. Heb. Sprache*, p. 615]; 'Eliab; *Eliab*). 1. Son of Helon and leader of the tribe of Zebulun at the time of the census in the wilderness of Sinai (Num. i. 9; ii. 7; vii. 24, 29; x. 16).

2. A Reubenite, son of Pallu or Phallu, whose family was one of the principal in the tribe; and father or progenitor of Dathan and Abiram, the leaders in the revolt against Moses (Num. xxvi. 8, 9, xvi. 1. 12; Deut. xi. 6). Eliab had another son named NEMUEL, and the record of Num. xxvi. is interrupted expressly to admit a statement regarding his sons.

3. One of David's brothers, the eldest of the family (1 Ch. ii. 13; 1 Sam. xvi. 6, xvii. 13, 28). His daughter Abigail married her second cousin Rehoboam, and bore him three children (2 Ch. xi. 18; B. 'Eliab, A. -ab); although, taking into account the length of the reigns of David and Solomon, it is difficult not to suspect that the word "daughter" is here used in the less strict sense of granddaughter or descendant. In 1 Ch. xxvii. 18, we find mention of "Elihu, of the brethren of David," as "ruler" (רִשָּׁה), or "prince" (נָשִׂא) of the tribe of Judah. According to the ancient Hebrew tradition preserved by Jerome (*Quaest. Heb. in loco*), this Elihu was identical with Eliab (so LXX.). "Brethren" is however often used in the sense of kinsmen, *c.g.* in 1 Ch. xii. 2.

4. A Levite in the time of David, who was both a "porter" (שֹׁמֵר, i.e. a doorkeeper) and a musician on the "psaltery" (1 Ch. xv. 18 [BN]. 'Eliab, N*. 'Eliab, A. 'Eliab], 20, xvi. 5).

5. One of the warlike Gadite leaders who came over to David when he was in the wilderness taking refuge from Saul (1 Ch. xii. 9; N. 'Eliab).

6. An ancestor of Samuel the Prophet; a Kohathite Levite, son of Nahath (1 Ch. vi. 27; Hebr. 12). In the other statements of the genealogy this name appears to be given as ELIHU (1 Sam. i. 1) and ELIEL (1 Ch. vi. 34; Hebr. 19).

7. Son of Nathanael, one of the forefathers of Judith, and therefore belonging to the tribe of Simeon (Judith viii. 1; B. 'Eliab, A. 'Eliab, N. 'Eliab). [G.] [F.]

EL-IA'DA (עֲלִיָּאדָה = *God hath known; Eliada, Eliada*). 1. One of David's sons; according to the lists, the youngest but one of the family born to him after his establishment in Jerusalem (2 Sam. v. 16 [B. 'Eliad, A. 'Eliad]; 1 Ch. iii. 8 [B. 'Eliad, A. 'Eliad]). From the latter passage it appears that he was the son of a wife and not of a concubine. In another list of David's family we find the name Eliada changed to Beeliada, the false god (Baal) for the true (1 Ch. xiv. 7 [BN. Βαλεγδαε, A. Βαλλιαδα]). What significance there may be in this change it is impossible to say (see Driver, *Notes on the Heb. Text of the BB. of Sam.* on 2 Sam. v. 16); it is the only instance occurring, and even here Eliada is found in one Hebrew MS. [BEELIADA.] The

name appears to be omitted by Josephus in his list of David's family (*Ant.* vii. 3, § 3).

2. A mighty man of war (גִּבּוֹר מִלְחָמָה), a Benjamite, who led 200,000 of his tribe to the army of Jehoshaphat (2 Ch. xvii. 17 [B. 'Eliad, A. 'Eliad]).

EL-IA'DAH (עֲלִיָּאדָה = *God hath known; B. om., A. 'Eliad; Eliada*), apparently an Aramite of Zobah; father of Rezon the captain of a marauding band which annoyed Solomon (1 K. xi. 23). [G.] [F.]

EL-IA'DAS ('Eliadas; *Eliadas*), 1 Esd. ix. 28. [ELIOENAI.]

EL-IA'DUN (B. Εἰλιαδών, A. 'Ia-; Velg. omits), 1 Esd. v. 58. Possibly altered from ILENADAD. [G.] [F.]

ELI'AH (עֲלִיָּא = *God [is] Jehorah; Eliab*). 1. ('Hala.) A Benjamite; one of the sons of Jeroham, and a chief man (רֹאשׁ, literally "head") of the tribe (1 Ch. viii. 27).

2. ('Hala.) One of the Bene-Elam; an Israelite (i.e. a layman) in the times of Ezra, who had married a foreign wife (Ezra x. 26).

This name is accurately Elijah, and the translators of the A. V. have so expressed it, not only in the name of the Prophet (most frequently spelt with a final *u*), but in another case (Ezra x. 21). [ELIAH.] [G.] [F.]

EL-IAH'BA (עֲלִיָּאבָה = *God hides [or protects]; 'Eliab, 'Eliab, 'Eliab; Eliab*), a Shalbonite, i.e. probably from SHALBIM; one of the thirty of David's guard (2 Sam. xiii. 32 [B. 'Eliab, A. 'Eliab]; 1 Ch. xi. 33 [A. 'Eliab, A. 'Eliab, N. 'Eliab; B. 'Eliab, A. 'Eliab]). [G.] [F.]

EL-IA'KIM (עֲלִיָּאכִי = *God establishes; MY*). compares the Sabean אֲכִימָא, אֲכִימָא; 'Eliakim and 'Eliakim; *Eliakim*). 1. Son of Hilkiab;

master of Hezekiah's household (מַשְׁכֵּל הַבַּיִת = "over the house," as Is. xxxvi. 3), 2 K. xviii. 18, 26, 37. He succeeded Shebna in this office after he had been ejected from it (Grotius thinks by reason of his leprosy) as a punishment for his pride (Is. xxii. 15-20). Eliakim was a good man, as appears by the title emphatically applied to him by God, "My servant Eliakim" (Is. xxii. 20), and as was evinced by his conduct on the occasion of Sennacherib's invasion (2 K. xviii. 37; ix. 1-5), and also in the discharge of the duties of his high station, in which he acted as a "father to the inhabitants of Jerusalem, and to the house of Judah" (Is. xxii. 21). It was as a special mark of the Divine approbation of his character and conduct, of which however no further details have been preserved to us, that he was raised to the post of authority and dignity which he held at the time of the Assyrian invasion. What this office was has been a subject of some perplexity to commentators. The ancients, including the LXX. and Jerome, understood it of the priestly office, as appears by the rendering of אֲכִימָא (Is. xxii. 15, A. V. and R. V. "treasurer; R. V. marg. Or, *steward*) by παροφύριον, the "priest's

chamber," by the former, and of עֲלִיָּהוּ by "praepositus templi" by the latter. Hence Nicephorus, as well as the author of the Alexandrian Chronicle, includes in the list of high-priests, Somnas or Sobnas (i.e. Shebna) and Eliakim, identifying the latter with Shallum or Meshullam. His twelfth high-priest is, *Somnas, ille impius et perditus, regnante Ezechia*; and his thirteenth, Eliakim Muselum. But it is certain from the description of the office in Is. xxii., and especially from the expression in c. 22, "the key of the house of David will I lay upon his shoulder," that it was the king's house, and not the House of God, of which Eliakim was praefect, as Ahishar had been in the reign of Solomon, 1 K. iv. 6, and Azrikam in that of Ahaz, 2 Ch. xxviii. 7. And with this agrees both all that is said, and all that is not said, of Eliakim's functions. The office seems to have been the highest under the king, as was the case in Egypt, when Pharaoh said to Joseph,

"Thou shalt be over my house (עַל־בֵּיתִי) . . . only in the throne will I be greater than thou," Gen. xli. 40; cp. xxxix. 4. In 2 Ch. xxviii. 7, the officer is called "governor (נָתַן) of the house." It is clear that the "Scribe" was inferior to him, for Shebna, when degraded from the praefecture of the house, acted as scribe under Eliakim* (2 K. xviii. 37). Further, the whole description of it by Isaiah implies a place of great eminence and power. This description is transferred in a mystical or spiritual sense to Christ the Son of David in Rev. iii. 7; thus making Eliakim in some sense typical of Christ. This it is perhaps which gave rise to the interpretation of Eliakim's name mentioned by Origen, $\delta \Theta\epsilon\acute{o}\varsigma \mu\omicron\upsilon \alpha\acute{\nu}\epsilon\sigma\tau\eta$ or as Jerome has it, *Dei resurrectio, or Resurgens Deus*; and also favoured the mystical interpretation of the passage in Isaiah given by Jerome in his commentary, based upon the interpretation of בִּנְיָן as "*habitans in tabernaculo*," as if it imported the removal of the Jewish dispensation, and the setting up of the Gospel in its place. The meaning of בִּנְיָן is probably "steward," in a high sense of the term (MV.¹¹ gives instances of its occurrence in the Carthaginian inscriptions). Eliakim's career was a most honourable and splendid one; if with Gesenius and Ewald (cp. Driver, *Isaiah, his Life and Times*, p. 103, n. 1; Riehm, *HWB.* s. n.; Dillmann³ in loco) Is. xxii. 25 is taken to apply not to him, but to Shebna.^b Eliakim's name also occurs 2 K. xix. 2; Is. xxxvi. 3, 11, 22; xxxvii. 2 (see further Jerome, *de nom. Hebr.* and *Comm.* on Is. xxii. 15 sq.; Rosenmüll. *ib.*; Bp. Lowth's *Notes* on Is.; Selden, *de Success. in Pontif. Hebr.*; Winer, *sub voc.*).

2. The original name of Jehoikim king of Judah (2 K. xliii. 34; 2 Ch. xxxiv. 4). [JEHOIAKIM.]

3. A priest in the days of Nehemiah, who assisted at the dedication of the new wall of Jerusalem (Neh. xii. 41; BM^a A. om.).

4. Eldest son of Abiud, or Judah; brother of

Joseph, and father of Azor (Matt. i. 13). [GENEALOGY OF CHRIST.]

5. Son of Melea, and father of Jonan (Luke iii. 30, 31). [IBID.] [A. C. H.]

EL-IA'LI (B. Ἐλιαλῆς , A. Ἐλιαλῆ ; *Diels*), 1 Esd. ix. 34. [BINNUI.]

EL'AM (עֲלָם ; BA. Ἐλᾱδ ; *Eliam*), 1. Father of Bathsheba, the wife of David (2 Sam. xi. 3). In the list of 1 Ch. iii. 5, the names of both father and daughter are altered, the former to ANMIEL and the latter to BATHSHUA^a; and it may be noticed in passing, that both the latter names were also those of non-Israelite persons, while Uriah was a Hittite (cp. Gen. xxxviii. 12; 1 Ch. ii. 3; in both of which "the daughter of Shua" is שֻׁא בַת , Bath-shua; also 2 Sam. xvii. 27). The transposition of the two parts of the name El-i-am in Am-ni-el does not alter its Hebrew significance, which may be "God is my people."

2. B. Ἐλᾱδ ; A. Ὀνελᾱδ . Son of Ahithophel the Gilonite; one of David's "thirty" warriors (2 Sam. xxiii. 34). The name is omitted in the list of 1 Ch. xi., but is now probably dimly discernible or mutilated (Driver) as "Ahijah the Pelonite" (c. 36; see Kennicott, *Dissertation*, p. 207). The ancient Jewish tradition preserved by Jerome (*Qu. Hebr.* on 2 Sam. xi. 3, and 1 Ch. iii. 5) is that the two Eliams are one and the same person. An argument has been founded on this to account for the hostility of Ahithophel to king David, as having dishonoured his house and caused the death of his son-in-law (Blunt, *Coincidences*, Pt. II. x.). [G.] [F.]

ELIAONIAS (B. Ἐλιαωνίας , A. Ἐλιαωνίας ; *Moablonius*, including preceding name), 1 Esd. viii. 31. [ELIHOENAI.]

EL'AS (חֵלִיאָס ; in Maccabees, and in N. T. Ἥλίας [Lachm. and Treg.] or Ἥλᾱς [Westc. and Hort]; *Elias*, but in Cod. Amiat. *Hēlias*), the form in which the name of ELIJAH is given in the A. V. of the Apocrypha and N. T.: Ecclus. xlviii. 1, 4, 12 [N. v. 1, 12, Ἥλᾱς]; 1 Macc. ii. 58; Matt. xi. 14, xvi. 14, xvii. 3, 4, 10, 11, 12, xxvii. 47, 49; Mark vi. 15, viii. 28, ix. 4, 5, 11, 12, 13, xv. 35, 36; Luke i. 17, iv. 25, 26, ix. 8, 19, 30, 33, 54; John i. 21, 25; Rom. xi. 2; James v. 17. In Rom. xi. 2 the reference is not to the prophet, but to the portion of Scripture designated by his name, the words being ἐν Ἥλᾱ , "in Elias" (A. V. and R. V. marg.), not as in A. V. and R. V. text, "of Elias." [G.]

EL-IA'SAPH (חֵלִיאָסָפ = *God hath added*; B. Ἐλᾱσᾱφ , AF. -i- ; *Eliasaph*). 1. Son of Deuel; head of the tribe of Dan at the time of the census in the Wilderness of Sinai (Num. i. 14; ii. 14; vii. 42, 47; x. 20).

2. BAF. Ἐλᾱσᾱφ . Son of Lael, a Levite, and "chief of the house of the father of the Gershonite" at the same time (Num. iii. 24).

EL-IA'SHIB (חֵלִיאָשִׁיב = *God will bring back*; cp. Nestle, *Die Israel. Eigennamen*, p. 194. MV.¹¹ compares the Sabean חֵלִיאָשִׁיב ; *Eliasub*, *Eliasub*),

^a Bp. Lowth thinks, but without sufficient reason, that this Shebna is a different person from the other.

^b Others (Deltzsch, G. A. Smith, &c. in loco) take this verse as referring to Eliakim, and consider that he fell through the nepotism of his family.

^a Driver (*Notes on the Hebrew Text of the BB. of Samuel*, in loco) thinks that חֵלִיאָשִׁיב (in Ch.) was pronounced חֵלִיאָשִׁיב , and was merely an error for חֵלִיאָשִׁיב .

a common name at the later period of the O. T. history.

1. B. 'Ελιασιελ, A. 'Ελιασειβ. A priest in the time of king David, eleventh in the order of the "governors" (שָׂרִי) of the sanctuary (1 Ch. xxiv. 12).

2. B. 'Ασειβ, B. 'Ελιασειβ. A son of Elioenai; one of the latest descendants of the royal family of Judah (1 Ch. iii. 24).

3. High-priest at Jerusalem at the time of the rebuilding of the walls under Nehemiah (Neh. iii. 1 [B. 'Ελαιοσούβ, N.A. -i-], 20, 21 [in these vv. B. Βηθελισούβ or -εισουβ, N. Βηθελισούβ or -εισου or -εισουβ, A. Βηθελ 'Ασσοούβ or -ησσοουβ or -ιασσοουβ]). His genealogy is given in xii. 10 [B. 'Ελαιοσειβ or -i-, N. 'Ελιασειβ or -ειασειβ, A. 'Ελιασειβ], 22 [B.A. 'Ελιασιβ, N. 'Ελαιοσειβ], 23 [B. 'Ελαιοσούε, A. -i-, N. 'Ελαιοσούβ]. Eliashib was in some way allied (עֲרֵב = near) to Tobiah the Ammonite, for whom he had prepared a room in the Temple, a desecration which excited the wrath of Nehemiah (Neh. xiii. 4, 7). One of the grandsons of Eliashib had also married the daughter of Sanballat the Horonite (xiii. 28). There seems no reason to doubt that the same Eliashib is referred to in Ezra x. 6 (B. 'Ελαιοσούβ, N.A. -i-).

4. A singer in the time of Ezra who had married a foreign wife (Ezra x. 24, B. 'Ελαιοσφ, N.A. -i-). [EΛΕΑΖΟΥΡΟΣ.]

5. A son of Zattu (Ezra x. 27, B. 'Ελαιοσούβ, A. -i-, N. -σου) [ELIASIMUS], and

6. A son of Bani (x. 36, B. 'Ελαιοσειφ, N. -σειβ, A. 'Ελαιοσειβ) [ELIASIB], both of whom had transgressed in the same manner.

[G.] [F.]

ELI'ASIS (Ελιδσεις; *Eliasis*), 1 Esd. ix. 34. This name and Enasibus may be duplicate forms answering to Eliashib (see *Speaker's Comm.* in loco).

[G.] [F.]

ELI'ATHAH (הַלְיָאֲתָה and הַלְיָאֲתָה = *God* or *my God hath come*; B. 'Ηλιαθδδ, A. 'Ελιαθδ; *Eliatha*), one of the sons of Heman, a musician in the Temple in the time of king David (1 Ch. xxv. 4), who with twelve of his sons and brethren had the twentieth division of the Temple-service (xxv. 27; B. Αιμαθα, A. 'Ελιδδ). In Jerome's *Quaest. Hebr.* on v. 27, the name is given as Eliaba and explained accordingly; but not so in the Vulgate.

[G.] [F.]

ELI'DAD (דָּדִי־אֵל = *God* or *my God loves*; 'Ελιδδ; *Eliadad*), son of Chislon; the man chosen to represent the tribe of Benjamin in the division of the land of Canaan (Num. xxxiv. 21).

[G.] [F.]

ELI'EL (אֵל־אֵל = *God* or *my God is* [the true] *God*; B. 'Ελειήλ, A. -i-; *Eliel*). 1. One of the heads of the tribe of Manasseh—of that portion of the tribe which was on the east of Jordan (1 Ch. v. 24).

2. Son of Toah; a forefather of Samuel the prophet (1 Ch. vi. 34, Hebr. v. 19). Probably identical with ELIIV, 2, and ELIAB, 6.

3. (B. 'Ελμλε, A. -λι), one of the Bene-Shimhi; a chief man in the tribe of Benjamin (1 Ch. viii. 20).

4. ('Ελειήλ), like the preceding, a Benjamite, but belonging to the Bene-Shashak (1 Ch. viii. 22).

5. (B. Αετήλ, N. -i-, A. 'Ιεληήλ), "the Mahavite;" one of the heroes of David's guard in the extended list of 1 Ch. (xi. 46).

6. (B.N. Δαλήλ, A. 'Ααλήλ), another of the same guard, but without any express designation (xi. 47).

7. (B.N. 'Ελιδδ, A. 'Εληήλ), one of the Gadite heroes who came across Jordan to David when he was in the wilderness of Judah hiding from Saul (1 Ch. xii. 11).

8. A Kohathite Levite, "chief" (רֹאשׁ) of the Bene-Chebron at the time of the transportation of the Ark from the house of Obed-edom to Jerusalem (1 Ch. xv. 9 [B. 'Ενρή, N. -ηλ, A. 'Εληήλ], 11 [B. 'Ενρή, N. 'Ανελημ, A. 'Εαλήλ]).

9. A Levite in the time of Hezekiah; one of the "overseers" (שְׂרָפִים) of the offerings made in the Temple (2 Ch. xxxi. 13, B. 'Ιεηήλ, A. 'Ιεήλ). [G.] [F.]

ELI-E'NAI (אֵלִי-עֲנַי; B. 'Ελιωεναι, A. 'Ελιωεναι; *Elioenai*), one of the Bene-Shimhi; a descendant of Benjamin, and a chief man in the tribe (1 Ch. viii. 20). [G.] [F.]

ELI-E'ZER (אֵלִי-עֶזֶר; 'Ελιέζερ; *God* or *my God is help*. MV. 11) compares the Phoe.

עֶזְרָא. 1. Abraham's chief servant, called by him, as the passage is translated in A. V., "Eliezer of Damascus," or by Chald. and Syriac, "the Damascene, Eliezer" (Gen. xv. 2). On the disputed points connected with this verse see Delitzsch [1887], Dillmann, and the summary in *QPB*. It was, most likely, this same Eliezer who is described in Gen. xxiv. 2 (R. V.) as Abraham's servant, the elder of his house, that ruled over all that he had, and whom his master sent to Padan-Aram to take a wife for Isaac from among his own kindred. With what eminent zeal and faithfulness he executed his commission, and how eagerly he found the truth of what his own name expressed, in the providential aid he met with on his errand, is most beautifully told in Gen. xiv. The two passages, "*Judaeis origo Damascena, Syriae nobilissima civitas . . . Nomen urbi o Damascus rege inditum . . . Post Damascum Azelus, mox Adores et Abraham et Israel reges fuisse*" (Justin. lih. xxxvi. cap. 2); and "*Ἀβραμὴς βασιλευσε Δαμασκοῦ . . . τοῦ δὲ Ἀβράμου ἦν καὶ νῦν ἐν τῇ Δαμασκηνῇ τὸ ὄνομα δοξάζεται καὶ κόμην αὐτῷ δεικνύται Ἀβράμου οἴκησις λεγομένη* (Joseph. Ant. i. 7, § 2, quoting Nicol. Damascen.) have probably some relation to the narrative in Gen. xv. (see Gesen. *Thes.* s. v. עֶזֶר; Rosenmüll. on Gen. xv.; Knobel, *Genesis*).

2. Second son of Moses and Zipporah, to whom his father gave this name, "because, said he, the God of my father was my help, that delivered me from the sword of Pharaoh" (Ex. xviii. 4; 1 Ch. xxiii. 15, 17). He remained with his mother and brother Gershom, in the care of Jethro his grandfather, when Moses returned to Egypt (Ex. iv. 18), she having been sent back to her father by Moses (Ex. xviii. 2), though she set off to accompany him, and went part of the way with him. Jethro brought back Zipporah and her two sons to Moses in the wilderness, after he heard of the departure of the Israelites from Egypt (ch. xviii.). Eliezer had one son, Rehabiah, from whom sprang a numerous posterity (1 Ch.

xxiii. 17, xxvi. 25, 26). Shelomith in the reigns of Saul and David (v. 28), who had the care of all the treasures of things dedicated to God, was descended from Elihez in the sixth generation, if the genealogy in 1 Ch. xxvi. 25 is complete.

3. One of the sons of Becher, the son of Benjamin (1 Ch. vii. 8).

4. A priest in the reign of David, one of those appointed to sound with trumpets before the Ark on its passage from the house of Obed-edom to the city of David (1 Ch. xv. 24).

5. Son of Zichri, "ruler" (מִשְׁפָּט) of the Rubenites in the reign of David (1 Ch. xxvii. 16).

6. (B. 'Ελειάβ, A. 'Ελίσ(φ). Son of Dodavah, of Marehah in Judah (2 Ch. xx. 37), a prophet, who rebuked Jehoshaphat for joining himself with Ahaziah king of Israel, "who did very wickedly," in making a combined expedition of ships of Tarshish to go to Ophir for gold; and foretold the destruction of his fleet at Ezion-geber, which accordingly came to pass. When Ahaziah proposed a second expedition, Jehoshaphat refused (2 Ch. xx. 35-37; 1 K. xxii. 48, 49). The combination of the names Elihez and Dodavah almost suggests that he may have been descended from David's mighty man Eleazar the son of Dodo (2 Sam. xxiii. 9).

7. ('Ελεα(φ). A chief Israelite—a "man of understanding"—whom Ezra sent with others from Ahava to Casiphia, to induce some Levites and Nethinim to accompany him to Jerusalem (Ezra viii. 16). In 1 Esd. viii. 43, the name is given as ELEAZAR.

8, 9, 10. A priest, a Levite, and an Israelite of the sons of Harim, who, in the time of Ezra, had married foreign wives (Ezra x. 18, 23 [N. -ap], 31 [BNA. 'Ελε(εφ)]. The former is called ELEAZAR, the second ELEAZURIUS, and the third ELIONAS, in 1 Esd. ix. 19, 23, 32).

11. Son of Jorim, thirteenth in descent from Nathan the son of David, in the genealogy of Christ (Luke ii. 29). [A. C. H.]

ELI-HA'BA the Shaalbonite (2 Sam. xxiii. 32; 1 Ch. xi. 33), one of David's "thirty," rendered ELIAHBA by R. V. in both passages.

ELIHO-ENAI (אֱלִיחֹנַי; B. 'Ελιαν, A. 'Ελιααν; *Elihoenai*), son of Zerariah, one of the Bene-Pahath-moab, who with 200 men returned from the Captivity with Ezra (Ezra viii. 4). In the apocryphal Esdras the name is ELIAONIAS. [G.] [F.]

ELI-HO'REPH (אֱלִיחֹרֶפֶת, (?) = *God* or *my God* is [a] reward; B. 'Ελίσφ, A. 'Εναρέφ; *Eliho-reph*), son of Shisha. He and his brother Abiah were scribes (סֹפְרִים) to Solomon at the commencement of his reign (1 K. iv. 3). [A. C. H.]

ELI-HU (אֱלִיחֻ = *God* or *my God* is *He*; 'Ελιους; *Eliu*). 1. One of the interlocutors in the Book of Job. He is described as the "son of Barachel the Buzite," and thus apparently referred to the family of Buz, the son of Nahor, and nephew of Abraham (Gen. xxii. 21). This supposition suits well with the description of the other personages [ELIPHAZ; BILDAD],* and the probable date to be assigned to the scenes

recorded. In his speech (chs. xxiii.-xxvii.) he describes himself as younger than the three friends, and accordingly his presence is not noticed in the first chapters. He expresses his desire to moderate between the disputants; and his words alone touch upon, although they do not thoroughly handle, that idea of the disciplinary nature of suffering, which is the key to Job's perplexity and doubt; but, as in the whole Book, the greater stress is laid on God's unsearchable wisdom, and the implicit faith which He demands. [JOB, BOOK OF.] [A. B.]

2. (B. 'Ηλίσου, A. E-). Son of Tohu; a forefather of Samuel the prophet (1 Sam. i. 1). In the statements of the genealogy of Samuel in 1 Ch. vi. the name ELIEL occurs in the same position—son of Tohu and father of Jeroham (vi. 34, Heb. v. 19); and also ELIAB (vi. 27, Heb. v. 12), father of Jeroham and grandson of Zophai. The general opinion is that Elihu is the original name, and the two latter forms but copyists' variations thereof.

3. (B. and A. 'Ελιβ). A similar variation of the name of Eliab, the eldest son of Jesse, is probably found in 1 Ch. xxvii. 18, where Elihu "of the brethren of David" is mentioned as the chief of the tribe of Judah. But see 1 Ch. xii. 2, where, in a similar connexion, the word "brethren" is used in its widest sense. The LXX. retains Eliab. [ELIAB, 3.] In this place the name is without the final Aleph—אֱלִיָּהּ.

4. (B. 'Ελιμούθ; A. 'Ελιούθ). One of the "captains" (מִשְׁכָּנִים, i.e. heads) of the "thousands of Manasseh" (1 Ch. xii. 20) who followed David to Ziklag after he had left the Philistine army on the eve of the battle of Gilboa, and who assisted him against the marauding band (חֲרָדִים) of the Amalekites (cp. 1 Sam. xxx.).

5. (אֱלִיָּהּ; B. 'Εννού, A. 'Ελιού). A Korhite Levite in the time of David; one of the doorkeepers (A. V. "porters") of the house of Jehovah. He was a son of Shemaiah, and of the family of Obed-edom (1 Ch. xxvi. 7). Terms are applied to these doorkeepers which seem to indicate that they were not only "strong men," as in A. V., but also (R. V. "valiant") fighting men (see vv. 6, 7, 8, 12, in which occur the words מִלְחָמָה = army, and מַגִּדָּה = warriors or heroes). [G.] [F.]

ELIJAH. 1. (generally אֱלִיָּהּ, *Eliyah*, but sometimes אֱלִיָּהּ, *Eliyah* = *God* is *Jehovah*, or *Jehovah* is *my God*; B. 'Ηλίσου, A. -ι-, Luc. 'Ηλίας; Aquila, 'Ηλᾱ; * N. T. 'Ηλίας [Westcott and Hort]; *Elias*). ELIJAH THE TISHBITE has been well entitled "the grandest and the most romantic character that Israel ever produced." b Certainly there is no personage in the O. T. whose career is more vividly portrayed, or who exercises on us a more remarkable fascination. His rare, sudden, and brief appearances—his undaunted courage and fiery zeal—the brilliancy of his triumphs—the pathos of his despondency—the glory of his departure,

* By Chrysostom and others the name is Grecised into 'Ηλαος, as if signifying the brightness of the sun.

b Stanley, *S. & P.* p. 328. In the *Acta Sanctorum* he is called *Prodigious Thebites*.

* The connexion of Dedan and Tema with Buz in Jer. xxv. 23 is also to be noticed.

and the calm beauty of his reappearance on the Mount of Transfiguration—throw such a halo of brightness around him as is equalled by none of his compeers in the sacred story.* The ignorance in which we are left of the circumstances and antecedents of the man who did and who suffered so much, doubtless contributes to enhance our interest in the story and the character. "Elijah the Tishbite of the inhabitants (R. V. "sojourners") of Gilead," is literally all that is given us to know of his parentage and locality.⁴ It is in remarkable contrast to the detail with which the genealogies of other prophets and leaders of Israel are stated. Where the place—if it was a place—lay, which gave him this appellation, we know not, nor are we likely to know. It is not again found in the Bible, nor has any name answering to it been discovered since.* [THISBE.]

The mention of Gilead, however, is the key-note to much that is most characteristic in the story of the prophet. Gilead was the country on the farther side of the Jordan—a country of chase and pasture, of tent-villages and mountain-castles, inhabited by a people not settled and civilised like those who formed the communities of Ephraim and Judah, but of wandering, irregular habits, exposed to the attacks of the nomad tribes of the desert, and gradually conforming more and more to the habits of those tribes; making war with the Hagarites, and taking the countless thousands of their cattle and then dwelling in their stead (1 Ch. v. 10, 19–22). To an Israelite of the tribes west of Jordan the title "Gileadite" must have conveyed an impression similar, though in a far stronger degree, to that which the title "Celt" does to

us. What the Highlands were a century ago to the towns in the Lowlands of Scotland, that, and more than that, must Gilead have been to Samaria or Jerusalem.* One of the most famous heroes in the early annals of Israel was "Jephthah the Gileadite," in whom all these characteristics were prominent; and Dean Stanley has well remarked how impossible it is rightly to estimate his character without recollecting this fact (*S. & P.* p. 327; *Hist. of the Jewish Church*, Lect. xxx.).

With Elijah, of whom so much is told, and whose part in the history was so much more important, this is still more necessary. It is seen at every turn. Of his appearance as he "stood before" Ahab—with the suddenness of motion to this day characteristic of the Bedouins from his native hills, we can perhaps realise something from the touches, few but strong, of the narrative. Of his height little is to be inferred—that little is in favour of its being beyond the ordinary size.^a His chief characteristic was his hair, long and thick, and hanging down his back,^b and which, if not betokening the immense strength of Samson, yet accompanied powers of endurance^c no less remarkable. His ordinary clothing consisted of a girdle of skin^d round his loins, which he tightened when about to move quickly (1 K. xviii. 46). But in addition to this he occasionally wore the "mantle," or cape^e of sheepskin, which has supplied us with one of our most familiar figures of speech.^f In this mantle, in moments of emotion, he would hide his face (1 K. xix. 13), or when excited would roll it up as into a kind of staff.^g On one occasion we find him bending himself down upon the ground with his face between his knees.^h

^f See a good passage illustrative of this in *Rich Roy*, ch. xix.

^a From a comparison of 2 K. iv. 34 with 1 K. xvii. 21, it would seem as if Elijah approached nearer than Elijah to the stature of the child. But the inference is not to be relied on. Chrysostom applied the same epithet to him as to St. Paul, *τριτάχυτος ἀνθρώπων*.

^b 2 K. i. 8, "a hairy man;" literally, "a lord of hair." This might be doubtful, even with the support of the LXX. and Josephus—*ἀνθρώπων βασιλεὺς*—and of the Targum Jonathan—*בְּרֵךְ סֵטֶרן*—the same word used for Easan in Gen. xxvii. 11; but its application to the hair of his head is corroborated by the word used by the children of Bethel when mocking Elijah. "Bald-head" is a peculiar term (*קֶרֶךְ*) applied only to want of hair at the back of the head; and the taunt was called forth by the difference between the bare shoulders of the new prophet and the shaggy locks of the old one. [ELISHA.]

^c Running before Ahab's chariot; the hardships of the Cherith; the forty days' fast.

^d עֹרָא (2 K. i. 8), rendered by A. V. and R. V. "leather" in this one place only. See Gen. iii. 21, &c.

^e *Addereth*, אֲדֶרֶת; LXX. *μαλῶτης*; always used for this garment of Elijah, but not for that of any prophet before him. It is perhaps a trace of the permanent impression which he left on some parts of the Jewish society, that a hairy cloak became afterwards the recognised garb of a prophet of Jehovah (*Zech.* xiii. 4; A. V. "rough garment;" where R. V. translates correctly "hairy mantle").

^f Various relics of the mantle are said to exist. The list of claimants will be found in the *Acta Sanctorum* (July 20). One piece is shown at Oviedo in Spain.

^g גָּלַם (2 K. i. 8); "wrapped" is a different word.

^h This is generally taken as having been in prayer.

* "Omnium suae aetatis Prophetarum facile princeps; et, si a Mose discesseris, nulli secundus" (Frischmuth, in *Crit. Sacri*, quoting from Abarbanel).

⁴ The Hebrew text is אֵלִיָּהוּ הַתִּישְׁבִּי מִתְּשֻׁבִּי. The third word may be pointed (1) as in the present Masoretic text, to mean "from the inhabitants of Gilead," or (2) "from Tishbi of Gilead;" which, with a slight change in form, is what the LXX. has. The latter is followed by Ewald (*li.* 486, note). Renan (*Hist. du Peuple d'Israël*, li. 284) considers "the Tishbite" a mere copyist's error. Lightfoot assumes, but without giving his authority, that Elijah was from Jabesh-gilead, and this conjecture is approved by Klostermann (*Strack u. Zöckler's Kgf. Komm.* on 1 K. xvii. 1). By Josephus he is said to have come from Thesbon—*ἐκ πόλεως Θεσβώνης τῆς Γαλααζίδος χώρας* (*viii.* 13, § 12). Perhaps this may have been read as Heshbon, a city of the priests, and have given rise to the statement of Epiphanius, that he was "of the tribe of Aaron," and grandson of Zadok. See also the *Chron. Pasch.* in Fabricius, *Cod. Pseudep.* V. T. 1070, &c.; and Quaresmius, *Elucid.* li. 656. According to Jewish tradition—grounded on the similarity between the fiery zeal of the two—Phinehas the son of Eleazar the priest was typical of Elijah (Hamburger, *K.E.* s. n.). Elijah was also the Angel of Jehovah who appeared in fire to Gideon (*Lightfoot* on John i. 21; *Eisenmenger*, i. 686). Arab tradition places his birth-place at *Gihad Gihood*, a few miles N. of *es-Salt* (Irby, p. 98), and his tomb near Damascus (Mialin, i. 400).

The common assumption—perhaps originating with Hiller (*Onom.* p. 847) or Roland (*Pal.* p. 1035)—is that he was born in the town Tishbe mentioned in Tob. i. 2. But not to insist on the fact that this Tishbe was not in Gilead but in Naphtali, the name there disappears in the Heb. text, which reads, "he was of the inhabitants of a city in Naphtali" (see *Speaker's Comm.* in loco). [THISBE.]

Such, as far as the scanty notices of the record will allow us to conceive it, was the general appearance of the great prophet, an appearance which there is no reason to think was other than uncommon even at that time.^a "Vir qui curationem et cultum corporis despiceret; facie squallente, quae multitudine aurum crinium obumbraretur . . . pelle caprina tantum de corpore tegentem quantum abscondi decorum erat, reliqua corporis ad aera perdurantem" (Gregory Nyss. quoted by Willemer, *de Pallo Eliae*, in *Crit. Sacra*).

The solitary life in which these external peculiarities had been assumed had also nurtured that fierceness of zeal and that directness of address which so distinguished him. It was in the wild loneliness of the hills and ravines of Gilead that the knowledge of Jehovah, the living God of Israel, had been impressed on his mind, which was to form the subject of his mission to the idolatrous court and country of Israel.

The northern kingdom had at this time forsaken almost entirely the faith in Jehovah. The worship of the calves had been a departure from Him, it was a violation of His command against material resemblances; but still it would appear that even in the presence of the calves Jehovah was acknowledged, and they were at any rate a national institution, not one imported from the idolatries of any of the surrounding countries. [CALF.] They were announced by Jeroboam as the preservers of the nation during the great crisis of its existence: "Behold thy gods, O Israel, that brought thee up out of the land of Egypt" (1 K. xii. 28). But the case was quite different when Ahab, not content with the calf-worship—"as if it had been a light thing to walk in the sins of Jeroboam, the son of Nebat"—married the daughter of the king of Sidon, and introduced on the most extensive scale (Joseph. *Ant.* ix. 6, § 6) the foreign religion of his wife's family, the worship of the Phœnician Baal. What this worship consisted of we are ignorant—doubtless it was of a gay, splendid, and festal character, and therefore very opposite to the grave, severe service of the Mosaic ritual. Attached to it and to the worship of Asherah (see Preface to the Revised Version) were licentious and impure rites, which in earlier times had brought the heaviest judgments on the nation (Num. xxv.; Judg. ii. 13, 14, iii. 7, 8). But the most obnoxious and evil characteristic of the Baal-religion was that it was the worship of power, of mere strength, as opposed to that of a God of righteousness and goodness—a foreign religion, imported from nations, the hatred of whom was inculcated in every page of the Law, as opposed to the religion of that God Who had delivered the nation from the bondage of Egypt, had "driven out the heathen with His hand, and planted them in;" and through Whom their forefathers had "trodden down their enemies, and destroyed those that rose up against them." It is as a witness against these two evils that Elijah comes forward.

but kneeling apparently was not (certainly is not) an attitude of prayer in the East. "When ye stand praying, forgive" (Mark xi. 25; and see Matt. vi. 6, &c.).

^a This is to be inferred, as we shall see afterwards, from king Ahaziah's recognition of him by mere description.

1. What we may call the first Act in his life embraces between three and four years—three years and six months for the duration of the drought, according to the statements of the New Testament (Luke iv. 25; Jas. v. 17). and three or four months more for the journey to Horeb and the return to Gilead (1 K. xvii. 1–xix. 21). His introduction is of the most startling description: he suddenly appears before Ahab, as with the unrestrained freedom of Eastern manners he would have no difficulty in doing, and proclaims the vengeance of Jehovah for the apostasy of the king. This he does in the remarkable formula evidently characteristic of himself, and adopted after his departure by his follower Elisha—a formula which includes everything at issue between himself and the king—the name of Jehovah—His being the God of Israel—the Living God—Elijah being His messenger; and then—the special lesson of the event—that the god of power and of nature should be beaten at his own weapons. "As Jehovah, God of Israel, liveth, before Whom I stand," whose constant servant I am, "there shall not be dew nor rain these years, but according to my word." What immediate action followed on this we are not told; but it is plain that Elijah had to fly before some threatened vengeance either of the king, or more probably of the queen (cp. xix. 2). Perhaps it was at this juncture that Jezebel "cut off the prophets of Jehovah" (1 K. xviii. 4). He was directed to the brook Cherith, either one of the torrents which cleave the high table-lands of his native hills, or on the west of Jordan, more in the neighbourhood of Samaria. [CHERITH.] There in the hollow of the torrent-bed he remained, supported in the miraculous manner with which we are all familiar, till the failing of the brook obliged him to forsake it. How long he remained in the Cherith is uncertain. The Hebrew expression is simply "at the end of days," nor does Josephus afford us any more information. A vast deal of ingenuity has been devoted to explaining away Elijah's "ravens." The Hebrew word, עֲרֵבִים, *Orebim*, has been interpreted as "Arabians," as "merchants," as inhabitants of some neighbouring town of *Orbo* or *Orbi*.^a By others Elijah has been held to have plundered a raven's nest—and this twice a day regularly for several months! There is no escape from the plain meaning of the words—occurring as they do twice, in a passage otherwise displaying no tinge of the marvellous—or from the unanimity of all the Hebrew MSS., of all the ancient Versions, and of Josephus.^b

His next refuge was at Zarephath, a Phœnician town lying between Tyre and Sidon, certainly the last place at which the enemy of Baal would be looked for.^c The widow woman in whose house he lived^d seems, however, to have been an Israelite, and no Baal-worshipper, if we may

^a Jerome, quoted by Kennicott, p. 581. These hypotheses, long ago rejected by all competent critics, may be seen brought together in Kell ad loco.

^b This subject is exhausted in a dissertation entitled *Elias corvorum convivor in the Critici Sacri*.

^c Lightfoot quaintly remarks on this that Elijah was the first Apostle to the Gentiles.

^d The traditional scene of his meeting with the widow was in a wood to the south of the town (Mislin, t. 532, who however does not give his authority). In the time of Jerome the spot was marked by a tower (Jerome,

take her adjuration by "Jehovah thy God" as an indication.* Here Elijah performed the miracles of prolonging the oil and the meal; and restored the son of the widow to life.⁶

Here the prophet is first addressed by the title which, although occasionally before used to others, is so frequently applied to Elijah as to become the distinguishing appellation of himself and his successor:—"O thou man of God"—"Now I know that thou art a man of God" (1 K. xvii. 18, 24).

In this, or some other retreat, an interval of more than two years must have elapsed. The drought continued, and at last the fall horrors of famine, caused by the failure of the crops, descended on Samaria. The king and his chief domestic officer divided between them the mournful duty of ascertaining that neither round the springs, which are so frequent a feature of Central Palestine, nor in the nooks and crannies of the most shaded torrent-beds, was there any of the herbage left, which in those countries is so certain an indication of the presence of moisture. No one short of the two chief persons of the realm could be trusted with this quest for life or death—"Ahab went one way by himself, and Obadiah went another way by himself." It is the moment for the reappearance of the prophet. He shows himself first to the minister. There, suddenly planted in his path, is the man whom he and his master have been seeking for more than three years. "There is no nation or kingdom," says Obadiah with true Eastern hyperbole, "whither my lord hath not sent to seek thee;" and now here he stands when least expected. Before the sudden apparition of that wild figure, and that stern, unbroken countenance, Obadiah could not but fall on his face.⁷ Elijah, however, soon calms his agitation—"As Jehovah of hosts liveth, before Whom I stand, I will surely show myself to Ahab;" and thus relieved of his fear that, as on a former occasion, Elijah would disappear before he could return with the king, Obadiah departs to inform Ahab that the man they seek is there. Ahab arrived, Elijah makes his charge—"Thou hast forsaken Jehovah and followed the Baals." He then commands that all Israel be collected to Mount Carmel with the four hundred and fifty prophets of Baal, and the

four hundred of Asherah (Ashtaroth), the latter being under the especial protection of the queen. Why Mount Carmel, which we do not hear of until now, was chosen in preference to the nearer Ebal or Gerizim, is not evident. Possibly Elijah thought it wise to remove the place of the meeting to a distance from Samaria. Possibly in the existence of the altar of Jehovah (xviii. 30)—in ruins, and therefore of earlier erection—we have an indication of an ancient sanctity attaching to the spot. On the question of the particular part of the ridge of Carmel, which formed the site of the meeting, there cannot be much doubt. It is examined elsewhere. [CARMEL.]

There are few more sublime stories in history than this. On the one hand the solitary servant of Jehovah, accompanied by his one attendant; with his wild shaggy hair, his scanty garb, and sheepskin cloak, but with calm dignity of demeanour and the minutest regularity of procedure, repairing the ruined altar of Jehovah with twelve stones, according to the number of the twelve founders of the tribes, and recalling in his prayer the still greater names of Abraham, Isaac, and Israel—on the other hand, the 850 prophets of Baal and Ashtaroth, doubtless in all the splendour of their vestments (2 K. x. 22), with the wild din of their "vain repetitions" and the maddened fury of their disappointed hopes, and the silent people surrounding all—these things form a picture with which we are all acquainted, but which brightens into fresh distinctness every time we consider it. The conclusion of the long day need only be glanced at.⁸ The fire of Jehovah consuming both sacrifice and altar—the prophets of Baal killed, it would seem, by Elijah's own hand (xviii. 40)—the king, with an apathy almost unintelligible, eating and drinking in the very midst of the carnage of his own adherents—the rising storm—the ride across the plain to Jezreel, a distance of at least sixteen miles; the prophet, with true Bedouin endurance, running before the chariot, but also with true Bedouin instinct stopping short of the city, and going no further than the "entrance of Jezreel."

So far the triumph had been complete; but the spirit of Jezebel was not to be so completely overcome, and her first act is a vow of vengeance against the author of this destruction. "God do so to me, and more also," so ran her exclamation, "if I do not make thy life as the life of one of them to-morrow about this time." It was no duty of Elijah to expose himself to unnecessary dangers, and, as at his first introduction, so now, he takes refuge in flight. The danger was great, and the refuge must be distant. The first stage on the journey was Beersheba—"Beersheba which belongeth to Judah," says the narrative, with a touch betraying its Israelitish origin. Here, at the ancient haunt of those fathers of his nation whose memory was so dear to him, and on the very confines of cultivated country, Elijah halted. His servant—according to Jewish tradition the boy of Zarephath—he left in the town; whilst he himself set out alone into the wilderness—the waste uninhabited region which

Ep. Paulae. At a later period a church dedicated to the prophet was erected over the house of the widow, in which his chamber and her kneading-trough were shown (Anton. Martyr. and Phocas, in Reland, p. 985). This church was called τὸ ὕψιστον (*Acta Sanctorum*).

* This must not be much relied on. Zedekiah, son of Chenaanah, one of Ahab's prophets, uses a similar form of words, "Thus saith Jehovah" (1 K. xxii. 11). The apparent inference however from Luke iv. 26 is that she was one of the widows of Israel. In the Jewish traditions her son was the Messiah (Eisenmenger, *Entd. Judæa*, ii. 725).

† Josephus's language (viii. 13, § 3) appears to show that he did not understand the child to have died. But that the death was real and not apparent is evident from the expressions used by the prophet (1 K. xvii. 20, 21). The Jewish tradition, quoted by Jerome, was that this boy was the servant who afterwards accompanied Elijah, and finally became the Prophet Jonah (Jerome, *Pref. to Jonah*; and see the citations from the Talmuds in Eisenmenger, *Entd. Judæa*, ii. 725).

‡ The expressions of Obadiah, "lord" and "slave," show his fear of Elijah; they are those ordinarily used in addressing a potentate.

§ The more so as the whole of this scene is admirably drawn out by Stanley (*S. & P.* pp. 355, 356), and especially in his *Lectures on the Jewish Church*, Lect. xxx.

surrounds the south of Palestine. The labours, anxieties, and excitement of the last few days had proved too much even for that iron frame and that stern resolution. His spirit is quite broken, and he wanders forth over the dreary sweeps of those rocky hills wishing for death—"It is enough! Lord, let me die, for I am not better than my fathers." It is almost impossible not to conclude from the terms of the story that he was entirely without provisions for this or any journey. But God, Who had brought Hia servant into this difficulty, provided him with the means of escaping from it. Whether we are to take the expression of the story literally or not is comparatively of little consequence. In some way little short of miraculous—it might well seem to the narrator that it could be by nothing but an Angel^b—the prophet was awakened from his dream of despondency beneath the solitary bush of the wilderness, was fed with the bread and water which to this day are all a Bedouin's requirements,⁴ and went forward, "in the strength of that food," a journey of forty days "to the mount of God, even to Horeb." Here in "the cave"—one of the numerous caverns in those awful mountains, perhaps some traditional sanctuary of that hallowed region, at any rate well-known—he remained for certainly one night. In the morning came the "word of Jehovah"—the question, "What doest thou here, Elijah? Driven by what hard necessity dost thou seek this spot on which the glory of Jehovah has in former times been so signally shown?" In

answer to this invitation the prophet opens his griefs. He has been very zealous for Jehovah; but force has been vain: one cannot stand against a multitude; none follow him, and he is left alone, flying for his life from the sword which has slain his brethren. The reply comes in that ambiguous and indirect form in which it seems necessary that the deepest communications with the human mind should be couched, to be effectual. He is directed to leave the cavern and stand on the mountain in the open air (ἐν τῷ ὄρει, Josephus), face to face (ἄντη) with Jehovah. Then, as before with Moses (Ex. xxxiv. 6), "The Lord passed by;" passed in all the terror of Hia most appalling manifestations. The fierce wind tore the solid mountains and shivered the granite cliffs of Sinai; the earthquake crash reverberated through the defiles of those naked valleys; the fire burnt in the incessant blaze of Eastern lightning. Like these, in their degree, had been Elijah's own modes of procedure, but the conviction is now forced upon him that in none of these is Jehovah to be known. Then, penetrating the dead silence which followed these manifestations, came the fourth mysterious symbol—the "atill small voice." What sound this was—whether articulate voice or not, we cannot even conjecture; but, low and still as it was, it spoke in louder accents to the wounded heart of Elijah than the roar and blaze which had preceded it. To him no less unmistakably than to Moses, centuries before, it was proclaimed that Jehovah was "merciful and gracious, long-suffering, and abundant in goodness and truth." Elijah knew the call, and, at once stepping forward and hiding his face in his mantle, stood waiting for the Divine communication. It is in the same words as before, and so is his answer; but with what different force must the question have fallen on his ears, and the answer left his lips! "Before his entrance to the cave, he was comparatively a novice; when he left it, he was an initiated man. He had thought that the earthquake, the fire, the wind, must be the great witnesses of the Lord. But he was not in them; not they, but the still small voice had that awe in it which forced the prophet to cover his face with his mantle. What a conclusion of all the past history! What an interpretation of its meaning!" (Manrice, *Prophets and Kings*, p. 136.) Not in the persecutions of Ahab and Jezebel, nor in the slaughter of the prophets of Baal, but in the 7,000 unknown worshippers who had not bowed the knee to Baal, was the assurance that Elijah was not alone as he had seemed to be.

Three commands were laid on him—three changes were to be made. Instead of Benhadad, Hazael was to be king of Syria; instead of Ahab, Jehu the son of Nimshi was to be king of Israel; and Elisha the son of Shaphat was to be his own successor. Of these three commands the first two were reserved for Elisha to accomplish, the last only was executed by Elijah himself. It would almost seem as if his late trials had awakened in him a yearning for that affection and companionship which had hitherto been denied him. His first search was for Elisha. Apparently he soon found him; we must conclude at his native place, Abel-meholah, probably at *Ain el-Ihelueh*, at the south end of the Bethshean

* Although to some it may seem out of place in a work of this nature, yet the writer cannot resist referring to the Oratorio of *Elijah* by Mendelssohn, one of the most forcible commentaries existing on the history of the prophet. The scene in which the occurrences at Beer-sheba are embodied is perhaps the most dramatic and affecting in the whole work.

^b מַלְאָכִי is both a "messenger" and an "Angel." LXX. v. 5, τῆς; and so Josephus (viii. 13, § 7).

* "One Rotem tree," Hebrew, רוֹתֵם אֶחָד. The indented rock opposite the gate of the Greek convent, *Deir Mar Elias*, between Jerusalem and Bethlehem, which is now shown to travellers as the spot on which the prophet rested on this occasion (Bonar; Porter, *Handbook*, &c.), appears at an earlier date not to have been so restricted, but was believed to be the place on which he was "accustomed to sleep" (Sandys, lib. iii. p. 176; Maundrell, *Ear. Trav.* p. 456), and the site of the convent as that where he was born (Gaysford, 1506, in Bonar, p. 117). Neither the older nor the later story can be believed; but it is possible that they may have originated in some more trustworthy tradition of his having rested here on his southward journey, in all probability taken along this very route. See a curious statement by Quaresmius of the extent to which the rock had been defaced in his own time "by the plety or implety" of the Christian pilgrims (*Elucidatio*, ii. 606; cp. Doubdan, *Voyage*, &c., p. 114).

⁴ The LXX. adds to the description the only touch wanting in the Hebrew text—"a cake of meal"—ἀλυσίτης.

* The Hebrew word has the article, הַמְעֵרָה; and so too the LXX., τὸ σπηλαίον. The cave is now shown "in the secluded plain below the highest point of *Jebel Mûsa*;" "a hole just large enough for a man's body," beside the altar in the chapel of Elijah (Stanley, p. 49; Rob. i. 103).

^f Hebrew, לֵיָּל. A. V. "lodge;" but in Gen. xix. 2, accurately, "tarry all night."

plain in the Jordan valley. [ABEL-MEHOLAH.] Elisha was ploughing at the time,⁶ and Elijah "passed over to him"—possibly crossed the river⁷—and cast his mantle, the well-known sheepskin cloak, upon him, as if, by that familiar action, claiming him for his son. A moment of hesitation—but the call was quickly accepted; and then commenced that long period of service and intercourse which continued till Elijah's removal, and which after that time procured for Elisha one of his best titles to esteem and reverence—"Elisha the son of Shophat, who poured water on the hands of Elijah."

2. Ahab and Jexebel now probably believed that their threats had been effectual, and that they had seen the last of their tormentor. At any rate, this may be inferred from the events of chap. xxi. Foiled in the wish to acquire the ancestral plot of ground of Naboth by the refusal of that sturdy peasant to alienate the inheritance of his fathers, Ahab and Jexebel proceeded to possess themselves of it by main force, and by a degree of monstrous injustice which shows clearly enough how far the elders of Jezreel had forgotten the laws of Jehovah, and how abject was their submission to the will of their mistress. At her orders Naboth was falsely accused of blaspheming God and the king, was with his sons⁸ stoned and killed, and his vineyard then—as having belonged to a criminal—became at once the property of the king. [NABOTH.]

Ahab lost no time in entering upon his new acquisition. Apparently the very next day after the execution he proceeded in his chariot to take possession of the coveted vineyard. Behind him—probably in the back part of the chariot—rode his two pages, Jehu and Bidkar (2 K. ix. 26). But the triumph was a short one. Elijah had received an intimation from Jehovah of what was taking place, and, rapidly as the accusation and death of Naboth had been hurried over, he was there to meet his ancient enemy, and as an enemy he does meet him—as David went out to meet Goliath—on the very scene of his crime. Suddenly, when least expected and least wished for, he confronts the miserable king. And then follows the curse, in terms fearful to any Oriental—peculiarly terrible to a Jew—and most of all significant to a successor of the apostate princes of the northern kingdom—"I will take away thy posterity; I will cut off from thee even thy very dogs; I will make thy house like that of Jeroboam and Baasha; thy blood shall be shed

in the same spot where the blood of thy victims was shed last night; thy wife and thy children shall be torn in this very garden by the wild dogs of the city, or as common carrion devoured by the birds of the sky"—the large vultures which in Eastern climes are always wheeling aloft under the clear blue sky, doubtless suggesting the expression to the prophet. How tremendous was this scene we may gather from the fact that after the lapse of at least twenty years Jehu was able to recall the very words of the prophet's burden, to which he and his companion had listened as they stood behind their master in the chariot. The whole of Elijah's denunciation may possibly be recovered by putting together the words recalled by Jehu, 2 K. ix. 26, 36, 37, and those given in 1 K. xxi. 19-25.

3. A space of three or four years now elapses (cp. 1 K. xxii. 1, 51; 2 K. i. 17), before we again catch a glimpse of Elijah. The denunciations uttered in the vineyard of Naboth have been partly fulfilled. Ahab is dead, and his son and successor, Ahaziah, has met with a fatal accident, and is on his death-bed, after a short and troubled reign of less than two years (2 K. i. 1, 2; 1 K. xxii. 51). In his extremity he sends to an oracle or shrine of Baal at the Philistine town of Ekron to ascertain the issue of his illness. But the oracle is nearer at hand than the distant Ekron. An intimation is conveyed to the prophet, probably at that time inhabiting one of the recesses of Carmel; and, as on the former occasions, he suddenly appears on the path of the messengers, without preface or inquiry utters his message of death, and as rapidly disappears. The tone of his words is as national on this as on any former occasion, and, as before, they are authenticated by the Name of Jehovah—"Thus saith Jehovah, Is it because there is no God in Israel that ye go to inquire of Baalzebub, god of Ekron?" The messengers returned to the king too soon to have accomplished their mission. They were possibly strangers; at any rate they were ignorant of the name of the man who had thus interrupted their journey. But his appearance had fixed itself in their minds, and their description at once told Ahaziah, who must have seen the prophet about his father's court or have heard him described in the harem, who it was that had thus reversed the favourable oracle which he was hoping for from Ekron. The "hairy man"—the "lord of hair," so the Hebrew reading⁹ runs—with a belt of rough skin round his loins, who came and went in this secret manner, and uttered his fierce words in the Name of the God of Israel, could be no other than the old enemy of his father and mother, Elijah the Tishbite. But, ill as he was, this check only roused the wrath of Ahaziah, and, with the spirit of his mother, he at once seized the opportunity of possessing himself of the person of the man who had been for so long the evil genius of his house. A captain was dispatched, with a party of fifty, to take Elijah prisoner. He was sitting on the top of "the mount,"¹⁰ i.e. probably of Carmel. The officer approached and addressed the prophet by the title which, as before noticed, is most frequently

⁶ Eleven yoke of oxen, with their ploughs, were before him, and he was with the twelfth plough at the end. This mode of ploughing is still common in Palestine (Thomson, *Land and the Book*, p. 144).

⁷ The word is that always employed for crossing the Jordan.

⁸ See also Ruth iii. 4-14. Ewald, *Allerthümer*, p. 191, n. A trace of a similar custom survives in the German word *Mantelkind*.

⁹ "The blood of Naboth and the blood of his sons" (2 K. ix. 26; cp. Josh. vii. 24). From another expression in this verse—yesternight (עֵרָא, A. V. and R. V. "yesterday"), we may perhaps conclude that like a later trial on a similar charge, also supported by two false witnesses—the trial of our Lord—it was conducted at night. The same word—yesternight—prompts the inference that Ahab's visit and encounter with Elijah happened on the very day following the murder.

¹⁰ The Hebrew word is the same.

¹⁰ See note ⁹, p. 906.

¹¹ עֵרָא (2 K. i. 9; A. V., inaccurately, "as hill;" R. V. "the hill").

applied to him and Elisha—"O man of God, the king hath spoken: come down." "And Elijah answered and said, If I be a man of God, then let fire come down from heaven and consume thee and thy fifty! And there came down fire from heaven and consumed him and his fifty." A second party was sent, only to meet the same fate. The altered tone of the leader of a third party, and the assurance of God that His servant need not fear, brought Elijah down. But the king gained nothing. The message was delivered to his face in the same words as it had been to the messengers, and Elijah, so we must conclude, was allowed to go harmless. This was his last interview with the house of Ahab. It was also his last recorded appearance in person against the Baal-worshippers.

Following as it did on Elijah's previous course of action, this event must have been a severe blow to the enemies of Jehovah. But impressive as it doubtless was to the contemporaries of the prophet, the story possesses a far deeper significance for us than it could have had for them. While it is most characteristic of the terrors of the earlier dispensation under which men were then living, it is remarkable as having served to elicit from the mouth of a greater than even Elijah an exposition, no less characteristic, of the distinction between that severe rule and the gentler dispensation which He came to introduce. It was when our Lord and His disciples were on their journey, through this very district, from Galilee to Jerusalem, and when smarting from the churlish inhospitality of some Samaritan villagers, that—led to it by the distant view of the heights of Carmel, or, perhaps, by some traditional name on the road—the impetuous zeal of the two "sons of thunder" burst forth: "Lord, wilt Thou that we command fire to come down from heaven and consume them, even as Elijah did?" But they little knew the Master they addressed. "He turned and rebuked them, and said, Ye know not what manner of spirit ye are of. For the Son of Man is not come to destroy men's lives, but to save them" (Luke ix. 51-56). As if He had said, "Ye are mistaking and confounding the different standing points of the Old and New Covenants; taking your stand upon the Old—that of an avenging righteousness, when you should rejoice to take it upon the New—that of a forgiving love." (Trench, *Miracles*, ch. iv.)

4. It must have been shortly after the death of Ahaziah that Elijah made a communication with the southern kingdom. It is the only one of which any record remains, and its mention is the first and last time that the name of the prophet appears in the Books of Chronicles. Mainly devoted, as these Books are, to the affairs of Judah, this is not surprising. The alliance between his enemy Ahab and Jehoshaphat cannot have been unknown to the prophet, and it must have made him regard the proceedings of the kings of Judah with more than ordinary interest. When, therefore, Jehoram the son of Jehoshaphat, who had married the daughter of Ahab, began "to walk in the ways of the kings of Israel, as did the house of Ahab, and to do that which was evil in the sight of Jehovah,"

Elijah sent him a letter^p denouncing his evil doings, and predicting his death (2 Ch. xxi. 12-15). This letter has been considered as a great difficulty, on the ground that Elijah's removal must have taken place before the death of Jehoshaphat (from the terms of the mention of Elisha in 2 K. iii. 11), and therefore before the accession of Joram to the throne of Judah. But admitting that Elijah had been translated before the expedition of Jehoshaphat against Moab, it does not follow that Joram was not at that time; and before his father's death, king of Judah; Jehoshaphat occupying himself during the last six or seven years of his life in going about the kingdom (2 Ch. xix. 4-11), and in conducting some important wars, amongst others that in question against Moab, while Joram was concerned with the more central affairs of the government (2 K. iii. 7, &c.). That Joram began to reign during the lifetime of his father Jehoshaphat is stated in 2 K. viii. 16. According to one record (2 K. i. 17), which immediately precedes the account of Elijah's last acts on earth, Joram was actually on the throne of Judah at the time of Elijah's interview with Ahaziah; and though this is modified by the statements of other places^q (2 K. iii. 1, viii. 16), yet it is not invalidated, and the conclusion is almost inevitable, as stated above, that Joram ascended the throne some years before the death of his father. [See JORAM; JEHOSEPHAT; JUDAH.] In its contents the letter bears a strong resemblance to the speeches of Elijah,^r while in the details of style it is very peculiar, and quite different from the narrative in which it is imbedded (Bertheau, *Chronik* in loco).

5. The closing transaction of Elijah's life introduces us to a locality heretofore unconnected with him. Hitherto we have found him in the neighbourhood of Samaria, Jezreel, and Carmel, only leaving these northern places on actual emergency, but we now find him on the frontier of the two kingdoms, at the holy city of Bethel, with the sons of the prophets of Jericho, and in the valley of the Jordan (2 K. ii. 1, &c.).

It was at GILGAL—probably not the ancient place of Joshua and Samuel, but another of the same name still surviving on the western edge

^p פָּתָבָה, "a writing," almost identical with the word used in Arabic at the present day. The ordinary Hebrew word for a letter is *Sepher*, סֵפֶר, a book.

^q The second statement of Jehoram's accession to Israel (in 2 K. iii. 1) seems inserted there to make the subsequent narrative more complete. Its position there, subsequent to the story of Elijah's departure, has probably assisted the ordinary belief in the difficulty in question. [The student will find this "difficulty" diversely treated by Keil and the *Speaker's Comm.* on the one hand and by Bertheau^s and Oettli (in Strack u. Zöckler's *Agg. Komm.*) on the other, in their notes on 2 Ch. xxi. 12.—F.]

^r The ancient Jewish commentators get over the apparent difficulty by saying that the letter was written and sent after Elijah's translation. Others believed that it was the production of Elisha, for whose name that of Elijah had been substituted by copyists. The first of these requires no answer. To the second, the severity of its tone, as above noticed, is a sufficient reply. Josephus (*Ant.* ix. 5, § 2) says that the letter was sent while Elijah was still on earth (see Lightfoot, *Chronicles*, &c. "Jehoram." Other theories will be found in Fabricius, *Cod. Pseudepigr.* p. 1075, and Otho, *Iez. Rabb.* p. 157).

^s R. V., following a majority of the most important MSS., omits the words "even as Elijah did," and from "and said" to "save them."

of the hills of Ephraim*—that the prophet received the Divine intimation that his departure was at hand. He was at the time with Elisha, who seems now to have become his constant companion. Perhaps his old love of solitude returned upon him, perhaps he wished to spare his friend the pain of a too sudden parting; in either case he endeavours to persuade Elisha to remain behind while he goes on an errand of Jehovah. "Tarry here, I pray thee, for Jehovah hath sent me to Bethel." But Elisha will not so easily give up his master,—*"As Jehovah liveth and as thy soul liveth, I will not leave thee."* They went together to Bethel.¹ The event which was about to happen had apparently been communicated to the sons of the prophets at Bethel, and they inquire if Elisha knew of his impending loss. His answer shows how fully he was aware of it. "Yea," says he, with all the emphasis possible, *"indeed I do"* know it; hold ye your peace." But though impending, it was not to happen that day. Again Elijah attempts to escape to Jericho, and again Elisha protests that he will not be separated from him. Again, also, the sons of the prophets at Jericho make the same unnecessary inquiries, and again Elisha replies as emphatically as before. Elijah makes a final effort to avoid what they both so much dread. "Tarry here, I pray thee, for Jehovah hath sent me to the Jordan." But Elisha is not to be conquered, and the two set off across the undulating plain of burning sand, to the distant river,—Elijah in his mantle or cape of sheepskin, Elisha in ordinary clothes (נָכָה, v. 12). Fifty men of the sons of the prophets ascend the abrupt heights behind the town—the same to which a late tradition would attach the scene of our Lord's temptation—and which command the plain below, to watch with the clearness of Eastern vision what happens in the distance. Talking as they go, the two reach the river, and stand on the shelving bank beside its swift brown current. But they are not to stop even here. It is as if the aged Gileadite cannot rest until he again sets foot on his own side of the river. He rolls up² his mantle as into a staff, and with his old energy strikes the waters as Moses had done before him,—strikes them as if they were an enemy;³ and they are divided hither and thither, and they two go over on dry ground. What follows is best told in the simple words of the narrative (R. V.): "And it came to pass when they were⁴ gone over, that Elijah said unto Elisha, Ask what I shall do for thee, before I be taken from thee. And Elisha said, I pray

* The grounds for this inference are given under ELISHA (p. 920, col. 1). See also GILGAL.

¹ The Hebrew word "went down" is a serious difficulty, if Gilgal is taken to be the site of Joshua's camp and the resting-place of the Ark, since that is more than 3000 feet below Bethel. But this is avoided by adopting the other Gilgal to the N.W. of Bethel, and on still higher ground, which also preserves the sequence of the journey to Jordan (see Stanley, *S. & P.* p. 308, note). Some considerations in favour of this adoption will be found under ELISHA.

² יָרָהּ, יָרָהּ = "Also I know it;" Κάτω ἔγνωκα.

³ נָכָה. The above is quite the force of the word.

⁴ The word is נָכָה, used of smiting in battle; generally with the sense of wounding (Gen. p. 883).

⁵ LXX. "As they were going over," ἐν τῷ διαβήναι.

thee let a double portion of thy spirit be upon me. And he said, Thou hast asked a hard thing: nevertheless, if thou see me when I am taken from thee, it shall be so unto thee; but if not, it shall not be so. And it came to pass, as they still went on, and talked, that, behold, there appeared a chariot of fire and horses of fire, which parted them both asunder, and Elijah went up by the whirlwind into heaven" (the skies).^a Well might Elisha cry with bitterness,^b "My father, my father." He was gone who, to the discerning eye and loving heart of his disciple, had been "the chariot of Israel and the horsemen thereof" for so many years; and Elisha was at last left alone to carry on a task to which he must often have looked forward, but to which in this moment of grief he may well have felt unequal. He saw him no more; but his mantle had fallen, and this he took up—at once a personal relic and a symbol of the double portion of the spirit of Elijah with which he was to be clothed. Little could he have realised, had it been then presented to him, that he whose greatest claim to notice was that he had "poured water on the hands of Elijah" should hereinafter possess an influence which had been denied to his master—should, instead of the terror of kings and people, be their benefactor, adviser, and friend, and that over his death-bed a king of Israel should be found to lament with the same words that had just burst from him on the departure of his stern and silent master, "My father, my father, the chariot of Israel and the horsemen thereof."

And here ends all the direct information which is vouchsafed to us of the life and work of this great prophet. Truly he "stood up as a fire, and his word burnt as a lamp" (Ecclus. xlviii. 1). How deep was the impression which he made on the mind of the nation may be judged from the fixed belief which many centuries after prevailed that Elijah would again appear for the relief and restoration of his country. The prophecy of Malachi (iv. 6)^c was possibly at once a cause and an illustration of the strength of this belief. What it had grown to at the time of our Lord's birth, and how continually the great prophet

^a The statements of the text hardly give support to the usual conception of Elijah's departure as represented by painters and in popular discourses. It was not the chariot of fire that he went up into the skies. The fire served to part the master from the disciple, to show that the severance had arrived, but Elijah was taken up by the fierce wind of the tempest. The word סָרָה involves no idea of *whirling*, and is frequently rendered in the A. V. "storm" or "tempest." The term "the skies" has been employed above to translate the Hebrew הַשָּׁמַיִם, because we attach an idea to the word "heaven" which does not appear to have been present to the mind of the ancient Hebrews. In the 4th century the site of Elijah's ascension was pointed out on a little hill, on the left bank of the Jordan, near the place of Christ's Baptism (*Itin. Hieros.*).

^b נָכָה, the word used e.g. for the "great and bitter cry" when the first-born were killed in Egypt.

^c The expression in Malachi is "Elijah the prophet." From this unusual title some have believed that another Elijah was intended. The LXX., however, either following a Hebrew text different from that which we possess, or falling in with the belief of their times, insert the usual designation, "the Tishbite." (See Lightfoot, *Exerc.* on Luke i. 17.)

was present to the expectations of the people, we do not need the evidence of the Talmud to assure us,⁴ it is patent on every page of the Gospels. Each remarkable person, as he arrives on the scene, be his habits and characteristics what they may—the stern John equally with his gentle Successor—is proclaimed to be Elijah (Matt. xvi. 14; Mark vi. 15; John i. 21). His appearance in glory on the Mount of Transfiguration does not seem to have startled the disciples. They were “sore afraid,” but not apparently surprised. On the contrary, St. Peter immediately proposes to erect a tent for the prophet whose arrival they had been so long expecting. Even the cry of our Lord from the Cross, containing as it did but a slight resemblance to the name of Elijah, immediately suggested him to the bystanders. “He calleth for Elijah.” Let be, let us see if Elijah will come to save Him.”

How far this expectation was fulfilled in John, and the remarkable agreement in the characteristics of these two men, will be considered under JOHN THE BAPTIST.

But, on the other hand, the deep impression which Elijah had thus made on his nation only renders more remarkable the departure which the image conveyed by the later references to him evinces, from that so sharply presented in the records of his actual life. With the exception of the eulogiums contained in the catalogues of worthies in the Book of Jesus the son of Sirach (ch. xlviii.) and I Macc. ii. 58, and the questionable allusion in Luke ix. 54 (p. 911, n.*), none of these later references allude to his works of destruction or of portent. They all set forth a very different side of his character to that brought out in the historical narrative. They speak of his being a man of like passions with ourselves (Jas. v. 17); of his kindness to the widow of Sarepta (Luke iv. 25); of his “restoring all things” (Matt. xvii. 11); “turning the hearts of the fathers to the children, and the disobedient to the wisdom of the just” (Mal. iv. 5, 6; Luke i. 17). The moral lessons to be derived from these facts must be expanded elsewhere than here; it will be sufficient in this place to call attention to the great differences which may exist between the popular and contemporary view of an eminent character, and the real settled judgment formed in the progress of time, when the excitement of his more brilliant but more evanescent

⁴ He is recorded as having often appeared to the wise and good Rabbis—at prayer in the wilderness, or on their journeys—generally in the form of an Arabian merchant (Eisenmenger, l. 11; il. 402-7). At the circumcision of a child a seat was always placed for him, that as the zealous champion and messenger of the “covenant” of circumcision (1 K. xix. 14; Mal. iii. 1) he might watch over the due performance of the rite. During certain prayers the door of the house was set open that Elijah might enter and announce the Messiah (Eisenmenger, l. 685). His coming will be three days before that of the Messiah, and on each of the three he will proclaim, in a voice which shall be heard all over the earth, peace, happiness, salvation, respectively (Eisenmenger, p. 696). So firm was the conviction of his speedy arrival, that when goods were found and no owner appeared to claim them, the common saying was, “Put them till Elijah comes” (Lightfoot, *Exercit. Matt. xvii. 10*; John i. 21). The same customs and expressions are still in use among the stricter Jews of this and other countries (see *Revue des deux Mondes*, xiv. 131, &c.; Hamburger, *R.E.J.* a. n. *Messias*).

deeds has passed away. Precious indeed are the scattered hints and faint touches which enable us thus to soften the harsh outlines or the discordant colouring of the earlier picture. In the present instance they are peculiarly so. That wild figure, that stern voice, those deeds of blood, which stand out in such startling relief from the pages of the old records of Elijah, are seen by us all silvered over with the “white and glistering” light of the Mountain of Transfiguration. When he last stood on the soil of his native Gilead, he was destitute, afflicted, tormented, wandering about “in sheep-skins and goat-skins, in deserts and mountains, and dens and caves of the earth.” But these things have passed away into the distance, and with them has receded the fiery zeal, the destructive wrath, which accompanied them. Under that heavenly light they fall back into their proper proportions, and Ahab and Jezebel, Baal and Ashtaroth are forgotten, as we listen to the prophet talking to our Lord—talking of that event which was to be the consummation of all that He had suffered and striven for—“talking of His decease which He should accomplish at Jerusalem.”

Elijah has been canonized in the Greek and Latin Churches. Among the Greeks *Már Eliás* is the patron of elevated spots, and many a conspicuous summit in Greece is called by his name.* The service for his day—*Ἡλίας μεγάλωνος*—will be found in the *Menaion* on July 20, a date recognised by the Latin Church also.[†] The convent bearing his name, *Deir Már Eliás*, between Jerusalem and Bethlehem, is well known to travellers in the Holy Land. It purports to be situated on the spot of his birth, as already observed. Other convents bearing his name once existed in Palestine: in *Jebel Ajlún*, the ancient Gilead (Ritter, *Syrien*, pp. 1029, 1066, &c.); at *Ezra* in the *Haurán* (Burckhardt, *Syria*, p. 59), and at the more famous establishment on Carmel.

It is as connected with the great Order of the barefooted Carmelites that Elijah is celebrated in the Latin Church (see “Carmeliten-Orden” in Wetzlar u. Welte’s *Kirchen Lex.*). According to the statements of the Breviary (*Off. B. Mariæ Virginis de Monte Carmelo, Julii 16*) the connexion arose from the dedication to the Virgin of a chapel on the spot from which Elijah saw the cloud (an accepted type of the Virgin Mary) rise out of the sea. But other legends trace the origin of the Order to the great prophet himself as the head of a society of anchorites inhabiting Carmel; and even as himself dedicating the chapel in which he worshipped to the Virgin.[‡] These things are matters of controversy in the Roman Church, Baronius and others having proved that the Order was founded in 1181, a date which is repudiated by the Carmelites (see extracts in Fabricius, *Cod. Pseudepigr.* p. 1077).

In the Muhammedan traditions *Hiyās* is said to have drunk of the Fountain of Life, “by

* See this fact noticed in Clark’s *Peloponnesus and Morca*, p. 190.

† See the *Acta Sanctorum*, July 20. By Cornelius a Lapide it is maintained that his ascent happened on that day, in the 19th year of Jebozaphat (Kell, p. 331).

‡ St. John of Jerusalem, as quoted by Mistlin, *Libroz Saints*, il. 49; and the Bulls of various Popes enumerated by Quaresimus, vol. ii.

virtue of which he still lives, and will live to the day of Judgment." He is by some confounded with St. George and with the mysterious *el-Khidr*, one of the most remarkable of the Moslem saints (see Lane's *Arabian Nights*, Introd. note 2; also *Selections from the Kuran*, pp. 221, 222). The Persian *Sûfis* are said to trace themselves back to Elijah (Fabricius, p. 1077).

Among other traditions it must not be omitted that the words "Eys hath not seen," &c. (1 Cor. ii. 9), which are most probably quoted by the Apostle from Is. lxiv. 4, were, according to an ancient belief, from "the Apocalypse, or mysteries of Elijah," τὰ ἑλίας ἀποκρυφά. The first mention of this appears to be by Origen (*Hom.* on Matt. xvii. 9), and it is noticed with disapproval by Jerome, ad *Pammachium* (see Fabricius, p. 1072).

By Epiphanius, the words "Awake, thou that sleepest," &c. (Ephes. v. 14), are inaccurately alleged to be quoted "from Elijah," i.e. the portion of the O. T. containing his history—παρὰ τῷ ἑλῳ (cp. Rom. xi. 2).

Monographs on Elijah are (*inter alia*):—Frischmuth, *De Eliæ Prophetæ Nom.* &c., in the *Critici Sacri*; *Elias Thesbitæ*, by Aegidius Camartus, 4to, Paris, 1631; Milligan, *Elijah, his Life and Times* ("Men of the Bible" series). There are also dissertations of great interest on the ravens, the mantle, and Naboth, in the *Critici Sacri*.^a

[G.]

ELI'KA (עֲלִיכָא; B. om., A. 'Evaká; *Elica*), a Harodite, i.e. from some place called Charod; one of David's guard (2 Sam. xxiii. 25). The name is omitted in the corresponding list of 1 Ch. xi.—to account for which see Kennicott's conjecture (*Dissertation*, &c., p. 182)—and not recognised in 1 Ch. xxvii. (Driver). [G.] [F.]

E'LIM (עֲלִימ; אליμ), mentioned Ex. xv. 27, Num. xxxiii. 9, as the second station where the Israelites encamped after crossing the Red Sea. It is distinguished as having had "twelve wells (rather "fountains," מְנוֹת) of water, and threescore and ten palm trees." Laborde (*Geographical Commentary* on Exod. xv. 27) supposed *Wady Useit* to be Elim, the second of four wádys lying between 29° 7' and 29° 20', which descend from the range of et-Tih (here nearly parallel to the shore), towards the sea, and which the Israelites, going from N.W. to S.E. along the coast, would come upon in the following order:—*W. Ghurundel* (where the "low hills begin," Stan-

ley, *S. & P.* p. 35), *W. Useit*, *W. Thal*, and *W. Shu-beikh*; the last being in its lower part called also *W. Taiyibeh*, or having a junction with one of that name. Between *Useit* and *Taiyibeh*, the coast-range of these hills rises into the *Gebel Humam*, "lofty and precipitous, extending in several peaks along the shore, apparently of chalky limestone, mostly covered with flints; . . . its precipices . . . cut off all passage alongshore from the hot springs (lying a little W. of S. from the mouth of *Wady Useit*, along the coast) to the mouth of *W. Taiyibeh*" (Rob. i. 102; cp. Stanley, *S. & P.* p. 35). Hence, between the courses of these wádys the track of the Israelites must have been inland. Dean Stanley says, "Elim must be *Ghurundel*, *Useit*, or *Taiyibeh*" (p. 35); elsewhere (p. 66) that "one of two valleys, or perhaps both, must be Elim;" these appear from the sequel to be *Ghurundel* and *Useit*, "fringed with trees and shrubs, the first vegetation he had met with in the desert;" among these are "wild palms," not stately trees, but dwarf or savage, "tamarisks," and the "wild acacia." Modern opinion is now almost unanimous in finding Elim in *Wady Ghurundel* (see Knobel-Dillmann in loco; *Ord. Survey of Sinai*, i. 151; Harper, *The Bible and Modern Discoveries*, p. 118). [WILDERNESS OF THE WANDERING.] [H. H.]

ELI-MELECH (עֲלִימֶלֶךְ = *God or my God is King*; 'Ελιμέλεκ), a man of the tribe of Judah, and of the family of the Hexronites and the kinsman of Boaz, who dwelt in Bethlehem-Ephratah in the days of the Judges. In consequence of a great dearth in the land he went with his wife Naomi, and his two sons, Mahlo and Chilion, to dwell in Moab, where he and his sons died without posterity. Naomi returned to Bethlehem with Ruth, her daughter-in-law, whose marriage with Boaz, "a mighty man of wealth, of the family of Elimelech," "her husband's kinsman," forms the subject of the Book of Ruth (Ruth i. 2, 3; ii. 1, 3; iv. 3, 9). [A. C. H.]

EL-IO-E'NAI (עֲלִי-יוֹ-עֲנַי; B. 'Ελι-ιω-εναι, A. 'Ελιο-ηναι; *Elio-enai*). 1. Head of one of the families of the sons of Becher, the son of Benjamin (1 Ch. vii. 8).

2. Head of a family of the Simeonites (1 Ch. iv. 36; B. 'Ελιο-εναι, A. -ηναι).

3. (accus. EL-IHO-E'NAI, עֲלִי-יוֹ-עֲנַי). Seventh son of Meshelemiah, the son of Kōre, of the sons of Asaph, a Korhite Levite, and one of the doorkeepers of the "house of Jehovah" (1 Ch. xvi. 3; B. 'Ελιο-εναι, A. -ηναι). It appears from v. 14 that the ~~last~~ fell to Meshelemiah (Shelemiah) to have the east gate; and as we learn from v. 9 that he had eighteen strong men of his sons and brethren under him, we may conclude that all his sons except Zechariah the first-born (v. 14) served with him, and therefore Elio-enai likewise. There were six Levites daily on guard at the east gate, whose turn would therefore come every third day.

4. Eldest son of Neariah, the son of Shemaiah, 1 Ch. iii. 23, 24 [B. 'Ελιο-εναι or -εν, A. 'Ελιο-ηναι or -ωνναι]. According to the present Heb. text he is in the seventh generation from Zerubbabel, or about contemporary with Alexander the Great; but there are strong grounds for believing that Shemaiah is identical with Shimei (c. 19).

^a The above article remains substantially as written for the first edition of this work. Another view of Elijah, which allows to him a real personality and activity, but rejects most of his history as legendary, may be seen in Wellhausen (*Hist. of Israel*, p. 287 sq. [ed. 1885]), Stade (*Gesch. d. Volk. Isr.* i. 524, &c.), and Renan (*op. cit.* li. ch. vii.).—[F.]

^a Root עָלָה, or עָלָה, "to be strong," hence "a strong tree," properly either an "oak" or "terebinth," but also generally "tree;" here in plur. as "the trees of the desert" (Stanley, *S. & P.* p. 515). Elth or Elath is another plur. form of same.

^b Seetzen (*Reisen*, 1854, iii. 114–117) traversed them all, and reached Howara in about a six hours' ride. He was going in the direction opposite to the routes of Robinson and Stanley; and it is interesting to compare his notes of the local features, caught in the inverse order, with theirs.

Zerubbabel's brother (see *Genal. of our Lord*, pp. 107-109, and ch. vii.).

5. A priest of the sons of Pashur, in the days of Ezra, one of those who had married foreign wives, but who, at Ezra's instigation, put them away with the children born of them, and offered a ram for a trespass offering (Ezra x. 22, B. 'Ελιωνά, A. -ῥναί). He is possibly the same person as is mentioned in Neh. xii. 41 (B. om. A. 'Ελιωνά), as one of the priests who accompanied Nehemiah with trumpets at the dedication of the wall of Jerusalem. He is called ELIONAS, 1 Esd. ix. 22.

6. (עֲלִיפָלַח). An Israelite, of the sons of Zattu, who had also married a strange wife (Ezra x. 27: B. 'Ελιωνά, N. -αν, A. -ῥναί). From the position of Zattu in the lists (Ezra ii. 8; Neh. vii. 13, x. 14) it was probably a family of high rank. ELIOENAI is corrupted to ELIADAS, 1 Esd. ix. 28. [A. C. H.]

EL-IO'NAS. 1. (B. 'Ελιωνάς, A. 'Ελιωνάς; Vulg. omits), 1 Esd. ix. 22. [ELIOENAI.]

2. (B. 'Ελιωδός, A. -νας; Noneas), 1 Esd. ix. 32. [ELIEZER.] [G.] [F.]

ELIPHAL (עֲלִיפָלַח = *God or my God hath judged*; B. 'Ελφάρ, A. 'Ελιφάδ; *Eliphal*), son of Ur; one of the members of David's guard (1 Ch. xi. 35). In the parallel list in 2 Sam. xxiii. the name is given as ELIPHELET, and the names in connexion with it are much altered. [UR.]

ELI-PHA'LAT ('Ελιφάδ; *Eliphalach*), 1 Esd. ix. 33. [ELIPHELET.] [G.] [F.]

ELI-PHA'LET (עֲלִיפָלַח = *God or my God is deliverance*; 'Ελιφάδ; *Eliphalath*). 1. The last of the thirteen sons born to David, by his wives, after his establishment in Jerusalem (2 Sam. v. 16, B. 'Ελιφάδ, A. -ι; 1 Ch. xiv. 7, B. 'Εμφάδ; N. 'Ερ, A. 'Ελιφάδ). Elsewhere, when it does not occur at a pause, the name is given with the shorter vowel—ELIPHELET (1 Ch. iii. 8). Equivalent to Eliphalet are the names ELPALET and PHALITIEL.

2. 1 Esd. viii. 49. [ELIPHELET, 5.] [G.] [F.]

ELIPHAZ (עֲלִיפָז, of uncertain meaning; 'Ελιφός; *Eliphas*). 1. The son of Esau and Adah, and father of Teman (Gen. xxxvi. 4; 1 Ch. i. 35, 36).

2. The chief of the "three friends" of Job. He is called "the Temanite;" hence it is naturally inferred that he was a descendant of Teman (the son of the first Eliphaz), from whom a portion of Arabia Petraea took its name, and whose name is used as a poetical parallel to Edom in Jer. xlix. 20. On him falls the main burden of the argument, that God's retribution in this world is perfect and certain, and that consequently suffering must be a proof of previous sin (Job iv. v. xv. xxii.). His words are distinguished from those of Bildad and Zophar by greater calmness and elaboration, and in the first instance by greater gentleness towards Job, although he ventures afterwards, apparently from conjecture, to impute to him special sins. The great truth brought out by him is the unapproachable majesty and purity of God (iv. 12-21, xv. 12-14). [JOB, BOOK OF.] But still, with the other two friends, he is condemned for having,

in defence of God's providence, spoken of Him "the thing that was not right," i.e. by refusing to recognise the facts of human life, and by contenting himself with an imperfect retribution as worthy to set forth the righteousness of God. On sacrifice and the intercession of Job, all three are pardoned. [A. B.]

ELI-PHELE'Ḥ (עֲלִיפְלֵחַ = *God or my God distinguishes* (him); *Eliphalu*), a Merarite Levite; one of the gatekeepers (מְשָׁרְשֵׁי, A. V. "porters") appointed by David to play on the harp "on the Shemiith" on the occasion of bringing up the Ark to the city of David (1 Ch. xv. 18 [BN. 'Ελιφνέ, A. 'Ελιφάδ], 21 [B. 'Εμφανάλ, N. -νι-, A. 'Ελιφάλας]). [G.] [F.]

ELI-PHELE'T (עֲלִיפְלֵחַ = *God or my God is deliverance*; *Eliphalath, Eliphelet*).

1. (B. 'Ελιφάλη, A. 'Ελιφάλετ.) The name of a son of David, one of the children born to him, by his wives, after his establishment in Jerusalem (1 Ch. iii. 6). In the list in 2 Sam. v. 15, 16, this name and another are omitted; while in another list in 1 Ch. xiv. 5, 6, it is given as ELPALET.

2. (B. 'Ελιφάδ), another son of David, belonging also to the Jerusalem family, and apparently the last of his sons (1 Ch. iii. 8). In the other list, occurring at the pause, the vowel is lengthened and the name becomes ELIPHALET.

It is believed by some that there were not two sons of this name; but that, like Nogah, one is merely a transcriber's repetition. The two are certainly omitted in Samuel, but on the other hand they are inserted in two separate lists in Chronicles, and in both cases the number of sons is summed up at the close of the list.

3. (B. 'Αλιφάλεθ, A. 'Ελιφάλετ), son of Ahasbai, son of the Maachathite. One of the thirty warriors of David's guard (2 Sam. xxiii. 34). In the list in 1 Ch. xi. the name is abbreviated into ELIPHAL.

4. Son of Eshak, a descendant of king Saul through Jonathan (1 Ch. viii. 39, B. 'Ελιφάλες, A. -ετ).

5. One of the leaders of the Bene-Adonikam, who returned from Babylon with Ezra (Ezra viii. 13, B. 'Αλιφάτ, A. corrupt). [ELIPHALET, 2.]

6. One of the Bene-Hashum in the time of Ezra who had married a foreign wife and relinquished her (Ezra x. 33; B. 'Ελιφάδ; B^{ab} N. -λεθ, A. 'Ελιφάλετ). [ELIPHALAT.] [G.] [F.]

ELISABETH (Ελισάβετ; B. everywhere 'Ελισάβετ; *Elisabet; Elisabeth*). The name occurs in the O. T. as that of the wife of Aaron (Ex. vi. 23). The Hebrew form is עֲלִישֶׁבֶת (Elisheba), and probably means "God of the oath," on the analogy of Beersheba (Gen. xxi. 31). The MSS. of the LXX. in Ex. vi. 23 represent the word variously as 'Ελισάβετ, 'Ελισάβεθ, 'Ελισάβετ. The LXX. addition of τ (t) or θ (th) is illustrated by comparing the two forms Jehocheba (2 K. xi. 2) and Jehoshabeath (2 Ch. xxii. 11), both used of the wife of Jehoiada. It is remarkable that two wives of high-priests should have borne names so near in signification as Elisheba and Jehosheba [JEHOSHEBA], and that this name should occur again in the N. T.

as that of a priest's wife. An allusion to the meaning of his wife's name may probably be traced in the mention by Zacharias of the oath of God to Abraham (Luke i. 73). Elisabeth was of the family of Aaron, and, like her husband Zacharias, is described as "righteous before God, walking in all the commandments and ordinances of the Lord blameless" (v. 6). A comment of Ambrose on these words led to the citation of both persons in the Pelagian controversy as instances of sinlessness (see *Aug. de Gratia Christi*, xlviii.). They dwelt in a city of Judah in the hill-country, supposed by some to have been Hebron, which was a priests' city (cp. Josh. xxi. 11). Mary the mother of the Lord was her kinswoman (Luke i. 36): hence the relationship between Jesus and the Baptist so prominent in Christian art. She takes rank as a prophetess in virtue of her acknowledgment of the yet unborn Messiah: "Whence is this to me, that the mother of my Lord should come unto me?" (Luke i. 43.) [E. R. B.]

ELISE'US (Ἐλισαῖ; N. T. Rec. Text with B C, Ἐλισσαῖος; Lachm., Westc. and Hort, with A D, Ἐλισαῖος; *Eliseus*, but in Cod. Amiat. *Helisaeus*): the form in which the name ELISHA appears in the E. V. of the Apocrypha and the R. V. of the N. T. (Ecclus. xlviii. 12; Luke iv. 27, R. V. "Elisha"). [F.]

ELI'SHA (עֲלִישָׁא = *God or my God is salvation*; B. Ἐλῑσαῖε, A. Ἐλισαῖε; Joseph. Ἐλισσαῖος; *Elisaeus*), son of Shaphat of Abel-meholah.* The attendant and disciple (καὶ μαθητὴς καὶ δῆκονος, Jos. Ant. viii. 13, § 7) of Elijah, and subsequently his successor as prophet of the kingdom of Israel.

The earliest mention of his name is in the command to Elijah in the cave at Horeb (1 K. xix. 16, 17). But our first introduction to the future prophet is in the fields of his native place. Abel-meholah—the "meadow of the dance"—was probably at *Ain el-Heluch* in the valley of the Jordan, and, as its name would seem to indicate, in a moist or watered situation. [ABEL.] Elijah, on his way from Sinai to Damascus by the Jordan valley, lighted on his successor engaged in the labours of the field, twelve yoke before him, and he with the last, i.e. eleven yoke of oxen with their ploughs were before him, and he with the twelfth plough at the end. To cross to him, to throw over his shoulders the rough mantle—a token at once of investiture with the prophet's office, and of adoption as a son—was to Elijah but the work of an instant, and the prophet strode on as if what he had done were nothing—"Go back again, for what have I done unto thee?"

So sudden and weighty a call, involving the relinquishment of a position so substantial and family ties so dear, might well have caused hesitation. But the parley was only momentary. To see a figure which we may almost believe to have been suggested by this very occurrence,

Elisha was not a man who, having put his hand to the plough, was likely to look back; "he delayed merely to give the farewell kiss to his father and mother, and preside at a parting feast with his people, and then followed the great prophet on his northward road, to become to him what in the earlier times of his nation Joshua^a had been to Moses.

Of the nature of this connexion we know hardly anything. "Elisha the son of Shaphat, who poured water on the hands of Elijah," is all that is told us. The characters of the two men were thoroughly dissimilar; but how far the lion-like daring and courage of the one had infused itself into the other, we can judge from the few occasions on which it blazed forth, while every line of the narrative of Elijah's last hours on earth bears evidence how deep was the personal affection which the stern, rough, reserved master had engendered in his gentle and pliant disciple.

Seven or eight years must have passed between the call of Elisha and the removal of his master, and during the whole of that time we hear nothing of him. But when that period had elapsed, he reappears, to become the most prominent figure in the history of his country during the rest of his long life. In almost every respect Elisha presents the most complete contrast to Elijah. The copious collection of his sayings and doings which are preserved in the 3rd to the 9th chapters of the 2nd Book of Kings, though in many respects deficient in that remarkable vividness which we have noticed in the records of Elijah, is yet full of testimonies to this contrast. Elijah was a true Bedawin child of the desert. The clefts of the Cherith, the wild shrubs of the desert, the cave at Horeb, the top of Carmel, were his haunts and his resting-places. If he entered a city, it was only to deliver his message of fire and be gone. Elisha, on the other hand, was a civilised man, an inhabitant of cities. He passed from the translation of his master to dwell (2 K. A. V. "tarry") at Jericho (2 K. ii. 18); from thence he "returned" to Samaria (v. 25). At Samaria (v. 3, vi. 32, cp. v. 24) and at Dothau (vi. 13) he seems regularly to have resided in a house (v. 9, 24, vi. 32, xiii. 17) with "doors" and "windows," in familiar intercourse with the sons of the prophets, with the elders (vi. 32), with the lady of Shunem, the general of Damascus, the king of Israel. Over the king and the "captain of the host" he seems to have possessed some special influence, capable of being turned to material advantage if desired (2 K. iv. 13). And as with his manners, so with his appearance. The touches of the narrative are very slight, but we can gather that his dress was the ordinary garment of an Israelite, the *beged*, probably similar in form to the long *abbeys* of the modern Syrians (2 K. ii. 12); that his hair was worn trimmed behind, in contrast to the disordered locks of Elijah (ii. 23, as explained below); and that he used a walking-staff (iv. 24)

* The story in the *Chron. Paschale* and Epiphanius is that when Elisha first saw the light the golden calf at Olgilal roared, so loud as to be heard at Jerusalem. "He shall destroy their graven and their molten images" (Fabricius, p. 1071).

^b So our translation, and so the Jewish rendering (Zunz). Other Versions interpret the passage differently.

^a According to Josephus (Ant. viii. 13, § 7), he began to prophesy immediately.

^c The word עֶלְיָא (A. V. "ministered to him") is the same that is employed of Joshua. Gehazi's relation to Elisha, except once, is designated by a different word, נָשָׂא = "led" or "youth."

of the kind ordinarily carried by grave or aged citizens (*Zech. viii. 4*). What use he made of the rough mantle of Elijah, which came into his possession at their parting, does not anywhere appear, but there is no hint of his ever having worn it.

If from these external peculiarities we turn to the internal characteristics of the two, and to the results which they produced on their contemporaries, the differences which they present are highly instructive. Elijah was emphatically a destroyer. His mission was to elay and to demolish whatever opposed or interfered with the rights of Jehovah, the Lord of Hosts. The nation had adopted a god of power and force, and they were shown that he was feebleness itself compared with the God Whom they had forsaken. But after Elijah the destroyer comes Elisha the healer. "There shall not be dew nor rain these years" is the proclamation of the one. "There shall not be from thence any dearth or barren land" is the first miracle of the other. What may have been the disposition of Elijah when not engaged in the actual service of his mission we have unhappily no means of knowing. Like most men of strong stern character, he had probably affections not less strong. But it is impossible to conceive that he was accustomed to the practice of that beneficence which is so strikingly characteristic of Elisha, and which comes out at almost every step of his career. Still more impossible is it to conceive him exercising the tolerance towards the person and the religion of foreigners for which Elisha is remarkable,—in communication, for example, with Naaman or Hazael; in the one case calming with a word of peace the scruples of the new proselyte, anxious to reconcile the due homage to Rimmon with his allegiance to Jehovah; in the other case contemplating with tears, but still with tears only, the evil which the future king of Syria was to bring on his country. That Baal-worship was prevalent in Israel even after the efforts of Elijah, and that Samaria was its chief seat, we have the evidence of the narrative of Jehu to assure us (*2 K. x. 18-27*), but yet not one act or word in disapproval of it is recorded of Elisha. True, he could be as zealous in his feelings and as cutting in his words as Elijah. "What have I to do with thee?" says he to the son of Ahab—"this son of a murderer," as on another occasion he called him—"What have I to do with thee? get thee to the prophets of thy father and to the prophets of thy mother. As the Lord of Hosts liveth before Whom I stand"—the very formula of Elijah—"surely were it not that I regard the presence of Jehoshaphat king of Judah, I would not look toward thee nor see thee!" But after this expression of wrath, he allows himself to be calmed by the music of the minstrel, and ends by giving the three kings the counsel which frees them from their difficulty. So also he smites the host of the Syrians with blindness, but it is merely for a temporary purpose; and the adventure concludes by his preparing great provision for them, and sending these enemies of Israel and worshippers of false gods back unharmed to their master.

In considering these differences the fact must not be lost sight of that, notwithstanding their greater extent and greater detail, the notices of

Elisha really convey a much more imperfect idea of the man than those of Elijah. The prophets of the nation of Israel—both the predecessors of Elisha, like Samuel and Elijah, and his successors, like Isaiah and Jeremiah—are represented to us as preachers of righteousness, or champions of Jehovah against false gods, or judges and deliverers of their country, or counsellors of their sovereign in times of peril and difficulty. Their miracles and wonderful acts are introduced as means towards these ends, and are kept in the most complete subordination thereto. But with Elisha, as he is pictured in these narratives, the case is completely reversed. With him the miracles are everything, the prophet's work nothing. The man who was for years the intimate companion of Elijah, on whom Elijah's mantle descended, and who was gifted with a double portion of his spirit,* appears in these records chiefly as a worker of prodigies, a predictor of future events, a revealer of secrets and of things happening out of sight or at a distance. The working of wonders seems to be a mutual accompaniment of false religions, and we may be sure that the Baal-worship of Samaria and Jezreel was not free from such arts. The story of *1 K. xii.* shows that even before Elisha's time the prophets had come to be looked upon as diviners, and were consulted, not on questions of truth and justice, nor even as depositaries of the purposes and will of the Deity, but as able to foretell how an adventure or a project was likely to turn out, whether it might be embarked in without personal danger or loss. But if this degradation is inherent in false worship, it is no less a principle in true religion to accommodate itself to a state of things already existing, and out of the forms of the alien or the false to produce the power of the true.[†] And thus Elisha appears to have fallen in with the habits of his fellow-countrymen. He wrought, without reward and without ceremonial, the cures and restorations for which the soothsayers of Baalzebub at Ekron were consulted in vain: he warned his sovereign of dangers from the Syrians which the whole four hundred of his prophets had not succeeded in predicting to Ahab, and thus in one sense we may say that not less signally than Elijah he vanquished the false gods on their own field. But still even with this allowance it is difficult to help believing that the

* The ordinary meaning put upon this phrase (see, for example, J. H. Newman, *Subj. of the Day*, p. 191) is that Elisha possessed double the power of Elijah. This, though sanctioned by the renderings of the Vulgate and Luther, and adopted by a long series of commentators from S. Ephraem Syrus to Pastor Krummacher, would appear not to be the real force of the words. *כִּשְׁתֵּי* *רוּחַ*, literally "a mouth of two"—a double mouthful—is the phrase employed in *Deut. xxi. 17* to denote the amount of a father's goods which were the right and token of a firstborn son. Thus the gift of the "double portion" of Elijah's spirit was but the legitimate conclusion of the act of adoption which began with the casting of the mantle at Abel-meholah years before. This explanation is given by Grotius and others (see Kell ad loco). Ewald (*Geach. iii. 507*) gives it as *nam Zweidrittel, und auch diese kaum—two-thirds, and hardly that*. For a curious calculation by S. Peter Damianus, that Elijah performed 12 miracles and Elisha 24, see the *Acta Sanctorum*, July 20.

[†] See Stanley's *Canterbury Sermons*, p. 320.

anecdotes of his life (if the word may be permitted, for we cannot be said to possess his biography) were thrown into their present shape at a later period, when the idea of a prophet had been lowered from its ancient elevation to the level of a mere worker of wonders. A biographer who held this lower idea of a prophet's function would regard the higher duties above alluded to as comparatively unworthy of notice, and would omit all mention of them accordingly. In the enlogium of Elisha contained in the catalogue of worthies of Ecclus. xlviii. 12-14—the only later mention of him save the passing allusion of Luke iv. 27—this view is more strongly brought out than in the earlier narrative:—"Whilst he lived, he was not moved by the presence of any prince, neither could any bring him into subjection. No word could overcome him, and after his death his body prophesied. He did wonders in his life, and at his death were his works marvellous."

But there are other considerations from which the incompleteness of these records of Elisha may be inferred:—(1.) The absence of marks by which to determine the dates of the various occurrences. The "king of Israel" is continually mentioned, but we are left to infer what king is intended (2 K. v. 5, 6, 7, &c.; vi. 8, 9, 21, 26; vii. 2; viii. 3, 5, 6, &c.). This is the case even in the story of the important events of Naaman's cure, and the capture of the Syrian host at Dothan. The only exceptions are iii. 12 (cp. v. 6), and the narrative of the visit of Jehoash (xiii. 14, &c.), but this latter story is itself a proof of the disarrangement of these records, occurring as it does after the mention of the death of Jehoash (v. 13), and being followed by an account of occurrences in the reign of Jehoahaz his father (vv. 22, 23). (2.) The absence of chronological sequence in the narratives. The story of the Shunammite embraces a lengthened period, from before the birth of the child till he was some years old. Gehazi's familiar communication with the king, and therefore the story which precedes it (viii. 1, 2), occurred before he was struck with leprosy, though placed long after the relation of that event (v. 27). (3.) The different stories are not connected by the form of words usually employed in the consecutive narrative of these Books (see Keil, *Kings*, p. 348, where other indications will be found).

With this preface we pass to the consideration of the several occurrences preserved to us in the life of the Prophet.

The call of Elisha seems to have taken place about four years before the death of Ahab. He died in the reign of Joash, the grandson of Jehu. This embraces a period of not less than 65 years, for certainly 55 of which he held the office of "prophet in Israel" (2 K. v. 8).^a

^a The figures given above are arrived at as follows:—

Ahab's reign after Elisha's call, say	4 years.
Ahaziah's do.	2 "
Joram's do.	12 "
Jehu's do.	28 "
Jehoahaz's do.	17 "
Joash, before Elisha's death, say	2 "

65

Out of the above Elijah lived probably 9 years; the 4 of Ahab, the 2 of Ahaziah, and say 3 of Joram: which leaves 56 years from the ascent of Elijah to the death of Elisha.

1. After the departure of his master, Elisha returned to dwell^b at Jericho (2 K. ii. 18). The town had been lately rebuilt (1 K. xvi. 34), and was the residence of a body of the "sons of the prophets" (2 K. ii. 5, 15). No one who has visited the site of Jericho can forget how prominent a feature in the scene are the two perennial springs which send their streams across the plain towards the Jordan, scattering, even at the hottest season, the richest and most grateful vegetation over what would otherwise be a bare tract of sandy soil. At the time in question part at least of this charm was wanting. One of the springs was noxious—had some properties which rendered it unfit for drinking, and also prejudicial to the land (ii. 19, עַיִן בַּד = bad, A. V. and R. V. "naught"). At the request of the men of Jericho Elisha remedied this evil. He took salt in a new vessel, and cast it into the water at its source in the name of Jehovah. From the time of Josephus (*B. J.* iv. 8, § 3) to the present (*Saewulf, Mod. Trav.* p. 17; Mandeville; Mandrell; *Rob. i.* 554-5), the tradition of the cure has been attached to the large spring N.W. of the present town, and which now bears, probably in reference to some later event, the name of *Ain es-Sultân*.^c

2. We next meet with Elisha at Bethel, in the heart of the country, on his way from Jericho to Mount Carmel (2 K. ii. 23). His last visit had been made in company with Elijah on their way down to the Jordan (ii. 2). Sons of the prophets resided there, but still it was the seat of the calf-worship, and therefore a prophet of Jehovah might expect to meet with insult, especially if not so well known and so formidable as Elijah. The road to the town winds up the defile of the *Wady Suweinit*, under the hill which still bears what in all probability are the ruins of Ai, and which, even now retaining some trees, was at that date shaded by a forest, thick and the haunt of savage animals.^d Here the boys of the town were clustered, waiting, as they still wait at the entrance of the villages of Palestine, for the chance passer-by. In the short-trimmed locks of Elisha, how were they to recognise the successor of the prophet, with whose shaggy hair streaming over his shoulders they were all familiar? So with the licence of the Eastern children they scoff at the new comer as he walks by—"Go up, roundhead! go up, roundhead!"

^b Heb. דָּוַל; A. V. generally "dwelt," but here "tarried" (so R. V.).

^c This, or *Ain Hajlak*, in the same neighbourhood, is probably the spring intended by Scott in the opening chapter of the *Tulisman*, under the name of the "Diamond of the Desert." But his knowledge of the topography is evidently most imperfect.

^d The "lion" and the "bear" are mentioned as not uncommon by Amos (v. 19), who resided certainly for some time in the neighbourhood of Bethel (see vii. 19; also iv. 4; v. 5). The word used for the "forest" is עֵץ, *ya'ar*, implying a denser growth than *choreah*, more properly a "wood" (Stanley, *S. & P.* App. § 73).

^e עַלְלָה, "go up," can hardly, as Abarbanel would have it, be a scoff at the recent ascent of Elijah. The word rendered above by "roundhead" (קִרְקִי), A. V.

and R. V. "bald-head," is a peculiar Hebrew term for shortness of hair at the back of the head, as distinguished from קִרְקִי, bald to front; A. V. "forehead-bald." This is noticed by Ewald (*iii.* 512).

For once Elisha assumed the sternness of his master. He turned upon them and cursed them in the Name of Jehovah, and we all know the catastrophe which followed. The destruction of these children has been always felt to be a difficulty. It is so entirely different from anything elsewhere recorded of Elisha—the one exception of severity in a life of mildness and beneficence—that it is perhaps allowable to conclude that some circumstances have been omitted in the narrative, or that some expression has lost its special force, which would have explained and justified the apparent disproportion of the punishment to the offence.

3. Elisha extricated Jehoram king of Israel, and the kings of Judah and Edom, from their difficulty in the campaign against Moab, arising from want of water (iii. 4-27). The revolt of Moab occurred very shortly after the death of Ahab (iii. 5, cp. i. 1), and the campaign followed immediately—"the same day" (iii. 6; A. V. and R. V. "time"). The prophet was with the army; according to Josephus (*Ant.* ix. 3, § 1), he "happened to be in a tent (*ἐν τῇ κατασκήνωσιν*) outside the camp of Israel." *Joram* he refuses to hear except out of respect for Jehoshaphat, the servant of the true God; but a minstrel is brought, and at the sound of music the hand of Jehovah comes upon him, and he predicts a fall of rain, and advises a mode of procedure in connexion therewith which results in the complete discomfiture of Moab. This incident probably took place at the S.E. end of the Dead Sea.

4. The widow of one of the sons of the prophets—according to Josephus, of Obadiah, the Steward of Ahab—is in debt, and her two sons are about to be taken from her and sold as slaves. She has no property but a pot of oil. This Elisha causes (in his absence, iv. 5) to multiply, until the widow has filled with it all the vessels which she could borrow. No invocation of Jehovah is mentioned, nor any place or date of the miracle.

5. The next occurrence is at Shunem and Mount Carmel (iv. 8-37). The story divides itself into two parts, separated from each other by several years. (a.) Elisha, probably on his way between Carmel and the Jordan Valley, calls accidentally at Shunem, now *Sölam*, a village on the southern slopes of *Jebel el-Duhy*, the Little Harmon of modern travellers. Here he is hospitably entertained by a woman of substance, apparently at that time ignorant of the character of her guest. There is no occasion here to quote the details of this charming narrative, or the manner in which, as a recompense for her care of the prophet, she was saved from that childless condition which was esteemed so great a calamity by every Jewish wife, and permitted to "embrace a son."

(b.) An interval elapsed of several years. The boy was then old enough to accompany his father to the corn-field, where the harvest was proceeding. The fierce rays of the morning sun were too powerful for him, and he was carried home to his mother only to die at noon. She said nothing of their loss to her husband, but depositing her child on the bed of the man of God, at once started in quest of him to Mount Carmel. The distance is fifteen or sixteen miles, at least four hours' ride; but she was mounted on the

best ass^a in the stable, and she did not slacken rein. Elisha was on one of the heights of Carmel commanding the road to Shunem, and from his position opposite to her (*וַיִּבֹּן*) he recognises in the distance the figure of the regular attendant at the services which he holds here at "new moon and sabbath" (cp. v. 23). He sent Gehazi down to meet her, and inquire the reason of her unexpected visit. But her distress was for the ear of the master, and not of the servant, and she pressed on till she came up to the place where Elisha himself was stationed,^b then throwing herself down in her emotion she clasped him by the feet. Misinterpreting this action, or perhaps with an ascetic feeling of the unholiness of a woman, Gehazi attempted to thrust her away. But the prophet was too profound a student of human nature to allow this—"Let her alone, for her soul is vexed within her, and Jehovah hath hid it from me, and hath not told me." "And she said"—with the enigmatical form of Oriental speech—"did I desire a son of my lord? did I not say, do not deceive me?" No explanation was needed to tell Elisha the exact state of the case. The heat of the season would allow of no delay in taking the necessary steps, and Gehazi was at once despatched to run back to Shunem with the utmost speed.^c He took the prophet's walking-staff in his hand, which he was to lay on the face of the child. The mother and Elisha followed in haste. Before they reached the village the sun of that long, anxious summer afternoon must have set. Gehazi met them on the road, but he had no reassuring report to give, the placing of the staff on the face of the dead boy had called forth no sign of life. Then Elisha entered the house, went up to his own chambers, "and he shut the door on them twain, and prayed unto Jehovah." It was what Elijah had done on a similar occasion, and in this and his subsequent proceedings Elisha was probably following a method which he had heard of from his master. The child was restored to life, the mother was called in, and again fell at the feet of the prophet, though with what different emotions—"and she took up her son and went out." There is nothing in the narrative to fix its date with reference to other events. We here first encounter Gehazi the "servant" of the man of God.^d It must of course have occurred before the events of viii. 1-6, and therefore before the cure of Naaman, when Gehazi became a leper.

6. The scene now changes to Gilgal, apparently at a time when Elisha was residing there (iv. 38-41). The sons of the prophets were sitting round him. It was a time of famine, possibly the same seven years' scarcity which is mentioned in viii. 1, 2, and during which the Shunammite woman of the preceding story migrated to the

^a *וַיִּבֹּן* = "the she-ass." She-asses were, and still are, most esteemed in the East.

^b The A. V. and R. V. in iv. 27 render *וַיִּבֹּן*, "the mount," by "the hill," thus obscuring the connexion with v. 25, "Mount Carmel."

^c "Gird up thy loins and go."

^d *וַיִּבֹּן*, i.e. the lad or youth, a totally different term to that by which the relation of Elisha to Elijah is designated—see p. 918, n. 4; though the latter is also occasionally applied to Gehazi.

Philistine country. The food of the party would consist of any herbs that could be found. The great caldron was put on at the command of Elisha, and one of the company brought his blanket (לַבִּי; not "lap" as in A. V. and R. V.) full of such wild vegetables as he had collected, and emptied it into the pottage. But no sooner had they begun their meal than the taste betrayed the presence of some noxious herb,^a and they cried out, "There is death in the pot, O man of God!" In this case the cure was effected by meal which Elisha cast into the stew, in the caldron. Here again there is no invocation of the Name of Jehovah.

7. (iv. 42-44.) This in all probability belongs to the same time, and also to the same place, as the preceding. A man from Baal-shalisha brings the man of God a present of the first-fruits, which under the Law (Num. xviii. 8, 12; Deut. xviii. 3, 4) were the perquisite of the ministers of the sanctuary—20 loaves of the new barley, and some delicacy, the exact nature of which is disputed, but which seems most likely to have been roasted ears of corn not fully ripe,^b brought with care in a sack or bag.^c This moderate provision is by the word of Jehovah rendered more than sufficient for a hundred men.

This is one of the instances in which Elisha is the first to anticipate in some measure the miracles of Christ.

The mention of Baal-shalisha gives great support to the supposition that the Gilgal mentioned here (v. 38) as being frequented by the sons of the prophets, and therefore the same place as that in ii. 1, was not that near Jericho; since Baal-shalisha or Beth-shalisha is fixed by Eusebius at 15 Roman miles north of Lydda, the very position in which we still find the name of Gilgal lingering as *Jiljûlîeh*. [GILGAL.]

8. The simple records of these domestic incidents amongst the sons of the prophets are now interrupted by an occurrence of a more important character (v. 1-27).

The chief captain of the army of Syria, to whom his country was indebted for some signal success,^d was afflicted with leprosy, and that in

^a For a full discussion of the nature of this herb see the article "Pakyeth" by the late Dr. Forbes Royle in *Kitto's Cyclop.* One kind of small gourd has received the name *Cucumis prophetarum* in allusion to this circumstance; but Dr. R. inclines to favour *C. colocynthis*, the colocynth, or *Momordica elaterium*, the squinting cucumber. This is surely impossible.

^b The Hebrew expression עָרְבָה seems to be elliptical for עָרְבָה עָרְבָה (Lev. II. 14; A. V. "green ears of corn," R. V. "corn in the ear"). The same allusion occurs in Lev. xxiii. 14 (A. V. "green ears," R. V. "fresh ears"). The old Hebrew interpretation is "tender and fresh ears." Gesenius (*Thes.* p. 713) makes it out to be grains or grits. The passage in Lev. ii. 14, compared with the common practice of the East in the present day, suggests the meaning given above.

^c עֲקָלֹן; LXX. *ῥίπα*. The word occurs only here. The meaning given above is recognised by the majority of the Versions and by Gesenius, and is adopted in the text ("sack") of the R. V.

^d The tradition of the Jews is that it was Naaman who killed Ahab (*Midrash Tehillim*, p. 29 b, on Ps. xxviii.).

its most malignant form, the white variety (v. 27). In Israel this would have disqualified him from all employment and all intercourse (2 K. xv. 5; 2 Ch. xxvi. 20, 21). But in Syria no such practice appears to have prevailed; Naaman was still a "great man with his master," "a man of countenance." One of the members of his establishment was an Israelite girl, kidnapped by the marauders^e of Syria in one of their forays over the border, and she brought into that Syrian household the fame of the name and skill of Elisha. "The prophet in Samaria," who had raised the dead, would, if brought "face to face" with the patient, have no difficulty in curing even this dreadful leprosy. The news was communicated by Naaman himself^f to the king. Benhadad had yet to learn the position and character of Elisha. He wrote to the king of Israel a letter very characteristic of a military prince, and curiously recalling words uttered by another military man in reference to the cure of his sick servant many centuries later—"I say to this one, Go, and he goeth; and to my servant, Do this, and he doeth it." "And now"—so ran Benhadad's letter after the usual complimentary introduction had probably opened the communication—"and now, when this letter is come unto thee, behold I have sent Naaman, my slave, to thee, that thou mayest recover him of his leprosy." With this letter, and with a present, in which the rich fabrics,^g for which Damascus has been always in modern times so famous, formed a conspicuous feature, and with a full retinue of attendants (vv. 13, 15, 23), Naaman proceeded to Samaria. The king of Israel—his name is not given, but it was probably Joram—was dismayed at the communication. He had but one idea, doubtless the result of too frequent experience—"Consider how this man seeketh a quarrel against me!" The occurrence soon reached the ear of the prophet, and with a certain dignity he "sent" to the king—"Let him come to me, and he shall know that there is a prophet in Israel." To the house of Elisha Naaman went with his whole cavalcade, the "horses and chariot" of the Syrian general fixing themselves particularly in the mind of the chronicler. Elisha still kept in the background, and, while Naaman stood at the doorway, contented himself with sending out a messenger with the simple direction to bathe seven times in the Jordan. The independent behaviour of the prophet, and the simplicity of the prescription—not only devoid of any ceremonial, but absolutely insulting to the native of a city which boasted, as it still boasts, of the finest water-supply of any city of the East—all combined to enrage Naaman. His slaves, however, knew how to deal with the quick but not ungenerous temper of their master, and the result was that he went down to the Jordan and dipped himself seven times, "and his flesh came again like the flesh of a little child, and he was clean." His first business after his cure was to thank his benefactor. He returned with his whole following (עֲבָדָיו, i. e. "host," or

^e Heb. בְּרָדִיִּים, i. e. plunderers, always for irregular parties of marauders.

^f So the Hebrew. A. V. and R. V. "with."

^g A. V. and R. V. (text), "one went in" is quite gratuitous.

^h The word used is לְבָשֶׁת = a dress of ceremony.

"camp"), and this time he would not be denied the presence of Elisha, but making his way in, and standing before him, he gratefully acknowledged the power of the God of Israel, and entreated him to accept the present which he had brought from Damascus. But Elisha was firm, and refused the offer, though repeated with the strongest adjuration. Naaman, having adopted Jehovah as his God, begged to be allowed to take away some of the earth of His favoured country, of which to make an altar. He then consulted Elisha on a difficulty which he foresaw. How was he, a servant of Jehovah, to act when he accompanied the king to the temple of the Syrian god Rimmon? He must bow before the god; would Jehovah pardon this disloyalty? Elisha's answer was "Go in peace," and with this farewell the caravan moved off. But Gehazi, the attendant of Elisha, could not allow such treasures thus to escape him. "As Jehovah liveth"—an expression, in the lips of this vulgar Israelite, exactly equivalent to the oft-repeated *Wallah* ("by God") of the modern Arabs—"I will run after this Syrian and take somewhat of him." So he framed a story by which the generous Naaman was made to send back with him to Elisha's house a considerable present in money and clothes. He then went in and stood before his master as if nothing had happened. But the prophet was not to be so deceived. His heart had gone after his servant through the whole transaction, even to its minutest details, and he visited Gehazi with the tremendous punishment of the leprosy from which he has just relieved Naaman.

This cure of leprosy—the only one which he effected (Luke iv. 27)—is a second miracle in which Elisha, and Elisha only, anticipated our Lord.*

The date of the transaction must have been at least seven years after the raising of the Shunammite's son. This is evident from a comparison of viii. 4 with *cc.* 1, 2, 3. Gehazi's familiar conversation with the king must have taken place before he was a leper.

9. (vi. 1-7.) We now return to the sons of the prophets, but this time the scene appears to be changed, and is probably at Jericho, and during the residence of Elisha there. Whether from the increase of the scholars consequent on the estimation in which the master was held, or from some other cause, their habitation had become too small—"the place in which we sit before thee is too narrow for us." They would therefore move to the close neighbourhood of the Jordan, and cutting down beams—each man one, as with curious minuteness the text relates—make there a new dwelling-place. Why Jordan was selected is not apparent. Possibly for its distance from the distractions of Jericho—possibly the spot was one sanctified by the crossing of Israel with the Ark, or of Elijah, only a few years before. Urged by his disciples, the man of God consented to accompany them. When they reached the Jordan, descending to the level of the stream, they commenced felling the trees^b of the

dense belt of wood in immediate contact with the water. [JORDAN.] As one of them was cutting at a tree overhanging the stream, the iron of his axe (a borrowed tool) flew off and sank into the water. His cry soon brought the man of God to his aid. The stream of the Jordan is deep up to the very bank, especially when the water is so low as to leave the wood dry, and is moreover so turbid that search would be useless. But the place at which the lost axe entered the water was shown to Elisha; he broke off^c a stick and cast it into the stream, and the iron appeared on the surface, and was recovered by its possessor. No appeal to Jehovah is recorded here.

10. (vi. 8-23.) Elisha was now residing at Dothan, halfway on the road between Samaria and Jezreel. The incursions of the Syrian marauding bands^d (*cp.* v. 2) still continued: but apparently with greater boldness, and pushed even into places which the king of Israel was accustomed to frequent.^e But their manœuvres are not hid from the man of God, and by his warnings he saves the king "not once nor twice." So baffled were the Syrians by these repeated failures, as to make their king suspect treachery in his own camp. But the true explanation was given by one of his own people—possibly one of those who had witnessed the cure wrought on Naaman, and could conceive no power too great to ascribe to so gifted a person: "Elisha, the prophet in Israel, telleth the king of Israel the words that thou speakest in thy bed-chamber." So powerful a magician must be seized without delay, and a strong party with chariots was despatched to effect his capture. They marched by night, and before morning took up their station round the base of the eminence on which the ruins of Dothan still stand. Elisha's servant—not Gehazi, but apparently a new comer, unacquainted with the powers of his master—was the first to discover the danger. But Elisha remained unmoved by his fears; and at his request the eyes of the youth were opened to behold the spiritual guards which were protecting them, horses and chariots of fire filling the whole of the mountain. But this was not enough. Elisha again prayed to Jehovah, and the whole of the Syrian warriors were struck blind. He then descended, and offered to lead them to the person and the place which they sought. He conducted them to Samaria. There, at the prayer of the prophet, their sight was restored, and they found themselves not in a retired country village, but in the midst of the capital of Israel, and in the presence of the king and his troops. His enemies thus completely in his grasp, the king of Israel was eager to destroy them. "Shall I slay? shall I slay, my father?" But the end of Elisha had been answered when he had shown the Syrians how futile were all their attempts against his superior power. "Thou shalt not slay. Thou

* The Hebrew word קָצַב occurs only once besides this place. Its exact force is not clear, but the LXX. render it ἀναιρεῖν, "he pinched off."

^b כְּדָרִים, always with the force of irregular ravaging.

^c See v. 23.

^d The expression is peculiar—"beware thou pass not by such a place." Josephus (*ix.* 4, § 3) says that the king was obliged to give up hunting in consequence.

^a The case of Miriam (*Num.* xii. 10-15) is different. Human agency appears to have done nothing towards her cure.

^b So the Hebrew, כְּדָרִים.

mayest slay those whom thou hast taken captive in lawful fight, but not these: feed them, and send them away to their master." After such a repulse it is not surprising that the marauding forays of the Syrian troops ceased.

11. (vi. 24—vii. 2.) But the king of Syria could not rest under such dishonour. He abandoned his marauding system, and gathered a regular army, with which he laid siege to SAMARIA. The awful extremities to which the inhabitants of the place were driven need not here be recalled. Roused by an encounter with an incident more ghastly than all, and which remained without parallel in Jewish records till the unapeakable horrors of the last days of Jerusalem (Joseph. *B. J.* v. 10, § 3; 13, § 7, &c.), the king vented his wrath on the prophet, probably as having by his share in the last transaction,* or in some other way not recorded, provoked the invasion; possibly actuated by the spite with which a weak bad man in difficulty often regards one better and stronger than himself. The king's name is not stated in the Bible, but there can be no doubt that Josephus is correct in giving it as Joram; and in keeping with this is his employment of the same oath which his mother Jezebel used on an occasion not dissimilar (1 K. xix. 2), "God do so to me and more also, if the head of Elisha the son of Shaphat shall stand on him this day." No sooner was the word out of the king's mouth than his emissary started to execute the sentence. Elisha was in his house, and round him were seated the elders of Samaria, doubtless receiving some word of comfort or guidance in their sore calamity. He received a miraculous intimation of the danger. Ere the messenger could reach the house, he said to his companions, "See how this son of a murderer[†] hath sent to take away my head! . . . Shut the door, and keep him from entering: even now I hear the sound of his master's feet behind him, hastening to stay the result of his rash exclamation!"[‡] As he said the words the messenger arrived at the door, followed immediately, as the prophet had predicted, by the king and by one of his officers, the lord on whose hand he leaned. What follows is very graphic. The king's hereditary love of Baal bursts forth, and he cries, "This evil is from Jehovah," the ancient enemy of my house; "why should I wait for Jehovah any longer?" To this Elisha answers: "Hear the word of Jehovah"—He Who has sent famine can also send plenty—"to-morrow at this time shall a measure of flour be sold for a shekel, and two measures of barley for a shekel, in the gate of this very city." "This is folly," says the officer: "even if Jehovah were to make windows in heaven and pour down the provisions, it could not be." "It can, it shall," replies Elisha; "and you, you shall see it all, but shall not live even to taste it."

12. (viii. 1-6.) We now go back several years to an incident connected with the lady of Shunem,

at a period antecedent to the cure of Naaman and the transfer of his leprosy to Gehazi (v. 1, 27).

Elisha had been made aware of a famine which Jehovah was about to bring upon the land for seven years; and he had warned his friend the Shunammite thereof that she might provide for her safety. Accordingly she had left Shunem with her family, and had taken refuge in the land of the Philistines—that is, in the rich corn-growing plain on the sea-coast of Judah—where secure from want she remained during the dearth. At the end of the seven years she returned to her native place, to find that during her absence her house with the field-land attached to it—the corn-fields of the former story—had been appropriated by some other person. In Eastern countries kings are (or were) accessible to the complaints of the meanest of their subjects to a degree inconceivable to the inhabitants of the Western world.[§] To the king therefore the Shunammite had recourse, as the widow of Tekoah on a former occasion to king David (2 Sam. xiv. 4). And now occurred one of those rare coincidences which it is impossible not to ascribe to something more than mere chance. At the very moment of the entrance of the woman and her son—clamouring, as Oriental suppliants alone clamour,^{||} for her home and her land—the king was listening to a recital by Gehazi of "all the great things which Elisha had done," the crowning feat of all being that which he was then actually relating—the restoration to life of the boy of Shunem. The woman was instantly recognised by Gehazi. "My lord, O king, this is the woman, and this is her son whom Elisha restored to life." From her own mouth the king heard the repetition of the wonderful tale, and, whether from regard to Elisha, or struck by the extraordinary coincidence, ordered her land to be restored, with the value of all its produce during her absence.

13. (viii. 7-15.) Hitherto we have met with the prophet only in his own country. We now find him at Damascus.[¶] He is there to carry out the command given to Elijah on Horeb to "anoint Hazael to be king over Syria." At the time of his arrival Benhadad was prostrate with his last illness. This marks the time of the visit as after the siege of Samaria, which was conducted by Benhadad in person (cp. vi. 24). The memory of the cure of Naaman, and of the subsequent disinterestedness of the prophet, were no doubt still fresh in Damascus; and no sooner did he enter the city than the intelligence was carried to the king—"the man of God is come hither." The king's first desire was naturally to ascertain his own fate; and Hazael, who appeared to have succeeded Naaman, was commissioned to be the bearer of a present to the prophet, and to

* Instances of this are frequent in the *Arabian Nights*. Ibrahim Pacha, the famous son of Muhammad Ali, used to hold an open court in the garden of his palace at Akko (Acre), for complaints of all kinds and from all classes.

† *בָּרָא* (A. V. "cry"); a word denoting great vehemence.

‡ The traditional spot of his residence on this occasion is shown in the synagogue at Jobar (? Hobah), a village about 2 miles E. of Damascus. The same village, if not the same building, also contains the cave in which Elijah was fed by ravens and the tomb of Gehazi (Stanley, p. 412; Quaresmius, ii. 381—"cavea et mendacia Hebræorum").

§ This interpretation is that of the Targum, De Wette, and others, and gives a better sense than that of the A. V. and R. V. The original will perhaps bear either.

¶ Josephus, *Ant.* ix. 4, § 4.

|| Surely an allusion to Ahab (Joram's father) and Naboth.

¶ Josephus (*Ant.* ix. 4, § 4).

ask the question on the part of his master, "Shall I recover of this disease?" The present is one of royal dimensions; a caravan of forty camels, laden with the riches and luxuries which that wealthy city could alone furnish. The terms of Hazael's address show the respect in which the prophet was held even in this foreign and hostile country. They are identical with those in which Naaman was addressed by his slaves, and in which the king of Israel in a moment of the deepest gratitude and reverence had addressed Elisha himself. "*Thy son Benhadad hath sent me to thee, saying, Shall I recover of this disease?*" The reply, probably originally ambiguous, is doubly uncertain in the present doubtful state of the Hebrew text (cp. A. V. and R. V.); but the general conclusion was unmistakable: "Jehovah hath showed me that he shall surely die." But this was not all that had been revealed to the prophet. If Benhadad died, who would be king in his stead but the man who now stood before him? The prospect was one which drew forth the tears of the man of God. This man was no rash and imprudent leader, who could be baffled and deceived as Benhadad had so often been. Behind that "steadfast" impenetrable countenance was a steady courage and a persistent resolution, in which Elisha could not but foresee the greatest danger to his country. Here was a man who, give him but the power, would "oppress" and "cut Israel short," would "thresh Gilead with threshing instruments of iron," and "make them like the dust by threshing" as no former king of Syria had done, and that at a time when the prophet would be no longer alive to warn and to advise. At Hazael's request Elisha confessed the reason of his tears. But the prospect was one which had no sorrow for Hazael. How such a career presented itself to him may be inferred from his answer. His only doubt was the possibility of such good fortune for one so mean. "But what is thy slave, dog that he is, that he should do this great thing?" To which Elisha replies, "Jehovah hath showed me that thou wilt be king over Syria."

Returning to the king, Hazael told him only half the dark saying of the man of God—"He told me that thou shouldst surely recover." But that was the last day of Benhadad's life. From whose hand he received his death, or what were the circumstances attending it, whether in the bath as has been suggested, we cannot tell.² The general inference, in accordance

with the account of Josephus, is that Hazael himself was the murderer, but the statement in the text does not necessarily bear that interpretation; and, indeed, from the mention of Hazael's name at the end of the passage, the conclusion is rather the reverse.

14. (ix. 1-10.) Two of the injunctions laid on Elijah had now been carried out; the third still remained. Hazael had begun his attacks on Israel by an attempt to recover the stronghold of Ramoth-Gilead (viii. 28), or Ramah, among the mountains on the east of Jordan. But the fortress was held by the kings of Israel and Judah in alliance; and though the Syrians had wounded the king of Israel, they had not succeeded in capturing the place (viii. 28; ix. 15). One of the captains of the Israelite army in the garrison was Jehu, the son of Jehoshaphat, the son of Nimshi. At the time his name was mentioned to Elijah on Horeb he must have been but a youth; now he is one of the boldest and best known of all the warriors of Israel. He had seen the great prophet once, when with his companion Bidkar he attended Ahab to take possession of the field of Naboth, and the scene of that day and the words of the curse then pronounced no subsequent adventure had been able to efface (ix. 25, 36). The time was now come for the fulfilment of that curse by his being anointed king over Israel. Elisha's personal share in the transaction was confined to giving directions to one of the sons of the prophets, and the detailed consideration of the story will therefore be more fitly deferred to another place.³ [Jehu.]

15. Beyond this we have no record of Elisha's having taken any part in the revolution of Jehu, or the events which followed it. He does not again appear till we find him on his deathbed in his own house (xiii. 14-19). Joash, the grandson of Jehu, is now king, and he is come to weep over the approaching departure of the great and good prophet. His words are the same as those of Elisha when Elijah was taken away—"My father! my father! the chariot of Israel and the horsemen thereof!" But it is not a time for weeping. One thought fills the mind of both king and prophet. Syria is the fierce enemy who is gradually destroying the country, and against Syria one final effort must be made before the aid of Elisha becomes unobtainable. What was the exact significance of the ceremonial employed, our ignorance of Jewish customs does not permit us to know, but it was evidently symbolic. The window is opened towards the hated country, the bow is pointed in the same direction, and the prophet laying his hands on the string as if to convey force to the shot, "the arrow of Jehovah's deliverance, the arrow of deliverance from Syria," is discharged. This done, the king takes up the bundle of arrows, and at the command of Elisha beats them on the ground. But he does it with no energy, and the successes of Israel, which might have been so

² Josephus, *Ant.* ix. 4, § 6.

³ Cp. R. V. The A. V. hardly represents the very characteristic turn of the original—given above—and also differs from all the Versions. In the Hebrew the word "dog" has the force of *meanness*, in the A. V. of *cruelty*. For a long comment founded on the reading of the A. V., see H. Bunt, *Lectures on Elisha*, p. 222, &c.

⁴ The word הַמִּצְבֵּי, A. V. "a thick cloth," R. V.

"the coverlet," has been variously conjectured to be a carpet, a mosquito-net (Michaelis), and a bath-mattress. The last is Ewald's suggestion (iii. 523, note), and, taken in connexion with the "water," and with the inference to be drawn from the article attached to the Hebrew word, is more probable than the others. Abbas Pacha is said to have been murdered in the same manner. As to the person who committed the murder, Ewald justly remarks that as a high officer of state Haza

would have no business in the king's bath. Some suppose that Benhadad killed himself by accident, having laid a wet towel over his face while sleeping. See Keil *in loco*.

⁴ The connexion and the contrast between Elisha and Jehu are well brought out by Maurice (*Prophecy and Kings*, Sermon ix.).

prolonged as completely to destroy the foe, are limited to three victories.

16. (xiii. 20-22.) The power of the prophet, however, does not terminate with his death. Even in the tomb* he restores the dead to life. Moab had recovered from the tremendous reverse inflicted on her by the three kings at the opening of Elisha's career (2 K. iii.), and her marauding bands had begun again the work of depredation which Syria so long pursued (2 K. v. 2; vi. 23). The text perhaps infers that the spring—that is, when the early crops were ripening—was the usual period for these attacks; but, be this as it may, on the present occasion they invaded the land “at the coming in of the year.” A man was being buried in the cemetery which contained the sepulchre of Elisha. Seeing the Moabite spoilers in the distance, the friends of the dead man hastened to conceal his corpse in the nearest hiding-place. They chose—whether by design or by accident is not said—the tomb of the prophet; and as the body was cast* into the sepulchre, it came in contact with his bones. The mere touch of those hallowed remains was enough to effect that which in his lifetime had cost Elisha both prayers and exertions—the man “revived and stood up on his feet.” It is the only instance in the whole Bible—Old Testament, New Testament, and Apocrypha—of restoration wrought by the inanimate remains of prophet or saint. It is to this miracle that the Fathers of the 5th century and the divines of the Roman Catholic Church have appealed as a parallel to the numerous alleged cures at the tombs of saints, such as those at the graves of SS. Gervasius and Protasius.¹

Before closing this account of Elisha we must not omit to notice the parallel which he presents to our Lord—the more necessary because, unlike the resemblance between Elijah and John the Baptist, no attention is called to it in the New Testament. Some features of this likeness have already been spoken of.* But it is not merely because he healed a leper, raised a dead man, or increased the loaves, that Elisha resembled Christ, but rather because of that loving gentle temper and kindness of disposition—characteristic of him above all the saints of the Old Testament—ever ready to soothe, to heal, and to conciliate, which attracted to him women and simple people, and made him the universal friend and “father,” not only consulted by kings and generals, but resorted to by widows and poor prophets in their little

* Josephus says that Elisha had a magnificent funeral (κατὰ μέγαλοσπερκεύς, *Ant.* ix. 8, § 6). Is this implied in the expression (xiii. 20), “they buried him”? The rich man in the Gospel is also particularly said to have been “buried” (Luke xvi. 22), i.e. probably in a style befitting his rank.

* If the Hebrew word ירד, translated “let down” to A. V. and “went” in the margin, implies “descent,” the tomb was probably one of those reached by a shaft from above, like the Phœnician and Egyptian tombs, and not the ordinary Hebrew sepulchre entered from the face of the rock. There is some reason to suppose that such tombs were occasionally made by the Jews under the Monarchy.

¹ Augustine's *Confessions* (ix. § 16).

* These resemblances are drawn out, with great beauty, but in some instances rather fancifully, by J. H. Newman (*Sermons on Subj. of the Day, Elisha a Type of Christ, &c.*). See also Rev. Isaac Williams (*Old Test. Characters*).

troubles and perplexities. We have spoken above of the fragmentary nature of the records of Elisha, and of the partial conception of his work as a prophet which they evince. Be it so. For that very reason we should the more gladly welcome those engaging traits of personal goodness which are so often to be found even in those fragments, and which give us a reflection, feeble it is true, but still a reflection, in the midst of the sternness of the Old Dispensation, of the love and mercy of the New.*

Elisha is canonized in the Greek Church; his day is the 14th of June. Under that date his life, and a collection of the few traditions concerning him—few indeed when compared with those of Elijah—will be found in the *Acta Sanctorum*. In the time of Jerome a “mausoleum” containing his remains was shown at Samaria (Reland, p. 980). Under Julian the bones of Elisha were taken from their receptacle and burnt. But notwithstanding this, his relics are heard of subsequently, and the church of S. Apollinaris at Ravenna still boasts of possessing his head. The Carmelites have a special service in honour of Elisha. [G.]

ELI'SHAH (עִלְיָשָׁה; 'Elišā, 'Elišā; Joseph. 'Elišā; *Elisha*), the eldest son of Javan (Gen. x. 4). The residence of his descendants is described in Ezek. xxvii. 7 as the “isles of Elishah” (עִלְיָשָׁה = maritime regions), whence the Phœnicians obtained their purple and blue dyes. Josephus identified the race of Elishah with the Aeolians ('Elišā mēn 'Elišāous ἐαδαίονες, ὅς τις ἦρχεν, Αἰολαῖς δὲ νῦν εἰσὶ, *Ant.* i. 6, § 1). His view, followed by St. Jerome, is adopted by many (cp. Delitzsch, *Genesis* [1887] in loco) in preference to the opinion that Elisha = Elis, and in a more extended sense Peloponnesus, or even Hellas (cp. Orelli in Strack n. Zöckler's *Agf. Komm.* on Ezek. i. c.). It certainly appears correct to treat it as the designation of a race rather than of a locality; and if Javan represents the Ionians, then Elishah represents the Aeolians, whose predilection for maritime situations quite accords with the expression in Ezekiel. In early times the Aeolians were settled in various parts of Greece, Thessaly, Boeotia, Aetolia, Locria, Elis, and Messenia: from Greece they emigrated to Asia Minor, and in Ezekiel's age occupied the maritime district in the N.W. of that country, named after them Aeolia, together with the islands Lesbos and Tenedos. The purple shell-fish was found on this coast, especially at Abydos (Virg. *Georg.* i. 207), Phocæa (Ovid, *Metam.* vi. 9), Sigæum and Lectum (Athen. iii. p. 88). Not much, however, can be deduced from this as to the position of the “isles of Elishah,” as that shell-fish was found in many parts of the Mediterranean, especially on the coast of Laconia (Pausan. iii. 21, § 8). Billmann* (*Gen. l.c.*) would identify Elishah with Southern Italy (Sicilia), and Movers and Fried. Delitzsch (*Wo lag das Paradies?* p. 250) with Carthage. [W. L. B.] [F.]

ELI-SHA'MA (עִלְיָשָׁה מַמָּא = God or my God hath heard. Cp. עִלְיָשָׁה and the Sabæans

* The attitude of Wellhausen, Stade, and Renan towards the history of Elisha is similar to that noted on p. 914, n. 2, with regard to Elijah.—[F.]

עֲלִישָׁפָאֵת and עֲלִישָׁפָאֵת in MV.¹¹; B. [usually] 'Ελίσσαφ, A. 'Ελίσσαφ, the name of several men.

1. Son of Ammiud, the "prince" or "captain" (both נָשִׂיךְ) of the tribe of Ephraim in the Wilderness of Sinai (Num. i. 10; ii. 18; vii. 48; x. 22). From the genealogy preserved in 1 Ch. vii. 26 [B. 'Ελίσσαφ], we find that he was grandfather to the great Joshua.

2. A son of king David. One of the thirteen, or, according to the record of Samuel, of the eleven, sons born to him of his wives after his establishment in Jerusalem (2 Sam. v. 16; 1 Ch. iii. 8, xiv. 7 [B. 'Ελίσσαφ]).

3. (B. 'Ελίσσαφ; A. 'Ελίσσαφ). By this name is also given (in the Hebrew text) in 1 Ch. iii. 6, another son of the same family, who in the other lists is called ELISHUA.

4. A descendant of Judah; the son of Jehamiah (1 Ch. ii. 41). In the Jewish traditions preserved by Jerome (*Qu. Hebr.* on 1 Ch. ii. 41), he appears to be identified with

5. The father of Nathaniah and grandfather of Ishmael "of the seed royal," who lived at the time of the great Captivity (2 K. xxv. 25; Jer. xli. 1).

6. Scribe to king Jehoiakim (Jer. xxxvi. 12, 20, 21).

7. A priest in the time of Jehoshaphat, one of the party sent by that king through the cities of Judah, with the Book of the Law, to teach the people (2 Ch. xvii. 8). [G.] [F.]

ELI-SHA'PHAT (עֲלִישָׁפָאֵת) = *God or my God hath judged*; B. δ' 'Ελίσσαφάν, A. 'Ελίσσαφάν; *Elisaphat*, son of Zichri; one of the "captains of hundreds," whom Jehoiada the priest employed to collect the Levites and other principal people to Jerusalem before bringing forward Joash (2 Ch. xxiii. 1). [G.] [F.]

ELI-SHE'BA (עֲלִישֶׁבָא) = *God or my God is the oath*, i.e. one who swears by, or is a worshipper of, God; B. 'Ελίσσαβέθ, A. 'Ελίσσαβέτ, A*. -βε; *Elisabeth*, the wife of Aaron (Ex. vi. 23). She was the daughter of Aminadab, and sister of Nahshon the captain of the host of Judah (Num. ii. 3), and her marriage to Aaron thus united the royal and priestly tribes. The name in the Gk. and Lat. Versions corresponds to that of Elisabeth, the wife of Zecharias and the mother of St. John the Baptist (Luke i. 7). [W. A. W.] [F.]

ELI-SHU'A (עֲלִישֻׁא) = *God or my God is salvation*; in Sam. B. 'Ελίσου, A. -ι; *Elisur*, one of David's family by his later wives; born after his settlement in Jerusalem (2 Sam. v. 15; 1 Ch. xiv. 5 [B. 'Εκράε, A. 'Ελίσου]). In the list of 1 Ch. iii. 6, the name is given with a slight difference as ELISHAMA. [G.] [F.]

ELI-SYMUS (B. 'Ελίσσυμος, A. -ι-ι; *Lisymus*), 1 Esd. ix. 28. [ELIASHIB.]

ELFU (בְּנֵי 'חֶלֶשׁ, B. -י = Hebr. *Elilu*), one of the forefathers of Judith (Judith viii. 1), and therefore of the tribe of Simeon. [G.]

ELI'UD (עֲלִיאוּד, from the Heb. עֲלִיאוּד, which however does not occur, *God of the Jews*), son of Achim in the genealogy of Christ (Matt. i. 15), four generations above Joseph. His name is

of the same formation as Abiud, and is probably indicative of descent from him. [A. C. H.]

ELI-ZA'PHAN (עֲלִיזָפָן) = *God or my God*

hath protected. Cp. Phoen. עֲלִיזָפָן in MV.¹¹; B. 'Ελίσσαφάν, AF. -ι; *Elisaphan*. 1. A Levite, son of Uzziel, chief of the house of the Kohathites at the time of the census in the Wilderness of Sinai (Num. iii. 30). His family was known and represented in the days of king David (1 Ch. xv. 8 [B. 'Ελίσσαφάν]), and took part in the revivals of Hezekiah (2 Ch. xxix. 13). His name is also found in the contracted form of ELZAPHAN.

2. Son of Parnach; "prince" (נָשִׂיךְ) of the tribe of Zebulun, one of the men appointed to assist Moses in apportioning the land of Canaan (Num. xxxiv. 25). [G.] [F.]

ELIZEUS, A. V. 1611 in Luke iv. 27 (R. V. "Elisha") and Eccles. xlviii. 12. [ELIZEUS.]

ELI'ZUR (עֲלִיזֹר) = *God or my God is (the) rock*; B(usually)AF. 'Ελίσούρ; *Elisur*, son of Shedeur; "prince" (נָשִׂיךְ) of the tribe, and over the host of Reuben, at the time of the census in the Wilderness of Sinai (Num. i. 5; ii. 10; vii. 30, 35; x. 18). [G.] [F.]

EL-KA'NAH (עֲלִקָנָה) = *God hath created or possessed*; *Elkaná*; *Elcana*. 1. Son of Korah, the son of Izhar, the son of Kohath, the son of Levi, according to Ex. vi. 24, where his brothers are represented as being Assir and Abisaph. But in 1 Ch. vi. 22, 23 (Hebr. rr. 7, 8) Assir, Elkanah, and Ebiasaph are mentioned in the same order, not as the three sons of Korah, but as son, grandson, and great-grandson, respectively; and this seems to be correct, though Keil (on 1 Ch. i. c.) prefers to consider them brothers. If so, the passage in Exodus must be understood as merely giving the families of the Korhites existing at the time the passage was penned, which must, in this case, have been long subsequent to Moses. In Num. xxvi. 58, "the family of the Korhites" (A. V. "Korathites") is mentioned as one family. As regards the fact of Korah's descendants continuing, it may be noticed that we are expressly told in Num. xxvi. 11, that when Korah and his company died, "the children of Korah died not."

2. A descendant of the above in the line of Ahimoth, otherwise Mahath, 1 Ch. vi. 26, 35 (Hebr. vv. 11, 20; see Hervey, *Geneal.* pp. 210, 214, note.)

3. Another Kohathite Levite, in the line of Heman the seer. He was son of Jeroham, and father of Samuel, the illustrious Judge and Prophet (1 Ch. vi. 27, 34). All that is known of him is contained in the above notices and in 1 Sam. i. 1, 4, 8, 19, 21, 23, and ii. 2, 20, where we learn that he lived at Ramathaim-Zophim in Mount Ephraim, otherwise called Ramah; that he had two wives, Hannah and Peninnah, but had no children by the former, till the birth of Samuel in answer to Hannah's prayer. We learn also that he lived in the time of Eli the high-priest, and of his sons Hophni and Phinehas; that he was a pious man who went up yearly from Ramathaim-Zophim to Shiloh, in the tribe

of Ephraim, to worship and sacrifice at the Tabernacle there; but it does not appear that he performed any sacred functions as a Levite, — a circumstance quite in accordance with the account which ascribes to David the establishment of the priestly and Levitical courses for the Temple service. He seems to have been a man of some wealth from the nature of his yearly sacrifice, which enabled him to give portions out of it to all his family, and from the costly offering of three bullocks made when Samuel was brought to the House of the Lord at Shiloh. After the birth of Samuel, Elkanah and Hannah continued to live at Ramah (where Samuel afterwards had his house, 1 Sam. vii. 7), and had three sons and two daughters. This closes all that we know about Elkanah.

4. A Levite (1 Ch. ix. 16; B. Ἑλκανά, A. 'EA-).

5. Another man of the family of the Korhites who joined David while he was at Ziklag (1 Ch. xii. 6; BNA. Ἑλκανά). From the terms of v. 2 it is doubtful whether this can be the well-known Levitical family of Korhites. Perhaps it was the same who was afterwards one of the doorkeepers of the Ark (xv. 23).

6. An officer in the household of Ahaz, king of Judah, who was slain by Zichri the Ephraimite, when Pekah invaded Judah. He seems to have been the second in command under the præfect of the palace (2 Ch. xxviii. 7; B. Εἰλκανά, A. 'EA-). [A. C. H.]

ELKOSH (עֶלְקוֹשׁ), the birthplace of the Prophet Nahum, hence called "the Elkoshite," Nah. i. 1 (ὁ Ἑλκωσιεύς; *Elkosesaeus*). Two widely differing Jewish traditions assign as widely different localities to this place. In the time of Jerome it was believed to exist in a small village of Galilee. The ruins of some old buildings were pointed out to this Father by his guide as the remains of the ancient Elkosh (Jerome on Nah. i. 1—possibly El-Kozāh in the map of the PEF., not far from Ramah in Naph-tali). Cyril of Alexandria (*Comm. in Nahum*) says that the village of Elkosh was somewhere or other in the country of the Jews. Pseudo-Epiphanius (*de Vitis prophetarum*, Op. ii. 247) places Elkosh on the east of the Jordan, at Bethabara (εἰς Βηθαβάρ, *Chron. Pasch.* p. 150; Cod. B. has εἰς Βηθαβαρήν), where he says the Prophet died in peace (but this is due to an error: see Nestle, *Zeitsch. d. Deutsch. Paläst.-Vereins*, i. 222 sq.). According to Schwartz (*Descr. of Palestine*, p. 188), the grave of Nahum is shown at *Kefr Tanchum*, a village 2½ English miles north of Tiberias; and Knobel and Hitzig have considered it an earlier name of Capernaum (כַּפְרְנָחָם). But mediaeval tradition, perhaps for the convenience of the Babylonian Jews, attached the fame of the Prophet's burial-place to Alkush, a village on the east bank of the Tigris, near the monastery of Rabban Hormuzd, and about 2 miles north of Mosul. Benjamin of Tudela (p. 53, ed. Asher) speaks of the eynagogen of Nahum, Obadiah, and Jonah at Asshur, the modern *Mosul*. R. Petachia (p. 35, ed. Benisch) was shown the prophet's grave, at a distance of 4 parasangs from that of Baruch, the son of Neriah, which was itself distant a mile from the tomb of Ezekiel. It is mentioned in a letter of Masius, quoted by Asseman (*Bibl.*

Orient. i. 525). Jews from the surrounding districts make a pilgrimage to it at certain seasons. The synagogue which is built over the tomb is described by Colonel Shiel, who visited it in his journey through Kurdistan (*Journ. Geog. Soc.* viii. 93). Rich evidently believed the tradition correct, considering the pilgrimage of the Jews as almost sufficient test (*Kurdistan*, i. 101). The tradition which assigns Elkosh to Galilee is, however, more in accordance with the internal evidence afforded by the prophecy, which gives no sign of having been written in Assyria. [NAHUM.] [W. A. W.] [F.]

ELKOSHITE. [ELKOSH.]

EL-LA'SAR (עֶלְלָסָר; Ἑλλάσαρ; *Pontus*), which has been considered by some to be the Telassar (עֶלְלָסָר or עֶלְלָסָר) of 2 Kings xix. 12 and Is. xxxvii. 12 (so the Targ. of Jerus.), is now regarded as being more probably the Mesopotamian town called by the Akkadians *Arasma*, and by the Semitic inhabitants of that tract *Larriu*, *Larsa*, or *Larsam*, the *Larissa* (Λάρισσα) of the Greeks. It must be confessed that this identification, though defensible, is not quite satisfactory from a philological point of view. The first syllable, *El*, may be regarded as the same as the Bab.-Assyr. *āl*, "city," in which case the remainder of the word, *lasar*, would stand for the *Larsa* of the native records, by interchange of *r* and *s*. On the other hand this identification would be thoroughly satisfactory from a historical point of view. *Larsa* was a town in Lower Babylonia or Chaldea, about halfway between Ur (*Mukeyer*) and Erech (*Warka*), on the left bank of the Euphrates, now represented by the ruins called Senkereh. Important for the early history of Larsa is the fact that one of the kings of Mesopotamia bears the Elamite name Kudur-Mabug (compare the Chedor-Laomer of Gen. xiv. 1, 9). This ruler had a son, to whom was given the Akkadian name of *Eri-Aku*, identified with the *Arioch* of Gen. xiv. 1 (cp. Judith i. 6). Eri-Aku was king of Larsa under his father, and this is just the position which Arioch, king of Ellasar, seems to have occupied with regard to Chedor-Laomer.*

The Mesopotamian Larsa was a city where the sun-god (Šamaš or Shamash) was worshipped, and had many renowned temples. The principal one, called Ê-hara (or Ê-babbara), was built by Ur-Bau, about 2500 B.C., rebuilt anew by Hammurabi, and restored by Nebuchadnezzar and Nabonidus. Cylinders, small clay bas-reliefs, and various tablets (including one giving square and cube roots) have been found among the ruins. See Loftus's *Chaldea*; Oppert's *Expédition*, &c.

[T. G. P.]

ELM (Heb. אֵילָן, *elah*; ἡ τερέβινθος; *terebinthus*) occurs only once in A.V. in Hos. iv. 13, where R.V. rightly reads "terebinth." In

* It is probable, indeed, that Chedor-Laomer was the successor of Kudur-Mabug, as, in Elam, according to G. Smith, the right of succession passed to the brother of the reigning king. Arioch (Eri-Aku) may, therefore, have been in succession vassal to his father and to his uncle. If, however, Chedor-Laomer was also son of Kudur Mabug, Eri-Aku was probably his younger brother.

Is. vi. 13, A. V. renders *elah* "teal tree," and R. V. "terebinth." הָאֵלֶךְ in all other passages is in A. V. rendered "oak;" and in R. V. generally "oak," with marg. *terebinth*. There can be no doubt that this latter rendering, which follows the LXX., is correct. The elm (*Ulmus campestris*, L.) is scarcely to be called a Palestine tree, being only rarely found in the higher parts of Lebanon, where it has most probably been introduced. It is essentially a native of colder climates. The compilers of the LXX. could scarcely fail to be familiar with the terebinth and its Hebrew equivalent, for no tree is more conspicuous throughout the land than the lonely and isolated terebinth (*Pistachia terebinthus*, L.), which from the days of Jacob to the present has been selected that its branches might overshadow the graves of holy or distinguished persons. [H. B. T.]

EL-MO'DAM (עֲלֻמָּדָם , Westc. and Hort, apparently the same as the Heb. עֲלֻמָּדָם , Gen. i. 26; A. Ἐλμωδᾶδ , E. - $\delta\alpha\mu$), son of Er, six generations above Zerubbabel, in the genealogy of Joseph (Luke iii. 28). [ALMODAD.] [A. C. H.]

EL-NA'AM (עֲלֻנָּאָם , ? = *God is grace*; B. Ἐλλαῖα , N¹⁴. Ἐλλαῖα , A. Ἐλναῖα ; *Elnaēm*), the father of Jeribai and Joshaviash, two of David's guard, according to the extended list in 1 Ch. xi. 46. In the LXX. the second warrior is said to be the son of the first, and Elnaam is himself a member of the guard. [G.] [F.]

EL-NATHAN (עֲלֻנָּתָן = *God hath given*. Cp. Adeodatus, Theodorus, and the Phoenician, Palmyrene, Nabatean, and Sabeian parallels collected in MV.¹¹; *Elnathan*). 1. The maternal grandfather of Jehoiachim, distinguished as "Elnathan of Jerusalem" (2 K. xxiv. 8; B. Ἐλνα-ραῖα , A. - μ). He is doubtless the same man as "Elnathan the son of Achbor," one of the leading men in Jerusalem in Jehoiachim's reign (Jer. xxxvi. 12, T¹. Ἐλνᾶθαν , N. Nḁṁar [xl.iii. 12]). Two incidents are recorded of him:—(a) He was one of those commissioned by Jehoiachim to go into Egypt and "fetch forth" Uriah of Kiriath-jearim, who had prophesied against Jerusalem. Jeremiah was saved, but Uriah was slain with the sword (Jer. xxvi. 22-4. The name is omitted by the LXX. [xxxiii. 22-3]). (b) He and two others "made intercession to the king" Jehoiachim that he should not burn Jeremiah's "roll," but without success (Jer. xxxvi. 25; T¹. Ἐλνᾶθαν , A. Nḁṁar [xl.iii. 25]). The variations in the LXX. arise from the names Elnathan, Jonathan, and Nathan having the same sense. 2. The name of three persons, apparently Levites, in the time of Ezra (Ezra viii. 16; B. Ἐλναῖα , Nḁṁar , Ἐλναῖα , A. for the last 'Ἐλ'). In 1 Esd. they are corrupted to ALNATHAN and EUNATHAN. [W. L. B.] [F.]

EL'ON. 1. (אֵילֹן = *an oak*; *Elon*), a Hittite, whose daughter was one of Esau's wives (Gen. xvi. 34 [A. Αἰλῶν , D. Αἰδῶν], xxxvi. 2 [A. Ἐλῶν , E. Αἰλῶν , D. Αἰδῶν]). For the variation in the name of his daughter, see BASHEMATH.

2. (אֵילֹן ; *Elon*), the second of the three sons attributed to Zebulun (Gen. xli. 14, A. Ἀσφῶν ,

D.¹⁰ Ἀλλῶν ; Num. xxvi. 26, BAF. Ἀλλῶν), and the founder of the family (בְּנֵי אֵילֹן) of the

ELONITES (בְּנֵי אֵילֹן). From this tribe came

3. Elon the (not "a") Zebulonite (בֶּן אֵילֹן ; B. Αἰλῶν , A. - ν ; Joseph. Ἡλῶν ; *Alialon*), who judged Israel for ten years, and was buried in Aijalon in Zebulun (Judg. xii. 11, 12). The names "Elon" and "Aijalon" in Hebrew have in common four letters, and differ principally in the vowel-points, so that the place of Elon's burial may have been originally called after him. It will be remarked that the Vulgate does assimilate the two. [G.] [F.]

EL'ON (אֵילֹן ; B. Αἰλῶν , A. Ἰαλῶν ; *Elon*), one of the towns in the border of the tribe of Dan (Josh. xix. 43). It is mentioned between Ajalon (*Yāld*) and Timnah (A. V. Thimnathah, *Tibneh*), and was apparently near the E. border of Dan. The identification is uncertain. Conder (*PEF. Mem.* ii. 293) suggests *Beit Ello*, in the hills 6 miles N. of Upper Beth-horon; but this place must have been in Ephraim. The name in Hebrew signifies a great oak or other strong tree, and may therefore be a testimony to the wooded character of the district. It is possibly the same place as

EL'ON-BETH-HANAN ($\text{בֵּית חָנָן אֵילֹן}$ = *oak of the house of grace*; B. $\text{Ἐλῶν οἴκος Βηθ-λαμᾶν}$, A. $\text{Αἰλῶν οἴκος Βηθανᾶν}$), which is named with Shaalbm and Bethshemesh (*Ain Shems*), two Danite towns, as forming one of Solomon's commissariat districts (1 K. iv. 9). For "Beth-hanan" some Hebrew MSS. have "Ben-hanan," and some "and Beth-hanan;" the latter is followed by the Vulgate, *et in Elon, et in Beth-hanan*. Conder (*Hbk. to Bible*, p. 410) suggests *Beit 'Anān*, in the mountains 4 miles W.N.W. of *Nebi Samwil*, and within the limits of the tribe of Benjamin. [G.] [W.]

ELONITES, THE. Num. xxvi. 26. [ELON, 2.]

ELOTH. 1 K. ix. 26; 2 Ch. viii. 17, xxvi. 2. [ELATH.]

EL-PA'AL (עֲלֵפָאֵל , ? = *God hath rewarded*. Cp. the Phoen. name Παλαῖος , *Bast* being an Egyptian god [MV.¹¹]; B. Ἀλφᾶλ , A. - λ ; *Elphaal*), a Benjamite, son of Hushim and brother of Abitub (1 Ch. viii. 11). He was the founder of a numerous family. The Bene-Elpaal appear to have lived in the neighbourhood of Lydda (Lod), and on the outposts of the Benjamite hills as far as Ajalon (*Yāld*; viii. 12-18), near the Danite frontier. Hushim was the name of the principal Danite family. If the forefather of Elpaal was the same person, his mention in a Benjamite genealogy is an evidence of an intermarriage of the two tribes. [G.] [W.]

EL-PALET (עֲלֵפָאֵל ; B. Ἐλεφᾶλε , N. - $\epsilon\tau$, A. - $\epsilon\tau$; *Elphalet*), one of David's sons born in Jerusalem (1 Ch. xiv. 5). In the parallel list, 1 Ch. iii. 6, the name is given more fully as ELIPHELET. [G.]

EL-PARAN. [PARAN.]

EL-TEKE'H (עֶלְתֶּכֶה; B. 'Αλκαθά, and ἡ 'Ελκεθαίμ, A. 'Ελκεκά; *Elthece*, R. V. *Elteke* in Josh. xxi. 23), one of the cities in the border of Dan (Josh. xix. 44), which with its "suburbs" (עֲרֻבֵּי) was allotted to the Kohathite Levites (xxi. 23). It is however omitted from the parallel list of 1 Ch. vi. Conder (*Hbk. to Bible*, p. 410) and Tristram (*Bible Places*, p. 51) identify it with *Beit Likia*, near the mouth of W. *Selman*, but this place is too far to the north. It is mentioned in the list immediately after Timnah (A. V. Thimnathah, *Tibneh*) and Ekron ('*Akir*'), and it is apparently the same place as Altaku, near which Sennacherib defeated an Egyptian army that was advancing to the relief of Ekron, which he was then besieging. The victory was followed by the surrender of Altaku and the neighbouring town of Tamna (*Tibneh*. Schrader, *KAT* pp. 171 sq., 289 sq.; G. Smith, *Hist. of Assyria*, p. 114). It was near the S. border of Dan, but no trace of the name has yet been discovered. [G.] [W.]

EL-TEKON (עֶלְתֶּקֶן; B. Θέκουμ, A. 'Ελθεκόν; *Eltecon*), one of the towns of the tribe of Judah, in the mountains (Josh. xv. 59). From its mention in company with HALHUL and BETH-ZUR, it was probably about the middle of the country of Judah, a few miles north of Hebron; but it has not yet been identified. It is possibly TEKO'A, which is not mentioned in the list of the towns of Judah in Josh. xv. [G.] [W.]

EL-TO'LAD (עֶלְתֹּלַד; B. 'Ελθουδδδ and 'Ελθουλά, A. 'Ελθουδδδ and 'Ελθουδδδ; *Eltholad*), one of the cities in the south of Judah (Josh. xv. 30) allotted to Simeon (Josh. xix. 4), and in possession of that tribe until the time of David (1 Ch. iv. 29). It is named with Beersheba and other places which we know to have been in the extreme south, on the border of the country; but it has not yet been identified. In 1 Ch. iv. 29 the name is given as TOLAD (B. Θουλαδμ, A. Θουλάδ). [G.] [W.]

ELU'L (עֶלּוּל; δ 'Ελουλά; *Elul*), the name of the sixth month of the Hebrew year, and corresponding to our mid-August to mid-September. The name is *Ululu* in Assyrian. In Neh. vi. 13 it is commemorated as the month in which Nehemiah finished the wall of Jerusalem, and in 1 Macc. xiv. 27 as the month in which the tablets of brass, recording the deeds of Simon Maccabaeus and his brethren, were set upon pillars in Mount Zion. [MONTHS.] [F.]

ELUZAI (עֶלּוּזַי; 'Αζαί, A. 'Ελαιοί; *Eluzai*), one of the warriors of Benjamin, who joined David at Ziklag while he was being pursued by Saul (1 Ch. xii. 5). [G.] [F.]

ELYMAEANS ('Ελυμαῖοι), Judith i. 6. [ELAMITES.]

ELYMA'IS. In the E. V. of 1 Macc. vi. 1 this is given as "a city in the country of Persia, and attacked by Antiochus Epiphanes." The

E. V. followed the rendering of T. N., but such a rendering seems to be a mistake. No such city is known to any writer, and Josephus (*Antiq.* xii. 9, § 1) in mentioning it simply follows the author of 1 Macc. The truer rendering is given in A. *ἐστὶν ἐν Ἐλυμαῖς ... πόλις*, and is adopted by Fritzsche, Rawlinson, and Zöckler. Elymais is therefore the name of a district of Susiana. What city "greatly renowned for riches," and its splendid temple, is meant, is not known. It cannot be Persepolis, a city also attacked by Antiochus (2 Macc. ix. 2), for Persepolis was never reckoned as belonging to Elymais. Cp. *Speaker's Comm.* in loco; and Zöckler in "Die Apokryphen d. A. T." in Strack u. Zöckler's *Kjf. Konm. z. d. heil. Schrift.* A. u. N. Ta. [F.]

ELYMAS ('Ελύμας; *Elymas*) represents either Arabic *عليم*, "learned" (cp. plural

Ulema, the learned in the law of the Koran), or

Aramaic *ܐܠܡܝܐ*, "the strong." His name was Bar-jesus, and Elymas appears to have been a title assumed by him in virtue of his profession. He is described as "a magian, a false prophet, a Jew" (Acts xiii. 6). The word "magian" has a long and obscure history, traceable from the pre-Semitic religions of the East, through the "magi" of the Chaldeans, Medes, Persians, and Parthians (see the admirable art. *Magier* in Herzog, *RE* s. n.). In N. T. times it had come to mean little more than "sorcerer," and its use in Acts is much more normal than its occurrence in an honourable sense in Matt. ii. 1. By adding the designation "false prophet" St. Luke draws the spiritual ancestry of the sorcerer from the false prophets of the O. T. who withstood Micahiah and Jeremiah before rulers, exactly as Bar-jesus withstood St. Paul. Elymas was a Jew, and it was probably not only as a sorcerer but as a Jew that he had gained influence with Sergius Paulus, whose interest in religious questions is proved by his "calling unto him Barnabas and Saul." If Bar-jesus was "perverting the right ways of the Lord," he must already have been in some fashion expounding them. The influence which he had with the Roman official is exactly paralleled by the position which another Jewish magian occupied with Felix (Jos. *Ant.* xx. 7, § 2). The blinding of Elymas, with the death of Ananias and Sapphira, occupy an almost unique position in the N. T. as miracles of punishment. On the one hand, we are reminded of "the spirit of Elias," and of the fatal prediction of Jeremiah against his opponent (Jer. xxviii. 15-17). On the other hand, this miracle has been made the type for countless fabulous miracles of vengeance upon persecutors and heretics. St. Paul met with "many adversaries" in his subsequent career, but, as far as we know, miraculous aid was never again employed to confound them. The nearest approach is in 1 Tim. ii. 20 and 2 Tim. iv. 14. [E. R. B.]
